**SUMMARY/DISCUSSION:**

Paragon Mechanical, Inc. has been providing Natividad Medical Center (NMC) with preventive maintenance and repair services on various mechanical systems such as boilers, chillers, and the heating, ventilation, and air conditioning (HVAC) units to meet the requirements of the Office of Statewide Health Planning and Development (OSHPD). Paragon possesses expertise on the more complex HVAC components such as commercial refrigeration equipment, including medical grade refrigerators and medical freezers that are regulated and audited by The Joint Commission (TJC) and the state of California through Title 22 and Title 24, and the variable frequency drives (VFD's) as well as on medical air compressors and medical vacuum pumps. These systems and components are vital to patient care as they support equipment and processes in various units, including Laboratory, Radiology, Pharmacy, Labor & Delivery, and Food Services. They also maintain acceptable indoor air quality through proper ventilation which is a key factor in reducing the spread of airborne diseases in addition to maintaining the heating and cooling of the entire hospital.

Approval of the recommended action will allow Paragon Mechanical, Inc. to continue providing preventative maintenance and repair services on the various mechanical systems at NMC.
