SUMMARY/DISCUSSION:

NMC's Electronic Health Record (EHR) MEDITECH transfers data daily to a Data Repository (DR). This Data Repository is key for reporting, data analytics, data to third party vendors, etc. There is a need to ensure that all the data is transferred correctly and completely. NMC uses Blue Elm's DrAuditor tool which automatically validates the process and data transfer to MEDITECH's DR. If the daily transactions between the MEDITECH applications and the DR don't transfer correctly there can be discrepancies and lead

to inaccurate data in the Data Repository. Many of NMC's third party applications rely solely on the DR data and its integrity is critical. DrAuditor helps provide confidence in the Data Repository integrity by comparing records in the MEDITECH transactional environment with the data in the SQL Data Repository. Currently, the tool creates audit reports which allow NMC staff to manually resolve any data discrepancy issues.

NMC is requesting approval to purchase Blue Elm's Requeue module which automatically resolves many data discrepancy types without staff intervention. This ensures quick resolution of data transmission errors and minimal interruption to processes and workflows within NMC.

NMC is requesting approval of NMC Chief Executive Officer's recommendation to accept non-standard indemnification, insurance, limitations on liability, additional insured or blank endorsement and limitations on warrant and indemnity provisions within the agreement.

This agreement underwent extensive vetting by County approvers. There are numerous technical aspects and non-standard risk provisions that were especially negotiated. Services have not been initiated but the start date of this agreement has been maintained to preserve the parties' timeline for implementation.
