SUMMARY:

The application for a wireless communication facility is subject to a Federal Communications Commission declaratory ruling on timelines for processing applications ("shot clock"). In this case, the "shot clock" was extended by written agreement between the applicant and the County to allow additional time to prepare an Initial Study pursuant to the California Environmental Quality Act (CEQA). A hearing before the Zoning Administrator was scheduled soon after the close of the comment period on the Initial Study in accordance with limitations on processing timelines.

Comments were received at the close of the comment period on the Initial Study and additional time is needed

to evaluate and respond to those comments. Therefore, staff, with agreement from the applicant, is recommending that the Zoning Administrator continue this project to a date uncertain while comments received on the Initial Study area addressed.
