SUMMARY/DISCUSSION:

The Health Department Clinic Services Bureau (Clinic Services) operates ten community clinic sites designated as Federally Qualified Health Centers (FQHCs) which provide preventive, primary, and specialty medical care services.

Esaote North America is one of the world’s largest leading producers of medical diagnostic systems. Clinic Services first purchased the Esaote MyLabGamma model ultrasound machine in 2016 for patient diagnostic testing in the Alisal Health Center clinic. The purchase was initially made using Central California Alliance for Health equipment grant as a fixed asset purchase under Clinic Services’ product distributor account McKesson, which included an extended services warranty. Now that the original purchase warranty has expired, a separate agreement to continue extended warranty services and software updates for the existing machine is required.

The Board of Supervisors approved similar Agreements with Esaote on September 15, 2020 for the Laurel Family Practice clinics which differed by the unique machine serial numbers per Agreement. Approval of this recommendation will allow extended warranty coverage to continue for the ultrasound machine’s parts repairs, loaners and replacements for the machines, technical support, remote diagnostics and software updates.

This work supports the Monterey County Health Department 2018-2022 Strategic Plan Goal: 2. Enhance community health and safety through prevention. It also supports one or more of the ten essential public health services, specifically: 2. Diagnose and investigate health problems and health hazards in the community.
