 - 2. Flush with Floor Installation: Set unit and extension, if required, with cover flush with finished floor.
 - 3. Recessed Floor Installation: Set unit in receiver housing having bottom or cradle supports, with receiver housing cover flush with finished floor.
 - 4. Install cleanout immediately downstream from interceptors not having integral cleanout on outlet.

- K. Install grease-removal devices on floor. Install trap, vent, and flow-control fitting in accordance with authorities having jurisdiction.
 - 1. Install control panel adjacent to unit unless otherwise indicated.
- L. Install oil and sand & oil interceptors, including trapping, venting, and flow-control fitting, in accordance with authorities having jurisdiction and with clear space for servicing.
 - 1. Coordinate captured waste oil storage tank and/or gravity drain with the Authority Having Jurisdiction.
- M. Install solids interceptors with cleanout immediately downstream from interceptors that do not have integral cleanout on outlet.
 - 1. Install trap on interceptors that do not have integral trap and are connected to sanitary drainage and vent systems.

3.3 PIPING CONNECTIONS

- A. Piping installation requirements are specified in Section 221316 "Sanitary Waste and Vent Piping." Drawings indicate general arrangement of piping, fittings, and specialties.
- B. Make piping connections between interceptors and piping systems.

3.4 ELECTRICAL CONNECTIONS

- A. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- B. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."
- C. Install electrical devices furnished by manufacturer, but not factory mounted, in accordance with NFPA 70 and NECA 1.
- D. Install nameplate for each electrical connection, indicating electrical equipment designation and circuit number feeding connection.
 - 1. Nameplates to be laminated acrylic or melamine plastic signs, as specified in Section 260553 "Identification for Electrical Systems."
 - 2. Nameplates to be laminated acrylic or melamine plastic signs with a black background and engraved white letters at least **1/2 inches (13 mm)** high.

3.5 IDENTIFICATION

- A. Identification materials and installation are specified in Section 312000 "Earth Moving."
 - 1. Arrange for installation of green warning tapes directly over piping and at outside edges of underground interceptors.
 - 2. Use warning tapes or detectable warning tape over ferrous piping.
 - 3. Use detectable warning tape over nonferrous piping and over edges of underground structures.
- B. Equipment Nameplates and Signs: Install engraved plastic-laminate equipment nameplate or sign on or

22 - Plumbing

near each of the following:

1. Grease interceptors.
2. Grease-removal devices.
3. Oil and sand, and oil interceptors.
4. Solids interceptors.
5. Sampling ports.

3.6 PROTECTION

- A. Protect sanitary waste interceptors from damage during construction period.
- B. Repair damage to adjacent materials caused by sanitary waste interceptor installation.

END OF SECTION 22 13 23 00

22 - Plumbing

Task	Specification	Specification Description
22 13 23 00	22 13 19 00	Sanitary Waste Piping Specialties
22 13 23 00	22 13 00 00	Facility Gray-Water Storage Tanks

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 13 29 00 - SANITARY SEWERAGE PUMPS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Submersible effluent pumps.
2. Submersible sewage pumps.
3. Wet-pit-volute sewage pumps.
4. Sewage-pump, reverse-flow assemblies.
5. Sewage-pump basins and basin covers.
6. Progressing-cavity sewage pumps.
7. Packaged, submersible sewage-pump units.
8. Packaged wastewater-pump units.

B. Related Requirements:

1. Section 221429 "Sump Pumps" for applications in storm-drainage systems.
2. Section 333200 "Site Packaged Sewage Pumping Stations" for applications in site-construction sewage pumping.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product indicated. **[Include construction details, material descriptions, dimensions of individual components and profiles.][Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.]**

B. Shop Drawings:

1. Include plans, elevations, sections, and **[mounting][attachment]** details.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Vibration Isolation Base Details: Detail fabrication including anchorages and attachments to structure and to supported equipment. Include adjustable motor bases, rails, and frames for equipment mounting.
4. Include diagrams for power, signal, and control wiring.

1.3 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For pumps and controls, to include in operation and maintenance manuals.

1.4 DELIVERY, STORAGE, AND HANDLING

A. Retain shipping flange protective covers and protective coatings during storage.

- B. Protect bearings and couplings against damage.
- C. Comply with manufacturer's written instructions for handling.

1.5 COORDINATION

- A. Coordinate sizes and locations of concrete bases with actual equipment provided.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
- B. UL Compliance: Comply with UL 778 for motor-operated water pumps.

2.2 SUBMERSIBLE EFFLUENT PUMPS

- A. Submersible, Fixed-Position, Single-Seal Effluent Pumps :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[Barnes; a Crane Pumps & Systems brand]**
 - c. **[Bell & Gossett; a Xylem brand]**
 - d. **[Flo Fab Inc]**
 - e. **[Goulds Water Technology; a Xylem brand]**
 - f. **[GRUNDFOS CBS Inc.]**
 - g. **[Liberty Pumps]**
 - h. **[Little Giant; a brand of Franklin Electric Co., Inc.]**
 - i. **[Pentair Aurora; Pentair Pump Group]**
 - j. **[ProFlo; a Ferguson Enterprises, Inc. brand]**
 - k. **[Sta-Rite Industries, Inc.; Pentair Ltd.]**
 - l. **[Stancor, Inc]**
 - m. **[WILO-EMU USA LLC]**
 - n. **[Zoeller Company]**
 - o. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[Barnes; a Crane Pumps & Systems brand]**
 - c. **[Bell & Gossett; a Xylem brand]**
 - d. **[Flo Fab Inc]**

- e. [Goulds Water Technology; a Xylem brand]
 - f. [GRUNDFOS CBS Inc.]
 - g. [Liberty Pumps]
 - h. [Little Giant; a brand of Franklin Electric Co., Inc.]
 - i. [Pentair Aurora; Pentair Pump Group]
 - j. [ProFlo; a Ferguson Enterprises, Inc. brand]
 - k. [Sta-Rite Industries, Inc.; Pentair Ltd.]
 - l. [Stancor, Inc]
 - m. [WILO-EMU USA LLC]
 - n. [Zoeller Company]
 - o. <Insert manufacturer's name>
3. Description: Factory-assembled and -tested effluent-pump unit.
4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal effluent pump as defined in HI 1.1-1.2 and HI 1.3.
5. Pump Casing: Cast iron, with open inlet, legs that elevate pump to permit flow into impeller, and vertical discharge for piping connection.
6. Impeller: Statically and dynamically balanced, [ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][ASTM B584, cast bronze][and][stainless steel], closed or semiopen design for clear wastewater, and keyed and secured to shaft.
7. Pump and Motor Shaft: Stainless steel[or steel], with factory-sealed, grease-lubricated ball bearings.
8. Seal: Mechanical.
9. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
- a. Motor Housing Fluid: [Air][Oil].
10. Controls, Rod-and-Float Type:
- a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
 - e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
11. Controls, Float- and Pressure-Switch Type:
- a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>; [pedestal][wall] mounted.
 - b. Switch Type: [Mechanical-float][Mercury-float][Pressure]<Insert type> type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with [mechanical-float, mercury-float, or pressure]<Insert type> switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
12. Control-Interface Features:
- a. Remote Alarm Contacts: For remote alarm interface.
 - b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to

building automation system and capable of providing the following:

- 1) On-off status of pump.
- 2) Alarm status.

B. Submersible, Fixed-Position, Double-Seal Effluent Pumps :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABS; Cardo Flow Solutions]**
 - b. **[BJM Pumps, LLC]**
 - c. **[Federal Pump Corp]**
 - d. **[HOMA Pump Technology Inc.]**
 - e. **[KSB Inc.]**
 - f. **[Liberty Pumps]**
 - g. **[Pentair Aurora; Pentair Pump Group]**
 - h. **[PX Pumps USA]**
 - i. **[Stancor, Inc]**
 - j. **[Tsurumi America, Inc.]**
 - k. **[WILO-EMU USA LLC]**
 - l. **[Zoeller Company]**
 - m. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABS; Cardo Flow Solutions]**
 - b. **[BJM Pumps, LLC]**
 - c. **[Federal Pump Corp]**
 - d. **[HOMA Pump Technology Inc.]**
 - e. **[KSB Inc.]**
 - f. **[Liberty Pumps]**
 - g. **[Pentair Aurora; Pentair Pump Group]**
 - h. **[PX Pumps USA]**
 - i. **[Stancor, Inc]**
 - j. **[Tsurumi America, Inc.]**
 - k. **[WILO-EMU USA LLC]**
 - l. **[Zoeller Company]**
 - m. **<Insert manufacturer's name>**
3. Description: Factory-assembled and -tested effluent-pump unit.
4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal effluent pump as defined in HI 1.1-1.2 and HI 1.3.
5. Pump Casing: Cast iron, with open inlet, legs that elevate pump to permit flow into impeller, and vertical discharge for piping connection.
6. Impeller: Statically and dynamically balanced, **[ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][ASTM B584, cast bronze][and][stainless steel]**, closed or semiopen design for clear wastewater, and keyed and secured to shaft.
7. Pump and Motor Shaft: Stainless steel[**or steel**], with factory-sealed, grease-lubricated ball bearings.

8. Seals: Mechanical.
9. Moisture-Sensing Probe: Internal moisture sensor and moisture alarm.
10. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
 - a. Motor Housing Fluid: **[Air][Oil]**.
11. Controls, Rod-and-Float Type:
 - a. Enclosure: NEMA 250, **[Type 1][Type 4X]<Insert type>**.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
 - e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
12. Controls, Float- and Pressure-Switch Type:
 - a. Enclosure: NEMA 250, **[Type 1][Type 4X]<Insert type>**; **[pedestal][wall]** mounted.
 - b. Switch Type: **[Mechanical-float][Mercury-float][Pressure]<Insert type>** type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with **[mechanical-float, mercury-float, or pressure]<Insert type>** switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
13. Control-Interface Features:
 - a. Remote Alarm Contacts: For remote alarm interface.
 - b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.

C. Submersible, Quick-Disconnect, Single-Seal Effluent Pumps :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Liberty Pumps]**
 - b. **[Pentair Aurora; Pentair Pump Group]**
 - c. **[Stancor, Inc]**
 - d. **[WILO-EMU USA LLC]**
 - e. **[Zoeller Company]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [Liberty Pumps]
 - b. [Pentair Aurora; Pentair Pump Group]
 - c. [Stancor, Inc]
 - d. [WILO-EMU USA LLC]
 - e. [Zoeller Company]
 - f. <Insert manufacturer's name>
3. Description: Factory-assembled and -tested effluent-pump unit with guide-rail supports.
4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal effluent pump as defined in HI 1.1-1.2 and HI 1.3.
5. Pump Casing: Cast iron, with open inlet, and discharge fittings for connection to guide-rail support.
6. Impeller: Statically and dynamically balanced, [ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][ASTM B584, cast bronze][and][stainless steel], closed or semiopen design for clear wastewater, and keyed and secured to shaft.
7. Pump and Motor Shaft: Stainless steel[or steel], with factory-sealed, grease-lubricated ball bearings.
8. Seal: Mechanical.
9. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
 - a. Motor Housing Fluid: [Air][Oil].
10. Controls, Rod-and-Float Type:
 - a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
 - e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
11. Controls, Float- and Pressure-Switch Type:
 - a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>; [pedestal][wall] mounted.
 - b. Switch Type: [Mechanical-float][Mercury-float][Pressure]<Insert type> type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with [mechanical-float, mercury-float, or pressure]<Insert type> switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
12. Control-Interface Features:
 - a. Remote Alarm Contacts: For remote alarm interface.
 - b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.

13. Guide-Rail Supports:

- a. Standard: SWPA's "Submersible Sewage Pumping Systems (SWPA) Handbook."
- b. Guide Rails: Vertical pipes or structural members, made of galvanized steel or other corrosion-resistant metal, attached to baseplate and basin sidewall or cover.
- c. Baseplate: Corrosion-resistant metal plate, attached to basin floor, supporting guide rails and stationary elbow.
- d. Pump Yoke: Motor- or casing-mounted yokes or other attachments for aligning pump during connection of flanges.
- e. Movable Elbow: Pump discharge-elbow fitting with flange, seal, and positioning device.
- f. Stationary Elbow: Fixed discharge-elbow fitting with flange that mates to movable-elbow flange and support attached to baseplate.
- g. Lifting Cable: Stainless steel; attached to pump and cover at manhole.

D. Submersible, Quick-Disconnect, Double-Seal Effluent Pumps :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABS; Cardo Flow Solutions]**
 - b. **[Chicago Pump Company; Grundfos Pumps Corporation]**
 - c. **[Federal Pump Corp]**
 - d. **[Flygt; a brand of Xylem Inc.]**
 - e. **[HOMA Pump Technology Inc.]**
 - f. **[Liberty Pumps]**
 - g. **[Pentair Aurora; Pentair Pump Group]**
 - h. **[PX Pumps USA]**
 - i. **[Stancor, Inc]**
 - j. **[Tsurumi America, Inc.]**
 - k. **[WILO-EMU USA LLC]**
 - l. **[Zoeller Company]**
 - m. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABS; Cardo Flow Solutions]**
 - b. **[Chicago Pump Company; Grundfos Pumps Corporation]**
 - c. **[Federal Pump Corp]**
 - d. **[Flygt; a brand of Xylem Inc.]**
 - e. **[HOMA Pump Technology Inc.]**
 - f. **[Liberty Pumps]**
 - g. **[Pentair Aurora; Pentair Pump Group]**
 - h. **[PX Pumps USA]**
 - i. **[Stancor, Inc]**
 - j. **[Tsurumi America, Inc.]**
 - k. **[WILO-EMU USA LLC]**
 - l. **[Zoeller Company]**
 - m. **<Insert manufacturer's name>**
3. Description: Factory-assembled and -tested effluent-pump unit with guide-rail supports.
4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal effluent pump as defined in HI 1.1-1.2 and HI 1.3.

5. Pump Casing: Cast iron, with open inlet, and discharge fittings for connection to guide-rail support.
6. Impeller: Statically and dynamically balanced, **[ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][ASTM B584, cast bronze][and][stainless steel]**, closed or semiopen design for clear wastewater, and keyed and secured to shaft.
7. Pump and Motor Shaft: Stainless steel **[or steel]**, with factory-sealed, grease-lubricated ball bearings.
8. Seals: Mechanical.
9. Moisture-Sensing Probe: Internal moisture sensor and moisture alarm.
10. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
 - a. Motor Housing Fluid: **[Air][Oil]**.
11. Controls, Rod-and-Float Type:
 - a. Enclosure: NEMA 250, **[Type 1][Type 4X]<Insert type>**.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
 - e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
12. Controls, Float- and Pressure-Switch Type:
 - a. Enclosure: NEMA 250, **[Type 1][Type 4X]<Insert type>**; **[pedestal][wall]** mounted.
 - b. Switch Type: **[Mechanical-float][Mercury-float][Pressure]<Insert type>** type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with **[mechanical-float, mercury-float, or pressure]<Insert type>** switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
13. Control-Interface Features:
 - a. Remote Alarm Contacts: For remote alarm interface.
 - b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.
14. Guide-Rail Supports:
 - a. Standard: SWPA's "Submersible Sewage Pumping Systems (SWPA) Handbook."
 - b. Guide Rails: Vertical pipes or structural members, made of galvanized steel or other corrosion-resistant metal, attached to baseplate and basin sidewall or cover.
 - c. Baseplate: Corrosion-resistant metal plate, attached to basin floor, supporting guide rails and stationary elbow.
 - d. Pump Yoke: Motor- or casing-mounted yokes or other attachments for aligning pump

- during connection of flanges.
- e. Movable Elbow: Pump discharge-elbow fitting with flange, seal, and positioning device.
- f. Stationary Elbow: Fixed discharge-elbow fitting with flange that mates to movable-elbow flange and support attached to baseplate.
- g. Lifting Cable: Stainless steel; attached to pump and cover at manhole.

E. Capacities and Characteristics:

1. Unit Capacity: **<Insert value> gpm (L/min.)**.
2. Number of Pumps: **[One][Two]<Insert value>**.
3. Each Pump:
 - a. Capacity: **<Insert value> gpm (L/min.)**.
 - b. Solids Handling Capability: **[Not applicable][2 inches (50 mm) minimum][2-1/2 inches (65 mm) minimum][3 inches (75 mm) minimum]<Insert inches (mm) minimum>**.
 - c. Total Dynamic Head: **<Insert value>feet (kPa)**.
 - d. Speed: **<Insert rpm>**.
 - e. Discharge Pipe Size: **<Insert value> NPS (DN)**.
 - f. Motor Horsepower: **<Insert value> hp**.
 - g. Electrical Characteristics:
 - 1) Volts: **[120][240][277][480]<Insert value> V ac**.
 - 2) Phases: **[Single][Three]**.
 - 3) Hertz: 60.
4. Unit Electrical Characteristics:
 - a. Full-Load Amperes: **<Insert value> A**.
 - b. Minimum Circuit Ampacity: **<Insert value> A**.
 - c. Maximum Overcurrent Protection: **<Insert value> A**.

2.3 SUBMERSIBLE SEWAGE PUMPS

A. Submersible, Fixed-Position, Single-Seal Sewage Pumps :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[Bell & Gossett; a Xylem brand]**
 - c. **[EBARA Pumps Americas Corp.]**
 - d. **[Flo Fab Inc]**
 - e. **[Flygt; a brand of Xylem Inc.]**
 - f. **[Goulds Water Technology; a Xylem brand]**
 - g. **[GRUNDFOS CBS Inc.]**
 - h. **[Liberty Pumps]**
 - i. **[Little Giant; a brand of Franklin Electric Co., Inc.]**
 - j. **[PACO Pumps; Grundfos Pumps Corporation, USA]**
 - k. **[Peerless Pump Company]**
 - l. **[Pentair Aurora; Pentair Pump Group]**
 - m. **[ProFlo; a Ferguson Enterprises, Inc. brand]**
 - n. **[Swaby Manufacturing Company]**
 - o. **[Weil Pump; a Wilo Company]**

- p. [Weinman; a Crane Pumps & Systems brand]
 - q. [WILO-EMU USA LLC]
 - r. [Zoeller Company]
 - s. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [A.Y. McDonald Mfg. Co.]
 - b. [Bell & Gossett; a Xylem brand]
 - c. [EBARA Pumps Americas Corp.]
 - d. [Flo Fab Inc]
 - e. [Flygt; a brand of Xylem Inc.]
 - f. [Goulds Water Technology; a Xylem brand]
 - g. [GRUNDFOS CBS Inc.]
 - h. [Liberty Pumps]
 - i. [Little Giant; a brand of Franklin Electric Co., Inc.]
 - j. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - k. [Peerless Pump Company]
 - l. [Pentair Aurora; Pentair Pump Group]
 - m. [ProFlo; a Ferguson Enterprises, Inc. brand]
 - n. [Swaby Manufacturing Company]
 - o. [Weil Pump; a Wilo Company]
 - p. [Weinman; a Crane Pumps & Systems brand]
 - q. [WILO-EMU USA LLC]
 - r. [Zoeller Company]
 - s. <Insert manufacturer's name>
3. Description: Factory-assembled and -tested sewage-pump unit.
4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal sewage pump as defined in HI 1.1-1.2 and HI 1.3.
5. Pump Casing: Cast iron, with open inlet, legs that elevate pump to permit flow into impeller, and vertical discharge for piping connection.
6. Impeller: Statically and dynamically balanced, [ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][ASTM B584, cast bronze][and][stainless steel], nonclog, open, or semiopen design for solids handling, and keyed and secured to shaft.
7. Pump and Motor Shaft: Stainless steel[or steel], with factory-sealed, grease-lubricated ball bearings.
8. Seal: Mechanical.
9. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
- a. Motor Housing Fluid: [Air][Oil].
10. Controls, Rod-and-Float Type:
- a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than 60 inches (1500 mm).

- e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
11. Controls, Float- and Pressure-Switch Type:
- a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>; [pedestal][wall] mounted.
 - b. Switch Type: [Mechanical-float][Mercury-float][Pressure]<Insert type> type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with [mechanical-float, mercury-float, or pressure]<Insert type> switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
12. Control-Interface Features:
- a. Remote Alarm Contacts: For remote alarm interface.
 - b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.

B. Submersible, Fixed-Position, Double-Seal Sewage Pumps :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [ABS; Cardo Flow Solutions]
 - b. [Barnes; a Crane Pumps & Systems brand]
 - c. [Bell & Gossett; a Xylem brand]
 - d. [BJM Pumps, LLC]
 - e. [Chicago Pump Company; Grundfos Pumps Corporation]
 - f. [E.I.M. Electric Co., Ltd.]
 - g. [EBARA Pumps Americas Corp.]
 - h. [Federal Pump Corp]
 - i. [Flygt; a brand of Xylem Inc.]
 - j. [Goulds Water Technology; a Xylem brand]
 - k. [HOMA Pump Technology Inc.]
 - l. [KSB Inc.]
 - m. [Liberty Pumps]
 - n. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - o. [Pentair Aurora; Pentair Pump Group]
 - p. [PX Pumps USA]
 - q. [Sta-Rite Industries, Inc.; Pentair Ltd.]
 - r. [Stancor, Inc]
 - s. [Swaby Manufacturing Company]
 - t. [Weil Pump; a Wilo Company]
 - u. [Weinman; a Crane Pumps & Systems brand]
 - v. [WILO-EMU USA LLC]
 - w. [Zoeller Company]
 - x. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [ABS; Cardo Flow Solutions]
 - b. [Barnes; a Crane Pumps & Systems brand]
 - c. [Bell & Gossett; a Xylem brand]
 - d. [BJM Pumps, LLC]
 - e. [Chicago Pump Company; Grundfos Pumps Corporation]
 - f. [E.I.M. Electric Co., Ltd.]
 - g. [EBARA Pumps Americas Corp.]
 - h. [Federal Pump Corp]
 - i. [Flygt; a brand of Xylem Inc.]
 - j. [Goulds Water Technology; a Xylem brand]
 - k. [HOMA Pump Technology Inc.]
 - l. [KSB Inc.]
 - m. [Liberty Pumps]
 - n. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - o. [Pentair Aurora; Pentair Pump Group]
 - p. [PX Pumps USA]
 - q. [Sta-Rite Industries, Inc.; Pentair Ltd.]
 - r. [Stancor, Inc]
 - s. [Swaby Manufacturing Company]
 - t. [Weil Pump; a Wilo Company]
 - u. [Weinman; a Crane Pumps & Systems brand]
 - v. [WILO-EMU USA LLC]
 - w. [Zoeller Company]
 - x. <Insert manufacturer's name>
3. Description: Factory-assembled and -tested sewage-pump unit.
 4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal sewage pump as defined in HI 1.1-1.2 and HI 1.3.
 5. Pump Casing: Cast iron, with open inlet, legs that elevate pump to permit flow into impeller, and vertical discharge for piping connection.
 6. Impeller: Statically and dynamically balanced, [ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][ASTM B584, cast bronze][and][stainless steel], nonclog, open, or semiopen design for solids handling, and keyed and secured to shaft.
 7. Pump and Motor Shaft: Stainless steel[or steel], with factory-sealed, grease-lubricated ball bearings.
 8. Seals: Mechanical.
 9. Moisture-Sensing Probe: Internal moisture sensor and moisture alarm.
 10. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
 - a. Motor Housing Fluid: [Air][Oil].
 11. Controls, Rod-and-Float Type:
 - a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than 60 inches (1500 mm).

- e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
12. Controls, Float- and Pressure-Switch Type:
- a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>; [pedestal][wall] mounted.
 - b. Switch Type: [Mechanical-float][Mercury-float][Pressure]<Insert type> type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with [mechanical-float, mercury-float, or pressure]<Insert type> switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.

13. Control-Interface Features:

- a. Remote Alarm Contacts: For remote alarm interface.
- b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.

C. Submersible, Quick-Disconnect, Single-Seal Sewage Pumps :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [EBARA Pumps Americas Corp.]
 - b. [Flygt; a brand of Xylem Inc.]
 - c. [Gorman-Rupp Company (The)]
 - d. [Goulds Water Technology; a Xylem brand]
 - e. [Liberty Pumps]
 - f. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - g. [Pentair Aurora; Pentair Pump Group]
 - h. [Swaby Manufacturing Company]
 - i. [Weil Pump; a Wilo Company]
 - j. [WILO-EMU USA LLC]
 - k. [Zoeller Company]
 - l. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [EBARA Pumps Americas Corp.]
 - b. [Flygt; a brand of Xylem Inc.]
 - c. [Gorman-Rupp Company (The)]
 - d. [Goulds Water Technology; a Xylem brand]
 - e. [Liberty Pumps]
 - f. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - g. [Pentair Aurora; Pentair Pump Group]
 - h. [Swaby Manufacturing Company]
 - i. [Weil Pump; a Wilo Company]

- j. **[WILO-EMU USA LLC]**
 - k. **[Zoeller Company]**
 - l. **<Insert manufacturer's name>**
3. Description: Factory-assembled and -tested sewage-pump unit with guide-rail supports.
 4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal sewage pump as defined in HI 1.1-1.2 and HI 1.3.
 5. Pump Casing: Cast iron, with open inlet, and discharge fittings for connection to guide-rail support.
 6. Impeller: Statically and dynamically balanced, **[ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][ASTM B584, cast bronze][and][stainless steel]**, nonclog, open, or semiopen design for solids handling, and keyed and secured to shaft.
 7. Pump and Motor Shaft: Stainless steel **[or steel]**, with factory-sealed, grease-lubricated ball bearings.
 8. Seal: Mechanical.
 9. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
 - a. Motor Housing Fluid: **[Air][Oil]**.
 10. Controls, Rod-and-Float Type:
 - a. Enclosure: NEMA 250, **[Type 1][Type 4X]<Insert type>**.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
 - e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
 11. Controls, Float- and Pressure-Switch Type:
 - a. Enclosure: NEMA 250, **[Type 1][Type 4X]<Insert type>**; **[pedestal][wall]** mounted.
 - b. Switch Type: **[Mechanical-float][Mercury-float][Pressure]<Insert type>** type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with **[mechanical-float, mercury-float, or pressure]<Insert type>** switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
 12. Control-Interface Features:
 - a. Remote Alarm Contacts: For remote alarm interface.
 - b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.
 13. Guide-Rail Supports:

- a. Standard: SWPA's "Submersible Sewage Pumping Systems (SWPA) Handbook."
- b. Guide Rails: Vertical pipes or structural members, made of galvanized steel or other corrosion-resistant metal, attached to baseplate and basin sidewall or cover.
- c. Baseplate: Corrosion-resistant metal plate, attached to basin floor, supporting guide rails and stationary elbow.
- d. Pump Yoke: Motor- or casing-mounted yokes or other attachments for aligning pump during connection of flanges.
- e. Movable Elbow: Pump discharge-elbow fitting with flange, seal, and positioning device.
- f. Stationary Elbow: Fixed discharge-elbow fitting with flange that mates to movable-elbow flange and support attached to baseplate.
- g. Lifting Cable: Stainless steel; attached to pump and cover at manhole.

D. Submersible, Quick-Disconnect, Double-Seal Sewage Pumps :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABS; Cardo Flow Solutions]**
 - b. **[Barnes; a Crane Pumps & Systems brand]**
 - c. **[Bell & Gossett; a Xylem brand]**
 - d. **[BJM Pumps, LLC]**
 - e. **[Chicago Pump Company; Grundfos Pumps Corporation]**
 - f. **[E.I.M. Electric Co., Ltd.]**
 - g. **[EBARA Pumps Americas Corp.]**
 - h. **[Federal Pump Corp]**
 - i. **[Flygt; a brand of Xylem Inc.]**
 - j. **[Gorman-Rupp Company (The)]**
 - k. **[Goulds Water Technology; a Xylem brand]**

 - y. **[Zoeller Company]**
 - z. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABS; Cardo Flow Solutions]**
 - b. **[Barnes; a Crane Pumps & Systems brand]**
 - c. **[Bell & Gossett; a Xylem brand]**
 - d. **[BJM Pumps, LLC]**
 - e. **[Chicago Pump Company; Grundfos Pumps Corporation]**
 - f. **[E.I.M. Electric Co., Ltd.]**

- g. [EBARA Pumps Americas Corp.]
 - h. [Federal Pump Corp]
 - i. [Flygt; a brand of Xylem Inc.]
 - j. [Gorman-Rupp Company (The)]
 - k. [Goulds Water Technology; a Xylem brand]
 - l. [HOMA Pump Technology Inc.]
 - m. [KSB Inc.]
 - n. [Liberty Pumps]
 - o. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - p. [Pentair Aurora; Pentair Pump Group]
 - q. [PX Pumps USA]
 - r. [Sta-Rite Industries, Inc.; Pentair Ltd.]
 - s. [Stancor, Inc]
 - t. [Swaby Manufacturing Company]
 - u. [Tsurumi America, Inc.]
 - v. [Weil Pump; a Wilo Company]
 - w. [Weinman; a Crane Pumps & Systems brand]
 - x. [WILO-EMU USA LLC]
 - y. [Zoeller Company]
 - z. <Insert manufacturer's name>
3. Description: Factory-assembled and -tested sewage-pump unit with guide-rail supports.
 4. Pump type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal sewage pump as defined in HI 1.1-1.2 and HI 1.3.
 5. Pump Casing: Cast iron, with open inlet, and discharge fittings for connection to guide-rail support.
 6. Impeller: Statically and dynamically balanced, [ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][ASTM B584, cast bronze][and][stainless steel], nonclog, open, or semiopen design for solids handling, and keyed and secured to shaft.
 7. Pump and Motor Shaft: Stainless steel[or steel], with factory-sealed, grease-lubricated ball bearings.
 8. Seals: Mechanical.
 9. Moisture-Sensing Probe: Internal moisture sensor and moisture alarm.
 10. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
 - a. Motor Housing Fluid: [Air][Oil].
 11. Controls, Rod-and-Float Type:
 - a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
 - e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
 12. Controls, Float- and Pressure-Switch Type:
 - a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>; [pedestal][wall] mounted.
 - b. Switch Type: [Mechanical-float][Mercury-float][Pressure]<Insert type> type, in NEMA

- 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with **[mechanical-float, mercury-float, or pressure]<Insert type>** switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
13. Control-Interface Features:
- a. Remote Alarm Contacts: For remote alarm interface.
 - b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.
14. Guide-Rail Supports:
- a. Standard: SWPA's "Submersible Sewage Pumping Systems (SWPA) Handbook."
 - b. Guide Rails: Vertical pipes or structural members, made of galvanized steel or other corrosion-resistant metal, attached to baseplate and basin sidewall or cover.
 - c. Baseplate: Corrosion-resistant metal plate, attached to basin floor, supporting guide rails and stationary elbow.
 - d. Pump Yoke: Motor- or casing-mounted yokes or other attachments for aligning pump during connection of flanges.
 - e. Movable Elbow: Pump discharge-elbow fitting with flange, seal, and positioning device.
 - f. Stationary Elbow: Fixed discharge-elbow fitting with flange that mates to movable-elbow flange and support attached to baseplate.
 - g. Lifting Cable: Stainless steel; attached to pump and cover at manhole.
- E. Submersible, Quick-Disconnect, Grinder Sewage Pumps :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABS; Cardo Flow Solutions]**
 - b. **[Alyan Pump Company]**
 - c. **[Barnes; a Crane Pumps & Systems brand]**
 - d. **[BJM Pumps, LLC]**
 - e. **[EBARA Pumps Americas Corp.]**
 - f. **[HOMA Pump Technology Inc.]**
 - g. **[Liberty Pumps]**
 - h. **[Pentair Aurora; Pentair Pump Group]**
 - i. **[Stancor, Inc]**
 - j. **[Tsurumi America, Inc.]**
 - k. **[Vaughan Co., Inc.]**
 - l. **[Weil Pump; a Wilo Company]**
 - m. **[WILO-EMU USA LLC]**
 - n. **[Zoeller Company]**
 - o. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [ABS; Cardo Flow Solutions]
 - b. [Alyan Pump Company]
 - c. [Barnes; a Crane Pumps & Systems brand]
 - d. [BJM Pumps, LLC]
 - e. [EBARA Pumps Americas Corp.]
 - f. [HOMA Pump Technology Inc.]
 - g. [Liberty Pumps]
 - h. [Pentair Aurora; Pentair Pump Group]
 - i. [Stancor, Inc]
 - j. [Tsurumi America, Inc.]
 - k. [Vaughan Co., Inc.]
 - l. [Weil Pump; a Wilo Company]
 - m. [WILO-EMU USA LLC]
 - n. [Zoeller Company]
 - o. <Insert manufacturer's name>
3. Description: Factory-assembled and -tested, grinder sewage-pump unit with guide-rail supports.
 4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller, centrifugal sewage pump as defined in HI 1.1-1.2 and HI 1.3.
 5. Pump Casing: Cast iron, with open inlet, and discharge fittings for connection to guide-rail supports.
 6. Impeller: Bronze or stainless steel; statically and dynamically balanced, with stainless-steel cutter, grinder, or slicer assembly; capable of handling solids; and keyed and secured to shaft.
 7. Pump and Motor Shaft: Stainless steel[**or steel**], with factory-sealed, grease-lubricated ball bearings.
 8. Seal: Mechanical.
 9. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
 - a. Motor Housing Fluid: [Air][Oil].
 10. Controls, Rod-and-Float Type:
 - a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>.
 - b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
 - e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
 11. Controls, Float- and Pressure-Switch Type:
 - a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>; [pedestal][wall] mounted.
 - b. Switch Type: [Mechanical-float][Mercury-float][Pressure]<Insert type> type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with [mechanical-float, mercury-float, or pressure]<Insert type> switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
 12. Control-Interface Features:

- a. Remote Alarm Contacts: For remote alarm interface.
 - b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.
13. Guide-Rail Supports:
- a. Standard: SWPA's "Submersible Sewage Pumping Systems (SWPA) Handbook."
 - b. Guide Rails: Vertical pipes or structural members, made of galvanized steel or other corrosion-resistant metal, attached to baseplate and basin sidewall or cover.
 - c. Baseplate: Corrosion-resistant metal plate, attached to basin floor, supporting guide rails and stationary elbow.
 - d. Pump Yoke: Motor- or casing-mounted yokes or other attachments for aligning pump during connection of flanges.
 - e. Movable Elbow: Pump discharge-elbow fitting with flange, seal, and positioning device.
 - f. Stationary Elbow: Fixed discharge-elbow fitting with flange that mates to movable-elbow flange and support attached to baseplate.
 - g. Lifting Cable: Stainless steel; attached to pump and cover at manhole.

F. Submersible, Quick-Disconnect, Progressing-Cavity, Grinder Sewage Pumps :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Barnes; a Crane Pumps & Systems brand]**
 - b. **[Environment One Corporation]**
 - c. **[Pentair Aurora; Pentair Pump Group]**
 - d. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Barnes; a Crane Pumps & Systems brand]**
 - b. **[Environment One Corporation]**
 - c. **[Pentair Aurora; Pentair Pump Group]**
 - d. **<Insert manufacturer's name>**
- 3. Description: Factory-assembled and -tested, progressing-cavity, grinder sewage-pump unit with guide-rail supports.
- 4. Pump Type: Submersible, progressing-cavity, single-screw rotary, grinder sewage pump as defined in HI 3.1-3.5.
- 5. Pump Body: **[Cast iron]<Insert material>**.
- 6. Pump Bearings: Radial and thrust types.
- 7. Pump Shaft: Steel.
- 8. Rotor: Stainless steel.
- 9. Stator: **[Buna-N][or][natural rubber]<Insert material>**.
- 10. Seal: Packing gland and mechanical types.
- 11. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
- 12. Controls, Rod-and-Float Type:

- a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>.
- b. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
- c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
- d. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
- e. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.

13. Controls, Float- and Pressure-Switch Type:

- a. Enclosure: NEMA 250, [Type 1][Type 4X]<Insert type>; [pedestal][wall] mounted.
- b. Switch Type: [Mechanical-float][Mercury-float][Pressure]<Insert type> type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
- c. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
- d. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with [mechanical-float, mercury-float, or pressure]<Insert type> switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.

14. Control-Interface Features:

- a. Remote Alarm Contacts: For remote alarm interface.
- b. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - 1) On-off status of pump.
 - 2) Alarm status.

15. Guide-Rail Supports:

- a. Standard: SWPA's "Submersible Sewage Pumping Systems (SWPA) Handbook."
- b. Guide Rails: Vertical pipes or structural members, made of galvanized steel or other corrosion-resistant metal, attached to baseplate and basin sidewall or cover.
- c. Baseplate: Corrosion-resistant metal plate, attached to basin floor, supporting guide rails and stationary elbow.
- d. Pump Yoke: Motor- or casing-mounted yokes or other attachments for aligning pump during connection of flanges.
- e. Movable Elbow: Pump discharge-elbow fitting with flange, seal, and positioning device.
- f. Stationary Elbow: Fixed discharge-elbow fitting with flange that mates to movable-elbow flange and support attached to baseplate.
- g. Lifting Cable: Stainless steel; attached to pump and cover at manhole.

G. Capacities and Characteristics:

- 1. Unit Capacity: <Insert value> **gpm (L/min.)**.
- 2. Number of Pumps: [One][Two]<Insert value>.
- 3. Each Pump:
 - a. Capacity: <Insert value> **gpm (L/min.)**.
 - b. Solids Handling Capability: [Not applicable][2 inches (50 mm) minimum][2-1/2 inches (65 mm) minimum][3 inches (75 mm) minimum]<Insert inches (mm) minimum>.
 - c. Total Dynamic Head: <Insert value> **feet (kPa)**.
 - d. Speed: <Insert rpm>.
 - e. Discharge Pipe Size: <Insert value> **NPS (DN)**.

- f. Motor Horsepower: <Insert value> hp.
- g. Electrical Characteristics:
 - 1) Volts: [120][240][277][480]<Insert value> V ac.
 - 2) Phases: [Single][Three].
 - 3) Hertz: 60.
- 4. Unit Electrical Characteristics:
 - a. Full-Load Amperes: <Insert value> A.
 - b. Minimum Circuit Ampacity: <Insert value> A.
 - c. Maximum Overcurrent Protection: <Insert value> A.

2.4 WET-PIT-VOLUTE SEWAGE PUMPS

- A. Description: Factory-assembled and -tested sewage-pump unit.
- B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - 1. [Alyan Pump Company]
 - 2. [Armstrong Fluid Technology]
 - 3. [Chicago Pump Company; Grundfos Pumps Corporation]
 - 4. [Federal Pump Corp]
 - 5. [Flo Fab Inc]
 - 6. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - 7. [Peerless Pump Company]
 - 8. [Pentair Aurora; Pentair Pump Group]
 - 9. [Swaby Manufacturing Company]
 - 10. [Tramco Pump Company]
 - 11. [Vertiflo Pump Company]
 - 12. [Weil Pump; a Wilo Company]
 - 13. [Weinman; a Crane Pumps & Systems brand]
 - 14. [Yeomans Chicago Corporation]
 - 15. <Insert manufacturer's name>
- C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - 1. [Alyan Pump Company]
 - 2. [Armstrong Fluid Technology]
 - 3. [Chicago Pump Company; Grundfos Pumps Corporation]
 - 4. [Federal Pump Corp]
 - 5. [Flo Fab Inc]
 - 6. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - 7. [Peerless Pump Company]
 - 8. [Pentair Aurora; Pentair Pump Group]
 - 9. [Swaby Manufacturing Company]
 - 10. [Tramco Pump Company]
 - 11. [Vertiflo Pump Company]
 - 12. [Weil Pump; a Wilo Company]
 - 13. [Weinman; a Crane Pumps & Systems brand]
 - 14. [Yeomans Chicago Corporation]
 - 15. <Insert manufacturer's name>

- D. Pump Type: Wet-pit-volute, single-stage, separately coupled, overhung-impeller, centrifugal sewage pump as defined in HI 1.1-1.2 and HI 1.3.
- E. Pump Casing: Cast iron, with open inlet and threaded or flanged connection for discharge piping.
- F. Pump Shaft: **[Stainless steel][and][steel]**.
- G. Impeller: Statically and dynamically balanced, **[ASTM A48/A48M, Class No. 25 A cast iron][ASTM A532/A532M, abrasion-resistant cast iron][and][ASTM B584, cast bronze]**, nonclog, open, or semiopen design for solids handling, and keyed and secured to shaft.
- H. Sleeve Bearings: Bronze. Include oil-lubricated, intermediate sleeve bearings at **48-inch- (1200-mm-)** maximum intervals if basin depth is more than **48 inches (1200 mm)**, and grease-lubricated, ball-type thrust bearings.
- I. Pump and Motor Shaft Coupling: Flexible, capable of absorbing torsional vibration and shaft misalignment.
- J. Pump Discharge Piping: Factory or field fabricated, **[galvanized, ASTM A53/A53M, Schedule 40, steel pipe with ASME B16.1, Class 125, cast-iron flanges and flanged fittings or ASME B16.4, Class 125, gray-iron threaded fittings]<Insert pipe material>**.
 - 1. Revise piping configuration to accommodate reverse-flow assembly.
- K. Support Plate: Cast iron or coated steel; strong enough to support pumps, motors, and controls. See "Sewage-Pump Basins and Basin Covers" Article for requirements.
- L. Shaft Seal: Stuffing box, with graphite-impregnated braided-yarn rings and bronze packing gland.
- M. Motor: Single speed; grease-lubricated ball bearings and mounted on vertical, cast-iron pedestal.
- N. Controls, Rod-and-Float Type:
 - 1. Enclosure: NEMA 250, **[Type 1][Type 4X]<Insert type>**.
 - 2. Switch Type: Pedestal-mounted float switch with float rods and rod buttons.
 - 3. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - 4. Float Guides: Pipe or other restraint for floats and rods in basins of depth greater than **60 inches (1500 mm)**.
 - 5. High-Water Alarm: Cover-mounted, compression-probe alarm, with electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
- O. Controls, Float- and Pressure-Switch Type:
 - 1. Enclosure: NEMA 250, **[Type 1][Type 4X]<Insert type>**; **[pedestal][wall]** mounted.
 - 2. Switch Type: **[Mechanical-float][Mercury-float][Pressure]<Insert type>** type, in NEMA 250, Type 6 enclosures with mounting rod and electric cables.
 - 3. Automatic Alternator: Start pumps on successive cycles and start multiple pumps if one cannot handle load.
 - 4. High-Water Alarm: Rod-mounted, NEMA 250, Type 6 enclosure with **[mechanical-float, mercury-float, or pressure]<Insert type>** switch matching control and electric bell; 120 V ac, with transformer and contacts for remote alarm bell.
- P. Control-Interface Features:

1. Remote Alarm Contacts: For remote alarm interface.
2. Building Automation System Interface: Auxiliary contacts in pump controls for interface to building automation system and capable of providing the following:
 - a. On-off status of pump.
 - b. Alarm status.

Q. Capacities and Characteristics:

1. Unit Capacity: **<Insert value> gpm (L/min.)**.
2. Number of Pumps: **[One][Two]<Insert value>**.
3. Each Pump:
 - a. Capacity: **<Insert value> gpm (L/min.)**.
 - b. Solids Handling Capability: **[2 inches (50 mm)][2-1/2 inches (65 mm)][3 inches (75 mm)]<Insert inches (mm)> minimum**.
 - c. Total Dynamic Head: **<Insert value> feet (kPa)**.
 - d. Speed: **<Insert rpm>**.
 - e. Discharge Pipe Size: **<Insert value> NPS (DN)**.
 - f. Motor Horsepower: **<Insert value> hp**.
 - g. Electrical Characteristics:
 - 1) Volts: **[120][240][277][480]<Insert value> V ac**.
 - 2) Phases: **[Single][Three]**.
 - 3) Hertz: 60.
4. Unit Electrical Characteristics:
 - a. Full-Load Amperes: **<Insert value> A**.
 - b. Minimum Circuit Ampacity: **<Insert value> A**.
 - c. Maximum Overcurrent Protection: **<Insert value> A**.

2.5 SEWAGE-PUMP, REVERSE-FLOW ASSEMBLIES

- A. Description: Factory-fabricated, sewage pump reverse-flow assembly for factory or field assembly and installation in sewage pump basin.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 1. **[Chicago Pump Company; Grundfos Pumps Corporation]**
 2. **[Federal Pump Corp]**
 3. **[PACO Pumps; Grundfos Pumps Corporation, USA]**
 4. **[Peerless Pump Company]**
 5. **[Weil Pump; a Wilo Company]**
 6. **[Yeomans Chicago Corporation]**
 7. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 1. **[Chicago Pump Company; Grundfos Pumps Corporation]**
 2. **[Federal Pump Corp]**
 3. **[PACO Pumps; Grundfos Pumps Corporation, USA]**

4. [Peerless Pump Company]
5. [Weil Pump; a Wilo Company]
6. [Yeomans Chicago Corporation]
7. <Insert manufacturer's name>

D. Components: Include the following corrosion-resistant-metal components:

1. Inlet Fitting: One combination inlet-overflow strainer fitting.
2. Valves: Two shutoff valves and two check valves.
3. Strainers: Two strainer housings with reverse-flow, self-flushing strainers.
4. Pipe and Fittings: Size and configuration required to connect to sewage pumps and piping.

2.6 SEWAGE-PUMP BASINS AND BASIN COVERS

A. Basins: Factory-fabricated, watertight, cylindrical, basin sump with top flange and sidewall openings for pipe connections.

1. Material: [Cast iron][Fiberglass][Polyethylene]<Insert material>.
2. Reinforcement: Mounting plates for pumps, fittings[, **guide-rail supports if used,**] and accessories.
3. Anchor Flange: Same material as or compatible with basin sump, cast in or attached to sump, in location and of size required to anchor basin in concrete slab.

B. Basin Covers: Fabricate metal cover with openings having gaskets, seals, and bushings; for access to pumps, pump shafts, control rods, discharge piping, vent connections, and power cables.

1. Reinforcement: Steel or cast iron, capable of supporting foot traffic for basins installed in foot-traffic areas.

C. Capacities and Characteristics:

1. Capacity: <Insert value> gal. (L).
2. Diameter: <Insert value> inches (mm).
3. Depth: <Insert value> inches (mm).
4. Inlet No. 1:
 - a. Drainage Pipe Size: <Insert value> NPS (DN).
 - b. Bottom of Sump to Centerline: <Insert value> inches (mm).
 - c. Type: [Flanged][Hubbed][Threaded] outside.
5. Inlet No. 2:
 - a. Drainage Pipe Size: <Insert value> NPS (DN).
 - b. Bottom of Sump to Centerline: <Insert value> inches (mm).
 - c. Type: [Flanged][Hubbed][Threaded] outside.
6. Inlet No. 3:
 - a. Drainage Pipe Size: <Insert value> NPS (DN).
 - b. Bottom of Sump to Centerline: <Insert value> inches (mm).
 - c. Type: [Flanged][Hubbed][Threaded] outside.
7. Sidewall Outlet:

- a. Discharge Pipe Size: **<Insert value> NPS (DN).**
 - b. Bottom of Sump to Centerline: **<Insert value> inches (mm).**
 - c. Type: **[Hubbed inside][Hubbed outside]<Insert type>.**
8. Cover Material: **[Cast iron][Steel with bituminous coating][Cast iron or steel with bituminous coating]<Insert material>.**
 9. Cover Diameter: **<Insert value> inches (mm),** but not less than outside diameter of basin top flange.
 10. Manhole Required in Cover: **[Yes][No].**
 11. Vent Size: **<Insert value> NPS (DN).**

2.7 PROGRESSING-CAVITY SEWAGE PUMPS

- A. Description: Factory-assembled and -tested, progressing-cavity, single-screw rotary pump as defined in HI 3.1-3.5.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 1. **[Continental Pump Co.]**
 2. **[Moyno, Inc.]**
 3. **[Roper Pump Co.]**
 4. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 1. **[Continental Pump Co.]**
 2. **[Moyno, Inc.]**
 3. **[Roper Pump Co.]**
 4. **<Insert manufacturer's name>**
- D. Pump Body: **[Cast iron]<Insert material>** with feet for base or floor installation.
- E. Pump Bearings: Radial and thrust types.
- F. Pump Shaft: Steel.
- G. Rotor: **[Chrome-plated steel]<Insert material>.**
- H. Stator: **[Buna-N][or][natural rubber]<Insert material>.**
- I. Seals: Packing gland and mechanical types.
- J. Coupling: Flexible.
- K. Motor: Single speed; grease-lubricated ball bearings.
- L. Capacities and Characteristics:
 1. Capacity: **<Insert value>gal. (L/min.).**
 2. Solids Handling Capability: **[Not applicable][2 inches (50 mm) minimum][2-1/2 inches (65 mm) minimum][3 inches (75 mm) minimum]<Insert inches (mm) minimum>.**

3. Total Dynamic Head: **<Insert value> feet (kPa).**
4. Speed: **<Insert rpm>.**
5. Discharge Pipe Size: **<Insert value> NPS (DN).**
6. Motor Horsepower: **<Insert value> hp.**
7. Electrical Characteristics:
 - a. Volts: **[120][240][277][480]<Insert value> V ac.**
 - b. Phases: **[Single][Three].**
 - c. Hertz: **60.**
8. Unit Electrical Characteristics:
 - a. Full-Load Amperes: **<Insert value> A.**
 - b. Minimum Circuit Ampacity: **<Insert value> A.**
 - c. Maximum Overcurrent Protection: **<Insert value> A.**

2.8 PACKAGED, SUBMERSIBLE SEWAGE-PUMP UNITS

A. Packaged, Submersible, Grinder, Sewage-Pump Units:

1. Description: Factory-assembled and -tested, automatic-operation, basin-mounted, grinder sewage-pump unit.
2. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[Barnes; a Crane Pumps & Systems brand]**
 - c. **[Environment One Corporation]**
 - d. **[Goulds Water Technology; a Xylem brand]**
 - e. **[Liberty Pumps]**
 - f. **[Pentair Aurora; Pentair Pump Group]**
 - g. **[SFA Saniflo USA]**
 - h. **[Zoeller Company]**
 - i. **<Insert manufacturer's name>**
3. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[Barnes; a Crane Pumps & Systems brand]**
 - c. **[Environment One Corporation]**
 - d. **[Goulds Water Technology; a Xylem brand]**
 - e. **[Liberty Pumps]**
 - f. **[Pentair Aurora; Pentair Pump Group]**
 - g. **[SFA Saniflo USA]**
 - h. **[Zoeller Company]**
 - i. **<Insert manufacturer's name>**
4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller centrifugal pump as defined in HI 1.1-1.2 and HI 1.3.
5. Pump Casing: Cast iron.

6. Impeller: Stainless-steel grinder[, **cutter, or slicer**] type with shredding ring.
7. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
8. Controls for Simplex Pump: Manufacturer's standard panel for one pump.
9. Controls for Duplex Pump: Automatic, with mechanical- or mercury-float switches and alternator.
10. Pump Discharge Piping: Factory or field fabricated, [**galvanized, ASTM A53/A53M, Schedule 40, steel pipe with ASME B16.4, Class 125, gray-iron threaded fittings**]<Insert pipe material>.
11. Basin: Watertight[**plastic**] and of size required for pumps, with inlet pipe connection and gastight cover with pump discharge and vent connections.

B. Packaged, Submersible, Nonclog, Sewage-Pump Units :

1. Description: Factory-assembled and -tested, automatic-operation, basin-mounted, sewage-pump unit.
2. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [Barnes; a Crane Pumps & Systems brand]
 - c. [Bell & Gossett; a Xylem brand]
 - d. [Glentronics, Inc.]
 - e. [Goulds Water Technology; a Xylem brand]
 - f. [GRUNDFOS CBS Inc.]
 - g. [Liberty Pumps]
 - h. [Little Giant; a brand of Franklin Electric Co., Inc.]
 - i. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - j. [Pentair Aurora; Pentair Pump Group]
 - k. [Sta-Rite Industries, Inc.; Pentair Ltd.]
 - l. [Zoeller Company]
 - m. <Insert manufacturer's name>
3. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [Barnes; a Crane Pumps & Systems brand]
 - c. [Bell & Gossett; a Xylem brand]
 - d. [Glentronics, Inc.]
 - e. [Goulds Water Technology; a Xylem brand]
 - f. [GRUNDFOS CBS Inc.]
 - g. [Liberty Pumps]
 - h. [Little Giant; a brand of Franklin Electric Co., Inc.]
 - i. [PACO Pumps; Grundfos Pumps Corporation, USA]
 - j. [Pentair Aurora; Pentair Pump Group]
 - k. [Sta-Rite Industries, Inc.; Pentair Ltd.]
 - l. [Zoeller Company]
 - m. <Insert manufacturer's name>
4. Pump Type: Submersible, end-suction, single-stage, close-coupled, overhung-impeller centrifugal pump as defined in HI 1.1-1.2 and HI 1.3.
5. Pump Casing: Cast iron.

6. Impeller: Brass or cast iron; statically and dynamically balanced, non-clog design, and capable of handling **2-inch- (50-mm-)** diameter solids.
7. Motor: Hermetically sealed, capacitor-start type; with built-in overload protection; lifting eye or lug; and three-conductor, waterproof power cable of length required and with grounding plug and cable-sealing assembly for connection at pump.
8. Controls for Simplex Pump: Manufacturer's standard panel for one pump.
9. Controls for Duplex Pump: Automatic, with mechanical- or mercury-float switches and alternator.
10. Pump Discharge Piping: Factory or field fabricated, **[galvanized, ASTM A53/A53M, Schedule 40, steel pipe with ASME B16.4, Class 125, gray-iron threaded fittings]****<Insert pipe material>**.
11. Basin: Watertight **[plastic]** and of size required for pumps, with inlet pipe connection and gastight cover with pump discharge and vent connections.

C. Capacities and Characteristics:

1. System Capacity: **<Insert value>gal. (L/min.)**.
2. Number of Pumps: **[One][Two]**.
3. Each Pump:
 - a. Capacity: **<Insert value>gal. (L/min.)**.
 - b. Total Dynamic Head: **<Insert value> feet (kPa)**.
 - c. Speed: **<Insert rpm>**.
 - d. Discharge Pipe Size: **<Insert value> NPS (DN)**.
 - e. Motor Horsepower: **<Insert value> hp**.
 - f. Electrical Characteristics:
 - 1) Volts: **[120][240][277][480]<Insert value> V ac**.
 - 2) Phases: **[Single][Three]**.
 - 3) Hertz: 60.
4. Unit Electrical Characteristics:
 - a. Full-Load Amperes: **<Insert value> A**.
 - b. Minimum Circuit Ampacity: **<Insert value> A**.
 - c. Maximum Overcurrent Protection: **<Insert value> A**.
5. Alternator Control Required: **[Yes][No]**.
6. Basin:
 - a. Dimensions: **<Insert values>**.
 - b. Inlet Size: **<Insert value> NPS (DN)**.
 - c. Bottom to Inlet Centerline: **<Insert value> inches (mm)**.
 - d. Vent Size: **<Insert value> NPS (DN)**.

2.9 PACKAGED WASTEWATER-PUMP UNITS

A. Packaged, Wet-Pit-Volute, Wastewater-Pump Units:

1. Description: Factory-assembled and -tested, automatic-operation, basin-mounted, effluent-pump unit.
2. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. [Alyan Pump Company]
 - b. [Federal Pump Corp]
 - c. [Hartell Pumps; Milton Roy]
 - d. <Insert manufacturer's name>
3. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Alyan Pump Company]
 - b. [Federal Pump Corp]
 - c. [Hartell Pumps; Milton Roy]
 - d. <Insert manufacturer's name>
4. Pump Type: Wet-pit-volute, single-stage, separately coupled, overhung-impeller centrifugal pump as defined in HI 1.1-1.2 and HI 1.3.
5. Pump Body and Impeller: Corrosion-resistant materials.
6. Motor: With built-in overload protection and mounted vertically on basin cover.
7. Power Cord: Three-conductor, waterproof cable of length required, but not less than **72 inches (1830 mm)** and with grounding plug and cable-sealing assembly for connection at pump.
8. Control: Float switch.
9. Pump Discharge Piping: Factory or field fabricated, [galvanized, ASTM A53/A53M, Schedule 40, steel pipe with ASME B16.4, Class 125, gray-iron threaded fittings]<Insert pipe material>.
10. Basin: Watertight, aluminum, plastic, or coated steel with inlet pipe connection and gastight cover with vent and pump discharge connections.

B. Packaged, Submersible Wastewater-Pump Units:

1. Description: Factory-assembled and -tested, automatic-operation, effluent-pump unit with basin.
2. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [ABS; Cardo Flow Solutions]
 - c. [Bell & Gossett; a Xylem brand]
 - d. [Goulds Water Technology; a Xylem brand]
 - e. [GRUNDFOS CBS Inc.]
 - f. [Liberty Pumps]
 - g. [Little Giant; a brand of Franklin Electric Co., Inc.]
 - h. [Pentair Aurora; Pentair Pump Group]
 - i. [ProFlo; a Ferguson Enterprises, Inc. brand]
 - j. [SFA Saniflo USA]
 - k. [Sta-Rite Industries, Inc.; Pentair Ltd.]
 - l. [Zoeller Company]
 - m. <Insert manufacturer's name>
3. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [ABS; Cardo Flow Solutions]
 - c. [Bell & Gossett; a Xylem brand]

- d. [Goulds Water Technology; a Xylem brand]
- e. [GRUNDFOS CBS Inc.]
- f. [Liberty Pumps]
- g. [Little Giant; a brand of Franklin Electric Co., Inc.]
- h. [Pentair Aurora; Pentair Pump Group]
- i. [ProFlo; a Ferguson Enterprises, Inc. brand]
- j. [SFA Saniflo USA]
- k. [Sta-Rite Industries, Inc.; Pentair Ltd.]
- l. [Zoeller Company]
- m. <Insert manufacturer's name>

- 4. Pump Type: Submersible, end-suction, single-stage, overhung-impeller, centrifugal pump as defined in HI 1.1-1.2 and HI 1.3.
- 5. Pump Body and Impeller: Corrosion-resistant materials.
- 6. Pump Seals: Mechanical.
- 7. Motor: Hermetically sealed, capacitor-start type, with built-in overload protection.
- 8. Power Cord: Three-conductor, waterproof cable of length required, but not less than **72 inches (1830 mm)** and with grounding plug and cable-sealing assembly for connection at pump.
- 9. Control: Float switch.
- 10. Pump Discharge Piping: Factory or field fabricated, [galvanized, ASTM A53/A53M, Schedule 40, steel pipe with ASME B16.4, Class 125, gray-iron threaded fittings]<Insert pipe material>.
- 11. Basin: Watertight plastic with inlet pipe connection and gastight cover with vent and pump discharge connections.

C. Capacities and Characteristics:

- 1. Pump Capacity: <Insert value> gpm (L/min.).
- 2. Total Dynamic Head: <Insert value> feet (kPa).
- 3. Speed: <Insert rpm>.
- 4. Discharge Pipe Size: <Insert value> NPS (DN).
- 5. Motor Horsepower: <Insert value> hp.
- 6. Electrical Characteristics:
 - a. Volts: [120][240]<Insert value> V ac.
 - b. Phases: [Single][Three].
 - c. Hertz: 60.
- 7. Unit Electrical Characteristics:
 - a. Full-Load Amperes: <Insert value> A.
 - b. Minimum Circuit Ampacity: <Insert value> A.
 - c. Maximum Overcurrent Protection: <Insert value> A.
- 8. Basin:
 - a. Capacity: [2 gal. (7.6 L)][4 gal. (15.1 L)]<Insert value> minimum.
 - b. Inlet Connection: [NPS 1-1/2 (DN 40)]<Insert pipe size> minimum.
 - c. Vent Connection: [NPS 1-1/2 (DN 40)]<Insert pipe size> minimum.

2.10 MOTORS

- A. Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors specified in Section 220500 "Common Work Results for Plumbing."

1. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
- B. Motors for submersible pumps shall be hermetically sealed.

PART 3 - EXECUTION

3.1 EARTHWORK

- A. Excavation and filling are specified in Section 312000 "Earth Moving."

3.2 EXAMINATION

- A. Examine roughing-in for plumbing piping to verify actual locations of sanitary drainage and vent piping connections before sewage pump installation.

3.3 INSTALLATION

- A. Pump Installation Standards:
 1. Comply with HI 1.4 for installation of centrifugal pumps.
 2. Comply with HI 3.1-3.5 for installation of progressing-cavity sewage pumps.
- B. Equipment Mounting:
 1. Install progressing-cavity sewage pumps on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
 2. Comply with requirements for vibration isolation and seismic-control devices specified in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."
 3. Comply with requirements for vibration isolation devices specified in Section 220548.13 "Vibration Controls for Plumbing Piping and Equipment."
- C. Wiring Method: Comply with requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- D. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.

3.4 CONNECTIONS

- A. Comply with requirements for piping specified in Section 221316 "Sanitary Waste and Vent Piping." Drawings indicate general arrangement of piping, fittings, and specialties.
- B. Where installing piping adjacent to equipment, allow space for service and maintenance.

3.5 FIELD QUALITY CONTROL

- A. Manufacturer's Field Service: Engage a factory-authorized service representative to test, inspect, and adjust components, assemblies, and equipment installations, including connections.
- B. Perform the following tests and inspections:
 - 1. Perform each visual and mechanical inspection.
 - 2. Leak Test: After installation, charge system and test for leaks. Repair leaks and retest until no leaks exist.
 - 3. Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation.
 - 4. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
- C. Pumps and controls will be considered defective if they do not pass tests and inspections.
- D. Prepare test and inspection reports.

3.6 STARTUP SERVICE

- A. **[Engage a factory-authorized service representative to perform][Perform]** startup service.
 - 1. Complete installation and startup checks according to manufacturer's written instructions.
 - 2. **<Insert startup steps>**.

3.7 ADJUSTING

- A. Adjust pumps to function smoothly, and lubricate as recommended by manufacturer.
- B. Adjust control set points.

3.8 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain[**controls and**] pumps.

END OF SECTION 22 13 29 00

22 - Plumbing

Task	Specification	Specification Description
22 13 29 00	22 13 00 00	Facility Gray-Water Storage Tanks

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 66 00 00 - CHEMICAL-WASTE SYSTEMS FOR LABORATORY AND HEALTHCARE FACILITIES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Single-wall pipe and fittings.
2. Double-wall containment pipe and fittings.
3. Field-fabrication containment piping.
4. Joining materials.
5. Piping specialties.
6. Neutralization tanks.
7. Neutralization systems.
8. Manholes - holding tanks.
9. Leak-detection systems.
10. pH monitoring systems.
11. High-level alarm stations.
12. Combination high-level and leak-detection alarm stations.

1.2 DEFINITIONS

- A. FPM:** Vinylidene fluoride (hexafluoropropylene copolymer rubber).

1.3 ACTION SUBMITTALS

- A. Product Data:** For each type of product.

- B. Shop Drawings:** For neutralization system, leak-detection systems, and pH monitoring systems and level alarms.

1. Include plans, elevations, sections, and attachment details.
2. Include details of neutralization-system assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Include details of leak-detection-system assemblies. Indicate required clearances, method of field assembly, components, and location and size of each field connection.
4. Include diagrams for power, signal, and control wiring.

- C. Delegated Design Submittals:** For seismic restraints of aboveground piping.

1. Include design calculations for selecting seismic restraints. See Section 018123 "Facility Seismic and Wind Criteria" for building seismic and wind criteria.

- D. Sustainable Design Submittals:**

1. Product Data: For solvents and adhesives, indicating VOC content.
2. Laboratory Test Reports: For solvents and adhesives, indicating compliance with requirements

for low-emitting materials.

1.4 INFORMATIONAL SUBMITTALS

- A. Profile Drawings for Outdoor Underground Piping: Show system piping in elevation. Draw profiles at horizontal scale of not less than **1 inch equals 50 feet (1:500)** and vertical scale of not less than **1 inch equals 5 feet (1:50)**. Indicate underground structures and pipes. Show types, sizes, materials, and elevations of other utilities crossing system piping.
- B. Coordination Drawings: Plans and other details, or Building Information Model (BIM), drawn to scale, showing the items described in this Section and coordinated with all building trades.
- C. Seismic Qualification Certificates: For tanks and tank systems, accessories, and components, from manufacturer.
 - 1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
 - 2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
 - 3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.
- D. Field quality control reports.

1.5 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For chemical-waste specialties and **[neutralization tanks][neutralization systems][and][leak-detection systems]** to include in emergency, operation, and maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Neutralization-Tank Limestone: Equal to **[200]<Insert number>** percent of amount required for each tank sump initial charge. Furnish limestone in **50 lb (22.7 kg)** bags.
 - 2. Neutralization-System Limestone and Chemicals: For each neutralization system.
 - a. Limestone: Equal to **[500]<Insert number>** percent of amount required for tank sump initial charge. Furnish limestone in **50 lb (22.7 kg)** bags.
 - b. Chemicals: Equal to **[500][1000]<Insert number>** percent of neutralizing chemicals required for filling tanks.

1.7 DELIVERY, STORAGE, AND HANDLING

- A. Deliver and store piping and specialties with sealing plugs in ends or with end protection.
- B. Do not store plastic pipe or fittings in direct sunlight.

- C. Protect pipe, fittings, and seals from dirt and damage.

1.8 FIELD CONDITIONS

- A. Interruption of Existing Chemical-Waste Service: Do not interrupt chemical-waste service to facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary chemical-waste service in accordance with requirements indicated:
 - 1. Notify **[Architect][Construction Manager][Owner]** no fewer than **[two]<Insert number>** days in advance of proposed interruption of chemical-waste service.
 - 2. Do not proceed with interruption of chemical-waste service without **[Architect's][Construction Manager's][Owner's]** written permission.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Single-Wall Piping Pressure Rating: **[5 psig (34.5 kPa)]<Insert value>[air test pressure][10 feet head (3.05 m)]of water for 30 minutes<Insert value and time>**.
- B. Double-Containment Piping Pressure Rating:
 - 1. Carrier Piping: **[5 psig (34.5 kPa)]<Insert value>[air test pressure][10 feet head (3.05 m) of water for 30 minutes]<Insert value and time>**.
 - 2. Containment Piping: **[5 psig (34.5 kPa)]<Insert value>[air test pressure]<Insert test method>**.
- C. Field-Fabrication Containment-Piping Pressure Rating: **[5 psig (34.5 kPa)]<Insert value>[air test pressure]<Insert test method>**.
- D. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by an NRTL, and marked for intended location and application.
- E. NFPA Compliance: Comply with NFPA 70.
- F. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design seismic restraints for aboveground piping. See Section 018123 "Facility Seismic and Wind Criteria," which specifies basis-of-design seismic and wind criteria for non-structural components.
- G. Seismic Performance: Piping, piping specialties, tanks, and tank systems are to withstand the effects of earthquake motions. See Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment" and Section 018123 "Facility Seismic and Wind Criteria" for building seismic performance criteria.
 - 1. The term "withstand" means "the unit will remain in place without separation of any parts from the device when subjected to the seismic forces specified **[and the unit will be fully operational after the seismic event]**."
 - 2. Component Importance Factor: **[1.5][1.0]**.
 - 3. **<Insert requirements for Component Amplification Factor and Component Response Modification Factor>**.

2.2 SINGLE-WALL PIPE AND FITTINGS

- A. PP Drainage Pipe and Fittings: ASTM F1412, extruded pipe and drainage-pattern fittings molded, with Schedule 40 dimensions and with fire-retardant additive complying with ASTM D4101; with **[fusion-][and][mechanical-]joint ends**.
1. Exception: Pipe and fittings made from PP resin without fire-retardant additive may be used for underground installation.
 2. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[GF Piping Systems: Georg Fischer LLC]**
 - b. **[IPEX USA LLC]**
 - c. **[Orion Fittings; A Watts Water Technologies Company]**
 - d. **[Town & Country Plastics, Inc]**
 - e. **[Zurn Industries, LLC]**
 - f. **<Insert manufacturer's name>**
 3. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[GF Piping Systems: Georg Fischer LLC]**
 - b. **[IPEX USA LLC]**
 - c. **[Orion Fittings; A Watts Water Technologies Company]**
 - d. **[Town & Country Plastics, Inc]**
 - e. **[Zurn Industries, LLC]**
 - f. **<Insert manufacturer's name>**
 4. Source Limitations: Obtain pipe and fittings from single source from single manufacturer.
- B. CPVC Drainage Pipe and Fittings: ASTM F2618, pipe and drainage-pattern fittings.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Charlotte Pipe and Foundry Company]**
 - b. **[Spears Manufacturing Company]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Charlotte Pipe and Foundry Company]**
 - b. **[Spears Manufacturing Company]**
 - c. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain pipe and fittings from single source from single manufacturer.

- C. PVDF Drainage Pipe and Fittings: ASTM F1673, Schedule 40, pipe and drainage-pattern fittings. Include fittings with **[fusion-][and][mechanical-]**joint ends.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[GF Piping Systems: Georg Fischer LLC]**
 - b. **[IPEX USA LLC]**
 - c. **[Orion Fittings; A Watts Water Technologies Company]**
 - d. **[Zurn Industries, LLC]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[GF Piping Systems: Georg Fischer LLC]**
 - b. **[IPEX USA LLC]**
 - c. **[Orion Fittings; A Watts Water Technologies Company]**
 - d. **[Zurn Industries, LLC]**
 - e. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain pipe and fittings from single source from single manufacturer.
- D. Fiberglass Pipe and Fittings, Centrifugally Cast: ASTM D2997, Type II, **[Grade 1][Grade 2]<Insert grade>**, **[Class A][Class B][Class C]**, RTRP pipe; with ASTM D5685, Type 4, fiberglass thermosetting resin fittings matching pipe; and **[adhesive-bonding][and][butt-and-wrap-joint]** materials. Include wall thickness that will provide **[160 psig (1105 kPa)]<Insert value>** minimum, sustained water test pressure rating.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Smith Fiberglass; a National Oilwell Varco brand]**
 - b. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Smith Fiberglass; a National Oilwell Varco brand]**
 - b. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain pipe and fittings from single source from single manufacturer.
- E. Fiberglass Pipe and Fittings, Filament Wound: ASTM D2996, Type I, **[Grade 1][Grade 2]<Insert grade>**, **[Class A][Class B][Class C][Class E][Class F]<Insert class>**, RTRP pipe; ASTM D5685, Type 1, reinforced thermosetting resin fittings matching pipe; and **[adhesive-bonding][and][butt-and-wrap-joint]** materials. Include wall thickness that will provide **[160 psig (1105 kPa)]<Insert value>** minimum, sustained water test pressure rating.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Ameron International]**
 - b. **[Fibrex]**
 - c. **[Smith Fiberglass; a National Oilwell Varco brand]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Ameron International]**
 - b. **[Fibrex]**
 - c. **[Smith Fiberglass; a National Oilwell Varco brand]**
 - d. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain pipe and fittings from single source from single manufacturer.
- F. Stainless Steel Drainage Pipe and Fittings: ASME A112.3.1, ASTM A666, Type 316L, stainless steel pipe and drainage-pattern fittings; with socket-and-spigot ends for gasket joints; and having piping manufacturer's FPM lip-seal rubber gaskets shaped to fit socket groove, with plastic backup ring.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Josam Company]**
 - b. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Josam Company]**
 - b. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain pipe and fittings from single source from single manufacturer.
- G. Borosilicate Glass Pipe and Fittings: ASTM C1053, pipe and drainage-pattern fittings; with manufacturer's standard couplings.
1. Covering: Factory-applied polystyrene for pipe installed underground.
 2. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Schott North America, Inc.]**
 - b. **<Insert manufacturer's name>**

3. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Schott North America, Inc.]**
 - b. **<Insert manufacturer's name>**
4. Source Limitations: Obtain pipe and fittings from single source from single manufacturer.
- H. Adapters and Transition Fittings: Assemblies with combinations of clamps, couplings, adapters, and gaskets; compatible with piping and system liquid; made for joining different piping materials.

2.3 DOUBLE-WALL CONTAINMENT PIPE AND FITTINGS

A. Double-Wall Containment Pipe and Fittings - Factory Fabricated:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Asahi/America]**
 - b. **[Flo Safe, Inc]**
 - c. **[GF Piping Systems: Georg Fischer LLC]**
 - d. **[Insul-Tek Piping Systems, Inc]**
 - e. **[IPEX USA LLC]**
 - f. **[Orion Fittings; A Watts Water Technologies Company]**
 - g. **[Performance Pipe]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Asahi/America]**
 - b. **[Flo Safe, Inc]**
 - c. **[GF Piping Systems: Georg Fischer LLC]**
 - d. **[Insul-Tek Piping Systems, Inc]**
 - e. **[IPEX USA LLC]**
 - f. **[Orion Fittings; A Watts Water Technologies Company]**
 - g. **[Performance Pipe]**
 - h. **<Insert manufacturer's name>**
3. Source Limitations: Obtain pipe and fittings from single source from single manufacturer.
4. Sizes indicate carrier-pipe size; with carrier (inner) pipe and fittings; annular-space, carrier-pipe supports; containment (outer) pipe and fittings; and joining materials and fasteners.
5. Piping Materials:
 - a. PP Double-Containment Drainage Pipe and Fittings: Made of ASTM D4101 PP resin.
 - 1) Carrier and Containment Pipes: ASTM F1412, Schedule 40.
 - 2) Fittings: ASTM F1412, Schedule 40 drainage pattern complying with ASTM D3311.

- b. PVDF Double-Containment Drainage Pipe and Fittings: Made of ASTM D3222 PVDF resin.
 - 1) Carrier and Containment Pipes: ASTM F1673, Schedule 40.
 - 2) Fittings: ASTM F1673, Schedule 40 drainage pattern complying with ASTM D3311.
- 6. Include design and fabrication of double-containment pipe and fitting assemblies with provision for field installation of cable leak-detection system in annular space between carrier and containment piping.

2.4 FIELD-FABRICATION CONTAINMENT PIPING

- A. Containment Piping - Field Fabricated: Containment split pipe and split fittings with carrier-pipe centralizers. Include manufacturer's fastening devices and materials.
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Flo Safe, Inc]**
 - b. **[GF Piping Systems: Georg Fischer LLC]**
 - c. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Flo Safe, Inc]**
 - b. **[GF Piping Systems: Georg Fischer LLC]**
 - c. **<Insert manufacturer's name>**
 - 3. Source Limitations: Obtain containment piping from single source from single manufacturer.
 - 4. Material: **[HDPE][PP]** pipe and fittings.
 - 5. Fastening System: FPM gaskets, clamps, and pins.

2.5 JOINING MATERIALS

- A. Couplings: Assemblies with combinations of clamps, gaskets, sleeves, and threaded or flanged parts; compatible with piping and system liquid; and made by piping manufacturer for joining system piping.
- B. Adapters and Transition Fittings: Assemblies with combinations of clamps, couplings, adapters, gaskets, and threaded or flanged parts; compatible with piping and system liquid; and made for joining different piping materials.
- C. Flanges: Assemblies of companion flanges and gaskets complying with ASME B16.21 and compatible with system liquid, and bolts and nuts.
- D. Solvent Cement for Joining CPVC Piping: ASTM F493. Include primer in accordance with ASTM F656.
 - 1. Product Data: Verify PVC welding solvent cement has a VOC content of 510 g/L or less.
 - 2. Verify solvent cement complies with testing and product requirements of the California

- Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Verify solvent cement complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
 4. Verify solvent cement complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.
- E. Fiberglass-Pipe Adhesive: As furnished or recommended by pipe manufacturer.
1. Verify fiberglass adhesive has a VOC content of 80 g/L or less when calculated in accordance with 40 CFR 59, Subpart D (EPA Method 24).
 2. Verify adhesives and sealants comply with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
 3. Verify adhesives and sealants comply with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
 4. Verify adhesives and sealants comply with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

2.6 PIPING SPECIALTIES

A. Plastic Dilution Traps:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[GF Piping Systems: Georg Fischer LLC]**
 - b. **[IPEX USA LLC]**
 - c. **[Orion Fittings; A Watts Water Technologies Company]**
 - d. **[Town & Country Plastics, Inc]**
 - e. **[Zurn Industries, LLC]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[GF Piping Systems: Georg Fischer LLC]**
 - b. **[IPEX USA LLC]**
 - c. **[Orion Fittings; A Watts Water Technologies Company]**
 - d. **[Town & Country Plastics, Inc]**
 - e. **[Zurn Industries, LLC]**

f. <Insert manufacturer's name>

3. Source Limitations: Obtain traps from single source from single manufacturer.
4. Material: Corrosion-resistant PP, with removable base.
5. End Connections: Mechanical joint.
6. Dilution Tanks: **1 gal. (3.8 L)** capacity, with clear base unless colored base is indicated; with two **NPS 1-1/2 (DN 40)** top inlets and one **NPS 1-1/2 (DN 40)** side outlet.
7. Small Dilution Jars: **1-pint (0.5-L)** capacity, with clear base unless colored base is indicated; with **NPS 1-1/2 (DN 40)** top inlet and **NPS 1-1/2 (DN 40)** side outlet.
8. Large Dilution Jars: **1-quart (1-L)** capacity; with **NPS 1-1/2 (DN 40)** top inlet and **NPS 1-1/2 (DN 40)** side outlet.

B. Glass, Drain-Line, Interceptor Traps:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Schott North America, Inc.]**
 - b. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert **manufacturer's name; product name or designation**> or comparable product by one of the following:
 - a. **[Schott North America, Inc.]**
 - b. <Insert manufacturer's name>
3. Source Limitations: Obtain traps from single source from single manufacturer.
4. Standard: ASTM C1053.
5. Type: Drum trap.
6. Size: **NPS 1-1/2 (DN 40)**, **NPS 2 by NPS 1-1/2 (DN 50 by DN 40)**, or **NPS 2 (DN 50)**, as required to match connecting piping.

C. Corrosion-Resistant Traps:

1. Type: P-trap or drum trap.
2. Size: **NPS 1-1/2 or NPS 2 (DN 40 or DN 50)**, as required to match connected piping.
3. High-Silicon Iron: ASTM A861, with horizontal outlet and hub-and-plain or plain ends to match connecting piping.
4. PP: ASTM D4101, with mechanical-joint pipe connections.
5. PVDF: ASTM D3222, with mechanical-joint pipe connections.
6. Glass: ASTM C1053, with coupling pipe connections.

D. Stainless Steel Floor Drains :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Josam Company]**
 - b. **[Sioux Chief Manufacturing Company, Inc.]**

- c. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Josam Company]
 - b. [Sioux Chief Manufacturing Company, Inc.]
 - c. <Insert manufacturer's name>
3. Source Limitations: Obtain floor drains from single source from single manufacturer.
4. Standard: ASME A112.3.1; ASTM A666, Type 316L.
5. Body: With [8.5-by-8.5-inch (215-by-215-mm)][12.4-by-12.4-inch (315-by-315-mm)] top with grate.
6. Outlet: Bottom, of size indicated.
- E. PP Floor Drains :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [GF Piping Systems: Georg Fischer LLC]
 - b. [IPEX USA LLC]
 - c. [Orion Fittings; A Watts Water Technologies Company]
 - d. [Schier Products Company]
 - e. [Town & Country Plastics, Inc]
 - f. [WATTS; A Watts Water Technologies Company]
 - g. [Zurn Industries, LLC]
 - h. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [GF Piping Systems: Georg Fischer LLC]
 - b. [IPEX USA LLC]
 - c. [Orion Fittings; A Watts Water Technologies Company]
 - d. [Schier Products Company]
 - e. [Town & Country Plastics, Inc]
 - f. [WATTS; A Watts Water Technologies Company]
 - g. [Zurn Industries, LLC]
 - h. <Insert manufacturer's name>
3. Source Limitations: Obtain floor drains from single source from single manufacturer.
4. Body: With 7- to 9-inch (178- to 230-mm) top diameter, with flashing flange and weep holes; and with [flashing clamp][basket strainer][funnel attachment][and][trap-primer connection].
5. Outlet: Bottom, to match connecting pipe, with NPS 2, NPS 3, NPS 4, or NPS 6 (DN 50, DN 80, DN 100, or DN 150) outlet as indicated.
- F. Stainless Steel Cleanouts:
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering

products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Josam Company]
- b. [Sioux Chief Manufacturing Company, Inc.]
- c. <Insert manufacturer's name>

- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Josam Company]
- b. [Sioux Chief Manufacturing Company, Inc.]
- c. <Insert manufacturer's name>

- 3. Source Limitations: Obtain cleanouts from single source from single manufacturer.
- 4. Standard: ASME A112.3.1; ASTM A666, Type 316L.
- 5. Aboveground Piping: Cleanout tee of size matching piping.
- 6. Underground and Underslab Piping: Floor access cleanout of size matching piping.

G. Plastic Backwater Valves:

- 1. Description: Full-port **NPS 3 (DN 80)** check valve, PP or PVDF, matching or compatible with system piping and compatible with system liquid, with EPDM seals and flanged ends.
 - a. Exception: PVC material for use with PVC piping systems.

H. PP Sink Outlets:

- 1. Description: **NPS 1-1/2 (DN 40)**, with clamping device, stopper, and **7-inch- (178-mm-)** high overflow fitting.

I. Glass Sink Outlets:

- 1. **NPS 1-1/2 (DN 40)**; with sink assembly of outlet, strainer, gasket, and locknut; overflow fitting of length indicated; and tailpiece assembly of borosilicate glass and locknut.
- 2. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Schott North America, Inc.]
- b. <Insert manufacturer's name>

- 3. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Schott North America, Inc.]
- b. <Insert manufacturer's name>

- 4. Source Limitations: Obtain sink outlets from single source from single manufacturer.
- 5. Standard: ASTM C1053 components for field assembly.

**2.7 NEUTRALIZATION TANKS****A. Plastic Neutralization Tanks :**

1. Corrosion-resistant plastic materials; with removable, gastight cover; interior, sidewall, dip-tube inlet; outlet; vent; and threaded or flanged, sidewall pipe connections.
2. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Chem-Tainer Industries]**
 - b. **[GF Piping Systems: Georg Fischer LLC]**
 - c. **[IPEX USA LLC]**
 - d. **[Orion Fittings; A Watts Water Technologies Company]**
 - e. **[Schier Products Company]**
 - f. **[Town & Country Plastics, Inc]**
 - g. **[WATTS; A Watts Water Technologies Company]**
 - h. **[Zurn Industries, LLC]**
 - i. **<Insert manufacturer's name>**
3. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Chem-Tainer Industries]**
 - b. **[GF Piping Systems: Georg Fischer LLC]**
 - c. **[IPEX USA LLC]**
 - d. **[Orion Fittings; A Watts Water Technologies Company]**
 - e. **[Schier Products Company]**
 - f. **[Town & Country Plastics, Inc]**
 - g. **[WATTS; A Watts Water Technologies Company]**
 - h. **[Zurn Industries, LLC]**
 - i. **<Insert manufacturer's name>**
4. Source Limitations: Obtain tanks from single source from single manufacturer.
5. Material: **[HDPE][HDPE or ASTM D4101 PP][ASTM D4101 PP]**.
6. Tank Capacity: **<Insert capacity>**.
7. Dip Tube: On outlet pipe instead of inlet pipe.
8. Extension: HDPE, PE, or PP.
9. Traffic Cover: **[Light-duty][Heavy-duty pedestrian or light-duty vehicular, steel plate over] plastic, bolted.**
10. Limestone: Chips or lumps, with more than 90 percent calcium carbonate content and **1- to 3-inch (25- to 75-mm)** diameter.
11. Dolomitic Limestone: Chips or lumps, with more than 90 percent combined magnesium carbonate and calcium carbonate content and **1- to 3-inch (25- to 75-mm)** diameter.

B. Ceramic Neutralization Tanks :

1. Corrosion-resistant, cast-ceramic shell; with removable, reinforced-plastic, gastight cover; inlet; interior, sidewall, dip-tube outlet; vent; and bell, sidewall pipe connections.
2. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. **[Koch Knight LLC]**
 - b. **<Insert manufacturer's name>**
3. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Koch Knight LLC]**
 - b. **<Insert manufacturer's name>**
4. Source Limitations: Obtain tanks from single source from single manufacturer.
5. Tank Capacity: **<Insert capacity>**.
6. Extension, Ceramic: Of size and length indicated, and with cast-iron manhole frame and cover.
7. Extension, Steel: With protective coating, **28-inch (710-mm)** diameter, and cast-iron manhole frame and cover.
8. Limestone: Chips or lumps, with more than 90 percent calcium carbonate content and **1- to 3-inch (25- to 75-mm)** diameter.
9. Dolomitic Limestone: Chips or lumps, with more than 90 percent combined magnesium carbonate and calcium carbonate content and **1- to 3-inch (25- to 75-mm)** diameter.
- C. Collection Tanks: Corrosion-resistant, cast-ceramic shell. Include removable, reinforced-plastic, gastight cover; inlet; vent; and bell, sidewall pipe connections.
 1. Extension: **[Ceramic][Steel with protective coating]**, **28-inch (710-mm)** minimum diameter, and cast-iron manhole frame and cover.

2.8 NEUTRALIZATION SYSTEMS

A. Plastic-Tank Neutralization Systems :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Orion Fittings; A Watts Water Technologies Company]**
 - b. **[Town & Country Plastics, Inc]**
 - c. **[Zurn Industries, LLC]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Orion Fittings; A Watts Water Technologies Company]**
 - b. **[Town & Country Plastics, Inc]**
 - c. **[Zurn Industries, LLC]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain neutralization systems from single source from single manufacturer.
4. Description: Automatic system for neutralizing chemical waste.
5. Controls: Factory wired and tested, 120 V ac, to operate probes, control valves, and metering

- pumps and to monitor pH of effluent; with wiring and electrical-power terminals.
6. Panel: NEMA 250, Type 4X enclosure unless otherwise indicated; with manufacturer's standard features, control devices, and indicators, but not less than the following:
 - a. Power light and on/off switch.
 - b. pH analyzer with meter and high- and low-pH indicators.
 - c. Low caustic- and acid-solution level indicators.
 - d. Alarm horn with silencer and reset switch.
 - e. Agitator running light with on/off switch.
 - f. Running lights with on/off switches for caustic- and acid-solution pumps.
 7. Strip chart recorder with capacity for 30-day record.
 8. Piping between Tanks: Same material as chemical-waste piping system unless otherwise indicated.
 9. Interceptor Tank: Same material as mixing tank; with removable, gastight cover and sidewall inlet and outlet piping connections.
 10. Neutralization Tank: Same material as mixing tank; with removable, gastight cover, sidewall inlet and outlet piping connections, and vent connection in sidewall or top.
 - a. Limestone: Chips or lumps, with more than 90 percent calcium carbonate content and **1- to 3-inch (25- to 75-mm)** diameter.
 - b. Dolomitic Limestone: Chips or lumps, with more than 90 percent combined magnesium carbonate and calcium carbonate content and **1- to 3-inch (25- to 75-mm)** diameter.
 11. Mixing Tank: With removable, gastight cover, sidewall inlet and outlet piping connections, vent connection in sidewall or top, neutralizing-solution piping connections, and openings in top for probe and agitator.
 - a. Material: **[HDPE][HDPE or ASTM D4101 PP][ASTM D4101 PP]**.
 - b. pH Probe: Type and length suitable for mixing-tank size.
 - c. Agitator: Electric, with stainless steel shaft and propeller.
 12. Caustic-Solution Storage Tank: PP.
 - a. Caustic Chemical: Sodium hydroxide solution.
 13. Acid Storage Tank: PP.
 - a. Acid Chemical: Sulfuric acid solution.
 14. Metering Pumps: Types suitable for neutralizing solutions.
 15. Sampling Tank: Same material as mixing tank; with removable, gastight cover, sidewall inlet and outlet piping connections, and opening in top for probe.
 - a. pH probe: Type and length suitable for sampling-tank size.
- B. Ceramic-Tank Neutralization Systems :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Koch Knight LLC]**

- b. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Koch Knight LLC]
 - b. <Insert manufacturer's name>
3. Source Limitations: Obtain neutralization systems from single source from single manufacturer.
4. Description: Automatic system for neutralizing chemical waste.
5. Controls: Factory wired and tested, 120 V ac, to operate probes, control valves, and metering pumps and to monitor pH of effluent; with wiring and electrical-power terminals.
6. Panel: NEMA 250, Type 4X enclosure unless otherwise indicated; with manufacturer's standard features, control devices, and indicators, but not less than the following:
 - a. Power light and on/off switch.
 - b. pH analyzer with meter and high- and low-pH indicators.
 - c. Low caustic- and acid-solution level indicators.
 - d. Alarm horn with silencer and reset switch.
 - e. Agitator running light with on/off switch.
 - f. Running lights with on/off switches for caustic- and acid-solution pumps.
7. Strip chart recorder with capacity for 30-day record.
8. Piping between Tanks: Same material as chemical-waste piping system unless otherwise indicated.
9. Interceptor Tank: Same material as mixing tank; with removable, gastight cover and sidewall inlet and outlet piping connections.
10. Neutralization Tank: Same material as mixing tank; with removable, gastight cover, sidewall inlet and outlet piping connections, and vent connection in sidewall or top.
 - a. Limestone: Chips or lumps, with more than 90 percent calcium carbonate content and 1- to 3-inch (25- to 75-mm) diameter.
 - b. Dolomitic Limestone: Chips or lumps, with more than 90 percent combined magnesium carbonate and calcium carbonate content and 1- to 3-inch (25- to 75-mm) diameter.
11. Mixing Tank: With removable, gastight cover, sidewall inlet and outlet piping connections, vent connection in sidewall or top, neutralizing-solution piping connections. and openings in top for probe and agitator.
 - a. Material: Clay, vitrified into ceramic unit.
 - b. pH Probe: Type and length suitable for mixing tank size.
 - c. Agitator: Electric, with stainless steel shaft and propeller.
12. Caustic-Solution Storage Tank: PP.
 - a. Caustic Chemical: Sodium hydroxide solution.
13. Acid Storage Tank: PP.
 - a. Acid Chemical: Sulfuric acid solution.
14. Metering Pumps: Types suitable for neutralizing solutions.

15. Sampling Tank: Same material as mixing tank; with removable, gastight cover, sidewall inlet and outlet piping connections, and opening in top for probe.
 - a. pH Probe: Type and length suitable for sampling-tank size.

2.9 MANHOLES - HOLDING TANKS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 1. **[Ayer Sales, Inc.]**
 2. **[ISCO Industries, LLC]**
 3. **[Performance Pipe]**
 4. **[Plastic Fusion Fabricators, Inc]**
 5. **[PolyPipe Brand; Dura-Line]**
 6. **[Zurn Industries, LLC]**
 7. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 1. **[Ayer Sales, Inc.]**
 2. **[ISCO Industries, LLC]**
 3. **[Performance Pipe]**
 4. **[Plastic Fusion Fabricators, Inc]**
 5. **[PolyPipe Brand; Dura-Line]**
 6. **[Zurn Industries, LLC]**
 7. **<Insert manufacturer's name>**
- C. Source Limitations: Obtain holding tanks from single source from single manufacturer.
- D. Description: ASTM F1759, fabricated from PE components. Include bottom, sidewalls, and top sections; corrosion-resistant, tanks frame and cover; fusion or other watertight joints; and design to prohibit flotation.
- E. Construction: **[Single wall][Double wall with interstitial space]**.
- F. Bottom: Channeled.
- G. Connections: Inlets and outlet matching or suitable for piping.
- H. Steps: Manufacturer's standard, fusion welded to sidewall. Omit steps for manholes less than **[60 inches (1500 mm)]<Insert dimension>** deep.
- I. Top: Include **24-inch (610-mm)** nominal-diameter frame and cover.

2.10 LEAK-DETECTION SYSTEMS

- A. Leak-Detection Systems :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Asahi/America]
 - b. [Flo Safe, Inc]
 - c. [IPEX USA LLC]
 - d. [Pentair Thermal Management]
 - e. [PermAlert]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Asahi/America]
 - b. [Flo Safe, Inc]
 - c. [IPEX USA LLC]
 - d. [Pentair Thermal Management]
 - e. [PermAlert]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain leak-detection systems from single source from single manufacturer.
4. Description: Cable leak-detection system capable of detecting and annunciating fluid leaks; with controls, panel, wiring, cable sensors, probes if required, and piping.
5. Annunciator Panel: Enclosure with visual and audible alarms and leak-location indicator.
6. Sensors: Electric cable, suitable for insertion in double-containment piping annular space, with capability of detecting fluid leaks and signaling locations of leaks.

2.11 pH MONITORING SYSTEMS

A. pH Monitoring System:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [IPEX USA LLC]
 - b. [Orion Fittings; A Watts Water Technologies Company]
 - c. [Process and Water]
 - d. [Sensorex USA]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [IPEX USA LLC]
 - b. [Orion Fittings; A Watts Water Technologies Company]
 - c. [Process and Water]
 - d. [Sensorex USA]
 - e. <Insert manufacturer's name>

3. Description: pH monitoring system, including monitoring panel, pH probe, and interconnecting cable.
4. Monitoring Panel:
 - a. Enclosure: UL 508 listed and labeled, **<Insert enclosure type>**.
 - b. pH analyzer.
 - c. Power-on LED.
 - d. Alarms:
 - 1) User-selectable high and low pH setpoints.
 - 2) Analyzer/sensor fault alarm.
 - 3) Red visible alarm indicator lights.
 - 4) Audible alarm horn.
 - 5) Audible alarm silence button.
 - e. Digital pH Chart Recorder Module:
 - 1) Fully connected and installed in monitoring panel.
 - 2) Paperless chart recorder.
 - 3) 30-day record.
 - 4) User-selectable high and low alarm set points.
 - 5) Enclosure: **<Insert enclosure type>**.
5. pH Probe and Cable:
 - a. Industrial-quality pH probe.
 - b. Airtight insertion fixture.
 - c. Factory-calibrated.

2.12 HIGH-LEVEL ALARM STATIONS

A. High-Level Alarm Station:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Icon Process Controls]**
 - b. **[MIFAB, Inc]**
 - c. **[Orion Fittings; A Watts Water Technologies Company]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Icon Process Controls]**
 - b. **[MIFAB, Inc]**
 - c. **[Orion Fittings; A Watts Water Technologies Company]**
 - d. **<Insert manufacturer's name>**
3. Description: High-level alarm stations for tanks.

4. Alarm Panel:
 - a. Enclosure: UL-listed, **<Insert enclosure type>**.
 - b. 120 V ac, 60 Hz.
 - c. Integral Alarm Horn: **<Insert decibels at distance>**.
 - d. Integral red-light beacon that remains active until alarm state is resolved.
 - e. Horn silence switch.
 - f. Alarm test switch.
5. High-Level Alarm Sensor:
 - a. Polypropylene NO float sensor with solid polypropylene exposed float.
 - b. Maximum Operating Temperature: **[194 deg F (90 deg C)]<Insert maximum operating temperature>**.

B. Combination High-Level and Leak-Detection Alarm Stations:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Icon Process Controls]**
 - b. **[Orion Fittings; A Watts Water Technologies Company]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Icon Process Controls]**
 - b. **[Orion Fittings; A Watts Water Technologies Company]**
 - c. **<Insert manufacturer's name>**
3. Description: Combination high level alarm and leak detection station for tanks.
4. Alarm Panel:
 - a. Enclosure: UL-listed, **<Insert enclosure type>**.
 - b. 120 V ac, 60 Hz.
 - c. Green, power-on LED.
 - d. Two red, alarm LEDs that remain active until alarm state is resolved.
 - e. Integral alarm horn, **<Insert decibels at distance>**
 - f. Horn silence switch.
 - g. Alarm test switch.
 - h. System Operating Temperature Range: **[Minus 22 deg F to plus 150 deg F (Minus 30 deg C to plus 65 deg C)]<Insert range>**.
5. High-Level Alarm Sensor:
 - a. Polypropylene normally open float sensor with solid polypropylene exposed float.
6. Leak-Detection Sensor:

- a. For sensing leaks on floor around outside perimeter of tank.
- b. 12 V dc flat leak detection sensor.

PART 3 - EXECUTION

3.1 EARTHWORK

- A. Comply with requirements in Section 312000 "Earth Moving" for excavating, trenching, and backfilling.

3.2 CONCRETE BASES

- A. Equipment Mounting:

- 1. Install **[neutralization tanks][and][neutralization system tanks]** on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
- 2. Comply with requirements for vibration isolation and seismic-control devices specified in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."
- 3. Comply with requirements for vibration isolation devices specified in Section 220548.13 "Vibration Controls for Plumbing Piping and Equipment."

- B. Anchor **[neutralization tanks][and][neutralization system tanks]** to concrete bases.

- 1. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on **19-inch (480-mm)** centers around full perimeter of base.
- 2. For installed equipment, install epoxy-coated anchor bolts that extend through concrete base and anchor into structural concrete floor.
- 3. Place and secure anchorage devices. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be imbedded.
- 4. Install anchor bolts to elevations required for proper attachment to supported equipment.

3.3 INSTALLATION OF PIPING

- A. Chemical-Waste Sewerage Outside the Building:

- 1. Locations and Arrangements: Drawing plans and details indicate general location and arrangement of underground chemical-waste sewerage piping. Location and arrangement of piping layout take design considerations into account. Install piping as indicated, to extent practical. Where specific installation is not indicated, follow piping manufacturer's written instructions.
- 2. Install piping beginning at low point, true to grades and alignment indicated with unbroken continuity of invert. Place bell ends of piping facing upstream. Install gaskets, seals, sleeves, and couplings in accordance with manufacturer's written instructions for using lubricants, cements, and other installation requirements.
- 3. Install manholes for changes in direction unless fittings are indicated. Use fittings for branch connections unless direct tap into existing sewer is indicated.
- 4. Install proper size increasers, reducers, and couplings where different sizes or materials of pipes and fittings are connected. Reducing size of piping in direction of flow is prohibited.
- 5. Tunneling: Install pipe under streets or other obstructions that cannot be disturbed by tunneling, jacking, or combination of both.

6. Install drainage piping pitched down in direction of flow, at minimum slope of [1][2]<Insert number> percent unless otherwise indicated.
7. Install drainage piping with [36-inch (900-mm)][48-inch (1200-mm)][60-inch (1500-mm)][72-inch (1800-mm)]<Insert dimension> minimum cover.
8. Install CPVC drainage piping in accordance with ASTM D2321 and ASTM F1668.
9. Install PVDF drainage piping in accordance with ASTM D2321 and ASTM F1668.
10. Install field-fabrication containment piping over[new and] existing carrier piping. Use containment piping manufacturer's fastening system.
11. Clear interior of piping and structures of dirt and superfluous material as work progresses. Maintain a swab or drag inside piping, and pull past each joint as it is completed. Place plug in end of incomplete piping at end of day and when work stops.

B. Chemical-Waste Piping Inside the Building:

1. Install piping adjacent to equipment, accessories, and specialties, to allow space for service and maintenance.
2. Transition and special fittings with pressure ratings at least equal to piping pressure rating may be used unless otherwise indicated.
3. Flanges may be used on aboveground piping unless otherwise indicated.
4. Install piping in concealed locations unless otherwise indicated and except in equipment rooms and service areas.
5. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.
6. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal.
7. Install piping at indicated slopes.
8. Install piping free of sags and bends.
9. Install fittings for changes in direction and branch connections.
10. Verify final equipment locations for roughing-in.
11. Install sleeves for piping penetrations of walls, ceilings, and floors. Comply with requirements for sleeves specified in Section 220500 "Common Work Results for Plumbing."
12. Install sleeve seals for piping penetrations of concrete walls and slabs. Comply with requirements for sleeve seals specified in Section 220500 "Common Work Results for Plumbing."
13. Install escutcheons for piping penetrations of walls, ceilings, and floors. Comply with requirements for escutcheons specified in Section 220500 "Common Work Results for Plumbing."

3.4 INSTALLATION OF PIPING SPECIALTY

- A. Embed floor drains in **4-inch- (100-mm-)** minimum depth of concrete around bottom and sides. Comply with requirements in Section 033000 "Cast-in-Place Concrete" for concrete.
- B. Fasten grates to drains if indicated.
- C. Set floor drains with tops flush with pavement surface.
- D. Install cleanouts and riser extension from sewer pipe to cleanout at grade. Use fittings of same material as sewer pipe at branches for cleanouts and riser extensions to cleanouts. Install piping so cleanouts open in direction of flow in pipe.
 1. Set cleanout bodies in earth in cast-in-place concrete block, **18 by 18 by 12 inches (450 by 450 by 300 mm)** deep. Set with tops **1 inch (25 mm)** above surrounding grade. Set cleanout plugs in concrete pavement, with tops flush with pavement surface. Comply with requirements in Section 033000 "Cast-in-Place Concrete" for formwork, reinforcement, and

concrete requirements.

- E. Install backwater valves in horizontal position. Include riser to cleanout at grade.

3.5 JOINT CONSTRUCTION

A. Chemical-Waste Sewerage Outside the Building:

1. Plastic-Piping Fusion Joints: Make PP drainage-piping joints in accordance with ASTM F1290.
2. Join dissimilar pipe materials with adapters compatible with pipe materials being joined.

B. Chemical-Waste Piping Inside the Building:

1. Plastic-Piping Fusion Joints: Make PP drainage-piping joints in accordance with ASTM F1290.
2. Dissimilar-Material Piping Joints: Make joints using adapters compatible with both system materials.

3.6 INSTALLATION OF HANGER AND SUPPORT

- A. Pipe sizes in this article refer to aboveground single-wall piping[**and carrier piping of containment piping**].
- B. Comply with requirements in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment" for seismic-restraint devices.
- C. Comply with requirements in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment" for pipe hanger and support devices. Install the following:
 1. Vertical Piping: MSS Type 8 or MSS Type 42 riser clamps.
 2. Individual, Straight, Horizontal Piping Runs:
 - a. 100 Feet (30 m) and Less: MSS Type 1, adjustable, steel clevis hangers.
 - b. Longer Than 100 Feet (30 m): MSS Type 43, adjustable roller hangers.
 - c. Longer Than 100 Feet (30 m), if Indicated: MSS Type 49, spring cushion rolls.
 3. Multiple, Straight, Horizontal Piping Runs 100 Feet (30 m) or Longer: MSS Type 44, pipe rolls. Support pipe rolls on trapeze.
 4. Base of Vertical Piping: MSS Type 52 spring hangers.
- D. Comply with requirements in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment" for installation of supports.
- E. Support horizontal piping and tubing within **12 inches (300 mm)** of each fitting and coupling.
- F. Support vertical piping and tubing at base and at each floor.
- G. Rod diameter may be reduced one size for double-rod hangers, to minimum of **3/8 inch (10 mm)**.
- H. Install vinyl-coated hangers for PP piping with the following maximum horizontal spacing and minimum rod diameters:
 1. NPS 2 (DN 50): **33 inches (840 mm)** with **3/8-inch (10-mm)** rod.

2. NPS 2-1/2 and NPS 3 (DN 65 and DN 80): **42 inches (1067 mm)** with **1/2-inch (13-mm)** rod.
 3. NPS 4 and NPS 5 (DN 100 and DN 125): **48 inches (1220 mm)** with **5/8-inch (16-mm)** rod.
 4. NPS 6 (DN 150): **48 inches (1220 mm)** with **3/4-inch (19-mm)** rod.
 5. NPS 8 (DN 200): **48 inches (1220 mm)** with **7/8-inch (22-mm)** rod.
- I. Install supports for vertical PP piping every **72 inches (1830 mm)**.
- J. Install vinyl-coated hangers for PVC piping with the following maximum horizontal spacing and minimum rod diameters:
1. NPS 1-1/2 and NPS 2 (DN 40 and DN 50): **36 inches (910 mm)** with **3/8-inch (10-mm)** rod.
 2. NPS 2-1/2 and NPS 3 (DN 65 and DN 80): **42 inches (1070 mm)** with **1/2-inch (13-mm)** rod.
 3. NPS 4 and NPS 5 (DN 100 and DN 125): **48 inches (1220 mm)** with **5/8-inch (16-mm)** rod.
 4. NPS 6 (DN 150): **48 inches (1220 mm)** with **3/4-inch (19-mm)** rod.
 5. NPS 8 to NPS 12 (DN 200 to DN 300): **48 inches (1220 mm)** with **7/8-inch (22-mm)** rod.
- K. Install supports for vertical CPVC piping every **48 inches (1220 mm)**.
- L. Install vinyl-coated hangers for PVDF piping with the following maximum horizontal spacing and minimum rod diameters:
1. All Sizes: Install continuous support for piping with liquid waste at temperatures above **140 deg F (60 deg C)**.
 2. NPS 1/2 (DN 15) and Smaller: **30 inches (760 mm)** with **3/8-inch (10-mm)** rod.
 3. NPS 3/4 to NPS 1-1/2 (DN 20 to DN 40): **36 inches (910 mm)** with **3/8-inch (10-mm)** rod.
 4. NPS 2 (DN 50): **36 inches (910 mm)** with **3/8-inch (10-mm)** rod.
 5. NPS 2-1/2 and NPS 3 (DN 65 and DN 80): **42 inches (1070 mm)** with **1/2-inch (13-mm)** rod.
 6. NPS 4 and NPS 5 (DN 100 and DN 125): **48 inches (1220 mm)** with **5/8-inch (16-mm)** rod.
 7. NPS 6 (DN 150): **48 inches (1220 mm)** with **3/4-inch (19-mm)** rod.
- M. Install supports for vertical PVDF piping **NPS 1-1/2 (DN 40)** every **48 inches (1220 mm)** and **NPS 2 (DN 50)** and larger every **72 inches (1830 mm)**.
- N. Install hangers for stainless steel drainage piping with the following maximum horizontal spacing and minimum rod diameters:
1. NPS 2 (DN 50): **10 feet (3 m)** with **3/8-inch (10-mm)** rod.
 2. NPS 2-1/2 (DN 65): **11 feet (3.4 m)** with **1/2-inch (13-mm)** rod.
 3. NPS 3 (DN 80): **12 feet (3.6 m)** with **1/2-inch (13-mm)** rod.
 4. NPS 4 and NPS 5 (DN 100 and DN 125): **12 feet (3.6 m)** with **5/8-inch (16-mm)** rod.
 5. NPS 6 (DN 150): **12 feet (3.6 m)** with **3/4-inch (19-mm)** rod.
- O. Install supports for vertical, stainless steel drainage piping every **15 feet (4.5 m)**.
- P. Install vinyl-coated hangers for glass piping with the following maximum horizontal spacing and minimum rod diameters:
1. NPS 1 and NPS 1-1/4 (DN 25 and DN 32): **72 inches (1830 mm)** with **3/8-inch (10-mm)** rod.
 2. NPS 1-1/2 and NPS 2 (DN 40 and DN 50): **96 inches (2440 mm)** with **3/8-inch (10-mm)** rod.
 3. NPS 3 (DN 80): **96 inches (2440 mm)** with **1/2-inch (13-mm)** rod.
 4. NPS 4 and NPS 6 (DN 100 and DN 150): **96 inches (2440 mm)** with **5/8-inch (16-mm)** rod.
- Q. Install supports for vertical glass piping every **96 inches (2440 mm)**.

- R. Support piping and tubing not listed above in accordance with MSS SP-58.

3.7 INSTALLATION OF NEUTRALIZATION TANK

- A. Install exterior **[collection][and][neutralization]** tanks, complete with appurtenances indicated.
 - 1. Set tops of tank covers flush with finished surface where covers occur in pavements. Set covers **3 inches (75 mm)** above finished surface elsewhere unless otherwise indicated.
 - 2. Include initial fill of limestone for neutralization tanks.
- B. Install interior neutralization tanks on smooth and level **[concrete base][floor surface]**. Include full initial charge of limestone.

3.8 INSTALLATION OF NEUTRALIZATION SYSTEM

- A. Install neutralization systems on smooth and level **[concrete base][floor surface]**. Include neutralizing solutions and full initial charge of limestone.

3.9 INSTALLATION OF MANHOLE - HOLDING TANK

- A. General: Install tanks, complete with appurtenances and accessories indicated. Comply with requirements in Section 333115 "Site Sanitary Sewerage Piping."
- B. Set tops of tank frames and covers flush with finished surface where tanks occur in pavements. Set tops **3 inches (76 mm)** above finished surface elsewhere unless otherwise indicated.

3.10 INSTALLATION OF LEAK-DETECTION SYSTEM

- A. Single-Pipe, Chemical-Waste Sewerage Piping: Install leak-detection system below piping.
- B. Double-Containment Piping: Install leak-detection system in piping annular space.
- C. Tanks: Install leak-detection system around bottom of exterior.
- D. Install panel in location indicated.

3.11 CONCRETE PLACEMENT

- A. Comply with requirements in Section 033000 "Cast-in-Place Concrete" for concrete supports.
- B. Place cast-in-place concrete in accordance with ACI 318/318R.

3.12 PIPING CONNECTIONS

- A. Drawings indicate general arrangement of piping, fittings, and specialties.
- B. Make connections to existing piping, so finished Work complies as nearly as practical with requirements specified for new Work.

- C. Use commercially manufactured wye fittings for sewerage piping branch connections. Remove section of existing pipe; install wye fitting into existing piping; and encase entire wye fitting plus **6-inch (150-mm)** overlap, with not less than **6 inches (150 mm)** of concrete with 28-day compressive strength of **[3000 psi (20.7 MPa)]<Insert value>**.
- D. Protect existing piping to prevent concrete or debris from entering while making connections. Remove debris or other extraneous material that may accumulate.
- E. Where installing piping adjacent to equipment, allow space for service and maintenance.

3.13 LABELING AND IDENTIFICATION

- A. Comply with requirements in Section 220553 "Identification for Plumbing Piping and Equipment" for labeling of equipment and piping.
 - 1. Use[**warning tape or**] detectable warning tape over ferrous piping.
 - 2. Use detectable warning tape over nonferrous piping and over edges of underground structures.

3.14 ADJUSTING

- A. Adjust neutralization-system set points.
- B. Adjust leak-detection-system control and device settings.

3.15 CLEANING

- A. Use procedures prescribed by authorities having jurisdiction or, if not prescribed, use procedures described below:
 - 1. Purge new piping and parts of existing piping that have been altered, extended, or repaired before using.
 - 2. Clean piping by flushing with potable water.

3.16 STARTUP SERVICE

- A. **[Engage a factory-authorized service representative to perform][Perform]** startup service for **[neutralization systems][and][leak-detection systems]**.
 - 1. Complete installation and startup checks according to manufacturer's written instructions.
 - 2. Neutralization Systems:
 - a. Verify that neutralization system is installed and connected according to the Contract Documents.
 - b. Verify that electrical wiring installation complies with manufacturer's submittal.
 - c. Install neutralizing solutions and limestone.
 - d. Energize circuits.
 - e. Start and run systems through complete sequence of operations.
 - f. Adjust operating controls.
 - g. **<Insert startup steps if any>**.

3. Leak-Detection Systems:

- a. Verify that electrical wiring installation complies with manufacturer's submittal.
- b. Energize circuits.
- c. Adjust operating controls.
- d. **<Insert startup steps if any>.**

3.17 FIELD QUALITY CONTROL

- A. Inspect interior of sewerage piping to determine whether line displacement or other damage has occurred. Inspect after approximately **24 inches (610 mm)** of backfill is in place and again at completion of Project.

1. Defects requiring correction include the following:

- a. Alignment: Less than full diameter of inside of pipe is visible between inspection points.
- b. Deflection: Flexible piping with deflection that prevents passage of ball or cylinder of size not less than 92.5 percent of piping diameter.
- c. Crushed, broken, cracked, or otherwise damaged piping.
- d. Hydrostatic Tests for Drainage Piping:
 - 1) Allowable leakage is a maximum of **[50 gal./inch of nominal pipe size per mile (4.6 L/mm of nominal pipe size per kilometer)]<Insert value>** of pipe during 24-hour period.
 - 2) Close openings in system and fill with water.
 - 3) Purge air and refill with water.
 - 4) Disconnect water supply.
 - 5) Test and inspect joints for leaks.
- e. Air Tests for Drainage Piping: Comply with UNI-B-6.

2. Leaks and loss in test pressure constitute defects that must be repaired.
3. Submit separate reports for each test.

- B. Replace leaking sewerage piping using new materials, and repeat testing until leakage is within allowances specified.

- C. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to perform tests and inspections.

- D. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

- E. Perform tests and inspections with the assistance of a factory-authorized service representative.

F. Tests and Inspections:

1. Manufacturer's Field Service: Engage a factory-authorized service representative to inspect assembled **[neutralization systems][and][leak-detection systems]** and their installation, including piping and electrical connections, and to assist in testing.
2. Leak Test: After installation, charge system and test for leaks. Repair leaks and retest until no leaks exist.
3. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and

equipment.

- G. Chemical-waste piping will be considered defective if it does not pass tests and inspections.
- H. Prepare test and inspection reports.

3.18 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain **[neutralization systems][and][leak-detection systems]**.

3.19 PIPING SCHEDULE

- A. Transition and special fittings with pressure ratings at least equal to piping pressure rating may be used in applications below unless otherwise indicated.
- B. Single-Wall, Chemical-Waste Sewerage Piping: Use **[any of]** the following piping materials for each size range:
 - 1. NPS 2 to NPS 4 (DN 50 to DN 100) Stainless Steel: Drainage pipe and fittings and gasketed joints.
 - 2. NPS 1-1/2 to NPS 4 (DN 40 to DN 100) PP: Drainage pipe and fittings and fusion joints.
 - 3. NPS 1-1/2 to NPS 4 (DN 40 to DN 100) CPVC: Drainage pipe and fittings and solvent-cemented joints.
 - 4. NPS 1-1/2 to NPS 4 (DN 40 to DN 100) PVDF: Drainage pipe and fittings and fusion joints.
 - 5. NPS 2 to NPS 4 (DN 50 to DN 100) Fiberglass: **[Centrifugally cast][Filament-wound]** fiberglass pipe and fittings and **[butt-and-wrap][bonded]** joints.
 - 6. NPS 1-1/2 to NPS 4 (DN 40 to DN 100) Glass: Glass pipe and fittings and coupled joints.
 - 7. NPS 6 (DN 150) Stainless Steel: Drainage pipe and fittings and gasketed joints.
 - 8. NPS 6 (DN 150) PP: Drainage pipe and fittings and fusion joints.
 - 9. NPS 6 (DN 150) PVDF: Drainage pipe and fittings and fusion joints.
 - 10. NPS 6 (DN 150) Fiberglass: **[Centrifugally cast][Filament-wound]** fiberglass pipe and fittings and **[butt-and-wrap][bonded]** joints.
 - 11. NPS 6 (DN 150) Glass: Pipe and fittings and coupled joints.
 - 12. NPS 8 to NPS 12 (DN 200 to DN 300) PP: Drainage pipe and fittings and fusion joints.
 - 13. NPS 8 to NPS 12 (DN 200 to DN 300) PVDF: Drainage pipe and fittings and fusion joints.
 - 14. NPS 8 to NPS 12 (DN 200 to DN 300) Fiberglass: **[Centrifugally cast][Filament-wound]** fiberglass pipe and fittings and **[butt-and-wrap][bonded]** joints.
- C. Underground, Double-Containment, Chemical-Waste Sewerage Piping: Use **[any of]** the following piping materials for each size range:
 - 1. NPS 2 to NPS 12 (DN 50 to DN 300) PP: Double-containment drainage pipe and fittings.
 - 2. NPS 2 to NPS 12 (DN 50 to DN 300) CPVC: Double-containment drainage pipe and fittings.
 - 3. NPS 2 to NPS 12 (DN 50 to DN 300) PVDF: Double-containment drainage pipe and fittings.
 - 4. NPS 2 to NPS 12 (DN 50 to DN 300) PVDF/CPVC: Double-containment drainage pipe and fittings.
- D. Aboveground Chemical-Waste Piping: Use **[any of]** the following piping materials for each size range:
 - 1. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) PP: Drainage piping and **[fusion][mechanical]** joints.

2. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) CPVC: Drainage piping and solvent-cemented joints.
 3. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) PVDF: Drainage piping and [fusion][mechanical] joints.
 4. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) Stainless Steel: Use **NPS 2 to NPS 4 (DN 50 to DN 100)** stainless steel drainage piping with socket-and-spigot ends and gasketed joints.
 5. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) Borosilicate Glass: Pipe and fittings, couplings, and coupled joints.
- E. Under Slab-on-Grade, Indoor, Chemical-Waste Piping: Use[**any of**] the following piping materials for each size range:
1. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) PP: Drainage piping and fusion joints.
 2. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) PVDF: Drainage piping and fusion joints.
 3. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) Stainless Steel: Drainage piping with socket-and-spigot ends and gasketed joints.
 4. NPS 1-1/2 to NPS 6 (DN 40 to DN 150) Borosilicate Glass: Piping with covering, couplings, and coupled joints.
 5. NPS 1-1/2 to NPS 6 (DN 40 to DN 150): [PP][PVDF] double-containment drainage piping and manufacturer's standard joints.
 6. NPS 8 (DN 200): [PP][PVDF] double-containment drainage piping and manufacturer's standard joints.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 23 05 00 00 - COMMON WORK RESULTS FOR HVAC

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Motors.
2. Packed expansion joints.
3. Packless expansion joints.
4. Grooved-joint expansion joints.
5. Alignment guides and anchors.
6. Sleeves without waterstop.
7. Sleeves with waterstop.
8. Stack-sleeve fittings.
9. Sleeve-seal systems.
10. Grout.
11. Silicone sealants.
12. Escutcheons.
13. Thermometers, bimetallic actuated.
14. Thermometers, filled system.
15. Thermometers, liquid in glass.
16. Thermometers, light activated.
17. Duct-thermometer mounting brackets.
18. Thermowells.
19. Pressure gauges, dial type.
20. Gauge attachments.
21. Test plugs.
22. Test-plug kits.
23. Sight flow indicators.
24. Flowmeters.
25. Thermal-energy meters.

B. Related Requirements:

1. Section 231123 "Facility Natural-Gas Piping" for gas meters.
2. Section 232216 "Steam and Condensate Piping Specialties" for steam and condensate meters.
3. Section 230923.13 "Energy Meters" for thermal-energy meters connecting with the DDC system.
4. Section 230923.14 "Flow Instruments" for primary flow instruments connecting with the DDC system.

1.2 DEFINITIONS

- ###### A. Existing Piping To Remain:
- Existing piping that is not to be removed and that is not otherwise indicated to be removed, removed and salvaged, or removed and reinstalled.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of product, excluding motors which are included in Part 1 of HVAC equipment Sections.

- a. Include construction details, material descriptions, and dimensions of individual components, and finishes.
- b. Include operating characteristics and furnished accessories.

- B. Delegated Design Submittals: For each anchor and alignment guide, including analysis data, signed and sealed by the qualified professional engineer responsible for their preparation.

1. Design Calculations: Calculate requirements for thermal expansion of piping systems and for selecting and designing expansion joints, loops, and swing connections.
2. Anchor Details: Detail fabrication of each anchor indicated. Show dimensions and methods of assembly and attachment to building structure.
3. Alignment Guide Details: Detail field assembly and attachment to building structure.
4. Schedule: Indicate type, manufacturer's number, size, material, pressure rating, end connections, and location for each expansion joint.

- C. Sustainable Design Submittals:

1. Product Data: For sealants, indicating VOC content.
2. Laboratory Test Reports: For sealants, indicating compliance with requirements for low-emitting materials.

1.4 INFORMATIONAL SUBMITTALS

- A. Product Certificates: For each type of meter.
- B. Welding certificates.
- C. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For each type of **[expansion joint,][meter,][and][gauge]** to include in operation and maintenance manuals.

1.6 QUALITY ASSURANCE

- A. Welding Qualifications: Qualify procedures and personnel in accordance with AWS D1.1/D1.1M.
- B. Pipe and Pressure-Vessel Welding Qualifications: Qualify procedures and operators in accordance with 2021 ASME Boiler and Pressure Vessel Code, Section IX.

1.7 COORDINATION

- A. Coordinate features of motors, installed units, and accessory devices to be compatible with the following:
 1. Motor controllers.

2. Torque, speed, and horsepower requirements of the load.
3. Ratings and characteristics of supply circuit and required control sequence.
4. Ambient and environmental conditions of installation location.

PART 2 - PRODUCTS

2.1 MOTORS

A. Motor Requirements, General:

1. Content includes motors for use on alternating-current power systems of up to 600 V and installed at equipment manufacturer's factory or shipped separately by equipment manufacturer for field installation.
2. Comply with requirements in this Section except when stricter requirements are specified in equipment schedules or Sections.
3. Comply with NEMA MG 1 unless otherwise indicated.
4. Comply with IEEE 841 for severe-duty motors.

B. Motor Characteristics:

1. Duty: Continuous duty at ambient temperature of 40 deg C and at altitude of **3300 ft. (1000 m)** above sea level.
2. Capacity and Torque Characteristics: Sufficient to start, accelerate, and operate connected loads at designated speeds, at installed altitude and environment, with indicated operating sequence, and without exceeding nameplate ratings or considering service factor.

C. Polyphase Motors:

1. Description: NEMA MG 1, Design B, medium induction motor.
2. Efficiency: Premium Efficient, as defined in NEMA MG 1.
3. Service Factor: 1.15.
4. Multispeed Motors: Variable torque.
 - a. For motors with 2:1 speed ratio, consequent pole, single winding.
 - b. For motors with other than 2:1 speed ratio, separate winding for each speed.
5. Multispeed Motors, Two Winding: Separate winding for each speed.
6. Rotor: Random-wound, squirrel cage.
7. Bearings: Regreasable, shielded, antifriction ball bearings suitable for radial and thrust loading.
8. Temperature Rise: Match insulation rating.
9. Insulation: **[Class F]<Insert class>**.
10. Code Letter Designation:
 - a. Motors 15 Hp and Larger: NEMA starting Code F or Code G.
 - b. Motors Smaller Than 15 Hp: Manufacturer's standard starting characteristic.
11. Enclosure Material: Cast iron for motor frame sizes **[324T]<Insert number>** and larger; rolled steel for motor frame sizes smaller than **[324T]<Insert number>**.

D. Additional Requirements for Polyphase Motors:

1. Motors Used with Reduced-Voltage and Multispeed Controllers: Match wiring connection requirements for controller with required motor leads. Provide terminals in motor terminal box, suited to control method.

2. Motors Used with Variable-Frequency Controllers: **[Ratings, characteristics, and features coordinated with and approved by controller manufacturer.]**
 - a. Windings: Copper magnet wire with moisture-resistant insulation varnish, designed and tested to resist transient spikes, high frequencies, and short time-rise pulses produced by pulse-width-modulated inverters.
 - b. Premium-Efficient Motors: Class B temperature rise; Class F insulation.
 - c. Inverter-Duty Motors: Class F temperature rise; Class H insulation.
 - d. Thermal Protection: Comply with NEMA MG 1 requirements for thermally protected motors.
3. Severe-Duty Motors: Comply with IEEE 841, with 1.15 minimum service factor.

E. Single-Phase Motors:

1. Motors larger than 1/20 hp must be one of the following, to suit starting torque and requirements of specific motor application:
 - a. Permanent-split capacitor.
 - b. Split phase.
 - c. Capacitor start, inductor run.
 - d. Capacitor start, capacitor run.
2. Multispeed Motors: Variable-torque, permanent-split-capacitor type.
3. Bearings: Prelubricated, antifriction ball bearings or sleeve bearings suitable for radial and thrust loading.
4. Motors 1/20 hp and Smaller: Shaded-pole type.
5. Thermal Protection: Internal protection to automatically open power supply circuit to motor when winding temperature exceeds a safe value calibrated to temperature rating of motor insulation. Thermal-protection device will automatically reset when motor temperature returns to normal range.

F. Electronically Commutated Motors:

1. Microprocessor-Based Electronic Control Module: Converts **[120 V][or][240 V]** single-phase AC power to three-phase DC power to operate the brushless DC motor.
2. Three-phase power motor module with permanent magnet rotor.
3. **[Circuit board][or][digital speed controller/LED display]**.
4. Building Automation System Interface: Via **[AC voltage signal][DC voltage signal][or][Digital Serial Interface (DSI)]**.

2.2 EXPANSION FITTINGS AND LOOPS FOR HVAC PIPING

A. Performance Requirements:

1. Compatibility: Provide products suitable for piping service fluids, materials, working pressures, and temperatures.
2. Capability: Provide products and installations that will accommodate maximum axial movement as scheduled or indicated on Drawings.

B. Packed Expansion Joints:

1. Flexible, Ball-Joint Packed Expansion Joints: **[FBJ-01]<Insert drawing designation>**.
 - a. Manufacturers: Subject to compliance with requirements, **[provide products by the**

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- 1) [Advanced Thermal Systems, Inc]
- 2) [Hyspan Precision Products, Inc]
- 3) [Mason Industries, Inc.]
- 4) <Insert manufacturer's name>

- b. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- 1) [Advanced Thermal Systems, Inc]
- 2) [Hyspan Precision Products, Inc]
- 3) [Mason Industries, Inc.]
- 4) <Insert manufacturer's name>

- c. Source Limitations: Obtain rubber union connector expansion joints from single manufacturer.
- d. Standards: 2021 ASME Boiler and Pressure Vessel Code: Section II, "Materials"; ASME B31.9 for materials and design of pressure-containing parts and bolting.
- e. Material: Carbon-steel assembly with asbestos-free composition packing.
- f. Design: Provide 360-degree rotation and angular deflection.
- g. Minimum Pressure Rating: [250 psig at 400 deg F (1725 kPa at 204 deg C)]<Insert value>.
- h. Angular Deflection for NPS 6 (DN 150) and Smaller: 30 degrees minimum.
- i. Angular Deflection for NPS 8 (DN 200) and Larger: 15 degrees minimum.
- j. Seal Type: Two carbon-steel and graphite seals suitable for continuous operation at temperature up to 650 deg F (343 deg C).
- k. Internal Ball: Plated with minimum 1-mil chrome cover.
- l. Ball Socket: One- or two-piece design with integral socket/retainer.
- 1) Stuffing Box: Incorporates containment seals and compression seals for containment of injectable packing.
 - 2) Packing Cylinders: Provides packing under full line pressure with check valves to prevent blowback.
- m. End Connections for NPS 2 (DN 50) and Smaller: Threaded.
- n. End Connections for NPS 2-1/2 (DN 65) and Larger: Flanged.

2. Slip-Joint Packed Expansion Joints: [SJ-01]<Insert drawing designation>.

- a. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- 1) [Adscos Manufacturing LLC]
- 2) [Advanced Thermal Systems, Inc]
- 3) [Hyspan Precision Products, Inc]
- 4) [Metraflex Company (The)]
- 5) <Insert manufacturer's name>

- b. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of

the following:

- 1) [Adsko Manufacturing LLC]
 - 2) [Advanced Thermal Systems, Inc]
 - 3) [Hyspan Precision Products, Inc]
 - 4) [Metraflex Company (The)]
 - 5) <Insert manufacturer's name>
- c. Source Limitations: Obtain slip-joint packed expansion joints from single manufacturer.
 - d. Standard: ASTM F1007.
 - e. Material: Carbon steel with asbestos-free PTFE packing.
 - f. Design: With internal guide and injection ports for repacking under full system pressure. Housing is to be furnished with drain ports and lifting ring. Include drip connection if used for steam piping.
 - g. Configuration: [Single joint][single joint with base][and][double joint with base] class(es) unless otherwise indicated.
 - h. Slip Tube for Sizes NPS 1-1/2 (DN 40) through NPS 16 (DN 400): Schedule 80.
 - i. Slip Tube for Sizes NPS 18 (DN 450) through NPS 24 (DN 600): Schedule 60.
 - j. Sliding Surface: 2-mil-thick chrome finish.
 - k. End Connections: Flanged or welded ends to match piping system.

C. Packless Expansion Joints:

1. Metal, Compensator Packless Expansion Joints: [MCEJ-01]<Insert drawing designation>.
 - a. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - 1) [Flex-Hose Co., Inc]
 - 2) [Flex-Weld Inc., div of Kelco Industries]
 - 3) [Flex-Weld; a division of Kelco]
 - 4) [Flexicraft Industries]
 - 5) [Hyspan Precision Products, Inc]
 - 6) [Metraflex Company (The)]
 - 7) <Insert manufacturer's name>
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - 1) [Flex-Hose Co., Inc]
 - 2) [Flex-Weld Inc., div of Kelco Industries]
 - 3) [Flex-Weld; a division of Kelco]
 - 4) [Flexicraft Industries]
 - 5) [Hyspan Precision Products, Inc]
 - 6) [Metraflex Company (The)]
 - 7) <Insert manufacturer's name>
 - c. Source Limitations: Obtain metal compensator packless expansion joints from single manufacturer.
 - d. Minimum Pressure Rating: [150 psig (1035 kPa)][175 psig (1200 kPa)][200 psig (1380 kPa)]<Insert value> unless otherwise indicated.
 - e. Description: Totally enclosed, externally pressurized, multi-ply bellows isolated from fluid

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- flow by an internal pipe sleeve and external housing.
- f. Joint Axial Movement: **2 inches (50 mm)** of compression and **1/2 inch (12 mm)** of extension.
 - g. Configuration for Copper Tubing: Multi-ply, phosphor-bronze bellows with copper pipe ends.
 - 1) End Connections for Copper Tubing NPS 2 (DN 50) and Smaller: **[Solder joint][or][threaded]**.
 - 2) End Connections for Copper Tubing NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Threaded.
 - h. Configuration for Steel Piping: Multi-ply, stainless steel bellows; steel-pipe end connections; and carbon-steel shroud.
 - 1) End Connections for Steel Pipe NPS 2 (DN 50) and Smaller: Threaded.
 - 2) End Connections for Steel Pipe NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **[Flanged][Threaded][Welded]**.
2. Rubber Union Connector Expansion Joints: **[RUEJ-01]<Insert drawing designation>**.
- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1) **[Amber/Booth Company, Inc.; a VMC Group Company]**
 - 2) **[Flex-Hose Co., Inc]**
 - 3) **[Flo Fab Inc]**
 - 4) **[General Rubber Corporation]**
 - 5) **[Kadant Unaflex, LLC]**
 - 6) **[Metriflex Company (The)]**
 - 7) **[Proco Products, Inc]**
 - 8) **[Unisource Manufacturing, Inc.]**
 - 9) **<Insert manufacturer's name>**
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1) **[Amber/Booth Company, Inc.; a VMC Group Company]**
 - 2) **[Flex-Hose Co., Inc]**
 - 3) **[Flo Fab Inc]**
 - 4) **[General Rubber Corporation]**
 - 5) **[Kadant Unaflex, LLC]**
 - 6) **[Metriflex Company (The)]**
 - 7) **[Proco Products, Inc]**
 - 8) **[Unisource Manufacturing, Inc.]**
 - 9) **<Insert manufacturer's name>**
 - c. Source Limitations: Obtain rubber union connector expansion joints from single manufacturer.
 - d. Material: Twin reinforced-rubber spheres **[with external restraining cables]**.
 - e. Minimum Pressure Rating: **[150 psig at 170 deg F (1035 kPa at 77 deg C)]<Insert value>** unless otherwise indicated.
 - f. End Connections for NPS 2 (DN 50) and Smaller: Threaded.
 - g. End Connections for Greater than NPS 2 (DN 50): Flanged.

3. Flexible-Hose Packless Expansion Joints: **[FHEJ-01]<Insert drawing designation>**.
- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- 1) **[ASC Engineered Solutions]**
 - 2) **[Flex-Hose Co., Inc]**
 - 3) **[Flex-Pression]**
 - 4) **[Flex-Weld Inc., div of Kelco Industries]**
 - 5) **[Flex-Weld; a division of Kelco]**
 - 6) **[Flexicraft Industries]**
 - 7) **[Kadant Unaflex, LLC]**
 - 8) **[Metraflex Company (The)]**
 - 9) **[Proco Products, Inc]**
 - 10) **[Unisource Manufacturing, Inc.]**
 - 11) **<Insert manufacturer's name>**
- b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- 1) **[ASC Engineered Solutions]**
 - 2) **[Flex-Hose Co., Inc]**
 - 3) **[Flex-Pression]**
 - 4) **[Flex-Weld Inc., div of Kelco Industries]**
 - 5) **[Flex-Weld; a division of Kelco]**
 - 6) **[Flexicraft Industries]**
 - 7) **[Kadant Unaflex, LLC]**
 - 8) **[Metraflex Company (The)]**
 - 9) **[Proco Products, Inc]**
 - 10) **[Unisource Manufacturing, Inc.]**
 - 11) **<Insert manufacturer's name>**
- c. Source Limitations: Obtain flexible-hose packless expansion joints from single manufacturer.
- d. Description: Manufactured assembly with inlet and outlet elbow fittings and two flexible-metal-hose legs joined by long-radius, 180-degree return bend or center section of flexible hose.
- e. Flexible Hose: Corrugated-metal inner hoses and braided outer sheaths.
- f. Expansion Joints for Copper Tubing NPS 2 (DN 50) and Smaller: Copper-alloy fittings with **[solder-joint]<Insert type>** end connections.
- 1) Bronze hoses and single-braid bronze sheaths with **450 psig at 70 deg F (3100 kPa at 21 deg C)** and **340 psig at 450 deg F (2340 kPa at 232 deg C)** ratings.
 - 2) Bronze hoses and double-braid bronze sheaths with **700 psig at 70 deg F (4830 kPa at 21 deg C)** and **500 psig at 450 deg F (3450 kPa at 232 deg C)** ratings.
- g. Expansion Joints for Copper Tubing NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Copper-alloy fittings with **[threaded]<Insert type>** end connections.
- 1) Stainless steel hoses and single-braid, stainless steel sheaths with

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- 300 psig at 70 deg F (2070 kPa at 21 deg C) and 225 psig at 450 deg F (1550 kPa at 232 deg C) ratings.
- 2) Stainless steel hoses and double-braid, stainless steel sheaths with 420 psig at 70 deg F (2890 kPa at 21 deg C) and 315 psig at 450 deg F (2170 kPa at 232 deg C) ratings.
- h. Expansion Joints for Steel Piping NPS 2 (DN 50) and Smaller: Carbon-steel fittings with threaded end connections.
 - 1) Stainless steel hoses and single-braid, stainless steel sheaths with 450 psig at 70 deg F (3100 kPa at 21 deg C) and 325 psig at 600 deg F (2250 kPa at 315 deg C) ratings.
 - 2) Stainless steel hoses and double-braid, stainless steel sheaths with 700 psig at 70 deg F (4830 kPa at 21 deg C) and 515 psig at 600 deg F (3550 kPa at 315 deg C) ratings.
- i. Expansion Joints for Steel Piping NPS 2-1/2 to NPS 6 (DN 65 to DN 150): Carbon-steel fittings with **[flanged][welded]** end connections.
 - 1) Stainless steel hoses and single-braid, stainless steel sheaths with 200 psig at 70 deg F (1380 kPa at 21 deg C) and 145 psig at 600 deg F (1000 kPa at 315 deg C) ratings.
 - 2) Stainless steel hoses and double-braid, stainless steel sheaths with 275 psig at 70 deg F (1900 kPa at 21 deg C) and 200 psig at 600 deg F (1380 kPa at 315 deg C) ratings.
- j. Expansion Joints for Steel Piping NPS 8 to NPS 12 (DN 200 to DN 300): Carbon steel fittings with **[flanged][welded]** end connections.
 - 1) Stainless steel hoses and single-braid, stainless steel sheaths with 125 psig at 70 deg F (860 kPa at 21 deg C) and 90 psig at 600 deg F (625 kPa at 315 deg C) ratings.
 - 2) Stainless steel hoses and double-braid, stainless steel sheaths with 165 psig at 70 deg F (1130 kPa at 21 deg C) and 120 psig at 600 deg F (830 kPa at 315 deg C) ratings.
- k. Expansion Joints for Steel Piping NPS 14 (DN 350) and Larger: Carbon-steel fittings with **[flanged][welded]** end connections.
 - 1) Stainless steel hoses and double-braid, stainless steel sheaths with 165 psig at 70 deg F (1130 kPa at 21 deg C) and 120 psig at 600 deg F (830 kPa at 315 deg C) ratings.
- 4. Metal-Bellows Packless Expansion Joints: **[MBEJ-01]<Insert drawing designation>**.
 - a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1) **[Adscos Manufacturing LLC]**
 - 2) **[Badger Industries, Inc]**
 - 3) **[Flex-Hose Co., Inc]**
 - 4) **[Flex-Pression]**
 - 5) **[Flex-Weld Inc., div of Kelco Industries]**
 - 6) **[Flex-Weld; a division of Kelco]**

- 7) [Flexicraft Industries]
 - 8) [Flo Fab Inc]
 - 9) [Hyspan Precision Products, Inc]
 - 10) [Kadant Unaflex, LLC]
 - 11) [Metraflex Company (The)]
 - 12) [Proco Products, Inc]
 - 13) [Senior Flexonics Pathway]
 - 14) [Tozen Corporation]

 - 17) [Universal Hose and Braid; a Hyspan Company]
 - 18) <Insert manufacturer's name>
- c. Source Limitations: Obtain metal-bellows packless expansion joints from single manufacturer.
- d. Standards: ASTM F1120 and EJMA's "Standards of the Expansion Joint Manufacturers Association, Inc."
- e. Type: Circular, corrugated bellows[with external tie rods].
- f. Minimum Pressure Rating: [150 psig (1035 kPa)][175 psig (1200 kPa)][200 psig (1379 kPa)]<Insert value> unless otherwise indicated.
- g. Configuration: [Single joint][Single joint with base][and][double joint with base] class(es), unless otherwise indicated.
- h. Expansion Joints for Copper Tubing: [Single-][or][multi-]ply phosphor-bronze bellows, copper pipe ends, and brass shrouds.
- 1) End Connections for Copper Tubing NPS 2 (DN 50) and Smaller: [Solder joint][or][threaded].
 - 2) End Connections for Copper Tubing NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [Solder joint][or][threaded].
 - 3) End Connections for Copper Tubing NPS 5 (DN 125) and Larger: Flanged.
- i. Expansion Joints for Steel Piping: [Single-][or][multi-]ply stainless steel bellows, steel pipe

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

ends, and carbon steel shroud.

- 1) End Connections for Steel Pipe NPS 2 (DN 50) and Smaller: Threaded.
 - 2) End Connections for Steel Pipe NPS 2-1/2 (DN 65) and Larger: **[Flanged][Welded]**.
5. Externally Pressurized Metal-Bellows Packless Expansion Joints: **[EPEJ-01]<Insert drawing designation>**.
- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1) **[Adscos Manufacturing LLC]**
 - 2) **[Flex-Hose Co., Inc]**
 - 3) **[Flex-Pression]**
 - 4) **[Flex-Weld Inc., div of Kelco Industries]**
 - 5) **[Flex-Weld; a division of Kelco]**
 - 6) **[Flexicraft Industries]**
 - 7) **[Hyspan Precision Products, Inc]**
 - 8) **[Metraflex Company (The)]**
 - 9) **[Senior Flexonics Pathway]**
 - 10) **[Tozen Corporation]**
 - 11) **[U.S. Bellows, Inc.]**
 - 12) **[Unisource Manufacturing, Inc.]**
 - 13) **<Insert manufacturer's name>**
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1) **[Adscos Manufacturing LLC]**
 - 2) **[Flex-Hose Co., Inc]**
 - 3) **[Flex-Pression]**
 - 4) **[Flex-Weld Inc., div of Kelco Industries]**
 - 5) **[Flex-Weld; a division of Kelco]**
 - 6) **[Flexicraft Industries]**
 - 7) **[Hyspan Precision Products, Inc]**
 - 8) **[Metraflex Company (The)]**
 - 9) **[Senior Flexonics Pathway]**

 - 11) **[U.S. Bellows, Inc.]**
 - 12) **[Unisource Manufacturing, Inc.]**
 - 13) **<Insert manufacturer's name>**
 - c. Source Limitations: Obtain externally pressurized metal-bellows packless expansion joints from single manufacturer.
 - d. Minimum Pressure Rating: **[150 psig (1035 kPa)][200 psig (1379 kPa)][300 psig (2068 kPa)]<Insert value>** unless otherwise indicated.
 - e. Description:
 - 1) Totally enclosed, externally pressurized, multi-ply, stainless steel bellows isolated from fluid flow by an internal pipe sleeve.
 - 2) Carbon-steel housing.
 - 3) Drain plugs and lifting lug for **NPS 3 (DN 80)** and larger.
 - 4) Bellows: With operating clearance between internal pipe sleeves and external

- shrouds.
- 5) Joints: Supplied with a built-in scale to confirm the starting position and operating movement.
- 6) Joint Axial Movement: [4 inches (100 mm)][6 inches (150 mm)][8 inches (200 mm)]<Insert compression limit> of compression and [3/4 inch (19 mm)][1 inch (25 mm)][2 inches (50 mm)]<Insert extension limit> of extension.
- f. Permanent Locking Bolts: Set locking bolts to maintain joint lengths during installation. Temporary welding tabs that are removed after installation in lieu of locking bolts are unacceptable.
- g. End Connection Configuration: Flanged; one raised, fixed and one floating flange.
6. Rubber Packless Expansion Joints: [REJ-01]<Insert drawing designation>.
 - a. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - 1) [Amber/Booth Company, Inc.; a VMC Group Company]
 - 2) [Flex-Hose Co., Inc]
 - 3) [Flex-Weld Inc., div of Kelco Industries]
 - 4) [Flex-Weld; a division of Kelco]
 - 5) [Flexicraft Industries]
 - 6) [Garlock Sealing Technologies]
 - 7) [General Rubber Corporation]
 - 8) [Kadant Unaflex, LLC]
 - 9) [Metraflex Company (The)]
 - 10) [Proco Products, Inc]
 - 11) [Red Valve Company, Inc]
 - 12) [Tozen Corporation]
 - 13) [U.S. Bellows, Inc.]
 - 14) [Unisource Manufacturing, Inc.]
 - 15) <Insert manufacturer's name>
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - 1) [Amber/Booth Company, Inc.; a VMC Group Company]
 - 2) [Flex-Hose Co., Inc]
 - 3) [Flex-Weld Inc., div of Kelco Industries]
 - 4) [Flex-Weld; a division of Kelco]
 - 5) [Flexicraft Industries]
 - 6) [Garlock Sealing Technologies]
 - 7) [General Rubber Corporation]
 - 8) [Kadant Unaflex, LLC]
 - 9) [Metraflex Company (The)]
 - 10) [Proco Products, Inc]
 - 11) [Red Valve Company, Inc]
 - 12) [Tozen Corporation]
 - 13) [U.S. Bellows, Inc.]
 - 14) [Unisource Manufacturing, Inc.]
 - 15) <Insert manufacturer's name>

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- c. Source Limitations: Obtain rubber packless expansion joints from single manufacturer.
- d. Standards: ASTM F1123 and FSA's "Expansion Joints - Piping Technical Handbook."
- e. Material: Fabric-reinforced rubber complying with FSA-PSJ-703.
- f. Arch Type: **[Single][or][multiple]** arches **[with external control rods]**.
- g. Spherical Type: **[Single][or][multiple]** spheres **[with external control rods]**.
- h. Minimum Pressure Rating for NPS 1-1/2 to NPS 12 (DN 40 to DN 300): **[225 psig (1551 kPa) at 170 deg F (77 deg C)]<Insert pressure and temperature values>**.
- i. Material for Fluids Containing Acids, Alkalis, or Chemicals: **[Butyl rubber][Chlorosulfonyl-polyethylene rubber][EPDM rubber]<Insert material>**.
- j. Material for Fluids Containing Gas, Hydrocarbons, or Oil: **[Buna-N][Chlorosulfonated polyethylene synthetic rubber]<Insert material>**.
- k. Material for Water: **[Butyl rubber][Buna-N][Chlorosulfonated polyethylene synthetic rubber][Chlorosulfonyl-polyethylene rubber][EPDM rubber][Natural rubber]**.
- l. End Connections: Full-faced, integral steel flanges with steel retaining rings.

D. Grooved-Joint Expansion Joints:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ASC Engineered Solutions]**
 - b. **[Shurjoint; a part of Aalberts Integrated Piping Systems]**
 - c. **[Victaulic Company]**
 - d. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ASC Engineered Solutions]**
 - b. **[Shurjoint; a part of Aalberts Integrated Piping Systems]**
 - c. **[Victaulic Company]**
 - d. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain grooved-joint expansion joints from single manufacturer.
- 4. Description: Factory-assembled expansion joint made of several grooved-end pipe nipples, couplings, and grooved joints.
- 5. Standard: AWWA C606, for grooved joints.
- 6. Materials: **[Galvanized,]**ASTM A53/A53M, Schedule 40, Type E or S, steel pipe with grooved ends.
- 7. Couplings: **[Five][Seven][10][12]<Insert number>**, flexible type for steel-pipe dimensions. Include ferrous housing sections **[, Buna-N gasket,][, EPDM rubber gasket,]** and bolts and nuts.

E. Alignment Guides and Anchors:

- 1. Alignment Guides: **[AG-01]<Insert drawing designation>**.
 - a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1) **[Advanced Thermal Systems, Inc]**
 - 2) **[Amber/Booth Company, Inc.; a VMC Group Company]**

- 3) [ASC Engineered Solutions]
 - 4) [Flex-Hose Co., Inc]
 - 5) [Flex-Pression]
 - 6) [Flex-Weld Inc., div of Kelco Industries]
 - 7) [Flex-Weld; a division of Kelco]
 - 8) [Flexicraft Industries]
 - 9) [Hyspan Precision Products, Inc]
 - 10) [Metraflex Company (The)]
 - 11) <Insert manufacturer's name>
- b. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- 1) [Advanced Thermal Systems, Inc]
 - 2) [Amber/Booth Company, Inc.; a VMC Group Company]
 - 3) [ASC Engineered Solutions]
 - 4) [Flex-Hose Co., Inc]
 - 5) [Flex-Pression]
 - 6) [Flex-Weld Inc., div of Kelco Industries]
 - 7) [Flex-Weld; a division of Kelco]
 - 8) [Flexicraft Industries]
 - 9) [Hyspan Precision Products, Inc]
 - 10) [Metraflex Company (The)]
 - 11) <Insert manufacturer's name>
- c. Source Limitations: Obtain alignment guides from single manufacturer.
- d. Description: Steel, factory-fabricated alignment guide, with bolted two-section outer cylinder and base for attaching to structure; with two-section guiding slider for bolting to pipe. Provide dielectric spacer for use with copper tubing/piping.
2. Anchor Materials:
- a. Steel Shapes and Plates: ASTM A36/A36M.
 - b. Bolts and Nuts: ASME B18.10 or ASTM A183, steel hex head.
 - c. Washers: ASTM F844, steel, plain, flat washers.
 - d. Mechanical Fasteners: Insert-wedge-type stud with expansion plug anchor for use in hardened portland cement concrete, with tension and shear capacities appropriate for application.
 - 1) Stud: Threaded, [zinc-coated carbon][stainless] steel.
 - 2) Expansion Plug: [Zinc-coated carbon][Stainless] steel.
 - 3) Washer and Nut: [Zinc-coated carbon][Stainless] steel.
 - e. Chemical Fasteners: Insert-type stud, bonding-system anchor for use with hardened portland cement concrete, with tension and shear capacities appropriate for application.
 - 1) Bonding Material: ASTM C881/C881M, Type IV, Grade 3, two-component epoxy resin suitable for surface temperature of hardened concrete where fastener is to be installed.
 - 2) Stud: ASTM A307, [zinc-coated carbon][stainless] steel with continuous thread on stud, unless otherwise indicated.
 - 3) Washer and Nut: [Zinc-coated carbon][Stainless] steel.

2.3 SLEEVES AND SLEEVE SEALS

A. Sleeves without Waterstop:

1. Cast-Iron Pipe Sleeves: Cast or fabricated of cast or ductile iron, with plain ends.
2. Steel Pipe Sleeves: ASTM A53/A53M, Type E, Grade B, Schedule 40, hot-dip galvanized, with plain ends.
3. Steel Sheet Sleeves: ASTM A653/A653M, **24 gauge (0.6 mm)** minimum thickness; hot-dip galvanized, round tube closed with welded longitudinal joint.
4. PVC Pipe Sleeves: ASTM D1785, Schedule 40.
5. Molded-PVC Sleeves: With nailing flange.
6. Molded-PE or -PP Sleeves: Removable, tapered-cup shaped, and smooth outer surface with nailing flange.

B. Sleeves with Waterstop:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Advance Products & Systems, LLC]**
 - b. **[CALPICO, Inc.]**
 - c. **[GPT; a division of EnPRO Industries]**
 - d. **[Metraflex Company (The)]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Advance Products & Systems, LLC]**
 - b. **[CALPICO, Inc.]**
 - c. **[GPT; a division of EnPRO Industries]**
 - d. **[Metraflex Company (The)]**
 - e. **<Insert manufacturer's name>**
3. Description: Manufactured **[PVC/HDPE][steel][stainless steel][galvanized-steel]**, sleeve-type, waterstop assembly, made for imbedding in concrete slab or wall.

C. Stack-Sleeve Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Jay R. Smith Mfg Co; a division of Morris Group International]**
 - b. **[Wade; a subsidiary of McWane Inc.]**
 - c. **[Zurn Industries, LLC]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [Jay R. Smith Mfg Co; a division of Morris Group International]
 - b. [Wade; a subsidiary of McWane Inc.]
 - c. [Zurn Industries, LLC]
 - d. <Insert manufacturer's name>
3. Description: Manufactured, [Dura-coated or Duco-coated][galvanized] cast-iron sleeve with integral cast flashing flange for use in waterproof floors and roofs. Include clamping ring, bolts, and nuts for membrane flashing.
 - a. Underdeck Clamp: Clamping ring with setscrews.

D. Sleeve-Seal Systems:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Advance Products & Systems, LLC]
 - b. [Airex Manufacturing Inc.]
 - c. [CALPICO, Inc.]
 - d. [GPT; a division of EnPRO Industries]
 - e. [Metraflex Company (The)]
 - f. [Proco Products, Inc]
 - g. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Advance Products & Systems, LLC]
 - b. [Airex Manufacturing Inc.]
 - c. [CALPICO, Inc.]
 - d. [GPT; a division of EnPRO Industries]
 - e. [Metraflex Company (The)]
 - f. [Proco Products, Inc]
 - g. <Insert manufacturer's name>
3. Description: Modular sealing-element unit, designed for field assembly, for filling annular space between piping and sleeve.
 - a. Hydrostatic seal: **20 psig (137 kPa) minimum**.
 - b. Sealing Elements: [EPDM-rubber][High-temperature-silicone][Nitrile (Buna-N)] interlocking links shaped to fit surface of pipe. Include type and number required for pipe material and size.
 - c. Pressure Plates: [Carbon steel][Composite plastic][Stainless steel][Stainless steel, Type 316].
 - d. Connecting Bolts and Nuts: [Carbon steel, with zinc coating. ASTM B633][Stainless steel][Stainless steel, Type 316,] of length required to secure pressure plates to sealing elements.

E. Grout:

1. Description: Nonshrink, for interior and exterior sealing openings in non-fire-rated walls or floors.
2. Standard: ASTM C1107/C1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- cement grout.
- 3. Design Mix: **5000 psi (34.5 MPa)**, 28-day compressive strength.
- 4. Packaging: Premixed and factory packaged.

F. Silicone Sealants:

- 1. Silicone Sealant, S, NS, 25, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant.
 - a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - 1) **[GE Construction Sealants; Momentive Performance Materials Inc.]**
 - 2) **[ITW Polymers Sealants North America]**
 - 3) **[Polymeric Systems, Inc.; PPG Industries, Inc.]**
 - 4) **[Sherwin-Williams Company (The)]**
 - 5) **[Sika Corporation]**
 - 6) **[The Dow Chemical Company]**
 - 7) **[Tremco Incorporated]**
 - 8) **<Insert manufacturer's name>**
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1) **[GE Construction Sealants; Momentive Performance Materials Inc.]**
 - 2) **[ITW Polymers Sealants North America]**
 - 3) **[Polymeric Systems, Inc.; PPG Industries, Inc.]**
 - 4) **[Sherwin-Williams Company (The)]**
 - 5) **[Sika Corporation]**
 - 6) **[The Dow Chemical Company]**
 - 7) **[Tremco Incorporated]**
 - 8) **<Insert manufacturer's name>**
 - c. Standard: ASTM C920, Type S, Grade NS, Class 25, Use NT.
- 2. Silicone Sealant, S, P, T, NT: Single-component, **[25][100/50]**, pourable, **[plus 25 percent and minus 25 percent][plus 100 percent and minus 50 percent]** movement capability, traffic- and nontraffic-use, neutral-curing silicone joint sealant.
 - a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - 1) **[Pecora Corporation]**
 - 2) **[Sika Corporation]**
 - 3) **[The Dow Chemical Company]**
 - 4) **[Tremco Incorporated]**
 - 5) **<Insert manufacturer's name>**
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- 1) **[Pecora Corporation]**
 - 2) **[Sika Corporation]**
 - 3) **[The Dow Chemical Company]**
 - 4) **[Tremco Incorporated]**
 - 5) **<Insert manufacturer's name>**
- c. Standard: ASTM C920, Type S, Grade P, **[Class 25][Class 100/50]**, Uses T and NT.
3. Silicone Foam Sealant: Multicomponent, silicone-based liquid elastomers that, when mixed, expand and cure in place to produce a flexible, nonshrinking foam.
 - a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1) **[Smooth-On]**
 - 2) **<Insert manufacturer's name>**
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1) **[Smooth-On]**
 - 2) **<Insert manufacturer's name>**
4. Sealant shall have a VOC content of **[250]<Insert value>** g/L or less.
 - a. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
 - b. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
 - c. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
 - d. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
 - e. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde shall not exceed 9 mcg/cu. m.

2.4 ESCUTCHEONS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 1. **[BrassCraft Manufacturing Co.; a Masco company]**

2. [Dearborn Brass]
3. [Jones Stephens Corp.]
4. [Keeney Manufacturing Company (The)]
5. [Mid-America Fittings, LLC; A Midland Industries Company]
6. [ProFlo; a Ferguson Enterprises, Inc. brand]
7. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [BrassCraft Manufacturing Co.; a Masco company]
2. [Dearborn Brass]
3. [Jones Stephens Corp.]
4. [Keeney Manufacturing Company (The)]
5. [Mid-America Fittings, LLC; A Midland Industries Company]
6. [ProFlo; a Ferguson Enterprises, Inc. brand]
7. <Insert manufacturer's name>

C. Escutcheon Types:

1. One-Piece, Steel Type: With [polished, chrome-plated][polished brass] finish and setscrew fastener.
2. One-Piece, Stainless Steel Type: With polished stainless steel finish.
3. One-Piece, Cast-Brass Type: With [polished, chrome-plated][polished brass] finish and setscrew fastener.
4. One-Piece, Deep-Pattern Type: Deep-drawn, box-shaped [steel][brass] with polished, chrome-plated finish and spring-clip fasteners.
5. One-Piece, Stamped-Steel Type: With polished, chrome-plated finish and spring-clip fasteners.
6. Split-Plate, Stamped-Steel Type: With polished, chrome-plated finish; [concealed][and][exposed-rivet] hinge; and spring-clip fasteners.

D. Floor Plates:

1. Split Floor Plates: Steel with concealed hinge.

2.5 METERS AND GAUGES FOR HVAC PIPING

A. Thermometers, Bimetallic Actuated:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ashcroft Inc]
 - b. [Blue Ribbon Corp.]
 - c. [Ernst Flow Industries]
 - d. [Marsh Bellofram]
 - e. [Miljoco Corporation]
 - f. [Noshok]
 - g. [Palmer Wahl Instrumentation Group]
 - h. [REOTEMP Instrument Corporation]
 - i. [Tel-Tru Manufacturing Company]
 - j. [Tterice, H. O. Co]
 - k. [WATTS; A Watts Water Technologies Company]

- l. [Weiss Instruments, Inc]
 - m. [Weksler Glass Thermometer Corp.]
 - n. [WIKA Instrument Corporation]
 - o. [Winters Instruments - U.S.]
 - p. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Ashcroft Inc]
 - b. [Blue Ribbon Corp.]
 - c. [Ernst Flow Industries]
 - d. [Marsh Bellofram]
 - e. [Miljoco Corporation]
 - f. [Noshok]
 - g. [Palmer Wahl Instrumentation Group]
 - h. [REOTEMP Instrument Corporation]
 - i. [Tel-Tru Manufacturing Company]
 - j. [Tserice, H. O. Co]
 - k. [WATTS; A Watts Water Technologies Company]
 - l. [Weiss Instruments, Inc]
 - m. [Weksler Glass Thermometer Corp.]
 - n. [WIKA Instrument Corporation]
 - o. [Winters Instruments - U.S.]
 - p. <Insert manufacturer's name>
 3. Source Limitations: Provide bimetallic-actuated thermometers from a single manufacturer.
 4. Standard: ASME B40.200.
 5. Case: [Liquid-filled][and][sealed] type(s); stainless steel with [3-inch (75-mm)][5-inch (125-mm)]<Insert dimension> nominal diameter.
 6. Dial: [Nonreflective aluminum]<Insert material> with permanently etched scale markings and scales in [deg F (deg C)][deg F and deg C].
 7. Connector Type(s): Union joint, [adjustable angle][rigid, back][and][rigid, bottom]<Insert type>, with unified-inch screw threads.
 8. Connector Size: [1/2 inch (12 mm)]<Insert dimension>, with ASME B1.1 screw threads.
 9. Stem: 0.25 or 0.375 inch (6.4 or 9.5 mm) in diameter; stainless steel.
 10. Window: [Plain glass][or][plastic]<Insert material>.
 11. Ring: Stainless steel.
 12. Element: Bimetal coil.
 13. Pointer: Dark-colored metal.
 14. Accuracy: Plus or minus [1][1.5]<Insert number> percent of scale range.
- B. Thermometers, Filled System - Direct-Mounted, Metal-Case, Vapor-Actuated:
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ashcroft Inc]
 - b. [Marsh Bellofram]
 - c. [Miljoco Corporation]
 - d. [Palmer Wahl Instrumentation Group]
 - e. [REOTEMP Instrument Corporation]

- f. [Terice, H. O. Co]
 - g. [Weiss Instruments, Inc]
 - h. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Ashcroft Inc]
 - b. [Marsh Bellofram]
 - c. [Miljoco Corporation]
 - d. [Palmer Wahl Instrumentation Group]
 - e. [REOTEMP Instrument Corporation]
 - f. [Terice, H. O. Co]
 - g. [Weiss Instruments, Inc]
 - h. <Insert manufacturer's name>
- 3. Source Limitations: Provide filled-system, direct-mounted, metal-case, vapor-actuated thermometers from a single manufacturer.
- 4. Standard: ASME B40.200.
- 5. Case: Sealed type, [cast aluminum or drawn steel]<Insert material>; [4-1/2-inch (115-mm)][5-inch (125-mm)][6-inch (150-mm)]<Insert dimension> nominal diameter.
- 6. Element: Bourdon tube or other type of pressure element.
- 7. Movement: Mechanical,[dampening type,] with link to pressure element and connection to pointer.
- 8. Dial: Nonreflective aluminum with permanently etched scale markings graduated in [deg F (deg C)][deg F and deg C].
- 9. Pointer: Dark-colored metal.
- 10. Window: [Glass][or][plastic]<Insert material>.
- 11. Ring: [Metal][Stainless steel]<Insert material>.
- 12. Connector Type(s): Union joint, [adjustable, 180 degrees in vertical plane, 360 degrees in horizontal plane, with locking device][rigid, back][and][rigid, bottom]; with ASME B1.1 screw threads.
- 13. Thermal System: Liquid-filled bulb in copper-plated steel, aluminum, or brass stem and of length to suit installation.
 - a. Design for Air-Duct Installation: With ventilated shroud.
 - b. Design for Thermowell Installation: Bare stem.
- 14. Accuracy: Plus or minus [1]<Insert number> percent of scale range.
- C. Thermometers, Filled System - Direct-Mounted, Plastic-Case, Vapor-Actuated:
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ashcroft Inc]
 - b. [Miljoco Corporation]
 - c. [REOTEMP Instrument Corporation]
 - d. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Ashcroft Inc]
 - b. [Miljoco Corporation]
 - c. [REOTEMP Instrument Corporation]
 - d. <Insert manufacturer's name>
3. Source Limitations: Provide filled-system, direct-mounted, plastic-case, vapor-actuated thermometers from single manufacturer.
 4. Standard: ASME B40.200.
 5. Case: Sealed type, [plastic]<Insert material>; [4-1/2-inch (115-mm)][5-inch (125-mm)][6-inch (150-mm)]<Insert dimension> nominal diameter.
 6. Element: Bourdon tube or other type of pressure element.
 7. Movement: Mechanical, with link to pressure element and connection to pointer.
 8. Dial: Nonreflective aluminum with permanently etched scale markings graduated in [deg F (deg C)][deg F and deg C].
 9. Pointer: Dark-colored metal.
 10. Window: [Glass][or][plastic]<Insert material>.
 11. Ring: [Metal][or][plastic]<Insert material>.
 12. Connector Type(s): Union joint, [adjustable, 180 degrees in vertical plane, 360 degrees in horizontal plane, with locking device][rigid, back][and][rigid, bottom]; with ASME B1.1 screw threads.
 13. Thermal System: Liquid-filled bulb in copper-plated steel, aluminum, or brass stem and of length to suit installation.
 - a. Design for Air-Duct Installation: With ventilated shroud.
 - b. Design for Thermowell Installation: Bare stem.

14. Accuracy: Plus or minus [1]<Insert number> percent of scale range.

D. Thermometers, Filled-System - Remote-Mounted, Metal-Case, Vapor-Actuated:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ametek U.S. Gauge]
 - b. [Ashcroft Inc]
 - c. [Blue Ribbon Corp.]
 - d. [Marsh Bellofram]
 - e. [Miljoco Corporation]
 - f. [Palmer Wahl Instrumentation Group]
 - g. [REOTEMP Instrument Corporation]
 - h. [Terice, H. O. Co]
 - i. [Weiss Instruments, Inc]
 - j. [WIKA Instrument Corporation]
 - k. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Ametek U.S. Gauge]
 - b. [Ashcroft Inc]
 - c. [Blue Ribbon Corp.]
 - d. [Marsh Bellofram]

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- e. [Miljoco Corporation]
 - f. [Palmer Wahl Instrumentation Group]
 - g. [REOTEMP Instrument Corporation]
 - h. [Terice, H. O. Co]
 - i. [Weiss Instruments, Inc]
 - j. [WIKA Instrument Corporation]
 - k. <Insert manufacturer's name>
- 3. Source Limitations: Provide filled-system, remote-mounted, metal-case, vapor-actuated thermometers from a single manufacturer.
 - 4. Standard: ASME B40.200.
 - 5. Case: Sealed type, [cast aluminum or drawn steel]<Insert material>; [4-1/2-inch (115-mm)][6-inch (150-mm)]<Insert dimension> nominal diameter with [back][front] flange and holes for panel mounting.
 - 6. Element: Bourdon tube or other type of pressure element.
 - 7. Movement: Mechanical, with link to pressure element and connection to pointer.
 - 8. Dial: Nonreflective aluminum with permanently etched scale markings graduated in [deg F (deg C)][deg F and deg C].
 - 9. Pointer: Dark-colored metal.
 - 10. Window: [Glass][or][plastic]<Insert material>.
 - 11. Ring: [Metal][Stainless steel]<Insert material>.
 - 12. Connector Type(s): Union joint, [back][bottom]; with ASME B1.1 screw threads.
 - 13. Thermal System: Liquid-filled bulb in copper-plated steel, aluminum, or brass stem and of length to suit installation.
 - a. Design for Air-Duct Installation: With ventilated shroud.
 - b. Design for Thermowell Installation: Bare stem.
 - 14. Accuracy: Plus or minus [1]<Insert number> percent of scale range.
- E. Thermometers, Filled System - Remote-Mounted, Plastic-Case, Vapor-Actuated:
- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ametek U.S. Gauge]
 - b. [Ashcroft Inc]
 - c. [Miljoco Corporation]
 - d. [REOTEMP Instrument Corporation]
 - e. [Terice, H. O. Co]
 - f. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Ametek U.S. Gauge]
 - b. [Ashcroft Inc]
 - c. [Miljoco Corporation]
 - d. [REOTEMP Instrument Corporation]
 - e. [Terice, H. O. Co]
 - f. <Insert manufacturer's name>
 - 3. Source Limitations: Provide filled-system, remote-mounted, plastic-case, vapor-actuated

- thermometers from a single manufacturer.
4. Standard: ASME B40.200.
5. Case: Sealed type, **[plastic]<Insert material>**; **[4-1/2-inch (115-mm)][6-inch (150-mm)]<Insert dimension>** nominal diameter with **[back][front]** flange and holes for panel mounting.
6. Element: Bourdon tube or other type of pressure element.
7. Movement: Mechanical, with link to pressure element and connection to pointer.
8. Dial: Nonreflective aluminum with permanently etched scale markings graduated in **[deg F (deg C)][deg F and deg C]**.
9. Pointer: Dark-colored metal.
10. Window: **[Glass][or][plastic]<Insert material>**.
11. Ring: **[Metal][or][plastic]<Insert material>**.
12. Connector Type(s): Union joint, threaded, **[back][bottom]**; with ASME B1.1 screw threads.
13. Thermal System: Liquid-filled bulb in copper-plated steel, aluminum, or brass stem and of length to suit installation.

- a. Design for Air-Duct Installation: With ventilated shroud.
- b. Design for Thermowell Installation: Bare stem.

14. Accuracy: Plus or minus 1 percent of scale range or one scale division, to a maximum of 1.5 percent of scale range.

F. Thermometers, Liquid-in-Glass - Metal Case, Compact Style:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Miljoco Corporation]**
 - b. **[Terice, H. O. Co]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Miljoco Corporation]**
 - b. **[Terice, H. O. Co]**
 - c. **<Insert manufacturer's name>**
3. Source Limitations: Provide liquid-in-glass, metal-case, compact-style thermometers by single manufacturer.
4. Standard: ASME B40.200.
5. Case: **[Cast aluminum]<Insert material>**; **6-inch (150-mm)** nominal size.
6. Case Form: **[Back angle][Straight]** unless otherwise indicated.
7. Tube: Glass with magnifying lens and blue **[or red]** organic liquid.
8. Tube Background: Nonreflective aluminum with permanently etched scale markings graduated in **[deg F (deg C)][deg F and deg C]**.
9. Window: Glass or plastic.
10. Stem: Aluminum or brass and of length to suit installation.
 - a. Design for Air-Duct Installation: With ventilated shroud.
 - b. Design for Thermowell Installation: Bare stem.
11. Connector: **3/4 inch (19 mm)**, with ASME B1.1 screw threads.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

12. Accuracy: Plus or minus 1 percent of scale range or one scale division, to a maximum of 1.5 percent of scale range.

G. Thermometers, Liquid in Glass - Plastic Case, Compact Style:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Blue Ribbon Corp.]**
 - b. **[Flo Fab Inc]**
 - c. **[Miljoco Corporation]**
 - d. **[WATTS; A Watts Water Technologies Company]**
 - e. **[Weiss Instruments, Inc]**
 - f. **[Weksler Glass Thermometer Corp.]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Blue Ribbon Corp.]**
 - b. **[Flo Fab Inc]**
 - c. **[Miljoco Corporation]**
 - d. **[WATTS; A Watts Water Technologies Company]**
 - e. **[Weiss Instruments, Inc]**
 - f. **[Weksler Glass Thermometer Corp.]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Provide liquid-in-glass, plastic-case, compact-style thermometers from single manufacturer.
4. Standard: ASME B40.200.
5. Case: **[Plastic]<Insert material>; 6-inch (150-mm)** nominal size.
6. Case Form: **[Back angle][Straight]** unless otherwise indicated.
7. Tube: Glass with magnifying lens and blue**[or red]** organic liquid.
8. Tube Background: Nonreflective with permanently etched scale markings graduated in **[deg F (deg C)][deg F and deg C]**.
9. Window: Glass or plastic.
10. Stem: Aluminum or brass and of length to suit installation.
 - a. Design for Air-Duct Installation: With ventilated shroud.
 - b. Design for Thermowell Installation: Bare stem.
11. Connector: **3/4 inch (19 mm)**, with ASME B1.1 screw threads.
12. Accuracy: Plus or minus 1 percent of scale range or one scale division, to a maximum of 1.5 percent of scale range.

H. Thermometers, Liquid in Glass - Metal Case, Industrial Style:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Blue Ribbon Corp.]**

- b. [Flo Fab Inc]
- c. [Miljoco Corporation]
- d. [Palmer Wahl Instrumentation Group]
- e. [Terice, H. O. Co]
- f. [Weiss Instruments, Inc]
- g. [Weksler Glass Thermometer Corp.]
- h. [Winters Instruments - U.S.]
- i. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Blue Ribbon Corp.]
- b. [Flo Fab Inc]
- c. [Miljoco Corporation]
- d. [Palmer Wahl Instrumentation Group]
- e. [Terice, H. O. Co]
- f. [Weiss Instruments, Inc]
- g. [Weksler Glass Thermometer Corp.]
- h. [Winters Instruments - U.S.]
- i. <Insert manufacturer's name>

3. Source Limitations: Provide liquid-in-glass, metal-case, industrial-style thermometers from single manufacturer.
4. Standard: ASME B40.200.
5. Case: [Cast aluminum]<Insert material>; [7-inch (180-mm)][9-inch (230-mm)] nominal size unless otherwise indicated.
6. Case Form: [Adjustable angle][Back angle][Straight]<Insert form> unless otherwise indicated.
7. Tube: Glass with magnifying lens and blue[or red] organic liquid.
8. Tube Background: Nonreflective aluminum with permanently etched scale markings graduated in [deg F (deg C)][deg F and deg C].
9. Window: [Glass][or][plastic]<Insert material>.
10. Stem: [Aluminum]<Insert material> and of length to suit installation.

- a. Design for Air-Duct Installation: With ventilated shroud.
- b. Design for Thermowell Installation: Bare stem.

11. Connector: 1-1/4 inches (32 mm), with ASME B1.1 screw threads.
12. Accuracy: Plus or minus 1 percent of scale range or one scale division, to a maximum of 1.5 percent of scale range.

I. Thermometers, Liquid in Glass - Plastic Case, Industrial Style:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Ernst Flow Industries]
- b. [Marsh Bellofram]
- c. [Miljoco Corporation]
- d. [Palmer Wahl Instrumentation Group]
- e. [WATTS; A Watts Water Technologies Company]
- f. [Weiss Instruments, Inc]

- g. **[Weksler Glass Thermometer Corp.]**
 - h. **[Winters Instruments - U.S.]**
 - i. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Ernst Flow Industries]**
 - b. **[Marsh Bellofram]**
 - c. **[Miljoco Corporation]**
 - d. **[Palmer Wahl Instrumentation Group]**
 - e. **[WATTS; A Watts Water Technologies Company]**
 - f. **[Weiss Instruments, Inc]**
 - g. **[Weksler Glass Thermometer Corp.]**
 - h. **[Winters Instruments - U.S.]**
 - i. **<Insert manufacturer's name>**
 - 3. Source Limitations: Provide liquid-in-glass, plastic-case, industrial-style thermometers from single manufacturer.
 - 4. Standard: ASME B40.200.
 - 5. Case: **[Plastic]<Insert material>**; **[7-inch (180-mm)][9-inch (230-mm)]** nominal size unless otherwise indicated.
 - 6. Case Form: **[Adjustable angle][Back angle][Straight]<Insert form>** unless otherwise indicated.
 - 7. Tube: Glass with magnifying lens and blue **[or red]** organic liquid.
 - 8. Tube Background: Nonreflective aluminum with permanently etched scale markings graduated in **[deg F (deg C)][deg F and deg C]**.
 - 9. Window: **[Glass][or][plastic]<Insert material>**.
 - 10. Stem: **[Aluminum][Brass][Stainless steel][Aluminum, brass, or stainless steel]<Insert material>** and of length to suit installation.
 - a. Design for Air-Duct Installation: With ventilated shroud.
 - b. Design for Thermowell Installation: Bare stem.
 - 11. Connector: **1-1/4 inches (32 mm)**, with ASME B1.1 screw threads.
 - 12. Accuracy: Plus or minus 1 percent of scale range or one scale division, to a maximum of 1.5 percent of scale range.
- J. Thermometers, Light Activated - Direct Mounted:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Miljoco Corporation]**
 - b. **[Tetrice, H. O. Co]**
 - c. **[Weiss Instruments, Inc]**
 - d. **[Weksler Glass Thermometer Corp.]**
 - e. **[Winters Instruments - U.S.]**
 - f. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [Miljoco Corporation]
 - b. [Trerice, H. O. Co]
 - c. [Weiss Instruments, Inc]
 - d. [Weksler Glass Thermometer Corp.]
 - e. [Winters Instruments - U.S.]
 - f. <Insert manufacturer's name>
3. Source Limitations: Provide light-activated, direct-mounted thermometers from single manufacturer.
 4. Case: [Plastic][Metal]<Insert material>; [7-inch (180-mm)][9-inch (230-mm)] nominal size unless otherwise indicated.
 5. Scale(s): [Deg F (deg C)][Deg F and deg C].
 6. Case Form: [Adjustable angle]<Insert form>.
 7. Connector: [1-1/4 inches (32 mm)]<Insert dimension>, with ASME B1.1 screw threads.
 8. Stem: [Aluminum]<Insert material> and of length to suit installation.

- a. Design for Air-Duct Installation: With ventilated shroud.
- b. Design for Thermowell Installation: Bare stem.

9. Display: Digital.
10. Accuracy: Plus or minus **2 deg F (1 deg C)**.

K. Thermometers, Light Activated - Remote Mounted:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Miljoco Corporation]
 - b. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Miljoco Corporation]
 - b. <Insert manufacturer's name>
3. Source Limitations: Provide light-activated, remote-mounted thermometers from single manufacturer.
4. Case: Plastic, for wall mounting.
5. Scale(s): [Deg F (deg C)][Deg F and deg C].
6. Sensor: Bulb and thermister wire.
 - a. Design for Air-Duct Installation: With ventilated shroud.
 - b. Design for Thermowell Installation: Bare stem.
7. Display: Digital.
8. Accuracy: Plus or minus **2 deg F (1 deg C)**.

L. Duct-Thermometer Mounting Brackets:

1. Description: Flanged bracket with screw holes, for attachment to air duct and made to hold thermometer stem.

M. Thermowells:

1. Standard: ASME B40.200.
2. Description: Pressure-tight, socket-type fitting made for insertion in piping tee fitting.
3. Material for Use with Copper Tubing: **[CNR][or][CUNI]<Insert material>**.
4. Material for Use with Steel Piping: **[CRES][CSA]<Insert material>**.
5. Type: Stepped shank unless straight or tapered shank is indicated.
6. External Threads: **NPS 1/2, NPS 3/4, or NPS 1, (DN 15, DN 20, or NPS 25,) ASME B1.20.1** pipe threads.
7. Internal Threads: **1/2, 3/4, and 1 inch (13, 19, and 25 mm)**, with ASME B1.1 screw threads.
8. Bore: Diameter required to match thermometer bulb or stem.
9. Insertion Length: Length required to match thermometer bulb or stem.
10. Lagging Extension: Include on thermowells for insulated piping and tubing.
11. Bushings: For converting size of thermowell's internal screw thread to size of thermometer connection.
12. Heat-Transfer Medium: **[Mixture of graphite and glycerin]<Insert material>**.

N. Pressure Gauges, Dial Type - Direct Mounted, Metal Case:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Ametek U.S. Gauge]**
 - b. **[Ashcroft Inc]**
 - c. **[Blue Ribbon Corp.]**
 - d. **[Ernst Flow Industries]**
 - e. **[Flo Fab Inc]**
 - f. **[Marsh Bellofram]**
 - g. **[Miljoco Corporation]**
 - h. **[Noshok]**
 - i. **[Palmer Wahl Instrumentation Group]**
 - j. **[REOTEMP Instrument Corporation]**
 - k. **[Tel-Tru Manufacturing Company]**
 - l. **[Tetric, H. O. Co]**
 - m. **[WATTS; A Watts Water Technologies Company]**
 - n. **[Weiss Instruments, Inc]**
 - o. **[Weksler Glass Thermometer Corp.]**
 - p. **[WIKI Instrument Corporation]**
 - q. **[Winters Instruments - U.S.]**
 - r. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Ametek U.S. Gauge]**
 - b. **[Ashcroft Inc]**
 - c. **[Blue Ribbon Corp.]**
 - d. **[Ernst Flow Industries]**
 - e. **[Flo Fab Inc]**
 - f. **[Marsh Bellofram]**
 - g. **[Miljoco Corporation]**
 - h. **[Noshok]**
 - i. **[Palmer Wahl Instrumentation Group]**

- j. [REOTEMP Instrument Corporation]
 - k. [Tel-Tru Manufacturing Company]
 - l. [Terice, H. O. Co]
 - m. [WATTS; A Watts Water Technologies Company]
 - n. [Weiss Instruments, Inc]
 - o. [Weksler Glass Thermometer Corp.]
 - p. [WIKA Instrument Corporation]
 - q. [Winters Instruments - U.S.]
 - r. <Insert manufacturer's name>
3. Source Limitations: Provide dial-type, direct-mounted, metal-case pressure gauges from single manufacturer.
 4. Standard: ASME B40.100.
 5. Case: [Liquid-filled][Sealed][Open-front, pressure-relief][Solid-front, pressure-relief]<Insert type> type(s); [cast aluminum or drawn steel]<Insert material>; [4-1/2-inch (115-mm)][6-inch (150-mm)]<Insert dimension> nominal diameter.
 6. Pressure-Element Assembly: Bourdon tube.
 7. Pressure Connection: Brass, with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads and bottom-outlet type unless back-outlet type is indicated.
 8. Movement: Mechanical, with link to pressure element and connection to pointer.
 9. Dial: Nonreflective aluminum with permanent scale markings graduated in [psi][START_SI] (kPa)][[END_SI]psi and kPa].
 10. Pointer: Dark-colored metal.
 11. Window: [Glass][Safety glass][or][acrylic plastic]<Insert material>.
 12. Ring: [Metal][Brass][Stainless steel]<Insert material>.
 13. Accuracy: [Grade A, plus or minus 1 percent of middle half of][Grade B, plus or minus 2 percent of middle half of][Grade C, plus or minus 3 percent of middle half of][Grade D, plus or minus 5 percent of whole] span.

O. Pressure Gauges, Dial Type - Direct Mounted, Plastic Case:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ametek U.S. Gauge]
 - b. [Ashcroft Inc]
 - c. [Flo Fab Inc]
 - d. [Marsh Bellofram]
 - e. [Miljoco Corporation]
 - f. [Noshok]
 - g. [Palmer Wahl Instrumentation Group]
 - h. [REOTEMP Instrument Corporation]
 - i. [Tel-Tru Manufacturing Company]
 - j. [Terice, H. O. Co]
 - k. [Weiss Instruments, Inc]
 - l. [Weksler Glass Thermometer Corp.]
 - m. [WIKA Instrument Corporation]
 - n. [Winters Instruments - U.S.]
 - o. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the

following:

- a. [Ametek U.S. Gauge]
 - b. [Ashcroft Inc]
 - c. [Flo Fab Inc]
 - d. [Marsh Bellofram]
 - e. [Miljoco Corporation]
 - f. [Noshok]
 - g. [Palmer Wahl Instrumentation Group]
 - h. [REOTEMP Instrument Corporation]
 - i. [Tel-Tru Manufacturing Company]
 - j. [Terice, H. O. Co]
 - k. [Weiss Instruments, Inc]
 - l. [Weksler Glass Thermometer Corp.]
 - m. [WIKA Instrument Corporation]
 - n. [Winters Instruments - U.S.]
 - o. <Insert manufacturer's name>
3. Source Limitations: Provide dial-type, direct-mounted, plastic-case pressure gauges from a single manufacturer.
 4. Standard: ASME B40.100.
 5. Case: [Sealed]<Insert type> type; [plastic]<Insert material>; [4-1/2-inch (115-mm)][6-inch (150-mm)]<Insert dimension> nominal diameter.
 6. Pressure-Element Assembly: Bourdon tube.
 7. Pressure Connection: Brass, with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads and bottom-outlet type unless back-outlet type is indicated.
 8. Movement: Mechanical, with link to pressure element and connection to pointer.
 9. Dial: Nonreflective aluminum with permanent scale markings graduated in [psi (kPa)][psi and kPa].
 10. Pointer: Dark-colored metal.
 11. Window: [Glass][Safety glass][or][acrylic plastic]<Insert material>.
 12. Accuracy: [Grade A, plus or minus 1 percent of middle half of][Grade B, plus or minus 2 percent of middle half of][Grade C, plus or minus 3 percent of middle half of][Grade D, plus or minus 5 percent of whole] span.

P. Pressure Gauges, Dial Type - Remote Mounted, Metal Case:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ametek U.S. Gauge]
 - b. [Ashcroft Inc]
 - c. [Ernst Flow Industries]
 - d. [Flo Fab Inc]
 - e. [Marsh Bellofram]
 - f. [Miljoco Corporation]
 - g. [Noshok]
 - h. [Palmer Wahl Instrumentation Group]
 - i. [REOTEMP Instrument Corporation]
 - j. [Tel-Tru Manufacturing Company]
 - k. [Terice, H. O. Co]
 - l. [WATTS; A Watts Water Technologies Company]
 - m. [Weiss Instruments, Inc]

- n. [WIKA Instrument Corporation]
- o. [Winters Instruments - U.S.]
- p. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Ametek U.S. Gauge]
- b. [Ashcroft Inc]
- c. [Ernst Flow Industries]
- d. [Flo Fab Inc]
- e. [Marsh Bellofram]
- f. [Miljoco Corporation]
- g. [Noshok]
- h. [Palmer Wahl Instrumentation Group]
- i. [REOTEMP Instrument Corporation]
- j. [Tel-Tru Manufacturing Company]
- k. [Terice, H. O. Co]
- l. [WATTS; A Watts Water Technologies Company]
- m. [Weiss Instruments, Inc]
- n. [WIKA Instrument Corporation]
- o. [Winters Instruments - U.S.]
- p. <Insert manufacturer's name>

3. Source Limitations: Provide dial-type, remote-mounted, metal-case pressure gauges from a single manufacturer.
4. Standard: ASME B40.100.
5. Case: [Liquid-filled][Sealed]<Insert type> type; [cast aluminum or drawn steel][metal]<Insert material>; [3-1/2-inch (90-mm)][4-1/2-inch (115-mm)][6-inch (150-mm)]<Insert dimension> nominal diameter with [back][front] flange and holes for panel mounting.
6. Pressure-Element Assembly: Bourdon tube.
7. Pressure Connection: Brass, with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads and bottom-outlet type unless back-outlet type is indicated.
8. Movement: Mechanical, with link to pressure element and connection to pointer.
9. Dial: Nonreflective aluminum with permanent scale markings graduated in [psi (kPa)][psi and kPa].
10. Pointer: Dark-colored metal.
11. Window: [Glass][Safety glass][or][acrylic plastic]<Insert material>.
12. Ring: [Metal][Stainless steel]<Insert material>.
13. Accuracy: [Grade A, plus or minus 1 percent of middle half of][Grade B, plus or minus 2 percent of middle half of][Grade C, plus or minus 3 percent of middle half of][Grade D, plus or minus 5 percent of whole] span.

- Q. Pressure Gauges, Dial Type - Remote Mounted, Plastic Case:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ashcroft Inc]
 - b. [Flo Fab Inc]
 - c. [Miljoco Corporation]

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- d. [Noshok]
 - e. [Palmer Wahl Instrumentation Group]
 - f. [REOTEMP Instrument Corporation]
 - g. [Tel-Tru Manufacturing Company]
 - h. [Tterice, H. O. Co]
 - i. [Weiss Instruments, Inc]
 - j. [WIKA Instrument Corporation]
 - k. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Ashcroft Inc]
 - b. [Flo Fab Inc]
 - c. [Miljoco Corporation]
 - d. [Noshok]
 - e. [Palmer Wahl Instrumentation Group]
 - f. [REOTEMP Instrument Corporation]
 - g. [Tel-Tru Manufacturing Company]
 - h. [Tterice, H. O. Co]
 - i. [Weiss Instruments, Inc]
 - j. [WIKA Instrument Corporation]
 - k. <Insert manufacturer's name>
3. Source Limitations: Provide dial-type, remote-mounted, plastic-case pressure gauges from single manufacturer.
4. Standard: ASME B40.100.
5. Case: [Sealed]<Insert type> type; [plastic]<Insert material>; [3-1/2-inch (90-mm)][4-1/2-inch (115-mm)][6-inch (150-mm)]<Insert dimension> nominal diameter with [back][front] flange and holes for panel mounting.
6. Pressure-Element Assembly: Bourdon tube.
7. Pressure Connection: Brass, with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads and bottom-outlet type unless back-outlet type is indicated.
8. Movement: Mechanical, with link to pressure element and connection to pointer.
9. Dial: Nonreflective aluminum with permanent scale markings graduated in [psi (kPa)][psi and kPa].
10. Pointer: Dark-colored metal.
11. Window: [Glass][Safety glass][or][acrylic plastic]<Insert material>.
12. Accuracy: [Grade A, plus or minus 1 percent of middle half of][Grade B, plus or minus 2 percent of middle half of][Grade C, plus or minus 3 percent of middle half of][Grade D, plus or minus 5 percent of whole] span.
- R. Gauge Attachments:
1. Snubbers: ASME B40.100, brass; with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads and [piston][porous-metal]-type surge-dampening device. Include extension for use on insulated piping.
 2. Siphons: Loop-shaped section of [brass][stainless steel][steel] pipe with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)] pipe threads.
 3. Valves: [Brass ball][Brass or stainless steel needle], with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads.
- S. Test Plugs:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[IMI Flow Design, Inc.]**
 - b. **[Miljoco Corporation]**
 - c. **[Nexus Valve, Inc.; Aalberts Hydronic Flow Control]**
 - d. **[Peterson Equipment Co., Inc]**
 - e. **[Terice, H. O. Co]**
 - f. **[WATTS; A Watts Water Technologies Company]**
 - g. **[Weiss Instruments, Inc]**
 - h. **[Weksler Glass Thermometer Corp.]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[IMI Flow Design, Inc.]**
 - b. **[Miljoco Corporation]**
 - c. **[Nexus Valve, Inc.; Aalberts Hydronic Flow Control]**
 - d. **[Peterson Equipment Co., Inc]**
 - e. **[Terice, H. O. Co]**
 - f. **[WATTS; A Watts Water Technologies Company]**
 - g. **[Weiss Instruments, Inc]**
 - h. **[Weksler Glass Thermometer Corp.]**
 - i. **<Insert manufacturer's name>**
3. Source Limitations: Provide test plugs from single manufacturer.
4. Description: Test-station fitting made for insertion in piping tee fitting.
5. Body: Brass or stainless steel with core inserts and gasketed and threaded cap. Include extended stem on units to be installed in insulated piping.
6. Thread Size: **[NPS 1/4 (DN 8)][or][NPS 1/2 (DN 15)]**, ASME B1.20.1 pipe thread.
7. Minimum Pressure and Temperature Rating: **[500 psig at 200 deg F (3450 kPa at 93 deg C)]<Insert ratings>**.
8. Core Inserts: **[Chlorosulfonated polyethylene synthetic][EPDM]** self-sealing rubber.

T. Test-Plug Kits:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Blue Ribbon Corp.]**
 - b. **[Peterson Equipment Co., Inc]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Blue Ribbon Corp.]**
 - b. **[Peterson Equipment Co., Inc]**

- c. **<Insert manufacturer's name>**
3. Source Limitations: Provide test-plug kits from single manufacturer.
 4. Furnish **[one]<Insert number>** test-plug kit(s) containing **[one][two]** thermometer(s), one pressure gauge and adapter, and carrying case. Thermometer sensing elements, pressure gauge, and adapter probes are to be of diameter to fit test plugs and of length to project into piping.
 5. Low-Range Thermometer: Small, bimetallic insertion type with **[1- to 2-inch- (25- to 50-mm-)]<Insert dimension>** diameter dial and tapered-end sensing element. Dial range is to be at least **[25 to 125 deg F (minus 4 to plus 52 deg C)]<Insert temperature range>**.
 6. High-Range Thermometer: Small, bimetallic insertion type with **[1- to 2-inch- (25- to 50-mm-)]<Insert dimension>** diameter dial and tapered-end sensing element. Dial range is to be at least **[0 to 220 deg F (minus 18 to plus 104 deg C)]<Insert temperature range>**.
 7. Pressure Gauge: Small, Bourdon-tube insertion type with **[2- to 3-inch- (50- to 75-mm-)]<Insert dimension>** diameter dial and probe. Dial range shall be at least **[0 to 200 psig (0 to 1380 kPa)]<Insert range>**.
 8. Carrying Case: Metal or plastic, with formed instrument padding.
- U. Sight Flow Indicators:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ARCHON Industries, Inc]**
 - b. **[Dwyer Instruments, Inc]**
 - c. **[Ernst Flow Industries]**
 - d. **[John C. Ernst Co., Inc.]**
 - e. **[KOBOLD Instruments, Inc. - USA]**
 - f. **[OPW Engineered Systems; OPW Fluid Transfer Group; a Dover company]**
 - g. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ARCHON Industries, Inc]**
 - b. **[Dwyer Instruments, Inc]**
 - c. **[Ernst Flow Industries]**
 - d. **[John C. Ernst Co., Inc.]**
 - e. **[KOBOLD Instruments, Inc. - USA]**
 - f. **[OPW Engineered Systems; OPW Fluid Transfer Group; a Dover company]**
 - g. **<Insert manufacturer's name>**
 3. Source Limitations: Provide sight flow indicators from single manufacturer.
 4. Description: Piping inline-installation device for visual verification of flow.
 5. Construction: Bronze or stainless steel body, with sight glass and **[ball, flapper, or paddle wheel]<Insert device>** indicator, and threaded or flanged ends.
 6. Minimum Pressure Rating: **[125 psig (860 kPa)][150 psig (1034 kPa)]<Insert value>**.
 7. Minimum Temperature Rating: **[200 deg F (93 deg C)]<Insert temperature>**.
 8. End Connections for NPS 2 (DN 50) and Smaller: Threaded.
 9. End Connections for NPS 2-1/2 (DN 65) and Larger: Flanged.
- V. Flowmeters:

1. Performance Requirements: Manufacturer is to certify that each flowmeter complies with specified performance requirements and characteristics.
2. Flowmeters - Orifice:
 - a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1) **[ABB, Process Automation Business]**
 - 2) **[Armstrong International, Inc]**
 - 3) **[Bell & Gossett; a Xylem brand]**
 - 4) **[Meriam Process Technologies]**
 - 5) **[Rosemount; Emerson Electric Co., Automation Solutions]**
 - 6) **<Insert manufacturer's name>**
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1) **[ABB, Process Automation Business]**
 - 2) **[Armstrong International, Inc]**
 - 3) **[Bell & Gossett; a Xylem brand]**
 - 4) **[Meriam Process Technologies]**
 - 5) **[Rosemount; Emerson Electric Co., Automation Solutions]**
 - 6) **<Insert manufacturer's name>**
 - c. Source Limitations: Provide orifice flowmeters from single manufacturer.
 - d. Description: Flowmeter with orifice plate and flanges, differential pressure sensor, hoses or tubing, fittings, valves, indicator, and conversion chart.
 - e. Flow Range: Sensor and indicator are to cover operating range of equipment or system served.
 - f. Orifice Plate: Wafer-orifice-type, calibrated, flow-measuring element; for installation between orifice plate pipe flanges.
 - 1) Design: Differential-pressure-type measurement for **[gas][oil][steam][water]<Insert fluid>**.
 - 2) Construction: Cast-iron body, brass valves with integral check valves and caps, and calibrated nameplate.
 - 3) Minimum Pressure Rating: **[300 psig (2070 kPa)]<Insert value>**.
 - 4) Minimum Temperature Rating: **[250 deg F (121 deg C)]<Insert temperature>**.
 - g. Permanent Indicators: Meter suitable for wall or bracket mounting, calibrated for connected sensor, and has **6-inch- (150-mm-)** diameter, or equivalent, dial with fittings and copper tubing for connecting to sensor.
 - 1) Scale Divisions: **<Insert value>[gpm|START_SI| (Lps)][gpm and Lps]END_SI**.
 - 2) Accuracy: Plus or minus **[1 percent between 20 and 80 percent of scale range]<Insert accuracy>**.
 - h. Portable Indicators: Handheld, differential-pressure type, calibrated for connected sensor and having two **12 ft. (3.7 m)** hoses, with carrying case.
 - 1) Scale Divisions: **<Insert value>[gpm|START_SI| (Lps)][gpm and Lps]END_SI**.
 - 2) Accuracy: Plus or minus **[2 percent between 20 and 80 percent of scale**

range]<Insert accuracy>.

- i. Display: Shows rate of flow[, **with register to indicate total volume in gallons (liters)**].
- j. Conversion Chart: Flow rate data compatible with sensor and indicator.
- k. Operating Instructions: Include complete instructions with each flowmeter.

3. Flowmeters - Pitot Tube:

- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- 1) **[Armstrong International, Inc]**
- 2) **[Meriam Process Technologies]**
- 3) **[Nexus Valve, Inc.; Aalberts Hydronic Flow Control]**
- 4) **[Preso Meters; Badger Meter Inc.]**
- 5) **[Rosemount; Emerson Electric Co., Automation Solutions]**
- 6) **<Insert manufacturer's name>**

- b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- 1) **[Armstrong International, Inc]**
- 2) **[Meriam Process Technologies]**
- 3) **[Nexus Valve, Inc.; Aalberts Hydronic Flow Control]**
- 4) **[Preso Meters; Badger Meter Inc.]**
- 5) **[Rosemount; Emerson Electric Co., Automation Solutions]**
- 6) **<Insert manufacturer's name>**

- c. Source Limitations: Provide pitot-tube flowmeters from single manufacturer.
- d. Description: Flowmeter with sensor and indicator.
- e. Flow Range: Sensor and indicator are to cover operating range of equipment or system served.
- f. Sensor: Insertion type; for inserting probe in piping and measuring flow directly in **gpm (Lps)**.

- 1) Design: Differential-pressure-type measurement for **[oil][water]<Insert fluid>**.
- 2) Construction: Stainless steel probe of length to span inside of pipe, with integral transmitter and direct-reading scale.
- 3) Fitting for mounting probe in pipe, with **[weld][or][threaded]** connection for attachment to pipe. Provide way to permit removal of probe for service.
- 4) Minimum Pressure Rating: **[150 psig (1035 kPa)]<Insert value>**.
- 5) Minimum Temperature Rating: **[250 deg F (121 deg C)]<Insert temperature>**.

- g. Indicator: Handheld meter; either an integral part of sensor or a separate meter.
- h. Integral Transformer: For low-voltage power connection.
- i. Accuracy: Plus or minus **[3]<Insert number>** percent.
- j. Display: Shows rate of flow[, **with register to indicate total volume in gallons (liters)**].
- k. Operating Instructions: Include complete instructions with each flowmeter.

4. Flowmeters - Turbine:

- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

- 1) [ERDCO Engineering Corp]
- 2) [Hoffer Flow Controls, Inc]
- 3) [ONICON Incorporated]
- 4) [Preso Meters; Badger Meter Inc.]
- 5) [SeaMetrics, Inc.]
- 6) [Spirax Sarco Limited]
- 7) [Veris Industries]
- 8) <Insert manufacturer's name>

- b. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- 1) [ERDCO Engineering Corp]
- 2) [Hoffer Flow Controls, Inc]
- 3) [ONICON Incorporated]
- 4) [Preso Meters; Badger Meter Inc.]
- 5) [SeaMetrics, Inc.]
- 6) [Spirax Sarco Limited]
- 7) [Veris Industries]
- 8) <Insert manufacturer's name>

- c. Source Limitations: Provide turbine flowmeters from single manufacturer.
d. Description: Flowmeter with sensor and indicator.
e. Flow Range: Sensor and indicator are to cover operating range of equipment or system served.
f. Sensor: Impeller turbine; for inserting in pipe fitting or for installing in piping and measuring flow directly in **gpm (Lps)**.

- 1) Design: Device or pipe fitting with inline turbine and integral direct-reading scale for **[gas][oil][steam][water]<Insert fluid>**.
- 2) Construction: Bronze or stainless steel body, with plastic turbine or impeller.
- 3) Fitting for mounting probe in pipe, with **[weld][or][threaded]** connection for attachment to pipe. Provide way to permit removal of probe for service.
- 4) Minimum Pressure Rating: **[150 psig (1035 kPa)]<Insert value>**.
- 5) Minimum Temperature Rating: **[180 deg F (82 deg C)]<Insert temperature>**.

- g. Indicator: Handheld meter; either an integral part of sensor or a separate meter.
h. Accuracy: Plus or minus **[1-1/2]<Insert number>** percent.
i. Display: Shows rate of flow[, **with register to indicate total volume in gallons (liters)**].
j. Operating Instructions: Include complete instructions with each flowmeter.

5. Flowmeters - Venturi:

- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- 1) [Armstrong International, Inc]
- 2) [Gerand Engineering Co]
- 3) [Hyspan Precision Products, Inc]

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- 4) [Nexus Valve, Inc.; Aalberts Hydronic Flow Control]
 - 5) [Preso Meters; Badger Meter Inc.]
 - 6) [Rosemount; Emerson Electric Co., Automation Solutions]
 - 7) <Insert manufacturer's name>
- b. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- 1) [Armstrong International, Inc]
 - 2) [Gerand Engineering Co]
 - 3) [Hyspan Precision Products, Inc]
 - 4) [Nexus Valve, Inc.; Aalberts Hydronic Flow Control]
 - 5) [Preso Meters; Badger Meter Inc.]
 - 6) [Rosemount; Emerson Electric Co., Automation Solutions]
 - 7) <Insert manufacturer's name>
- c. Source Limitations: Provide venture flowmeters from single manufacturer.
- d. Description: Flowmeter with calibrated flow-measuring element, hoses or tubing, fittings, valves, indicator, and conversion chart.
- e. Flow Range: Sensor and indicator are to cover operating range of equipment or system served.
- f. Flow-Measuring Element:
- 1) Design: Differential-pressure-type measurement for [gas][oil][steam][water]<Insert fluid>.
 - 2) Venturi type with [in-line][or][insertion] element.
 - 3) Construction: Bronze, brass, or factory-primed steel, with brass fittings and attached tag with flow conversion data.
 - 4) Minimum Pressure Rating: [250 psig (1725 kPa)]<Insert value>.
 - 5) Minimum Temperature Rating: [250 deg F (121 deg C)]<Insert temperature>.
 - 6) End Connections for NPS 2 (DN 50) and Smaller: Threaded.
 - 7) End Connections for NPS 2-1/2 (DN 65) and Larger: Flanged or welded.
 - 8) Flow Range: Flow-measuring element and flowmeter are to cover operating range of equipment or system served.
- g. Permanent Indicators: Meter suitable for wall or bracket mounting, calibrated for connected flowmeter element, and has **6-inch- (150-mm-)** diameter, or equivalent, dial with fittings and copper tubing for connecting to flowmeter element.
- 1) Scale: <Insert value> gpm (Lps).
 - 2) Accuracy: Plus or minus [1 percent between 20 and 80 percent of scale range]<Insert accuracy>.
- h. Portable Indicators: Handheld, differential-pressure type, calibrated for connected flowmeter element and has two **12 ft. (3.7 m)** hoses, with carrying case.
- 1) Scale: <Insert value> gpm (Lps).
 - 2) Accuracy: Plus or minus 2 percent between 20 and 80 percent of scale range.
- i. Display: Shows rate of flow[, with register to indicate total volume in gallons (liters)].
- j. Conversion Chart: Flow rate data compatible with sensor.
- k. Operating Instructions: Include complete instructions with each flowmeter.
6. Flowmeters - Vortex Shedding:

- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1) **[ABB, Process Automation Business]**
 - 2) **[Endress+Hauser]**
 - 3) **[ISTEC Corporation]**
 - 4) **[Rosemount; Emerson Electric Co., Automation Solutions]**
 - 5) **<Insert manufacturer's name>**
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1) **[ABB, Process Automation Business]**
 - 2) **[Endress+Hauser]**
 - 3) **[ISTEC Corporation]**
 - 4) **[Rosemount; Emerson Electric Co., Automation Solutions]**
 - 5) **<Insert manufacturer's name>**
 - c. Source Limitations: Provide vortex-shedding flowmeters from single manufacturer.
 - d. Description: Flowmeter with sensor and indicator.
 - e. Flow Range: Sensor and indicator are to cover operating range of equipment or system served.
 - f. Sensor: Inline type; for installing between pipe flanges and measuring flow directly in **gpm (Lps)**.
 - 1) Design: Flow-obstruction device, vortex-measurement type for **[gas][steam][and][liquids]**.
 - 2) Construction: Stainless steel body, with integral transmitter and direct-reading scale.
 - 3) Minimum Pressure Rating: **[1000 psig (6900 kPa)]<Insert value>**.
 - 4) Minimum Temperature Rating: **[500 deg F (260 deg C)]<Insert temperature>**.
 - 5) Integral Transformer: For low-voltage power operation.
 - g. Indicator: Handheld meter; either an integral part of sensor or a separate meter.
 - h. Accuracy: Plus or minus **[0.25]<Insert number>** percent for liquids and **[0.75]<Insert number>** percent for gases.
 - i. Display: Shows rate of flow[, **with register to indicate total volume in gallons (liters)**].
 - j. Operating Instructions: Include complete instructions with each flowmeter.
7. Thermal-Energy Meters - Turbine:
- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1) **[ISTEC Corporation]**
 - 2) **[ONICON Incorporated]**
 - 3) **[Preso Meters; Badger Meter Inc.]**
 - 4) **[Veris Industries]**
 - 5) **<Insert manufacturer's name>**
 - b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert**

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

manufacturer's name; product name or designation> or comparable product by one of the following:

- 1) [ISTEC Corporation]
- 2) [ONICON Incorporated]
- 3) [Preso Meters; Badger Meter Inc.]
- 4) [Veris Industries]
- 5) <Insert manufacturer's name>

- c. Source Limitations: Provide turbine thermal-energy meters from single manufacturer.
- d. Performance Requirements: Manufacturer is to certify that each flowmeter complies with specified performance requirements and characteristics.
- e. Description: System with[**strainer**,] flow sensor, two temperature sensors, transmitter, indicator, and connecting wiring.
- f. Flow Sensor: Turbine type; for inserting in pipe fitting or for installing in piping and measuring flow directly in **gpm (Lps)**.

- 1) Design: Device or pipe fitting with inline turbine and integral direct-reading scale for **[gas][oil][steam][water]**.
- 2) Construction: Bronze or stainless steel body, with plastic turbine or impeller.
- 3) Fitting for mounting probe in pipe, with **[weld][or][threaded]** connection for attachment to pipe. Provision to remove probe for service.
- 4) Minimum Pressure Rating: **[150 psig (1035 kPa)]<Insert value>**.
- 5) Minimum Temperature Rating: **[180 deg F (82 deg C)]<Insert temperature>**.

- g. Temperature Sensors: Insertion-type sensor-transducer.
- h. Indicator: Solid-state, integrating-type meter[**with integral battery pack**]; for wall mounting.

- 1) Data Output: Six-digit electromechanical counter with readout in kilowatts per hour or **British thermal units (joules)**.
- 2) Battery Pack: Five-year lithium battery.

- i. Accuracy: Plus or minus **[1]<Insert number>** percent.
- j. Display: Visually indicates total fluid volume in **gallons (liters)** and thermal-energy flow in kilowatts per hour or **British thermal units (joules)**.
- k. Strainer: Full size of main line piping.
- l. Operating Instructions: Include complete instructions with each thermal-energy meter system.

8. Thermal-Energy Meters - Ultrasonic:

- a. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- 1) [Armstrong International, Inc]
- 2) [Badger Meter, Inc.]
- 3) [ONICON Incorporated]
- 4) [Preso Meters; Badger Meter Inc.]
- 5) [Siemens Industry, Inc., Energy Management Division]
- 6) [Veris Industries]
- 7) <Insert manufacturer's name>

- b. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert

manufacturer's name; product name or designation> or comparable product by one of the following:

- 1) **[Armstrong International, Inc]**
 - 2) **[Badger Meter, Inc.]**
 - 3) **[ONICON Incorporated]**
 - 4) **[Preso Meters; Badger Meter Inc.]**
 - 5) **[Siemens Industry, Inc., Energy Management Division]**
 - 6) **[Veris Industries]**
 - 7) **<Insert manufacturer's name>**
- c. Source Limitations: Provide ultrasonic thermal-energy meters from single manufacturer.
- d. Performance Requirements: Manufacturer is to certify that each flowmeter complies with specified performance requirements and characteristics.
- e. Description: Meter with flow sensor, two temperature sensors, transmitter, indicator, and connecting wiring.
- f. Flow Sensor: Transit-time ultrasonic type with transmitter.
- g. Temperature Sensors: Insertion-type or strap-on transducer.
- h. Indicator: Solid-state, integrating-type meter[**with integral battery pack**].
- 1) Data Output: Six-digit electromechanical counter with readout in kilowatts per hour or **British thermal units (joules)**.
 - 2) Battery Pack: Five-year lithium battery.
- i. Accuracy: Plus or minus [1]**<Insert number>** percent.
- j. Display: Visually indicates total fluid volume in **gallons (liters)** and thermal-energy flow in kilowatts per hour or **British thermal units (joules)**.
- k. Operating Instructions: Include complete instructions with each thermal-energy meter system.

PART 3 - EXECUTION

3.1 INSTALLATION OF EXPANSION JOINTS - GENERAL

- A. Install expansion joints of sizes matching sizes of piping in which they are installed.

3.2 INSTALLATION OF PACKED EXPANSION JOINTS

- A. Install packed expansion joints with packing suitable for fluid service.

3.3 INSTALLATION OF PACKLESS EXPANSION JOINTS

- A. Install metal-bellows packless expansion joints in accordance with EJMA's "Standards of the Expansion Joint Manufacturers Association, Inc."
- B. Install rubber packless expansion joints in accordance with FSA-PSJ-703.

3.4 INSTALLATION OF GROOVED-JOINT EXPANSION JOINTS

- A. Install grooved-joint expansion joints to grooved-end steel piping.

3.5 INSTALLATION OF ALIGNMENT GUIDES AND ANCHORS

- A. Install alignment guides to guide expansion and to avoid end-loading and torsional stress.
- B. Install **[one][two]** guide(s) on each side of pipe expansion fittings and loops. Install guides nearest to expansion joint not more than **[four]<Insert number>** pipe diameters from expansion joint.
- C. Attach guides to pipe, and secure guides to building structure.
- D. Install anchors at locations to prevent stresses from exceeding those permitted by ASME B31.9 and to prevent transfer of loading and stresses to connected equipment.
- E. Anchor Attachments:
 - 1. Anchor Attachment to Steel Pipe: Attach by welding. Comply with ASME B31.9.
 - 2. Anchor Attachment to Copper Tubing: Attach with pipe hangers. Use MSS SP-58, Type 24; U bolts bolted to anchor.
- F. Fabricate and install steel anchors by welding steel shapes, plates, and bars. Comply with ASME B31.9 and AWS D1.1/D1.1M.
 - 1. Anchor Attachment to Steel Structural Members: Attach by welding.
 - 2. Anchor Attachment to Concrete Structural Members: Attach by fasteners. Follow fastener manufacturer's written instructions.
 - 3. Use grout to form flat bearing surfaces for guides and anchors attached to concrete.

3.6 INSTALLATION OF PIPE LOOPS AND SWING CONNECTIONS

- A. Install pipe loops cold-sprung in tension or compression as required to partly absorb tension or compression produced during anticipated change in temperature.
- B. Connect risers and branch connections to mains with at least **[five]<Insert number>** pipe fittings, including tee in main.
- C. Connect risers and branch connections to terminal units with at least **[four]<Insert number>** pipe fittings, including tee in riser.
- D. Connect mains and branch connections to terminal units with at least **[four]<Insert number>** pipe fittings, including tee in main.

3.7 INSTALLATION OF SLEEVES - GENERAL

- A. Install sleeves for piping passing through penetrations in floors, partitions, roofs, and walls.
- B. For sleeves that will have sleeve-seal system installed, select sleeves of size large enough to provide **[1-inch (25-mm)][2-inch (50-mm)]<Insert dimension>** annular clear space between piping and concrete slabs and walls.

1. Sleeves are not required for core-drilled holes.
 - C. Install sleeves in concrete floors, concrete roof slabs, and concrete walls as new slabs and walls are constructed.
 1. Permanent sleeves are not required for holes in slabs formed by molded-PE or -PP sleeves.
 2. Cut sleeves to length for mounting flush with both surfaces.
 - a. Exception: Extend sleeves installed in floors of mechanical equipment areas or other wet areas **[2 inches (50 mm)]<Insert dimension>** above finished floor level.
 3. Using **[grout][or][silicone sealant]**, seal space outside of sleeves in floors/slabs/walls without sleeve-seal system. Select to maintain fire resistance of floor/slab/wall.
 - D. Install sleeves for pipes passing through interior partitions.
 1. Cut sleeves to length for mounting flush with both surfaces.
 2. Install sleeves that are large enough to provide **1/4-inch (6.4-mm)** annular clear space between sleeve and pipe or pipe insulation.
 3. Seal annular space between sleeve and piping or piping insulation; use joint sealants that joint sealant manufacturer's literature indicates is appropriate for size, depth, and location of joint.
 - E. Fire-Resistance-Rated Penetrations, Horizontal Assembly Penetrations, and Smoke-Barrier Penetrations: Maintain indicated fire or smoke rating of walls, partitions, ceilings, and floors at pipe penetrations. Seal pipe penetrations with fire- and smoke-stop materials. Comply with requirements for firestopping and fill materials specified in Section 078413 "Penetration Firestopping."
- 3.8 INSTALLATION OF SLEEVES WITH WATERSTOP
- A. Install sleeve with waterstop as new walls and slabs are constructed.
 - B. Assemble fitting components of length to be flush with both surfaces of concrete slabs and walls. Position waterstop flange centered across width of concrete slab or wall.
 - C. Secure nailing flanges to wooden concrete forms.
 - D. Using **[grout][or][silicone sealant]**, seal space around outside of sleeves.
- 3.9 INSTALLATION OF STACK-SLEEVE FITTINGS
- A. Install stack-sleeve fittings in new slabs as slabs are constructed.
 1. Install fittings that are large enough to provide **1/4-inch (6.4-mm)** annular clear space between sleeve and pipe or pipe insulation.
 2. Secure flashing between clamping flanges for pipes penetrating floors with membrane waterproofing. Comply with requirements for flashing specified in Section 076200 "Sheet Metal Flashing and Trim."
 3. Install section of cast-iron soil pipe to extend sleeve to **3 inches (76 mm)** above finished floor level.
 4. Extend cast-iron sleeve fittings below floor slab as required to secure clamping ring if ring is specified.
 5. Using silicone sealant, seal space between top hub of stack-sleeve fitting and pipe.

- B. Fire-Resistance-Rated Penetrations, Horizontal Assembly Penetrations, and Smoke Barrier Penetrations: Maintain indicated fire or smoke rating of floors at pipe penetrations. Seal pipe penetrations with fire- and smoke-stop materials. Comply with requirements for firestopping specified in Section 078413 "Penetration Firestopping."

3.10 INSTALLATION OF SLEEVE-SEAL SYSTEMS

- A. Install sleeve-seal systems in sleeves in exterior concrete walls and slabs-on-grade at service piping entries into building, and passing through exterior walls.
- B. Select type, size, and number of sealing elements required for piping material and size and for sleeve ID or hole size. Assemble sleeve-seal system components, and install in annular space between piping and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make a watertight seal.

3.11 INSTALLATION OF ESCUTCHEONS

- A. Install escutcheons for piping penetrations of walls, ceilings, and finished floors.
- B. Install escutcheons with ID to closely fit around pipe, tube, and insulation of insulated piping and with OD that completely covers opening.

3.12 INSTALLATION OF METERS AND GAUGES

- A. Install thermowells with socket extending **[a minimum of 2 inches (50 mm) into fluid][one-third of pipe diameter][to center of pipe]** and in vertical position in piping tees.
- B. Install thermowells of sizes required to match thermometer connectors. Include bushings if required to match sizes.
- C. Install thermowells with extension on insulated piping.
- D. Fill thermowells with heat-transfer medium.
- E. Install direct-mounted thermometers in thermowells and adjust vertical and tilted positions.
- F. Install remote-mounted thermometer bulbs in thermowells and install cases on panels; connect cases with tubing, and support tubing to prevent kinks. Use minimum tubing length.
- G. Install pipe-mounted thermal-energy temperature sensors in thermowells and extend wiring to indicator.
- H. Install duct-thermometer-mounting brackets in walls of ducts. Attach to duct with screws.
- I. Install direct-mounted pressure gauges in piping tees with pressure gauge located on pipe at the most readable position.
- J. Install remote-mounted pressure gauges on panel.
- K. Install valve and snubber in piping for each pressure gauge for fluids (except steam).
- L. Install valve and syphon fitting in piping for each pressure gauge for steam.

- M. Install test plugs in piping tees.
- N. Install flow indicators in piping systems in accessible positions for easy viewing.
- O. Assemble and install connections, tubing, and accessories between flow-measuring elements and flowmeters according to manufacturer's written instructions.
- P. Install flowmeter elements in accessible positions in piping systems.
- Q. Install wafer-orifice flowmeter elements between orifice-type pipe flanges.
- R. Install all flowmeter elements, with at least minimum straight lengths of pipe, upstream and downstream from element according to manufacturer's written instructions.
- S. Install permanent indicators on walls or brackets in accessible and readable positions.
- T. Install connection fittings in accessible locations for attachment to portable indicators.
- U. Mount thermal-energy meters on wall if accessible; if not, provide brackets to support meters.
- V. Install thermometers in the following locations:
 - 1. Inlet and outlet of each hydronic zone.
 - 2. Inlet and outlet of each hydronic boiler.
 - 3. Two inlets and two outlets of each chiller.
 - 4. Inlet and outlet of each hydronic coil in air-handling units.
 - 5. Two inlets and two outlets of each hydronic heat exchanger.
 - 6. Inlet and outlet of each thermal-storage tank.
 - 7. Outside-, return-, supply-, and mixed-air ducts.
 - 8. **<Insert location>**.
- W. Install pressure gauges in the following locations:
 - 1. Discharge of each pressure-reducing valve.
 - 2. Inlet and outlet of each chiller chilled-water and condenser-water connection.
 - 3. Suction and discharge of each pump.
 - 4. **<Insert location>**.

3.13 CONNECTIONS

- A. Install meters and gauges adjacent to machines and equipment to allow space for service and maintenance of meters, gauges, machines, and equipment.
- B. Connect flowmeter-system elements to meters.
- C. Connect flowmeter transmitters to meters.
- D. Connect thermal-energy meter transmitters to meters.

3.14 ADJUSTING

- A. After installation, calibrate meters according to manufacturer's written instructions.

- B. Adjust faces of meters and gauges to proper angle for best visibility.

3.15 FIELD QUALITY CONTROL

- A. Sleeves and Sleeve Seals:

1. Perform the following tests and inspections:
 - a. Leak Test: After allowing for a full cure, test sleeves and sleeve seals for leaks. Repair leaks and retest until no leaks exist.
 - b. Sleeves and sleeve seals will be considered defective if they do not pass tests and inspections.
2. Prepare test and inspection reports.

- B. Escutcheons:

1. Using new materials, replace broken and damaged escutcheons and floor plates.

3.16 SLEEVES APPLICATION

- A. Use sleeves and sleeve seals for the following piping-penetration applications:

1. Exterior Concrete Walls above and below Grade:
 - a. Sleeves with waterstops.
 - 1) Select sleeve size to allow for **[1-inch (25-mm)]<Insert dimension>** annular clear space between piping and sleeve for installing sleeve-seal system.
2. Concrete Slabs-on-Grade:
 - a. Sleeves with waterstops.
 - 1) Select sleeve size to allow for **[1-inch (25-mm)]<Insert dimension>** annular clear space between piping and sleeve for installing sleeve-seal system.
3. Concrete Slabs above Grade:
 - a. **[Sleeves with waterstops][or][stack-sleeve fittings]**.
4. Interior Walls and Partitions:
 - a. Sleeves without waterstops.

3.17 ESCUTCHEONS APPLICATION

- A. Escutcheons for New Piping and Relocated Existing Piping:

1. Piping with Fitting or Sleeve Protruding from Wall: One piece, deep pattern.
2. Chrome-Plated Piping: One piece, **[steel][cast brass][or split-plate steel]** with polished, chrome-plated finish.

3. Insulated Piping:
 - a. One piece, steel with **[polished, chrome-plated][polished brass]** finish.
 - b. One piece, stainless steel with polished stainless steel finish.
 - c. One piece, cast brass with **[polished, chrome-plated][polished brass]** finish.
 - d. One piece, stamped steel **[or split plate, stamped steel with concealed hinge][or split plate, stamped steel with exposed-rivet hinge]** with polished, chrome-plated finish.
4. Bare Piping at Wall and Floor Penetrations in Finished Spaces:
 - a. One piece, steel with **[polished, chrome-plated][polished brass]** finish.
 - b. One piece, stainless steel with polished stainless steel finish.
 - c. One piece, cast brass with **[polished, chrome-plated][polished brass]** finish.
 - d. One piece, stamped steel **[or split plate, stamped steel with concealed hinge][or split plate, stamped steel with exposed-rivet hinge]** with polished, chrome-plated finish.
5. Bare Piping at Ceiling Penetrations in Finished Spaces:
 - a. One piece, steel with **[polished, chrome-plated][polished brass]** finish.
 - b. One piece, stainless steel with polished stainless steel finish.
 - c. One piece, cast brass with **[polished, chrome-plated][polished brass]** finish.
 - d. One piece, stamped steel **[or split plate, stamped steel with concealed hinge][or split plate, stamped steel with exposed-rivet hinge]** with polished, chrome-plated finish.
6. Bare Piping in Unfinished Service Spaces:
 - a. One piece, steel with polished, chrome-plated finish.
 - b. One piece, cast brass with **[polished, chrome-plated][rough-brass]** finish.
 - c. One piece, stamped steel **[or split plate, stamped steel with concealed hinge][or split plate, stamped steel with exposed-rivet hinge]** with polished, chrome-plated finish.
7. Bare Piping in Equipment Rooms:
 - a. One piece, steel with polished, chrome-plated finish.
 - b. One piece, cast brass with **[polished, chrome-plated][rough-brass]** finish.
 - c. One piece, stamped steel **[or split plate, stamped steel with concealed hinge][or split plate, stamped steel with exposed-rivet hinge]** with polished, chrome-plated finish.

B. Escutcheons for Existing Piping to Remain:

1. Chrome-Plated Piping: Split plate, stamped steel with **[concealed][or][exposed-rivet]** hinge with polished, chrome-plated finish.
2. Insulated Piping: Split plate, stamped steel with **[concealed][or][exposed-rivet]** hinge with polished, chrome-plated finish.
3. Bare Piping at Wall and Floor Penetrations in Finished Spaces: Split plate, stamped steel with **[concealed][or][exposed-rivet]** hinge with polished, chrome-plated finish.
4. Bare Piping at Ceiling Penetrations in Finished Spaces: Split plate, stamped steel with **[concealed][or][exposed-rivet]** hinge with polished, chrome-plated finish.
5. Bare Piping in Unfinished Service Spaces: Split plate, stamped steel with **[concealed][or][exposed-rivet]** hinge with polished, chrome-plated finish.
6. Bare Piping in Equipment Rooms: Split plate, stamped steel with **[concealed][or][exposed-rivet]** hinge with polished, chrome-plated finish.

C. Install floor plates for piping penetrations of equipment-room floors.

- D. Install floor plates with ID to closely fit around pipe, tube, and insulation of piping and with OD that completely covers opening.

1. New Piping and Relocated Existing Piping: Split floor plate.
2. Existing Piping to Remain: Split floor plate.

3.18 THERMOMETER APPLICATION

- A. Thermometers at inlet and outlet of each hydronic zone are to be the following:

1. **[Liquid-filled][Sealed]**, bimetallic-actuated type.
2. **[Direct][Remote]**-mounted, **[metal][plastic]**-case, vapor-actuated type.
3. **[Compact][Industrial]**-style, liquid-in-glass type.
4. **[Direct][Remote]**-mounted, light-activated type.
5. Test plug with **[chlorosulfonated polyethylene synthetic][EPDM]** self-sealing rubber inserts.

- B. Thermometers at inlet and outlet of each hydronic boiler are to be the following:

1. **[Liquid-filled][Sealed]**, bimetallic-actuated type.
2. **[Direct][Remote]**-mounted, **[metal][plastic]**-case, vapor-actuated type.
3. **[Compact][Industrial]**-style, liquid-in-glass type.
4. **[Direct][Remote]**-mounted, light-activated type.
5. Test plug with **[chlorosulfonated polyethylene synthetic][EPDM]** self-sealing rubber inserts.

- C. Thermometers at inlets and outlets of each chiller are to be the following:

1. **[Liquid-filled][Sealed]**, bimetallic-actuated type.
2. **[Direct][Remote]**-mounted, **[metal][plastic]**-case, vapor-actuated type.
3. **[Compact][Industrial]**-style, liquid-in-glass type.
4. **[Direct][Remote]**-mounted, light-activated type.
5. Test plug with **[chlorosulfonated polyethylene synthetic][EPDM]** self-sealing rubber inserts.

- D. Thermometers at inlet and outlet of each hydronic coil in air-handling units and built-up central systems are to be the following:

1. **[Liquid-filled][Sealed]**, bimetallic-actuated type.
2. **[Direct][Remote]**-mounted, **[metal][plastic]**-case, vapor-actuated type.
3. **[Compact][Industrial]**-style, liquid-in-glass type.
4. **[Direct][Remote]**-mounted, light-activated type.
5. Test plug with **[chlorosulfonated polyethylene synthetic][EPDM]** self-sealing rubber inserts.

- E. Thermometers at inlets and outlets of each hydronic heat exchanger are to be the following:

1. **[Liquid-filled][Sealed]**, bimetallic-actuated type.
2. **[Direct][Remote]**-mounted, **[metal][plastic]**-case, vapor-actuated type.
3. **[Compact][Industrial]**-style, liquid-in-glass type.
4. **[Direct][Remote]**-mounted, light-activated type.
5. Test plug with **[chlorosulfonated polyethylene synthetic][EPDM]** self-sealing rubber inserts.

- F. Thermometers at inlet and outlet of each hydronic heat-recovery unit are to be the following:

1. **[Liquid-filled][Sealed]**, bimetallic-actuated type.
2. **[Direct][Remote]**-mounted, **[metal][plastic]**-case, vapor-actuated type.
3. **[Compact][Industrial]**-style, liquid-in-glass type.
4. **[Direct][Remote]**-mounted, light-activated type.

5. Test plug with [chlorosulfonated polyethylene synthetic][EPDM] self-sealing rubber inserts.

G. Thermometers at inlet and outlet of each thermal-storage tank are to be the following:

1. [Liquid-filled][Sealed], bimetallic-actuated type.
2. [Direct][Remote]-mounted, [metal][plastic]-case, vapor-actuated type.
3. [Compact][Industrial]-style, liquid-in-glass type.
4. [Direct][Remote]-mounted, light-activated type.
5. Test plug with [chlorosulfonated polyethylene synthetic][EPDM] self-sealing rubber inserts.

H. Thermometers at outside-, return-, supply-, and mixed-air ducts are to be the following:

1. [Liquid-filled][Sealed], bimetallic-actuated type.
2. [Direct][Remote]-mounted, [metal][plastic]-case, vapor-actuated type.
3. [Compact][Industrial]-style, liquid-in-glass type.
4. [Direct][Remote]-mounted, light-activated type.

I. Thermometer stems are to be of length to match thermowell insertion length.

3.19 THERMOMETER SCALE-RANGE APPLICATION

A. Scale Range for Chilled-Water Piping:

1. [Minus 40 to plus 160 deg F (Minus 40 to plus 100 deg C)][Minus 40 to plus 160 deg F and minus 40 to plus 100 deg C].
2. [0 to 100 deg F (Minus 20 to plus 50 deg C)][0 to 100 deg F and minus 20 to plus 50 deg C].
3. [0 to 150 deg F (Minus 20 to plus 70 deg C)][0 to 150 deg F and minus 20 to plus 70 deg C].
4. [0 to 250 deg F (0 to 150 deg C)][0 to 250 deg F and 0 to 150 deg C].

B. Scale Range for Condenser-Water Piping:

1. [0 to 100 deg F (Minus 20 to plus 50 deg C)][0 to 100 deg F and minus 20 to plus 50 deg C].
2. [0 to 150 deg F (Minus 20 to plus 70 deg C)][0 to 150 deg F and minus 20 to plus 70 deg C].
3. [0 to 250 deg F (0 to 150 deg C)][0 to 250 deg F and 0 to 150 deg C].
4. [20 to 240 deg F (0 to 150 deg C)][20 to 240 deg F and 0 to 150 deg C].
5. [30 to 240 deg F (0 to plus 115 deg C)][30 to 240 deg F and 0 to plus 115 deg C].

C. Scale Range for Heating, Hot-Water Piping:

1. [0 to 250 deg F (0 to 150 deg C)][0 to 250 deg F and 0 to 150 deg C].
2. [20 to 240 deg F (0 to 150 deg C)][20 to 240 deg F and 0 to 150 deg C].
3. [30 to 240 deg F (0 to plus 115 deg C)][30 to 240 deg F and 0 to plus 115 deg C].
4. [50 to 400 deg F (0 to 200 deg C)][50 to 400 deg F and 0 to 200 deg C].
5. [50 to 550 deg F (10 to 300 deg C)][50 to 550 deg F and 10 to 300 deg C].

D. Scale Range for Steam and Steam-Condensate Piping:

1. [0 to 250 deg F (0 to 150 deg C)][0 to 250 deg F and 0 to 150 deg C].
2. [0 to 250 deg F (0 to 150 deg C)][0 to 250 deg F and 0 to 150 deg C].
3. [30 to 240 deg F (0 to plus 115 deg C)][30 to 240 deg F and 0 to plus 115 deg C].
4. [50 to 400 deg F (0 to 200 deg C)][50 to 400 deg F and 0 to 200 deg C].

E. Scale Range for Air Ducts:

1. [Minus 40 to plus 110 deg F (Minus 40 to plus 45 deg C)][Minus 40 to plus 110 deg F and minus 40 to plus 45 deg C].
2. [Minus 40 to plus 160 deg F (Minus 40 to plus 100 deg C)][Minus 40 to plus 160 deg F and minus 40 to plus 100 deg C].
3. [0 to 100 deg F (Minus 20 to plus 50 deg C)][0 to 100 deg F and minus 20 to plus 50 deg C].
4. [0 to 150 deg F (Minus 20 to plus 70 deg C)][0 to 150 deg F and minus 20 to plus 70 deg C].
5. [0 to 250 deg F (0 to 150 deg C)][0 to 250 deg F and 0 to 150 deg C].
6. [20 to 240 deg F (0 to 150 deg C)][20 to 240 deg F and 0 to 150 deg C].
7. [30 to 240 deg F (0 to plus 115 deg C)][30 to 240 deg F and 0 to plus 115 deg C].
8. [50 to 400 deg F (0 to 200 deg C)][50 to 400 deg F and 0 to 200 deg C].

3.20 PRESSURE-GAUGE APPLICATION

- A. Pressure gauges at discharge of each pressure-reducing valve are to be the following:
1. [Liquid filled][Sealed][Open front, pressure relief][Solid front, pressure relief]<Insert type>, [direct][remote] mounted, metal case.
 2. [Sealed]<Insert type>, [direct][remote] mounted, plastic case.
 3. Test plug with [chlorosulfonated polyethylene synthetic][EPDM] self-sealing rubber inserts.
- B. Pressure gauges at inlet and outlet of each chiller chilled-water and condenser-water connection are to be the following:
1. [Liquid filled][Sealed][Open front, pressure relief][Solid front, pressure relief]<Insert type>, [direct][remote] mounted, metal case.
 2. [Sealed]<Insert type>, [direct][remote] mounted, plastic case.
 3. Test plug with [chlorosulfonated polyethylene synthetic][EPDM] self-sealing rubber inserts.
- C. Pressure gauges at suction and discharge of each pump are to be the following:
1. [Liquid-filled][Sealed][Open front, pressure relief][Solid front, pressure relief]<Insert type>, [direct][remote] mounted, metal case.
 2. [Sealed]<Insert type>, [direct][remote] mounted, plastic case.
 3. Test plug with [chlorosulfonated polyethylene synthetic][EPDM] self-sealing rubber inserts.

3.21 PRESSURE-GAUGE SCALE-RANGE APPLICATION

- A. Scale Range for Chilled-Water Piping:
1. [30 in. Hg to 15 psi (minus 100 to 0 kPa)][30 in. Hg to 15 psi and minus 100 to 0 kPa].
 2. [0 to 30 psi (0 to 240 kPa)][0 to 30 psi and 0 to 240 kPa].
 3. [0 to 100 psi (0 to 600 kPa)][0 to 100 psi and 0 to 600 kPa].
 4. [0 to 160 psi (0 to 1100 kPa)][0 to 160 psi and 0 to 1100 kPa].
 5. [0 to 200 psi (0 to 1400 kPa)][0 to 200 psi and 0 to 1400 kPa].
 6. [0 to 300 psi (0 to 2500 kPa)][0 to 300 psi and 0 to 2500 kPa].
 7. [0 to 600 psi (0 to 4000 kPa)][0 to 600 psi and 0 to 4000 kPa].
- B. Scale Range for Condenser-Water Piping:
1. [30 in. Hg to 15 psi (minus 100 to 0 kPa)][30 in. Hg to 15 psi and minus 100 to 0 kPa].
 2. [0 to 30 psi (0 to 240 kPa)][0 to 30 psi and 0 to 240 kPa].
 3. [0 to 100 psi (0 to 600 kPa)][0 to 100 psi and 0 to 600 kPa].
 4. [0 to 160 psi (0 to 1100 kPa)][0 to 160 psi and 0 to 1100 kPa].
 5. [0 to 200 psi (0 to 1400 kPa)][0 to 200 psi and 0 to 1400 kPa].

6. [0 to 300 psi (0 to 2500 kPa)][0 to 300 psi and 0 to 2500 kPa].
7. [0 to 600 psi (0 to 4000 kPa)][0 to 600 psi and 0 to 4000 kPa].

C. Scale Range for Heating, Hot-Water Piping:

1. [30 in. Hg to 15 psi (minus 100 to 0 kPa)][30 in. Hg to 15 psi and minus 100 to 0 kPa].
2. [0 to 30 psi (0 to 240 kPa)][0 to 30 psi and 0 to 240 kPa].
3. [0 to 100 psi (0 to 600 kPa)][0 to 100 psi and 0 to 600 kPa].
4. [0 to 160 psi (0 to 1100 kPa)][0 to 160 psi and 0 to 1100 kPa].
5. [0 to 200 psi (0 to 1400 kPa)][0 to 200 psi and 0 to 1400 kPa].
6. [0 to 300 psi (0 to 2500 kPa)][0 to 300 psi and 0 to 2500 kPa].
7. [0 to 600 psi (0 to 4000 kPa)][0 to 600 psi and 0 to 4000 kPa].

D. Scale Range for Steam Piping:

1. [30 in. Hg to 15 psi (minus 100 to 0 kPa)][30 in. Hg to 15 psi and minus 100 to 0 kPa].
2. [0 to 30 psi (0 to 240 kPa)][0 to 30 psi and 0 to 240 kPa].
3. [0 to 100 psi (0 to 600 kPa)][0 to 100 psi and 0 to 600 kPa].
4. [0 to 160 psi (0 to 1100 kPa)][0 to 160 psi and 0 to 1100 kPa].
5. [0 to 200 psi (0 to 1400 kPa)][0 to 200 psi and 0 to 1400 kPa].
6. [0 to 300 psi (0 to 2500 kPa)][0 to 300 psi and 0 to 2500 kPa].
7. [0 to 600 psi (0 to 4000 kPa)][0 to 600 psi and 0 to 4000 kPa].

3.22 FLOWMETER APPLICATION

- A. Flowmeters for Chilled-Water Piping: [Orifice][Pitot-tube][Turbine][Venturi][Vortex-shedding] type.
- B. Flowmeters for Condenser-Water Piping: [Orifice][Pitot-tube][Turbine][Venturi][Vortex-shedding] type.
- C. Flowmeters for Heating, Hot-Water Piping: [Orifice][Pitot-tube][Turbine][Venturi][Vortex-shedding] type.
- D. Flowmeters for Steam and Steam-Condensate Piping: [Orifice][Turbine][Venturi][Vortex-shedding] type.

3.23 THERMAL-ENERGY METER APPLICATION

- A. Thermal-Energy Meters for Chilled-Water Piping: [Turbine][Ultrasonic] type.
- B. Thermal-Energy Meters for Condenser-Water Piping: [Turbine][Ultrasonic] type.
- C. Thermal-Energy Meters for Heating, Hot-Water Piping: [Turbine][Ultrasonic] type.
- D. Thermal-Energy Meters for Steam and Steam-Condensate Piping: [Turbine][Ultrasonic] type.

END OF SECTION 23 05 00 00

SECTION 23 05 00 00A - COATINGS FOR HVAC

PART 1 - GENERAL

1.1 SUMMARY

- A. Section includes application of coating systems on internal HVAC components and external equipment surfaces, including the following systems:
 - 1. Bake-cured corrosion-resistant coating systems.
 - 2. Air-dried corrosion-resistant coating systems.

1.2 DEFINITIONS

- A. Salt Water Acetic Acid Test (SWAAT): A salt fog-spray test of corrosion resistance performed in accordance with ASTM G85, Annex 3.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product. Include Safety Data Sheets, preparation requirements, and application instructions.
- B. Sustainable Design Submittals:
 - 1. Product Data: For paints and coatings, indicating VOC content.
 - 2. Laboratory Test Reports: For paints and coatings, indicating compliance with requirements for low-emitting materials.

1.4 INFORMATIONAL SUBMITTALS

- A. Source Quality-Control Reports:
 - 1. Certification of coating material testing.

1.5 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Coatings: [1]<Insert number>[container][spray can] of each material and color applied [, including base coat and top coat products].

1.6 DELIVERY, STORAGE, AND HANDLING

- A. Store materials not in use in tightly covered containers in clean, dry, well-ventilated areas with ambient temperatures continuously maintained between **50 and 75 deg F (10 and 24 deg C)**.

1. Keep containers out of direct sunlight; avoid excessive heat and keep from freezing.
2. Maintain containers in clean condition, free of foreign materials and residue.
3. Remove rags and waste from storage areas daily.

1.7 CONDITIONS FOR COATING APPLICATION

- A. Comply with manufacturer's recommendations regarding required temperature and humidity ranges during coating application.

PART 2 - PRODUCTS

2.1 CORROSION-RESISTANT COATING SYSTEMS, GENERAL

- A. Material Compatibility:
 1. Provide materials for application within each coating system that are compatible with one another and with metal substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
 2. For each coating material in coating system, submit compatibility certification from manufacturer of each coating product that products are compatible with substrate base material and with substrate-coating products applied as earlier coats.
 3. Products shall be of same manufacturer for each coat in a coating system.
- B. Colors: **[Manufacturer's standard]<Insert requirements>**.
- C. VOC Content, LEED 2009: For field applications that are inside the weatherproofing system, paints and coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:
 1. Flat Paints and Coatings: 50 g/L.
 2. Nonflat Paints and Coatings: 150 g/L.
 3. Dry-Fog Coatings: 400 g/L.
 4. Primers, Sealers, and Undercoaters: 200 g/L.
 5. Anticorrosive and Antirust Paints Applied to Ferrous Metals: 250 g/L.
 6. Zinc-Rich Industrial Maintenance Primers: 340 g/L.
 7. Pretreatment Wash Primers: 420 g/L.
 8. Shellacs, Clear: 730 g/L.
 9. Shellacs, Pigmented: 550 g/L.
- D. Low-Emitting Materials, LEED 2009: Interior paints and coatings shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
- E. VOC Content, LEED v4: For field applications that are inside the weatherproofing system, paints and coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:
 1. Flat Paints and Coatings: 50 g/L.
 2. Nonflat Paints and Coatings: 50 g/L.
 3. Dry-Fog Coatings: 150 g/L.
 4. Primers, Sealers, and Undercoaters: 100 g/L.

5. Rust-Preventive Coatings: 100 g/L.
 6. Zinc-Rich Industrial Maintenance Primers: 100 g/L.
 7. Pretreatment Wash Primers: 420 g/L.
 8. Shellacs, Clear: 730 g/L.
 9. Shellacs, Pigmented: 550 g/L.
- F. Low-Emitting Materials, LEED v4: For field applications that are inside the weatherproofing system, 90 percent of paints and coatings shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
- G. Material Emissions and Pollutant Control: Not less than 85 percent of field-applied paints and coatings that are inside the weatherproofing system shall comply with either of the following:
1. Low-Emitting Materials: VOC emissions shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
 2. VOC content shall not exceed limits of authorities having jurisdiction and the following:
 - a. Flat Coatings: 50 g/L.
 - b. Nonflat Coatings: 100 g/L.
 - c. Nonflat - High-Gloss Coatings: 150 g/L.
 - d. Dry-Fog Coatings: 150 g/L.
 - e. Industrial Maintenance Coatings: 250 g/L.
 - f. Pretreatment Wash Primers: 420 g/L.
 - g. Primers, Sealers, and Undercoaters: 100 g/L.
 - h. Recycled Coatings: 250 g/L.
 - i. Rust-Preventive Coatings: 250 g/L.
- H. Emissions Requirements: Field-applied paints and coatings that are inside the weatherproofing system shall comply with either of the following:
1. Low-Emitting Materials: VOC emissions shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
 2. VOC content shall not exceed limits of authorities having jurisdiction and the following:
 - a. Flat Coatings: 50 g/L.
 - b. Nonflat Coatings: 100 g/L.
 - c. Primers, Sealers, and Undercoats: 100 g/L.
 - d. Shellacs, Clear: 730 g/L.
 - e. Shellacs, Pigmented: 550 g/L.
- I. VOC Content: For field applications inside the building, wall paints shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:
1. Interior Flat Latex Wall Paint: 50 g/L.
 2. Interior Nonflat Latex Wall Paint: 150 g/L.
- J. VOC Emissions: For field applications inside the building, wall paints shall contain no more than half of the chronic REL of VOCs when tested according to the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit or 33 mcg/cu. m and that of acetaldehyde shall not exceed 9 mcg/cu. m.

2.2 BAKE-CURED CORROSION-RESISTANT COATING SYSTEMS

A. Base Coat Performance Requirements:

1. Corrosion Resistance: ASTM B117: [1500][2000][3500][6000]<Insert number> hours.
2. Cross-Hatch Adhesion: ASTM D3359: [5B]<Insert value>.
3. SWAAT: ASTM G85: [1000][Insert number] hours.
4. Cyclic Weathering: ISO 12944-9, [4200]<Insert number> hours.
5. Mandrel Flexibility: ASTM D522/D522M: [1/4 inch (6 mm)][1/2 inch (13 mm)]<Insert value> without cracking or delamination of film after full cure.
6. Adhesion - Elcometer: ASTM D4541: [1100 psi (7.6 MPa)]<Insert value>.
7. Impact: ASTM D2794.
 - a. Direct Hit: [70 lb.-in. (7.9 N-m)][80 lb.-in. (9.0 N-m)][90 lb.-in. (10.2 N-m)][100 lb.-in. (11.3 N-m)]<Insert value>.
 - b. Reverse Hit: [20 lb.-in. (2.2 N-m)][30 lb.-in. (3.4 N-m)][40 lb.-in. (4.5 N-m)][50 lb.-in. (5.6 N-m)]<Insert value>.
8. pH Range, 14-Day Liquid Spot Test: [2.4 to 12.6][or][3 to 12][Insert value].
9. Dry Heat Resistance: ASTM D2485: [320 deg F (160 deg C)][392 deg F (200 deg C)]<Insert value> maximum.
10. Dry Film Thickness: [0.5 to 1.2 mils (0.013 to 0.030 mm)][0.6 to 1.5 mils (0.015 to 0.038 mm)]<Insert thickness range>.
11. Heat-Transfer Reduction: [1 percent maximum]<Insert value>.
12. Hardness: ASTM D3363 Pencil Test: [2B-HB][5H-6H]<Insert value>.

B. Bake-Cured Coating for Equipment Serving Food-Preparation Areas: In accordance with NSF 51.

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Heresite Protective Coatings]
 - b. [Modine Manufacturing Company]
 - c. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Heresite Protective Coatings]
 - b. [Modine Manufacturing Company]
 - c. <Insert manufacturer's name>

C. Bake-Cured Top Coat:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Heresite Protective Coatings]
 - b. [Modine Manufacturing Company]
 - c. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Heresite Protective Coatings]**
 - b. **[Modine Manufacturing Company]**
 - c. **<Insert manufacturer's name>**
3. Performance Requirements: Provide product with UV shielding properties, color stability, and maintenance of manufacturer's standard sheen, after exposure to outdoor conditions.

D. Bake-Cured, Immersion-Applied Phenolic Epoxy System:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Heresite Protective Coatings]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Heresite Protective Coatings]**
 - b. **<Insert manufacturer's name>**

E. Baked-Cured, Immersion-Applied Epoxy Coating System:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Modine Manufacturing Company]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Modine Manufacturing Company]**
 - b. **<Insert manufacturer's name>**

2.3 AIR-DRIED CORROSION-RESISTANT COATING SYSTEMS

A. Performance Requirements:

1. Corrosion Resistance: ASTM B117: **[1500][2000][3500]<Insert number>** hours.
2. Cross-Hatch Adhesion: ASTM D3359: **[5B]<Insert value>**.
3. Cyclic Weathering: ISO 12944-9, Offshore Standard: **[4200]<Insert number>** hours.
4. Mandrel Flexibility: ASTM D522/D522M: **[1/2 inch (13 mm)][1/8 inch (3 mm)]<Insert value>** without cracking or delamination of film after full cure.
5. Impact: ASTM D2794.

a. Direct Hit: [100 in-lb (11.3 N-m)]<Insert value>.

6. Dry Heat Resistance: ASTM D2485: [356 deg F (180 deg C)]<Insert value> maximum.
7. Dry Film Thickness: [2 to 3 mils (0.050 to 0.075 mm)]<Insert thickness range>.
8. Heat-Transfer Reduction: [1 percent]<Insert value> maximum.
9. Hardness: ASTM D3363 Pencil Test: [2B-HB][2H][HBF]<Insert value>.

B. Air-Dried, Spray-Applied Principle Coating System:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Blygold America]
 - b. [Heresite Protective Coatings]
 - c. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Blygold America]
 - b. [Heresite Protective Coatings]
 - c. <Insert manufacturer's name>

C. Air-Dried Phenolic System:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Heresite Protective Coatings]
 - b. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Heresite Protective Coatings]
 - b. <Insert manufacturer's name>

D. Air-Dried, Spray-Applied Coating System:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Modine Manufacturing Company]
 - b. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the

following:

- a. **[Modine Manufacturing Company]**
- b. **<Insert manufacturer's name>**

E. Air-Dried, Spray-Applied, Polyurethane Mixed with Aluminum Flakes System:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Blygold America]**
 - b. **[Energy Guard USA]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Blygold America]**
 - b. **[Energy Guard USA]**
 - c. **<Insert manufacturer's name>**

F. Base Coat Performance Requirements:

1. Corrosion Resistance: ASTM B117: **[1500][2000][3000][4000][5000][6000][10,000]<Insert number>** hours.
2. SWAAT: ASTM G85: **[1000][Insert number]** hours.
3. Cyclic Weathering: ISO 12944-9: **[4200]<Insert number>** hours.
4. Cross-Hatch Adhesion: ASTM D3359: **[5B]<Insert value>**.
5. Mandrel Flexibility: ASTM D522/D522M: **[1/8 inch (3 mm)][1/4 inch (6 mm)][1/2 inch (13 mm)]<Insert value>** without cracking or delamination of film after full cure.
6. Adhesion - Elcometer: ASTM D4541: **[1,100 psi (7.6 MPa)]<Insert value>**
7. Impact: ASTM D2794.
 - a. Direct Hit: **[100 lb.-in. (11.3 N-m)][160 lb.-in. (18.0 N-m)]<Insert value>**.
8. Dry Heat Resistance: ASTM D2485: **[250 deg F (121 deg C)]<Insert value>** maximum.
9. Dry Film Thickness: **[0.5 to 1.2 mils (0.013 to 0.030 mm)][0.6 to 1.5 mils (0.015 to 0.038 mm)]<Insert thickness range>**.
10. Heat-Transfer Reduction: **[1 percent]<Insert value>** maximum.
11. Hardness: ASTM D3363 Pencil Test: **[2B-HB][HB-F]<Insert value>**.

G. Air-Dried Coating for Equipment Serving Food-Preparation Areas: In accordance with 21 CFR 175.300.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Heresite Protective Coatings]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the

following:

- a. **[Heresite Protective Coatings]**
- b. **<Insert manufacturer's name>**

H. Spray-Can Application System:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Heresite Protective Coatings]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Heresite Protective Coatings]**
 - b. **<Insert manufacturer's name>**
3. Spray-Can Application System Air-Dried Top Coat Performance Requirements: Provide product with UV shielding properties, color stability, and maintenance of manufacturer's standard sheen, after exposure to outdoor conditions.
 - a. Type: Air dry, phenolic.

2.4 SOURCE QUALITY CONTROL

- A. Certification of Coating Material Testing: Submit manufacturer's test report of corrosion-resistance performance testing, as performed by a nationally recognized testing laboratory.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine substrates and conditions, with Applicator present, for compliance with coating manufacturer's requirements and other conditions affecting performance of the Work.
- B. Verify suitability of substrates, including surface conditions and compatibility, with existing finishes and primers.
- C. Proceed with coating application only after unsatisfactory conditions have been corrected.
 1. Application of coating indicates acceptance of surfaces and conditions.

3.2 PREPARATION

- A. Comply with manufacturer's written instructions applicable to substrates and coating systems indicated.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

1. Thinning: Thin coating material with manufacturer's recommended thinning products when recommended or permitted by coating system manufacturer.
- B. Comply with coating system manufacturer's recommendations to clean substrates of substances that could impair bond of coatings, including dust, dirt, oil, grease, and incompatible paints and encapsulants.

3.3 APPLICATION

- A. Verify with coating manufacturer whether coatings required must be applied and cured in factory-certified application shop.
- B. Apply coating systems with equipment designed to deposit coating of specified uniform thickness over HVAC components, in complex, three-dimensional geometries.
 1. Apply coatings with manufacturer-recommended tools and techniques suited for specified coating system and each coated HVAC component.
 2. Do not apply coatings over labels or equipment name, identification, performance rating, or nomenclature plates.
- C. Perform inspection and coating system manufacturer's recommended tests to verify coating integrity and thickness. Where coating was damaged by testing, repair damage in accordance with coating system manufacturer's written recommendations.

END OF SECTION 23 05 00 00A

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 23 05 23 00 - GENERAL-DUTY VALVES FOR HVAC PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Angle valves.
2. Globe valves.
3. Ball valves.
4. Butterfly valves.
5. Check valves.
6. Gate valves.
7. Plug valves.
8. Chainwheels.

1.2 DEFINITIONS

- A. CWP: Cold working pressure.
- B. EPDM: Ethylene-propylene-diene monomer.
- C. FKM: Fluoroelastomer.
- D. NBR: Nitrile butadiene rubber (also known as "Buna-N").
- E. NRS: Nonrising stem.
- F. OS&Y: Outside screw and yoke.
- G. PTFE: Polytetrafluoroethylene.
- H. RPTFE: Reinforced polytetrafluoroethylene.
- I. RS: Rising stem.
- J. SWP: Steam working pressure.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 1. Include material descriptions and dimensions of individual components.
 2. Include operating characteristics and furnished accessories.

1.4 DELIVERY, STORAGE, AND HANDLING

- A. Prepare valves for shipping as follows:

1. Protect internal parts against rust and corrosion.
2. Protect threads, flange faces, grooved ends, press ends, solder ends, and weld ends.
3. Set ball valves open to minimize exposure of functional surfaces.
4. Set butterfly valves closed or slightly open.
5. Block check valves in either closed or open position.
6. Set gate valves closed to prevent rattling.
7. Set plug valves to open to minimize exposure of functional surfaces.

B. Use the following precautions during storage:

1. Maintain valve end protection.
2. Store valves indoors and maintain at higher than ambient dew point temperature. If outdoor storage is necessary, store valves off the ground in watertight enclosures.

C. Use sling to handle large valves; rig sling to avoid damage to exposed parts. Do not use operating handles or stems or other components as lifting or rigging points unless specifically indicated for this purpose in manufacturer's written instructions.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

- A. Obtain each type of valve from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. ASME Compliance:

1. ASME B1.20.1 for threads for threaded-end valves.
2. ASME B16.1 for flanges on iron valves.
3. ASME B16.5 for flanges on steel valves.
4. ASME B16.10 and ASME B16.34 for ferrous valve dimensions and design criteria.
5. ASME B16.18 for cast-copper solder-joint connections.
6. ASME B16.22 for wrought copper and copper-alloy solder-joint connections.
7. ASME B16.34 for flanged- and threaded-end connections.
8. ASME B16.51 for press joint connections.
9. ASME B31.1 for power piping valves.
10. ASME B31.9 for building services piping valves.

B. AWWA Compliance: Comply with AWWA C606 for grooved-end connections.

C. Provide bronze valves made with dezincification-resistant materials. Bronze valves made with copper alloy (brass) containing more than 15 percent zinc are unacceptable.

D. Valve Pressure-Temperature Ratings: Not less than indicated and as required for system pressures and temperatures.

E. Valve Sizes: Same as upstream piping unless otherwise indicated.

F. Valve Bypass and Drain Connections: MSS SP-45.

- G. Wrench: Furnish Owner with one wrench for every **[five][10]<Insert number>** plug valves, for each size square plug-valve head.
- H. Valve Actuator Type:
 - 1. Gear Actuator: For quarter-turn ball valves **[NPS 4 (DN 100)]<Insert pipe size>** and larger.
 - 2. Hand Lever: For quarter-turn ball valves smaller than **[NPS 4 (DN 100)]<Insert pipe size>**.
- I. Valves in Insulated Piping:
 - 1. Provide **2-inch (50-mm)** extended neck stems.
 - 2. Provide extended operating handles with nonthermal-conductive covering material and protective sleeves that allow operation of valves without breaking vapor seals or disturbing insulation.
 - 3. Provide memory stops that are fully adjustable after insulation is applied.

2.3 ANGLE VALVES

- A. Angle Valves, Threaded Ends - Bronze, Class 125:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[American Valve, Inc]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Hammond Valve]**
 - d. **[Milwaukee Valve Company]**
 - e. **[NIBCO INC.]**
 - f. **[WATTS; A Watts Water Technologies Company]**
 - g. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Valve, Inc]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Hammond Valve]**
 - d. **[Milwaukee Valve Company]**
 - e. **[NIBCO INC.]**
 - f. **[WATTS; A Watts Water Technologies Company]**
 - g. **<Insert manufacturer's name>**
 - 3. Standard: MSS SP-80, Type 1.
 - 4. CWP Rating: **200 psig (1380 kPa)**.
 - 5. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
 - 6. Ends: Threaded.
 - 7. Stem: Bronze.
 - 8. Disc: PTFE.
 - 9. Packing: Asbestos free.
 - 10. Handwheel: Malleable iron[, **bronze, or aluminum**].
- B. Angle Valves, Threaded Ends - Bronze, Class 150:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Crane Fluid Systems; Crane Co.]**
 - b. **[KITZ Corporation]**
 - c. **[Milwaukee Valve Company]**
 - d. **[Stockham; a Crane Co. brand]**
 - e. **[WATTS; A Watts Water Technologies Company]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Crane Fluid Systems; Crane Co.]**
 - b. **[KITZ Corporation]**
 - c. **[Milwaukee Valve Company]**
 - d. **[Stockham; a Crane Co. brand]**
 - e. **[WATTS; A Watts Water Technologies Company]**
 - f. **<Insert manufacturer's name>**
3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
6. Ends: Threaded.
7. Stem: Bronze.
8. Disc: PTFE or stainless steel. See Part 3 angle valve schedule articles.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[, **bronze, or aluminum**].

2.4 GLOBE VALVES

A. Globe Valves, Threaded or Soldered Ends - Bronze, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[FNW; Ferguson Enterprises, Inc.]**
 - d. **[Hammond Valve]**
 - e. **[KITZ Corporation]**
 - f. **[Milwaukee Valve Company]**
 - g. **[NIBCO INC.]**
 - h. **[Powell Valves]**
 - i. **[Red-White Valve Corp.]**
 - j. **[Stockham; a Crane Co. brand]**
 - k. **[WATTS; A Watts Water Technologies Company]**
 - l. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[FNW; Ferguson Enterprises, Inc.]**
 - d. **[Hammond Valve]**
 - e. **[KITZ Corporation]**
 - f. **[Milwaukee Valve Company]**
 - g. **[NIBCO INC.]**
 - h. **[Powell Valves]**
 - i. **[Red-White Valve Corp.]**
 - j. **[Stockham; a Crane Co. brand]**
 - k. **[WATTS; A Watts Water Technologies Company]**
 - l. **<Insert manufacturer's name>**
3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
6. Ends: Threaded or soldered. See Part 3 globe valve schedule articles.
7. Stem: Bronze.
8. Disc: PTFE.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[, **bronze, or aluminum**].

B. Globe Valves, Threaded Ends - Bronze, Class 150:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Hammond Valve]**
 - d. **[KITZ Corporation]**
 - e. **[Milwaukee Valve Company]**
 - f. **[NIBCO INC.]**
 - g. **[Powell Valves]**
 - h. **[Red-White Valve Corp.]**
 - i. **[Siemens Industry, Inc., Building Technologies Division]**
 - j. **[Valve Solutions, Inc.]**
 - k. **[WATTS; A Watts Water Technologies Company]**
 - l. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Hammond Valve]**
 - d. **[KITZ Corporation]**
 - e. **[Milwaukee Valve Company]**
 - f. **[NIBCO INC.]**

- g. [Powell Valves]
- h. [Red-White Valve Corp.]
- i. [Siemens Industry, Inc., Building Technologies Division]
- j. [Valve Solutions, Inc.]
- k. [WATTS; A Watts Water Technologies Company]
- l. <Insert manufacturer's name>

- 3. Standard: MSS SP-80, Type 2.
- 4. CWP Rating: **300 psig (2070 kPa)**.
- 5. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
- 6. Ends: Threaded.
- 7. Stem: Bronze.
- 8. Disc: PTFE or stainless steel. See Part 3 globe valve schedule articles.
- 9. Packing: Asbestos free.
- 10. Handwheel: Malleable iron[, **bronze, or aluminum**].

C. Globe Valves, Flanged Ends - Iron, Class 125:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Crane Fluid Systems; Crane Co.]
 - c. [FNW; Ferguson Enterprises, Inc.]
 - d. [Hammond Valve]
 - e. [Jenkins Valves; a Crane Co. brand]
 - f. [KITZ Corporation]
 - g. [Milwaukee Valve Company]
 - h. [NIBCO INC.]
 - i. [Powell Valves]
 - j. [Red-White Valve Corp.]
 - k. [Siemens Industry, Inc., Building Technologies Division]
 - l. [Stockham; a Crane Co. brand]
 - m. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Crane Fluid Systems; Crane Co.]
 - c. [FNW; Ferguson Enterprises, Inc.]
 - d. [Hammond Valve]
 - e. [Jenkins Valves; a Crane Co. brand]
 - f. [KITZ Corporation]
 - g. [Milwaukee Valve Company]
 - h. [NIBCO INC.]
 - i. [Powell Valves]
 - j. [Red-White Valve Corp.]
 - k. [Siemens Industry, Inc., Building Technologies Division]
 - l. [Stockham; a Crane Co. brand]
 - m. <Insert manufacturer's name>

3. Standard: MSS SP-85, Type I.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged.
7. Trim: Bronze.
8. Packing and Gasket: Asbestos free.
9. Operator: Handwheel or chainwheel.

D. Globe Valves, Flanged Ends - Iron, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Hammond Valve]**
 - d. **[Jenkins Valves; a Crane Co. brand]**
 - e. **[Milwaukee Valve Company]**
 - f. **[NIBCO INC.]**
 - g. **[Siemens Industry, Inc., Building Technologies Division]**
 - h. **[Stockham; a Crane Co. brand]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Hammond Valve]**
 - d. **[Jenkins Valves; a Crane Co. brand]**
 - e. **[Milwaukee Valve Company]**
 - f. **[NIBCO INC.]**
 - g. **[Siemens Industry, Inc., Building Technologies Division]**
 - h. **[Stockham; a Crane Co. brand]**
 - i. **<Insert manufacturer's name>**
3. Standard: MSS SP-85, Type I.
4. CWP Rating: **500 psig (3450 kPa)**.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged.
7. Trim: Bronze.
8. Packing and Gasket: Asbestos free.
9. Operator: Handwheel or chainwheel.

2.5 BALL VALVES

A. Ball Valves, Threaded Ends - Brass, One Piece:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. [KITZ Corporation]
 - b. [WATTS; A Watts Water Technologies Company]
 - c. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [KITZ Corporation]
 - b. [WATTS; A Watts Water Technologies Company]
 - c. <Insert manufacturer's name>
3. Standard: MSS SP-110.
4. CWP Rating: **400 psig (2760 kPa)**.
5. Body Design: One piece.
6. Body Material: Forged brass.
7. Ends: Threaded.
8. Seats: PTFE.
9. Stem: Brass.
10. Ball: Chrome-plated brass.
11. Port: Reduced.

B. Ball Valves, Threaded or Soldered Ends - Brass, Two Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [American Valve, Inc]
 - c. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - d. [Bray International, Inc.]
 - e. [Center Line; a Crane Co. brand]
 - f. [DynaQuip Controls]
 - g. [FNW; Ferguson Enterprises, Inc.]
 - h. [Hammond Valve]
 - i. [Jenkins Valves; a Crane Co. brand]
 - j. [Jomar Valve]
 - k. [KITZ Corporation]
 - l. [Lance Valves]
 - m. [Legend Valve & Fitting, Inc]
 - n. [Marwin Valve; Richards Industries]
 - o. [Milwaukee Valve Company]
 - p. [Red-White Valve Corp.]
 - q. [Siemens Industry, Inc., Building Technologies Division]
 - r. [Stockham; a Crane Co. brand]
 - s. [Viega LLC]
 - t. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [A.Y. McDonald Mfg. Co.]

- b. [American Valve, Inc]
 - c. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - d. [Bray International, Inc.]
 - e. [Center Line; a Crane Co. brand]
 - f. [DynaQuip Controls]
 - g. [FNW; Ferguson Enterprises, Inc.]
 - h. [Hammond Valve]
 - i. [Jenkins Valves; a Crane Co. brand]
 - j. [Jomar Valve]
 - k. [KITZ Corporation]
 - l. [Lance Valves]
 - m. [Legend Valve & Fitting, Inc]
 - n. [Marwin Valve; Richards Industries]
 - o. [Milwaukee Valve Company]
 - p. [Red-White Valve Corp.]
 - q. [Siemens Industry, Inc., Building Technologies Division]
 - r. [Stockham; a Crane Co. brand]
 - s. [Viega LLC]
 - t. <Insert manufacturer's name>
- 3. Standard: MSS SP-110.
 - 4. SWP Rating: **150 psig (1035 kPa)**.
 - 5. CWP Rating: **600 psig (4140 kPa)**.
 - 6. Body Design: Two piece.
 - 7. Body Material: Forged brass.
 - 8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
 - 9. Seats: PTFE.
 - 10. Stem: Brass.
 - 11. Ball: Chrome-plated brass.
 - 12. Port: Full.
- C. Ball Valves, Press Ends - Brass, Two Piece with Full Port and Brass Trim:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [American Valve, Inc]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Crane Fluid Systems; Crane Co.]
 - d. [FNW; Ferguson Enterprises, Inc.]
 - e. [Hammond Valve]
 - f. [Jenkins Valves; a Crane Co. brand]
 - g. [Jomar Valve]
 - h. [KITZ Corporation]
 - i. [Lance Valves]
 - j. [Legend Valve & Fitting, Inc]
 - k. [Milwaukee Valve Company]
 - l. [Red-White Valve Corp.]
 - m. [Stockham; a Crane Co. brand]
 - n. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [American Valve, Inc]
- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- c. [Crane Fluid Systems; Crane Co.]
- d. [FNW; Ferguson Enterprises, Inc.]
- e. [Hammond Valve]
- f. [Jenkins Valves; a Crane Co. brand]
- g. [Jomar Valve]
- h. [KITZ Corporation]
- i. [Lance Valves]
- j. [Legend Valve & Fitting, Inc]
- k. [Milwaukee Valve Company]
- l. [Red-White Valve Corp.]
- m. [Stockham; a Crane Co. brand]
- n. <Insert manufacturer's name>

- 3. Standards: MSS SP-110 and IAPMO/ANSI Z1157.
- 4. CWP Rating: **600 psig (4140 kPa)**.
- 5. Body Design: Two piece.
- 6. Body Material: Forged brass.
- 7. Ends: Press.
- 8. Seats: PTFE or RPTFE.
- 9. Stem: Brass.
- 10. Ball: Chrome-plated brass.
- 11. Port: Full.
- 12. O-Ring Seal: NBR or EPDM.

D. Ball Valves, Threaded or Soldered Ends - Brass, Two Piece with Full Port and Stainless Steel Trim:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. [A.Y. McDonald Mfg. Co.]
- b. [American Valve, Inc]
- c. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- d. [Crane Fluid Systems; Crane Co.]
- e. [DynaQuip Controls]
- f. [Flow-Tek; a subsidiary of Bray International]
- g. [FNW; Ferguson Enterprises, Inc.]
- h. [Hammond Valve]
- i. [Jamesbury; a brand of Valmet]
- j. [Jenkins Valves; a Crane Co. brand]
- k. [Jomar Valve]
- l. [KITZ Corporation]
- m. [Lance Valves]
- n. [Legend Valve & Fitting, Inc]
- o. [Marwin Valve; Richards Industries]
- p. [Milwaukee Valve Company]
- q. [Red-White Valve Corp.]
- r. [RuB Inc]
- s. [Siemens Industry, Inc., Building Technologies Division]
- t. [Stockham; a Crane Co. brand]
- u. [Viega LLC]
- v. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[A.Y. McDonald Mfg. Co.]**
- b. **[American Valve, Inc]**
- c. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
- d. **[Crane Fluid Systems; Crane Co.]**
- e. **[DynaQuip Controls]**
- f. **[Flow-Tek; a subsidiary of Bray International]**
- g. **[FNW; Ferguson Enterprises, Inc.]**
- h. **[Hammond Valve]**
- i. **[Jamesbury; a brand of Valmet]**
- j. **[Jenkins Valves; a Crane Co. brand]**
- k. **[Jomar Valve]**
- l. **[KITZ Corporation]**
- m. **[Lance Valves]**
- n. **[Legend Valve & Fitting, Inc]**
- o. **[Marwin Valve; Richards Industries]**
- p. **[Milwaukee Valve Company]**
- q. **[Red-White Valve Corp.]**
- r. **[RuB Inc]**
- s. **[Siemens Industry, Inc., Building Technologies Division]**
- t. **[Stockham; a Crane Co. brand]**
- u. **[Viega LLC]**
- v. **<Insert manufacturer's name>**

- 3. Standard: MSS SP-110.
- 4. SWP Rating: **150 psig (1035 kPa)**.
- 5. CWP Rating: **600 psig (4140 kPa)**.
- 6. Body Design: Two piece.
- 7. Body Material: Forged brass.
- 8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
- 9. Seats: PTFE.
- 10. Stem: Stainless steel.
- 11. Ball: Stainless steel, vented.
- 12. Port: Full.

E. Ball Valves, Press Ends - Brass, Two Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. **[American Valve, Inc]**
- b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
- c. **[Crane Fluid Systems; Crane Co.]**
- d. **[FNW; Ferguson Enterprises, Inc.]**
- e. **[Hammond Valve]**
- f. **[Jomar Valve]**
- g. **[KITZ Corporation]**
- h. **[Lance Valves]**
- i. **[Legend Valve & Fitting, Inc]**
- j. **[Milwaukee Valve Company]**
- k. **[NIBCO INC.]**

- l. [Red-White Valve Corp.]
 - m. [RuB Inc]
 - n. [Stockham; a Crane Co. brand]
 - o. [Viega LLC]
 - p. [WATTS; A Watts Water Technologies Company]
 - q. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [American Valve, Inc]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Crane Fluid Systems; Crane Co.]
 - d. [FNW; Ferguson Enterprises, Inc.]
 - e. [Hammond Valve]
 - f. [Jomar Valve]
 - g. [KITZ Corporation]
 - h. [Lance Valves]
 - i. [Legend Valve & Fitting, Inc]
 - j. [Milwaukee Valve Company]
 - k. [NIBCO INC.]
 - l. [Red-White Valve Corp.]
 - m. [RuB Inc]
 - n. [Stockham; a Crane Co. brand]
 - o. [Viega LLC]
 - p. [WATTS; A Watts Water Technologies Company]
 - q. <Insert manufacturer's name>
 - 3. Standards: MSS SP-110 and IAPMO/ANSI Z1157.
 - 4. CWP Rating: Minimum **200 psig (1380 kPa)**.
 - 5. Body Design: Two piece.
 - 6. Body Material: Forged brass.
 - 7. Ends: Press.
 - 8. Press-End Connections Rating: Minimum **200 psig (1380 kPa)**.
 - 9. Seats: PTFE or RPTFE.
 - 10. Stem: Stainless steel.
 - 11. Ball: Stainless steel, vented.
 - 12. Port: Full.
 - 13. O-Ring Seal: NBR or EPDM.
- F. Ball Valves, Threaded or Soldered Ends - Brass, Two Piece with Regular Port and Brass Trim:
- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [American Valve, Inc]
 - c. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - d. [Center Line; a Crane Co. brand]
 - e. [FNW; Ferguson Enterprises, Inc.]
 - f. [Hammond Valve]
 - g. [Jamesbury; a brand of Valmet]

- h. [Jomar Valve]
 - i. [KITZ Corporation]
 - j. [Lance Valves]

 - r. [Viega LLC]
 - s. [WATTS; A Watts Water Technologies Company]
 - t. <Insert manufacturer's name>
- 3. Standard: MSS SP-110.
- 4. SWP Rating: **150 psig (1035 kPa)**.
- 5. CWP Rating: **600 psig (4140 kPa)**.
- 6. Body Design: Two piece.
- 7. Body Material: Forged brass.
- 8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
- 9. Seats: PTFE.
- 10. Stem: Brass.
- 11. Ball: Chrome-plated brass.
- 12. Port: Regular.
- G. Ball Valves, Threaded or Soldered Ends - Brass, Two Piece with Regular Port and Stainless Steel Trim:
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [A.Y. McDonald Mfg. Co.]
 - b. [American Valve, Inc]
 - c. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - d. [Center Line; a Crane Co. brand]
 - e. [FNW; Ferguson Enterprises, Inc.]
 - f. [Hammond Valve]
 - g. [Jomar Valve]
 - h. [KITZ Corporation]
 - i. [Lance Valves]
 - j. [Legend Valve & Fitting, Inc]
 - k. [Marwin Valve; Richards Industries]
 - l. [Milwaukee Valve Company]
 - m. [Red-White Valve Corp.]
 - n. [Siemens Industry, Inc., Building Technologies Division]
 - o. [Stockham; a Crane Co. brand]
 - p. [Viega LLC]
 - q. [WATTS; A Watts Water Technologies Company]
 - r. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [American Valve, Inc]
 - c. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - d. [Center Line; a Crane Co. brand]
 - e. [FNW; Ferguson Enterprises, Inc.]
 - f. [Hammond Valve]
 - g. [Jomar Valve]
 - h. [KITZ Corporation]
 - i. [Lance Valves]
 - j. [Legend Valve & Fitting, Inc]
 - k. [Marwin Valve; Richards Industries]
 - l. [Milwaukee Valve Company]
 - m. [Red-White Valve Corp.]
 - n. [Siemens Industry, Inc., Building Technologies Division]
 - o. [Stockham; a Crane Co. brand]
 - p. [Viega LLC]
 - q. [WATTS; A Watts Water Technologies Company]
 - r. <Insert manufacturer's name>
3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Two piece.
7. Body Material: Brass or bronze.
8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
9. Seats: PTFE.
10. Stem: Stainless steel.
11. Ball: Stainless steel, vented.
12. Port: Regular.

H. Ball Valves, Threaded or Soldered Ends - Brass, Three Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bray International, Inc.]**
 - b. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bray International, Inc.]**
 - b. **<Insert manufacturer's name>**
 3. Standard: MSS SP-110.
 4. SWP Rating: **150 psig (1035 kPa)**.
 5. CWP Rating: **600 psig (4140 kPa)**.
 6. Body Design: Three piece.
 7. Body Material: Forged brass.
 8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
 9. Seats: PTFE.
 10. Stem: Brass.
 11. Ball: Chrome-plated brass.
 12. Port: Full.
- I. Ball Valves, Threaded or Soldered Ends - Brass, Three Piece with Full Port and Stainless Steel Trim:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bray International, Inc.]**
 - b. **[DynaQuip Controls]**
 - c. **[Marwin Valve; Richards Industries]**
 - d. **[WATTS; A Watts Water Technologies Company]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bray International, Inc.]**
 - b. **[DynaQuip Controls]**
 - c. **[Marwin Valve; Richards Industries]**
 - d. **[WATTS; A Watts Water Technologies Company]**
 - e. **<Insert manufacturer's name>**
 3. Standard: MSS SP-110.
 4. SWP Rating: **150 psig (1035 kPa)**.
 5. CWP Rating: **600 psig (4140 kPa)**.
 6. Body Design: Three piece.
 7. Body Material: Forged brass.
 8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
 9. Seats: PTFE.

10. Stem: Stainless steel.
11. Ball: Stainless steel, vented.
12. Port: Full.

J. Ball Valves, Threaded Ends - Bronze, One Piece with Bronze Trim:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[NIBCO INC.]**
 - b. **[WATTS; A Watts Water Technologies Company]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[NIBCO INC.]**
 - b. **[WATTS; A Watts Water Technologies Company]**
 - c. **<Insert manufacturer's name>**
3. Standard: MSS SP-110.
4. CWP Rating: **400 psig (2760 kPa)**.
5. Body Design: One piece.
6. Body Material: Bronze.
7. Ends: Threaded.
8. Seats: PTFE.
9. Stem: Bronze.
10. Ball: Chrome-plated brass.
11. Port: Reduced.

K. Ball Valves, Threaded Ends - Bronze, One Piece with Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[NIBCO INC.]**
 - b. **[WATTS; A Watts Water Technologies Company]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[NIBCO INC.]**
 - b. **[WATTS; A Watts Water Technologies Company]**
 - c. **<Insert manufacturer's name>**
3. Standard: MSS SP-110.
4. CWP Rating: **600 psig (4140 kPa)**.
5. Body Design: One piece.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

6. Body Material: Bronze.
 7. Ends: Threaded.
 8. Seats: PTFE.
 9. Stem: Stainless steel.
 10. Ball: Stainless steel, vented.
 11. Port: Reduced.
- L. Ball Valves, Threaded or Soldered Ends - Bronze, Two Piece with Full Port and Bronze or Brass Trim:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[DynaQuip Controls]**
 - d. **[FNW; Ferguson Enterprises, Inc.]**
 - e. **[Hammond Valve]**
 - f. **[Jenkins Valves; a Crane Co. brand]**
 - g. **[Milwaukee Valve Company]**
 - h. **[NIBCO INC.]**
 - i. **[Red-White Valve Corp.]**
 - j. **[Stockham; a Crane Co. brand]**
 - k. **[Zurn Industries, LLC]**
 - l. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[DynaQuip Controls]**
 - d. **[FNW; Ferguson Enterprises, Inc.]**
 - e. **[Hammond Valve]**
 - f. **[Jenkins Valves; a Crane Co. brand]**
 - g. **[Milwaukee Valve Company]**
 - h. **[NIBCO INC.]**
 - i. **[Red-White Valve Corp.]**
 - j. **[Stockham; a Crane Co. brand]**
 - k. **[Zurn Industries, LLC]**
 - l. **<Insert manufacturer's name>**
 3. Standard: MSS SP-110.
 4. SWP Rating: **150 psig (1035 kPa)**.
 5. CWP Rating: **600 psig (4140 kPa)**.
 6. Body Design: Two piece.
 7. Body Material: Bronze.
 8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
 9. Seats: PTFE.
 10. Stem: Bronze.
 11. Ball: Chrome-plated brass.
 12. Port: Full.
- M. Ball Valves, Press Ends - Bronze, Two Piece with Full Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Center Line; a Crane Co. brand]**
 - c. **[Hammond Valve]**
 - d. **[Milwaukee Valve Company]**
 - e. **[NIBCO INC.]**
 - f. **[Red-White Valve Corp.]**
 - g. **[Stockham; a Crane Co. brand]**
 - h. **[Viega LLC]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Center Line; a Crane Co. brand]**
 - c. **[Hammond Valve]**
 - d. **[Milwaukee Valve Company]**
 - e. **[NIBCO INC.]**
 - f. **[Red-White Valve Corp.]**
 - g. **[Stockham; a Crane Co. brand]**
 - h. **[Viega LLC]**
 - i. **<Insert manufacturer's name>**
3. Standards: MSS SP-110 and IAPMO/ANSI Z1157.
4. CWP Rating: Minimum **200 psig (1380 kPa)**.
5. Body Design: Two piece.
6. Body Material: Bronze.
7. Ends: Press.
8. Press-End Connections Rating: Minimum **200 psig (1380 kPa)**.
9. Seats: PTFE or RPTFE.
10. Stem: Bronze or brass.
11. Ball: Chrome-plated brass.
12. Port: Full.
13. O-Ring Seal: EPDM or NBR.

N. Ball Valves, Threaded or Soldered Ends - Bronze, Two Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[DynaQuip Controls]**
 - d. **[Hammond Valve]**
 - e. **[Jenkins Valves; a Crane Co. brand]**
 - f. **[Milwaukee Valve Company]**
 - g. **[NIBCO INC.]**

- h. **[Red-White Valve Corp.]**
 - i. **[Stockham; a Crane Co. brand]**
 - j. **[Viega LLC]**
 - k. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[DynaQuip Controls]**
 - d. **[Hammond Valve]**
 - e. **[Jenkins Valves; a Crane Co. brand]**
 - f. **[Milwaukee Valve Company]**
 - g. **[NIBCO INC.]**
 - h. **[Red-White Valve Corp.]**
 - i. **[Stockham; a Crane Co. brand]**
 - j. **[Viega LLC]**
 - k. **<Insert manufacturer's name>**
- 3. Standard: MSS SP-110.
- 4. SWP Rating: **150 psig (1035 kPa)**.
- 5. CWP Rating: **600 psig (4140 kPa)**.
- 6. Body Design: Two piece.
- 7. Body Material: Bronze.
- 8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
- 9. Seats: PTFE.
- 10. Stem: Stainless steel.
- 11. Ball: Stainless steel, vented.
- 12. Port: Full.
- O. Ball Valves, Threaded Ends - Bronze, Two Piece with Regular Port and Bronze or Brass Trim:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[American Valve, Inc]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[Center Line; a Crane Co. brand]**
 - d. **[DynaQuip Controls]**
 - e. **[Hammond Valve]**
 - f. **[Jenkins Valves; a Crane Co. brand]**
 - g. **[Jomar Valve]**
 - h. **[Lance Valves]**
 - i. **[Milwaukee Valve Company]**
 - j. **[NIBCO INC.]**
 - k. **[Red-White Valve Corp.]**
 - l. **[Stockham; a Crane Co. brand]**
 - m. **[Viega LLC]**
 - n. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the

following:

- a. [American Valve, Inc]
- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- c. [Center Line; a Crane Co. brand]
- d. [DynaQuip Controls]
- e. [Hammond Valve]
- f. [Jenkins Valves; a Crane Co. brand]
- g. [Jomar Valve]
- h. [Lance Valves]
- i. [Milwaukee Valve Company]
- j. [NIBCO INC.]
- k. [Red-White Valve Corp.]
- l. [Stockham; a Crane Co. brand]
- m. [Viega LLC]
- n. <Insert manufacturer's name>

- 3. Standard: MSS SP-110.
- 4. SWP Rating: **150 psig (1035 kPa)**.
- 5. CWP Rating: **600 psig (4140 kPa)**.
- 6. Body Design: Two piece.
- 7. Body Material: Bronze.
- 8. Ends: Threaded.
- 9. Seats: PTFE.
- 10. Stem: Bronze.
- 11. Ball: Chrome-plated brass.
- 12. Port: Regular.

P. Ball Valves, Threaded Ends - Bronze, Two Piece with Regular Port and Stainless Steel Trim:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Center Line; a Crane Co. brand]
 - c. [DynaQuip Controls]
 - d. [Hammond Valve]
 - e. [Jenkins Valves; a Crane Co. brand]
 - f. [Jomar Valve]
 - g. [Milwaukee Valve Company]
 - h. [NIBCO INC.]
 - i. [Red-White Valve Corp.]
 - j. [Stockham; a Crane Co. brand]
 - k. [Viega LLC]
 - l. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Center Line; a Crane Co. brand]
 - c. [DynaQuip Controls]

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- d. [Hammond Valve]
- e. [Jenkins Valves; a Crane Co. brand]
- f. [Jomar Valve]
- g. [Milwaukee Valve Company]
- h. [NIBCO INC.]
- i. [Red-White Valve Corp.]
- j. [Stockham; a Crane Co. brand]
- k. [Viega LLC]
- l. <Insert manufacturer's name>

- 3. Standard: MSS SP-110.
- 4. SWP Rating: **150 psig (1035 kPa)**.
- 5. CWP Rating: **600 psig (4140 kPa)**.
- 6. Body Design: Two piece.
- 7. Body Material: Bronze.
- 8. Ends: Threaded.
- 9. Seats: PTFE.
- 10. Stem: Stainless steel.
- 11. Ball: Stainless steel, vented.
- 12. Port: Regular.

Q. Ball Valves, Threaded Ends - Bronze, Three Piece with Full Port and Bronze or Brass Trim:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [WATTS; A Watts Water Technologies Company]
 - c. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [WATTS; A Watts Water Technologies Company]
 - c. <Insert manufacturer's name>
- 3. Standard: MSS SP-110.
- 4. SWP Rating: **150 psig (1035 kPa)**.
- 5. CWP Rating: **600 psig (4140 kPa)**.
- 6. Body Design: Three piece.
- 7. Body Material: Bronze.
- 8. Ends: Threaded.
- 9. Seats: PTFE.
- 10. Stem: Bronze.
- 11. Ball: Chrome-plated brass.
- 12. Port: Full.

R. Ball Valves, Threaded Ends - Bronze, Three Piece with Full Port and Stainless Steel Trim:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- b. [DynaQuip Controls]
- c. [NIBCO INC.]
- d. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- b. [DynaQuip Controls]
- c. [NIBCO INC.]
- d. <Insert manufacturer's name>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Three piece.
7. Body Material: Bronze.
8. Ends: Threaded.
9. Seats: PTFE.
10. Stem: Stainless steel.
11. Ball: Stainless steel, vented.
12. Port: Full.

- S. Ball Valves, Threaded or Soldered Ends - Bronze, Three Piece with Regular Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- b. [NIBCO INC.]
- c. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- b. [NIBCO INC.]
- c. <Insert manufacturer's name>

3. Standards: MSS SP-110 and MSS SP-145.
4. CWP Rating: **600 psig (4140 kPa)**.
5. Body Design: Three piece.
6. Body Material: Bronze.
7. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
8. Seats: PTFE.
9. Stem: Bronze.
10. Ball: Chrome-plated brass.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

11. Port: Regular.
- T. Ball Valves, Threaded or Soldered Ends - Bronze, Three Piece with Regular Port and Stainless Steel Trim:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[NIBCO INC.]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[NIBCO INC.]**
 - c. **<Insert manufacturer's name>**
 3. Standard: MSS SP-110.
 4. SWP Rating: **150 psig (1035 kPa)**.
 5. CWP Rating: **600 psig (4140 kPa)**.
 6. Body Design: Three piece.
 7. Body Material: Bronze.
 8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
 9. Seats: PTFE.
 10. Stem: Stainless steel.
 11. Ball: Stainless steel, vented.
 12. Port: Regular.
- U. Ball Valves, Flanged Ends - Steel, with Full Port and Stainless Steel Trim, Class 150:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Bray International, Inc.]**
 - c. **[DynaQuip Controls]**
 - d. **[FNW; Ferguson Enterprises, Inc.]**
 - e. **[Hammond Valve]**
 - f. **[Jamesbury; a brand of Valmet]**
 - g. **[Jomar Valve]**
 - h. **[Lance Valves]**
 - i. **[Max-Air Technology Inc.]**
 - j. **[Milwaukee Valve Company]**
 - k. **[NIBCO INC.]**
 - l. **[Stockham; a Crane Co. brand]**
 - m. **[Viega LLC]**
 - n. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
- b. **[Bray International, Inc.]**
- c. **[DynaQuip Controls]**
- d. **[FNW; Ferguson Enterprises, Inc.]**
- e. **[Hammond Valve]**
- f. **[Jamesbury; a brand of Valmet]**
- g. **[Jomar Valve]**
- h. **[Lance Valves]**
- i. **[Max-Air Technology Inc.]**
- j. **[Milwaukee Valve Company]**
- k. **[NIBCO INC.]**
- l. **[Stockham; a Crane Co. brand]**
- m. **[Viega LLC]**
- n. **<Insert manufacturer's name>**

- 3. Standard: MSS SP-72.
- 4. CWP Rating: **285 psig (1964 kPa)**.
- 5. Body Design: Split body.
- 6. Body Material: Carbon steel, ASTM A216/A216M, Type WCB.
- 7. Ends: Flanged.
- 8. Seats: PTFE.
- 9. Stem: Stainless steel.
- 10. Ball: Stainless steel, vented.
- 11. Port: Full.

V. Ball Valves, Flanged Ends - Steel, with Full Port and Stainless Steel Trim, Class 300:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
- b. **[Bray International, Inc.]**
- c. **[DynaQuip Controls]**
- d. **[FNW; Ferguson Enterprises, Inc.]**
- e. **[Hammond Valve]**
- f. **[Jamesbury; a brand of Valmet]**
- g. **[Jomar Valve]**
- h. **[Lance Valves]**
- i. **[Milwaukee Valve Company]**
- j. **[NIBCO INC.]**
- k. **[Stockham; a Crane Co. brand]**
- l. **[Viega LLC]**
- m. **[WATTS; A Watts Water Technologies Company]**
- n. **<Insert manufacturer's name>**

- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**

- b. [Bray International, Inc.]
 - c. [DynaQuip Controls]
 - d. [FNW; Ferguson Enterprises, Inc.]
 - e. [Hammond Valve]
 - f. [Jamesbury; a brand of Valmet]
 - g. [Jomar Valve]
 - h. [Lance Valves]
 - i. [Milwaukee Valve Company]
 - j. [NIBCO INC.]
 - k. [Stockham; a Crane Co. brand]
 - l. [Viega LLC]
 - m. [WATTS; A Watts Water Technologies Company]
 - n. <Insert manufacturer's name>
- 3. Standard: MSS SP-72.
 - 4. CWP Rating: **720 psig (4960 kPa)**.
 - 5. Body Design: Split body.
 - 6. Body Material: Carbon steel, ASTM A216/A216M, Type WCB.
 - 7. Ends: Flanged.
 - 8. Seats: PTFE.
 - 9. Stem: Stainless steel.
 - 10. Ball: Stainless steel, vented.
 - 11. Port: Full.

W. Ball Valves, Flanged Ends - Iron, Class 125:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [American Valve, Inc]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Sure Flow Equipment Inc]
 - d. [WATTS; A Watts Water Technologies Company]
 - e. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [American Valve, Inc]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Sure Flow Equipment Inc]
 - d. [WATTS; A Watts Water Technologies Company]
 - e. <Insert manufacturer's name>
- 3. Standard: MSS SP-72.
- 4. CWP Rating: **200 psig (1380 kPa)**.
- 5. Body Design: Split body.
- 6. Body Material: ASTM A126, gray iron.
- 7. Ends: Flanged.
- 8. Seats: PTFE.
- 9. Stem: Stainless steel.
- 10. Ball: Stainless steel.
- 11. Port: Full.

X. Ball Valves, Threaded or Flanged Ends - Stainless Steel, Two Piece with Full Port:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[Bray International, Inc.]**
 - d. **[FNW; Ferguson Enterprises, Inc.]**
 - e. **[Guardian Worldwide LLC.]**
 - f. **[Hammond Valve]**
 - g. **[Jomar Valve]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[Bray International, Inc.]**
 - d. **[FNW; Ferguson Enterprises, Inc.]**
 - e. **[Guardian Worldwide LLC.]**
 - f. **[Hammond Valve]**
 - g. **[Jomar Valve]**
 - h. **<Insert manufacturer's name>**
3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1030 kPa)**.
5. WOG Rating: **1000 psig (6895 kPa)**.
6. Body Design: Split body.
7. Body Material: Type 316 stainless steel.
8. Ends: Threaded or flanged. See Part 3 ball valve schedule articles.
9. Seats: PTFE.
10. Stem: Type 316 stainless steel.
11. Ball: Type 316 stainless steel.
12. Port: Full.

Y. Ball Valves - CPVC, Union Type:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[American Valve, Inc]**
 - b. **[Asahi/America]**
 - c. **[Colonial Engineering, Inc.]**
 - d. **[GF Piping Systems: Georg Fischer LLC]**
 - e. **[Hayward Flow Control; Hayward Industries, Inc.]**
 - f. **[IPEX USA LLC]**
 - g. **[Jomar Valve]**
 - h. **[Red-White Valve Corp.]**

- i. [Spears Manufacturing Company]
 - j. [Thermoplastic Valves, Inc]
 - k. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [American Valve, Inc]
 - b. [Asahi/America]
 - c. [Colonial Engineering, Inc.]
 - d. [GF Piping Systems: Georg Fischer LLC]
 - e. [Hayward Flow Control; Hayward Industries, Inc.]
 - f. [IPEX USA LLC]
 - g. [Jomar Valve]
 - h. [Red-White Valve Corp.]
 - i. [Spears Manufacturing Company]
 - j. [Thermoplastic Valves, Inc]
 - k. <Insert manufacturer's name>
3. Standard: MSS SP-122.
4. Pressure Rating and Temperature: **125 psig (860 kPa), 150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
5. Body Material: CPVC.
6. Body Design: Union type.
7. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 ball valve schedule articles.
8. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable socket, socket or threaded, threaded, or flanged. See Part 3 ball valve schedule articles.
9. Ball: CPVC; full port.
10. Seals: PTFE or EPDM-rubber O-rings.
11. Handle: Tee shaped.
- Z. Ball Valves - CPVC, Non-Union Type:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
- a. [American Valve, Inc]
 - b. [Asahi/America]
 - c. [Colonial Engineering, Inc.]
 - d. [IPEX USA LLC]
 - e. [Jomar Valve]
 - f. [Red-White Valve Corp.]
 - g. [Spears Manufacturing Company]
 - h. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [American Valve, Inc]
 - b. [Asahi/America]
 - c. [Colonial Engineering, Inc.]

- d. [IPEX USA LLC]
- e. [Jomar Valve]
- f. [Red-White Valve Corp.]
- g. [Spears Manufacturing Company]
- h. <Insert manufacturer's name>

- 3. Standard: MSS SP-122.
- 4. Pressure Rating and Temperature: **125 psig (860 kPa), 150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
- 5. Body Material: CPVC.
- 6. Body Design: Non-union type.
- 7. End Connections: Socket or threaded.
- 8. Ball: CPVC; full or reduced port.
- 9. Seals: PTFE or EPDM-rubber O-rings.
- 10. Handle: Tee shaped.

AA. Ball Valves - PVC, Union Type:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [American Valve, Inc]
 - b. [Asahi/America]
 - c. [Colonial Engineering, Inc.]
 - d. [GF Piping Systems: Georg Fischer LLC]
 - e. [Hayward Flow Control; Hayward Industries, Inc.]
 - f. [IPEX USA LLC]
 - g. [Jomar Valve]
 - h. [Red-White Valve Corp.]
 - i. [Spears Manufacturing Company]
 - j. [Thermoplastic Valves, Inc]
 - k. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [American Valve, Inc]
 - b. [Asahi/America]
 - c. [Colonial Engineering, Inc.]
 - d. [GF Piping Systems: Georg Fischer LLC]
 - e. [Hayward Flow Control; Hayward Industries, Inc.]
 - f. [IPEX USA LLC]
 - g. [Jomar Valve]
 - h. [Red-White Valve Corp.]
 - i. [Spears Manufacturing Company]
 - j. [Thermoplastic Valves, Inc]
 - k. <Insert manufacturer's name>
- 3. Standard: MSS SP-122.
- 4. Pressure Rating and Temperature: **125 psig (860 kPa), 150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
- 5. Body Material: PVC.

6. Body Design: Union type.
7. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 ball valve schedule articles.
8. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable union with socket, socket or threaded, threaded, or flanged. See Part 3 ball valve schedule articles.
9. Ball: PVC; full port.
10. Seals: PTFE or EPDM-rubber O-rings.
11. Handle: Tee shaped.

BB. Ball Valves - PVC, Non-Union Type:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[American Valve, Inc]**
 - b. **[Asahi/America]**
 - c. **[Colonial Engineering, Inc.]**
 - d. **[IPEX USA LLC]**
 - e. **[Jomar Valve]**
 - f. **[Red-White Valve Corp.]**
 - g. **[Spears Manufacturing Company]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Valve, Inc]**
 - b. **[Asahi/America]**
 - c. **[Colonial Engineering, Inc.]**
 - d. **[IPEX USA LLC]**
 - e. **[Jomar Valve]**
 - f. **[Red-White Valve Corp.]**
 - g. **[Spears Manufacturing Company]**
 - h. **<Insert manufacturer's name>**
3. Standard: MSS SP-122.
4. Pressure Rating and Temperature: **125 psig (860 kPa), 150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
5. Body Material: PVC.
6. Body Design: Non-union type.
7. End Connections: Socket or threaded.
8. Ball: PVC; full or reduced port.
9. Seals: PTFE or EPDM-rubber O-rings.
10. Handle: Tee shaped.

2.6 BUTTERFLY VALVES

A. Butterfly Valves, Single Flange (Lug Type) - Iron, with Aluminum-Bronze Disc:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

- a. [ABZ Valve; an ASC Engineered Solution]
- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- c. [Bray International, Inc.]
- d. [Center Line; a Crane Co. brand]
- e. [DeZURIK]
- f. [DynaQuip Controls]
- g. [Flo Fab Inc]
- h. [Hammond Valve]
- i. [Jamesbury; a brand of Valmet]
- j. [Jenkins Valves; a Crane Co. brand]
- k. [Jomar Valve]
- l. [Kennedy Valve Company; a division of McWane, Inc.]
- m. [KITZ Corporation]
- n. [Lance Valves]
- o. [Legend Valve & Fitting, Inc]
- p. [Milwaukee Valve Company]
- q. [Mueller Steam Specialty; A Watts Water Technologies Company]
- r. [NIBCO INC.]
- s. [Norriseal]
- t. [Red-White Valve Corp.]
- u. [Stockham; a Crane Co. brand]
- v. [Sure Flow Equipment Inc]
- w. [Viega LLC]
- x. [Zurn Industries, LLC]
- y. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [ABZ Valve; an ASC Engineered Solution]
- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- c. [Bray International, Inc.]
- d. [Center Line; a Crane Co. brand]
- e. [DeZURIK]
- f. [DynaQuip Controls]
- g. [Flo Fab Inc]
- h. [Hammond Valve]
- i. [Jamesbury; a brand of Valmet]
- j. [Jenkins Valves; a Crane Co. brand]
- k. [Jomar Valve]
- l. [Kennedy Valve Company; a division of McWane, Inc.]
- m. [KITZ Corporation]
- n. [Lance Valves]
- o. [Legend Valve & Fitting, Inc]
- p. [Milwaukee Valve Company]
- q. [Mueller Steam Specialty; A Watts Water Technologies Company]
- r. [NIBCO INC.]
- s. [Norriseal]
- t. [Red-White Valve Corp.]
- u. [Stockham; a Crane Co. brand]
- v. [Sure Flow Equipment Inc]
- w. [Viega LLC]

- x. [Zurn Industries, LLC]
 - y. <Insert manufacturer's name>
- 3. Standard: MSS SP-67, Type I.
 - 4. CWP Rating: **150 psig (1035 kPa) or 200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
 - 5. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
 - 6. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
 - 7. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
 - 8. Stem: One- or two-piece stainless steel.
 - 9. Disc: Aluminum bronze.
- B. Butterfly Valves, Single Flange (Lug Type) - Iron, with Ductile-Iron Disc:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [ABZ Valve; an ASC Engineered Solution]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Bray International, Inc.]
 - d. [Center Line; a Crane Co. brand]
 - e. [DeZURIK]
 - f. [DynaQuip Controls]
 - g. [Flo Fab Inc]

3. Standard: MSS SP-67, Type I.
4. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
5. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
6. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
7. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
8. Stem: One- or two-piece stainless steel.
9. Disc: Stainless steel.
- G. Butterfly Valves, Grooved End - Ductile Iron, 175 CWP:
- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the

following]:

- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [ASC Engineered Solutions]
 - c. [Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America]
 - d. [Hammond Valve]
 - e. [Kennedy Valve Company; a division of McWane, Inc.]
 - f. [NIBCO INC.]
 - g. [Norriseal]
 - h. [Red-White Valve Corp.]
 - i. [Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]
 - j. [Victaulic Company]
 - k. [Zurn Industries, LLC]
 - l. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [ASC Engineered Solutions]
 - c. [Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America]
 - d. [Hammond Valve]
 - e. [Kennedy Valve Company; a division of McWane, Inc.]
 - f. [NIBCO INC.]
 - g. [Norriseal]
 - h. [Red-White Valve Corp.]
 - i. [Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]
 - j. [Victaulic Company]
 - k. [Zurn Industries, LLC]
 - l. <Insert manufacturer's name>
3. Standard: MSS SP-67, Type I.
 4. CWP Rating: **175 psig (1200 kPa)**.
 5. Body Material: Coated, ductile iron.
 6. Ends: Grooved.
 7. Stem: Two-piece stainless steel.
 8. Disc: Coated, ductile iron.
 9. Seat: EPDM.

H. Butterfly Valves, Grooved End - Ductile Iron, 300 CWP:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [ASC Engineered Solutions]
 - c. [Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America]

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- d. [Hammond Valve]
 - e. [Kennedy Valve Company; a division of McWane, Inc.]
 - f. [NIBCO INC.]
 - g. [Norriseal]
 - h. [Red-White Valve Corp.]
 - i. [Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]
 - j. [Victaulic Company]
 - k. [WATTS; A Watts Water Technologies Company]
 - l. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [ASC Engineered Solutions]
 - c. [Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America]
 - d. [Hammond Valve]
 - e. [Kennedy Valve Company; a division of McWane, Inc.]
 - f. [NIBCO INC.]
 - g. [Norriseal]
 - h. [Red-White Valve Corp.]
 - i. [Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]
 - j. [Victaulic Company]
 - k. [WATTS; A Watts Water Technologies Company]
 - l. <Insert manufacturer's name>
3. Standard: MSS SP-67, Type I.
4. NPS 8 (DN 50) and Smaller CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: Coated, ductile iron
6. Ends: Grooved.
7. Stem: Two-piece stainless steel.
8. Disc: Coated, ductile iron.
9. Seat: EPDM.
- I. Butterfly Valves, Single Flange (Lug Type) - High Performance, Class 150:
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [ASC Engineered Solutions]
 - c. [Bray International, Inc.]
 - d. [DeZURIK]
 - e. [Flowseal; Crane Energy Flow Solutions]
 - f. [Hammond Valve]
 - g. [Jamesbury; a brand of Valmet]
 - h. [Lance Valves]
 - i. [Milwaukee Valve Company]
 - j. [Stockham; a Crane Co. brand]
 - k. [XOMOX; Crane ChemPharma & Energy]

- I. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [ASC Engineered Solutions]
 - c. [Bray International, Inc.]
 - d. [DeZURIK]
 - e. [Flowseal; Crane Energy Flow Solutions]
 - f. [Hammond Valve]
 - g. [Jamesbury; a brand of Valmet]
 - h. [Lance Valves]
 - i. [Milwaukee Valve Company]
 - j. [Stockham; a Crane Co. brand]
 - k. [XOMOX; Crane ChemPharma & Energy]
 - l. <Insert manufacturer's name>
3. Standard: MSS SP-68.
4. CWP Rating: **285 psig (1965 kPa) at 100 deg F (38 deg C).**
5. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
6. Body Material: Carbon or stainless steel. See Part 3 butterfly valve schedule articles.
7. Seat: Reinforced PTFE or metal.
8. Stem: Stainless steel; offset from seat plane.
9. Disc: Type 316 stainless steel.
10. Service: Bidirectional.
- J. Butterfly Valves, Single Flange (Lug Type) - High Performance, Class 300:
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [ABZ Valve; an ASC Engineered Solution]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Bray International, Inc.]
 - d. [DeZURIK]
 - e. [Flowseal; Crane Energy Flow Solutions]
 - f. [Hammond Valve]
 - g. [Jamesbury; a brand of Valmet]
 - h. [Milwaukee Valve Company]
 - i. [NIBCO INC.]
 - j. [Process Development & Control, Inc.]
 - k. [Stockham; a Crane Co. brand]
 - l. [XOMOX; Crane ChemPharma & Energy]
 - m. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABZ Valve; an ASC Engineered Solution]

- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Bray International, Inc.]
 - d. [DeZURIK]
 - e. [Flowseal; Crane Energy Flow Solutions]
 - f. [Hammond Valve]
 - g. [Jamesbury; a brand of Valmet]
 - h. [Milwaukee Valve Company]
 - i. [NIBCO INC.]
 - j. [Process Development & Control, Inc.]
 - k. [Stockham; a Crane Co. brand]
 - l. [XOMOX; Crane ChemPharma & Energy]
 - m. <Insert manufacturer's name>
- 3. Standard: MSS SP-68.
 - 4. CWP Rating: **720 psig (4965 kPa) at 100 deg F (38 deg C).**
 - 5. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
 - 6. Body Material: Carbon or stainless steel. See Part 3 butterfly valve schedule articles.
 - 7. Seat: Reinforced PTFE or metal.
 - 8. Stem: Stainless steel; offset from seat plane.
 - 9. Disc: Type 316 stainless steel.
 - 10. Service: Bidirectional.

2.7 CHECK VALVES

A. Check Valves, Lift Type, Threaded Ends - Bronze, with Bronze Disc, Class 125:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [American Valve, Inc]
 - c. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - d. [Crane Fluid Systems; Crane Co.]
 - e. [Flomatic Valves; Flomatic Corporation]
 - f. [Jenkins Valves; a Crane Co. brand]
 - g. [Jomar Valve]
 - h. [Keckley Company]
 - i. [Metraflex Company (The)]
 - j. [Milwaukee Valve Company]
 - k. [NIBCO INC.]
 - l. [Stockham; a Crane Co. brand]
 - m. [Val-Matic Valve & Manufacturing Corp.]
 - n. [Victaulic Company]
 - o. [WATTS; A Watts Water Technologies Company]
 - p. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [A.Y. McDonald Mfg. Co.]
 - b. [American Valve, Inc]

- c. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- d. [Crane Fluid Systems; Crane Co.]
- e. [Flomatic Valves; Flomatic Corporation]
- f. [Jenkins Valves; a Crane Co. brand]
- g. [Jomar Valve]
- h. [Keckley Company]
- i. [Metraflex Company (The)]
- j. [Milwaukee Valve Company]
- k. [NIBCO INC.]
- l. [Stockham; a Crane Co. brand]
- m. [Val-Matic Valve & Manufacturing Corp.]
- n. [VICTAULIC Company]
- o. [WATTS; A Watts Water Technologies Company]
- p. <Insert manufacturer's name>

- 3. Standard: MSS SP-80, Type 1.
- 4. CWP Rating: **200 psig (1380 kPa)**.
- 5. Body Design: Vertical flow.
- 6. Body Material: ASTM B61 or ASTM B62, bronze.
- 7. Ends: Threaded.
- 8. Disc: Bronze.

B. Check Valves, Lift Type, Threaded Ends - Bronze, with Nonmetallic Disc, Class 125:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [Crane Fluid Systems; Crane Co.]
 - b. [Jenkins Valves; a Crane Co. brand]
 - c. [Jomar Valve]
 - d. [Keckley Company]
 - e. [Lance Valves]
 - f. [Milwaukee Valve Company]
 - g. [NIBCO INC.]
 - h. [Red-White Valve Corp.]
 - i. [Shurjoint; a part of Aalberts Integrated Piping Systems]
 - j. [Stockham; a Crane Co. brand]
 - k. [Val-Matic Valve & Manufacturing Corp.]
 - l. [VICTAULIC Company]
 - m. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [Crane Fluid Systems; Crane Co.]
 - b. [Jenkins Valves; a Crane Co. brand]
 - c. [Jomar Valve]
 - d. [Keckley Company]
 - e. [Lance Valves]
 - f. [Milwaukee Valve Company]
 - g. [NIBCO INC.]
 - h. [Red-White Valve Corp.]

- i. [Shurjoint; a part of Aalberts Integrated Piping Systems]
 - j. [Stockham; a Crane Co. brand]
 - k. [Val-Matic Valve & Manufacturing Corp.]
 - l. [Victaulic Company]
 - m. <Insert manufacturer's name>
- 3. Standard: MSS SP-80, Type 2.
 - 4. CWP Rating: **200 psig (1380 kPa)**.
 - 5. Body Design: Vertical flow.
 - 6. Body Material: ASTM B61 or ASTM B62, bronze.
 - 7. Ends: Threaded.
 - 8. Disc: NBR or PTFE.
- C. Check Valves, Swing Type, Threaded Ends - Bronze, with Bronze Disc, Class 125:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Crane Fluid Systems; Crane Co.]
 - c. [Jenkins Valves; a Crane Co. brand]
 - d. [Jomar Valve]
 - e. [Keckley Company]
 - f. [Lance Valves]
 - g. [Milwaukee Valve Company]
 - h. [NIBCO INC.]
 - i. [Red-White Valve Corp.]
 - j. [Shurjoint; a part of Aalberts Integrated Piping Systems]
 - k. [Stockham; a Crane Co. brand]
 - l. [Val-Matic Valve & Manufacturing Corp.]
 - m. [Victaulic Company]
 - n. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Crane Fluid Systems; Crane Co.]
 - c. [Jenkins Valves; a Crane Co. brand]
 - d. [Jomar Valve]
 - e. [Keckley Company]
 - f. [Lance Valves]
 - g. [Milwaukee Valve Company]
 - h. [NIBCO INC.]
 - i. [Red-White Valve Corp.]
 - j. [Shurjoint; a part of Aalberts Integrated Piping Systems]
 - k. [Stockham; a Crane Co. brand]
 - l. [Val-Matic Valve & Manufacturing Corp.]
 - m. [Victaulic Company]
 - n. <Insert manufacturer's name>
 - 3. Standard: MSS SP-80, Type 3.
 - 4. CWP Rating: **200 psig (1380 kPa)**.

5. Body Design: Horizontal flow.
6. Body Material: ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: Bronze.

D. Check Valves, Swing Type, Threaded Ends - Bronze, with Nonmetallic Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Jenkins Valves; a Crane Co. brand]**
 - d. **[Jomar Valve]**
 - e. **[Keckley Company]**
 - f. **[Lance Valves]**
 - g. **[Milwaukee Valve Company]**
 - h. **[NIBCO INC.]**
 - i. **[Powell Valves]**
 - j. **[Red-White Valve Corp.]**
 - k. **[Stockham; a Crane Co. brand]**
 - l. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Jenkins Valves; a Crane Co. brand]**
 - d. **[Jomar Valve]**
 - e. **[Keckley Company]**
 - f. **[Lance Valves]**
 - g. **[Milwaukee Valve Company]**
 - h. **[NIBCO INC.]**
 - i. **[Powell Valves]**
 - j. **[Red-White Valve Corp.]**
 - k. **[Stockham; a Crane Co. brand]**
 - l. **<Insert manufacturer's name>**
3. Standard: MSS SP-80, Type 4.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Design: Horizontal flow.
6. Body Material: ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: PTFE.

E. Check Valves, Swing Type, Threaded Ends - Bronze, with Bronze Disc, Class 150:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. [A.Y. McDonald Mfg. Co.]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Crane Fluid Systems; Crane Co.]
 - d. [Hammond Valve]
 - e. [Jenkins Valves; a Crane Co. brand]
 - f. [Jomar Valve]
 - g. [Lance Valves]
 - h. [Legend Valve & Fitting, Inc]
 - i. [Milwaukee Valve Company]
 - j. [NIBCO INC.]
 - k. [Powell Valves]
 - l. [Red-White Valve Corp.]
 - m. [Stockham; a Crane Co. brand]
 - n. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [A.Y. McDonald Mfg. Co.]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Crane Fluid Systems; Crane Co.]
 - d. [Hammond Valve]
 - e. [Jenkins Valves; a Crane Co. brand]
 - f. [Jomar Valve]
 - g. [Lance Valves]
 - h. [Legend Valve & Fitting, Inc]
 - i. [Milwaukee Valve Company]
 - j. [NIBCO INC.]
 - k. [Powell Valves]
 - l. [Red-White Valve Corp.]
 - m. [Stockham; a Crane Co. brand]
 - n. <Insert manufacturer's name>
3. Standard: MSS SP-80, Type 3.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Design: Horizontal flow.
6. Body Material: ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: Bronze.

F. Check Valves, Swing Type, Threaded Ends - Bronze, with Nonmetallic Disc, Class 150:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [Crane Fluid Systems; Crane Co.]
 - b. [Jenkins Valves; a Crane Co. brand]
 - c. [Jomar Valve]
 - d. [Lance Valves]
 - e. [Milwaukee Valve Company]
 - f. [NIBCO INC.]
 - g. [Powell Valves]
 - h. [Red-White Valve Corp.]

- i. **[Stockham; a Crane Co. brand]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Crane Fluid Systems; Crane Co.]**
 - b. **[Jenkins Valves; a Crane Co. brand]**
 - c. **[Jomar Valve]**
 - d. **[Lance Valves]**
 - e. **[Milwaukee Valve Company]**
 - f. **[NIBCO INC.]**
 - g. **[Powell Valves]**
 - h. **[Red-White Valve Corp.]**
 - i. **[Stockham; a Crane Co. brand]**
 - j. **<Insert manufacturer's name>**
3. Standard: MSS SP-80, Type 4.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Design: Horizontal flow.
6. Body Material: ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: PTFE.

G. Check Valves, Swing Type, Press Ends - Bronze:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems]**
 - d. **[Hammond Valve]**
 - e. **[Legend Valve & Fitting, Inc]**
 - f. **[Milwaukee Valve Company]**
 - g. **[NIBCO INC.]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems]**
 - d. **[Hammond Valve]**
 - e. **[Legend Valve & Fitting, Inc]**
 - f. **[Milwaukee Valve Company]**
 - g. **[NIBCO INC.]**
 - h. **<Insert manufacturer's name>**
3. Standard: MSS SP-80.

4. CWP Rating: Minimum **200 psig (1380 kPa)**.
5. Body Design: Horizontal flow.
6. Body Material: ASTM B584, bronze.
7. Ends: Press.
8. Press Ends Connection Rating: Minimum **200 psig (1380 kPa)**.
9. Disc: Brass or bronze.

H. Check Valves, Swing Type, Flanged Ends - Iron, with Metal Seats, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Anvil; an ASC Engineered Solution]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[Bray International, Inc.]**
 - d. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - e. **[Cooper Valves]**
 - f. **[Crane Fluid Systems; Crane Co.]**
 - g. **[DeZURIK]**
 - h. **[FNW; Ferguson Enterprises, Inc.]**
 - i. **[GA Industries, Inc]**
 - j. **[Hammond Valve]**
 - k. **[Jenkins Valves; a Crane Co. brand]**
 - l. **[Jomar Valve]**
 - m. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - n. **[KITZ Corporation]**
 - o. **[Lance Valves]**
 - p. **[Milwaukee Valve Company]**
 - q. **[Powell Valves]**
 - r. **[Victaulic Company]**
 - s. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Anvil; an ASC Engineered Solution]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[Bray International, Inc.]**
 - d. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - e. **[Cooper Valves]**
 - f. **[Crane Fluid Systems; Crane Co.]**
 - g. **[DeZURIK]**
 - h. **[FNW; Ferguson Enterprises, Inc.]**
 - i. **[GA Industries, Inc]**
 - j. **[Hammond Valve]**
 - k. **[Jenkins Valves; a Crane Co. brand]**
 - l. **[Jomar Valve]**
 - m. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - n. **[KITZ Corporation]**
 - o. **[Lance Valves]**
 - p. **[Milwaukee Valve Company]**
 - q. **[Powell Valves]**
 - r. **[Victaulic Company]**

s. <Insert manufacturer's name>

3. Standard: MSS SP-71, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa).**
6. Body Design: Clear or full waterway.
7. Body Material: ASTM A126, gray iron with bolted bonnet.
8. Ends: Flanged.
9. Trim: Bronze.
10. Gasket: Asbestos free.

I. Check Valves, Swing Type, Flanged Ends - Iron, with Nonmetallic-to-Metal Seats, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Bray International, Inc.]**
 - b. **[Cooper Valves]**
 - c. **[Crane Fluid Systems; Crane Co.]**
 - d. **[DeZURIK]**
 - e. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - f. **[KITZ Corporation]**
 - g. **[Lance Valves]**
 - h. **[Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]**
 - i. **[Victaulic Company]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bray International, Inc.]**
 - b. **[Cooper Valves]**
 - c. **[Crane Fluid Systems; Crane Co.]**
 - d. **[DeZURIK]**
 - e. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - f. **[KITZ Corporation]**
 - g. **[Lance Valves]**
 - h. **[Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]**
 - i. **[Victaulic Company]**
 - j. **<Insert manufacturer's name>**
3. Standard: MSS SP-71, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa).**
6. Body Design: Clear or full waterway.
7. Body Material: ASTM A126, gray iron with bolted bonnet.
8. Ends: Flanged.
9. Trim: Composition.
10. Seat Ring: Bronze.
11. Disc Holder: Bronze.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- 12. Disc: PTFE.
- 13. Gasket: Asbestos free.

J. Check Valves, Swing Type, Flanged Ends - Iron, with Metal Seats, Class 250:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Bray International, Inc.]**
 - c. **[Cooper Valves]**
 - d. **[Crane Fluid Systems; Crane Co.]**
 - e. **[Crispin Valve]**
 - f. **[DeZURIK]**
 - g. **[FNW; Ferguson Enterprises, Inc.]**
 - h. **[GA Industries, Inc]**
 - i. **[Hammond Valve]**
 - j. **[Jenkins Valves; a Crane Co. brand]**
 - k. **[KITZ Corporation]**
 - l. **[Lance Valves]**
 - m. **[Milwaukee Valve Company]**
 - n. **[Powell Valves]**
 - o. **[Victaulic Company]**
 - p. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Bray International, Inc.]**
 - c. **[Cooper Valves]**
 - d. **[Crane Fluid Systems; Crane Co.]**
 - e. **[Crispin Valve]**
 - f. **[DeZURIK]**
 - g. **[FNW; Ferguson Enterprises, Inc.]**
 - h. **[GA Industries, Inc]**
 - i. **[Hammond Valve]**
 - j. **[Jenkins Valves; a Crane Co. brand]**
 - k. **[KITZ Corporation]**
 - l. **[Lance Valves]**
 - m. **[Milwaukee Valve Company]**
 - n. **[Powell Valves]**
 - o. **[Victaulic Company]**
 - p. **<Insert manufacturer's name>**
- 3. Standard: MSS SP-71, Type I.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa).**
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa).**
- 6. Body Design: Clear or full waterway.
- 7. Body Material: ASTM A126, gray iron with bolted bonnet.
- 8. Ends: Flanged.
- 9. Trim: Bronze.
- 10. Gasket: Asbestos free.

K. Check Valves, Swing Type, Flanged Ends - Iron, with Lever- and Spring-Closure Control, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Bray International, Inc.]**
 - c. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - d. **[Cooper Valves]**
 - e. **[Crispin Valve]**
 - f. **[DeZURIK]**
 - g. **[GA Industries, Inc]**
 - h. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Bray International, Inc.]**
 - c. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - d. **[Cooper Valves]**
 - e. **[Crispin Valve]**
 - f. **[DeZURIK]**
 - g. **[GA Industries, Inc]**
 - h. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - i. **<Insert manufacturer's name>**
3. Standard: MSS SP-71, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Clear or full waterway.
7. Body Material: ASTM A126, gray iron with bolted bonnet.
8. Ends: Flanged.
9. Trim: Bronze.
10. Gasket: Asbestos free.
11. Closure Control: Factory-installed, exterior lever and spring.

L. Check Valves, Swing Type, Flanged Ends - Iron, with Lever- and Weight-Closure Control, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[ASC Engineered Solutions]**
 - c. **[Bray International, Inc.]**
 - d. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - e. **[Cooper Valves]**
 - f. **[Crispin Valve]**
 - g. **[DeZURIK]**

- h. **[GA Industries, Inc]**
 - i. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - j. **[Milwaukee Valve Company]**
 - k. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[ASC Engineered Solutions]**
 - c. **[Bray International, Inc.]**
 - d. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - e. **[Cooper Valves]**
 - f. **[Crispin Valve]**
 - g. **[DeZURIK]**
 - h. **[GA Industries, Inc]**
 - i. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - j. **[Milwaukee Valve Company]**
 - k. **<Insert manufacturer's name>**
 - 3. Standard: MSS SP-71, Type I.
 - 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
 - 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
 - 6. Body Design: Clear or full waterway.
 - 7. Body Material: ASTM A126, gray iron with bolted bonnet.
 - 8. Ends: Flanged.
 - 9. Trim: Bronze.
 - 10. Gasket: Asbestos free.
 - 11. Closure Control: Factory-installed, exterior lever and weight.
- M. Check Valves, Swing Type, Grooved End - Iron, 300 CWP:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Anvil; an ASC Engineered Solution]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[ASC Engineered Solutions]**
 - d. **[DeZURIK]**
 - e. **[Shurjoint; a part of Aalberts Integrated Piping Systems]**
 - f. **[Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]**
 - g. **[Victaulic Company]**
 - h. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Anvil; an ASC Engineered Solution]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[ASC Engineered Solutions]**
 - d. **[DeZURIK]**

- e. [Shurjoint; a part of Aalberts Integrated Piping Systems]
 - f. [Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]
 - g. [Victaulic Company]
 - h. <Insert manufacturer's name>
- 3. CWP Rating: **300 psig (2070 kPa)**.
 - 4. Body Material: ASTM A536, ductile iron.
 - 5. Seat: EPDM.
 - 6. Disc: Spring operated, ductile iron or stainless steel.

N. Check Valves, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 125:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [Anvil; an ASC Engineered Solution]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Cooper Valves]
 - d. [Crispin Valve]
 - e. [DeZURIK]
 - f. [DFT Inc.]
 - g. [Flomatic Valves; Flomatic Corporation]
 - h. [GA Industries, Inc]
 - i. [Keckley Company]
 - j. [KITZ Corporation]
 - k. [Metraflex Company (The)]
 - l. [Milwaukee Valve Company]
 - m. [Val-Matic Valve & Manufacturing Corp.]
 - n. [Victaulic Company]
 - o. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [Anvil; an ASC Engineered Solution]
 - b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - c. [Cooper Valves]
 - d. [Crispin Valve]
 - e. [DeZURIK]
 - f. [DFT Inc.]
 - g. [Flomatic Valves; Flomatic Corporation]
 - h. [GA Industries, Inc]
 - i. [Keckley Company]
 - j. [KITZ Corporation]
 - k. [Metraflex Company (The)]
 - l. [Milwaukee Valve Company]
 - m. [Val-Matic Valve & Manufacturing Corp.]
 - n. [Victaulic Company]
 - o. <Insert manufacturer's name>
- 3. Standard: MSS SP-125.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa).**
6. Body Material: ASTM A126, gray iron.
7. Style: Compact wafer.
8. Seat: Bronze.

O. Check Valves, Center Guided - Iron, Globe, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ASC Engineered Solutions]**
 - b. **[Crispin Valve]**
 - c. **[DFT Inc.]**
 - d. **[Flomatic Valves; Flomatic Corporation]**
 - e. **[GA Industries, Inc]**
 - f. **[KITZ Corporation]**
 - g. **[Metraflex Company (The)]**
 - h. **[Milwaukee Valve Company]**
 - i. **[Val-Matic Valve & Manufacturing Corp.]**
 - j. **[WATTS; A Watts Water Technologies Company]**
 - k. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ASC Engineered Solutions]**
 - b. **[Crispin Valve]**
 - c. **[DFT Inc.]**
 - d. **[Flomatic Valves; Flomatic Corporation]**
 - e. **[GA Industries, Inc]**
 - f. **[KITZ Corporation]**
 - g. **[Metraflex Company (The)]**
 - h. **[Milwaukee Valve Company]**
 - i. **[Val-Matic Valve & Manufacturing Corp.]**
 - j. **[WATTS; A Watts Water Technologies Company]**
 - k. **<Insert manufacturer's name>**
3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa).**
6. Body Material: ASTM A126, gray iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: Bronze.

P. Check Valves, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. [Anvil; an ASC Engineered Solution]
- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- c. [Cooper Valves]
- d. [Crispin Valve]
- e. [DeZURIK]
- f. [DFT Inc.]
- g. [Flomatic Valves; Flomatic Corporation]
- h. [GA Industries, Inc]
- i. [Keckley Company]
- j. [KITZ Corporation]
- k. [Metraflex Company (The)]
- l. [Victaulic Company]
- m. [WATTS; A Watts Water Technologies Company]
- n. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Anvil; an ASC Engineered Solution]
- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- c. [Cooper Valves]
- d. [Crispin Valve]
- e. [DeZURIK]
- f. [DFT Inc.]
- g. [Flomatic Valves; Flomatic Corporation]
- h. [GA Industries, Inc]
- i. [Keckley Company]
- j. [KITZ Corporation]
- k. [Metraflex Company (The)]
- l. [Victaulic Company]
- m. [WATTS; A Watts Water Technologies Company]
- n. <Insert manufacturer's name>

- 3. Standard: MSS SP-125.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
- 6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
- 7. Style: Compact wafer.
- 8. Seat: Bronze.

- Q. Check Valves, Center Guided - Iron, Globe, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Crispin Valve]
- b. [DFT Inc.]
- c. [Flomatic Valves; Flomatic Corporation]
- d. [GA Industries, Inc]
- e. [KITZ Corporation]
- f. [Metraflex Company (The)]
- g. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Crispin Valve]**
 - b. **[DFT Inc.]**
 - c. **[Flomatic Valves; Flomatic Corporation]**
 - d. **[GA Industries, Inc]**
 - e. **[KITZ Corporation]**
 - f. **[Metraflex Company (The)]**
 - g. **<Insert manufacturer's name>**
3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa).**
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: Bronze.

R. Check Valves, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Anvil; an ASC Engineered Solution]**
 - b. **[Cooper Valves]**
 - c. **[DeZURIK]**
 - d. **[DFT Inc.]**
 - e. **[Flomatic Valves; Flomatic Corporation]**
 - f. **[Keckley Company]**
 - g. **[Metraflex Company (The)]**
 - h. **[Val-Matic Valve & Manufacturing Corp.]**
 - i. **[Victaulic Company]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Anvil; an ASC Engineered Solution]**
 - b. **[Cooper Valves]**
 - c. **[DeZURIK]**
 - d. **[DFT Inc.]**
 - e. **[Flomatic Valves; Flomatic Corporation]**
 - f. **[Keckley Company]**
 - g. **[Metraflex Company (The)]**
 - h. **[Val-Matic Valve & Manufacturing Corp.]**
 - i. **[Victaulic Company]**
 - j. **<Insert manufacturer's name>**
3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa).**

6. Body Material: ASTM A126, gray iron.
7. Style: Compact wafer, spring loaded.
8. Seat: Bronze.

S. Check Valves, Center Guided - Iron, Globe, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[DFT Inc.]**
 - b. **[Flomatic Valves; Flomatic Corporation]**
 - c. **[Metraflex Company (The)]**
 - d. **[Val-Matic Valve & Manufacturing Corp.]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[DFT Inc.]**
 - b. **[Flomatic Valves; Flomatic Corporation]**
 - c. **[Metraflex Company (The)]**
 - d. **[Val-Matic Valve & Manufacturing Corp.]**
 - e. **<Insert manufacturer's name>**
3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Material: ASTM A126, gray iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: Bronze.

T. Check Valves, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Anvil; an ASC Engineered Solution]**
 - b. **[Cooper Valves]**
 - c. **[Crispin Valve]**
 - d. **[DFT Inc.]**
 - e. **[Flomatic Valves; Flomatic Corporation]**
 - f. **[Keckley Company]**
 - g. **[Metraflex Company (The)]**
 - h. **[Victaulic Company]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- a. [Anvil; an ASC Engineered Solution]
 - b. [Cooper Valves]
 - c. [Crispin Valve]
 - d. [DFT Inc.]
 - e. [Flomatic Valves; Flomatic Corporation]
 - f. [Keckley Company]
 - g. [Metraflex Company (The)]
 - h. [Victaulic Company]
 - i. <Insert manufacturer's name>
3. Standard: MSS SP-125.
 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
 6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
 7. Style: Compact wafer, spring loaded.
 8. Seat: Bronze.
- U. Check Valves, Center Guided - Iron, Globe, with Metal Seat, Class 300:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Crispin Valve]
 - b. [DFT Inc.]
 - c. [Metraflex Company (The)]
 - d. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Crispin Valve]
 - b. [DFT Inc.]
 - c. [Metraflex Company (The)]
 - d. <Insert manufacturer's name>
 3. Standard: MSS SP-125.
 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
 6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
 7. Style: Globe, spring loaded.
 8. Ends: Flanged.
 9. Seat: Bronze.
- V. Check Valves, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 125:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Cooper Valves]
 - c. [DeZURIK]

- d. [DFT Inc.]
- e. [Flomatic Valves; Flomatic Corporation]
- f. [Val-Matic Valve & Manufacturing Corp.]
- g. [Victaulic Company]
- h. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- b. [Cooper Valves]
- c. [DeZURIK]
- d. [DFT Inc.]
- e. [Flomatic Valves; Flomatic Corporation]
- f. [Val-Matic Valve & Manufacturing Corp.]
- g. [Victaulic Company]
- h. <Insert manufacturer's name>

- 3. Standard: MSS SP-125.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa).**
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa).**
- 6. Body Material: ASTM A126, gray iron.
- 7. Style: Compact wafer.
- 8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

W. Check Valves, Center Guided - Iron, Globe, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [DFT Inc.]
- b. [Flomatic Valves; Flomatic Corporation]
- c. [Val-Matic Valve & Manufacturing Corp.]
- d. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [DFT Inc.]
- b. [Flomatic Valves; Flomatic Corporation]
- c. [Val-Matic Valve & Manufacturing Corp.]
- d. <Insert manufacturer's name>

- 3. Standard: MSS SP-125.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa).**
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa).**
- 6. Body Material: ASTM A126, gray iron.
- 7. Style: Globe, spring loaded.
- 8. Ends: Flanged.
- 9. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

- X. Check Valves, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 150:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Cooper Valves]**
 - b. **[DeZURIK]**
 - c. **[DFT Inc.]**
 - d. **[Flomatic Valves; Flomatic Corporation]**
 - e. **[GA Industries, Inc]**
 - f. **[Val-Matic Valve & Manufacturing Corp.]**
 - g. **[VICTAULIC Company]**
 - h. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Cooper Valves]**
 - b. **[DeZURIK]**
 - c. **[DFT Inc.]**
 - d. **[Flomatic Valves; Flomatic Corporation]**
 - e. **[GA Industries, Inc]**
 - f. **[Val-Matic Valve & Manufacturing Corp.]**
 - g. **[VICTAULIC Company]**
 - h. **<Insert manufacturer's name>**
 3. Standard: MSS SP-125.
 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
 6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
 7. Style: Compact wafer.
 8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.
- Y. Check Valves, Center Guided - Iron, Globe, with Resilient Seat, Class 150:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[DFT Inc.]**
 - b. **[Flomatic Valves; Flomatic Corporation]**
 - c. **[Val-Matic Valve & Manufacturing Corp.]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[DFT Inc.]**
 - b. **[Flomatic Valves; Flomatic Corporation]**
 - c. **[Val-Matic Valve & Manufacturing Corp.]**
 - d. **<Insert manufacturer's name>**

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa).**
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

Z. Check Valves, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Cooper Valves]**
 - b. **[DeZURIK]**
 - c. **[DFT Inc.]**
 - d. **[Flomatic Valves; Flomatic Corporation]**
 - e. **[Val-Matic Valve & Manufacturing Corp.]**
 - f. **[Victaulic Company]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Cooper Valves]**
 - b. **[DeZURIK]**
 - c. **[DFT Inc.]**
 - d. **[Flomatic Valves; Flomatic Corporation]**
 - e. **[Val-Matic Valve & Manufacturing Corp.]**
 - f. **[Victaulic Company]**
 - g. **<Insert manufacturer's name>**
3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa).**
6. Body Material: ASTM A126, gray iron.
7. Style: Compact wafer, spring loaded.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

AA. Check Valves, Center Guided - Iron, Globe, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[DFT Inc.]**
 - b. **[Flomatic Valves; Flomatic Corporation]**
 - c. **[Val-Matic Valve & Manufacturing Corp.]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[DFT Inc.]**
 - b. **[Flomatic Valves; Flomatic Corporation]**
 - c. **[Val-Matic Valve & Manufacturing Corp.]**
 - d. **<Insert manufacturer's name>**
3. Standard: MSS SP-125.
 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
 6. Body Material: ASTM A126, gray iron.
 7. Style: Globe, spring loaded.
 8. Ends: Flanged.
 9. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

BB. Check Valves, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Cooper Valves]**
 - b. **[DeZURIK]**
 - c. **[DFT Inc.]**
 - d. **[Flomatic Valves; Flomatic Corporation]**
 - e. **[Victaulic Company]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Cooper Valves]**
 - b. **[DeZURIK]**
 - c. **[DFT Inc.]**
 - d. **[Flomatic Valves; Flomatic Corporation]**
 - e. **[Victaulic Company]**
 - f. **<Insert manufacturer's name>**
3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Compact wafer, spring loaded.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

CC. Check Valves, Center Guided - Iron, Globe, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[DFT Inc.]**

- b. [Flomatic Valves; Flomatic Corporation]
- c. [Shurjoint; a part of Aalberts Integrated Piping Systems]
- d. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [DFT Inc.]
- b. [Flomatic Valves; Flomatic Corporation]
- c. [Shurjoint; a part of Aalberts Integrated Piping Systems]
- d. <Insert manufacturer's name>

- 3. Standard: MSS SP-125.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa).**
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa).**
- 6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
- 7. Style: Globe, spring loaded.
- 8. Ends: Flanged.
- 9. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

DD. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [ABZ Valve; an ASC Engineered Solution]
- b. [Anvil; an ASC Engineered Solution]
- c. [Bray International, Inc.]
- d. [DeZURIK]
- e. [Flomatic Valves; Flomatic Corporation]
- f. [Jomar Valve]
- g. [Keckley Company]
- h. [Lance Valves]
- i. [Legend Valve & Fitting, Inc]
- j. [Metraflex Company (The)]
- k. [Shurjoint; a part of Aalberts Integrated Piping Systems]
- l. [Stockham; a Crane Co. brand]
- m. [Sure Flow Equipment Inc]
- n. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [ABZ Valve; an ASC Engineered Solution]
- b. [Anvil; an ASC Engineered Solution]
- c. [Bray International, Inc.]
- d. [DeZURIK]
- e. [Flomatic Valves; Flomatic Corporation]
- f. [Jomar Valve]
- g. [Keckley Company]
- h. [Lance Valves]

- i. [Legend Valve & Fitting, Inc]
 - j. [Metraflex Company (The)]
 - k. [Shurjoint; a part of Aalberts Integrated Piping Systems]
 - l. [Stockham; a Crane Co. brand]
 - m. [Sure Flow Equipment Inc]
 - n. <Insert manufacturer's name>
- 3. Standard: API 594.
 - 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
 - 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
 - 6. Body Design: Wafer, spring-loaded plates.
 - 7. Body Material: ASTM A126, gray iron.
 - 8. Seat: Bronze.

EE. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 150:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [ABZ Valve; an ASC Engineered Solution]
 - b. [Anvil; an ASC Engineered Solution]
 - c. [Bray International, Inc.]
 - d. [DeZURIK]
 - e. [Jomar Valve]
 - f. [Keckley Company]
 - g. [Lance Valves]
 - h. [Legend Valve & Fitting, Inc]
 - i. [Metraflex Company (The)]
 - j. [Stockham; a Crane Co. brand]
 - k. [Sure Flow Equipment Inc]
 - l. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [ABZ Valve; an ASC Engineered Solution]
 - b. [Anvil; an ASC Engineered Solution]
 - c. [Bray International, Inc.]
 - d. [DeZURIK]
 - e. [Jomar Valve]
 - f. [Keckley Company]
 - g. [Lance Valves]
 - h. [Legend Valve & Fitting, Inc]
 - i. [Metraflex Company (The)]
 - j. [Stockham; a Crane Co. brand]
 - k. [Sure Flow Equipment Inc]
 - l. <Insert manufacturer's name>
- 3. Standard: API 594.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
- 6. Body Design: Wafer, spring-loaded plates.
- 7. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.

8. Seat: Bronze.

FF. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABZ Valve; an ASC Engineered Solution]**
 - b. **[Anvil; an ASC Engineered Solution]**
 - c. **[Bray International, Inc.]**
 - d. **[Keckley Company]**
 - e. **[Stockham; a Crane Co. brand]**
 - f. **[Sure Flow Equipment Inc]**
 - g. **[Val-Matic Valve & Manufacturing Corp.]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABZ Valve; an ASC Engineered Solution]**
 - b. **[Anvil; an ASC Engineered Solution]**
 - c. **[Bray International, Inc.]**
 - d. **[Keckley Company]**
 - e. **[Stockham; a Crane Co. brand]**
 - f. **[Sure Flow Equipment Inc]**
 - g. **[Val-Matic Valve & Manufacturing Corp.]**
 - h. **<Insert manufacturer's name>**
3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A126, gray iron.
8. Seat: Bronze.

GG. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABZ Valve; an ASC Engineered Solution]**
 - b. **[Anvil; an ASC Engineered Solution]**
 - c. **[Bray International, Inc.]**
 - d. **[Keckley Company]**
 - e. **[Shurjoint; a part of Aalberts Integrated Piping Systems]**
 - f. **[Sure Flow Equipment Inc]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the

following:

- a. **[ABZ Valve; an ASC Engineered Solution]**
 - b. **[Anvil; an ASC Engineered Solution]**
 - c. **[Bray International, Inc.]**
 - d. **[Keckley Company]**
 - e. **[Shurjoint; a part of Aalberts Integrated Piping Systems]**
 - f. **[Sure Flow Equipment Inc]**
 - g. **<Insert manufacturer's name>**
3. Standard: API 594.
 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
 6. Body Design: Wafer, spring-loaded plates.
 7. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
 8. Seat: Bronze.

HH. Check Valves, Single-Plate Type - Iron, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[GA Industries, Inc]**
 - b. **[Jomar Valve]**
 - c. **[Keckley Company]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[GA Industries, Inc]**
 - b. **[Jomar Valve]**
 - c. **[Keckley Company]**
 - d. **<Insert manufacturer's name>**
3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Wafer, single spring-loaded plate.
7. Body Material: ASTM A126, gray iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

II. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bray International, Inc.]**
 - b. **[Flomatic Valves; Flomatic Corporation]**
 - c. **[Keckley Company]**
 - d. **[Stockham; a Crane Co. brand]**

- e. [Sure Flow Equipment Inc]
- f. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [Bray International, Inc.]
- b. [Flomatic Valves; Flomatic Corporation]
- c. [Keckley Company]
- d. [Stockham; a Crane Co. brand]
- e. [Sure Flow Equipment Inc]
- f. <Insert manufacturer's name>

- 3. Standard: API 594.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
- 6. Body Design: Wafer, spring-loaded plates.
- 7. Body Material: ASTM A126, gray iron.
- 8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

JJ. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. [Bray International, Inc.]
- b. [DeZURIK]
- c. [Keckley Company]
- d. [Stockham; a Crane Co. brand]
- e. [Sure Flow Equipment Inc]
- f. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [Bray International, Inc.]
- b. [DeZURIK]
- c. [Keckley Company]
- d. [Stockham; a Crane Co. brand]
- e. [Sure Flow Equipment Inc]
- f. <Insert manufacturer's name>

- 3. Standard: API 594.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
- 6. Body Design: Wafer, spring-loaded plates.
- 7. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
- 8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

KK. Check Valves, Single-Plate Type - Iron, with Resilient Seat, Class 250:

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[GA Industries, Inc]**
 - b. **[Jomar Valve]**
 - c. **[Keckley Company]**
 - d. **[Victaulic Company]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[GA Industries, Inc]**
 - b. **[Jomar Valve]**
 - c. **[Keckley Company]**
 - d. **[Victaulic Company]**
 - e. **<Insert manufacturer's name>**
 3. Standard: API 594.
 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
 6. Body Design: Wafer, single spring-loaded plate.
 7. Body Material: ASTM A126, gray iron.
 8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.
- LL. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 250:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Jomar Valve]**
 - b. **[Keckley Company]**
 - c. **[Stockham; a Crane Co. brand]**
 - d. **[Sure Flow Equipment Inc]**
 - e. **[Val-Matic Valve & Manufacturing Corp.]**
 - f. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Jomar Valve]**
 - b. **[Keckley Company]**
 - c. **[Stockham; a Crane Co. brand]**
 - d. **[Sure Flow Equipment Inc]**
 - e. **[Val-Matic Valve & Manufacturing Corp.]**
 - f. **<Insert manufacturer's name>**
 3. Standard: API 594.
 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.

6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A126, gray iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

MM. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Keckley Company]**
 - b. **[Shurjoint; a part of Aalberts Integrated Piping Systems]**
 - c. **[Sure Flow Equipment Inc]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Keckley Company]**
 - b. **[Shurjoint; a part of Aalberts Integrated Piping Systems]**
 - c. **[Sure Flow Equipment Inc]**
 - d. **<Insert manufacturer's name>**
3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

NN. Check Valves - CPVC, Union-Type Ball Check:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[American Valve, Inc]**
 - b. **[Asahi/America]**
 - c. **[GF Piping Systems: Georg Fischer LLC]**
 - d. **[Hayward Flow Control; Hayward Industries, Inc.]**
 - e. **[IPEX USA LLC]**
 - f. **[Legend Valve & Fitting, Inc]**
 - g. **[NIBCO INC.]**
 - h. **[Spears Manufacturing Company]**
 - i. **[Thermoplastic Valves, Inc]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Valve, Inc]**

- b. [Asahi/America]
 - c. [GF Piping Systems: Georg Fischer LLC]
 - d. [Hayward Flow Control; Hayward Industries, Inc.]
 - e. [IPEX USA LLC]
 - f. [Legend Valve & Fitting, Inc]
 - g. [NIBCO INC.]
 - h. [Spears Manufacturing Company]
 - i. [Thermoplastic Valves, Inc]
 - j. <Insert manufacturer's name>
- 3. Pressure Rating and Temperature: **125 psig (860 kPa), 150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 check valve schedule articles.
 - 4. Body Material: CPVC.
 - 5. Body Design: Union-type ball check.
 - 6. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 check valve schedule articles.
 - 7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable, socket, socket or threaded, threaded, flanged. See Part 3 check valve schedule articles.
 - 8. Ball: CPVC.
 - 9. Seals: EPDM- or FKM-rubber O-rings.

OO. Check Valves - PVC, Union-Type Ball Check:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [American Valve, Inc]
 - b. [Asahi/America]
 - c. [GF Piping Systems: Georg Fischer LLC]
 - d. [Hayward Flow Control; Hayward Industries, Inc.]
 - e. [IPEX USA LLC]
 - f. [Legend Valve & Fitting, Inc]
 - g. [NIBCO INC.]
 - h. [Spears Manufacturing Company]
 - i. [Thermoplastic Valves, Inc]
 - j. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [American Valve, Inc]
 - b. [Asahi/America]
 - c. [GF Piping Systems: Georg Fischer LLC]
 - d. [Hayward Flow Control; Hayward Industries, Inc.]
 - e. [IPEX USA LLC]
 - f. [Legend Valve & Fitting, Inc]
 - g. [NIBCO INC.]
 - h. [Spears Manufacturing Company]
 - i. [Thermoplastic Valves, Inc]
 - j. <Insert manufacturer's name>
- 3. Pressure Rating and Temperature: **125 psig (860 kPa) 150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 check valve schedule articles.

4. Body Material: PVC.
5. Body Design: Union-type ball check.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 check valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable, socket, socket or threaded, threaded, flanged. See Part 3 check valve schedule articles.
8. Ball: PVC.
9. Seals: EPDM- or FKM-rubber O-rings.

2.8 GATE VALVES

A. Gate Valves, Threaded or Soldered Ends - Bronze, NRS, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[American Valve, Inc]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[Crane Fluid Systems; Crane Co.]**
 - d. **[FNW; Ferguson Enterprises, Inc.]**
 - e. **[Jenkins Valves; a Crane Co. brand]**
 - f. **[KITZ Corporation]**
 - g. **[Lance Valves]**
 - h. **[Milwaukee Valve Company]**
 - i. **[Powell Valves]**
 - j. **[Red-White Valve Corp.]**
 - k. **[Stockham; a Crane Co. brand]**
 - l. **[WATTS; A Watts Water Technologies Company]**
 - m. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Valve, Inc]**
 - b. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - c. **[Crane Fluid Systems; Crane Co.]**
 - d. **[FNW; Ferguson Enterprises, Inc.]**
 - e. **[Jenkins Valves; a Crane Co. brand]**
 - f. **[KITZ Corporation]**
 - g. **[Lance Valves]**
 - h. **[Milwaukee Valve Company]**
 - i. **[Powell Valves]**
 - j. **[Red-White Valve Corp.]**
 - k. **[Stockham; a Crane Co. brand]**
 - l. **[WATTS; A Watts Water Technologies Company]**
 - m. **<Insert manufacturer's name>**
3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
6. Ends: Threaded or soldered. See Part 3 gate valve schedule articles.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

7. Stem: Bronze.
8. Disc: Solid wedge; bronze.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[, **bronze, or aluminum**].

B. Gate Valves, Threaded or Soldered Ends - Bronze, RS, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[FNW; Ferguson Enterprises, Inc.]**
 - d. **[Hammond Valve]**
 - e. **[Jenkins Valves; a Crane Co. brand]**
 - f. **[KITZ Corporation]**
 - g. **[Milwaukee Valve Company]**
 - h. **[NIBCO INC.]**
 - i. **[Powell Valves]**
 - j. **[Red-White Valve Corp.]**
 - k. **[Stockham; a Crane Co. brand]**
 - l. **[WATTS; A Watts Water Technologies Company]**
 - m. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[FNW; Ferguson Enterprises, Inc.]**
 - d. **[Hammond Valve]**
 - e. **[Jenkins Valves; a Crane Co. brand]**
 - f. **[KITZ Corporation]**
 - g. **[Milwaukee Valve Company]**
 - h. **[NIBCO INC.]**
 - i. **[Powell Valves]**
 - j. **[Red-White Valve Corp.]**
 - k. **[Stockham; a Crane Co. brand]**
 - l. **[WATTS; A Watts Water Technologies Company]**
 - m. **<Insert manufacturer's name>**
3. Standard: MSS SP-80, Type 2.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
6. Ends: Threaded or soldered. See Part 3 gate valve schedule articles.
7. Stem: Bronze.
8. Disc: Solid wedge; bronze.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron, bronze, or aluminum.

C. Gate Valves, Threaded Ends - Bronze, NRS, Class 150:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [American Valve, Inc]
- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- c. [Crane Fluid Systems; Crane Co.]
- d. [Jenkins Valves; a Crane Co. brand]
- e. [KITZ Corporation]
- f. [Lance Valves]
- g. [Milwaukee Valve Company]
- h. [Powell Valves]
- i. [Red-White Valve Corp.]
- j. [Stockham; a Crane Co. brand]
- k. [WATTS; A Watts Water Technologies Company]
- l. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [American Valve, Inc]
- b. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
- c. [Crane Fluid Systems; Crane Co.]
- d. [Jenkins Valves; a Crane Co. brand]
- e. [KITZ Corporation]
- f. [Lance Valves]
- g. [Milwaukee Valve Company]
- h. [Powell Valves]
- i. [Red-White Valve Corp.]
- j. [Stockham; a Crane Co. brand]
- k. [WATTS; A Watts Water Technologies Company]
- l. <Insert manufacturer's name>

3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
6. Ends: Threaded.
7. Stem: Bronze.
8. Disc: Solid wedge, bronze.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[, **bronze, or aluminum**].

D. Gate Valves, Threaded Ends - Bronze, RS, Class 150:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Crane Fluid Systems; Crane Co.]
 - c. [Hammond Valve]
 - d. [Jenkins Valves; a Crane Co. brand]
 - e. [KITZ Corporation]

- f. **[Milwaukee Valve Company]**
 - g. **[Powell Valves]**
 - h. **[Stockham; a Crane Co. brand]**
 - i. **[WATTS; A Watts Water Technologies Company]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[Hammond Valve]**
 - d. **[Jenkins Valves; a Crane Co. brand]**
 - e. **[KITZ Corporation]**
 - f. **[Milwaukee Valve Company]**
 - g. **[Powell Valves]**
 - h. **[Stockham; a Crane Co. brand]**
 - i. **[WATTS; A Watts Water Technologies Company]**
 - j. **<Insert manufacturer's name>**
3. Standard: MSS SP-80, Type 2.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
6. Ends: Threaded.
7. Stem: Bronze.
8. Disc: Solid wedge, bronze.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[, **bronze, or aluminum**].
- E. Gate Valves, Press Ends - Bronze:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems]**
 - c. **[Hammond Valve]**
 - d. **[Milwaukee Valve Company]**
 - e. **[NIBCO INC.]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems]**
 - c. **[Hammond Valve]**
 - d. **[Milwaukee Valve Company]**
 - e. **[NIBCO INC.]**
 - f. **<Insert manufacturer's name>**
3. Standard: MSS SP-80.

4. CWP Rating: Minimum **200 psig (1380 kPa)**.
5. Body Material: Bronze with integral seat and union-ring bonnet.
6. Ends: Press.
7. Press Ends Connection Rating: Minimum **200 psig (1380 kPa)**.
8. Stem: Brass or bronze RS or NRS. See Part 3 gate valve schedule articles.
9. Disc: Solid wedge, bronze.
10. Packing: Graphite.
11. Port: Full.
12. Handwheel: Malleable iron, bronze, or aluminum.

F. Gate Valves, Flanged Ends - Iron, NRS, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - c. **[Cooper Valves]**
 - d. **[Crane Fluid Systems; Crane Co.]**
 - e. **[Flomatic Valves; Flomatic Corporation]**
 - f. **[FNW; Ferguson Enterprises, Inc.]**
 - g. **[Jenkins Valves; a Crane Co. brand]**
 - h. **[Jomar Valve]**
 - i. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - j. **[KITZ Corporation]**
 - k. **[Lance Valves]**
 - l. **[Legend Valve & Fitting, Inc]**
 - m. **[Powell Valves]**
 - n. **[Zurn Industries, LLC]**
 - o. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - c. **[Cooper Valves]**
 - d. **[Crane Fluid Systems; Crane Co.]**
 - e. **[Flomatic Valves; Flomatic Corporation]**
 - f. **[FNW; Ferguson Enterprises, Inc.]**
 - g. **[Jenkins Valves; a Crane Co. brand]**
 - h. **[Jomar Valve]**
 - i. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - j. **[KITZ Corporation]**
 - k. **[Lance Valves]**
 - l. **[Legend Valve & Fitting, Inc]**
 - m. **[Powell Valves]**
 - n. **[Zurn Industries, LLC]**
 - o. **<Insert manufacturer's name>**
3. Standard: MSS SP-70, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa).**
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Disc: Solid wedge.
10. Packing and Gasket: Asbestos free.

G. Gate Valves, Flanged Ends - Iron, OS&Y, Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[FNW; Ferguson Enterprises, Inc.]**
 - d. **[Hammond Valve]**
 - e. **[Jomar Valve]**
 - f. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - g. **[KITZ Corporation]**
 - h. **[Lance Valves]**
 - i. **[Legend Valve & Fitting, Inc]**
 - j. **[Milwaukee Valve Company]**
 - k. **[Powell Valves]**
 - l. **[Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]**
 - m. **[WATTS; A Watts Water Technologies Company]**
 - n. **[Zurn Industries, LLC]**
 - o. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Crane Fluid Systems; Crane Co.]**
 - c. **[FNW; Ferguson Enterprises, Inc.]**
 - d. **[Hammond Valve]**
 - e. **[Jomar Valve]**
 - f. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - g. **[KITZ Corporation]**
 - h. **[Lance Valves]**
 - i. **[Legend Valve & Fitting, Inc]**
 - j. **[Milwaukee Valve Company]**
 - k. **[Powell Valves]**
 - l. **[Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]**
 - m. **[WATTS; A Watts Water Technologies Company]**
 - n. **[Zurn Industries, LLC]**
 - o. **<Insert manufacturer's name>**
3. Standard: MSS SP-70, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa).**
6. Body Material: ASTM A126, gray iron with bolted bonnet.

7. Ends: Flanged.
8. Trim: Bronze.
9. Disc: Solid wedge.
10. Packing and Gasket: Asbestos free.

H. Gate Valves, Flanged Ends - Iron, NRS, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - c. **[Cooper Valves]**
 - d. **[Crane Fluid Systems; Crane Co.]**
 - e. **[Flomatic Valves; Flomatic Corporation]**
 - f. **[FNW; Ferguson Enterprises, Inc.]**
 - g. **[Jenkins Valves; a Crane Co. brand]**
 - h. **[KITZ Corporation]**
 - i. **[Victaulic Company]**
 - j. **[Zurn Industries, LLC]**
 - k. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - b. **[Clow Valve Company; a subsidiary of McWane, Inc.]**
 - c. **[Cooper Valves]**
 - d. **[Crane Fluid Systems; Crane Co.]**
 - e. **[Flomatic Valves; Flomatic Corporation]**
 - f. **[FNW; Ferguson Enterprises, Inc.]**
 - g. **[Jenkins Valves; a Crane Co. brand]**
 - h. **[KITZ Corporation]**
 - i. **[Victaulic Company]**
 - j. **[Zurn Industries, LLC]**
 - k. **<Insert manufacturer's name>**
3. Standard: MSS SP-70, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa).**
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Disc: Solid wedge.
10. Packing and Gasket: Asbestos free.

I. Gate Valves, Flanged Ends - Iron, OS&Y, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Crane Fluid Systems; Crane Co.]
 - c. [FNW; Ferguson Enterprises, Inc.]
 - d. [Hammond Valve]
 - e. [KITZ Corporation]
 - f. [Milwaukee Valve Company]
 - g. [Powell Valves]
 - h. [Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]
 - i. [Victaulic Company]
 - j. [WATTS; A Watts Water Technologies Company]
 - k. [Zurn Industries, LLC]
 - l. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Apollo Valves; a part of Aalberts Integrated Piping Systems]
 - b. [Crane Fluid Systems; Crane Co.]
 - c. [FNW; Ferguson Enterprises, Inc.]
 - d. [Hammond Valve]
 - e. [KITZ Corporation]
 - f. [Milwaukee Valve Company]
 - g. [Powell Valves]
 - h. [Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America]
 - i. [Victaulic Company]
 - j. [WATTS; A Watts Water Technologies Company]
 - k. [Zurn Industries, LLC]
 - l. <Insert manufacturer's name>
3. Standard: MSS SP-70, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa).**
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Disc: Solid wedge.
10. Packing and Gasket: Asbestos free.

J. Gate Valves - CPVC:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Asahi/America]
 - b. [KITZ Corporation]
 - c. [Spears Manufacturing Company]
 - d. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[Asahi/America]**
 - b. **[KITZ Corporation]**
 - c. **[Spears Manufacturing Company]**
 - d. **<Insert manufacturer's name>**
3. Pressure Rating and Temperature: **125 psig (860 kPa), 150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 gate valve schedule articles.
4. Body Material: CPVC.
5. Body Design: NRS.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Socket or threaded. See Part 3 gate valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Socket, socket or threaded, threaded, or flanged. See Part 3 gate valve schedule articles.
8. Gate and Stem: Plastic.
9. Seals: EPDM rubber.
10. Handle: Wheel.

K. Gate Valves - PVC:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Asahi/America]**
 - b. **[KITZ Corporation]**
 - c. **[Spears Manufacturing Company]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Asahi/America]**
 - b. **[KITZ Corporation]**
 - c. **[Spears Manufacturing Company]**
 - d. **<Insert manufacturer's name>**
3. Pressure Rating and Temperature: **125 psig (860 kPa), 150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 gate valve schedule articles.
4. Body Material: PVC.
5. Body Design: NRS.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Socket or threaded. See Part 3 gate valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **[Socket][Socket or threaded][Threaded][Flanged]**.
8. Gate and Stem: Plastic.
9. Seals: EPDM rubber.
10. Handle: Wheel.

2.9 PLUG VALVES

- A. Plug Valves, Lubricated Type, Threaded Ends - Class 125:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[American Valve, Inc]**
 - c. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - d. **[DeZURIK]**
 - e. **[Flowserve Corporation]**
 - f. **[Homestead Valve: a division of Olson Technologies, Inc.]**
 - g. **[Nordstrom; a Flowserve Corporation brand]**
 - h. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[A.Y. McDonald Mfg. Co.]**
 - b. **[American Valve, Inc]**
 - c. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 - d. **[DeZURIK]**
 - e. **[Flowserve Corporation]**
 - f. **[Homestead Valve: a division of Olson Technologies, Inc.]**
 - g. **[Nordstrom; a Flowserve Corporation brand]**
 - h. **<Insert manufacturer's name>**
 3. Standard: MSS SP-78, Type I, single gland.
 4. CWP Rating, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **200 psig (1380 kPa).**
 5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
 6. Plug: Cast iron or bronze with sealant groove.
- B. Plug Valves, Lubricated Type, Flanged Ends - Class 125:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Crispin Valve]**
 - b. **[DeZURIK]**
 - c. **[Flomatic Valves; Flomatic Corporation]**
 - d. **[Flowserve Corporation]**
 - e. **[GA Industries, Inc]**
 - f. **[Homestead Valve: a division of Olson Technologies, Inc.]**
 - g. **[Kennedy Valve Company; a division of McWane, Inc.]**
 - h. **[National Oilwell Varco]**
 - i. **[NIBCO INC.]**
 - j. **[Nordstrom; a Flowserve Corporation brand]**
 - k. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Crispin Valve]**

- b. [DeZURIK]
- c. [Flomatic Valves; Flomatic Corporation]
- d. [Flowserve Corporation]
- e. [GA Industries, Inc]
- f. [Homestead Valve: a division of Olson Technologies, Inc.]
- g. [Kennedy Valve Company; a division of McWane, Inc.]
- h. [National Oilwell Varco]
- i. [NIBCO INC.]
- j. [Nordstrom; a Flowserve Corporation brand]
- k. <Insert manufacturer's name>

- 3. Standard: MSS SP-78, Type I single gland or Type II regular gland. See Part 3 plug valve schedule articles.
- 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
- 5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
- 6. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
- 7. Plug: Cast iron or bronze with sealant groove.

C. Plug Valves, Lubricated Type, Threaded Ends - Cylindrical, Class 125:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Flowserve Corporation]
 - b. [Homestead Valve: a division of Olson Technologies, Inc.]
 - c. [National Oilwell Varco]
 - d. [Nordstrom; a Flowserve Corporation brand]
 - e. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert **manufacturer's name; product name or designation**> or comparable product by one of the following:
 - a. [Flowserve Corporation]
 - b. [Homestead Valve: a division of Olson Technologies, Inc.]
 - c. [National Oilwell Varco]
 - d. [Nordstrom; a Flowserve Corporation brand]
 - e. <Insert manufacturer's name>
- 3. Standard: MSS SP-78, Type IV.
- 4. CWP Rating, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **200 psig (1380 kPa)**.
- 5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
- 6. Plug: Cast iron or bronze with sealant groove.

D. Plug Valves, Lubricated Type, Flanged Ends - Cylindrical, Class 125:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Flomatic Valves; Flomatic Corporation]
 - b. [Flowserve Corporation]

- c. [Homestead Valve: a division of Olson Technologies, Inc.]
 - d. [National Oilwell Varco]
 - e. [Nordstrom; a Flowserve Corporation brand]
 - f. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Flomatic Valves; Flomatic Corporation]
 - b. [Flowserve Corporation]
 - c. [Homestead Valve: a division of Olson Technologies, Inc.]
 - d. [National Oilwell Varco]
 - e. [Nordstrom; a Flowserve Corporation brand]
 - f. <Insert manufacturer's name>
 3. Standard: MSS SP-78, Type IV.
 4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
 5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
 6. Plug: Cast iron or bronze with sealant groove.
- E. Plug Valves, Lubricated Type, Threaded Ends - Class 250:
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [DeZURIK]
 - b. [Homestead Valve: a division of Olson Technologies, Inc.]
 - c. [National Oilwell Varco]
 - d. [Nordstrom; a Flowserve Corporation brand]
 - e. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [DeZURIK]
 - b. [Homestead Valve: a division of Olson Technologies, Inc.]
 - c. [National Oilwell Varco]
 - d. [Nordstrom; a Flowserve Corporation brand]
 - e. <Insert manufacturer's name>
 3. Standard: MSS SP-78, Type I single gland or Type II regular gland. See Part 3 plug valve schedule articles.
 4. CWP Rating, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **400 psig (2760 kPa)**.
 5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
 6. Plug: Cast iron or bronze with sealant groove.
- F. Plug Valves, Lubricated Type, Flanged Ends - Class 250:
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Crispin Valve]
- b. [DeZURIK]
- c. [Flowserve Corporation]
- d. [Homestead Valve: a division of Olson Technologies, Inc.]
- e. [Kennedy Valve Company; a division of McWane, Inc.]
- f. [National Oilwell Varco]
- g. [Nordstrom; a Flowserve Corporation brand]
- h. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Crispin Valve]
- b. [DeZURIK]
- c. [Flowserve Corporation]
- d. [Homestead Valve: a division of Olson Technologies, Inc.]
- e. [Kennedy Valve Company; a division of McWane, Inc.]
- f. [National Oilwell Varco]
- g. [Nordstrom; a Flowserve Corporation brand]
- h. <Insert manufacturer's name>

3. Standard: MSS SP-78, Type I single gland or Type II regular gland. See Part 3 plug valve schedule articles.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa).**
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa).**
6. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
7. Plug: Cast iron or bronze with sealant groove.

G. Plug Valves, Lubricated Type, Threaded Ends - Cylindrical, Class 250:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Flowserve Corporation]
- b. [National Oilwell Varco]
- c. [Nordstrom; a Flowserve Corporation brand]
- d. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Flowserve Corporation]
- b. [National Oilwell Varco]
- c. [Nordstrom; a Flowserve Corporation brand]
- d. <Insert manufacturer's name>

3. Standard: MSS SP-78, Type IV.
4. CWP Rating, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **400 psig (2760 kPa).**
5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
6. Plug: Cast iron or bronze with sealant groove.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

H. Plug Valves, Lubricated Type, Flanged Ends - Cylindrical, Class 250:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Flowserve Corporation]**
 - b. **[National Oilwell Varco]**
 - c. **[Nordstrom; a Flowserve Corporation brand]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Flowserve Corporation]**
 - b. **[National Oilwell Varco]**
 - c. **[Nordstrom; a Flowserve Corporation brand]**
 - d. **<Insert manufacturer's name>**
3. Standard: MSS SP-78, Type IV.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. Body Material: ASTM A48/A48M or ASTM A126, Grade 40 cast iron with lubrication-sealing system.
6. Plug: Cast iron or bronze with sealant groove.

I. Plug Valves, Eccentric Type, Flanged Ends - with Resilient Seat, 175 CWP.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. Clow Valve Company; a subsidiary of McWane, Inc.
 - b. DeZURIK.
 - c. Flowserve Corporation.
 - d. GA Industries, Inc.
 - e. Homestead Valve: a division of Olson Technologies, Inc.
 - f. Kennedy Valve Company; a division of McWane, Inc.
 - g. Milliken Valve Company; a Mueller brand.
 - h. National Oilwell Varco.
 - i. Nordstrom; a Flowserve Corporation brand.
 - j. Val-Matic Valve & Manufacturing Corp.
 - k. **<Insert manufacturer's name>**.
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
3. Standard: MSS SP-108.
4. CWP Rating: **175 psig (1200 kPa)** minimum.
5. Body and Plug: ASTM A48/A48M, gray iron; ASTM A126, gray iron; or ASTM A536, ductile iron.
6. Bearings: Oil-impregnated bronze or stainless steel.
7. Ends: Flanged.
8. Stem-Seal Packing: Asbestos free.
9. Plug, Resilient-Seat Material: Suitable for potable-water service unless otherwise indicated.

2.10 CHAINWHEELS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 2. **[Babbitt Steam Specialty Co]**
 3. **[Roto Hammer Industries; Rotork]**
 4. **[Trumbull Industries]**
 5. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
 2. **[Babbitt Steam Specialty Co]**
 3. **[Roto Hammer Industries; Rotork]**
 4. **[Trumbull Industries]**
 5. **<Insert manufacturer's name>**
- C. Description: Valve actuation assembly with sprocket rim, chain guides, chain[, **and attachment brackets for mounting chainwheels directly to handwheels]**.
1. Sprocket Rim with Chain Guides: **[Ductile iron][Ductile or cast iron][Cast iron][Aluminum][Bronze]**, of type and size required for valve. **[Include zinc or epoxy coating.]**
 2. Chain: **[Hot-dip, galvanized steel][Brass][Stainless steel]**, of size required to fit sprocket rim.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine valve interior for cleanliness, freedom from foreign matter, and corrosion. Remove special packing materials, such as blocks, used to prevent disc movement during shipping and handling.
- B. Operate valves in positions from fully open to fully closed. Examine guides and seats made accessible by such operations.
- C. Examine threads on valve and mating pipe for form and cleanliness.
- D. Examine mating flange faces for conditions that might cause leakage. Check bolting for proper size, length, and material. Verify that gasket is of proper size, that its material composition is suitable for service, and that it is free from defects and damage.
- E. Examine press fittings to verify they have been properly pressed.
- F. Do not attempt to repair defective valves; replace with new valves. Remove defective valves from site.

3.2 INSTALLATION OF VALVES

- A. Install valves with unions or flanges at each piece of equipment arranged to allow service, maintenance,

and equipment removal without system shutdown.

- B. Provide support of piping adjacent to valves such that no force is imposed upon valves.
- C. Locate valves for easy access and where not blocked by equipment, other piping, or building components.
- D. For valves in horizontal piping, install valves with stem at or above center of pipe.
- E. Install valves in position that does not project into aisles or block access to other equipment.
- F. Install valves in position to allow full stem and actuator or manual operator movement.
- G. Verify that joints of each valve have been properly installed and sealed to ensure that there is no leakage or damage.
- H. Chainwheels: Install chainwheels on manual operators for **[globe][butterfly][gate][and][plug]** valves **[NPS 4 (DN 100)]<Insert pipe size>** and larger and more than **[96 inches (2400 mm)]<Insert dimension>** above floor. Extend chains to **[60 inches (1520 mm)]<Insert dimension>** above finished floor.
- I. Install check valves for proper direction of flow and as follows:
 - 1. Check Valves: **[Center-guided type][and][plate type]**, in horizontal or vertical position, between flanges.
 - 2. Check Valves, Swing Type: In horizontal position with hinge pin level.
 - 3. Check Valves, Lift Type: With stem upright and plumb.
- J. Valve Tags: Comply with requirements for valve tags and schedules in Section 230553 "Identification for HVAC Piping and Equipment."
- K. Adhere to manufacturer's written installation instructions. When soldering or brazing valves, do not heat valves above maximum permitted temperature. Do not use solder with melting point temperature above valve of manufacturer's written recommended maximum.

3.3 ADJUSTING

- A. Adjust or replace valve packing after piping systems have been tested and put into service, but before final adjusting and balancing. Replace valves if persistent leaking occurs.

3.4 GENERAL REQUIREMENTS FOR VALVE APPLICATIONS

- A. If valves with specified SWP classes or CWP ratings are unavailable, the same types of valves with higher SWP classes or CWP ratings may be substituted.
- B. Select valves with the following end connections:
 - 1. For Copper Tubing, NPS 2 (DN 50) and Smaller: Threaded ends except where solder-joint valve-end option is indicated in valve schedules.
 - 2. For Copper Tubing, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Flanged ends except where threaded valve-end option is indicated in valve schedules.
 - 3. For Copper Tubing, NPS 5 (DN 125) and Larger: Flanged ends.
 - 4. For Steel Piping, NPS 2 (DN 50) and Smaller: Threaded ends.

5. For Steel Piping, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Flanged ends except where threaded valve-end option is indicated in valve schedules.
6. For Steel Piping, NPS 5 (DN 125) and Larger: Flanged ends.
7. For Grooved-End Copper Tubing, except Steam and Steam Condensate Piping: Valve ends may be grooved.
8. For Grooved-End Steel Piping, except Steam and Steam Condensate Piping: Valve ends may be grooved.
9. Wafer-Type Valves: Flanged connections.

3.5 CHILLED-WATER ANGLE OR GLOBE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; **[threaded][soldered]** ends.
4. Globe valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.6 CONDENSER-WATER ANGLE OR GLOBE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; **[threaded][soldered]** ends.
4. Globe valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.7 HEATING-WATER ANGLE OR GLOBE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; **[threaded][soldered]** ends.
4. Globe valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.8 LOW-PRESSURE STEAM ANGLE OR GLOBE VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; threaded ends.
4. Globe valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.9 HIGH-PRESSURE STEAM ANGLE OR GLOBE VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; threaded ends.
4. Globe valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.10 STEAM-CONDENSATE ANGLE OR GLOBE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; threaded ends.
4. Globe valves, threaded ends - bronze, Class 150; **[PTFE][stainless steel]** disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.11 CHILLED-WATER BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, one piece.
2. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; **[threaded][soldered]** ends.
3. Ball valves, press ends - brass, two piece with full port and brass trim.
4. Ball valves, threaded or soldered ends - brass, two piece with full port and stainless steel trim; **[threaded][soldered]** ends.

5. Ball valves, press ends - brass, two piece with full port and stainless steel trim.
6. Ball valves, threaded or soldered ends - brass, two piece with regular port and brass trim; **[threaded][soldered]** ends.
7. Ball valves, threaded or soldered ends - brass, two piece with regular port and stainless steel trim; **[threaded][soldered]** ends.
8. Ball valves, threaded or soldered ends - brass, three piece with full port and brass trim; **[threaded][soldered]** ends.
9. Ball valves, threaded or soldered ends - brass, three piece with full port and stainless steel trim; **[threaded][soldered]** ends.
10. Ball valves, threaded ends - bronze, one piece with bronze trim.
11. Ball valves, threaded ends - bronze, one piece with stainless steel trim.
12. Ball valves, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; **[threaded][soldered]** ends.
13. Ball valves, press ends - bronze, two piece with full port and bronze or brass trim.
14. Ball valves, threaded or soldered ends - bronze, two piece with full port and stainless steel trim; **[threaded][soldered]** ends.
15. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
16. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
17. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
18. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
19. Ball valves, threaded or soldered ends - bronze, three piece with regular port and bronze or brass trim; **[threaded][soldered]** ends.
20. Ball valves, threaded or soldered ends - bronze, three piece with regular port and stainless steel trim; **[threaded][soldered]** ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.12 COOLING-COIL CONDENSATE BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; **[threaded][soldered]** ends.
2. Ball valves, press ends - brass, two piece with full port and brass trim.
3. Ball valves, threaded or soldered ends - brass, two piece with regular port and brass trim; **[threaded][soldered]** ends.
4. Ball valves, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; **[threaded][soldered]** ends.
5. Ball valves, press ends - bronze, two piece with full port and bronze or brass trim.
6. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.

B. For CPVC Pipe:

1. CPVC Union-Type Ball Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100) and smaller][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure>** at **[73 deg F (23 deg C)]<Insert temperature>**.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: **[Socket][or][threaded]**.
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **[Socket][Socket or threaded][Threaded][Flanged]**.

C. For PVC Pipe:

1. PVC Union-Type Ball Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100) and smaller][125 psig (860 kPa)][150 psig (1035 kPa)]**<Insert pressure> at **[73 deg F (23 deg C)]**<Insert temperature>.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: **[Socket][or][threaded]**.
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **[Socket][Socket or threaded][Threaded][Flanged]**.

3.13 CONDENSER-WATER BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, one piece.
2. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; **[threaded][soldered]** ends.
3. Ball valves, press ends - brass, two piece with full port and brass trim.
4. Ball valves, threaded or soldered ends - brass, two piece with full port and stainless steel trim; **[threaded][soldered]** ends.
5. Ball valves, press ends - brass, two piece with full port and stainless steel trim.
6. Ball valves, threaded or soldered ends - brass, two piece with regular port and brass trim; **[threaded][soldered]** ends.
7. Ball valves, threaded or soldered ends - brass, two piece with regular port and stainless steel trim; **[threaded][soldered]** ends.
8. Ball valves, threaded or soldered ends - brass, three piece with full port and brass trim; **[threaded][soldered]** ends.
9. Ball valves, threaded or soldered ends - brass, three piece with full port and stainless steel trim; **[threaded][soldered]** ends.
10. Ball valves, threaded ends - bronze, one piece with bronze trim.
11. Ball valves, threaded ends - bronze, one piece with stainless steel trim.
12. Ball valves, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; **[threaded][soldered]** ends.
13. Ball valves, press ends - bronze, two piece with full port and bronze or brass trim.
14. Ball valves, threaded or soldered ends - bronze, two piece with full port and stainless steel trim; **[threaded][soldered]** ends.
15. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
16. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
17. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
18. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
19. Ball valves, threaded or soldered ends - bronze, three piece with regular port and bronze or brass trim; **[threaded][soldered]** ends.
20. Ball valves, threaded or soldered ends - bronze, three piece with regular port and stainless steel trim; **[threaded][soldered]** ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

C. For CPVC Pipe:

1. CPVC Union-Type Ball Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100) and smaller][125 psig (860 kPa)][150 psig (1035 kPa)]**<Insert pressure> at **[73 deg F**

(23 deg C)]<Insert temperature>.

- a. End Connections for Valves NPS 2 (DN 50) and Smaller: [Socket][or][threaded].
- b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [Socket][Socket or threaded][Threaded][Flanged].

D. For PVC Pipe:

1. PVC Union-Type Ball Valve: [NPS 2 (DN 50) and smaller][NPS 4 (DN 100) and smaller][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure> at [73 deg F (23 deg C)]<Insert temperature>.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: [Socket][or][threaded].
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [Socket][Socket or threaded][Threaded][Flanged].

3.14 HEATING-WATER BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, one piece.
2. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; [threaded][soldered] ends.
3. Ball valves, press ends - brass, two piece with full port and brass trim.
4. Ball valves, threaded or soldered ends - brass, two piece with full port and stainless steel trim; [threaded][soldered] ends.
5. Ball valves, press ends - brass, two piece with full port and stainless steel trim.
6. Ball valves, threaded or soldered ends - brass, two piece with regular port and brass trim; [threaded][soldered] ends.
7. Ball valves, threaded or soldered ends - brass, two piece with regular port and stainless steel trim; [threaded][soldered] ends.
8. Ball valves, threaded or soldered ends - brass, three piece with full port and brass trim; [threaded][soldered] ends.
9. Ball valves, threaded or soldered ends - brass, three piece with full port and stainless steel trim; [threaded][soldered] ends.
10. Ball valves, threaded ends - bronze, one piece with bronze trim.
11. Ball valves, threaded ends - bronze, one piece with stainless steel trim.
12. Ball valves, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; [threaded][soldered] ends.
13. Ball valves, press ends - bronze, two piece with full port and bronze or brass trim.
14. Ball valves, threaded or soldered ends - bronze, two piece with full port and stainless steel trim; [threaded][soldered] ends.
15. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
16. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
17. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
18. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
19. Ball valves, threaded or soldered ends - bronze, three piece with regular port and bronze or brass trim; [threaded][soldered] ends.
20. Ball valves, threaded or soldered ends - bronze, three piece with regular port and stainless steel trim; [threaded][soldered] ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.

2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.15 LOW-PRESSURE STEAM BALL VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, two piece with full port and brass trim.
2. Ball valves, threaded - brass, two piece with full port and stainless steel trim.
3. Ball valves, threaded - brass, two piece with regular port and brass trim.
4. Ball valves, threaded ends - brass, two piece with regular port and stainless steel trim.
5. Ball valves, threaded ends - brass, three piece with full port and brass trim.
6. Ball valves, threaded ends - brass, three piece with full port and stainless steel trim.
7. Ball valves, threaded ends - bronze, two piece with full port and bronze or brass trim.
8. Ball valves, threaded ends - bronze, two piece with full port and stainless steel trim.
9. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
10. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
11. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
12. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
13. Ball valves, threaded ends - bronze, three piece with regular port and bronze or brass trim.
14. Ball valves, threaded ends - bronze, three piece with regular port and stainless steel trim.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.16 LOW-PRESSURE CLEAN STEAM BALL VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

- A. Pipe NPS 2 (DN 50) and Smaller: Ball valves, threaded ends - stainless steel, two piece with full port.
- B. Pipe NPS 2-1/2 (DN 65) and Larger: Ball valves, flanged ends - stainless steel, two piece with full port.

3.17 HIGH-PRESSURE STEAM BALL VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, two piece with full port and brass trim.
2. Ball valves, threaded ends - brass, two piece with full port and stainless steel trim.
3. Ball valves, threaded ends - brass, two piece with regular port and brass trim.
4. Ball valves, threaded ends - brass, two piece with regular port and stainless steel trim.
5. Ball valves, threaded ends - brass, three piece with full port and brass trim.
6. Ball valves, threaded ends - brass, three piece with full port and stainless steel trim.
7. Ball valves, threaded ends - bronze, two piece with full port and bronze or brass trim.
8. Ball valves, threaded ends - bronze, two piece with full port and stainless steel trim.
9. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
10. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
11. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
12. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
13. Ball valves, threaded ends - bronze, three piece with regular port and bronze or brass trim.
14. Ball valves, threaded ends - bronze, three piece with regular port and stainless steel trim.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.18 HIGH-PRESSURE CLEAN STEAM BALL VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

- A. Pipe NPS 2 (DN 50) and Smaller: Ball valves, threaded ends - stainless steel, two piece with full port.
- B. Pipe NPS 2-1/2 (DN 65) and Larger: Ball valves, flanged ends - stainless steel, two piece with full port.

3.19 STEAM-CONDENSATE BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, two piece with full port and brass trim.
2. Ball valves, threaded ends - brass, two piece with full port and stainless steel trim.
3. Ball valves, threaded ends - brass, two piece with regular port and brass trim.
4. Ball valves, threaded ends - brass, two piece with regular port and stainless steel trim.
5. Ball valves, threaded ends - brass, three piece with full port and brass trim.
6. Ball valves, threaded ends - brass, three piece with full port and stainless steel trim.
7. Ball valves, threaded ends - bronze, two piece with full port and bronze or brass trim.
8. Ball valves, threaded ends - bronze, two piece with full port and stainless steel trim.
9. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
10. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
11. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
12. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
13. Ball valves, threaded ends - bronze, three piece with regular port and bronze or brass trim.
14. Ball valves, threaded ends - bronze, three piece with regular port and stainless steel trim.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.20 CLEAN STEAM-CONDENSATE BALL VALVE SCHEDULE

- A. Pipe NPS 2 (DN 50) and Smaller: Ball valves, threaded ends - stainless steel, two piece with full port.
- B. Pipe NPS 2-1/2 (DN 65) and Larger: Ball valves, flanged ends - stainless steel, two piece with full port.

3.21 CHILLED-WATER BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - iron, with aluminum-bronze disc; [150][200] CWP, [EPDM][NBR] seat.
2. Butterfly valves, single flange (lug type) - iron, with ductile-iron disc; [150][200] CWP,

- [EPDM][NBR] seat.
- 3. Butterfly valves, single flange (lug type) - iron, with stainless steel disc; [150][200] CWP, [EPDM][NBR] seat.
- 4. Butterfly valves, flangeless (wafer type) - iron, with aluminum-bronze disc; [150][200] CWP, [EPDM][NBR] seat.
- 5. Butterfly valves, flangeless (wafer type) - iron, with ductile-iron disc; [150][200] CWP, [EPDM][NBR] seat.
- 6. Butterfly valves, flangeless (wafer type) - iron, with stainless steel disc; [150][200] CWP, [EPDM][NBR] seat.
- 7. Butterfly valves, grooved end - ductile iron, 175 CWP.
- 8. Butterfly valves, grooved end - ductile iron, 300 CWP.
- 9. Butterfly valves, single flange (lug type) - high performance, Class 150; [carbon steel][stainless steel] body.
- 10. Butterfly valves, single flange (lug type) - high performance, Class 300; [carbon steel][stainless steel] body.

3.22 CONDENSER-WATER BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

- 1. Butterfly valves, single flange (lug type) - iron, with aluminum-bronze disc; [150][200] CWP, [EPDM][NBR] seat.
- 2. Butterfly valves, single flange (lug type) - iron, with ductile-iron disc; [150][200] CWP, [EPDM][NBR] seat.
- 3. Butterfly valves, single flange (lug type) - iron, with stainless steel disc; [150][200] CWP, [EPDM][NBR] seat.
- 4. Butterfly valves, flangeless (wafer type) - iron, with aluminum-bronze disc; [150][200] CWP, [EPDM][NBR] seat.
- 5. Butterfly valves, flangeless (wafer type) - iron, with ductile-iron disc: [150][200] CWP, [EPDM][NBR] seat.
- 6. Butterfly valves, flangeless (wafer type) - iron, with stainless steel disc; [150][200] CWP, [EPDM][NBR] seat.
- 7. Butterfly valves, grooved end - ductile iron, 175 CWP.
- 8. Butterfly valves, grooved end - ductile iron, 300 CWP.
- 9. Butterfly valves, single flange (lug type) - high performance, Class 150; [carbon steel][stainless steel] body.
- 10. Butterfly valves, single flange (lug type) - high performance, Class 300; [carbon steel][stainless steel] body.

3.23 HEATING-WATER BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

- 1. Butterfly valves, single flange (lug type) - iron, with aluminum-bronze disc; [150][200] CWP, [EPDM][NBR] seat.
- 2. Butterfly valves, single flange (lug type) - iron, with ductile-iron disc; [150][200] CWP, [EPDM][NBR] seat.
- 3. Butterfly valves, single flange (lug type) - iron, with stainless steel disc; [150][200] CWP, [EPDM][NBR] seat.
- 4. Butterfly valves, flangeless (wafer type) - iron, with aluminum-bronze disc; [150][200] CWP, [EPDM][NBR] seat.
- 5. Butterfly valves, flangeless (wafer type) - iron, with ductile-iron disc: [150][200] CWP, [EPDM][NBR] seat.
- 6. Butterfly valves, flangeless (wafer type) - iron, with stainless steel disc; [150][200] CWP,

[EPDM][NBR] seat.

7. Butterfly valves, grooved end - ductile iron, 175 CWP.
8. Butterfly valves, grooved end - ductile iron, 300 CWP.
9. Butterfly valves, single flange (lug type) - high performance, Class 150; [carbon steel][stainless steel] body.
10. Butterfly valves, single flange (lug type) - high performance, Class 300; [carbon steel][stainless steel] body.

3.24 LOW-PRESSURE STEAM BUTTERFLY VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; [carbon steel][stainless steel] body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; [carbon steel][stainless steel] body.

3.25 LOW-PRESSURE CLEAN STEAM BUTTERFLY VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; stainless steel body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; stainless steel body.

3.26 HIGH-PRESSURE STEAM BUTTERFLY VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high-performance, Class 150 [carbon steel][stainless steel] body.
2. Butterfly valves, single flange (lug type) - high-performance, Class 300 [carbon steel][stainless steel] body.

3.27 HIGH-PRESSURE CLEAN STEAM BUTTERFLY VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; stainless steel body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; stainless steel body.

3.28 STEAM-CONDENSATE BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; [carbon steel][stainless steel] body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; [carbon steel][stainless steel] body.

3.29 CLEAN-STEAM-CONDENSATE BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; stainless steel body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; stainless steel body.

3.30 CHILLED-WATER CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, lift type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, lift type, threaded ends - bronze, with nonmetallic disc, Class 125.
3. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
4. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
5. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
6. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.
7. Check valves, swing type, press ends - bronze.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
5. Check valves, center guided - iron, globe, with metal seat, Class 125.
6. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
7. Check valves, center guided - iron, globe, with metal seat, Class 150.
8. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
9. Check valves, center guided - iron, globe, with metal seat, Class 250.
10. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
11. Check valves, center guided - iron, globe, with metal seat, Class 300.
12. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [EPDM][NBR].
13. Check valves, center guided - iron, globe, with resilient seat, Class 125; [EPDM][NBR].
14. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [EPDM][NBR].
15. Check valves, center guided - iron, globe, with resilient seat, Class 150; [EPDM][NBR].
16. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [EPDM][NBR].
17. Check valves, center guided - iron, globe, with resilient seat, Class 250; [EPDM][NBR].
18. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [EPDM][NBR].
19. Check valves, center guided - iron, globe, with resilient seat, Class 300; [EPDM][NBR].
20. Check valves, dual-plate type - iron, with metal seat, Class 125.
21. Check valves, dual-plate type - iron, with metal seat, Class 150.
22. Check valves, dual-plate type - iron, with metal seat, Class 250.
23. Check valves, dual-plate type - iron, with metal seat, Class 300.
24. Check valves, single-plate type - iron, with resilient seat, Class 125; [EPDM][NBR] seat.
25. Check valves, dual-plate type - iron, with resilient seat, Class 125; [EPDM][NBR] seat.
26. Check valves, dual-plate type - iron, with resilient seat, Class 150; [EPDM][NBR] seat.
27. Check valves, single-plate type - iron, with resilient seat, Class 250; [EPDM][NBR] seat.
28. Check valves, dual-plate type - iron, with resilient seat, Class 250; [EPDM][NBR] seat.
29. Check valves, dual-plate type - iron, with resilient seat, Class 300; [EPDM][NBR] seat.

C. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

1. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
2. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

- D. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):
1. Check valves, swing type, grooved ends - iron, 300 CWP.
- E. For CPVC Pipe:
1. CPVC Union-Type Ball Check Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100) and smaller][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure> at [73 deg F (23 deg C)]<Insert temperature>.**
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: **[Socket][or][threaded].**
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100) and Larger: **[Socket][Socket or threaded][Threaded][Flanged].**
- F. For PVC Pipe:
1. PVC Union-Type Ball Check Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100)][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure> at [73 deg F (23 deg C)]<Insert temperature>.**
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: **[Socket][or][threaded].**
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **[Socket][Socket or threaded][Threaded][Flanged].**

3.31 CONDENSER-WATER CHECK VALVE SCHEDULE

- A. Pipe NPS 2 (DN 50) and Smaller:
1. Check valves, lift type, threaded ends - bronze, with bronze disc, Class 125.
 2. Check valves, lift type, threaded ends - bronze, with nonmetallic disc, Class 125.
 3. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
 4. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
 5. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
 6. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.
 7. Check valves, swing type, press ends - bronze.
- B. Pipe NPS 2-1/2 (DN 65) and Larger:
1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
 2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
 3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
 4. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
 5. Check valves, center guided - iron, globe, with metal seat, Class 125.
 6. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
 7. Check valves, center guided - iron, globe, with metal seat, Class 150.
 8. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
 9. Check valves, center guided - iron, globe, with metal seat, Class 250.
 10. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
 11. Check valves, center guided - iron, globe, with metal seat, Class 300.
 12. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; **[EPDM][NBR].**
 13. Check valves, center guided - iron, globe, with resilient seat, Class 125; **[EPDM][NBR].**
 14. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; **[EPDM][NBR].**
 15. Check valves, center guided - iron, globe, with resilient seat, Class 150; **[EPDM][NBR].**
 16. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; **[EPDM][NBR].**

17. Check valves, center guided - iron, globe, with resilient seat, Class 250; [EPDM][NBR].
18. Check valves, center guided - iron, compact water, with resilient seat, Class 300; [EPDM][NBR].
19. Check valves, center guided - iron, globe, with resilient seat, Class 300; [EPDM][NBR].
20. Check valves, dual-plate type - iron, with metal seat, Class 125.
21. Check valves, dual-plate type - iron, with metal seat, Class 150.
22. Check valves, dual-plate type - iron, with metal seat, Class 250.
23. Check valves, dual-plate type - iron, with metal seat, Class 300.
24. Check valves, single-plate type - iron, with resilient seat, Class 125; [EPDM][NBR] seat.
25. Check valves, dual-plate type - iron, with resilient seat, Class 125; [EPDM][NBR] seat.
26. Check valves, dual-plate type - iron, with resilient seat, Class 150; [EPDM][NBR] seat.
27. Check valves, single-plate type - iron, with resilient seat, Class 250; [EPDM][NBR] seat.
28. Check valves, dual-plate type - iron, with resilient seat, Class 250; [EPDM][NBR] seat.
29. Check valves, dual-plate type - iron, with resilient seat, Class 300; [EPDM][NBR] seat.

C. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

1. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
2. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

D. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

1. Check valves, swing type, grooved ends - iron, 300 CWP.

E. For CPVC Pipe:

1. CPVC Union-Type Ball Check Valve: [NPS 2 (DN 50) and smaller][NPS 4 (DN 100) and smaller][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure> at [73 deg F (23 deg C)]<Insert temperature>.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: [Socket][or][threaded].
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100) and Larger: [Socket][Socket or threaded][Threaded][Flanged].

F. For PVC Pipe:

1. PVC Union-Type Ball Check Valve: [NPS 2 (DN 50) and smaller][NPS 4 (DN 100)][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure> at [73 deg F (23 deg C)]<Insert temperature>.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: [Socket][or][threaded].
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [Socket][Socket or threaded][Threaded][Flanged].

3.32 HEATING-WATER CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, lift type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, lift type, threaded ends - bronze, with nonmetallic disc, Class 125.
3. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
4. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
5. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
6. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.
7. Check valves, swing type, press ends - bronze.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
5. Check valves, center guided - iron, globe, with metal seat, Class 125.
6. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
7. Check valves, center guided - iron, globe, with metal seat, Class 150.
8. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
9. Check valves, center guided - iron, globe, with metal seat, Class 250.
10. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
11. Check valves, center guided - iron, globe, with metal seat, Class 300.
12. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [EPDM][NBR].
13. Check valves, center guided - iron, globe, with resilient seat, Class 125; [EPDM][NBR].
14. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [EPDM][NBR].
15. Check valves, center guided - iron, globe, with resilient seat, Class 150; [EPDM][NBR].
16. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [EPDM][NBR].
17. Check valves, center guided - iron, globe, with resilient seat, Class 250; [EPDM][NBR].
18. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [EPDM][NBR].
19. Check valves, center guided - iron, globe, with resilient seat, Class 300; [EPDM][NBR].
20. Check valves, dual-plate type - iron, with metal seat, Class 125.
21. Check valves, dual-plate type - iron, with metal seat, Class 150.
22. Check valves, dual-plate type - iron, with metal seat, Class 250.
23. Check valves, dual-plate type - iron, with metal seat, Class 300.
24. Check valves, single-plate type - iron, with resilient seat, Class 125; [EPDM][NBR] seat.
25. Check valves, dual-plate type - iron, with resilient seat, Class 125; [EPDM][NBR] seat.
26. Check valves, dual-plate type - iron, with resilient seat, Class 150; [EPDM][NBR] seat.
27. Check valves, single-plate type - iron, with resilient seat, Class 250; [EPDM][NBR] seat.
28. Check valves, dual-plate type - iron, with resilient seat, Class 250; [EPDM][NBR] seat.
29. Check valves, dual-plate type - iron, with resilient seat, Class 300; [EPDM][NBR] seat.

C. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

1. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
2. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

D. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

1. Check valves, swing type, grooved ends - iron, 300 CWP.

3.33 LOW-PRESSURE STEAM CHECK VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
3. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.

4. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
5. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.34 HIGH-PRESSURE STEAM CHECK VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
3. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
5. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.35 STEAM-CONDENSATE CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
3. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
5. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.36 PUMP-DISCHARGE CHECK VALVE SCHEDULE

A. Chilled-Water Pump Discharge:

1. Pipe NPS 2 (DN 50) and Smaller:

- a. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
- b. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
- c. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
- d. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.

2. Pipe NPS 2-1/2 (DN 65) and Larger:

- a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
- b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

- c. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
- d. Check valves, center guided - iron, globe, with metal seat, Class 125.
- e. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
- f. Check valves, center guided - iron, globe, with metal seat, Class 150.
- g. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
- h. Check valves, center guided - iron, globe, with metal seat, Class 250.
- i. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
- j. Check valves, center guided - iron, globe, with metal seat, Class 300.
- k. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [EPDM][NBR] seat.
- l. Check valves, center guided - iron, globe, with resilient seat, Class 125; [EPDM][NBR] seat.
- m. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [EPDM][NBR] seat.
- n. Check valves, center guided - iron, globe, with resilient seat, Class 150; [EPDM][NBR] seat.
- o. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [EPDM][NBR] seat.
- p. Check valves, center guided - iron, globe, with resilient seat, Class 250; [EPDM][NBR] seat.
- q. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [EPDM][NBR] seat.
- r. Check valves, center guided - iron, globe, with resilient seat, Class 300; [EPDM][NBR] seat.

3. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

- a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
- b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

4. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

- a. Check valves, swing type, grooved ends - iron, 300 CWP.

B. Condenser-Water Pump Discharge:

1. Pipe NPS 2 (DN 50) and Smaller:

- a. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
- b. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
- c. Check valves, swing type, threaded or soldered ends - bronze, with bronze disc, Class 150.
- d. Check valves, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 150.

2. Pipe NPS 2-1/2 (DN 65) and Larger:

- a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
- b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.
- c. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
- d. Check valves, center guided - iron, globe, with metal seat, Class 125.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

- e. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
 - f. Check valves, center guided - iron, globe, with metal seat, Class 150.
 - g. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
 - h. Check valves, center guided - iron, globe, with metal seat, Class 250.
 - i. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
 - j. Check valves, center guided - iron, globe, with metal seat, Class 300.
 - k. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [EPDM][NBR] seat.
 - l. Check valves, center guided - iron, globe, with resilient seat, Class 125; [EPDM][NBR] seat.
 - m. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [EPDM][NBR] seat.
 - n. Check valves, center guided - iron, globe, with resilient seat, Class 150; [EPDM][NBR] seat.
 - o. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [EPDM][NBR] seat.
 - p. Check valves, center guided - iron, globe, with resilient seat, Class 250; [EPDM][NBR] seat.
 - q. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [EPDM][NBR] seat.
 - r. Check valves, center guided - iron, globe, with resilient seat, Class 300; [EPDM][NBR] seat.
3. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):
- a. Check valves, swing type, grooved-end - iron, 300 CWP.
- C. Heating-Water Pump Discharge:
1. Pipe NPS 2 (DN 50) and Smaller:
- a. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
 - b. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
 - c. Check valves, swing type, threaded or soldered ends - bronze, with bronze disc, Class 150.
 - d. Check valves, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 150.
2. Pipe NPS 2-1/2 (DN 65) and Larger:
- a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
 - b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.
 - c. Check valves, center guided - iron, spring loaded, compact wafer, with metal seat, Class 125.
 - d. Check valves, center guided - iron, spring loaded, globe, with metal seat, Class 125.
 - e. Check valves, center guided - iron, spring loaded, compact wafer, with metal seat, Class 150.
 - f. Check valves, center guided - iron, spring loaded, globe, with metal seat, Class 150.
 - g. Check valves, center guided - iron, spring loaded, compact wafer, with metal seat, Class 250.
 - h. Check valves, center guided - iron, spring loaded, globe, with metal seat, Class 250.
 - i. Check valves, center guided - iron, spring loaded, compact wafer, with metal seat, Class 300.
 - j. Check valves, center guided - iron, spring loaded, globe, with metal seat, Class 300.

- k. Check valves, center guided - iron, spring loaded, compact wafer, with resilient seat, Class 125; [EPDM][NBR] seat.
 - l. Check valves, center guided - iron, spring loaded, globe, with resilient seat, Class 125; [EPDM][NBR] seat.
 - m. Check valves, center guided - iron, spring loaded, compact wafer, with resilient seat, Class 150; [EPDM][NBR] seat.
 - n. Check valves, center guided - iron, spring loaded, globe, with resilient seat, Class 150; [EPDM][NBR] seat.
 - o. Check valves, center guided - iron, spring loaded, compact wafer, with resilient seat, Class 250; [EPDM][NBR] seat.
 - p. Check valves, center guided - iron, spring loaded, globe, with resilient seat, Class 250; [EPDM][NBR] seat.
 - q. Check valves, center guided - iron, spring loaded, compact wafer, with resilient seat, Class 300; [EPDM][NBR] seat.
 - r. Check valves, center guided - iron, spring loaded, globe, with resilient seat, Class 300; [EPDM][NBR] seat.
3. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):
- a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
 - b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.
4. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):
- a. Check valves, swing type, grooved ends - iron, 300 CWP.
- D. Steam-Condensate Pump Discharge:
1. Pipe NPS 2 (DN 50) and Smaller:
- a. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
 - b. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
 - c. Check valves, swing type, threaded - bronze, with bronze disc, Class 150.
 - d. Check valves, swing type, threaded - bronze, with nonmetallic disc, Class 150.
2. Pipe NPS 2-1/2 (DN 65) and Larger for Steam Condensate Pumps:
- a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
 - b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.
 - c. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
 - d. Check valves, center guided - iron, globe, with metal seat, Class 125.
 - e. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
 - f. Check valves, center guided - iron, globe, with metal seat, Class 150.
 - g. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
 - h. Check valves, center guided - iron, globe, with metal seat, Class 250.
 - i. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
 - j. Check valves, center guided - iron, globe, with metal seat, Class 300.
 - k. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [EPDM][NBR] seat.
 - l. Check valves, center guided - iron, globe, with resilient seat, Class 125; [EPDM][NBR] seat.

- m. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; **[EPDM][NBR]** seat.
 - n. Check valves, center guided - iron, globe, with resilient seat, Class 150; **[EPDM][NBR]** seat.
 - o. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; **[EPDM][NBR]** seat.
 - p. Check valves, center guided - iron, globe, with resilient seat, Class 250; **[EPDM][NBR]** seat.
 - q. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; **[EPDM][NBR]** seat.
 - r. Check valves, center guided - iron, globe, with resilient seat, Class 300; **[EPDM][NBR]** seat.
3. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300) for Steam Condensate Pumps:
- a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
 - b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.37 CHILLED-WATER GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

- 1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; **[threaded][soldered]** ends.
- 2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; **[threaded][soldered]** ends.
- 3. Gate valves, threaded ends - bronze, NRS, Class 150.
- 4. Gate valves, threaded ends - bronze, RS, Class 150.
- 5. Gate valves, press ends - bronze; **[RS][NRS]**.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

- 1. Gate valves, flanged ends - iron, NRS, Class 125.
- 2. Gate valves, flanged ends - iron, OS&Y, Class 125.
- 3. Gate valves, flanged ends - iron, NRS, Class 250.
- 4. Gate valves, flanged ends - iron, OS&Y, Class 250.

C. CPVC Pipe:

- 1. CPVC Gate Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100) and smaller][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure> at [73 deg F (23 deg C)]<Insert temperature>**.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: **[Socket][or][threaded]**.
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100) and Larger: **[Socket][Socket or threaded][Threaded][Flanged]**.

D. PVC Pipe:

- 1. PVC Gate Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100)][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure> at [73 deg F (23 deg C)]<Insert temperature>**.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: **[Socket][or][threaded]**.
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **[Socket][Socket or threaded][Threaded][Flanged]**.

3.38 CONDENSER-WATER GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; **[threaded][soldered]** ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; **[threaded][soldered]** ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.
5. Gate valves, press ends - bronze; **[RS][NRS]**.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

C. CPVC Pipe:

1. CPVC Gate Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100) and smaller][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure>** at **[73 deg F (23 deg C)]<Insert temperature>**.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: **[Socket][or][threaded]**.
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100) and Larger: **[Socket][Socket or threaded][Threaded][Flanged]**.

D. PVC Pipe:

1. PVC Gate Valve: **[NPS 2 (DN 50) and smaller][NPS 4 (DN 100)][125 psig (860 kPa)][150 psig (1035 kPa)]<Insert pressure>** at **[73 deg F (23 deg C)]<Insert temperature>**.
 - a. End Connections for Valves NPS 2 (DN 50) and Smaller: **[Socket][or][threaded]**.
 - b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **[Socket][Socket or threaded][Threaded][Flanged]**.

3.39 HEATING-WATER GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; **[threaded][soldered]** ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; **[threaded][soldered]** ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.
5. Gate valves, press ends - bronze; **[RS][NRS]**.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.40 LOW-PRESSURE STEAM GATE VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; threaded ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; threaded ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.41 HIGH-PRESSURE STEAM GATE VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; threaded ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; threaded ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.42 STEAM-CONDENSATE GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; threaded ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; threaded ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.43 CHILLED-WATER PLUG VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Plug valves, lubricated type, threaded ends - Class 125.
2. Plug valves, lubricated type, flanged ends - Class 125; **[Type I single gland][or][Type II regular gland]**.
3. Plug valves, lubricated type, threaded ends - cylindrical, Class 125.
4. Plug valves, lubricated type, flanged ends - cylindrical, Class 125.
5. Plug valves, lubricated type, threaded ends - Class 250; **[Type I single gland][or][Type II regular gland]**.
6. Plug valves, lubricated type, flanged ends - Class 250; **[Type I single gland][or][Type II regular gland]**.
7. Plug valves, lubricated type, threaded ends - cylindrical, Class 250.
8. Plug valves, lubricated type, flanged ends - cylindrical, Class 250.
9. Plug valves, eccentric type, flanged ends - with resilient seat, 175 CWP.

3.44 CONDENSER-WATER PLUG VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Plug valves, lubricated type, threaded ends - Class 125.
2. Plug valves, lubricated type, flanged ends - Class 125; **[Type I single gland][or][Type II regular gland]**.
3. Plug valves, lubricated type, threaded ends - cylindrical, Class 125.
4. Plug valves, lubricated type, flanged ends - cylindrical, Class 125.
5. Plug valves, lubricated type, threaded ends - Class 250; **[Type I single gland][or][Type II regular gland]**.
6. Plug valves, lubricated type, flanged ends - Class 250; **[Type I single gland][or][Type II regular gland]**.
7. Plug valves, lubricated type, threaded ends - cylindrical, Class 250.
8. Plug valves, lubricated type, flanged ends - cylindrical, Class 250.
9. Plug valves, eccentric type, flanged ends - with resilient seat, 175 CWP.

3.45 HEATING-WATER PLUG VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Plug valves, lubricated type, threaded ends - Class 125.
2. Plug valves, lubricated type, flanged ends - Class 125; **[Type I single gland][or][Type II regular gland]**.
3. Plug valves, lubricated type, threaded ends - cylindrical, Class 125.
4. Plug valves, lubricated type, flanged ends - cylindrical, Class 125.
5. Plug valves, lubricated type, threaded ends - Class 250; **[Type I single gland][or][Type II regular gland]**.
6. Plug valves, lubricated type, flanged ends - Class 250; **[Type I single gland][or][Type II regular gland]**.
7. Plug valves, lubricated type, threaded ends - cylindrical, Class 250.
8. Plug valves, lubricated type, flanged ends - cylindrical, Class 250.
9. Plug valves, eccentric type, flanged ends - with resilient seat, 175 CWP.

3.46 STEAM-CONDENSATE PLUG VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Plug valves, lubricated type, threaded ends - Class 125.

23 - Heating, Ventilating, and Air-Conditioning (HVAC)

2. Plug valves, lubricated type, flanged ends - Class 125; **[Type I single gland][or][Type II regular gland]**.
3. Plug valves, lubricated type, threaded ends - cylindrical, Class 125.
4. Plug valves, lubricated type, flanged ends - cylindrical, Class 125.
5. Plug valves, lubricated type, threaded ends - Class 250; **[Type I single gland][or][Type II regular gland]**.
6. Plug valves, lubricated type, flanged ends - Class 250; **[Type I single gland][or][Type II regular gland]**.
7. Plug valves, lubricated type, threaded ends - cylindrical, Class 250.
8. Plug valves, lubricated type, flanged ends - cylindrical, Class 250.
9. Plug valves, eccentric type, flanged ends - with resilient seat, 175 CWP.

SECTION 26 01 00 00 - SUPPLEMENTAL REQUIREMENTS FOR ELECTRICAL

PART 1 - GENERAL

1.1 SUMMARY

- A. This Section includes requirements generally applicable to all electrical Work on the Project, including but not limited to Work specified in Divisions 26, 27, and 28.
- B. Related Requirements:
 - 1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
 - 2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
 - 3. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** specifies preinstallation conference procedures.

1.2 REFERENCES

- A. Abbreviations and Acronyms for Electrical Terms and Units of Measure:
 - 1. 8P8C: An 8-position 8-contact modular jack.
 - 2. A: Ampere, unit of electrical current.
 - 3. AC or ac: Alternating current.
 - 4. AFCI: Arc-fault circuit interrupter.
 - 5. AGC: Automatic gain control.
 - 6. AIC: Ampere interrupting capacity.
 - 7. AL, Al, or ALUM: Aluminum.
 - 8. ASD: Adjustable-speed drive.
 - 9. ATP: Acceptance test procedure.
 - 10. ATS: Automatic transfer switch.
 - 11. A/V: Audio/visual.
 - 12. AWG: American wire gauge; see ASTM B258.
 - 13. BAS: Building automation system.
 - 14. BDA: Bi-directional amplifier.
 - 15. BIL: Basic impulse insulation level.
 - 16. BIM: Building information modeling.
 - 17. BMS: Building management system.
 - 18. BNC: Bayonet Neill-Concelman - type of connector.
 - 19. B/W: Black and white.
 - 20. CAD: Computer-aided design or drafting.
 - 21. CATV: Community antenna television.
 - 22. CB: Circuit breaker.
 - 23. CCD: Charge-coupled device.
 - 24. CCTV: Closed-circuit television.
 - 25. cd: Candela, the SI fundamental unit of luminous intensity.
 - 26. CO/ALR: Copper-aluminum, revised.
 - 27. COPS: Critical operations power system.
 - 28. CU or Cu: Copper.
 - 29. CU-AL or AL-CU: Copper-aluminum.

30. DACR: Digital alarm communicator receiver.
31. DACT: Digital alarm communicator transmitter.
32. DAS: Distributed antenna system.
33. dB: Decibel, a unitless logarithmic ratio of two electrical, acoustical, or optical power values.
34. dB(A-weighted) or dB(A): Decibel acoustical sound pressure level with A-weighting applied in accordance with IEC 61672-1.
35. dB(adjusted) or dBa: Decibel weighted absolute noise power with respect to 3.16 pW (minus 85 dBm).
36. dBm: Decibel absolute power with respect to 1 mW.
37. dBmV: Decibel absolute voltage with respect to 1 mV across identical impedance.
38. DC or dc: Direct current.
39. DCOA: Designated critical operations area.
40. DDC: Direct digital control (HVAC).
41. DGP: Data gathering panel.
42. DHCP: Dynamic host configuration protocol.
43. EGC: Equipment grounding conductor.
44. ELV: Extra-low voltage.
45. EMF: Electromotive force.
46. EMI: Electromagnetic interference.
47. EMP: Electrical maintenance program (operation and maintenance); electromagnetic pulse (transient analysis).
48. EPS: Emergency power supply.
49. EPSS: Emergency power supply system.
50. ERCES: Emergency responder communications enhancement system.
51. ESS: Energy storage system.
52. EV: Electric vehicle.
53. EVPE: Electric vehicle power export equipment.
54. EVSE: Electric vehicle supply equipment.
55. FACU: Fire-alarm control unit.
56. FAS: Fire-alarm system.
57. fc: Footcandle, an internationally recognized unit of illuminance equal to one lumen per square foot or 10.76 lx. The simplified conversion 1 fc = 10 lx in the Specifications is common practice and considered adequate precision for building construction activities. When there are conflicts, lux is the primary unit; footcandle is specified for convenience.
58. FCC: Federal Communications Commission; fire command center.
59. FLC: Full-load current.
60. ft: Foot.
61. ft-cd: Foot-candle, the antiquated U.S. standard unit of illuminance, equal to one international candle measured at a distance of one foot, that was superseded in 1948 by the unit "footcandle" when the SI unit candela (cd) replaced the international candle; see "fc."
62. FTP: File transfer protocol.
63. FXO: Foreign exchange office.
64. GEC: Grounding electrode conductor.
65. GFCI: Ground-fault circuit interrupter.
66. GFPE: Ground-fault protection of equipment.
67. GND: Ground.
68. GROL: General Radiotelephone Operator License (FCC).
69. H.323: Audio and video protocol.
70. HACR: Heating, air conditioning, and refrigeration.
71. HDPE: High-density polyethylene.
72. HID: High-intensity discharge.
73. HP or hp: Horsepower.
74. HVAC: Heating, ventilating, and air conditioning.
75. Hz: Hertz.
76. I&TFAS: Inspection and testing of fire-alarm system.

- 77. IB-PSC: In-building public safety communications.
- 78. IBT: Intersystem bonding termination.
- 79. ICT: Information and communications technology.
- 80. IDC: Initiating device circuit.
- 81. inch: Inch. To avoid confusion, the abbreviation "in." is not used.
- 82. I/O: Input/output.
- 83. IP: Ingress protection rating (enclosures); Internet protocol (communications).
- 84. IR: Infrared.
- 85. IS: Intrinsically safe.
- 86. IT&R: Inspecting, testing, and repair.
- 87. ITE: Information technology equipment.
- 88. kAIC: Kiloampere interrupting capacity.
- 89. kcmil or MCM: One thousand circular mils.
- 90. kV: Kilovolt.
- 91. kVA: Kilovolt-ampere.
- 92. kvar: Kilovolt-ampere reactive.
- 93. kW: Kilowatt.
- 94. kWh: Kilowatt-hour.
- 95. LAN: Local area network.
- 96. lb: Pound (weight).
- 97. lbf: Pound (force).
- 98. LCD: Liquid-crystal display.
- 99. LCDI: Leakage-current detector-interrupter.
- 100. LED: Light-emitting diode.
- 101. Li-ion: Lithium-ion.
- 102. lm: Lumen, the SI-derived unit of luminous flux.
- 103. LNG: Liquefied natural gas.
- 104. LP-Gas: Liquefied petroleum gas.
- 105. LRC: Locked-rotor current.
- 106. LTE: Long-term evolution (mobile device technology standard).
- 107. LV: Low voltage.
- 108. lx: Lux, the SI-derived unit of illuminance equal to one lumen per square meter.
- 109. m: Meter.
- 110. MATV: Master antenna television.
- 111. MCC: Motor-control center.
- 112. MDC: Modular data center.
- 113. MG set: Motor-generator set.
- 114. MIDI: Musical instrument digital interface.
- 115. MLO: Main lugs only.
- 116. MPEG: Moving Picture Experts Group.
- 117. MPEG-2: Abbreviation for the ISO/IEC Moving Picture Experts Group's standard for generic coding of moving pictures and associated audio information (ISO/IEC 13818) released in 1995 and used for most over-the-air and satellite broadcast digital television.
- 118. MPEG-4: Abbreviation for the ISO/IEC Moving Picture Experts Group's standard framework for coding of audio-visual objects (ISO/IEC 14496) released in 1999, with digital rights management and more advanced compression algorithms than MPEG-2.
- 119. MOV: Metal-oxide varistor.
- 120. MV: Medium voltage.
- 121. MVA: Megavolt-ampere.
- 122. mW: Milliwatt.
- 123. MW: Megawatt.
- 124. MWh: Megawatt-hour.
- 125. NAC: Notification appliance circuit.
- 126. N.C.: Normally closed.
- 127. NFC: Near field communications.
- 128. Ni-Cd: Nickel-cadmium.

129. NICET: National Institute for Certification in Engineering Technologies, a division of the National Society of Professional Engineers.
130. Ni-MH: Nickel-metal hydride.
131. NIU: Network interface unit.
132. N.O.: Normally open.
133. NPT: National (American) standard pipe taper.
134. NTSC: National Television System Committee.
135. OCPD: Overcurrent protective device.
136. ONT: Optical network terminal.
137. PC: Personal computer.
138. PCS: Power conversion system.
139. PCU: Power-conditioning unit.
140. Percent obs/ft (percent obs/m): Percent obscuration per unit distance; unit of measure for sensitivity of smoke detectors.
141. PF or pf: Power factor.
142. PHEV: Plug-in hybrid electric vehicle.
143. PIR: Passive infrared.
144. PLC: Programmable logic controller.
145. PLFA: Power-limited fire alarm.
146. PoE: Power over Ethernet.
147. POTS: Plain old telephone service. See "public switched telephone network" definition.
148. PSTN: Public switched telephone network.
149. PTZ: Pan-tilt-zoom.
150. PV: Photovoltaic.
151. PVC: Polyvinyl chloride.
152. pW: Picowatt.
153. RAID: Redundant array of inexpensive disks; redundant array of independent disks.
154. RAM: Random-access memory.
155. RAT: Radio alarm transmitter.
156. REX: Request-to-exit.
157. RF: Radio frequency.
158. RFI: (electrical) Radio-frequency interference; (contract) Request for interpretation.
159. RMS or rms: Root-mean-square.
160. RPM or rpm: Revolutions per minute.
161. SCADA: Supervisory control and data acquisition.
162. SCCR: Short-circuit current rating.
163. SCR: Silicon-controlled rectifier.
164. SIP: Session initiation protocol.
165. SLC: Signaling-line circuit.
166. SPD: Surge protective device.
167. SPDT: Single pole, double throw.
168. sq.: Square.
169. SWD: Switching duty.
170. TCP/IP: Transmission Control Protocol/Internet Protocol.
171. TEFC: Totally enclosed fan-cooled.
172. TR: Tamper resistant.
173. TVSS: Transient voltage surge suppressor.
174. UHF: Ultra-high frequency.
175. UL: (standards) UL Standards & Engagement Inc.; (product categories) UL, LLC.
176. UL CCN: UL Category Control Number.
177. UPS: Uninterruptible power supply.
178. USB: Universal serial bus.
179. UTC: Coordinated universal time.
180. UV: Ultraviolet.
181. V: Volt, unit of electromotive force.

- 182. V(ac): Volt, alternating current.
- 183. V(dc): Volt, direct current.
- 184. VA: Volt-ampere, unit of complex electrical power.
- 185. VAR: Volt-ampere reactive, unit of reactive electrical power.
- 186. VFC: Variable-frequency controller.
- 187. VOM: Volt-ohm-multimeter.
- 188. VoIP: Voice over Internet Protocol.
- 189. VPN: Virtual private network.
- 190. VRLA: Valve regulated lead acid; also called "sealed lead acid (SLA)" or "valve regulated sealed lead acid."
- 191. VU: Volume unit.
- 192. W: Watt, unit of real electrical power.
- 193. WAN: Wide area network.
- 194. Wh: Watt-hour, unit of electrical energy usage.
- 195. WPT: Wireless power transfer.
- 196. WPTE: Wireless power transfer equipment.
- 197. WR: Weather resistant.

B. Abbreviations and Acronyms for Electrical Raceway Types:

- 1. EMT: Electrical metallic tubing.
- 2. EMT-A: Aluminum electrical metallic tubing.
- 3. EMT-S: Steel electrical metallic tubing.
- 4. EMT-SS: Stainless steel electrical metallic tubing.
- 5. ENT: Electrical nonmetallic tubing.
- 6. EPEC: Electrical HDPE underground conduit (thin wall).
- 7. EPEC-A: Type A electrical HDPE underground conduit.
- 8. EPEC-B: Type B electrical HDPE underground conduit.
- 9. ERMC: Electrical rigid metal conduit.
- 10. ERMC-A: Aluminum electrical rigid metal conduit.
- 11. ERMC-S: Steel electrical rigid metal conduit.
- 12. ERMC-S-G: Galvanized-steel electrical rigid metal conduit.
- 13. ERMC-S-PVC: PVC-coated-steel electrical rigid metal conduit.
- 14. ERMC-SS: Stainless steel electrical rigid metal conduit.
- 15. FMC: Flexible metal conduit.
- 16. FMC-A: Aluminum flexible metal conduit.
- 17. FMC-S: Steel flexible metal conduit.
- 18. FMT: Steel flexible metallic tubing.
- 19. FNMC: Flexible nonmetallic conduit. See "LFNC."
- 20. HDPE: HDPE underground conduit (thick wall).
- 21. HDPE-40: Schedule 40 HDPE underground conduit.
- 22. HDPE-80: Schedule 80 HDPE underground conduit.
- 23. IMC: Steel electrical intermediate metal conduit.
- 24. LFMC: Liquidtight flexible metal conduit.
- 25. LFMC-A: Aluminum liquidtight flexible metal conduit.
- 26. LFMC-S: Steel liquidtight flexible metal conduit.
- 27. LFMC-SS: Stainless steel liquidtight flexible metal conduit.
- 28. LFNC: Liquidtight flexible nonmetallic conduit.
- 29. LFNC-A: Layered (Type A) liquidtight flexible nonmetallic conduit.
- 30. LFNC-B: Integral (Type B) liquidtight flexible nonmetallic conduit.
- 31. LFNC-C: Corrugated (Type C) liquidtight flexible nonmetallic conduit.
- 32. PVC: Rigid PVC conduit.
- 33. PVC-40: Schedule 40 rigid PVC conduit.
- 34. PVC-80: Schedule 80 rigid PVC Conduit.
- 35. PVC-A: Type A rigid PVC concrete-encased conduit.
- 36. PVC-EB: Type EB rigid PVC concrete-encased underground conduit.

37. RGS: See ERM-C-S-G.
38. RMC: See ERM-C.
39. RTRC: Reinforced thermosetting resin conduit.
40. RTRC-AG: Low-halogen, aboveground reinforced thermosetting resin conduit.
41. RTRC-AG-HW: Heavy wall, low-halogen, aboveground reinforced thermosetting resin conduit.
42. RTRC-AG-SW: Standard wall, low-halogen, aboveground reinforced thermosetting resin conduit.
43. RTRC-AG-XW: Extra heavy wall, low-halogen, aboveground reinforced thermosetting resin conduit.
44. RTRC-BG: Low-halogen, belowground reinforced thermosetting resin conduit.

C. Abbreviations and Acronyms for Electrical Single-Conductor and Multiple-Conductor Cable Types:

1. AC: Armored cable.
2. CATV: Coaxial general-purpose cable.
3. CATVP: Coaxial plenum cable.
4. CATVR: Coaxial riser cable.
5. CI: Circuit integrity cable.
6. CL2: Class 2 cable.
7. CL2P: Class 2 plenum cable.
8. CL2R: Class 2 riser cable.
9. CL2X: Class 2 cable, limited use.
10. CL3: Class 3 cable.
11. CL3P: Class 3 plenum cable.
12. CL3R: Class 3 riser cable.
13. CL3X: Class 3 cable, limited use.
14. CM: Communications general-purpose cable.
15. CMG: Communications general-purpose cable.
16. CMP: Communications plenum cable.
17. CMR: Communications riser cable.
18. CMUC: Under-carpet communications wire and cable.
19. CMX: Communications cable, limited use.
20. DG: Distributed generation cable.
21. FC: Flat cable.
22. FCC: Flat conductor cable.
23. FPL: Power-limited fire-alarm cable.
24. FPLP: Power-limited fire-alarm plenum cable.
25. FPLR: Power-limited fire-alarm riser cable.
26. IGS: Integrated gas spacer cable.
27. ITC: Instrumentation tray cable.
28. ITC-ER: Instrumentation tray cable, exposed run.
29. MC: Metal-clad cable.
30. MC-FPL/FPLR/FPLP: Metal-clad cable containing FPL, FPLR, or FPLP.
31. MC-HL: Metal-clad cable, hazardous location.
32. MI: Mineral-insulated, metal-sheathed cable.
33. MTW: (machine tool wiring) Moisture-, heat-, and oil-resistant thermoplastic cable.
34. MV: Medium-voltage cable.
35. NM: Nonmetallic sheathed cable.
36. NMC: Nonmetallic sheathed cable with corrosion-resistant nonmetallic jacket.
37. NMS: Nonmetallic sheathed cable with signaling, data, and communications conductors, plus power or control conductors.
38. NPLF: Non-power-limited fire-alarm circuit cable.
39. NPLFP: Non-power-limited fire-alarm circuit cable for environmental air spaces.
40. NPLFR: Non-power-limited fire-alarm circuit riser cable.
41. NUCC: Nonmetallic underground HDPE conduit with conductors.
42. OFC: Conductive optical fiber general-purpose cable.

- 43. OFCG: Conductive optical fiber general-purpose cable.
- 44. OFCP: Conductive optical fiber plenum cable.
- 45. OFCR: Conductive optical fiber riser cable.
- 46. OFN: Nonconductive optical fiber general-purpose cable.
- 47. OFNG: Nonconductive optical fiber general-purpose cable.
- 48. OFNP: Nonconductive optical fiber plenum cable.
- 49. OFNR: Nonconductive optical fiber riser cable.
- 50. P: Marine shipboard cable.
- 51. PLTC: Power-limited tray cable.
- 52. PLTC-ER: Power-limited tray cable, exposed run.
- 53. PV: Photovoltaic cable.
- 54. RHH: (high heat) Thermoset rubber, heat-resistant cable.
- 55. RHW: Thermoset rubber, moisture-resistant cable.
- 56. SA: Silicone rubber cable.
- 57. SE: Service-entrance cable.
- 58. SER: Service-entrance cable, round.
- 59. SEU: Service-entrance cable, flat.
- 60. SIS: Thermoset cable for switchboard and switchgear wiring.
- 61. TBS: Thermoplastic cable with outer braid.
- 62. TC: Tray cable.
- 63. TC-ER: Tray cable, exposed run.
- 64. TC-ER-HL: Tray cable, exposed run, hazardous location.
- 65. THW: Thermoplastic, heat- and moisture-resistant cable.
- 66. THHN: Thermoplastic, heat-resistant cable with nylon jacket outer sheath.
- 67. THHW: Thermoplastic, heat- and moisture-resistant cable.
- 68. THWN: Thermoplastic, moisture- and heat-resistant cable with nylon jacket outer sheath.
- 69. TW: Thermoplastic, moisture-resistant cable.
- 70. UF: Underground feeder and branch-circuit cable.
- 71. USE: Underground service-entrance cable.
- 72. XHH: Cross-linked polyethylene, heat-resistant cable.
- 73. XHHW: Cross-linked polyethylene, heat- and moisture-resistant cable.

D. Abbreviations and Acronyms for Electrical Flexible Cord Types:

- 1. SEO: 600 V extra-hard-usage, hard-service cord with thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer covering for damp locations.
- 2. SEOW: 600 V extra-hard-usage, hard-service cord with thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer covering for damp or wet locations.
- 3. SEOO: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer covering for damp locations.
- 4. SEOWW: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer covering for damp or wet locations.
- 5. SJEO: 300 V hard-usage, junior hard-service cord with thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer cover for damp locations.
- 6. SJEOW: 300 V hard-usage, junior hard-service cord with thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer cover for damp or wet locations.
- 7. SJEOO: 300 V hard-usage, junior hard-service cord with oil-resistant thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer cover for damp locations.
- 8. SJEOOW: 300 V hard-usage, junior hard-service cord with oil-resistant thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer cover for damp or wet locations.
- 9. SJO: 300 V hard-usage, junior hard-service cord with thermoset insulation and oil-resistant thermoset outer cover for damp locations.
- 10. SJOW: 300 V hard-usage, junior hard-service cord with thermoset insulation and oil-resistant thermoset outer cover for damp or wet locations.
- 11. SJOO: 300 V hard-usage, junior hard-service cord with oil-resistant thermoset insulation and oil-resistant thermoset outer cover for damp locations.

12. SJOOW: 300 V hard-usage, junior hard-service cord with oil-resistant thermoset insulation and oil-resistant thermoset outer cover for damp or wet locations.
13. SJTO: 300 V hard-usage, junior hard-service cord with thermoplastic insulation and oil-resistant thermoplastic outer cover for damp locations.
14. SJTOW: 300 V hard-usage, junior hard-service cord with thermoplastic insulation and oil-resistant thermoplastic outer cover for damp or wet locations.
15. SJTOO: 300 V hard-usage, junior hard-service cord with oil-resistant thermoplastic insulation and oil-resistant thermoplastic outer cover for damp locations.
16. SJTOOW: 300 V hard-usage, junior hard-service cord with oil-resistant thermoplastic insulation and oil-resistant thermoplastic outer cover for damp or wet locations.
17. SO: 600 V extra-hard-usage, hard-service cord with thermoset insulation and oil-resistant thermoset outer covering for damp locations.
18. SOW: 600 V extra-hard-usage, hard-service cord with thermoset insulation and oil-resistant thermoset outer covering for damp or wet locations.
19. SOO: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoset insulation and oil-resistant thermoset outer covering for damp locations.
20. SOOW: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoset insulation and oil-resistant thermoset outer covering for damp or wet locations.
21. STO: 600 V extra-hard-usage, hard-service cord with thermoplastic insulation and oil-resistant thermoplastic outer covering for damp locations.
22. STOW: 600 V extra-hard-usage, hard-service cord with thermoplastic insulation and oil-resistant thermoplastic outer covering for damp or wet locations.
23. STOO: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoplastic insulation and oil-resistant thermoplastic outer covering for damp locations.
24. STOOOW: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoplastic insulation and oil-resistant thermoplastic outer covering for damp or wet locations.

E. Abbreviations for Communications Spaces:

1. EF: Entrance facility; generally serves campus or building. EF may include an ER.
2. ER: Equipment room; generally serves campus or building.
3. TE: Telecommunications enclosure; generally serves a single tenant or floor.
4. TR: Telecommunications room; generally serves a single tenant or floor.

F. Abbreviations for Communications Facilities:

1. HC: Horizontal cross-connect; also called "floor distributor" (FD).
2. IC: Intermediate cross-connect; also called "building distributor" (BD).
3. MC: Main cross-connect; also called "campus distributor" (CD).

G. Abbreviations for Grounding and Bonding:

1. BBC: Backbone bonding conductor, for connecting multiple TBBs serving the same floor.
2. PBB: Primary bonding busbar; located in main distribution frame room, ideally near electrical service entrance.
3. RBB: Rack bonding busbar; located in equipment cabinets and racks.
4. SBB: Secondary bonding busbar; located in intermediate distribution frame rooms.
5. TBB: Telecommunications bonding backbone, for connecting SBBs to PBB.
6. TBC: Telecommunications bonding conductor, for connecting PBB to intersystem bonding termination device or busbar at electrical service entrance.
7. TEBC: Telecommunications equipment bonding conductor, for connecting RBBs to SBBs or PBB.
8. UBC: Unit bonding conductor, for connecting individual communications equipment to RBBs or SBBs.

H. Definitions:

1. 8-Position 8-Contact (8P8C) Modular Jack: An unkeyed jack with up to eight contacts commonly used to terminate twisted pair and multiconductor Ethernet cable. Also called a "TIA-1096 miniature 8-position series jack" (8PSJ), or an "IEC 8877 8-pole jack."
 - a. Be careful when suppliers use "RJ45" generically. Obsolete RJ45 jacks used for analog telephone cables have rejection keys. 8P8C jacks used for digital telephone cables and Ethernet cables do not have rejection keys.
2. Agile Receiver: A broadband receiver that can be tuned to any desired channel.
3. Backbone: Primary segment of ERCES between donor antenna and distribution cabling.
4. Basic Impulse Insulation Level (BIL): Reference insulation level expressed in impulse crest voltage with a standard wave not longer than 1.5 times 50 microseconds and 1.5 times 40 microseconds.
5. Broadband: For the purposes of this Section, wide bandwidth equipment or systems that can carry signals occupying in the frequency range of 54 to 1002 MHz. A broadband communication system can simultaneously accommodate television, voice, data, and many other services.
6. Broadcast Media: Loudspeakers, radios, cellular phones, and other media that will carry the selected message to the selected audience.
7. Cable: In accordance with NIST NBS Circular 37 and IEEE standards, in the United States for the purpose of interstate commerce, the definition of "cable" is (1) a conductor with insulation, or a stranded conductor with or without insulation (single-conductor cable); or (2) a combination of conductors insulated from one another (multiple-conductor cable).
8. Carrier: A pure-frequency signal that is modulated to carry information. In the process of modulation, the signal is spread out over a wider band. The carrier frequency is the center frequency on any television channel.
9. Channels: Separate parallel signal paths, from sources to loudspeakers or loudspeaker zones, with separate amplification and switching that permit selection between paths for speaker alternative program signals.
10. Communications Jack: A fixed connecting device designed for insertion of a communications cable plug.
11. Communications Outlet: One or more communications jacks, or cables and plugs, mounted in a box or ring, with a suitable protective cover.
12. Conductive Cable: Cable containing non-current-carrying electrically conductive members such as metallic strength members and metallic vapor barriers.
13. Conductor: In accordance with NIST NBS Circular 37 and IEEE standards, in the United States for the purpose of interstate commerce, the definition of "conductor" is (1) a wire or combination of wires not insulated from one another, suitable for carrying an electric current; (2) (National Electrical Safety Code) a material, usually in the form of wire, cable, or bar, suitable for carrying an electric current; or (3) (general) a substance or body that allows a current of electricity to pass continuously along it.
14. Conduit: A structure containing one or more duct raceways.
15. Control Unit: A system component that monitors inputs and controls outputs through various types of circuits.
 - a. Autonomous Control Unit (ACU): The primary control unit for an in-building mass notification system (MNS).
 - b. Emergency Communications Control Unit (ECCU): A system capable of sending mass notification messages to individual buildings, zones of buildings, individual outdoor loudspeaker arrays, or zones of outdoor loudspeaker arrays; or a building, multiple buildings, outside areas, or a combination of these.
 - c. Fire-alarm control unit (FACU).
 - d. Wireless Control Unit: A component that transmits/receives and processes wireless signals.
16. Designated Seismic System: An architectural, electrical, or mechanical system and its components for which the component importance factor is greater than 1.0 when determined in

- accordance with Section 018123 "Facility Seismic and Wind Criteria."
17. Direct Buried: Installed underground without encasement in concrete or other protective material.
 18. Downlink: The signal from a base station to portable radios.
 19. Duct Bank: An arrangement of conduit providing one or more continuous duct raceways between two points.
 20. Duct Raceway: A single enclosed raceway for conductors or cable.
 21. Electrical Service: The conductors and equipment for delivering electric energy from the serving utility to the wiring system of the premises served.
 22. Emergency Communications System (ECS): A system for the protection of life by indicating the existence of an emergency situation and communicating information necessary to facilitate an appropriate response and action.
 - a. Distributed Recipient Mass Notification System (DRMNS): A system meant to communicate directly to targeted individuals and groups that might not be in a contiguous area.
 - b. Emergency Voice/Alarm Communications System (EVACS): Dedicated manual or automatic facilities for originating and distributing voice instructions, as well as evacuation signals pertaining to an emergency, to the occupants of a building.
 - c. Mass Notification System (MNS): A system used to provide information and instructions to people in buildings or other spaces using intelligible voice communications and including visual signals, text, graphics, tactile, or other communication methods (in-building MNS); and could have the capability to provide real-time information to outdoor areas and to communicate with other notification systems provided for a campus, region, or global geographic setting (wide-area MNS).
 23. Emergency Systems: Those systems legally required and classed as emergency by municipal, state, federal, or other codes, or by any governmental agency having jurisdiction that is designed to ensure continuity of lighting, electrical power, or both, to designated areas and equipment in the event of failure of the normal supply for safety of human life.
 24. Enclosure: The case or housing of an apparatus, or the fence or wall(s) surrounding an installation, to prevent personnel from accidentally contacting energized parts or to protect the equipment from physical damage. Types of enclosures and enclosure covers include the following:
 - a. Cabinet: An enclosure that is designed for either surface mounting or flush mounting and is provided with a frame, mat, or trim in which a swinging door or doors are or can be hung.
 - b. Concrete Box: A box intended for use in poured concrete.
 - c. Conduit Body: A means for providing access to the interior of a conduit or tubing system through one or more removable covers at a junction or terminal point. In the United States, conduit bodies are listed in accordance with outlet box requirements.
 - d. Conduit Box: A box having threaded openings or knockouts for conduit, EMT, or fittings.
 - e. Cover Plate: A cover designed for protecting wiring devices installed in flush-mounted device boxes while permitting their safe operation; also called a faceplate or wallplate.
 - f. Cutout Box: An enclosure designed for surface mounting that has swinging doors or covers secured directly to and telescoping with the walls of the enclosure.
 - g. Device Box: A box with provisions for mounting a wiring device directly to the box.
 - h. Extension Ring: A ring intended to extend the sides of an outlet box or device box to increase the box depth, volume, or both.
 - i. Floor Box: A box mounted in the floor intended for use with a floor box cover and other components to complete the floor box enclosure.
 - j. Floor-Mounted Enclosure: A floor box and floor box cover assembly with means to mount in the floor that is sealed against the entrance of scrub water at the floor level.
 - k. Floor Nozzle: An enclosure used on a wiring system, intended primarily as a housing for a receptacle, provided with a means, such as a collar, for surface-mounting on a floor, which may or may not include a stem to support it above the floor level, and is sealed against the

- entrance of scrub water at the floor level.
- l. Junction Box: A box with a blank cover that joins different runs of raceway or cable and provides space for connection and branching of the enclosed conductors.
 - m. Outlet Box: A box that provides access to a wiring system having pryout openings, knockouts, threaded entries, or hubs in either the sides or the back, or both, for the entrance of conduit, conduit or cable fittings, or cables, with provisions for mounting an outlet box cover, but without provisions for mounting a wiring device directly to the box.
 - n. Pedestal Floor Box Cover: A floor box cover that, when installed as intended, provides a means for typically vertical or near-vertical mounting of receptacle outlets above the floor's finished surface.
 - o. Pull Box: A box with a blank cover that joins different runs of raceway and provides access for pulling or replacing the enclosed cables or conductors.
 - p. Raised-Floor Box: A floor box intended for use in raised floors.
 - q. Recessed Access Floor Box: A floor box with provisions for mounting wiring devices below the floor surface.
 - r. Recessed Access Floor Box Cover: A floor box cover with provisions for passage of cords to recessed wiring devices mounted within a recessed floor box.
 - s. Ring: A sleeve, which is not necessarily round, used for positioning a recessed wiring device flush with the plaster, concrete, drywall, or other wall surface.
 - t. Ring Cover: A box cover, with raised center portion to accommodate a specific wall or ceiling thickness, for mounting wiring devices or luminaires flush with the surface.
 - u. Termination Box: An enclosure designed for installation of termination base assemblies consisting of bus bars, terminal strips, or terminal blocks with provision for wire connectors to accommodate incoming or outgoing conductors, or both.
25. Essential Electrical Systems: (healthcare facilities) Those systems designed to ensure continuity of electrical power to designated areas and functions of a healthcare facility during disruption of normal power sources, and also to minimize disruption within the internal wiring system.
26. Fault Limited: Providing or being served by a source of electrical power that is limited to not more than 100 W when tested in accordance with UL 62368-1.
- a. The term "fault limited" is intended to encompass most Class 1, 2, and 3 power-limited sources complying with Article 725 of NFPA 70; Class ES1 and ES2 electrical energy sources that are Class PS1 electrical power sources (e.g., USB); and Class ES3 electrical energy sources that are Class PS1 and PS2 electrical power sources (e.g., PoE). See UL 62368-1 for discussion of classes of electrical energy sources and classes of electrical power sources.
27. Headend: The control center of the MATV system, where incoming signals are amplified, converted, processed, and combined into a common cable along with any locally originated television signals, for transmission to user-interface points. It is also called the "central retransmission facility."
28. High-Performance Building: A building that integrates and optimizes on a life-cycle basis all major high-performance attributes, including energy conservation, environment, safety, security, durability, accessibility, cost-benefit, productivity, sustainability, functionality, and operational considerations.
29. High Power Loudspeaker Array (HPLA): A product providing capability for voice and tone communication to large outdoor areas.
30. Jack: Also commonly called an "outlet," it is the fixed, female connector.
31. Jacket: A continuous nonmetallic outer covering for conductors or cables.
32. Local Operator Console (LOC): Equipment used by authorized personnel and emergency responders to activate and operate a mass notification system (MNS).
33. Luminaire: A complete lighting unit consisting of a light source such as a lamp, together with the parts designed to position the light source and connect it to the power supply. It may also include parts to protect the light source or the ballast or to distribute the light.
34. Master Control Unit: System component that accepts inputs from other control units and may also

perform control-unit functions. The unit has limited capacity for the number of protected zones and is installed at an unattended location or at a location where it is not the attendant's primary function to monitor the security system.

35. Mode: The terms "Active Mode," "Off Mode," and "Standby Mode" are used as defined in the Energy Independence and Security Act (EISA) of 2007.
36. Monitoring: Acquisition, processing, communication, and display of system and equipment status data and event and alarm signals.
37. Monitoring Station: Facility that receives signals and has personnel in attendance at all times to respond to signals. A central station is a monitoring station that is listed.
38. Multi-Outlet Assembly: A type of surface, flush, or freestanding raceway designed to hold conductors, receptacles, and switches, assembled in the field or at the factory.
39. Nonsecure: Unlocked or open. (For doors and gates.)
40. One-Line Diagram: A diagram that shows, by means of single lines and graphic symbols, the course of an electric circuit or system of circuits and the component devices or parts used therein. Also called "single-line diagram."
41. Plenum: A compartment or chamber to which one or more air ducts are connected and that forms part of the air distribution system.
42. Plug: Also commonly called a "connector," it is the removable, male telecommunications connector.
43. Protected Zone: A protected premises or an area within a protected premises that is provided with means to prevent an unwanted event.
44. Protective Device: A device that senses when an abnormal current flow, abnormal voltage potential, or other abnormal electrical waveform exists and then disconnects the affected portion of the circuit from the system. Common protective devices include fuses, circuit breakers, relays, ground-fault circuit interrupters, and arc-fault circuit interrupters.
45. Public Switched Telephone Network (PSTN): Analog telephone technology that uses twisted pair cables from a telephone-provider central office for the transmission medium. "PSTN" refers to the telephone network; "POTS" refers to the individual subscriber line.
46. Receptacle: A fixed connecting device arranged for insertion of a power cord plug. Also called a power jack.
47. Receptacle Outlet: One or more receptacles mounted in a box with a suitable protective cover.
48. Screen: A metallic layer, either a foil or braid, placed around a pair or group of conductors.
49. Secure: Closed and locked and with no unlock or open commands pending. (For doors and gates.)
50. Sheath: A continuous metallic covering for conductors or cables.
51. Shield: A metallic layer, either a foil or braid, placed around a pair or group of conductors.
52. Systems Integration: The bringing together of components of several systems containing interacting components to achieve indicated functional operation of combined systems.
53. UL Category Control Number (CCN): An alphabetic or alphanumeric code used to identify product categories covered by UL's Listing, Classification, and Recognition Services.
54. Uplink: The signal from a portable radio to the base station.
55. Voice over Internet Protocol (VoIP): Digital telephone packet technology that uses the internet for its transmission medium.
56. Voltage Class: For specified circuits and equipment, voltage classes are defined as follows:
 - a. Control Voltage: Having electromotive force between any two conductors, or between a single conductor and ground, that is supplied from a battery or other Class 2 or Class 3 power-limited source.
 - b. Line Voltage: (1) (controls) Designed to operate using the supplied low-voltage power without transformation. (2) (transmission lines, transformers, SPDs) The line-to-line voltage of the supplying power system.
 - c. Extra-Low Voltage (ELV): Not having electromotive force between any two conductors, or between a single conductor and ground, exceeding 30 V(ac rms), 42 V(ac peak), or 60 V(dc).
 - d. Low Voltage (LV): Having electromotive force between any two conductors, or between a

- single conductor and ground, that is rated above 30 V but not exceeding 1000 V.
 - e. Medium Voltage (MV): Having electromotive force between any two conductors, or between a single conductor and ground, that is rated about 1 kV but not exceeding 69 kV.
 - f. High Voltage: (1) (circuits) Having electromotive force between any two conductors, or between a single conductor and ground, that is rated above 69 kV but not exceeding 230 kV. (2) (safety) Having sufficient electromotive force to inflict bodily harm or injury.
57. Wire: In accordance with NIST NBS Circular 37 and IEEE standards, in the United States for the purpose of interstate commerce, the definition of "wire" is a slender rod or filament of drawn metal. A group of small wires used as a single wire is properly called a "stranded wire." A wire or stranded wire covered with insulation is properly called an "insulated wire" or a "single-conductor cable." Nevertheless, when the context indicates that the wire is insulated, the term "wire" will be understood to include the insulation.
58. Zone. A defined area within a protected premises. It is a space or area for which an intrusion must be detected and uniquely identified. The sensor or group of sensors must then be assigned to perform the detection, and any interface equipment between sensors and communication must link to master control unit.

1.3 COORDINATION

- A. Interruption of Existing Electrical Service: Do not interrupt electrical service to facilities occupied by Owner or others unless permitted under the following conditions:
- 1. Notify **[Architect][Construction Manager][Owner][Tenant]** no fewer than **[seven]<Insert number>** days in advance of proposed interruption of electrical service.
 - 2. Do not proceed with interruption of electrical service without **[Architect's][Construction Manager's][Owner's][Tenant's]** written permission.
 - 3. Coordinate interruption with systems impacted by outage including, but not limited to, the following:
 - a. Exercising generators.
 - b. Emergency lighting.
 - c. Elevators.
 - d. Fire-alarm systems.
 - 4. Arrange to provide temporary emergency and standby electrical **[service][or][power]** so facility may remain occupied during the outage in accordance with requirements specified in Section 015000 "Temporary Facilities and Controls." Coordinate power requirements with Owner.
- B. Interruption of Existing Telephone Service: Do not interrupt telephone service to facilities occupied by Owner or others unless permitted under the following conditions:
- 1. Notify **[Architect][Construction Manager][Owner][Tenant]** no fewer than **[seven]<Insert number>** days in advance of proposed interruption of telephone service.
 - 2. Do not proceed with interruption of telephone service without **[Architect's][Construction Manager's][Owner's][Tenant's]** written permission.
- C. Interruption of Existing Internet Service: Do not interrupt internet service to facilities occupied by Owner or others unless permitted under the following conditions:
- 1. Notify **[Architect][Construction Manager][Owner][Tenant]** no fewer than **[seven]<Insert number>** days in advance of proposed interruption of internet service.
 - 2. Do not proceed with interruption of internet service without **[Architect's][Construction Manager's][Owner's][Tenant's]** written permission.

- D. Interruption of Existing Security System: Do not interrupt security system to facilities occupied by Owner or others unless permitted under the following conditions:
1. Notify **[Architect][Construction Manager][Owner][Tenant]** no fewer than **[seven]<Insert number>** days in advance of proposed interruption of security system.
 2. Do not proceed with interruption of security system without **[Architect's][Construction Manager's][Owner's][Tenant's]** written permission.
- E. Interruption of Existing Fire-Alarm System: Do not interrupt fire-alarm system to facilities occupied by Owner or others unless permitted under the following conditions:
1. Notify **[Architect][Construction Manager][Owner][Tenant]** no fewer than **[seven]<Insert number>** days in advance of proposed interruption of fire-alarm system.
 2. Do not proceed with interruption of fire-alarm system without **[Architect's][Construction Manager's][Owner's][Tenant's]** written permission.

1.4 PREINSTALLATION MEETINGS

- A. Electrical Preconstruction Conference: Schedule conference with Architect and Owner, not later than **[10]<Insert number>** days after Notice to Proceed. Agenda topics include, but are not limited to, the following:
1. Electrical installation schedule.
 2. Status of power system studies.
 3. Value analysis proposals and requests for substitution of electrical equipment.
 4. Utility work coordination and class of service requests.
 5. Commissioning activities.
 6. Sustainability activities[, **including Measurement and Verification Plan**].
- B. Communications Preconstruction Conference: Schedule conference with Architect and Owner not later than **[10]<Insert number>** days after Notice to Proceed. Agenda topics include, but are not limited to, the following:
1. Installation schedule for communications systems.
 2. Value analysis proposals and requests for substitution of communications equipment.
 3. Utility services work coordination and monitoring service requests.
 4. Commissioning activities.
 5. Sustainability activities.
- C. Electronic Safety and Security Preconstruction Conference: Schedule conference with Architect and Owner not later than **[10]<Insert number>** days after Notice to Proceed. Agenda topics include, but are not limited to, the following:
1. Installation schedule for security, fire-alarm, and other life-safety systems.
 2. Value analysis proposals and requests for substitution of electronic safety and security equipment.
 3. Monitoring services work coordination and monitoring service requests.
 4. Commissioning activities.
 5. Sustainability activities.

1.5 SEQUENCING

- A. Conduct and submit results of power system studies before submitting product data and Shop Drawings

for electrical equipment.

1.6 SCHEDULING

- A. **<Insert requirements for unusual scheduling coordination>.**

1.7 ACTION SUBMITTALS

- A. Coordination Drawings for Structural Supports: Show coordination of structural supports for equipment and devices, including restraints and bracing for control of seismic and wind loads, with other systems, equipment, and structural supports in the vicinity.
- B. Coordination Drawings for Ceiling Areas: Where indicated on drawings, provide reflected ceiling plan(s), supplemented by sections and other details, drawn to scale, in accordance with Section 013100 "Project Management and Coordination," on which the following items are shown and coordinated with each other, using input from installers of the items involved:
1. Suspended ceiling components.
 2. Structural members to which equipment and suspension systems will be attached.
 3. Size and location of access panels on ceilings.
 4. Elevation, size, and route of sprinkler piping.
 5. Elevation, size, and route of plumbing piping.
 6. Elevation, size, and route of ductwork.
 7. Elevation, size, and route of cable tray.
 8. Elevation, size, and route of conduit.
 9. Elevation and size of wall-mounted and ceiling-mounted equipment.
 10. Access panels.
 11. Sprinklers.
 12. Air inlets and outlets.
 13. Control modules.
 14. Luminaires.
 15. Communications devices.
 16. Speakers.
 17. Security devices.
 18. Fire-alarm devices.
 19. Indicate clear dimensions for maintenance access in front of equipment.
 20. Indicate dimensions of fully open access doors.
- C. Coordination Drawings for Cable Tray Routing: Reflected ceiling plan(s), supplemented by sections and other details, drawn to scale, in accordance with Section 013100 "Project Management and Coordination," on which the following items are shown and coordinated with each other, using input from installers of the items involved:
1. Elevation, size, and route of cable trays.
 2. Relationships between components and adjacent structural, electrical, and mechanical elements.
 3. Vertical and horizontal offsets and transitions.
 4. Elevation and size of sleeves for wall, ceiling, and floor cable penetrations.
 5. Elevation of ceilings and size of ceiling tiles.
 6. Locations of access panels on ceilings.
 7. Locations where cable tray crosses or parallels sprinkler piping.
 8. Locations where cable tray crosses plumbing piping.
 9. Locations where cable tray crosses or parallels ductwork.
 10. Locations of access panels on ductwork.
 11. Locations where cable tray crosses conduit.

12. Items blocking access around cable trays, including the following:
 - a. Light fixtures.
 - b. Speakers.
 - c. Fire-alarm devices.
 - d. Power outlets.
 - e. Wall-mounted equipment.
 - f. Equipment racks.
 - g. Furniture.
 - h. Door swings.
 - i. Building features.
 13. Indicate clear dimension between cable tray and walls or obstructions that are closer than **10 ft (3 m)**.
 14. Highlight locations where cable tray is greater than **3 ft (1 m)** above ceilings. Explain how personnel access will be accommodated for cable tray maintenance.
- D. Coordination Drawings for Conduit Routing: Conduit routing plans, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of items involved:
1. Structural members in paths of conduit groups with common supports.
 2. HVAC and plumbing items and architectural features in paths of conduit groups with common supports.
- E. Coordination Drawings for Bus Assembly Routing: Floor plans and sections, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of items involved:
1. Scaled bus-assembly layouts and relationships between components and adjacent structural, mechanical, and electrical elements.
 2. Vertical and horizontal enclosed bus-assembly runs, offsets, and transitions.
 3. Clearances for access above and to the side of enclosed bus assemblies.
 4. Vertical elevation of enclosed bus assemblies above the floor or bottom of structure.
 5. Support locations, type of support, and weight on each support.
 6. Location of adjacent construction elements, including luminaires, HVAC and plumbing equipment, fire sprinklers and piping, signal and control devices, and other equipment.
- F. Coordination Drawings for Large Equipment Indoor Installations:
1. Location plan, drawn to scale, showing heavy equipment or truck access paths to loading dock or other freight access into building. Indicate available width and height of doors or openings.
 2. Floor plan for entry floor and floor where equipment is located, drawn to scale, showing heavy equipment access paths for maintenance and replacement, with the following items shown and coordinated with each other, based on input from installers of the items involved:
 - a. Dimensioned concrete bases, outlines of equipment, conduit entries, and grounding equipment locations.
 - b. If freight elevator must be used, indicate width and height of door and depth of car. Indicate if large equipment must be tipped to use elevator.
 - c. Dimensioned working clearances and dedicated areas below and around electrical equipment where obstructions and tripping hazards are prohibited.
 3. Reflected ceiling plans for entry floor and floor where equipment is located, drawn to scale, on which the following items are shown and coordinated with each other, based on input from installers of the items involved:

- a. Support locations, type of support, and weight on each support. Locate structural supports for structure-supported raceways[, **busways**,][**and seismic bracing**].
- b. Location of lighting fixtures, sprinkler piping and sprinklers, ducts and diffusers, and other obstructions, indicating available overhead clearance.
- c. Dimensioned working clearances and dedicated areas above and around electrical equipment where foreign systems and equipment are prohibited.

G. Coordination Drawings for Large Equipment Outdoor Installations:

1. Utilities site plan, drawn to scale, showing heavy equipment or truck access paths for maintenance and replacement, with the following items shown and coordinated with each other, based on input from installers of the items involved:
 - a. Fences and walls, dimensioned concrete bases, outlines of equipment, conduit entries, and grounding and bonding locations.
 - b. Indicate clear dimensions for fence gates and wall openings.
 - c. Indicate depth and type of ground cover, and locations of trees, shrubbery, and other obstructions in access path.
 - d. Indicate clear height below tree branches, overhead lines, bridges, and other overhead obstructions in access path, or where cranes and hoists will be needed to handle large electrical equipment.
 - e. Support locations, type of support, and weight on each support. Locate structural supports for structure-supported raceways[, **busways**,][**and seismic bracing**].
 - f. Dimensioned working clearances and dedicated areas around electrical equipment.

H. Coordination Drawings for Duct Banks:

1. Show duct profiles and coordination with other utilities and underground structures.
2. Include plans and sections, drawn to scale, and show bends and locations of expansion fittings.

I. Sustainable Design Submittals:

1. Electrical Waste Management (Wire): Provide documentation for quantity of abandoned electrical wire that has been removed from Project site, in accordance with Rule 645.5(G) of NFPA 70, and provide verification that abandoned wire containing lead stabilizers has been identified and disposed of in accordance with jurisdictional hazardous waste requirements.
2. Electrical Waste Management (Lamps): Provide documentation that an area has been provided to serve entire Project for collection and storage of fluorescent and HID lamps and ballasts for their appropriate disposal or recycling in accordance with jurisdictional hazardous waste requirements.
3. Electrical Waste Management (Electronics and Batteries): Provide documentation that an area has been provided to serve entire Project for collection and storage of electronics, alkaline batteries, and rechargeable batteries for their appropriate disposal or recycling in accordance with jurisdictional hazardous waste requirements.

1.8 INFORMATIONAL SUBMITTALS

A. Electrical Installation Schedule: At preconstruction meeting, and periodically thereafter as dates change, provide schedule for electrical installation Work to Owner and Architect including, but not limited to, milestone dates for the following activities:

1. Submission of power system studies.
2. Submission of specified coordination drawings.
3. Submission of action submittals specified in Division 26.
4. Orders placed for major electrical equipment.

5. Arrival of major electrical equipment on-site.
6. Preinstallation meetings specified in Division 26.
7. Utility service outages.
8. Utility service inspection and activation.
9. Mockup reviews.
10. Closing of walls and ceilings containing electrical Work.
11. System startup, testing, and commissioning activities for major electrical equipment.
12. System startup, testing, and commissioning activities for emergency lighting.
13. System startup, testing, and commissioning activities for automation systems (SCADA, BMS, lighting, HVAC, fire alarm, fire pump, etc.).
14. Pouring of concrete housekeeping pads for electrical equipment and testing of concrete samples.
15. Requests for special inspections.
16. Requests for inspections by authorities having jurisdiction.

B. Installation Schedule for Communications Systems: At preconstruction meeting, and periodically thereafter as dates change, provide schedule for installation of the communications Work to Owner and Architect including, but not limited to, milestone dates for the following activities:

1. Submission of specified coordination drawings.
2. Submission of action submittals specified in Division 27.
3. Orders placed for major equipment.
4. Arrival of major equipment on-site.
5. Preinstallation meetings specified in Division 27.
6. Telephone and internet service outages.
7. Telephone and internet service inspection and activation.
8. Mockup reviews.
9. Closing of walls and ceilings containing the communications Work.
10. System startup, testing, and commissioning activities for communications equipment.
11. System startup, testing, and commissioning activities for the Work specified in other divisions that depends on the Work specified in Division 27.
12. System startup, testing, and commissioning activities for automation systems (SCADA, BMS, lighting, HVAC, fire alarm, fire pump, etc.).
13. Requests for special inspections.
14. Requests for inspections by authorities having jurisdiction.

C. Installation Schedule for Security, Fire-Alarm, and Other Life-Safety Systems: At preconstruction meeting, and periodically thereafter as dates change, provide schedule for installation of security, fire-alarm, and the other life-safety Work to Owner and Architect including, but not limited to, milestone dates for the following activities:

1. Submission of specified coordination drawings.
2. Submission of action submittals specified in Division 28.
3. Orders placed for major equipment.
4. Arrival of major equipment on-site.
5. Preinstallation meetings specified in Division 28.
6. Security and fire-alarm system outages.
7. Security and fire-alarm system inspection and activation.
8. Mockup reviews.
9. Closing of walls and ceilings containing the security and fire-alarm Work.
10. System startup, testing, and commissioning activities for security and fire-alarm equipment.
11. System startup, testing, and commissioning activities for fire-alarm interfaces with the Work specified in other divisions.
12. System startup, testing, and commissioning activities for automation systems (SCADA, BMS, lighting, HVAC, fire alarm, fire pump, etc.).
13. Requests for special inspections.

14. Requests for inspections by authorities having jurisdiction.
- D. Welding certificates.
- E. Seismic Performance Certificates: Provide special certification for designated seismic systems as required to meet requirements specified in Section 018123 "Facility Seismic and Wind Criteria" for all designated seismic systems identified on the Drawings or in the Specifications.
 1. Include the following information:
 - a. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
 - b. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
 - c. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.
 - d. Detailed description of conduit support devices and interconnections on which the certification is based and their installation requirements.
 - e. Equipment manufacturer's written certification for each designated active electrical seismic device and system, stating that it will remain operable following the basis-of-design seismic criteria specified in Section 018123 "Facility Seismic and Wind Criteria."
 - f. Equipment manufacturer's written certification that components with hazardous contents maintain containment following the basis-of-design seismic criteria specified in Section 018123 "Facility Seismic and Wind Criteria."
 - g. Evidence demonstrating compliance with these requirements for approval to authorities having jurisdiction after review and acceptance by qualified structural professional engineer.
- F. Wind Performance Certificates: Provide special certification for systems and components designated on the Drawings or in the Specifications to be subject to high wind exposure and impact damage.
 1. Include the following information:
 - a. Provide equipment manufacturer's written certification for each designated system and component, stating that it will remain in place and operable following the design wind event and comply with requirements of authorities having jurisdiction.
 - b. Certification must be based on ICC-ES or similar nationally recognized testing standard procedures acceptable to authorities having jurisdiction.
- G. Qualification Statements:
 1. For qualified regional manufacturer.
 2. For structural professional engineer.
 3. For electrical professional engineer.
 4. For lighting professional engineer.
 5. For EPM specialist.
 6. For welder.
 7. For ERMCS-PVC raceway Installer.
 8. For medium-voltage cable Installer.
 9. For medium-voltage duct Installer.
 10. For medium-voltage equipment Installer.
 11. For electrical power monitoring Installer.
 12. For switchboard Installer.
 13. For EVSE Installer.
 14. For generator set Installer.
 15. For lightning protection system Installer.

16. For theatrical lighting Installer.
17. For exterior athletic lighting Installer.
18. For power quality specialist.
19. For electrical testing and inspecting agency and its on-site electrical testing supervisor.
20. For structural testing and inspecting agency.
21. For outdoor pole testing and inspecting agency.
22. For luminaire photometric testing laboratory.
23. For lighting testing and inspecting agency.
24. For communications design professional.
25. For communications cable Installer.
26. For communications testing and inspecting agency and its on-site communications testing supervisor.
27. For nurse call/code blue system Installer.
28. For security design professional.
29. For fire-alarm system design professional.
30. For mass notification design professional.
31. For IB-PSC design professional.
32. For general radiotelephone operator license (GROL) designer.
33. For emergency communications design professional.
34. For fire-alarm cable Installer and its on-site fire-alarm cable installation supervisor.
35. For security testing and inspecting agency and its on-site security testing supervisor.
36. For intrusion detection systems installer.
37. For perimeter security systems integrator.
38. For fire-alarm testing agency and its on-site fire-alarm testing supervisor.
39. For detention electronics systems Installer.
40. For detention electronics systems integrator.
41. For detention electronics systems testing and inspecting agency.

1.9 CLOSEOUT SUBMITTALS

A. Facility EMP Binders:

1. Complete Set: On **[approved online or cloud solution][and][USB media that is clearly and permanently labeled with attached placard on lanyard to prevent misplacement]**.
2. Volumes 2 and 8: Reproducible hardcopy on archival quality, **28 lb (105 GSM)**, acid-free, bond paper.

B. Operation and Maintenance Data:

1. Provide emergency operation, normal operation, and preventive maintenance manuals for each system, equipment, and device listed below:
 - a. **<Insert system, equipment, or device>.**
2. Include the following information:
 - a. Manufacturer's operating specifications.
 - b. User's guides for software and hardware.
 - c. Schedule of maintenance material items recommended to be stored at the Project site.
 - d. Detailed instructions covering operation under both normal and abnormal conditions.
 - e. Time-current curves for overcurrent protective devices and manufacturer's written instructions for testing and adjusting their settings.
 - f. List of load-current and overload-relay heaters with related motor nameplate data.
 - g. List of lamp types and photoelectric relays used on the Project, with ANSI and

- manufacturers' codes.
 - h. Manufacturer's instructions for setting field-adjustable components.
 - i. Manufacturer's instructions for testing, adjusting, and reprogramming microprocessor controls.
 - j. EPSS: Manufacturer's system checklists, maintenance schedule, and maintenance log sheets in accordance with NFPA 110.
 - k. Exterior pole inspection and repair procedures.
 - C. Software and Firmware Operational Documentation: Provide software and firmware operational documentation[**in Facility EPM Binders**], including the following:
 - 1. Software operating and upgrade manuals.
 - 2. Names, versions, and website addresses for locations of installed software.
 - 3. Device address list.
 - 4. Printout of software application and graphic screens.
 - 5. Testing and adjusting of panic and emergency power features.
 - 6. For lighting controls, include the following:
 - a. Adjustments of scene preset controls, adjustable fade rates, and fade overrides.
 - b. Operation of adjustable zone controls.
 - D. Software:
 - 1. Program Software Backup: Provide [**username and password for approved online or cloud solution**][**and**][**USB media that is clearly and permanently labeled with attached placard on lanyard to prevent misplacement**].
 - 2. Provide to Owner upgrades and unrestricted licenses[**for Government use**] for installed and backup software, including operating systems and programming tools required for operation and maintenance.
- 1.10 MOCKUPS
- A. Simple Mockups for Coordinating Accessibility of Electrical Devices around Fixed Furnishings and Equipment:
 - 1. Build simple mockups using art supplies and other inexpensive materials for verification of general arrangement, actual dimensions, and accessibility of **<Insert identification of room and fabrication>** by [**Architect**][**Owner**][**Tenant**]**<Insert approving stakeholders>** prior to fabrication and installation of Work. Depict products from all Divisions requiring coordination, including, but not limited to, fixed furnishings, casework, outlet covers and plates, HVAC controls, exposed raceway, exposed plumbing, equipment, and signage.
 - B. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.

PART 2 - PRODUCTS

2.1 SUBSTITUTION LIMITATIONS FOR ELECTRICAL EQUIPMENT

- A. Substitution requests for electrical equipment will be entertained under the following conditions:
 - 1. Substitution requests may be submitted for consideration prior to the Electrical Preconstruction Conference if accompanied by value analysis data indicating that substitution will comply with the

Project performance requirements while significantly increasing value for Owner throughout life of facility.

2. Substitution requests may be submitted for consideration concurrently with submission of power system study reports when those reports indicate that substitution is necessary for safety of maintenance personnel and facility occupants.
3. Contractor is responsible for sequencing and scheduling power system studies and electrical equipment procurement. After the Electrical Preconstruction Conference, insufficient lead time for electrical equipment delivery will not be considered a valid reason for substitution.

2.2 SUBSTITUTION LIMITATIONS FOR COMMUNICATIONS EQUIPMENT

A. Substitution requests for communications equipment will be entertained under the following conditions:

1. Substitution requests may be submitted for consideration prior to the Communications Preconstruction Conference if accompanied by value analysis data indicating that substitution will comply with the Project performance requirements while significantly increasing value for Owner throughout life of facility.
2. Contractor is responsible for sequencing and scheduling equipment procurement. After the Communications Preconstruction Conference, insufficient lead time for equipment delivery will not be considered a valid reason for substitution.

2.3 SUBSTITUTION LIMITATIONS FOR ELECTRONIC SAFETY AND SECURITY EQUIPMENT

A. Substitution requests for electronic safety and security equipment will be entertained under the following conditions:

1. Substitution requests may be submitted for consideration prior to the Electronic Safety and Security Preconstruction Conference if accompanied by value analysis data indicating that substitution will comply with the Project performance requirements while significantly increasing value for Owner throughout life of facility.
2. Contractor is responsible for sequencing and scheduling equipment procurement. After the Electronic Safety and Security Preconstruction Conference, insufficient lead time for equipment delivery will not be considered a valid reason for substitution.

2.4 FACILITY ELECTRICAL MAINTENANCE PROGRAM (EMP) BINDERS

A. Description: Set of binders containing operation and maintenance data for facility's electrical equipment that was compiled during analysis of installed electrical Work for Facility EMP development.

B. Applicable Standards:

1. Regulatory Requirements: Comply with requirements in NFPA 70B.
2. General Characteristics:
 - a. Volume 1 - Introduction:
 - 1) Summarize how Facility EMP analysis was performed, how data were collected, and how volumes are organized.
 - 2) Describe Facility EMP and provide recommended policies and procedures for implementing the program and keeping it current.
 - 3) Provide place for Owner to identify contact information for employees responsible for implementing and maintaining Facility EMP.

- b. Volume 2 - Facility Safety, Hazards Awareness, and Emergency Procedures:
 - 1) Include training requirements for employees and contractors.
 - 2) Include list of known facility hazards impacting IT&R activities.
 - 3) Include approval and permitting procedures for IT&R activities.
 - 4) Include incident emergency response procedures.
 - 5) Include emergency shutdown procedures.
 - 6) Include electrical disaster recovery procedures.
 - 7) Include procedures for investigating the following incidents:
 - a) Electrical safety incidents.
 - b) Equipment malfunctions.
 - c) Unintended operations or alarms.
 - d) Operation of protective devices.
- c. Volume 3 - Operating Procedures for Electrical Equipment and Controls:
 - 1) **<Insert requirements>.**
- d. Volume 4 - Facility Diagrams and Schedules:
 - 1) Include single-line diagrams.
 - 2) Include grounding and bonding diagrams.
 - 3) Include essential wiring diagrams.
 - 4) Include system automation diagrams (SCADA, BMS, lighting, HVAC, etc.).
 - 5) Include records of switchgear, switchboard, and panelboard schedules.
 - 6) Include time-current curves for overcurrent protective devices.
 - 7) Include list of load-current and overload-relay heaters with related motor nameplate data.
- e. Volume 5 - Inventory of Facility Equipment Using Electrical Power:
 - 1) Include simplified floor plans showing equipment locations.
 - 2) Identify critical equipment (electrical or otherwise).
 - 3) Include identifying designations and nameplate data.
 - 4) Include warranty and maintenance contract information.
- f. Volume 6 - Inventory of Facility Tools, Supplies, and Personnel Protective Equipment:
 - 1) Include schedules of maintenance material items recommended to be stored at facility.
 - 2) Include list of lamp types and photoelectric relays used in facility with ANSI and manufacturers' codes.
 - 3) Include calibration and servicing data for each item.
- g. Volume 7 - Inspection, Testing, and Repair (IT&R) Plan:
 - 1) Include tables showing frequency of activities for each item.
 - 2) Include annual schedule with activities mapped to specific days of the year.
 - 3) Include exterior pole inspection and repair procedures.
- h. Volume 8 - Inspection, Testing, and Repair (IT&R) Forms:
 - 1) **<Insert requirements>.**
- i. Volume 9 - Inspection, Testing, and Repair (IT&R) Procedures:

- 1) **<Insert requirements>.**
- j. Volume 10 - Spare Parts List:
 - 1) Include list of all parts required to perform IT&R procedures.
 - 2) Identify quantities of which parts are recommended to be stored on-site.
 - 3) Include source contact information and budget cost for each item.
- k. Volume 11 - Construction Project Closeout Record Documentation:
 - 1) Include records of power system studies and photometric studies.
 - 2) Include records of risk assessment studies.
 - 3) Include records of electrical system startup and commissioning activities.
 - 4) Include records of baseline inspections and tests.
 - 5) Include records of baseline infrared photographs with normal light photographs showing the location, direction, angle, and conditions necessary for reproducing each infrared photograph.
 - 6) Include records of baseline settings for adjustable equipment and devices.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Verification of Conditions:
 1. **<Insert Project requirements>.**
- B. Preinstallation Testing:
 1. **<Insert Project requirements>.**
- C. Evaluation and Assessment:
 1. **<Insert Project requirements>.**

3.2 PREPARATION

- A. Protection of In-Place Conditions:
 1. **<Insert Project requirements>.**

3.3 DEVELOPMENT OF FACILITY ELECTRICAL MAINTENANCE PROGRAM (EMP)

- A. Facility EMP must be developed by qualified EMP specialist.
- B. Conduct Facility EMP analysis in accordance with NFPA 70B requirements.
 1. Renovation Projects:
 - a. Facility diagrams must include connected existing equipment for entire facility where

- known. Areas of uncertainty should be clearly indicated.
- b. Obtain copies of existing operation and maintenance data and existing Facility EMP information from Owner.
- c. Facility EMP analysis should identify existing equipment that does not have available operation and maintenance data, and should explain Owner's risks because this equipment is not included in Facility EMP.
- d. Data for existing equipment outside scope of the Project may be inserted in Facility EMP Binders without analysis.
- e. Data for existing equipment impacted by scope of the Project should be analyzed and documented similar to the Project's new equipment data as much as possible.

- C. Compile operation and maintenance data from Facility EMP analysis and submit **[updated]** Facility EMP Binders.

3.4 INSTALLATION OF ELECTRICAL WORK

- A. Unless more stringent requirements are specified in the Contract Documents or manufacturers' written instructions, comply with NFPA 70 and NECA NEIS 1 for installation of electrical Work on the Project. Consult Architect for resolution of conflicting requirements.

3.5 CLEANING

- A. Electrical or Electronic Waste Management:
 - 1. **<Insert requirements for special handling or diversion of electrical and electronics waste for recycling or disposal>.**

3.6 CLOSEOUT ACTIVITIES

- A. Training:
 - 1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to implement **[updated]** Facility EMP.
 - b. **<Insert system or equipment>.**
 - 2. **[Provide video recordings of training sessions to Owner.][Allow Owner to record training sessions.]**

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 01 50 51 - HANDLING OF LIGHTING BALLASTS AND LAMPS CONTAINING PCBS AND MERCURY**1.1 GENERAL****A. Description Of Work**

1. This specification covers the furnishing and installation of materials for removal of fluorescent light ballasts/capacitors and fluorescent light tubes. Products shall be as follows or as directed by the the Owner. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.

B. Submittals

1. Before Start of Work: Submit the following to the Owner's Representative for review. Do not start work until these submittals are returned with Owner's Representative's approval.
 - a. Copy of State or local license for hazardous waste hauler;
 - b. Certification of at least one on-site supervisor which has satisfactorily completed the OSHA 40 Hour Health and Safety Course for Handling Hazardous Materials;
 - c. Certificates of workers which have successfully completed at least the OSHA 40-Hour Health and Safety Course for Hazardous Materials;
 - d. List of employees scheduled to perform this work;
 - e. Schedule of start and finish times and dates for this work;
 - f. Name and address of landfill where these waste materials are to be deposited (include contact person and telephone numbers);
 - g. Safety Data Sheets for all materials requiring removal;
 - h. If contractor introduces any chemical into the work environmental, a SDS for that chemical is required before use;
 - i. Transporter must have notified the EPA and/or the appropriate local government agency in advance of its intentions to transport PCB's, mercury and cadmium, and receive an identification number pursuant to the Toxic Substance Control Act (TSCA); and
 - j. Contingency Plan for handling emergency spills or leaks.

1.2 PRODUCTS**A. Materials**

1. Polyethylene Sheet: A single polyethylene film in the largest sheet size possible to minimize seams, 4.0 and 6.0 mil thick, clear, frosted, or black.
2. Duct Tape: Provide duct tape in 3" widths, witty an adhesive which is formulated to stick aggressively to sheet polyethylene.
3. Spray Cement: Provide spray adhesive in aerosol cans which is specifically formulated to stick tenaciously to sheet polyethylene.
4. Disposal Bays: Provide 6 mil thick leak-tight polyethylene bags.
5. Labels: As required by the EPA and OSHA for handling, transportation, and disposal of hazardous waste.
6. **Drums:** Recovery or salvage drums acceptable for disposal of hazardous waste. Prior approval of drums is required. Drums or containers must meet the required OSHA EPA (40 CFR Parts 264265 and 300), and DOT regulations (49 CFR Parts 171-178). Use of damaged drums will not be allowed.

1.3 EXECUTION

**A. General**

1. Where necessary, scaffolding shall be erected to fully access all applicable fluorescent light ballasts/capacitors and tubes. At no time will the ballasts/capacitors and tubes be allowed to drop onto the floor. Contractor must take care to protect from dropping the ballasts/capacitors and fluorescent tubes.
2. Prior to removing ballasts/capacitors and fluorescent tubes, contractor shall ensure that all electrical service to lights has been shut off, and locked out. Temporary lighting shall be erected to adequately illuminate work areas.
3. Depending on height of light fixtures, contractor shall utilize at least a 2-person per team system. The fluorescent light tubes shall be removed and passed to the appropriate number of workers required to lower the tubes to the floor without breaking them.
4. The worker on the floor shall lay the tubes in cardboard boxes large enough to hold a small quantity of tubes. Worker shall take care to not damage the tubes while they are lowered into the box. Once the box is full, it shall be wrapped with two layers of 6 mil thick polyethylene sheeting and sealed with duct tape.
5. Contractor may choose to either remove the fluorescent light ballasts/capacitors in-place or lower the lighting fixtures for easy access. The ballasts/capacitors shall be removed from the fixtures. Electrical wiring leading from the ballasts/capacitors shall be cut away. Ballasts/capacitors shall be placed in 55-gallon drums lined with at least two 6 mil thick polyethylene bags. Be careful not to overfill the drums so that they remain manageable. Once the drums have been filled to the acceptable level, seal the lid onto the top of the drum, and affix appropriate labels. Transport drums via hand dollies.

B. Worker Protection

1. As a minimum, while working with the ballasts/capacitors and light tubes, workers shall utilize impervious gloves adequate for the use with hazardous materials. If light ballasts/capacitors and/or light tubes are damaged, and/or exposure to these materials may reach the OSHA PEL or AGGIH threshold limit value (TLV), the contractor shall be required to provide impervious full body protection and respiratory protection. However, contractor is required to verify the type of protection required prior to working with these materials, and have written approval by Owner's Representative prior to beginning.
2. In addition, workers shall not smoke, drink or eat in these areas during work activities.

C. Storage Of Fluorescent Light Ballasts/Capacitors And Light Tubes

1. Once the containers holding the ballasts/capacitors and light tubes have been filled and sealed, they shall be stored in designated areas as agreed upon by the Owners Representative and Contractor. They shall not be allowed to be stored on-site in transportation vehicles until the time for them to be transported to the hazardous waste incinerators or landfill facility.

SECTION 26 05 00 00 - SLEEVES AND SLEEVE SEALS FOR ELECTRICAL RACEWAYS AND CABLING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Round sleeves.
2. Rectangular sleeves.
3. Sleeve-seal systems.
4. Sleeve-seal fittings.
5. Grout.
6. Sealants.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
3. Section 078413 "Penetration Firestopping" for penetration firestopping installed in fire-resistance-rated walls, horizontal assemblies, and smoke barriers, with and without penetrating items.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding of raceways, electrical power cabling, and communications cabling referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
7. Section 270528 "Pathways for Communications Systems" [**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for raceway materials, routing, locations, and identification of communications equipment and cabling.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

B. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

PART 2 - PRODUCTS

2.1 ROUND SLEEVES

A. Steel Wall Sleeves:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Advance Products & Systems, LLC]**
 - b. **[CCI Piping Systems]**
 - c. **[Flexicraft Industries]**
 - d. **[GPT Industries, LLC.]**
 - e. **[Specified Technologies Inc.]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Advance Products & Systems, LLC]**
 - b. **[CCI Piping Systems]**
 - c. **[Flexicraft Industries]**
 - d. **[GPT Industries, LLC.]**
 - e. **[Specified Technologies Inc.]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:
 - a. Referenced Standard: ASTM A53/A53M, Type E, Grade B.
 - b. Dimensions: Schedule 40; sized so outer diameter of sleeve matches inner diameter of penetration hole.
 - c. Corrosion Resistance: Coated with **[Zinc][or][Gal-vo-plast]** .
 - d. Configuration: Plain ends and integral waterstop.

B. Cast-Iron Wall Sleeves:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[American Cast Iron Pipe Company]**
 - b. **[Flexicraft Industries]**
 - c. **[McWane Ductile; a part of the McWane family of companies]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Cast Iron Pipe Company]**
 - b. **[Flexicraft Industries]**
 - c. **[McWane Ductile; a part of the McWane family of companies]**
 - d. **<Insert manufacturer's name>**
3. Standard Features:

- a. Description: Cast or fabricated "wall pipe," equivalent to ductile-iron pressure pipe.
- b. Configuration: Plain ends and integral waterstop.

C. PVC Pipe Sleeves:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[CCI Piping Systems]**
 - b. **[GPT Industries, LLC.]**
 - c. **[Metraflex Company (The)]**
 - d. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[CCI Piping Systems]**
 - b. **[GPT Industries, LLC.]**
 - c. **[Metraflex Company (The)]**
 - d. **<Insert manufacturer's name>**
- 3. Standard Features:
 - a. Referenced Standard: ASTM D1785.
 - b. Dimensions: Schedule 40.

D. PVC Molded Sleeves:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB Electrification Installations Products]**
 - b. **[American Polywater Corporation]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Reliance Worldwide Corporation]**
 - e. **[Roxtec Inc.]**
 - f. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[American Polywater Corporation]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Reliance Worldwide Corporation]**
 - e. **[Roxtec Inc.]**
 - f. **<Insert manufacturer's name>**
- 3. Standard Features: With nailing flange for attaching to wooden forms.

Sleeves and Sleeve Seals for Electrical Raceways and Cabling

E. PE or PP Molded Sleeves:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[American Polywater Corporation]**
 - b. **[Crete-Sleeve]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Polywater Corporation]**
 - b. **[Crete-Sleeve]**
 - c. **<Insert manufacturer's name>**
3. Standard Features: Removable, tapered-cup shaped, and smooth outer surface with nailing flange for attaching to wooden forms.

F. Round, Galvanized-Steel, Sheet Metal Sleeves:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Benefast]**
 - b. **[Specified Technologies Inc.]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Benefast]**
 - b. **[Specified Technologies Inc.]**
 - c. **<Insert manufacturer's name>**
3. Standard Features: Galvanized-steel sheet; thickness not less than **0.0239 inch (0.6 mm)**; round tube closed with welded longitudinal joint, with tabs for screw-fastening the sleeve to the board.

2.2 RECTANGULAR SLEEVES

A. Rectangular, Galvanized-Steel, Sheet Metal Sleeves:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :

- a. **[Abesco Fire LLC]**
 - b. **[Specified Technologies Inc.]**
 - c. **[Wiremold; Legrand North America, LLC]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Abesco Fire LLC]**
 - b. **[Specified Technologies Inc.]**
 - c. **[Wiremold; Legrand North America, LLC]**
 - d. **<Insert manufacturer's name>**
3. Standard Features:
 - a. Material: Galvanized sheet steel.
 - b. Minimum Metal Thickness:
 - 1) For sleeve cross-section rectangle perimeter less than **50 inch (1270 mm)** and with no side larger than **16 inch (400 mm)**, thickness must be **0.052 inch (1.3 mm)**.
 - 2) For sleeve cross-section rectangle perimeter not less than **50 inch (1270 mm)** or with one or more sides larger than **16 inch (400 mm)**, thickness must be **0.138 inch (3.5 mm)**.

2.3 SLEEVE-SEAL SYSTEMS

A. Sleeve-Seal System:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Advance Products & Systems, LLC]**
 - b. **[American Polywater Corporation]**
 - c. **[BWM Company]**
 - d. **[CALPICO, Inc.]**
 - e. **[Flexicraft Industries]**
 - f. **[GPT Industries, LLC.]**
 - g. **[Metraflex Company (The)]**
 - h. **[Proco Products, Inc]**
 - i. **[Roxtec Inc.]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Advance Products & Systems, LLC]**
 - b. **[American Polywater Corporation]**
 - c. **[BWM Company]**
 - d. **[CALPICO, Inc.]**
 - e. **[Flexicraft Industries]**

- f. [GPT Industries, LLC.]
- g. [Metraflex Company (The)]
- h. [Proco Products, Inc]
- i. [Roxtec Inc.]
- j. <Insert manufacturer's name>

3. Standard Features:

- a. Modular Sealing Device: Designed for field assembly, to fill annular space between sleeve and raceway or cable or between raceway and cable.
- b. Sealing Elements: [EPDM][Nitrile (Buna N)] rubber interlocking links shaped to fit surface of pipe. Include type and number required for pipe material and size of pipe.
- c. Pressure Plates: [Carbon steel][Fiber-reinforced plastic][Stainless steel] .
- d. Connecting Bolts and Nuts: [Carbon steel, with corrosion-resistant coating,][Stainless steel,] of length required to secure pressure plates to sealing elements.

2.4 SLEEVE-SEAL FITTINGS

A. Sleeve-Seal Fitting:

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Holdrite; a division of Reliance Worldwide Corporation]
 - b. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Holdrite; a division of Reliance Worldwide Corporation]
 - b. <Insert manufacturer's name>
- 3. Standard Features:
 - a. Description: Manufactured plastic, sleeve-type, waterstop assembly made for embedding in concrete slab or wall.
 - b. Waterstop Collar: Unit must have plastic or rubber waterstop collar with center opening to match piping OD.

2.5 GROUT

A. Grout for Sealing Penetrations:

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

- a. **[Specified Technologies Inc.]**
 - b. **[W. R. Meadows, Inc]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Specified Technologies Inc.]**
 - b. **[W. R. Meadows, Inc]**
 - c. **<Insert manufacturer's name>**
3. Standard Features:
 - a. Description: Nonshrinking grout; recommended for interior and exterior sealing openings in non-fire-rated walls or floors.
 - b. Referenced Standard: ASTM C1107/C1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-cement grout.
 - c. Design Mix: **5000 psi (34.5 MPa)**, 28-day compressive strength.
 - d. Packaging: Premixed and factory packaged.

2.6 SEALANTS

A. Pourable Sealants:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Carlisle SynTec Systems; a Carlisle Company]**
 - b. **[GAF]**
 - c. **[Johns Manville; a Berkshire Hathaway company]**
 - d. **[Specified Technologies Inc.]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Carlisle SynTec Systems; a Carlisle Company]**
 - b. **[GAF]**
 - c. **[Johns Manville; a Berkshire Hathaway company]**
 - d. **[Specified Technologies Inc.]**
 - e. **<Insert manufacturer's name>**
3. Standard Features:
 - a. Description: Single-component, neutral-curing elastomeric sealants of grade indicated below.
 - b. Grade: Pourable (self-leveling) formulation for openings in floors and other horizontal surfaces that are not fire rated.

4. Sustainability Characteristics:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
- B. Foam Sealants:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Innovative Chemical Products (Building Solutions Group)]**
 - b. **[The Dow Chemical Company]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Innovative Chemical Products (Building Solutions Group)]**
 - b. **[The Dow Chemical Company]**
 - c. **<Insert manufacturer's name>**
 3. Standard Features:
 - a. Description: Multicomponent, liquid elastomers that, when mixed, expand and cure in place to produce a flexible, nonshrinking foam.
 - b. Foam Expansion: Must not damage cables or crack penetrated structure.
 4. Sustainability Characteristics:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 2. Electrical Maintenance: NFPA 70B and NECA NEIS 91.
 3. Electrical Safety: NFPA 70E.
 4. Commissioning of Active and Passive Fire Protection Features: NFPA 3 and NFPA 4.
 5. Hot Work: NFPA 51B.
 6. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 7. Communications Work: BICSI N1.

8. Work in ITE Rooms: NFPA 75.
9. Work in Confined Spaces: NFPA 350.
10. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
11. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Sleeves for Conduits Penetrating Non-Fire-Rated Wall Assemblies: Use circular metal sleeves unless penetration arrangement requires rectangular sleeved opening.

D. Interfaces with Other Work:

1. Identification: Provide labels for penetrations and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
2. Grounding and Bonding:
 - a. Bonding of Metal Sleeve for Metal Raceway Penetrations: Bond metal raceway to metal sleeve on both sides of penetration.
 - b. Bonding of Metal Sleeve for Cable Penetrations: Bond equipment grounding conductor for electrical power cables, or cable shield for communications cables, to metal sleeve on both sides of penetration.
 - c. Bonding is not required for nonmetallic sleeves.
 - d. Grounding of communications cables entering buildings from outside must be provided at the penetration.
3. Hangers and Supports:
 - a. Support of Raceways and Cables in Sleeve: Comply with manufacturer's published instructions for supporting raceways or cables on both sides of penetration. Sleeve sealing products are typically not rated for supporting the weight of raceways and cables.

3.2 INSTALLATION OF ROUND SLEEVES

A. Sleeves for Conduits Penetrating Above-Grade, Non-Fire-Rated, Concrete and Masonry-Unit Floors and Walls:

1. Interior Penetrations of Non-Fire-Rated Walls and Floors:
 - a. Seal space outside of sleeves with mortar or grout. Pack sealing material solidly between sleeve and wall or floor so no voids remain. Tool exposed surfaces smooth; protect material while curing.
 - b. Seal annular space between sleeve and raceway or cable, using joint sealant appropriate for size, depth, and location of joint. Comply with requirements in Section 079200 "Joint Sealants."
2. Use pipe sleeves unless penetration arrangement requires rectangular sleeved opening.
3. Size pipe sleeves to provide [1/4 inch (6.4 mm)]<Insert dimension> annular clear space between sleeve and raceway or cable, unless sleeve-seal system is to be installed [or seismic criteria require different clearance] .

4. Install sleeves for wall penetrations unless core-drilled holes or formed openings are used. Install sleeves during erection of walls. Cut sleeves to length for mounting flush with both surfaces of walls. Deburr after cutting.
5. Install sleeves for floor penetrations. Extend sleeves installed in floors **[2 inch (50 mm)]<Insert dimension>** above finished floor level. Install sleeves during erection of floors.
6. Seal space outside of sleeves with approved joint compound for wall assemblies.

- B. Roof-Penetration Sleeves: Seal penetration of individual raceways and cables with flexible boot-type flashing units applied in coordination with roofing work.
- C. Aboveground, Exterior-Wall Penetrations: Seal penetrations using **[steel][cast-iron]** pipe sleeves and mechanical sleeve-seal systems. Size sleeves to allow for **1 inch (25 mm)** annular clear space between pipe and sleeve for installing mechanical sleeve seals.
- D. Underground, Exterior-Wall and Floor Penetrations:
 1. Install **[steel][cast-iron]** pipe sleeves with integral waterstops. Size sleeves to allow for **1 inch (25 mm)** annular clear space between raceway or cable and sleeve for installing sleeve-seal system. Install sleeve during construction of floor or wall.
 2. Install steel pipe sleeves. Size sleeves to allow for **1 inch (25 mm)** annular clear space between raceway or cable and sleeve for installing sleeve-seal system. Grout sleeve into wall or floor opening.

3.3 INSTALLATION OF RECTANGULAR SLEEVES

- A. Install sleeves in existing walls without compromising structural integrity of walls. Do not cut structural elements without reinforcing the wall to maintain the designed weight bearing and wall stiffness.
- B. Install conduits and cable with no crossings within the sleeve.
- C. Fill opening around conduits and cables with expanding foam without leaving voids.
- D. Provide metal sheet covering at both wall surfaces and finish to match surrounding surfaces. Metal sheet must be same material as sleeve.

3.4 INSTALLATION OF SLEEVE-SEAL SYSTEMS

- A. Install sleeve-seal systems in sleeves in exterior concrete walls and slabs-on-grade at raceway entries into building.
- B. Install type and number of sealing elements recommended by manufacturer for raceway or cable material and size. Position raceway or cable in center of sleeve. Assemble mechanical sleeve seals and install in annular space between raceway or cable and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make watertight seal.

END OF SECTION 26 05 00 00

SECTION 26 05 13 00 - MEDIUM-VOLTAGE CABLES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Cables.
2. Connectors.
3. Solid terminations.
4. Separable insulated connectors.
5. Splice kits.
6. Medium-voltage tapes.
7. Arc-proofing materials.
8. Fault indicators.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of cable. Include splices and terminations for cables and cable accessories.

B. Samples: **16 inch (400 mm)** lengths for each type of cable specified.

C. Sustainable Design Submittals:

1. Product Data: For each conductor and cable indicating lead content.
2. Product Data: For solvents and adhesives, indicating VOC content.
3. Laboratory Test Reports: For solvents and adhesives, indicating compliance with requirements for low-emitting materials.

1.3 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Indicate location of each cable, splice, and termination.

B. Material Certificates: For each type of cable and accessory.

C. Design Data: Cable pulling calculations, including conduit size and fill percentage, pulling tensions, cable sidewall pressure, jam probability, voltage drop, and ground wire sizing for each cable.

D. Source quality-control reports.

- E. Field quality-control reports.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

- A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
- B. Comply with IEEE C2 and NFPA 70.
- C. Source Limitations: Obtain cables and accessories from single source from single manufacturer.

2.2 CABLES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[General Cable; Prysmian Group North America]**
 - 2. **[Hendrix Wire and Cable; Marmon Holdings, Inc.; Berkshire Hathaway Inc.]**
 - 3. **[Kerite Power Cable; Marmon Holdings, Inc.; Berkshire Hathaway Inc.]**
 - 4. **[Okonite Company (The)]**
 - 5. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - 6. **[Southwire Company, LLC]**
 - 7. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[General Cable; Prysmian Group North America]**
 - 2. **[Hendrix Wire and Cable; Marmon Holdings, Inc.; Berkshire Hathaway Inc.]**
 - 3. **[Kerite Power Cable; Marmon Holdings, Inc.; Berkshire Hathaway Inc.]**
 - 4. **[Okonite Company (The)]**
 - 5. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - 6. **[Southwire Company, LLC]**
 - 7. **<Insert manufacturer's name>**
- C. Cable Type: **[Type MV 90][Type MV 105]**.
- D. Conductor Insulation: **[Crosslinked polyethylene][Ethylene-propylene rubber]**.
 - 1. Voltage Rating: **[5][8][15][25][35]** kV.
 - 2. Insulation Thickness: **[100][133]** percent insulation level.
- E. Conductor: **[Copper][Aluminum]**.
- F. Comply with UL 1072, AEIC CS8, **ICEA S-93-639/NEMA WC 74**, and **ICEA S-97-682**, and **ICEA S-94-649**.
- G. Conductor Stranding: **[Compact round, concentric lay, Class B][Concentric lay, Class B]**.

- H. Strand Filling: Conductor interstices are filled with impermeable compound.
- I. Lead Content: Less than 300 parts per million.
- J. Shielding: **[Copper tape][Solid copper wires]**, helically applied over semiconducting insulation shield.
- K. Shielding and Jacket: Corrugated copper drain wires embedded in extruded, chlorinated, polyethylene jacket.
- L. Three-Conductor Cable Assembly: Three insulated, shielded conductors cabled together **[with ground conductors]**.
 - 1. Circuit Identification: Color-coded tape (black, red, blue) under the metallic shielding.
- M. Cable Sheath: **[Interlocked aluminum][Interlocked galvanized steel][Corrugated aluminum tube]** applied over cable.
- N. Cable Jacket: **[Sunlight-resistant PVC][Chlorosulfonated polyethylene]**.

2.3 CONNECTORS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[3M]**
 - 2. **[ABB, Electrification Business]**
 - 3. **[DSG-Canusa; Shawcor Ltd.]**
 - 4. **[Eaton]**
 - 5. **[G&W Electric Company]**
 - 6. **[TE Connectivity Ltd.]**
 - 7. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[3M]**
 - 2. **[ABB, Electrification Business]**
 - 3. **[DSG-Canusa; Shawcor Ltd.]**
 - 4. **[Eaton]**
 - 5. **[G&W Electric Company]**
 - 6. **[TE Connectivity Ltd.]**
 - 7. **<Insert manufacturer's name>**
- C. Comply with ANSI C119.4 for connectors between aluminum conductors or for connections between aluminum to copper conductors.
- D. Copper-Conductor Connectors: **[Copper barrel crimped][Aluminum barrel crimped][Copper shear bolt]** connectors.

2.4 SOLID TERMINATIONS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide**

products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [3M]
2. [ABB, Electrification Business]
3. [DSG-Canusa; Shawcor Ltd.]
4. [G&W Electric Company]
5. [Shawflex; Shawcor Ltd.]
6. [TE Connectivity Ltd.]
7. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [3M]
2. [ABB, Electrification Business]
3. [DSG-Canusa; Shawcor Ltd.]
4. [G&W Electric Company]
5. [Shawflex; Shawcor Ltd.]
6. [TE Connectivity Ltd.]
7. <Insert manufacturer's name>

C. Multiconductor Cable Sheath Seals: Type recommended by seal manufacturer for type of cable and installation conditions, including orientation.

1. Compound-filled, cast-metal-body, metal-clad cable terminator for metal-clad cable [with][without] external plastic jacket.
2. Cold-shrink sheath seal kit with preformed sleeve openings sized for cable and insulated conductors.
3. Heat-shrink sheath seal kit with phase- and ground-conductor rejacketing tubes, cable-end sealing boot, and sealing plugs for unused ground-wire openings in boot.
4. Cast-epoxy-resin sheath seal kit with wraparound mold and packaged, two-part, epoxy-resin casting material.

D. Shielded-Cable Terminations: Comply with the following classes of IEEE 48. Insulation class shall be equivalent to that of cable. Include shield ground strap for shielded cable terminations.

1. Class 1 Terminations:
 - a. Modular type, furnished as a kit, with stress-relief tube; multiple, molded-silicone-rubber, insulator modules; shield ground strap; and compression-type connector.
 - b. Heat-shrink type with heat-shrink inner stress control and outer nontracking tubes; multiple, molded, nontracking skirt modules; and compression-type connector.
 - c. Modular type, furnished as a kit, with stress-relief shield terminator; multiple-wet-process, porcelain, insulator modules; shield ground strap; and compression-type connector.
 - d. Indoors: Kit with stress-relief tube, nontracking insulator tube, shield ground strap, compression-type connector, and end seal.
2. Class 2 Terminations, Indoors: Kit with stress-relief tube, nontracking insulator tube, shield ground strap, and compression-type connector. Include silicone-rubber tape; cold-shrink-rubber sleeve; or heat-shrink, plastic-sleeve moisture seal for end of insulation whether or not supplied with kits.
3. Class 3 Terminations: Kit with stress cone and compression-type connector.

**2.5 SEPARABLE INSULATED CONNECTORS**

- A. Description: Modular system, complying with IEEE 386, with disconnecting, single-pole, cable terminators and with matching, stationary, plug-in, dead-front terminals designed for cable voltage and for sealing against moisture.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[ABB, Electrification Business]**
 - 2. **[Eaton]**
 - 3. **[Richards Manufacturing Co.]**
 - 4. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[ABB, Electrification Business]**
 - 2. **[Eaton]**
 - 3. **[Richards Manufacturing Co.]**
 - 4. **<Insert manufacturer's name>**
- D. Terminations at Distribution Points: Modular type, consisting of terminators installed on cables and modular, dead-front, terminal junctions for interconnecting cables.
- E. Load-Break Cable Terminators: Elbow-type units with 200 A load make/break and continuous-current rating; coordinated with insulation diameter, conductor size, and material of cable being terminated. Include test point on terminator body that is capacitance coupled.
- F. Dead-Break Cable Terminators: Elbow-type unit with **[200 A][600 A]** continuous-current rating; designed for de-energized disconnecting and connecting; coordinated with insulation diameter, conductor size, and material of cable being terminated. Include test point on terminator body that is capacitance coupled.
- G. Dead-Front Terminal Junctions: Modular bracket-mounted groups of dead-front stationary terminals that mate and match with above cable terminators. Two-, three-, or four-terminal units as indicated, with fully rated, insulated, watertight conductor connection between terminals and complete with grounding lug, manufacturer's standard accessory stands, stainless steel mounting brackets, and attaching hardware.
 - 1. Protective Cap: Insulating, electrostatic-shielding, water-sealing cap with drain wire.
 - 2. Portable Feed-Through Accessory: Two-terminal, dead-front junction arranged for removable mounting on accessory stand of stationary terminal junction.
 - 3. Grounding Kit: Jumpered elbows, portable feed-through accessory units, protective caps, test rods suitable for concurrently grounding three phases of feeders, and carrying case.
 - 4. Standoff Insulator: Portable, single dead-front terminal for removable mounting on accessory stand of stationary terminal junction. Insulators suitable for fully insulated isolation of energized cable-elbow terminator.
- H. Test-Point Fault Indicators: Applicable current-trip ratings and arranged for installation in test points of load-break separable connectors, and complete with self-resetting indicators capable of being installed with shotgun hot stick and tested with test tool.
- I. Tool Set: Shotgun hot stick with energized terminal indicator, fault-indicator test tool, and carrying case.

2.6 SPLICE KITS

- A. Description: For connecting medium voltage cables; type as recommended by cable or splicing kit manufacturer for the application.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[3M]**
 - 2. **[ABB, Electrification Business]**
 - 3. **[DSG-Canusa; Shawcor Ltd.]**
 - 4. **[Eaton]**
 - 5. **[Richards Manufacturing Co.]**
 - 6. **[TE Connectivity Ltd.]**
 - 7. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[3M]**
 - 2. **[ABB, Electrification Business]**
 - 3. **[DSG-Canusa; Shawcor Ltd.]**
 - 4. **[Eaton]**
 - 5. **[Richards Manufacturing Co.]**
 - 6. **[TE Connectivity Ltd.]**
 - 7. **<Insert manufacturer's name>**
- D. Standard: Comply with IEEE 404.
- E. Splicing Products: As recommended, in writing, by splicing kit manufacturer for specific sizes, materials, ratings, and configurations of cable conductors. Include all components required for complete splice, with detailed instructions.
 - 1. Combination tape and cold-shrink-rubber sleeve kit with re-jacketing by cast-epoxy-resin encasement or other waterproof, abrasion-resistant material.
 - 2. Heat-shrink splicing kit of uniform, cross-section, polymeric construction with outer heat-shrink jacket.
 - 3. Premolded, cold-shrink-rubber, in-line splicing kit.
 - 4. Premolded, EPDM splicing body kit with cable joint sealed by interference fit of mating parts and cable.
 - 5. Separable multiway splice system with all components for the required splice configuration.

2.7 MEDIUM-VOLTAGE TAPES

- A. Description: Electrical grade, insulating tape rated for medium voltage application.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[3M]**
 - 2. **[HellermannTyton]**
 - 3. **[Scapa Industrial; Scapa Group plc]**

4. <Insert manufacturer's name>

- C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [3M]
2. [HellermannTyton]
3. [Scapa Industrial; Scapa Group plc]
4. <Insert manufacturer's name>

- D. Ethylene/propylene rubber-based, **30 mil (0.76 mm)** splicing tape, rated for 130 deg C operation. Minimum **3/4 inch (20 mm)** wide.

- E. Silicone rubber-based, **12 mil (0.30 mm)** self-fusing tape, rated for 130 deg C operation. Minimum **1-1/2 inch (38 mm)** wide.

- F. Insulating-putty, **125 mil (3.175 mm)** elastic filler tape. Minimum **1-1/2 inch (38 mm)** wide.

2.8 ARC-PROOFING MATERIALS

- A. Description: Fire retardant, providing arc flash protection.

- B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [3M]
2. <Insert manufacturer's name>

- C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [3M]
2. <Insert manufacturer's name>

- D. Tape for First Course on Metal Objects: **10 mil (250 micrometer)** thick, corrosion-protective, moisture-resistant, PVC pipe-wrapping tape.

- E. Arc-Proofing Tape: Fireproof tape, flexible, conformable, intumescent to **0.3 inch (8 mm)** thick, and compatible with cable jacket.

- F. Glass-Cloth Tape: Pressure-sensitive adhesive type, **1 inch (25 mm)** wide.

2.9 FAULT INDICATORS

- A. Indicators: [Automatically][Manually] reset fault indicator[with inrush restraint feature], arranged to clamp to cable sheath and provide a display after a fault has occurred in cable. Instrument shall not be affected by heat, moisture, and corrosive conditions and shall be recommended by manufacturer for installation conditions.

- B. Resetting Tool: Designed for use with fault indicators, with moisture-resistant storage and carrying case.

2.10 SOURCE QUALITY CONTROL

- A. Test and inspect cables according to [ICEA S-97-682][ICEA S-94-649] before shipping.
- B. Test strand-filled cables for water-penetration resistance according to ICEA T-31-610, using a test pressure of **5 psig (35 kPa)**.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Install cables according to IEEE 576.
- B. Proof conduits prior to conductor installation by passing a wire brush mandrel and then a rubber duct swab through the conduit. Separate the wire brush and the rubber swab by **48 to 72 inch (1200 to 1800 mm)** on the pull rope.
 - 1. Wire Brush Mandrel: Consists of a length of brush approximately the size of the conduit inner diameter with stiff steel bristles and an eye on each end for attaching the pull ropes. If an obstruction is felt, pull the brush back and forth repeatedly to break up the obstruction.
 - 2. Rubber Duct Swab: Consists of a series of rubber discs approximately the size of the conduit inner diameter on a length of steel cable with an eye on each end for attaching the pull ropes. Pull the rubber duct swab through the duct to extract loose debris from the duct.
- C. Pull Conductors: Do not exceed manufacturer's recommended maximum pulling tensions and sidewall pressure values.
 - 1. Where necessary, use manufacturer-approved pulling compound or lubricant that does not deteriorate conductor or insulation.
 - 2. Use pulling means, including fish tape, cable, rope, and basket-weave cable grips, that do not damage cables and raceways. Do not use rope hitches for pulling attachment to cable.
 - 3. Use pull-in guides, cable feeders, and draw-in protectors as required to protect cables during installation.
 - 4. Do not pull cables with ends unsealed. Seal cable ends with rubber tape.
- D. Install exposed cables parallel and perpendicular to surfaces of exposed structural members and follow surface contours where possible.
- E. Support cables according to Section 260529 "Hangers and Supports for Electrical Systems."
- F. Install direct-buried cables on leveled and tamped bed of **3 inch (75 mm)** thick, clean sand. Separate cables crossing other cables or piping by a minimum of **2 inch (50 mm)** of tamped earth, plus an additional **2 inch (50 mm)** of sand. Install permanent markers at ends of cable runs, changes in direction, and buried splices.
- G. Install "buried-cable" warning tape **12 inch (305 mm)** above cables.
- H. In manholes, handholes, pull boxes, junction boxes, and cable vaults, train cables around walls by the longest route from entry to exit; support cables at intervals adequate to prevent sag.
- I. Install sufficient cable length to remove cable ends under pulling grips. Remove length of conductor damaged during pulling.

- J. Install cable splices at pull points and elsewhere as indicated; use standard kits. [**Use dead-front separable watertight connectors in manholes and other locations subject to water infiltration.**]
- K. Install terminations at ends of conductors, and seal multiconductor cable ends with standard kits.
- L. Install separable insulated-connector components as follows:
 - 1. Protective Cap: At each terminal junction, with one on each terminal to which no feeder is indicated to be connected.
 - 2. Portable Feed-Through Accessory: At each terminal junction, with one on each terminal.
 - 3. Standoff Insulator: At each terminal junction, with one on each terminal.
- M. Arc Proofing: Unless otherwise indicated, arc proof medium-voltage cable at locations not protected by conduit, cable tray, direct burial, or termination materials. In addition to arc-proofing tape manufacturer's written instructions, apply arc proofing as follows:
 - 1. Clean cable sheath.
 - 2. Wrap metallic cable components with **10 mil (250 micrometer)** pipe-wrapping tape.
 - 3. Smooth surface contours with electrical insulation putty.
 - 4. Apply arc-proofing tape in one half-lapped layer with coated side toward cable.
 - 5. Band arc-proofing tape with two layers of **1 inch (25 mm)** wide half-lapped, adhesive, glass-cloth tape at each end of the arc-proof tape.
- N. Seal around cables passing through fire-rated elements according to Section 078413 "Penetration Firestopping."
- O. Install fault indicators on each phase where indicated.
- P. Ground shields of shielded cable at terminations, splices, and separable insulated connectors. Ground metal bodies of terminators, splices, cable and separable insulated-connector fittings, and hardware.
- Q. Ground shields of shielded cable at one point only. Maintain shield continuity and connections to metal connection hardware at all connection points.
- R. Identify cables according to Section 260553 "Identification for Electrical Systems." Identify phase and circuit number of each conductor at each splice, termination, pull point, and junction box. Arrange identification so that it is unnecessary to move the cable or conductor to read the identification.

3.2 FIELD QUALITY CONTROL

- A. Tests and Inspections:
 - 1. Perform each visual and mechanical inspection and electrical test stated in NETA ATS. Certify compliance with test parameters.
 - 2. After installing medium-voltage cables and before electrical circuitry has been energized, test for compliance with requirements.
 - 3. Perform direct-current High Potential test of each new conductor according to NETA ATS, Ch. 7.3.3. Do not exceed cable manufacturer's recommended maximum test voltage.
 - 4. Perform Partial Discharge test of each new conductor according to NETA ATS, Ch. 7.3.3 and to test equipment manufacturer's recommendations.
 - 5. Perform Dissipation Factor test of each new conductor according to NETA ATS, Ch. 7.3.3 and to test equipment manufacturer's recommendations.
- B. Medium-voltage cables will be considered defective if they do not pass tests and inspections.

26 - Electrical

C. Prepare test and inspection reports.

END OF SECTION 26 05 13 00

Task	Specification	Specification Description
26 05 13 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 13 16	26 05 13 00	Medium-Voltage Cables
26 05 13 16	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 13 16	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

**SECTION 26 05 19 00 - LOW-VOLTAGE ELECTRICAL POWER CONDUCTORS AND CABLES****PART 1 - GENERAL****1.1 SUMMARY****A. Section Includes:**

1. Thermoplastic-insulated wire.
2. Thermoset-insulated wire.
3. Nonmetallic underground conduit with conductors.
4. Metallic sheathed cable.
5. Photovoltaic single-conductor cable.
6. Nonmetallic jacketed cable.
7. Connectors and splices.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 078413 "Penetration Firestopping" specifies materials and methods for sealing penetrations of rated walls and partitions referenced by this Section.
5. Section 260513 "Medium-Voltage Cables" for single-conductor and multiconductor cables, cable splices, and terminations for electrical distribution systems with 601 to 35 000 V.
6. Section 260523 "Control-Voltage Electrical Power Cables" for control systems communications cables and Classes 1, 2, and 3 control cables.
7. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
8. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
9. Section 260533.13 "Conduits for Electrical Systems" specifies installation of raceways referenced by this Section.
10. Section 260536 "Cable Trays for Electrical Systems" specifies cable tray installation referenced by this Section.
11. Section 260544 "Sleeves and Sleeve Seals for Electrical Raceways and Cabling" specifies installation of sleeves and sleeve seals referenced by this Section.
12. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
13. Section 271313 "Communications Copper Backbone Cabling" for twisted pair cabling used for data circuits.
14. Section 271513 "Communications Copper Horizontal Cabling" for twisted pair cabling used for data circuits.

1.2 DEFINITIONS

- A. NICET: National Institute for Certification in Engineering Technologies; a division of the National Society of Professional Engineers (NSPE).

1.3 ACTION SUBMITTALS

- A. Product Schedule: Indicate type, use, location, and termination locations.
- B. Product Data: For each type of product.
- C. Sustainable Design Submittals:
 - 1. Product Data: For each conductor and cable indicating lead content.
 - 2. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer recycled content and cost.
 - 3. Product Data: For solvents and adhesives, indicating VOC content.
 - 4. Laboratory Test Reports: For solvents and adhesives, indicating compliance with requirements for low-emitting materials.
- D. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Field Reports:
 - 1. Field reports for infrared scanning.

1.5 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

**2.2 THERMOPLASTIC-INSULATED WIRE**

- A. Description: Thermoplastic-insulated wire for use in accordance with Article 310 of NFPA 70.
- B. UL ZLGR - Type THHN Insulated Wire :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
 4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum].**
 - e. Conductor Size:**[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG].**
 5. Other Available Features Required by the Project:
 - a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
 - b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to

- gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- g. Marked "VW-1," indicating compliance with special vertical flame test.
- h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

C. UL ZLGR - Type THHW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Encore Wire Corporation]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Encore Wire Corporation]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: **[75 deg C][90 deg C]**.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
 - a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
 - b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.

- g. Marked "VW-1," indicating compliance with special vertical flame test.
- h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

D. UL ZLGR - Type THW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Service Wire Co.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Service Wire Co.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: **[75 deg C][90 deg C]**.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size:**[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
 - a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
 - b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.

- e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- g. Marked "VW-1," indicating compliance with special vertical flame test.
- h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

E. UL ZLGR - Type THW-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Service Wire Co.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Service Wire Co.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:

- a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
- b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
- c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
- d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- f. Marked "VW-1," indicating compliance with special vertical flame test.
- g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

F. UL ZLGR - Type THWN Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 75 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:

- a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
- b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
- c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
- d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
- e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- g. Marked "VW-1," indicating compliance with special vertical flame test.
- h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

G. UL ZLGR - Type THWN-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.

5. Other Available Features Required by the Project:
- a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
 - b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - g. Marked "VW-1," indicating compliance with special vertical flame test.
 - h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

H. UL ZLGR - Type TW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
- a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Service Wire Co.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Encore Wire Corporation]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Service Wire Co.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
4. Standard Features:
- a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 60 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.

e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

- a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
- b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
- c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
- d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
- e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- g. Marked "VW-1," indicating compliance with special vertical flame test.
- h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

I. UL ZLGR - Type FEP Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:
 - a. [**Belden Inc.**]
 - b. [**Prysmian Cables and Systems; Prysmian Group North America**]
 - c. [**Southwire Company, LLC**]
 - d. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert **manufacturer's name; product name or designation**> or comparable product by one of the following:
 - a. [**Belden Inc.**]
 - b. [**Prysmian Cables and Systems; Prysmian Group North America**]
 - c. [**Southwire Company, LLC**]
 - d. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
 - 1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Covering: None.
 - c. Insulation Voltage Rating: 600 V.
 - d. Insulation Temperature Rating: 90 deg C for dry and damp locations.
 - e. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
 - f. Conductor Size:[**As indicated on the Drawings.**]

- 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
- a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - f. Marked "VW-1," indicating compliance with special vertical flame test.
 - g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
- J. UL ZLGR - Type FEPB Insulated Wire :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **[Southwire Company, LLC]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **[Southwire Company, LLC]**
 - d. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
 - 1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.
 4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Covering: Glass or other suitable braid material.
 - c. Insulation Voltage Rating: 600 V.
 - d. Insulation Temperature Rating: 200 deg C for dry locations.
 - e. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - f. Conductor Size:**[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
 5. Other Available Features Required by the Project:

- a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
- b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
- c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
- d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- f. Marked "VW-1," indicating compliance with special vertical flame test.
- g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

K. UL ZLGR - Type Z Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Belden Inc.]**
 - b. **[Okonite Company (The)]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Okonite Company (The)]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
 - 1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: **[90 deg C for dry and damp locations][150 deg C for dry locations and special applications].**
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum].**
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG].**
5. Other Available Features Required by the Project:
 - a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.

- b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
- c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
- d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
- e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- g. Marked "VW-1," indicating compliance with special vertical flame test.
- h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

L. UL ZLGR - Type ZW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Belden Inc.]**
 - b. **[Okonite Company (The)]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Okonite Company (The)]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
 - 1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: **[60 deg C][75 deg C][85 deg C][90 deg C][150 deg C][200 deg C][250 deg C]**.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size:**[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
 - a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to

- e. gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- f. Marked "VW-1," indicating compliance with special vertical flame test.
- g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

M. UL ZLGR - Type ZW-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Okonite Company (The)]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Okonite Company (The)]**
 - b. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
 - 1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: **[75 deg C for wet locations][90 deg C for dry and damp locations][150 deg C for dry locations and special applications].**
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum].**
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG].**
5. Other Available Features Required by the Project:
 - a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - f. Marked "VW-1," indicating compliance with special vertical flame test.
 - g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

N. UL ZLGR - Type TBS Insulated Switchboard Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **[Southwire Company, LLC]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **[Southwire Company, LLC]**
 - d. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
 - 1) Thermoplastic and Fibrous Outer Braid: Also investigated in accordance with UL 83B.
 4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
 5. Other Available Features Required by the Project:
 - a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - f. Marked "VW-1," indicating compliance with special vertical flame test.
 - g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
- O. UL ZLGR - Thermoplastic-Insulated Submersible Pump Multiconductor Cable :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. [Cerro Wire LLC]
 - b. [Encore Wire Corporation]
 - c. [Prysmian Cables and Systems; Prysmian Group North America]
 - d. [Southwire Company, LLC]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Cerro Wire LLC]
 - b. [Encore Wire Corporation]
 - c. [Prysmian Cables and Systems; Prysmian Group North America]
 - d. [Southwire Company, LLC]
 - e. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.
 - 1) Submersible Pump Cable: Also investigated in accordance with UL CCN FDNF, including NSF 61.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Material: Type THW.
 - d. Insulation Temperature Rating: 75 deg C.
 - e. Conductor Material: Copper.
 - f. Conductor Size: [As indicated on the Drawings.]
 - 1) Minimum Conductor Size: [14 AWG][12 AWG][10 AWG].
5. Other Available Features Required by the Project:
 - a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - f. Marked "VW-1," indicating compliance with special vertical flame test.
 - g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

2.3 THERMOSET-INSULATED WIRE

- A. Description: Thermoset-insulated wire for use in accordance with Article 310 of NFPA 70.
- B. UL ZKST - Type RHH Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size:**[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
 - a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
 - b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - g. Marked "VW-1," indicating compliance with special vertical flame test.
 - h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
 - i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance

with UL Subject 2885.

- 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

C. UL ZKST - Type RHW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 75 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum].**
 - e. Conductor Size:**[As indicated on the Drawings].**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG].**
5. Other Available Features Required by the Project:
 - a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
 - b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.

- d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - g. Marked "VW-1," indicating compliance with special vertical flame test.
 - h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
 - i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.
- 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

D. UL ZKST - Type RHW-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**

1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.

5. Other Available Features Required by the Project:

- a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
- b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
- c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
- d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
- e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- g. Marked "VW-1," indicating compliance with special vertical flame test.
- h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
- i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

E. UL ZKST - Type SA Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Okonite Company (The)]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **[Southwire Company, LLC]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Okonite Company (The)]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **[Southwire Company, LLC]**
 - d. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: **[90 deg C for dry and damp locations][200 deg C for special applications]**.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**

- 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
- a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - f. Marked "VW-1," indicating compliance with special vertical flame test.
 - g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
 - h. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.
- 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.
- F. UL ZKST - Type XHH Insulated Wire :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Encore Wire Corporation]**
 - b. **[Okonite Company (The)]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Encore Wire Corporation]**
 - b. **[Okonite Company (The)]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.
 4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**

- 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.

5. Other Available Features Required by the Project:

- a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
- b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
- c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
- d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
- e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
- f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
- g. Marked "VW-1," indicating compliance with special vertical flame test.
- h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
- i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

- 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

G. UL ZKST - Type XHHW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:
- a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: **[75 deg C for wet locations][90 deg C for dry and damp locations]**.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
- a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
 - b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - g. Marked "VW-1," indicating compliance with special vertical flame test.
 - h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
 - i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.
 - 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.
- H. UL ZKST - Type XHHW-2 Insulated Wire :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Okonite Company (The)]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Service Wire Co.]**
 - g. **[Southwire Company, LLC]**

h. <Insert manufacturer's name>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

- a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: [Copper][Aluminum][Copper-clad aluminum].
 - e. Conductor Size: [As indicated on the Drawings.]

- 1) Minimum Conductor Size: [14 AWG][12 AWG][10 AWG].

5. Other Available Features Required by the Project:

- a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
 - b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - g. Marked "VW-1," indicating compliance with special vertical flame test.
 - h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
 - i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

- 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

- I. UL ZKST - Type SIS Insulated Switchboard and Switchgear Wire :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Belden Inc.]
 - b. [Cerro Wire LLC]
 - c. [Encore Wire Corporation]
 - d. [Okonite Company (The)]
 - e. [Prysmian Cables and Systems; Prysmian Group North America]
 - f. [Service Wire Co.]
 - g. [Southwire Company, LLC]
 - h. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Belden Inc.]
 - b. [Cerro Wire LLC]
 - c. [Encore Wire Corporation]
 - d. [Okonite Company (The)]
 - e. [Prysmian Cables and Systems; Prysmian Group North America]
 - f. [Service Wire Co.]
 - g. [Southwire Company, LLC]
 - h. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.
4. Standard Features:
 - a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: 90 deg C.
 - d. Conductor Material: [Copper][Aluminum][Copper-clad aluminum].
 - e. Conductor Size:[As indicated on the Drawings.]
 - 1) Minimum Conductor Size: [14 AWG][12 AWG][10 AWG].
5. Other Available Features Required by the Project:
 - a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - f. Marked "VW-1," indicating compliance with special vertical flame test.
 - g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
 - h. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.
 - 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.
- J. UL ZKST - Thermoset-Insulated Submersible Pump Multiconductor Cable :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]
 - b. [Prysmian Cables and Systems; Prysmian Group North America]
 - c. [Service Wire Co.]
 - d. [Southwire Company, LLC]
 - e. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[Belden Inc.]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **[Service Wire Co.]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.
 - 1) Submersible Pump Cable: Also investigated in accordance with UL CCN FDNF, including NSF 61.
4. Standard Features:
- a. Referenced Standard: Article 310 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Material: Type RHW-2.
 - d. Insulation Temperature Rating: 90 deg C.
 - e. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - f. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
- a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
 - b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
 - c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
 - d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
 - e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
 - f. Marked "VW-1," indicating compliance with special vertical flame test.
 - g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
 - h. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.
 - 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

2.4 NONMETALLIC UNDERGROUND CONDUIT WITH CONDUCTORS

A. Nonmetallic Underground Conduit with Conductors, Type NUCC :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[Blue Diamond Industries, LLC]**
 - b. **[Paige Electric Co, LP]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Blue Diamond Industries, LLC]**
 - b. **[Paige Electric Co, LP]**
 - c. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
3. Description: A factory assembly of conductors or cables inside a nonmetallic, smooth-wall raceway with a circular cross section.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Type NUCC Conduit with Conductors: UL CCN QQRK, including UL 1990.
5. Standard Features:
 - a. Referenced Standard: Article 354 of NFPA 70.
 - b. Conduit Material: **[HDPE-40][HDPE-80][EPEC-B]**.
 - c. Conduit Sizes: As indicated on the Drawings.
 - d. Preinstalled Conductors: Provide insulated conductors as indicated on the Drawings.

2.5 METALLIC SHEATHED CABLE

A. UL PJAZ - Metal-Clad Cable, Type MC :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[AFC Cable Systems; Atkore International]**
 - b. **[Alpha Wire; brand of Belden, Inc.]**
 - c. **[Belden Inc.]**
 - d. **[Cerro Wire LLC]**
 - e. **[Copperweld]**
 - f. **[Encore Wire Corporation]**
 - g. **[General Cable; Prysmian Group North America]**
 - h. **[Okonite Company (The)]**
 - i. **[Southwire Company, LLC]**
 - j. **[WESCO]**
 - k. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [AFC Cable Systems; Atkore International]
 - b. [Alpha Wire; brand of Belden, Inc.]
 - c. [Belden Inc.]
 - d. [Cerro Wire LLC]
 - e. [Copperweld]
 - f. [Encore Wire Corporation]
 - g. [General Cable; Prysmian Group North America]
 - h. [Okonite Company (The)]
 - i. [Southwire Company, LLC]
 - j. [WESCO]
 - k. <Insert manufacturer's name>
3. Description: A factory assembly of one or more current-carrying insulated conductors in an overall metallic sheath.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Metal-Clad Cable: UL CCN PJAZ, including UL 1569.
5. Standard Features:
- a. Referenced Standard: Article 330 of NFPA 70.
 - b. Circuits: [Single circuit][and][multicircuit with color-coded conductors].
 - c. Conductors: [Copper, complying with ASTM B3 for bare annealed copper and with ASTM B8 for stranded conductors][Aluminum, complying with ASTM B800 and ASTM B801].
 - d. Ground Conductor: [Bare][Insulated][None].
 - e. Conductor Insulation:
 - 1) Type TFN/THHN/THWN-2. Comply with UL 83.
 - 2) Type XHHW-2. Comply with UL 44.
 - 3) <Insert type and standard>.
 - f. Armor: [Steel][Aluminum], interlocked.
 - g. Jacket: PVC applied over armor.
6. Other Available Features Required by the Project:
- a. Marked "MC-HL," indicating compliance with UL 2225 for use in hazardous (classified) locations.

B. UL AWEZ - Armored Cable, Type AC :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [AFC Cable Systems; Atkore International]
 - b. [Alpha Wire; brand of Belden, Inc.]
 - c. [Belden Inc.]
 - d. [Encore Wire Corporation]
 - e. [General Cable; Prysmian Group North America]
 - f. [Okonite Company (The)]

- g. **[Southwire Company, LLC]**
 - h. **[WESCO]**
 - i. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[AFC Cable Systems; Atkore International]**
 - b. **[Alpha Wire; brand of Belden, Inc.]**
 - c. **[Belden Inc.]**
 - d. **[Encore Wire Corporation]**
 - e. **[General Cable; Prysmian Group North America]**
 - f. **[Okonite Company (The)]**
 - g. **[Southwire Company, LLC]**
 - h. **[WESCO]**
 - i. **<Insert manufacturer's name>**
 - 3. Description: A factory assembly of insulated current-carrying conductors with or without an equipment grounding conductor in an overall metallic sheath.
 - 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Armored Cable: UL CCN AWEZ, including UL 4.
 - 5. Standard Features:
 - a. Referenced Standard: Article 320 of NFPA 70.
 - b. Circuits: **[Single circuit][and][multicircuit with color-coded conductors]**.
 - c. Conductors: **[Copper, complying with ASTM B3 for bare annealed copper and with ASTM B8 for stranded conductors][Aluminum, complying with ASTM B800 and ASTM B801]**.
 - d. Ground Conductor: **[Bare][Insulated][None]**.
 - e. Armor: **[Steel][Aluminum]**, interlocked.
 - 6. Other Available Features Required by the Project:
 - a. Marked "LS" or "For Use in Cable Trays," indicating compliance with UL 1685 flame and limited smoke test.
- C. UL PPKV and FHJR - Fire-Resistant Mineral-Insulated Metal-Sheathed Cable, Type MI, for Use in Electrical Circuit Integrity Systems :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[PYROTENAX; brand of nVent Electrical plc]**
 - b. **[TEC International]**
 - c. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[PYROTENAX; brand of nVent Electrical plc]**
 - b. **[TEC International]**
 - c. **<Insert manufacturer's name>**
 3. Description: Solid copper conductors encased in compressed metal oxide with an outer metallic sheath, rated 600 V or less.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Mineral-Insulated Metal-Sheathed Cable: UL CCN PPKV, including UL Subject 504.
 - b. Circuit Integrity: UL CCN FHJR, including UL 2196.
 5. Standard Features:
 - a. Referenced Standard: Article 332 of NFPA 70.
 - b. Fire-Resistance Rating: **[1 h][2 h]**.
 - c. Conductors: Copper, complying with ASTM B3 for bare annealed copper.
 - d. Insulation: **[Compressed magnesium oxide]<Insert material>**.
 - e. Sheath: **[Copper]<Insert material>**.
- D. UL PJAZ and FHJR - Fire-Resistant Metal-Clad Cable, Type MC, for Use in Electrical Circuit Integrity Systems :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Marmon Industrial Energy & Infrastructure; division of Marmon Electrical; a Berkshire Hathaway company]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Marmon Industrial Energy & Infrastructure; division of Marmon Electrical; a Berkshire Hathaway company]**
 - b. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - c. **<Insert manufacturer's name>**
 3. Description: A factory assembly of one or more current-carrying insulated conductors in an overall metallic sheath.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Metal-Clad Cable: UL CCN PJAZ, including UL 1569.
 - b. Circuit Integrity: UL CCN FHJR, including UL 2196.
 5. Standard Features:
 - a. Referenced Standard: Article 330 of NFPA 70.

- b. Fire-Resistance Rating: **[1 h][2 h]**.
 - c. Circuits: **[Single circuit][and][multicircuit with color-coded conductors]**.
 - d. Conductors: **[Copper][Copper-clad aluminum]**.
 - e. Ground Conductor: **[Bare][Insulated][None]**.
 - f. Armor: **[Steel][Aluminum]**, interlocked.
 - g. Jacket: PVC applied over armor.
6. Other Available Features Required by the Project:
- a. Marked "MC-HL," indicating compliance with UL 2225 for use in hazardous (classified) locations.

2.6 PHOTOVOLTAIC SINGLE-CONDUCTOR CABLE

A. Photovoltaic Single-Conductor Cable, Type PV :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Copperweld]**
 - b. **[Encore Wire Corporation]**
 - c. **[General Cable; Prysmian Group North America]**
 - d. **[Service Wire Co.]**
 - e. **[Southwire Company, LLC]**
 - f. **[WESCO]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Copperweld]**
 - b. **[Encore Wire Corporation]**
 - c. **[General Cable; Prysmian Group North America]**
 - d. **[Service Wire Co.]**
 - e. **[Southwire Company, LLC]**
 - f. **[WESCO]**
 - g. **<Insert manufacturer's name>**
3. Description: Flexible, insulated and uninsulated, drawn-copper current-carrying conductor with an overall insulation layer or jacket, or both, rated **[2000][600]** V.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Photovoltaic Wire: UL CCN ZKLA, including UL 4703.
5. Standard Features:
 - a. Referenced Standard: Article 609 of NFPA 70.
 - b. Conductors: Copper, complying with ASTM B3 for bare annealed copper and with ASTM B8 for stranded conductors.

2.7 NONMETALLIC JACKETED CABLE

A. UL PWVX - Nonmetallic-Sheathed Cable, Type NM-B and Type NMC-B :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Copperweld]**
 - d. **[Encore Wire Corporation]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Republic Wire Inc.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Copperweld]**
 - d. **[Encore Wire Corporation]**
 - e. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - f. **[Republic Wire Inc.]**
 - g. **[Southwire Company, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Type NM-B and Type NMC-B Cables: UL CCN PWVX, including UL 719.
4. Standard Features:
 - a. Referenced Standard: Article 334 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: Individual conductors are rated 90 deg C for multiple conductor ampacity calculations; however, final cable ampacity rating must not exceed value for 60 deg C in Table 310.15(C)(1) of NFPA 70.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum].**
 - e. Conductor Size:**[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG].**
 - f. Cable Covering:
 - 1) Type NM-B: Flame retardant and moisture resistant.
 - 2) Type NMC-B: Flame retardant, moisture resistant, fungus resistant, and corrosion resistant.

B. UL YDUX - Underground Feeder and Branch-Circuit Cable, Type UF and Type UF-B :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[AFC Cable Systems; Atkore International]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Copperweld]**
 - e. **[Encore Wire Corporation]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Republic Wire Inc.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[AFC Cable Systems; Atkore International]**
 - b. **[Belden Inc.]**
 - c. **[Cerro Wire LLC]**
 - d. **[Copperweld]**
 - e. **[Encore Wire Corporation]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Republic Wire Inc.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Type UF and Type UF-B Cables: UL CCN YDUX, including UL 493.
4. Standard Features:
 - a. Referenced Standard: Article 340 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating:
 - 1) Type UF: 60 deg C.
 - 2) Type UF-B: Individual conductors are rated 90 deg C for multiple conductor ampacity calculations; however, final cable ampacity rating must not exceed value for 60 deg C in Table 310.15(C)(1) of NFPA 70.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**
 - 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
 - f. Cable Covering: Flame retardant, moisture resistant, fungus resistant, corrosion resistant, and suitable for direct burial in the earth.

C. UL TYLZ - Service-Entrance Cable, Type SE, Type USE, and Type USE-2 :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Marmon Industrial Energy & Infrastructure; division of Marmon Electrical; a Berkshire Hathaway company]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Republic Wire Inc.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Cerro Wire LLC]**
 - c. **[Encore Wire Corporation]**
 - d. **[Marmon Industrial Energy & Infrastructure; division of Marmon Electrical; a Berkshire Hathaway company]**
 - e. **[Okonite Company (The)]**
 - f. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - g. **[Republic Wire Inc.]**
 - h. **[Southwire Company, LLC]**
 - i. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Service-Entrance Cable: UL CCN TYLZ, including UL 854.
4. Standard Features:
 - a. Referenced Standard: Article 338 of NFPA 70.
 - b. Insulation Voltage Rating: 600 V.
 - c. Insulation Temperature Rating: Not in excess of rating for insulation type specified below:
 - 1) Type THWN: 75 deg C, dry and wet locations.
 - 2) Type THWN-2: 90 deg C, dry and wet locations.
 - 3) Type RHW: 75 deg C, dry and wet locations.
 - 4) Type XHHW: 90 deg C, dry and damp locations; 75 deg C, wet locations.
 - 5) Type RHW-2: 90 deg C, dry and wet locations.
 - 6) Type XHHW-2: 90 deg C, dry and wet locations.
 - d. Conductor Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - e. Conductor Size: **[As indicated on the Drawings.]**

- 1) Minimum Conductor Size: **[14 AWG][12 AWG][10 AWG]**.
5. Other Available Features Required by the Project:
 - a. Marked "Style R," indicating that cable assembly includes uninsulated equipment ground conductor with insulated conductors.
 - b. Marked "Style U," indicating that cable assembly includes uninsulated equipment ground conductor helically wrapped over insulated conductors.
 - c. Marked "-HF," indicating that combustible materials are halogen-free when tested in accordance with UL Subject 2885.
 - 1) Marked "-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.
- D. UL QPOR - Power and Control Tray Cable, Type TC :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Encore Wire Corporation]**
 - d. **[General Cable; Prysmian Group North America]**
 - e. **[Okonite Company (The)]**
 - f. **[Southwire Company, LLC]**
 - g. **[WESCO]**
 - h. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Alpha Wire; brand of Belden, Inc.]**
 - b. **[Belden Inc.]**
 - c. **[Encore Wire Corporation]**
 - d. **[General Cable; Prysmian Group North America]**
 - e. **[Okonite Company (The)]**
 - f. **[Southwire Company, LLC]**
 - g. **[WESCO]**
 - h. **<Insert manufacturer's name>**
 3. Description: A factory assembly of insulated current-carrying conductors with or without an equipment grounding conductor in a nonmetallic jacket.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Power and Control Tray Cable: UL CCN QPOR, including UL 1277.
 5. Standard Features:
 - a. Comply with NEMA WC 57/ICEA S-73-532 for Type TC cables used for control, thermocouple extension, and instrumentation.
 - b. Comply with NEMA WC 70/ICEA S-95-658 for Type TC cables used for power distribution.

- c. Conductors: **[Copper][Aluminum][Copper-clad aluminum]**.
- d. Ground Conductor: **[Bare][Insulated][None]**.
- e. Conductor Insulation: Type XHHW-2. Comply with UL 44.

6. Other Available Features Required by the Project:

- a. Marked "TC-ER," indicating that cable is designed for use with ASDs, with oversized crosslinked polyethylene insulation, **[spiral-wrapped foil plus 85 percent coverage braided shields and insulated full-size ground wire][dual spirally wrapped copper tape shields and three bare symmetrically applied ground wires]**, and sunlight- and oil-resistant outer PVC jacket.
 - 1) Marked "TC-ER-JP," indicating that cable is also suitable for pulling through structural members in accordance with Article 336.10(9) of NFPA 70.
 - 2) Marked "TC-ER-HL," indicating that cable is also suitable for use in hazardous (classified) environments.
- b. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
- c. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.
 - 1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

2.8 CONNECTORS AND SPLICES

A. UL PJOX - Armored and Metal-Clad Cable Fittings :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Installation Products]**
 - b. **[Adalet; division of Scott Fetzer Co.]**
 - c. **[American Fittings Corp. (AMFICO)]**
 - d. **[Arlington Industries, Inc.]**
 - e. **[Bridgeport Fittings Inc.]**
 - f. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - g. **[Halex; division of Scott Fetzer Co.]**
 - h. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **[O-Z/Gedney; brand of Appleton Group]**
 - j. **[Service Wire Co.]**
 - k. **[SIGMA Engineered Solutions]**
 - l. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Installation Products]**
 - b. **[Adalet; division of Scott Fetzer Co.]**
 - c. **[American Fittings Corp. (AMFICO)]**
 - d. **[Arlington Industries, Inc.]**

- e. [Bridgeport Fittings Inc.]
 - f. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - g. [Halex; division of Scott Fetzer Co.]
 - h. [Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - i. [O-Z/Gedney; brand of Appleton Group]
 - j. [Service Wire Co.]
 - k. [SIGMA Engineered Solutions]
 - l. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Type AC and Type MC Cable Connectors: UL CCN PJOX, including UL 514B.
4. Standard Features: For steel and aluminum sheathed cables, designed to connect conductors specified in this Section.
- B. UL PPYT - Mineral-Insulated Metallic-Sheathed Cable Fittings :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [TEC International]
 - b. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert **manufacturer's name; product name or designation**> or comparable product by one of the following:
 - a. [TEC International]
 - b. <Insert manufacturer's name>
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Type MI Cable Fittings: UL CCN PPYT, including UL 514B.
 - 4. Standard Features: For copper sheathed cables, designed to connect conductors specified in this Section.
- C. UL ZMVV - Wire Connectors and Soldering Lugs :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [ABB, Installation Products]
 - b. [Amphenol TPC Wire & Cable]
 - c. [Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Eaton]
 - e. [Fastenal Co.]

- f. [Gardner Bender; brand of ECM Industries LLC; division of nVent Electric plc]
 - g. [Hillsdale Terminal]
 - h. [Ideal Industries, Inc.]
 - i. [ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]
 - j. [Marinco Power Products]
 - k. [Morris Products Inc.]
 - l. [Newark; an Avnet Company]
 - m. [Panduit Corp]
 - n. [Penn-Union Corp.; subsidiary of Nesco, Inc.]
 - o. [TE Connectivity Ltd.]
 - p. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [ABB, Installation Products]
 - b. [Amphenol TPC Wire & Cable]
 - c. [Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Eaton]
 - e. [Fastenal Co.]
 - f. [Gardner Bender; brand of ECM Industries LLC; division of nVent Electric plc]
 - g. [Hillsdale Terminal]
 - h. [Ideal Industries, Inc.]
 - i. [ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]
 - j. [Marinco Power Products]
 - k. [Morris Products Inc.]
 - l. [Newark; an Avnet Company]
 - m. [Panduit Corp]
 - n. [Penn-Union Corp.; subsidiary of Nesco, Inc.]
 - o. [TE Connectivity Ltd.]
 - p. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Wire Connectors and Soldering Lugs: UL CCN ZMVV, including UL 486A-486B or UL 486C.
4. Standard Features:
- a. One piece, seamless, designed to terminate conductors specified in this Section.
 - b. Material: [Copper][Aluminum][Bronze].
 - c. Type: [One][Two] hole with [standard][long] barrels.
 - d. Termination: [Compression][Crimp].

PART 3 - EXECUTION

3.1 CONDUCTOR MATERIAL APPLICATIONS

A. Feeders:

1. Copper; solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.
2. Copper for feeders smaller than No. 4 AWG; copper, aluminum, or copper-clad aluminum for feeders No. 4 AWG and larger. Conductors must be solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.

B. Branch Circuits:

1. Material: **[Copper][Aluminum][Copper-clad aluminum]**.
 - a. Solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.
 - b. Solid for No. 12 AWG and smaller; stranded for No. 10 AWG and larger.

C. ASD Output Circuits Cable: Extra-flexible stranded for all sizes.

D. PV Circuits: **[Copper][Aluminum][Copper-clad aluminum]**; Solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.

3.2 CONDUCTOR INSULATION AND MULTICONDUCTOR CABLE APPLICATIONS AND WIRING METHODS

- A. Service Entrance: **[Type THHN/THWN-2, single conductors in raceway][Type XHHW-2, single conductors in raceway][Type USE, single conductor in raceway][Mineral-insulated, metal-sheathed cable, Type MI][Multiconductor cable, Type SE]**.
- B. Exposed Feeders: **[Type THHN/THWN-2, single conductors in raceway][Type XHHW-2, single conductors in raceway][Armored cable, Type AC][Metal-clad cable, Type MC][Mineral-insulated, metal-sheathed cable, Type MI][Nonmetallic-sheathed cable, Type NM]**.
- C. Feeders Concealed in Ceilings, Walls, Partitions, and Crawlspace: **[Type THHN/THWN-2, single conductors in raceway][Armored cable, Type AC][Metal-clad cable, Type MC][Mineral-insulated, metal-sheathed cable, Type MI][Nonmetallic-sheathed cable, Type NM]**.
- D. Feeders Concealed in Concrete, below Slabs-on-Grade, and Underground: **[Type THHN/THWN-2, single conductors in raceway][Type XHHW-2, single conductors in raceway][Underground feeder cable, Type UF]**.
- E. Feeders Installed below Raised Flooring: **[Type THHN/THWN-2, single conductors in raceway][Armored cable, Type AC][Metal-clad cable, Type MC][Mineral-insulated, metal-sheathed cable, Type MI]**.
- F. Feeders in Cable Tray: **[Type THHN/THWN-2, single conductors in raceway][Type XHHW-2, single conductors larger than No. 1/0 AWG][Armored cable, Type AC][Metal-clad cable, Type MC][Mineral-insulated, metal-sheathed cable, Type MI][Nonmetallic-sheathed cable, Type NM]**.
- G. Exposed Branch Circuits, Including in Crawlspace: **[Type THHN/THWN-2, single conductors in raceway][Armored cable, Type AC][Metal-clad cable, Type MC][Mineral-insulated, metal-sheathed cable, Type MI][Nonmetallic-sheathed cable, Type NM]**.
- H. Branch Circuits Concealed in Ceilings, Walls, and Partitions: **[Type THHN/THWN-2, single conductors in raceway][Armored cable, Type AC][Metal-clad cable, Type MC][Mineral-insulated, metal-sheathed cable, Type MI][Nonmetallic-sheathed cable, Type NM]**.
- I. Branch Circuits Concealed in Concrete, below Slabs-on-Grade, and Underground: **[Type THHN/THWN-2, single conductors in raceway][Type XHHW-2, single conductors in raceway][Underground branch-circuit cable, Type UF]**.

- J. Branch Circuits Installed below Raised Flooring: **[Type THHN/THWN-2, single conductors in raceway][Armored cable, Type AC][Metal-clad cable, Type MC][Mineral-insulated, metal-sheathed cable, Type MI]**.
- K. Branch Circuits in Cable Tray: **[Type THHN/THWN-2, single conductors in raceway][Type XHHW-2, single conductors larger than No. 1/0 AWG][Armored cable, Type AC][Metal-clad cable, Type MC][Mineral-insulated, metal-sheathed cable, Type MI][Nonmetallic-sheathed cable, Type NM]**.
- L. Cord Drops and Portable Appliance Connections: Type SO, hard service cord with stainless steel, wire-mesh, strain relief device at terminations to suit application.
- M. ASD Output Circuits: **[Type XHHW-2 in metal conduit][Type TC-ER cable with braided shield][Type TC-ER cable with dual tape shield]**.
- N. PV Circuits, Type USE-2: For PV source circuits rated at 600 V or less.
- O. PV Circuits, Type PV: For PV source circuits rated at **[600][1000][2000]** V.

3.3 INSTALLATION OF LOW-VOLTAGE ELECTRICAL POWER CONDUCTORS AND CABLES

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Temporary Electric Power Work: NECA NEIS 200.
 - 5. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 6. Work in Confined Spaces: NFPA 350.
 - 7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 8. Installation of Type AC and Type MC Cables: NECA NEIS 120.
 - 9. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
 - 1. Conceal cables in finished walls, ceilings, and floors unless otherwise indicated.
 - 2. Complete raceway installation between conductor and cable termination points prior to pulling conductors and cables.
 - 3. Use manufacturer-approved pulling compound or lubricant where necessary; compound used must not deteriorate conductor or insulation. Do not exceed manufacturer's recommended maximum pulling tensions and sidewall pressure values.
 - 4. Use pulling means, including fish tape, cable, rope, and basket-weave wire/cable grips, that will not damage cables or raceway.
 - 5. Install exposed cables parallel and perpendicular to surfaces of exposed structural members, and follow surface contours where possible.
 - 6. Provide support for cables.
 - 7. Complete cable tray systems installation prior to installing conductors and cables.
 - 8. Connections:
 - a. Tighten electrical connectors and terminals in accordance with manufacturer's published torque-tightening values. If manufacturer's torque values are not indicated, use those specified in UL 486A-486B.

- b. Make splices, terminations, and taps that are compatible with conductor material[**and that possess equivalent or better mechanical strength and insulation ratings than unspliced conductors**].
 - 1) Use oxide inhibitor in each splice, termination, and tap for aluminum conductors.
 - 9. Wiring at Outlets: Install conductor at each outlet, with at least **[6 inch (150 mm)][12 inch (300 mm)]** of slack.
 - D. Interfaces with Other Work:
 - 1. Identification:
 - a. Identify and color-code conductors and cables.
 - b. Identify each spare conductor at each end with identity number and location of other end of conductor, and identify as spare conductor.
 - 2. Sleeves and Sleeve Seals: Install sleeves and sleeve seals at penetrations of exterior floor and wall assemblies.
 - 3. Firestopping: Apply firestopping to electrical penetrations of fire-rated floor and wall assemblies to restore original fire-resistance rating of assembly.
- 3.4 FIELD QUALITY CONTROL
- A. Administrant for Electrical Power Tests and Inspections:
 - 1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 - 2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 - 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 - 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].
 - B. Acceptance Testing Preparation:
 - 1. **<Insert requirements>**.
 - C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
 - D. Tests and Inspections:
 - 1. Perform manufacturer's recommended tests and inspections.
 - 2. After installing conductors and cables and before electrical circuitry has been energized, test service entrance and feeder conductors for compliance with requirements.
 - 3. After installing conductors and cables and before electrical circuitry has been energized, test **[service entrance and feeder conductors][and][conductors]** feeding the following critical equipment and services for compliance with requirements:
 - a. **<Insert, in separate subparagraphs, critical equipment and services to be tested>**.
 - 4. Perform each of the following visual and electrical tests:

- a. Inspect exposed sections of conductor and cable for physical damage and correct connection in accordance with the single-line diagram.
- b. Test bolted connections for high resistance using one or more of the following:
 - 1) A low-resistance ohmmeter.
 - 2) Calibrated torque wrench.
 - 3) Thermographic survey.
- c. Inspect compression-applied connectors for correct cable match and indentation.
- d. Inspect for correct identification.
- e. Inspect cable jacket and condition.
- f. Insulation-resistance test on each conductor for ground and adjacent conductors. Apply a potential of 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable for a one-minute duration.
- g. Continuity test on each conductor and cable.
- h. Uniform resistance of parallel conductors.

E. Nonconforming Work:

- 1. Wire or cable assembly will be considered defective if it does not pass tests and inspections.
- 2. Remove and replace defective units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

3.5 MAINTENANCE

- A. Infrared Scanning of Splices: Two months after Substantial Completion, perform infrared scan of splices, joints, and connections in conductors 3 AWG and larger. Remove covers so splices, joints, and connections are accessible to portable scanner. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison. Correct deficiencies determined during the scan.
 - 1. Follow-On Infrared Scanning: Perform follow-up infrared scan of splices at 11 months after Substantial Completion.
 - 2. Instrument: Use infrared-scanning device designed to measure temperature or to detect significant deviations from normal values. Provide documentation of device calibration.
 - 3. Field Reports for Infrared Scanning: Prepare certified report that identifies cables splices checked and that describes scanning results. Include notation of deficiencies detected, remedial actions taken, and scanning observations after remedial action.

END OF SECTION 26 05 19 00

Task	Specification	Specification Description
26 05 19 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 19 16	26 05 13 00	Medium-Voltage Cables
26 05 19 16	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 19 16	26 05 23 00	Control-Voltage Electrical Power Cables
26 05 19 16	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 19 16	27 11 00 00	Communications Equipment Room Fittings
26 05 19 16	27 13 13 00	Communications Copper Backbone Cabling
26 05 19 16	27 15 33 00	Communications Coaxial Horizontal Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 23 00 - CONTROL-VOLTAGE ELECTRICAL POWER CABLES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Backboards.
2. Category 5e balanced twisted pair cable.
3. Category 6 balanced twisted pair cable.
4. Category 6a balanced twisted pair cable.
5. Balanced twisted pair cable hardware.
6. Twin-axial data highway cable.
7. RS-232 cable.
8. RS-485 cable.
9. Control cable.
10. Control-circuit conductors.
11. Fire-alarm wire and cable.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 ACTION SUBMITTALS

A. Product Data:

1. Backboards.
2. Category 5e balanced twisted pair cable.
3. Category 6 balanced twisted pair cable.
4. Category 6a balanced twisted pair cable.
5. Balanced twisted pair cable hardware.
6. Twin-axial data highway cable.
7. RS-232 cable.
8. RS-485 cable.
9. Control cable.
10. Control-circuit conductors.
11. Fire-alarm wire and cable.

B. Sustainable Design Submittals:

1. Product Data: For each conductor and cable indicating lead content.
2. Environmental Product Declaration: For each product.
3. Health Product Declaration: For each product.
4. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
5. Environmental Product Declaration: For each product.
6. Environmental Product Declaration: For each product.

7. Environmental Product Declaration: For each product.
8. Third-Party Certifications: For each product.
9. Third-Party Certified Life Cycle Assessment: For each product.

1.3 INFORMATIONAL SUBMITTALS

- A. Source quality-control reports.
- B. Field quality-control reports.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
- B. Flame Travel and Smoke Density in Plenums: As determined by testing identical products according to NFPA 262, by a qualified testing agency. Identify products for installation in plenums with appropriate markings of applicable testing agency.
 1. Flame Travel Distance: **60 inch (1520 mm)** or less.
 2. Peak Optical Smoke Density: 0.5 or less.
 3. Average Optical Smoke Density: 0.15 or less.
- C. Flame Travel and Smoke Density for Riser Cables in Non-Plenum Building Spaces: As determined by testing identical products according to UL 1666.
- D. Flame Travel and Smoke Density for Cables in Non-Riser Applications and Non-Plenum Building Spaces: As determined by testing identical products according to UL 1685.

2.2 BACKBOARDS

- A. Description: Plywood, **[fire-retardant treated], 3/4 by 48 by 96 inch (19 by 1220 by 2440 mm)**. Comply with requirements for plywood backing panels in Section 061000 "Rough Carpentry."
- B. Painting: Paint plywood on all sides and edges with **[flat][eggshell][black]<Insert color>[latex][alkyd]** paint. Comply with requirements in Section 099123 "Interior Painting."
 1. Lead Content: Less than 300 parts per million.

2.3 CATEGORY 5e BALANCED TWISTED PAIR CABLE

- A. Description: Four-pair, balanced-twisted pair cable, certified to meet transmission characteristics of Category 5e cable at frequencies up to 100 MHz.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. [AMP NETCONNECT; a TE Connectivity Ltd. company]
2. [Belden Inc.]
3. [Berk-Tek, a Leviton Company]
4. [CommScope, Inc]
5. [General Cable; Prysmian Group North America]
6. [Hitachi Cable America Inc.]
7. [Mohawk; a division of Belden Networking, Inc.]
8. [West Penn Wire; brand of Belden, Inc.]
9. <Insert manufacturer's name>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [AMP NETCONNECT; a TE Connectivity Ltd. company]
2. [Belden Inc.]
3. [Berk-Tek, a Leviton Company]
4. [CommScope, Inc]
5. [General Cable; Prysmian Group North America]
6. [Hitachi Cable America Inc.]
7. [Mohawk; a division of Belden Networking, Inc.]
8. [West Penn Wire; brand of Belden, Inc.]
9. <Insert manufacturer's name>

D. Standard: Comply with ICEA S-90-661, NEMA WC 63.1, and TIA-568-C.2 for Category 5e cables.

E. Conductors: 100 ohm, No. 24 AWG solid copper.

1. Lead Content: Less than 300 parts per million.

F. Shielding/Screening: [Unshielded twisted pairs (UTP)][Shielded twisted pairs (FTP)][Screened twisted pairs (F/UTP)][Screened and shielded twisted pairs (F/FTP)].

G. Cable Rating: [Riser][Plenum].

H. Jacket: [White][Gray]<Insert color> thermoplastic.

2.4 CATEGORY 6 BALANCED TWISTED PAIR CABLE

A. Description: Four-pair, balanced-twisted pair cable, [with internal spline,] certified to meet transmission characteristics of Category 6 cable at frequencies up to 250 MHz.

B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [3M]
2. [AMP NETCONNECT; a TE Connectivity Ltd. company]
3. [Belden Inc.]
4. [Berk-Tek, a Leviton Company]
5. [CommScope, Inc]
6. [General Cable; Prysmian Group North America]
7. [Genesis; Resideo Technologies, Inc.]
8. [Hitachi Cable America Inc.]
9. [Mohawk; a division of Belden Networking, Inc.]
10. [Prysmian Cables and Systems; Prysmian Group North America]

11. [Superior Essex Inc.; subsidiary of LS Corp.]
12. <Insert manufacturer's name>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [3M]
2. [AMP NETCONNECT; a TE Connectivity Ltd. company]
3. [Belden Inc.]
4. [Berk-Tek, a Leviton Company]
5. [CommScope, Inc]
6. [General Cable; Prysmian Group North America]
7. [Genesis; Resideo Technologies, Inc.]
8. [Hitachi Cable America Inc.]
9. [Mohawk; a division of Belden Networking, Inc.]
10. [Prysmian Cables and Systems; Prysmian Group North America]
11. [Superior Essex Inc.; subsidiary of LS Corp.]
12. <Insert manufacturer's name>

D. Standard: Comply with NEMA WC 66/ICEA S-116-732 and TIA-568-C.2 for Category 6 cables.

E. Conductors: 100 ohm, No. 23 AWG solid copper.

1. Lead Content: Less than 300 parts per million.

F. Shielding/Screening: [Unshielded twisted pairs (UTP)][Shielded twisted pairs (FTP)][Screened twisted pairs (F/UTP)][Screened and shielded twisted pairs (F/FTP)].

G. Cable Rating: [Riser][Plenum].

H. Jacket: [White][Gray][Blue][Yellow]<Insert color> thermoplastic.

2.5 CATEGORY 6a BALANCED TWISTED PAIR CABLE

A. Description: Four-pair, balanced-twisted pair cable, [with internal spline,] certified to meet transmission characteristics of Category 6a cable at frequencies up to 500 MHz.

B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [3M]
2. [AMP NETCONNECT; a TE Connectivity Ltd. company]
3. [Belden Inc.]
4. [Berk-Tek, a Leviton Company]
5. [CommScope, Inc]
6. [General Cable; Prysmian Group North America]
7. [Genesis; Resideo Technologies, Inc.]
8. [Hitachi Cable America Inc.]
9. [Mohawk; a division of Belden Networking, Inc.]
10. [Prysmian Cables and Systems; Prysmian Group North America]
11. [Superior Essex Inc.; subsidiary of LS Corp.]
12. <Insert manufacturer's name>

- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. [3M]
2. [AMP NETCONNECT; a TE Connectivity Ltd. company]
3. [Belden Inc.]
4. [Berk-Tek, a Leviton Company]
5. [CommScope, Inc]
6. [General Cable; Prysmian Group North America]
7. [Genesis; Resideo Technologies, Inc.]
8. [Hitachi Cable America Inc.]
9. [Mohawk; a division of Belden Networking, Inc.]
10. [Prysmian Cables and Systems; Prysmian Group North America]
11. [Superior Essex Inc.; subsidiary of LS Corp.]
12. **<Insert manufacturer's name>**

- D. Standard: Comply with TIA-568-C.2 for Category 6a cables.

- E. Conductors: 100 ohm, No. 23 AWG solid copper.

1. Lead Content: Less than 300 parts per million.

- F. Shielding/Screening: [Unshielded twisted pairs (UTP)][Shielded twisted pairs (FTP)][Screened twisted pairs (F/UTP)][Screened and shielded twisted pairs (F/FTP)].

- G. Cable Rating: [Riser][Plenum].

- H. Jacket: [White][Gray][Blue][Yellow]**<Insert color>** thermoplastic.

2.6 BALANCED TWISTED PAIR CABLE HARDWARE

- A. Description: Hardware designed to connect, splice, and terminate balanced twisted pair copper communications cable.

- B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [3M]
2. [American Technology Systems Industries, Inc]
3. [AMP NETCONNECT; a TE Connectivity Ltd. company]
4. [Belden Inc.]
5. [Berk-Tek, a Leviton Company]
6. [CommScope, Inc]
7. [Dynacom Corporation]
8. [General Cable; Prysmian Group North America]
9. [Genesis; Resideo Technologies, Inc.]
10. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
11. [Leviton Manufacturing Co., Inc.]
12. [Mohawk; a division of Belden Networking, Inc.]
13. [Molex Premise Networks]
14. [Panduit Corp]
15. [Prysmian Cables and Systems; Prysmian Group North America]
16. [Siemon Co. (The)]
17. [Superior Essex Inc.; subsidiary of LS Corp.]

18. <Insert manufacturer's name>
- C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
1. [3M]
 2. [American Technology Systems Industries, Inc]
 3. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 4. [Belden Inc.]
 5. [Berk-Tek, a Leviton Company]
 6. [CommScope, Inc]
 7. [Dynamac Corporation]
 8. [General Cable; Prysmian Group North America]
 9. [Genesis; Resideo Technologies, Inc.]
 10. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 11. [Leviton Manufacturing Co., Inc.]
 12. [Mohawk; a division of Belden Networking, Inc.]
 13. [Molex Premise Networks]
 14. [Panduit Corp]
 15. [Prysmian Cables and Systems; Prysmian Group North America]
 16. [Siemon Co. (The)]
 17. [Superior Essex Inc.; subsidiary of LS Corp.]
 18. <Insert manufacturer's name>
- D. General Requirements for Balanced Twisted Pair Cable Hardware:
1. Comply with the performance requirements of [Category 5e][Category 6][Category 6a][Category 7].
 2. Comply with TIA-568-C.2, IDC type, with modules designed for punch-down caps or tools.
 3. Cables must be terminated with connecting hardware of same category or higher.
- E. Source Limitations: [Obtain balanced twisted pair cable hardware from single source from single manufacturer][Obtain balanced twisted pair cable hardware from same manufacturer as balanced twisted pair cable, from single source].
- F. Connecting Blocks: [110-style IDC for Category 5e][110-style IDC for Category 6][66-style IDC for Category 5e]. Provide blocks for the number of cables terminated on the block, plus [25]<Insert number> percent spare, integral with connector bodies, including plugs and jacks where indicated.
- G. Cross-Connect: Modular array of connecting blocks arranged to terminate building cables and permit interconnection between cables.
1. Number of Terminals per Field: [One]<Insert number> for each conductor in assigned cables.
- H. Patch Panel: Modular panels housing numbered jack units with IDC-type connectors at each jack location for permanent termination of pair groups of installed cables.
1. Features:
 - a. Universal T568A and T568B wiring labels.
 - b. Labeling areas adjacent to conductors.
 - c. Replaceable connectors.
 - d. 24 or 48 ports.
 2. Construction: 16-gauge steel and mountable on 19 inch (483 mm) equipment racks.

3. Number of Jacks per Field: One for each four-pair **[cable indicated][conductor group of indicated cables, plus spares and blank positions adequate to suit specified expansion criteria]**.
- I. Patch Cords: Factory-made, four-pair cables in **[36 inch (900 mm)][48 inch (1200 mm)]<Insert length>**lengths; terminated with an eight-position modular plug at each end.
 1. Patch cords must have bend-relief-compliant boots and color-coded icons to ensure performance. Patch cords must have latch guards to protect against snagging.
 2. Patch cords must have color-coded boots for circuit identification.
- J. Plugs and Plug Assemblies:
 1. Male; eight position; color-coded modular telecommunications connector designed for termination of a single four-pair 100 ohm unshielded or shielded balanced twisted pair cable.
 2. Comply with IEC 60603-7-1, IEC 60603-7-2, IEC 60603-7-3, IEC 60603-7-4, and IEC 60603-7.5.
 3. Marked to indicate transmission performance.
- K. Jacks and Jack Assemblies:
 1. Female; eight position; modular; fixed telecommunications connector designed for termination of a single four-pair 100 ohm unshielded or shielded balanced twisted pair cable.
 2. Designed to snap-in to a patch panel or faceplate.
 3. Standards:
 - a. Category 5e, unshielded balanced twisted pair cable must comply with IEC 60603-7-2.
 - b. Category 5e, shielded balanced twisted pair cable must comply with IEC 60603-7-3.
 - c. Category 6, unshielded balanced twisted pair cable must comply with IEC 60603-7-4.
 - d. Category 6, shielded balanced twisted pair cable must comply with IEC 60603-7.5.
 - e. Category 6a, unshielded balanced twisted pair cable must comply with IEC 60603-7-41.
 - f. Category 6a, shielded balanced twisted pair cable must comply with IEC 60603-7.51.
 4. Marked to indicate transmission performance.
- L. Faceplate:
 1. **[Two][Four][Six]** port, vertical single-gang faceplates designed to mount to single-gang wall boxes.
 2. **[Eight][10][12]** port, vertical double-gang faceplates designed to mount to double-gang wall boxes.
 3. Plastic Faceplate: High-impact plastic. Coordinate color with Section 260533.16 "Boxes and Covers for Electrical Systems."
 4. Metal Faceplate: **[Stainless steel][Brass]<Insert description>**, complying with requirements in Section 260533.16 "Boxes and Covers for Electrical Systems."
 5. For use with snap-in jacks accommodating any combination of balanced twisted pair, optical fiber, and coaxial work area cords.
 - a. Flush mounting jacks, positioning the cord at a 45-degree angle.
- M. Legend:
 1. Machine printed, in the field, using adhesive-tape label.
 2. Snap-in, clear-label covers and machine-printed paper inserts.

2.7 TWIN-AXIAL DATA HIGHWAY CABLE

- A. Standard Cable: NFPA 70, Type CM.
1. Paired, <Insert number> pairs, [No. 20][No. 22][No. 24] AWG, stranded [(7x28)][(7x30)][(7x32)] tinned-copper conductors.
 2. Polypropylene insulation.
 3. Individual aluminum foil-polyester tape shielded pairs with 100 percent shield coverage.
 4. PVC jacket.
 5. Pairs are cabled on common axis with No. 24 AWG, stranded (7x32) tinned-copper drain wire.
 6. Flame Resistance: Comply with UL 1685.
 7. Lead Content: Less than 300 parts per million.
- B. Plenum-Rated Cable: NFPA 70, Type CMP.
1. Paired, <Insert number> pairs, [No. 20][No. 22][No. 24] AWG, stranded [(7x28)][(7x30)][(7x32)] tinned-copper conductors.
 2. Plastic insulation.
 3. Individual aluminum foil-polyester tape shielded pairs with 100 percent shield coverage.
 4. Plastic jacket.
 5. Pairs are cabled on common axis with No. 24 AWG, stranded (7x32) tinned-copper drain wire.
 6. Flame Resistance: Comply with NFPA 262.
 7. Lead Content: Less than 300 parts per million.

2.8 RS-232 CABLE

- A. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
1. [Allied Wire & Cable Inc.]
 2. [Belden Inc.]
 3. [General Cable; Prysmian Group North America]
 4. [Genesis; Resideo Technologies, Inc.]
 5. [Southwire Company, LLC]
 6. <Insert manufacturer's name>
- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
1. [Allied Wire & Cable Inc.]
 2. [Belden Inc.]
 3. [General Cable; Prysmian Group North America]
 4. [Genesis; Resideo Technologies, Inc.]
 5. [Southwire Company, LLC]
 6. <Insert manufacturer's name>
- C. PVC-Jacketed, TIA 232-F:
1. [Three][Nine], No. 22 AWG, stranded (7x30) tinned copper conductors.
 2. Lead Content: Less than 300 parts per million.
 3. Polypropylene insulation.
 4. Aluminum foil-polyester tape shield with 100 percent shield coverage.
 5. PVC jacket.

6. Conductors are cabled on common axis with No. 24 AWG, stranded (7x32) tinned copper drain wire.
7. NFPA 70 Type: Type CM.
8. Flame Resistance: Comply with UL 1581.

D. Plenum-Type, TIA 232-F:

1. **[Three][Nine]**, No. 22 AWG, stranded (7x30) tinned copper conductors.
2. Lead Content: Less than 300 parts per million.
3. PE insulation.
4. Aluminum foil-polyester tape shield with 100 percent shield coverage.
5. Fluorinated ethylene propylene jacket.
6. Conductors are cabled on common axis with No. 24 AWG, stranded (7x32) tinned copper drain wire.
7. Flame Resistance: Comply with NFPA 262.

2.9 RS-485 CABLE

A. Standard Cable: NFPA 70, Type CMG.

1. Paired, **[one pair][two pairs]**, twisted, No. 22 AWG, stranded (7x30) tinned-copper conductors.
2. PVC insulation.
3. Unshielded.
4. PVC jacket.
5. Flame Resistance: Comply with UL 1685.
6. Lead Content: Less than 300 parts per million.

B. Plenum-Rated Cable: NFPA 70, Type CMP.

1. Paired, **[one pair][two pairs]**, No. 22 AWG, stranded (7x30) tinned-copper conductors.
2. Fluorinated ethylene propylene insulation.
3. Unshielded.
4. Fluorinated ethylene propylene jacket.
5. Flame Resistance: NFPA 262.
6. Lead Content: Less than 300 parts per million.

2.10 CONTROL CABLE

A. Paired Cable: NFPA 70, Type CMG.

1. **[One][Multi-]**pair, twisted, **[No. 16 AWG, stranded (19x29)][No. 18 AWG, stranded (19x30)]** tinned-copper conductors.
2. PVC insulation.
3. Unshielded.
4. PVC jacket.
5. Flame Resistance: Comply with UL 1685.
6. Lead Content: Less than 300 parts per million.

B. Plenum-Rated, Paired Cable: NFPA 70, Type CMP.

1. **[One][Multi-]**pair, twisted, **[No. 16 AWG, stranded (19x29)][No. 18 AWG, stranded (19x30)]** tinned-copper conductors.
2. PVC insulation.
3. Unshielded.

4. PVC jacket.
5. Flame Resistance: Comply with NFPA 262.
6. Lead Content: Less than 300 parts per million.

2.11 CONTROL-CIRCUIT CONDUCTORS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 1. **[Encore Wire Corporation]**
 2. **[General Cable; Prysmian Group North America]**
 3. **[Service Wire Co.]**
 4. **[Southwire Company, LLC]**
 5. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 1. **[Encore Wire Corporation]**
 2. **[General Cable; Prysmian Group North America]**
 3. **[Service Wire Co.]**
 4. **[Southwire Company, LLC]**
 5. **<Insert manufacturer's name>**
- C. Class 1 Control Circuits: Stranded copper, **[Type THHN/THWN-2, complying with UL 83 in raceway][Type THW, complying with UL 83 in raceway][Type XHHW-2, complying with UL 44 in raceway][Type TC, complying with UL 1277 in raceway][Type MC, complying with UL 1569]**.
- D. Class 2 Control Circuits: Stranded copper, **[Type THHN/THWN-2, complying with UL 83 in raceway][Type XHHW-2, complying with UL 44 in raceway][power-limited cable, concealed in building finishes][power-limited tray cable, in cable tray]**.
- E. Class 3 Remote-Control and Signal Circuits: Stranded copper, **[Type THHN/THWN-2, complying with UL 83 in raceway][Type XHHW-2, complying with UL 44 in raceway][power-limited cable, concealed in building finishes][power-limited tray cable, in cable tray][Type TW or Type TF, complying with UL 83, in raceway]**.
- F. Class 2 Control Circuits and Class 3 Remote-Control and Signal Circuits That Supply Critical Circuits: Circuit Integrity (CI) cable.
 1. Smoke control signaling and control circuits.
 2. **<Insert list of critical circuits that require CI cable>**.

2.12 FIRE-ALARM WIRE AND CABLE

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 1. **[Allied Wire & Cable Inc.]**
 2. **[CommScope, Inc]**
 3. **[Comtran Corporation]**

4. [Genesis; Resideo Technologies, Inc.]
5. [Prysmian Cables and Systems; Prysmian Group North America]
6. [Radix Wire]
7. [Rockbestos-Suprenant Cable Corp.]
8. [Superior Essex Inc.; subsidiary of LS Corp.]
9. [West Penn Wire; brand of Belden, Inc.]
10. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [Allied Wire & Cable Inc.]
2. [CommScope, Inc]
3. [Comtran Corporation]
4. [Genesis; Resideo Technologies, Inc.]
5. [Prysmian Cables and Systems; Prysmian Group North America]
6. [Radix Wire]
7. [Rockbestos-Suprenant Cable Corp.]
8. [Superior Essex Inc.; subsidiary of LS Corp.]
9. [West Penn Wire; brand of Belden, Inc.]
10. <Insert manufacturer's name>

C. General Wire and Cable Requirements: NRTL listed and labeled as complying with NFPA 70, Article 760.

1. Lead Content: Less than 300 parts per million.

D. Signaling Line Circuits: Twisted, shielded pair, [**not less than**][No. 18 AWG]<Insert wire size>[size as recommended by system manufacturer].

1. Circuit Integrity Cable: Twisted shielded pair, NFPA 70, Article 760, Classification CI, for power-limited fire-alarm signal service Type FPL. NRTL listed and labeled as complying with UL 1424 and UL 2196 for a two-hour rating.

E. Non-Power-Limited Circuits: Solid-copper conductors with 600 V rated, 75 deg C, color-coded insulation, and complying with requirements in UL 2196 for a two-hour rating.

1. Control-Voltage Circuits: No. 16 AWG, minimum, in pathway.
2. Low-Voltage Circuits: No. 12 AWG, minimum, in pathway.
3. Multiconductor Armored Cable: NFPA 70, Type MC, copper conductors, Type TFN/THHN conductor insulation, copper drain wire, copper armor[**with outer jacket**] with red identifier stripe, NTRL listed for fire-alarm and cable tray installation, plenum rated.

2.13 SOURCE QUALITY CONTROL

- A. Testing Agency: [**Owner will engage**][Engage] a qualified testing agency to evaluate cables.
- B. Factory test twisted pair cables according to TIA-568-C.2.
- C. Cable will be considered defective if it does not pass tests and inspections.
- D. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Test cables on receipt at Project site.
 - 1. Test each pair of twisted pair cable for open and short circuits.

3.2 INSTALLATION OF RACEWAYS AND BOXES

- A. Comply with requirements in Section 260533.13 "Conduits for Electrical Systems" for raceway selection and installation requirements for conduits as supplemented or modified in this Section.
- B. Comply with requirements in Section 260533.23 "Surface Raceways for Electrical Systems" for raceway selection and installation requirements for wireways as supplemented or modified in this Section.
- C. Comply with requirements in Section 260533.16 "Boxes and Covers for Electrical Systems" for raceway selection and installation requirements for boxes as supplemented or modified in this Section.
 - 1. Outlet boxes must be no smaller than **2 inch (50 mm)** wide, **3 inch (75 mm)** high, and **2-1/2 inch (64 mm)** deep.
 - 2. Outlet boxes for cables must be no smaller than **4 inch (102 mm)** square by **[1-1/2 inch (38 mm)][2-1/8 inch (53 mm)]** deep with extension ring sized to bring edge of ring to within **1/8 inch (3.1 mm)** of the finished wall surface.
 - 3. Flexible metal conduit must not be used.
- D. Comply with TIA-569-D for pull-box sizing and length of conduit and number of bends between pull points.
- E. Install manufactured conduit sweeps and long-radius elbows if possible.
- F. Raceway Installation in Equipment Rooms:
 - 1. Position conduit ends adjacent to a corner on backboard if a single piece of plywood is installed, or in the corner of the room if multiple sheets of plywood are installed around perimeter walls of the room.
 - 2. Install cable trays to route cables if conduits cannot be located in these positions.
 - 3. Secure conduits to backboard if entering the room from overhead.
 - 4. Extend conduits **[3 inch (75 mm)]<Insert dimension>** above finished floor.
 - 5. Install metal conduits with grounding bushings and connect with grounding conductor to grounding system.
- G. Backboards: Install backboards with **96 inch (2440 mm)** dimension vertical. Butt adjacent sheets tightly and form smooth gap-free corners and joints.

3.3 INSTALLATION OF CONDUCTORS AND CABLES

- A. Comply with NECA 1.
- B. General Requirements for Cabling:

1. Comply with TIA-568-C Series of standards.
2. Comply with BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems."
3. Terminate all conductors; cable must not contain unterminated elements. Make terminations only at indicated outlets, terminals, and cross-connect and patch panels.
4. Cables may not be spliced and must be continuous from terminal to terminal. Do not splice cable between termination, tap, or junction points.
5. Cables serving a common system may be grouped in a common raceway. Install network cabling and control wiring and cable in separate raceway from power wiring. Do not group conductors from different systems or different voltages.
6. Secure and support cables at intervals not exceeding **30 inch (760 mm)** and not more than **6 inch (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
7. Bundle, lace, and train conductors to terminal points without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems." Install lacing bars and distribution spools.
8. Do not install bruised, kinked, scored, deformed, or abraded cable. Remove and discard cable if damaged during installation and replace it with new cable.
9. Cold-Weather Installation: Bring cable to room temperature before dereeling. Do not use heat lamps for heating.
10. Pulling Cable: Comply with BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems." Monitor cable pull tensions.
11. Support: Do not allow cables to lie on removable ceiling tiles.
12. Secure: Fasten securely in place with hardware specifically designed and installed so as to not damage cables.
13. Provide strain relief.
14. Keep runs short. Allow extra length for connecting to terminals. Do not bend cables in a radius less than 10 times the cable OD. Use sleeves or grommets to protect cables from vibration at points where they pass around sharp corners and through penetrations.
15. Ground wire must be copper, and grounding methods must comply with IEEE C2. Demonstrate ground resistance.

C. Balanced Twisted Pair Cable Installation:

1. Comply with TIA-568-C.2.
2. Install termination hardware as specified in Section 271513 "Communications Copper Horizontal Cabling" unless otherwise indicated.
3. Do not untwist balanced twisted pair cables more than **1/2 inch (12 mm)** at the point of termination to maintain cable geometry.

D. Installation of Control-Circuit Conductors:

1. Install wiring in raceways.
2. Use insulated spade lugs for wire and cable connection to screw terminals.

E. Open-Cable Installation:

1. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
2. Suspend copper cable not in a wireway or pathway a minimum of **8 inch (200 mm)** above ceilings by cable supports not more than [**30 inch (760 mm)**]**<Insert dimension>** apart.
3. Cable must not be run through or on structural members or in contact with pipes, ducts, or other potentially damaging items. Do not run cables between structural members and corrugated panels.

F. Installation of Cable Routed Exposed under Raised Floors:

1. Install plenum-rated cable only.

2. Install cabling after the flooring system has been installed in raised floor areas.
3. Below each feed point, neatly coil a minimum of **[72 inch (1830 mm)]<Insert dimension>** of cable in a coil not less than **[12 inch (305 mm)]<Insert dimension>** in diameter.

G. Separation from EMI Sources:

1. Comply with BICSI TDMM and TIA-569-D recommendations for separating unshielded copper voice and data communications cable from potential EMI sources including electrical power lines and equipment.
2. Separation between open communications cables or cables in nonmetallic raceways and unshielded power conductors and electrical equipment must be as follows:
 - a. Electrical Equipment or Circuit Rating Less Than 2 kVA: A minimum of **5 inch (127 mm)**.
 - b. Electrical Equipment or Circuit Rating between 2 and 5 kVA: A minimum of **12 inch (305 mm)**.
 - c. Electrical Equipment or Circuit Rating More Than 5 kVA: A minimum of **24 inch (600 mm)**.
3. Separation between communications cables in grounded metallic raceways and unshielded power lines or electrical equipment must be as follows:
 - a. Electrical Equipment or Circuit Rating Less Than 2 kVA: A minimum of **2-1/2 inch (64 mm)**.
 - b. Electrical Equipment or Circuit Rating between 2 and 5 kVA: A minimum of **6 inch (150 mm)**.
 - c. Electrical Equipment or Circuit Rating More Than 5 kVA: A minimum of **12 inch (305 mm)**.
4. Separation between communications cables in grounded metallic raceways and power lines and electrical equipment located in grounded metallic conduits or enclosures must be as follows:
 - a. Electrical Equipment or Circuit Rating Less Than 2 kVA: No requirement.
 - b. Electrical Equipment or Circuit Rating between 2 and 5 kVA: A minimum of **3 inch (75 mm)**.
 - c. Electrical Equipment or Circuit Rating More Than 5 kVA: A minimum of **6 inch (150 mm)**.
5. Separation between Communications Cables and Electrical Motors and Transformers, 5 kVA or 5 HP and Larger: A minimum of **48 inch (1200 mm)**.
6. Separation between Communications Cables and Fluorescent Fixtures: A minimum of **5 inch (127 mm)**.

3.4 REMOVAL OF CONDUCTORS AND CABLES

- A. Remove abandoned conductors and cables. Abandoned conductors and cables are those installed that are not terminated at equipment and are not identified with a tag for future use.

3.5 CONTROL-CIRCUIT CONDUCTORS

A. Minimum Conductor Sizes:

1. Class 1 remote-control and signal circuits; **[No 14 AWG]<Insert wire size>**.
2. Class 2 low-energy, remote-control, and signal circuits; **[No. 16 AWG]<Insert wire size>**.
3. Class 3 low-energy, remote-control, alarm, and signal circuits; **[No 12 AWG]<Insert wire size>**.

**3.6 FIRESTOPPING**

- A. Comply with requirements in Section 078413 "Penetration Firestopping."
- B. Comply with TIA-569-D, Annex A, "Firestopping."
- C. Comply with BICSI TDMM, "Firestopping" Chapter.

3.7 GROUNDING

- A. For data communication wiring, comply with TIA-607-B and with BICSI TDMM, "Bonding and Grounding (Earthing)" Chapter.
- B. For control-voltage wiring and cabling, comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."

3.8 IDENTIFICATION

- A. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
- B. Identify data and communications system components, wiring, and cabling according to TIA-606-B; label printers must use label stocks, laminating adhesives, and inks complying with UL 969.
- C. Identify each wire on each end and at each terminal with a number-coded identification tag. Each wire must have a unique tag.

3.9 FIELD QUALITY CONTROL

- A. Tests and Inspections:
 - 1. Visually inspect cable jacket materials for UL or third-party certification markings. Inspect cabling terminations to confirm color-coding for pin assignments, and inspect cabling connections to confirm compliance with TIA-568-C.1.
 - 2. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
 - 3. Test cabling for direct-current loop resistance, shorts, opens, intermittent faults, and polarity between conductors. Test operation of shorting bars in connection blocks. Test cables after termination, but not after cross-connection.
 - a. Test instruments must meet or exceed applicable requirements in TIA-568-C.2. Perform tests with a tester that complies with performance requirements in its "Test Instruments (Normative)" Annex, complying with measurement accuracy specified in its "Measurement Accuracy (Informative)" Annex. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.
- B. Document data for each measurement. Print data for submittals in a summary report that is formatted using Table 10.1 in BICSI TDMM as a guide, or transfer the data from the instrument to the computer, save as text files, print, and submit.
- C. End-to-end cabling will be considered defective if it does not pass tests and inspections.

26 - Electrical

D. Prepare test and inspection reports.

END OF SECTION 26 05 23 00

Task	Specification	Specification Description
26 05 23 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 26 00 - GROUNDING AND BONDING FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Grounding and bonding conductors.
2. Grounding and bonding clamps.
3. Grounding and bonding bushings.
4. Grounding and bonding hubs.
5. Grounding and bonding connectors.
6. Intersystem bonding bridge grounding connectors.
7. Grounding and bonding busbars.
8. Signal reference grids.
9. Grounding (earthing) electrodes.
10. Grounding electrode enclosures.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 264113 "Lightning Protection for Structures" specifies bonding of lightning protection grounding electrodes to facility grounding electrodes.
5. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs installed by this Section.
6. Section 270528 "Pathways for Communications Systems"[**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for identification and grounding and bonding of communications equipment, raceways, boxes, and cable trays.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for

submitted product.

B. Shop Drawings: Prepare and submit the following:

1. Plans showing dimensioned locations of grounding features described in "Field Quality Control for Grounding and Bonding" Article, including the following:
 - a. Grounding electrode access enclosures.
 - b. Grounding electrodes.
 - c. Grounding arrangements and connections for separately derived systems.
 - d. **<Insert items>**.

C. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

D. Field quality-control reports.

1.3 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

1.4 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data:

1. In addition to items specified in Section 260010 "Supplemental Requirements for Electrical," include the following:
 - a. Plans showing locations of grounding features described in "Field Quality Control for Grounding and Bonding" Article, including the following:
 - 1) Grounding electrode access enclosures.
 - 2) Grounding electrodes.
 - 3) Grounding arrangements and connections for separately derived systems.
 - 4) **<Insert items>**.
 - b. Instructions for periodic testing and inspection of grounding features at **[test wells][ring electrodes][grounding connections for separately derived systems]<Insert locations>** based on **[NETA MTS][NFPA 70B]<Insert reference>**.
 - 1) Tests must determine if ground-resistance or impedance values remain within specified maximums, and instructions must recommend corrective action if values do not.
 - 2) Include recommended testing intervals.

1.5 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, conduct tests of complex equipment, analyze test and equipment data, plan a job, and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical

tests.

- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems, evaluate tests, test equipment, test results, and power system performance, recommend actions to maintain or improve system performance, and lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

1.6 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Soil Resistivity: Grounding (earthing) Work on the Project must account for soil resistivity conditions specified in Section 018116 "Facility Environmental Requirements."
- B. Electrical and ICT Equipment Grounding (Earthing): Do not exceed [25 Ω][10 Ω]**<Insert resistance value>** resistance to ground (earth).
 - 1. Contact Architect for resolution if 25 Ω specified resistance to ground (earth) is not attained after complying with prescriptive requirements in Article 250 of NFPA 70.
 - 2. Contact Architect for resolution if [10 Ω]**<Insert resistance value>** specified resistance to ground (earth) is not attained after second attempt to increase effectiveness of grounding (earthing) electrode.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. **<Insert additional performance requirements for the Project>**.

2.2 GROUNDING AND BONDING CONDUCTORS

- A. Equipment Grounding Conductor:
 - 1. Standard Features: 600 V, [THHN/THWN-2][or][THWN-2], [copper][or][tinned-copper] wire or cable, green color, in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- B. Isolated Equipment Grounding Conductor:
 - 1. Standard Features: 600 V, [THHN/THWN-2][or][THWN-2], [copper][or][tinned-copper] wire or cable, green color with one or more yellow stripes, in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

C. ASTM - Bare Copper Grounding and Bonding Conductor:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ERICO; brand of nVent Electrical plc]**
 - b. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ERICO; brand of nVent Electrical plc]**
 - b. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - c. **<Insert manufacturer's name>**
3. Standard Features: Complying with one or more of the following:
 - a. Soft or Annealed Copper Wire: ASTM B3.
 - b. Concentric-Lay Stranded Copper Conductor: ASTM B8.
 - c. Tin-Coated Soft or Annealed Copper Wire: ASTM B33.
 - d. 19-Wire Combination Unilay-Stranded Copper Conductor: ASTM B787/B787M.
4. Sustainable Design Features:
 - a. Lead Content for Electrical Wire and Cable: Less than 300 ppm.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL KDER - Armored Grounding Wire:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[LS Cable & System USA; subsidiary of LS Corp.]**
 - b. **[Southwire Company, LLC]**
 - c. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - d. **[Viakon; brand of Conductores Monterrey S.A. de C.V.; a subsidiary of Xignux]**
 - e. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[LS Cable & System USA; subsidiary of LS Corp.]**
 - b. **[Southwire Company, LLC]**
 - c. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - d. **[Viakon; brand of Conductores Monterrey S.A. de C.V.; a subsidiary of Xignux]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
4. Standard Features: Single corrosion-resistant copper, aluminum, or copper-clad aluminum conductor within helically formed steel armor.
5. Sustainable Design Features:
 - a. Lead Content for Electrical Wire and Cable: Less than 300 ppm.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL KDSH - Protector Grounding Conductor:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - b. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
- 4. Standard Features:
 - a. Conductors intended to be used for grounding primary protector or metallic members of cable sheath in accordance with Chapters 7 and 8 of NFPA 70.
 - b. Color: **[Light olive gray][or][green]**.
- 5. Sustainable Design Features:
 - a. Lead Content for Electrical Wire and Cable: Less than 300 ppm.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.3 GROUNDING AND BONDING CLAMPS

- A. Description: Clamps suitable for attachment of grounding and bonding conductors to grounding electrodes, pipes, tubing, and rebar. Grounding and bonding clamps specified in this article are also suitable for use with communications applications.
- B. UL KDER and KDSH - Hex-Fitting-Type Pipe and Rod Grounding and Bonding Clamp :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[America Fujikura Ltd. (AFL); Fujikura Ltd.]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - e. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - f. **[ERICO; brand of nVent Electrical plc]**
 - g. **[Galvan Industries, Inc.; Electrical Products Division, LLC]**
 - h. **[Greaves Corp.; Essex Products Group, Inc.]**
 - i. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - j. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - k. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - l. **[Panduit Corp]**
 - m. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - n. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[America Fujikura Ltd. (AFL); Fujikura Ltd.]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - e. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - f. **[ERICO; brand of nVent Electrical plc]**
 - g. **[Galvan Industries, Inc.; Electrical Products Division, LLC]**
 - h. **[Greaves Corp.; Essex Products Group, Inc.]**
 - i. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - j. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - k. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - l. **[Panduit Corp]**
 - m. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - n. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
 5. Standard Features:
 - a. Two pieces with **[zinc-plated][stainless steel]** bolts.
 - b. Clamp Material: **[Silicon bronze][Die-cast zinc alloy][Aluminum][Brass][Tinned brass]**.
 - c. Listed for outdoor use.
 6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- C. UL KDER and KDSH - U-Bolt-Type Pipe and Rod Grounding and Bonding Clamp :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. [ABB, Electrification Business]
 - b. [America Fujikura Ltd. (AFL); Fujikura Ltd.]
 - c. [Arlington Industries, Inc.]
 - d. [Cooper B-line; brand of Eaton, Electrical Sector]
 - e. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - f. [ERICO; brand of nVent Electrical plc]
 - g. [Galvan Industries, Inc.; Electrical Products Division, LLC]
 - h. [Greaves Corp.; Essex Products Group, Inc.]
 - i. [Harger Lightning & Grounding; business of Harger, Inc.]
 - j. [ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]
 - k. [O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]
 - l. [Panduit Corp]
 - m. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - n. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [America Fujikura Ltd. (AFL); Fujikura Ltd.]
 - c. [Arlington Industries, Inc.]
 - d. [Cooper B-line; brand of Eaton, Electrical Sector]
 - e. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - f. [ERICO; brand of nVent Electrical plc]
 - g. [Galvan Industries, Inc.; Electrical Products Division, LLC]
 - h. [Greaves Corp.; Essex Products Group, Inc.]
 - i. [Harger Lightning & Grounding; business of Harger, Inc.]
 - j. [ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]
 - k. [O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]
 - l. [Panduit Corp]
 - m. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - n. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
5. Standard Features:
 - a. Clamp Material: [Aluminum][Brass][Tinned brass].
 - b. Listed for outdoor use.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL KDER and KDSH - Strap-Type Pipe and Rod Grounding and Bonding Clamp :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[ERICO; brand of nVent Electrical plc]**
 - d. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - e. **[Panduit Corp]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[ERICO; brand of nVent Electrical plc]**
 - d. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - e. **[Panduit Corp]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
5. Standard Features:
 - a. Clamp Material: **[Aluminum][Copper][Tinned copper][Galvanized steel]**.
 - b. Listed for outdoor use.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced

- (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL KDER - Beam Grounding and Bonding Clamp :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Anderson; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - c. **[Panduit Corp]**
 - d. **[Penn-Union Corp.; subsidiary of Nesco, Inc.]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Anderson; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - c. **[Panduit Corp]**
 - d. **[Penn-Union Corp.; subsidiary of Nesco, Inc.]**
 - e. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
5. Standard Features: Mechanical-type, terminal, ground wire access from four directions; with dual, tin-plated or silicon bronze bolts.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL KDER - Exothermically Welded Connection :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[ALLTEC LLC]**
 - c. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[ERICO; brand of nVent Electrical plc]**
 - f. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[ALLTEC LLC]**
 - c. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[ERICO; brand of nVent Electrical plc]**
 - f. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
5. Standard Features: Exothermic-welding kits of types recommended by kit manufacturer for materials being joined and installation conditions.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

G. UL KDER - Raised-Floor Signal Reference Grid Clamp :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - e. **[ERICO; brand of nVent Electrical plc]**
 - f. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - e. **[ERICO; brand of nVent Electrical plc]**
 - f. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
5. Standard Features: Mechanical-type, stamped-steel terminal with hex head screw.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

**2.4 GROUNDING AND BONDING BUSHINGS**

- A. Description: Bonding bushings connect conduit fittings, tubing fittings, threaded metal conduit, and unthreaded metal conduit to metal boxes and equipment enclosures, and have one or more bonding screws intended to provide electrical continuity between bushing and enclosure. Grounding bushings have provision for connection of bonding or grounding conductor and may or may not also have bonding screws.
- B. UL KDER - Bonding Bushing :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Arlington Industries, Inc.]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Arlington Industries, Inc.]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 5. Standard Features: Threaded bushing with insulated throat.
 6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL KDER - Grounding Bushing :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Arlington Industries, Inc.]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Arlington Industries, Inc.]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
5. Standard Features: Threaded bushing with insulated throat and mechanical-type wire terminal.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.5 GROUNDING AND BONDING HUBS

A. UL KDER - Grounding and Bonding Hub :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Arlington Industries, Inc.]**
 - c. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Greaves Corp.; Essex Products Group, Inc.]**
 - f. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - g. **[Penn-Union Corp.; subsidiary of Nesco, Inc.]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Arlington Industries, Inc.]**
 - c. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Greaves Corp.; Essex Products Group, Inc.]**
 - f. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - g. **[Penn-Union Corp.; subsidiary of Nesco, Inc.]**
 - h. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
5. Standard Features: Insulated, gasketed, watertight hub with mechanical-type wire terminal.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.6 GROUNDING AND BONDING CONNECTORS

A. UL KDER - Pressure-Type Grounding and Bonding Busbar Cable Connector :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
5. Standard Features: Copper or copper alloy, for compression bonding of one or more conductor directly to copper busbar. Listed for direct burial.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL KDER - Lay-In Lug Mechanical-Type Grounding and Bonding Busbar Terminal :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[ABB, Electrification Business]**
 - b. **[Chatsworth Products, Inc.]**
 - c. **[Greaves Corp.; Essex Products Group, Inc.]**
 - d. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Chatsworth Products, Inc.]**
 - c. **[Greaves Corp.; Essex Products Group, Inc.]**
 - d. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - e. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
 5. Standard Features: Mechanical-type, **[aluminum][copper rated for direct burial]** terminal with set screw.
 6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- C. UL KDER - Crimped Lug Pressure-Type Grounding and Bonding Busbar Terminal :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - c. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - d. **<Insert manufacturer's name>**

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[ABB, Electrification Business]**
 - b. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - c. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
 5. Standard Features: Cast silicon bronze, solderless compression-type wire terminals; with long barrel and two holes spaced on **5/8 or 1 inch (16 or 25 mm)** centers for two-bolt connection to busbar.
 6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL KDER - Split-Bolt Service-Post Pressure-Type Grounding and Bonding Busbar Terminal :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Panduit Corp]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Panduit Corp]**
 - b. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in

accordance with guide information and standards specified for the following UL product categories:

- a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
5. Standard Features: Bolts that surround cable and bond to cable under compression when nut is tightened after assembly is screwed into busbar opening.
6. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL KDER - Crimped Pressure-Type Grounding and Bonding Cable Connector :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[allG Fabrication (formerly ALT)]**
 - c. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[allG Fabrication (formerly ALT)]**
 - c. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - e. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Crimp-and-compress connectors that bond to conductor when connector is compressed around conductor.
 - a. **[Copper][Copper alloy][Tinned copper]**, C and H shaped.
 6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- F. UL KDER - Split-Bolt Pressure-Type Grounding and Bonding Cable Connector :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[allIG Fabrication (formerly ALT)]**
 - c. **[ERICO; brand of nVent Electrical plc]**
 - d. **[Greaves Corp.; Essex Products Group, Inc.]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[allIG Fabrication (formerly ALT)]**
 - c. **[ERICO; brand of nVent Electrical plc]**
 - d. **[Greaves Corp.; Essex Products Group, Inc.]**
 - e. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
 5. Standard Features: Bolts that surround cable and bond to cable under compression when nut is tightened.

- a. **[Copper][Copper alloy][Tinned copper].**
- 6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- G. UL KDER - Signal Reference Grid Grounding and Bonding Connector :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[ERICO; brand of nVent Electrical plc]**
 - e. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - f. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[ERICO; brand of nVent Electrical plc]**
 - e. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - f. **<Insert manufacturer's name>**
 - 3. Source Limitations: Obtain products from single manufacturer.
 - 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 - b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
 - 5. Standard Features: Combination of compression wire connectors, access floor grounding clamps, bronze U-bolt grounding clamps, and copper split-bolt connectors, designed for the purpose.
 - 6. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.7 INTERSYSTEM BONDING BRIDGE GROUNDING CONNECTORS

- A. Description: Devices that provide means for connecting communications systems grounding and bonding conductors at service equipment or at disconnecting means for buildings or structures.
- B. UL KDSH - One-Piece Intersystem Bonding Bridge Grounding Connector :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Galvan Industries, Inc.; Electrical Products Division, LLC]**
 - b. **[Madison Electric Products; business of Southwire Company, LLC]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Galvan Industries, Inc.; Electrical Products Division, LLC]**
 - b. **[Madison Electric Products; business of Southwire Company, LLC]**
 - c. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
 4. Standard Features: Zinc-alloy one-piece construction; six terminating points; gangable.
 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced

- (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- C. UL KDSH - Two-Piece Intersystem Bonding Bridge Grounding Connector :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.
 4. Standard Features: **[Zinc-alloy][Copper]** body and polycarbonate cover; four terminating points.
 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.8 GROUNDING AND BONDING BUSBARS

- A. Description: Miscellaneous grounding and bonding devices that serve as common connection for multiple grounding and bonding conductors.
- B. UL KDER - Equipment Room Grounding and Bonding Busbar :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[allG Fabrication (formerly ALT)]**
 - b. **[Chatsworth Products, Inc.]**
 - c. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - e. **[ERICO; brand of nVent Electrical plc]**
 - f. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - g. **[Hoffman; brand of nVent Electrical plc]**
 - h. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - i. **[Panduit Corp]**
 - j. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[allG Fabrication (formerly ALT)]**
 - b. **[Chatsworth Products, Inc.]**
 - c. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - e. **[ERICO; brand of nVent Electrical plc]**
 - f. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - g. **[Hoffman; brand of nVent Electrical plc]**
 - h. **[ILSCO; brand of ECM Industries LLC; division of nVent Electric plc]**
 - i. **[Panduit Corp]**
 - j. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
 5. Standard Features:
 - a. Bus: Rectangular bar of annealed copper.
 - b. Mounting Stand-Off Insulators: Lexan or PVC.
 - 1) Comply with UL 891 for use in 600 V switchboards, impulse tested at 5000 V.
 6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability

- report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
7. Other Available Features Required by the Project:
- a. Dimensions: **[1/4 by 4 inch (6.3 by 100 mm)]<Insert dimensions>** in cross section; length as indicated on the Drawings.
 - b. Predrilled Hole Pattern: **[Complying with BICSI N3 and TIA-607][9/32 inch (7.14 mm) holes spaced 1-1/8 inch (28 mm) apart][Suitable for installing specified grounding and bonding connectors].**
 - c. Mounting Hardware: Stand-off brackets that provide **[2 inch (50 mm)][4 inch (100 mm)]<Insert dimension>** clearance to access rear of bus. Brackets and bolts must be stainless steel.

C. UL KDER - Rack and Cabinet Bonding Busbar :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Chatsworth Products, Inc.]**
 - b. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - c. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - d. **[Hoffman; brand of nVent Electrical plc]**
 - e. **[Panduit Corp]**
 - f. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Chatsworth Products, Inc.]**
 - b. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - c. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - d. **[Hoffman; brand of nVent Electrical plc]**
 - e. **[Panduit Corp]**
 - f. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features:
 - a. Bus: Rectangular bar of hard-drawn solid copper.
 - b. Horizontal Mounting Dimensions: Designed for mounting in [19 inch (483 mm)][23 inch (584 mm)] wide equipment racks or cabinets.
 - c. Vertical Mounting Dimensions: Designed for mounting in [72 inch (1827 mm)][36 inch (914 mm)] high equipment racks or cabinets.
 - d. Predrilled Hole Pattern: Accepts connectors for grounding and bonding conductor sizes 14 AWG to 2/0 AWG.
 - e. Mounting Hardware: Stainless steel or copper-plated, for attachment to rack.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.9 SIGNAL REFERENCE GRIDS

- A. Description: Means for providing low-impedance path to ground over a large area, approximating an equipotential plan, while simultaneously mitigating large current spikes from faults or lightning.
- B. UL KDER - Mesh-Type Signal Reference Grid :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - c. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - c. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - d. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.

4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
5. Standard Features: Conductive metal wire mesh for field-fabrication of grid.
 - a. Wire Size: **[8 AWG][6 AWG][4 AWG][2 AWG]**.
 - b. Wire Material: **[Copper][Copper-clad steel]**.
 - c. Spacing: **[4 inch (102 mm)][8 inch (203 mm)][12 inch (305 mm)][24 inch (610 mm)]**.
 - d. Welded or brazed intersections.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL KDER - Tape-Type Signal Reference Grid :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - b. **[ERICO; brand of nVent Electrical plc]**
 - c. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - b. **[ERICO; brand of nVent Electrical plc]**
 - c. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: Conductive copper tape for field-fabrication of grid.
 - a. Copper Tape Dimensions: **[16 mil (0.4 mm) (26 ga.) thick by 2 inch (51 mm) wide][40 mil (1 mm) (18 ga.) thick by 1.6 inch (40 mm) wide]<Insert dimensions>**.
 - b. Spacing: **[24 inch (610 mm)]<Insert dimension>**.
 - c. Welded or brazed fittings for intersections.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.10 GROUNDING (EARTHING) ELECTRODES

A. UL KDER - Rod Electrode :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[allG Fabrication (formerly ALT)]**
 - c. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **[ERICO; brand of nVent Electrical plc]**
 - e. **[Galvan Industries, Inc.; Electrical Products Division, LLC]**
 - f. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[allG Fabrication (formerly ALT)]**
 - c. **[Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **[ERICO; brand of nVent Electrical plc]**
 - e. **[Galvan Industries, Inc.; Electrical Products Division, LLC]**
 - f. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in

accordance with guide information and standards specified for the following UL product categories:

- a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
5. Standard Features: **[Copper-clad][Zinc-coated][Stainless] steel[, sectional type]; [3/4 inch by 10 ft (19 mm by 3 m)][5/8 inch by 8 ft (16 mm by 2.4 m)]**.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL KDER - Chemically Charged Rod Electrode :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[allIG Fabrication (formerly ALT)]**
 - b. **[ALLTEC LLC]**
 - c. **[ERICO; brand of nVent Electrical plc]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[allIG Fabrication (formerly ALT)]**
 - b. **[ALLTEC LLC]**
 - c. **[ERICO; brand of nVent Electrical plc]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
5. Standard Features: Copper tube, straight or L-shaped, charged electrode enhancement material.
 - a. Termination: Factory-attached 4/0 AWG bare conductor at least **48 inch (1200 mm)** long.
 - b. Backfill Material: Electrode manufacturer's recommended material.

6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

7. Other Available Features Required by the Project:

- a. Electrode Enhancement Material: **[Nonhazardous electrolytic chemical salts]<Insert enhancement material>**.

C. UL KDER - Plate Electrode :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ALLTEC LLC]**
 - b. **[Galvan Industries, Inc.; Electrical Products Division, LLC]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ALLTEC LLC]**
 - b. **[Galvan Industries, Inc.; Electrical Products Division, LLC]**
 - c. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
5. Standard Features: **1/4 inch (6 mm)** thick, hot-dip galvanized.
6. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.11 GROUNDING ELECTRODE ENCLOSURES

- A. Description: Enclosures designed to protect grounding electrodes from damage while providing access for inspection and testing of the grounding system.
- B. Grounding Electrode Access Well Enclosure :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ERICO; brand of nVent Electrical plc]**
 - b. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - c. **[Quazite; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ERICO; brand of nVent Electrical plc]**
 - b. **[Harger Lightning & Grounding; business of Harger, Inc.]**
 - c. **[Quazite; brand of Hubbell Utility Solutions; Hubbell Incorporated]**
 - d. **<Insert manufacturer's name>**
 - 3. Source Limitations: Obtain products from single manufacturer.
 - 4. Standard Features:
 - a. Well Material: **[Concrete][HDPE][Schedule 40 PVC]**.
 - b. Cover Material: **[Cast iron][Concrete][HDPE][Plastic][Steel]**.
 - c. Cover Strength: **[Sidewalk or turf use][Driveway use]<Insert rating>**.
 - 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Material Reuse: Product is salvaged, refurbished, or reused.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard

- development organization, is publicly available for product.
- f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Round:
- 1) Nominal Diameter: [8 inch (200 mm)][9 inch (230 mm)][10 inch (250 mm)][12 inch (300 mm)][13 inch (330 mm)]<Insert dimension>.
 - 2) Nominal Height: [10 inch (250 mm)][12 inch (300 mm)][18 inch (450 mm)][24 inch (600 mm)][30 inch (760 mm)][36 inch (910 mm)][48 inch (1220 mm)]<Insert dimension>.
 - 3) Slotted sides for installation after grounding connections made.
- b. Rectangular:
- 1) Nominal Width: [2 inch (50 mm)][12 inch (300 mm)][13 inch (330 mm)][17 inch (430 mm)][36 inch (910 mm)]<Insert dimension>.
 - 2) Nominal Length: [10 inch (250 mm)][12 inch (300 mm)][13 inch (330 mm)][17 inch (430 mm)][18 inch (450 mm)][24 inch (600 mm)][36 inch (910 mm)][42 inch (1070 mm)]<Insert dimension>.
 - 3) Nominal Height: [12 inch (300 mm)][18 inch (450 mm)][24 inch (600 mm)][30 inch (760 mm)]<Insert dimension>.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine facility's grounding electrode system and equipment grounding for compliance with requirements for maximum ground-resistance level and other conditions affecting performance of grounding and bonding of electrical system.
- B. Inspect test results of grounding system measured at point of electrical service equipment connection.
- C. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.
- D. Proceed with connection of electrical service equipment only after unsatisfactory conditions have been corrected.

3.2 SELECTION OF GROUNDING AND BONDING PRODUCTS

- A. Grounding and Bonding Conductors:
1. Provide solid conductor for [8 AWG]<Insert wire size> and smaller, and stranded conductors for [6 AWG]<Insert wire size> and larger unless otherwise indicated.
 2. Custom-Length Insulated Equipment Bonding Jumpers: 6 AWG, 19-strand, Type THHN.
 3. Bonding Cable: 28 kcmil, 14 strands of 17 AWG conductor, 1/4 inch (6 mm) in diameter.
 4. Bonding Conductor: 4 AWG or 6 AWG, stranded conductor.
 5. Bonding Jumper: Copper tape, braided conductors terminated with copper ferrules; 1-5/8 inch (41 mm) wide and 1/16 inch (1.6 mm) thick.

6. Tinned Bonding Jumper: Tinned-copper tape, braided conductors terminated with copper ferrules; **1-5/8 inch (41 mm)** wide and **1/16 inch (1.6 mm)** thick.
7. Underground Grounding Conductors: Install bare **[tinned-]**copper conductor, **[2/0 AWG]<Insert wire size>** minimum.

B. Grounding and Bonding Connectors:

1. Pipe and Equipment Grounding Conductor Terminations: Bolted connectors.
2. Underground Connections: Welded connectors except at test wells and as otherwise indicated.
3. Connections to Ground Rods at Test Wells: Bolted connectors.
4. Connections to Structural Steel: Welded connectors.

C. Grounding and Bonding Busbars: Provide in electrical equipment rooms, in rooms housing service equipment, and elsewhere as indicated on the Drawings.

D. Substation Signal Reference Grid:

1. Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with IEEE C2.
 - a. Install **[8 AWG][6 AWG]<Insert wire size from fault calculation>** bonding conductors below grade in a grid pattern on **2 ft (600 mm)** centers. Bond grid conductors with exothermic welds where they cross each other.
 - b. Grid must fill entire area inside equipment yard fence, and extend minimum **6.5 ft (2 m)** outside fence, so someone walking or running outside yard may not touch fence or open gate without first stepping inside grid.
 - c. Bond each metal fence post and gate post to at least two grid conductors.
 - d. Inside grid, bond equipment reinforcing steel inside bases and sidewalks to at least two grid conductors.
 - e. Bond underground metal pipe and conduit passing under grid to nearest grid conductor at both ends.

E. Signal Reference Grid Tape Mesh:

1. Install tape mesh under floor finish with the following features:
 - a. Tape mesh, **2 inch (50 mm)** by **16 mil (0.4 mm)** solid copper, **[12 inch (300 mm)][24 inch (610 mm)]** spacing.

3.3 SELECTION OF GROUNDING AND BONDING PRODUCTS FOR COMMUNICATIONS

- A.** Comply with Section 270528 "Pathways for Communications Systems" and Section 271100 "Communications Equipment Room Fittings."

3.4 SELECTION OF GROUNDING AND BONDING PRODUCTS FOR TOWERS AND ANTENNAS

A. Special Techniques:

1. Ring Electrode: Buried at least **30 inch (760 mm)** below grade and at least **24 inch (610 mm)** from base of tower or mounting.
2. Bond each tower base and metallic frame of dish to ring electrode, buried at least **18 inch (460 mm)** below grade.
3. Bond ring electrode and antenna bonding conductors to equipment room PBB or SBB, buried at least **30 inch (760 mm)** below grade.

4. Bond metal fences located within **6 ft (1.8 m)** of towers and antennas to ring electrode, buried at least **18 inch (460 mm)** below grade.
5. Special Requirements for Roof-Mounted Towers:
 - a. Roof Ring: Meet requirements for ring electrode except conductors must comply with NFPA 780.
 - b. Bond tower base footings steel, SBB in equipment room, and antenna support guys to roof ring.
 - c. Connect roof ring to perimeter conductors of lightning protection system.
6. Special Requirements for Waveguides and Coaxial Cable:
 - a. Bond cable shields at point of entry into building to nearest SBB and to cable entrance plate, using 2 AWG bonding conductors.
 - b. Bond coaxial cable surge arrester to ring electrode or roof ring using bonding conductor size recommended by surge-arrester manufacturer.

3.5 INSTALLATION OF GROUNDING AND BONDING

- A. Comply with manufacturer's published instructions.
- B. Reference Standards:
 1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
 2. Electrical Maintenance: NFPA 70B.
 3. Electrical Safety: NFPA 70E.
 4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 5. Communications Work: BICSI N1.
 6. Work in ITE Rooms: NFPA 75.
 7. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 8. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
 9. Work in Confined Spaces: NFPA 350.
 10. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 11. Ground Bonding Common with Lightning Protection System: Comply with NFPA 780 and UL 96 when interconnecting with lightning protection system. Bond electrical power system ground directly to lightning protection system grounding conductor at closest point to electrical service grounding electrode. Use bonding conductor sized same as system grounding electrode conductor, and install in conduit.
 12. Consult Architect for resolution of conflicting requirements.
- C. Special Techniques:
 1. Grounding and Bonding Conductors:
 - a. Route along shortest and straightest paths possible unless otherwise indicated or required by Code. Avoid obstructing access or placing conductors where they may be subjected to strain, impact, or damage.
 - b. Underground Grounding Conductors:
 - 1) Bury at least **30 inch (750 mm)** below grade.
 - 2) Duct-Bank Grounding Conductor: Bury **12 inch (300 mm)** above duct bank when indicated as part of duct-bank installation.
 2. Grounding and Bonding Connectors: Make connections so possibility of galvanic action or

electrolysis is minimized. Select connectors, connection hardware, conductors, and connection methods so metals in direct contact are galvanically compatible.

- a. Use electroplated or hot-tin-coated materials to ensure high conductivity and to make contact points closer in order of galvanic series.
 - b. Make connections with clean, bare metal at points of contact.
 - c. Make aluminum-to-steel connections with stainless steel separators and mechanical clamps.
 - d. Make aluminum-to-galvanized-steel connections with tin-plated copper jumpers and mechanical clamps.
 - e. Coat and seal connections having dissimilar metals with inert material to prevent future penetration of moisture to contact surfaces.
 - f. Bonding Straps and Jumpers: Install in locations accessible for inspection and maintenance except where routed through short lengths of conduit.
 - 1) Bonding to Structure: Bond straps directly to basic structure, taking care not to penetrate adjacent parts.
 - 2) Bonding to Equipment Mounted on Vibration Isolation Hangers and Supports: Install bonding so vibration is not transmitted to rigidly mounted equipment.
 - 3) Use exothermic-welded connectors for outdoor locations; if disconnect-type connection is required, use bolted clamp.
 - g. Grounding and Bonding for Piping:
 - 1) Metal Water Service Pipe: Install insulated copper grounding conductors, in conduit, from building's main service equipment, or grounding bus, to main metal water service entrances to building. Connect grounding conductors to main metal water service pipes; use bolted clamp connector or bolt lug-type connector to pipe flange by using one of lug bolts of flange. Where dielectric main water fitting is installed, connect grounding conductor on street side of fitting. Bond metal grounding conductor conduit or sleeve to conductor at each end.
 - 2) Water Meter Piping: Use braided-type bonding jumpers to electrically bypass water meters. Connect to pipe with bolted connector.
 - 3) Bond each aboveground portion of gas piping system downstream from equipment shutoff valve.
 - h. Bonding Interior Metal Ducts: Bond metal air ducts to equipment grounding conductors of associated fans, blowers, electric heaters, and air cleaners. Install **[tinned]** bonding jumper to bond across flexible duct connections to achieve continuity.
 - i. Grounding for Steel Building Structure: Install driven ground rod at base of each corner column and at intermediate exterior columns at distances not more than **60 ft (18 m)** apart.
3. Grounding and Bonding Busbars:
- a. Install busbar horizontally, on insulated spacers **2 inch (50 mm)** minimum from wall, **6 inch (150 mm)** above finished floor unless otherwise indicated.
 - b. Where busbars are indicated on both sides of doorways, route bonding conductor up to top of door frame, across top of doorway, and down; connect to continuation of horizontal busbar.
4. Electrodes:
- a. Ground Rods: Drive rods until tops are **2 inch (50 mm)** below finished floor or final grade unless otherwise indicated.
 - 1) Interconnect ground rods with grounding electrode conductor below grade and as

- otherwise indicated. Make connections without exposing steel or damaging coating if any.
- 2) Use exothermic welds for below-grade connections.
- b. For grounding electrode system, install at least **[three]<Insert number>** rods spaced at least one-rod length from each other and located at least same distance from other grounding electrodes, and connect to service grounding electrode conductor.
 - c. Test Wells: Ground rod driven through drilled hole in bottom of handhole. Handholes are specified in Section 260543 "Underground Ducts and Raceways for Electrical Systems," and must be at least **12 inch (300 mm)** deep, with cover.
 - 1) Install at least one test well for each service unless otherwise indicated. Install at ground rod electrically closest to service entrance. Set top of test well flush with finished grade or floor.
 - d. Ring Electrode: Install grounding conductor, electrically connected to each building structure ground rod and to each **[steel column][indicated item]**, extending around perimeter of **[building][area or item indicated]**.
 - 1) Install tinned-copper conductor not less than **[2/0 AWG]<Insert wire size>** for ring electrode and for taps to building steel.
 - 2) Bury ring electrode not less than **[24 inch (600 mm)]<Insert dimension>** from building's foundation.
 - e. Concrete-Encased Electrode (Ufer Ground):
 - 1) Fabricate in accordance with NFPA 70; use minimum of **[20 ft (6 m)]<Insert dimension>** of bare copper conductor not smaller than **[4 AWG]<Insert wire size>**.
 - a) If concrete foundation is less than **[20 ft (6 m)]<Insert dimension>** long, coil excess conductor within base of foundation.
 - b) Bond grounding conductor to reinforcing steel in at least four locations and to anchor bolts. Extend grounding conductor below grade and connect to building's grounding grid or to grounding electrode external to concrete.
 - 2) Fabricate in accordance with NFPA 70; using electrically conductive coated steel reinforcing bars or rods, at least **20 ft (6.0 m)** long. If reinforcing is in multiple pieces, connect together by usual steel tie wires or exothermic welding to create required length.
5. Grounding at Service:
 - a. Equipment grounding conductors and grounding electrode conductors must be connected to ground busbar. Install main bonding jumper between neutral and ground buses.
 6. Grounding Separately Derived Systems:
 - a. Permanent Generators: Install grounding electrode(s) at location of permanent generators having switched neutral connections. Electrode must be connected to equipment grounding conductor and to frame of generator.
 7. Grounding Underground Distribution System Components:
 - a. Duct-Bank Grounding Conductor: Bury **12 inch (300 mm)** above duct bank when indicated as part of duct-bank installation.

- b. Comply with IEEE C2 grounding requirements.
 - c. Grounding Manholes and Handholes: Install driven ground rod through manhole or handhole floor, close to wall, and set rod depth so **4 inch (100 mm)** will extend above finished floor. If necessary, install ground rod before manhole is placed and provide 1/0 AWG bare, tinned-copper conductor from ground rod into manhole through waterproof sleeve in manhole wall. Protect ground rods passing through concrete floor with double wrapping of pressure-sensitive insulating tape or heat-shrunk insulating sleeve from **2 inch (50 mm)** above to **6 inch (150 mm)** below concrete. Seal floor opening with waterproof, nonshrink grout.
 - d. Grounding Connections to Manhole Components: Bond exposed-metal parts such as inserts, cable racks, pulling irons, ladders, and cable shields within each manhole or handhole, to ground rod or grounding conductor. Make connections with 4 AWG minimum, stranded, hard-drawn copper bonding conductor. Train conductors level or plumb around corners and fasten to manhole walls. Connect to cable armor and cable shields in accordance with manufacturer's published instructions with splicing and termination kits.
 - e. Pad-Mounted Transformers and Switches: Install two ground rods and ring electrode around pad. Ground pad-mounted equipment and noncurrent-carrying metal items associated with substations by connecting them to underground cable and grounding electrodes. Install tinned-copper conductor not less than 2 AWG for ring electrode and for taps to equipment grounding terminals. Bury ring electrode not less than **6 inch (150 mm)** from foundation.
8. Equipment Grounding and Bonding:
- a. Install insulated equipment grounding conductors with feeders and branch circuits.
 - b. Install insulated equipment grounding conductors with the following items, in addition to those required by NFPA 70:
 - 1) Feeders and branch circuits.
 - 2) Lighting circuits.
 - 3) Receptacle circuits.
 - 4) Single-phase motor and appliance branch circuits.
 - 5) Three-phase motor and appliance branch circuits.
 - 6) Flexible raceway runs.
 - 7) Armored and metal-clad cable runs.
 - 8) Busway Supply Circuits: Install insulated equipment grounding conductor from grounding bus in switchgear, switchboard, or distribution panel to equipment grounding bar terminal on busway.
 - 9) X-Ray Equipment Circuits: Install insulated equipment grounding conductor in circuits supplying x-ray equipment.
 - c. Air-Duct Equipment Circuits: Install insulated equipment grounding conductor to duct-mounted electrical devices operating at 120 V and more, including air cleaners, heaters, dampers, humidifiers, and other duct electrical equipment. Bond conductor to each unit and to air duct and connected metallic piping.
 - d. Water Heater, Heat-Tracing, and Antifrost Heating Cables: Install separate insulated equipment grounding conductor to each electric water heater and heat-tracing cable. Bond conductor to heater units, piping, connected equipment, and components.
 - e. Isolated Grounding Receptacle Circuits: Install insulated equipment grounding conductor connected to receptacle grounding terminal. Isolate conductor from raceway and from panelboard grounding terminals. Terminate at equipment grounding conductor terminal of applicable derived system or service unless otherwise indicated.
 - f. Isolated Equipment Enclosure Circuits: For designated equipment supplied by branch circuit or feeder, isolate equipment enclosure from supply circuit raceway with nonmetallic raceway fitting listed for the purpose. Install fitting where raceway enters enclosure, and install separate insulated equipment grounding conductor. Isolate conductor from raceway

and from panelboard grounding terminals. Terminate at equipment grounding conductor terminal of applicable derived system or service unless otherwise indicated.

- g. Poles Supporting Outdoor Lighting Fixtures: Bond insulated equipment grounding conductor to equipment grounding terminal inside pole base.
- h. Metallic Fences: Comply with requirements of IEEE C2.
 - 1) Grounding Conductor: Bare[, **tinned**] copper, not less than **[8 AWG]<Insert wire size>**.
 - 2) Gates: Must be bonded to grounding conductor with flexible bonding jumper.
 - 3) Barbed Wire: Strands must be bonded to grounding conductor.

9. Fence Grounding:

- a. Grounding Method: At each grounding location, drive grounding rod vertically until top is **6 inch (150 mm)** below finished grade. Connect rod to fence with 6 AWG conductor. Connect conductor to each fence component at grounding location.
- b. Fences greater than **100 ft (30 m)** of Buildings, Structures, Walkways, and Roadways: Ground fence at maximum intervals of **[1500 ft (450 m)]<Insert lesser distance if grounding resistance is high>**.
- c. Fences within **100 ft (30 m)** of Buildings, Structures, Walkways, and Roadways: Ground fence at maximum intervals of **[750 ft (225 m)]<Insert lesser distance if grounding resistance is high>**.
 - 1) Gates and Other Fence Openings: Ground fence on each side of opening.
 - a) Bond metal gates to gate posts by connecting bonding jumper between gate post and gate frame.
 - b) Bond across openings, with and without gates, except at openings indicated as intentional fence discontinuities. Use 2 AWG wire and bury it at least **18 inch (460 mm)** below finished grade.
- d. Protection at Crossings of Overhead Electrical Power Lines: Ground fence at location of power line crossing and at maximum distance of **150 ft (45 m)** on each side of crossing.
- e. Bonding to Lightning-Protection System: If fence terminates at lightning-protected building or structure, ground fence and bond fence grounding conductor to lightning-protection down conductor or lightning-protection grounding conductor, complying with NFPA 780.

3.6 FIELD QUALITY CONTROL FOR GROUNDING AND BONDING

A. Adminstrant for Electrical Power Tests and Inspections:

- 1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
- 2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
- 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
- 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Acceptance Testing Preparation:

- 1. **<Insert requirements>**.

- C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- D. Tests and Inspections:
1. After installing grounding system but before permanent electrical circuits have been energized, test for compliance with requirements.
 2. Inspect physical and mechanical condition. Verify tightness of accessible, bolted, electrical connections with calibrated torque wrench in accordance with manufacturer's published instructions.
 3. Test completed grounding system at each location where maximum ground-resistance level is specified, at service disconnect enclosure grounding terminal[, **at ground test wells**][, **and at individual ground rods**]. Make tests at ground rods before conductors are connected.
 - a. Measure ground resistance no fewer than two full days after last trace of precipitation and without soil being moistened by means other than natural drainage or seepage and without chemical treatment or other artificial means of reducing natural ground resistance.
 - b. Perform tests by fall-of-potential method in accordance with IEEE Std 81.
 - c. Excessive Ground Resistance: If resistance to ground exceeds specified values, notify Architect promptly and include recommendations to reduce ground resistance.
 4. Prepare dimensioned Drawings locating each test well, ground rod and ground-rod assembly, and other grounding electrodes. Identify each by letter in alphabetical order, and key to record of tests and observations. Include number of rods driven and their depth at each location, and include observations of weather and other phenomena that may affect test results. Describe measures taken to improve test results.
- E. Nonconforming Work:
1. Grounding system will be considered defective if it does not pass tests and inspections.
 2. Remove and replace defective components and retest.
- F. Collect, assemble, and submit test and inspection reports.
1. Report measured ground resistances that exceed the following values:
 - a. Power and Lighting Equipment or System with Capacity of 500 kVA and Less: **[10 Ω]<Insert ohms>**.
 - b. Power and Lighting Equipment or System with Capacity of 500 to 1000 kVA: **[5 Ω]<Insert ohms>**.
 - c. Power and Lighting Equipment or System with Capacity More Than 1000 kVA: **[3 Ω]<Insert ohms>**.
 - d. Power Distribution Units or Panelboards Serving Electronic Equipment: **[1 Ω][3 Ω]<Insert ohms>**.
 - e. Substations and Pad-Mounted Equipment: **[5 Ω]<Insert ohms>**.
 - f. Manhole Grounds: **[10 Ω]<Insert ohms>**.
 - g. **<Insert application and maximum ground-resistance>**.

3.7 PROTECTION

- A. After installation, protect grounding and bonding cables and equipment from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

SECTION 26 05 29 00 - HANGERS AND SUPPORTS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Support systems.
2. Mounting, anchoring, and attachment components.
3. Installation of fabricated metal supports.
4. Installation of concrete bases.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 033000 "Cast-in-Place Concrete" specifies concrete materials, reinforcement, and placement requirements referenced by this Section.
5. Section 055000 "Metal Fabrications" specifies site-fabricated metal supports referenced by this Section.
6. **[Section 099113 "Exterior Painting"]****[Section 099123 "Interior Painting"]****[and]****[Section 099600 "High-Performance Coatings"]** specify cleaning and touchup painting of field welds, bolted connections, and abraded areas of shop paint on miscellaneous metal referenced by this Section.
7. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration controls, seismic restraints, and wind restraints referenced by this Section.

1.2 DELEGATED DESIGN SERVICES

- ##### A. Delegated Design Professionals:
- Engage qualified structural professional engineer to design hangers and supports for electrical systems.

1.3 ACTION SUBMITTALS

A. Product Data:

For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for the following:
 - a. Slotted support systems, hardware, and accessories.
 - b. Clamps.
 - c. Hangers.
 - d. Sockets.
 - e. Eye nuts.

- f. Fasteners.
- g. Anchors.
- h. Saddles.
- i. Brackets.
- j. <Insert product type>.

2. Include rated capacities and furnished specialties and accessories.

B. Shop Drawings: For fabrication and installation details for electrical hangers and support systems.

- 1. Hangers. Include product data for components.
- 2. Slotted support systems.
- 3. Equipment supports.
- 4. Vibration Isolation Base Details: Detail fabrication including anchorages and attachments to structure and to supported equipment. Include adjustable motor bases, rails, and frames for equipment mounting.

C. Delegated Design Submittals: For hangers and supports for electrical systems.

- 1. Include design calculations and details of hangers.
- 2. Include design calculations for seismic restraints.

1.4 INFORMATIONAL SUBMITTALS

A. Welding certificates.

1.5 REGULATORY AGENCY APPROVALS

A. Delegated design submittals and shop drawings requiring approval by authorities having jurisdiction must be signed by qualified structural professional engineer responsible for their preparation. **[Obtain approval by authorities having jurisdiction prior to submitting for action by Architect.]****[Submit for action by Architect prior to submitting for approval by authorities having jurisdiction.]**

1.6 QUALIFICATIONS

A. Structural Professional Engineer: Professional engineer possessing active qualifications specified in Section 014000 "Quality Requirements," with expertise in structural engineering, including design of seismic and wind controls, equipment hangers and supports, and concrete foundations.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Prepare design calculations in accordance with criteria specified in Section 260010 "Supplemental Requirements for Electrical" and Section 018123 "Facility Seismic and Wind Criteria."
- B. Surface-Burning Characteristics: Comply with ASTM E84; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame Rating: Class 1.
2. Self-extinguishing according to ASTM D635.

2.2 SUPPORT SYSTEMS

A. Steel Slotted Support Systems :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Atkore Unistrut]**
 - d. **[CADDY; brand of nVent Electrical plc]**
 - e. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - f. **[Flex-Strut Inc.]**
 - g. **[G-Strut]**
 - h. **[Gripple Inc.]**
 - i. **[Haydon Corporation]**
 - j. **[Metal Ties Innovation]**
 - k. **[MIRO Industries Inc.]**
 - l. **[Rocket Rack; Robroy Industries]**
 - m. **[Wesanco/ZSi-Foster; an Ideal Tridon Group Company]**
 - n. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Atkore Unistrut]**
 - d. **[CADDY; brand of nVent Electrical plc]**
 - e. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - f. **[Flex-Strut Inc.]**
 - g. **[G-Strut]**
 - h. **[Gripple Inc.]**
 - i. **[Haydon Corporation]**
 - j. **[Metal Ties Innovation]**
 - k. **[MIRO Industries Inc.]**
 - l. **[Rocket Rack; Robroy Industries]**
 - m. **[Wesanco/ZSi-Foster; an Ideal Tridon Group Company]**
 - n. **<Insert manufacturer's name>**
3. Standard Features: Preformed steel channels and angles with minimum **13/32 inch (10 mm)** diameter holes at a maximum of **8 inch (200 mm)** on center in at least one surface.
 - a. Referenced Standard: MFMA-4 factory-fabricated components for field assembly.
 - b. Material for Channel, Fittings, and Accessories: **[Galvanized steel][Plain steel][Stainless steel, Type 304][Stainless steel, Type 316]**.
 - c. Channel Width: **[Selected for applicable load criteria][1-5/8 inch (41.25 mm)][1-1/4 inch (31.75 mm)][13/16 inch (20.64 mm)]<Insert dimension>**.
 - d. Metallic Coatings: Hot-dip galvanized after fabrication and applied according to MFMA-4.

- e. Nonmetallic Coatings: Manufacturer's standard PVC, polyurethane, or polyester coating applied according to MFMA-4.
- f. Painted Coatings: Manufacturer's standard painted coating applied according to MFMA-4.
- g. Protect finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

B. Aluminum Slotted Support Systems :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Atkore Unistrut]**
 - c. **[Eaton]**
 - d. **[Flex-Strut Inc.]**
 - e. **[Haydon Corporation]**
 - f. **[MKT Metal Manufacturing]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Atkore Unistrut]**
 - c. **[Eaton]**
 - d. **[Flex-Strut Inc.]**
 - e. **[Haydon Corporation]**
 - f. **[MKT Metal Manufacturing]**
 - g. **<Insert manufacturer's name>**
3. Standard Features: Extruded-aluminum channels and angles with minimum **13/32 inch (10 mm)** diameter holes at a maximum of **8 inch (200 mm)** on center in at least one surface.
 - a. Referenced Standard: MFMA-4 factory-fabricated components for field assembly.
 - b. Channel Material: 6063-T5 aluminum alloy.
 - c. Fittings and Accessories Material: 5052-H32 aluminum alloy.
 - d. Channel Width: **[Selected for applicable load criteria][1-5/8 inch (41.25 mm)][1-1/4 inch (31.75 mm)][13/16 inch (20.64 mm)]<Insert dimension>**.
 - e. Nonmetallic Coatings: Manufacturer's standard PVC, polyurethane, or polyester coating applied according to MFMA-4.
 - f. Painted Coatings: Manufacturer's standard painted coating applied according to MFMA-4.
 - g. Protect finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

C. Nonmetallic Slotted Support Systems :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Allied Tube & Conduit; Atkore International]**

- b. **[Atkore Unistrut]**
 - c. **[Champion Fiberglass, Inc]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - e. **[Fabco Plastics Wholesale Limited]**
 - f. **[G-Strut]**
 - g. **[Haydon Corporation]**
 - h. **[Seasafe, Inc.; AMICO, a Gibraltar Industries Company]**
 - i. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Allied Tube & Conduit; Atkore International]**
 - b. **[Atkore Unistrut]**
 - c. **[Champion Fiberglass, Inc]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - e. **[Fabco Plastics Wholesale Limited]**
 - f. **[G-Strut]**
 - g. **[Haydon Corporation]**
 - h. **[Seasafe, Inc.; AMICO, a Gibraltar Industries Company]**
 - i. **<Insert manufacturer's name>**
- 3. Standard Features: Structural-grade, factory-formed, glass-fiber-resin channels and angles with minimum **13/32 inch (10 mm)** diameter holes at a maximum of **8 inch (200 mm)** on center, in at least one surface.
 - a. Standard: Comply with MFMA-4 factory-fabricated components for field assembly.
 - b. Channel Width: **[Selected for applicable load criteria][1-5/8 inch (41.25 mm)][1-1/4 inch (31.75 mm)][13/16 inch (20.64 mm)]<Insert dimension>**.
 - c. Fittings and Accessories: Products provided by channel and angle manufacturer and designed for use with those items.
 - d. Fitting and Accessory Materials: Same as those for channels and angles[, **except metal items may be stainless steel**].
 - e. Rated Strength: Selected to suit applicable load criteria.
 - f. Protect finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
- D. Conduit and Cable Support Devices:
 - 1. Standard Features: **[Steel][Steel and malleable-iron][Stainless steel][Glass-fiber-resin]** hangers, clamps, and associated fittings, designed for types and sizes of raceway or cable to be supported.
- E. Support for Conductors in Vertical Conduit:
 - 1. Standard Features: Factory-fabricated assembly consisting of threaded body and insulating wedging plug or plugs for nonarmored electrical conductors or cables in riser conduits. Plugs must have number, size, and shape of conductor gripping pieces as required to suit individual conductors or cables supported. Body must be made of malleable iron.
- F. Structural Steel for Fabricated Supports and Restraints:
 - 1. Standard Features: ASTM A36/A36M steel plates, shapes, and bars; black and galvanized.

2.3 MOUNTING, ANCHORING, AND ATTACHMENT COMPONENTS

A. Powder-Actuated Fasteners :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Hilti, Inc.]**
 - b. **[ITW Ramset/Red Head; Illinois Tool Works, Inc.]**
 - c. **[MKT Fastening, LLC]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Hilti, Inc.]**
 - b. **[ITW Ramset/Red Head; Illinois Tool Works, Inc.]**
 - c. **[MKT Fastening, LLC]**
 - d. **<Insert manufacturer's name>**
3. Standard Features: Threaded-steel stud, for use in hardened portland cement concrete, steel, or wood, with tension, shear, and pullout capacities appropriate for supported loads and building materials where used.

B. Mechanical-Expansion Anchors :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - b. **[Empire Industries, Inc.]**
 - c. **[Hilti, Inc.]**
 - d. **[ITW Ramset/Red Head; Illinois Tool Works, Inc.]**
 - e. **[MKT Fastening, LLC]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - b. **[Empire Industries, Inc.]**
 - c. **[Hilti, Inc.]**
 - d. **[ITW Ramset/Red Head; Illinois Tool Works, Inc.]**
 - e. **[MKT Fastening, LLC]**
 - f. **<Insert manufacturer's name>**
3. Standard Features: Insert-wedge-type, **[zinc-coated][stainless]** steel, for use in hardened portland cement concrete, with tension, shear, and pullout capacities appropriate for supported loads and building materials where used.

- C. Concrete Inserts:
 - 1. Standard Features: Steel or malleable-iron, slotted support system units are similar to MSS Type 18 units and comply with MFMA-4 or MSS SP-58.
- D. Clamps for Attachment to Steel Structural Elements:
 - 1. Standard Features: MSS SP-58 units are suitable for attached structural element.
- E. Through Bolts:
 - 1. Standard Features: Structural type, hex head, and high strength. Comply with ASTM F3125/F3125M, **Grade A325 (Grade A325M)**.
- F. Toggle Bolts:
 - 1. Standard Features: **[All][Stainless]** steel springhead type.
- G. Hanger Rods:
 - 1. Standard Features: Threaded steel.

PART 3 - EXECUTION

3.1 SELECTION OF HANGERS AND SUPPORTS

- A. Maximum Support Spacing and Minimum Hanger Rod Size for Raceways: Space supports for EMT, IMC, and ERM as **[required by][scheduled in NECA NEIS 1, where its Table 1 lists maximum spacings that are less than those stated in]** NFPA 70. Minimum rod size must be **1/4 inch (6 mm)** in diameter.
- B. Multiple Raceways or Cables: Install trapeze-type supports fabricated with steel slotted **[or other]** support system, sized so capacity can be increased by at least **[25]<Insert number>** percent in future without exceeding specified design load limits.
 - 1. Secure raceways and cables to these supports with **[two-bolt conduit clamps][single-bolt conduit clamps][single-bolt conduit clamps using spring friction action for retention in support channel]**.
- C. Spring-steel clamps designed for supporting single conduits without bolts may be used for **1-1/2 inch (38 mm)** and smaller raceways serving branch circuits and communication systems above suspended ceilings, and for fastening raceways to trapeze supports.

3.2 INSTALLATION OF HANGERS AND SUPPORTS

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Hot Work: NFPA 51B.

3. Work in Confined Spaces: NFPA 350.
4. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
5. Installation of Steel Conduit: NECA NEIS 101.
6. Installation of Aluminum Conduit: NECA NEIS 102.
7. Installation of Metal Cable Tray Systems: NECA NEIS 105.
8. Installation of Nonmetallic Cable Tray Systems: NECA NEIS 111.
9. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Raceway Support Methods: In addition to methods described in NECA NEIS 1, **[EMT][IMC][and][ERMC]** may be supported by openings through structure members, in accordance with NFPA 70.
2. Strength of Support Assemblies: Where not indicated, select sizes of components so strength will be adequate to carry present and future static loads within specified loading limits. Minimum static design load used for strength determination must be weight of supported components plus **200 lb (90 kg)**.
3. Mounting and Anchorage of Surface-Mounted Equipment and Components: Anchor and fasten electrical items and their supports to building structural elements by the following methods unless otherwise indicated by code:
 - a. To Wood: Fasten with lag screws or through bolts.
 - b. To New Concrete: Bolt to concrete inserts.
 - c. To Masonry: Approved toggle-type bolts on hollow masonry units and expansion anchor fasteners on solid masonry units.
 - d. To Existing Concrete: Expansion anchor fasteners.
 - e. Instead of expansion anchors, powder-actuated driven threaded studs provided with lock washers and nuts may be used in existing standard-weight concrete **4 inch (100 mm)** thick or greater. Do not use for anchorage to lightweight-aggregate concrete or for slabs less than **4 inch (100 mm)** thick.
 - f. To Steel: **[Welded threaded studs complying with AWS D1.1/D1.1M, with lock washers and nuts][Beam clamps (MSS SP-58, Type 19, 21, 23, 25, or 27), complying with MSS SP-69][Spring-tension clamps]**.
 - g. To Light Steel: Sheet metal screws.
 - h. Items Mounted on Hollow Walls and Nonstructural Building Surfaces: Mount cabinets, panelboards, disconnect switches, control enclosures, pull and junction boxes, transformers, and other devices on slotted-channel racks attached to substrate **[by means that comply with seismic-restraint strength and anchorage requirements]**.
4. Drill holes for expansion anchors in concrete at locations and to depths that avoid the need for reinforcing bars.

D. Interfaces with Other Work:

1. Provide **[vibration][and][seismic]** controls with hangers and supports.
2. Touchup Finishes:
 - a. Clean field welds and abraded areas of shop paint. Paint exposed areas immediately after erecting hangers and supports. Use same materials as used for shop painting. Comply with SSPC-PA 1 requirements for touching up field-painted surfaces.
 - 1) Apply paint by brush or spray to provide minimum dry film thickness of **2.0 mils (0.05 mm)**.
 - b. Cleaning and touchup painting of field welds, bolted connections, and abraded areas of

- shop paint on miscellaneous metal.
 - c. Galvanized Surfaces: Clean welds, bolted connections, and abraded areas and apply galvanizing-repair paint to comply with ASTM A780.
- 3. Installation of Fabricated Metal Supports:
 - a. Provide site-fabricated metal supports.
 - b. Cut, fit, and place miscellaneous metal supports accurately in location, alignment, and elevation to support and anchor electrical materials and equipment.
 - c. Field Welding: Comply with AWS D1.1/D1.1M. Submit welding certificates.
- 4. Installation of Concrete Bases:
 - a. Provide concrete bases of dimensions indicated, but not less than **4 inch (100 mm)** larger in both directions than supported unit, and so anchors will be a minimum of 10 bolt diameters from edge of the base.
 - b. Use **[3000 psi (20.7 MPa)]<Insert value>**, 28-day compressive-strength concrete.
 - c. Anchor equipment to concrete base as follows:
 - 1) Place and secure anchorage devices. Use supported equipment manufacturer's setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
 - 2) Install anchor bolts to elevations required for proper attachment to supported equipment.
 - 3) Install anchor bolts according to anchor-bolt manufacturer's written instructions.

END OF SECTION 26 05 29 00

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 05 29 00	05 40 00 00	Cold-Formed Metal Framing
26 05 29 00	05 50 00 00	Metal Fabrications
26 05 29 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 33 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 33 13 - CONDUITS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Type EMT duct raceways and elbows.
2. Type ENT duct raceways and fittings.
3. Type HDPE and Type EPEC duct raceways and fittings.
4. Type ERMC duct raceways, elbows, couplings, and nipples.
5. Type FMC duct raceways.
6. Type FMT duct raceways.
7. Type IMC duct raceways.
8. Type LFMC duct raceways.
9. Type LFNC duct raceways.
10. Type PVC duct raceways and fittings.
11. Type RTRC duct raceways and fittings.
12. Fittings for conduit, tubing, and cable.
13. Joint compounds.
14. Solvent cements.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural load design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. Section 078413 "Penetration Firestopping" specifies firestopping referenced by this Section.
5. Section 260519 "Low-Voltage for Electrical Power Conductors and Cables" specifies nonmetallic underground conduit with conductors (Type NUCC).
6. Section 260529 "Hangers and Supports for Electrical Systems" specifies conduit hangers and supports referenced by this Section.
7. Section 260543 "Underground Ducts and Raceways for Electrical Systems" specifies exterior duct banks, manholes, and underground utility construction.
8. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels.
9. Section 270528 "Pathways for Communications Systems" **and Section 271100 "Communications Equipment Room Fittings"** specifies additional requirements for installation of conduits for communications cabling.

1.2 REFERENCES

A. Abbreviations and Acronyms for Electrical Raceway Types:

1. EMT: Electrical metallic tubing.
2. EMT-A: Aluminum electrical metallic tubing.
3. EMT-S: Steel electrical metallic tubing.

4. EMT-SS: Stainless steel electrical metallic tubing.
5. ENT: Electrical nonmetallic tubing.
6. EPEC: Electrical HDPE underground conduit (thin wall).
7. EPEC-A: Type A electrical HDPE underground conduit.
8. EPEC-B: Type B electrical HDPE underground conduit.
9. ERMCM: Electrical rigid metal conduit.
10. ERMCM-A: Aluminum electrical rigid metal conduit.
11. ERMCM-S: Steel electrical rigid metal conduit.
12. ERMCM-S-G: Galvanized-steel electrical rigid metal conduit.
13. ERMCM-S-PVC: PVC-coated-steel electrical rigid metal conduit.
14. ERMCM-SS: Stainless steel electrical rigid metal conduit.
15. FMC: Flexible metal conduit.
16. FMC-A: Aluminum flexible metal conduit.
17. FMC-S: Steel flexible metal conduit.
18. FMT: Steel flexible metallic tubing.
19. FNMC: Flexible nonmetallic conduit. See "LFNC."
20. HDPE: HDPE underground conduit (thick wall).
21. HDPE-40: Schedule 40 HDPE underground conduit.
22. HDPE-80: Schedule 80 HDPE underground conduit.
23. IMC: Steel electrical intermediate metal conduit.
24. LFMC: Liquidtight flexible metal conduit.
25. LFMC-A: Aluminum liquidtight flexible metal conduit.
26. LFMC-S: Steel liquidtight flexible metal conduit.
27. LFMC-SS: Stainless steel liquidtight flexible metal conduit.
28. LFNC: Liquidtight flexible nonmetallic conduit.
29. LFNC-A: Layered (Type A) liquidtight flexible nonmetallic conduit.
30. LFNC-B: Integral (Type B) liquidtight flexible nonmetallic conduit.
31. LFNC-C: Corrugated (Type C) liquidtight flexible nonmetallic conduit.
32. PVC: Rigid PVC conduit.
33. PVC-40: Schedule 40 rigid PVC conduit.
34. PVC-80: Schedule 80 rigid PVC Conduit.
35. PVC-A: Type A rigid PVC concrete-encased conduit.
36. PVC-EB: Type EB rigid PVC concrete-encased underground conduit.
37. RGS: See ERMCM-S-G.
38. RMC: See ERMCM.
39. RTRC: Reinforced thermosetting resin conduit.
40. RTRC-AG: Low-halogen, aboveground reinforced thermosetting resin conduit.
41. RTRC-AG-HW: Heavy wall, low-halogen, aboveground reinforced thermosetting resin conduit.
42. RTRC-AG-SW: Standard wall, low-halogen, aboveground reinforced thermosetting resin conduit.
43. RTRC-AG-XW: Extra heavy wall, low-halogen, aboveground reinforced thermosetting resin conduit.
44. RTRC-BG: Low-halogen, belowground reinforced thermosetting resin conduit.

B. Definitions:

1. Conduit: A structure containing one or more duct raceways.
2. Direct Buried: Installed underground without encasement in concrete or other protective material.
3. Duct Bank: An arrangement of conduit providing one or more continuous duct raceways between two points.
4. Duct Raceway: A single enclosed raceway for conductors or cable.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.

B. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

C. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

1.5 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures; conduct tests of complex equipment; analyze test and equipment data; plan a job; and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.
- D. ERMC-S-PVC Installers: Installer possessing active qualifications specified in Section 014000 "Quality Requirements," and able to present unexpired certified Installer credentials issued by ERMC-S-PVC manufacturer prior to starting installation.
- E. Communications Testing and Inspecting Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site communications testing supervisor must have **[BICSI Technician (TECH)]<Insert certification program>** certification and documented training, and be experienced with testing communications equipment in accordance with **[BICSI]<Insert code enforced by authorities having jurisdiction>** testing standards.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. **<Insert additional performance requirements for the Project>**.

2.2 TYPE EMT DUCT RACEWAYS AND ELBOWS

A. UL FJMX - Aluminum Electrical Metal Tubing (EMT-A) and Elbows:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[American Conduit; Norsk Hydro ASA, Hydro Extrusion USA LLC]**
 - b. **[Patriot Aluminum Products, LLC]**
 - c. **[Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Conduit; Norsk Hydro ASA, Hydro Extrusion USA LLC]**
 - b. **[Patriot Aluminum Products, LLC]**
 - c. **[Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]**
 - d. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN FJMX; including UL 797A.
4. Standard Features:
 - a. Material: Aluminum.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:

- a. Colors: As indicated on the Drawings.
- B. UL FJMX - Stainless Steel Electrical Metal Tubing (EMT-SS) and Elbows:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Calconduit; Atkore International]**
 - b. **[Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V]**
 - c. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Calconduit; Atkore International]**
 - b. **[Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V]**
 - c. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN FJMX; including UL 797A.
 - 4. Standard Features:
 - a. Material: Stainless steel.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
 - 6. Other Available Features Required by the Project:
 - a. Colors: As indicated on the Drawings.
- C. UL FJMX - Steel Electrical Metal Tubing (EMT-S) and Elbows:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Allied Tube & Conduit; Atkore International]
 - b. [Calconduit; Atkore International]
 - c. [Emerson Electric Co., Automation Solutions]
 - d. [Picoma; Zekelman Industries]
 - e. [Republic Conduit; Nucor Corporation, Nucor Tubular Products]
 - f. [Topaz Lighting & Electric]
 - g. [Western Tube; Zekelman Industries]
 - h. [Wheatland Tube; Zekelman Industries]
 - i. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Allied Tube & Conduit; Atkore International]
 - b. [Calconduit; Atkore International]
 - c. [Emerson Electric Co., Automation Solutions]
 - d. [Picoma; Zekelman Industries]
 - e. [Republic Conduit; Nucor Corporation, Nucor Tubular Products]
 - f. [Topaz Lighting & Electric]
 - g. [Western Tube; Zekelman Industries]
 - h. [Wheatland Tube; Zekelman Industries]
 - i. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN FJMX; including UL 797.
4. Standard Features:
- a. Material: Steel.
 - b. Exterior Coating: [Zinc][Alternate corrosion-resistant coating].
 - c. Interior Coating: [Zinc with organic top coating][Zinc][Organic coating].
 - d. Minimum Trade Size: [Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)].
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- 6. Other Available Features Required by the Project:
 - a. Colors: As indicated on the Drawings.

2.3 TYPE ENT DUCT RACEWAYS AND FITTINGS

A. UL FKHU - Electrical Nonmetallic Tubing (ENT) and Fittings:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Cantex Inc.]**
 - c. **[JM Eagle]**
 - d. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Cantex Inc.]**
 - c. **[JM Eagle]**
 - d. **<Insert manufacturer's name>**
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN FKHU; including UL 1653.
- 4. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- 5. Other Available Features Required by the Project:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade**

- size 3/4)].
- b. Fittings:
 - 1) Mechanically Attached Fittings: UL 1653.
 - 2) Solvent-Attached Fittings: UL 651.

2.4 TYPE HDPE AND TYPE EPEC DUCT RACEWAYS AND FITTINGS

A. UL EAZX - Schedule 40 Electrical HDPE Underground Conduit (HDPE-40):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Blue Diamond Industries, LLC]**
 - b. **[JM Eagle]**
 - c. **[Petroflex North America]**
 - d. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - e. **[Southwire Company, LLC]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Blue Diamond Industries, LLC]**
 - b. **[JM Eagle]**
 - c. **[Petroflex North America]**
 - d. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - e. **[Southwire Company, LLC]**
 - f. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN EAZX; including UL 651A.
4. Standard Features:
 - a. Dimensional Specifications: Schedule 40.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute

- standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
- B. UL EAZX - Schedule 80 Electrical HDPE Underground Conduit (HDPE-80):
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Blue Diamond Industries, LLC]**
 - b. **[JM Eagle]**
 - c. **[Petroflex North America]**
 - d. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - e. **[Southwire Company, LLC]**
 - f. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Blue Diamond Industries, LLC]**
 - b. **[JM Eagle]**
 - c. **[Petroflex North America]**
 - d. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - e. **[Southwire Company, LLC]**
 - f. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN EAZX; including UL 651A.
 - 4. Standard Features:
 - a. Dimensional Specifications: Schedule 80.
 - 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute

standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

- a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.

C. UL EAZX - Type A Electrical HDPE Underground Conduit (EPEC-A):

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **<Insert manufacturer's name>**

- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **<Insert manufacturer's name>**

- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. UL CCN EAZX; including UL 651A.

- 4. Standard Features:

- a. Dimensional Specifications: Type A.

- 5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

- 6. Other Available Features Required by the Project:

- a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.

D. UL EAZX - Type B Electrical HDPE Underground Conduit (EPEC-B):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN EAZX; including UL 651A.
4. Standard Features:
 - a. Dimensional Specifications: Type B.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.

2.5 TYPE ERMCDUCT RACEWAYS, ELBOWS, COUPLINGS, AND NIPPLES

A. UL DYWV - Aluminum Electrical Rigid Metal Conduit (ERMC-A), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. [ABB, Electrification Business]
 - b. [Allied Tube & Conduit; Atkore International]
 - c. [American Conduit; Norsk Hydro ASA, Hydro Extrusion USA LLC]
 - d. [Appleton; Emerson Electric Co., Automation Solutions]
 - e. [Calconduit; Atkore International]
 - f. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - g. [Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - h. [Patriot Aluminum Products, LLC]
 - i. [Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]
 - j. [Republic Conduit; Nucor Corporation, Nucor Tubular Products]
 - k. [Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V.]
 - l. [Topaz Lighting & Electric]
 - m. [Western Tube; Zekelman Industries]
 - n. [Wheatland Tube; Zekelman Industries]
 - o. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Allied Tube & Conduit; Atkore International]
 - c. [American Conduit; Norsk Hydro ASA, Hydro Extrusion USA LLC]
 - d. [Appleton; Emerson Electric Co., Automation Solutions]
 - e. [Calconduit; Atkore International]
 - f. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - g. [Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - h. [Patriot Aluminum Products, LLC]
 - i. [Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]
 - j. [Republic Conduit; Nucor Corporation, Nucor Tubular Products]
 - k. [Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V.]
 - l. [Topaz Lighting & Electric]
 - m. [Western Tube; Zekelman Industries]
 - n. [Wheatland Tube; Zekelman Industries]
 - o. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DYWV; including UL 6A.
4. Standard Features:
 - a. Material: Aluminum.
 - b. Protective Coating: Provide protective coating for [use in concrete][direct burial][use in severely corrosive environment].
 - c. Minimum Trade Size: [Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)].
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability

- report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Colors: As indicated on the Drawings.
- B. UL DYWV - Stainless Steel Electrical Rigid Metal Conduit (ERMC-SS), Elbows, Couplings, and Nipples:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Calconduit; Atkore International]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Patriot Aluminum Products, LLC]**
 - f. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Calconduit; Atkore International]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Patriot Aluminum Products, LLC]**
 - f. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DYWV; including UL 6A.
 4. Standard Features:
 - a. Material: Stainless steel.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Colors: As indicated on the Drawings.
- C. UL DYIX - Galvanized-Steel Electrical Rigid Metal Conduit (ERMC-S-G), Elbows, Couplings, and Nipples:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Allied Tube & Conduit; Atkore International]**
 - b. **[Calconduit; Atkore International]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Patriot Aluminum Products, LLC]**
 - f. **[Republic Conduit; Nucor Corporation, Nucor Tubular Products]**
 - g. **[Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V.]**
 - h. **[Topaz Lighting & Electric]**
 - i. **[Western Tube; Zekelman Industries]**
 - j. **[Wheatland Tube; Zekelman Industries]**
 - k. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Allied Tube & Conduit; Atkore International]**
 - b. **[Calconduit; Atkore International]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Patriot Aluminum Products, LLC]**
 - f. **[Republic Conduit; Nucor Corporation, Nucor Tubular Products]**
 - g. **[Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V.]**
 - h. **[Topaz Lighting & Electric]**
 - i. **[Western Tube; Zekelman Industries]**
 - j. **[Wheatland Tube; Zekelman Industries]**
 - k. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in

accordance with guide information and standards specified for the following UL product categories:

- a. UL CCN DYIX; including UL 6.
4. Standard Features:
 - a. Exterior Coating: Zinc.
 - b. Interior Coating: **[Zinc with organic top coating][Zinc][Organic coating]**.
 - c. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
 - a. Colors: As indicated on the Drawings.
- D. UL DYIX - PVC-Coated-Steel Electrical Rigid Metal Conduit (ERMC-S-PVC), Elbows, Couplings, and Nipples:
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Bluesteel Services LLC]**
 - c. **[Calbond; Atkore International]**
 - d. **[KorKap; Robroy Industries]**
 - e. **[Perma-Cote; Robroy Industries]**
 - f. **[Plasti-Bond; Robroy Industries]**
 - g. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Bluesteel Services LLC]**
 - c. **[Calbond; Atkore International]**
 - d. **[KorKap; Robroy Industries]**

- e. [Perma-Cote; Robroy Industries]
 - f. [Plasti-Bond; Robroy Industries]
 - g. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN DYIX; including UL 6.
4. Standard Features:
- a. Exterior Coating: PVC complying with NEMA RN 1.
 - b. Interior Coating: [Zinc with organic top coating][Zinc][Organic coating].
 - c. Minimum Trade Size: [Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)].
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Colors: As indicated on the Drawings.
 - b. Conduit Fittings for Hazardous (Classified) Locations: UL 1203.
 - c. Expansion and Deflection Fittings: UL 651 with flexible bonding jumper.

2.6 TYPE FMC DUCT RACEWAYS

A. UL DXUZ - Steel Flexible Metal Conduit (FMC-S):

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [ABB, Electrification Business]
 - b. [Anaconda Sealtite; Anamet Electrical, Inc]
 - c. [Electri-Flex Company]
 - d. [International Metal Hose Co.]
 - e. [Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]

- f. **[Topaz Lighting & Electric]**
 - g. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Anaconda Sealtite; Anamet Electrical, Inc]**
 - c. **[Electri-Flex Company]**
 - d. **[International Metal Hose Co.]**
 - e. **[Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]**
 - f. **[Topaz Lighting & Electric]**
 - g. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DXUZ; including UL 1.
 - 4. Standard Features:
 - a. Material: Steel.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
 - 6. Other Available Features Required by the Project:
 - a. Colors: As indicated on the Drawings.
- B. UL DXUZ - Aluminum Flexible Metal Conduit (FMC-A):
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**

- b. [Anaconda Sealtite; Anamet Electrical, Inc]
 - c. [Electri-Flex Company]
 - d. [Topaz Lighting & Electric]
 - e. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Anaconda Sealtite; Anamet Electrical, Inc]
 - c. [Electri-Flex Company]
 - d. [Topaz Lighting & Electric]
 - e. <Insert manufacturer's name>
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DXUZ; including UL 1.
- 4. Standard Features:
 - a. Material: Aluminum.
 - b. Minimum Trade Size: [Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)].
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- 6. Other Available Features Required by the Project:
 - a. Colors: As indicated on the Drawings.

2.7 TYPE FMT DUCT RACEWAYS

A. UL ILJW - Steel Flexible Metallic Tubing (FMT):

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the

following]:

- a. **[Electri-Flex Company]**
 - b. **[International Metal Hose Co]**
 - c. **[Liquid Tight Connector Co.]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Electri-Flex Company]**
 - b. **[International Metal Hose Co]**
 - c. **[Liquid Tight Connector Co.]**
 - d. **[Southwire Company, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN ILJW; including UL Subject 1652.
4. Standard Features:
- a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Colors: As indicated on the Drawings.

2.8 TYPE IMC DUCT RACEWAYS

A. UL DYBY - Steel Intermediate Metal Conduit (IMC):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [ABB, Electrification Business]
 - b. [Allied Tube & Conduit; Atkore International]
 - c. [Calconduit; Atkore International]
 - d. [Republic Conduit; Nucor Corporation, Nucor Tubular Products]
 - e. [Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V.]
 - f. [Topaz Lighting & Electric]
 - g. [Western Tube; Zekelman Industries]
 - h. [Wheatland Tube; Zekelman Industries]
 - i. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [ABB, Electrification Business]
 - b. [Allied Tube & Conduit; Atkore International]
 - c. [Calconduit; Atkore International]
 - d. [Republic Conduit; Nucor Corporation, Nucor Tubular Products]
 - e. [Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V.]
 - f. [Topaz Lighting & Electric]
 - g. [Western Tube; Zekelman Industries]
 - h. [Wheatland Tube; Zekelman Industries]
 - i. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN DYBY; including UL 1242.
4. Standard Features:
- a. Exterior Coating: [Zinc][Alternative corrosion-resistant coating].
 - b. Interior Coating: [Zinc with organic top coating][Zinc][Organic coating].
 - c. Minimum Trade Size: [Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)].
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

- a. Colors: As indicated on the Drawings.

2.9 TYPE LFMC DUCT RACEWAYS

A. UL DXHR - Steel Liquidtight Flexible Metal Conduit (LFMC-S):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Anaconda Sealtite; Anamet Electrical, Inc]**
 - c. **[Electri-Flex Company]**
 - d. **[International Metal Hose Co]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Anaconda Sealtite; Anamet Electrical, Inc]**
 - c. **[Electri-Flex Company]**
 - d. **[International Metal Hose Co]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DXHR; including UL 360.
4. Standard Features:
 - a. Material: Steel.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate

scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

- a. Colors: As indicated on the Drawings.

B. UL DXHR - Stainless Steel Liquidtight Flexible Metal Conduit (LFMC-SS):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Anaconda Sealtite; Anamet Electrical, Inc]**
 - c. **[Electri-Flex Company]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Anaconda Sealtite; Anamet Electrical, Inc]**
 - c. **[Electri-Flex Company]**
 - d. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DXHR; including UL 360.
4. Standard Features:
 - a. Material: Stainless steel.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

- a. Colors: As indicated on the Drawings.

2.10 TYPE LFNC DUCT RACEWAYS

A. UL DXOQ - Layered (Type A) Liquidtight Flexible Nonmetallic Conduit (LFNC-A):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[AFC Cable Systems; Atkore International]**
 - b. **[Electri-Flex Company]**
 - c. **[Topaz Lighting & Electric]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[AFC Cable Systems; Atkore International]**
 - b. **[Electri-Flex Company]**
 - c. **[Topaz Lighting & Electric]**
 - d. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DXOQ; including UL 1660.
4. Standard Features:
 - a. Type A conduit with smooth seamless inner core and cover bonded together with one or more reinforcement layers between core and cover.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - c. Markings: **[80 deg C dry][90 deg C dry][105 deg C dry][70 deg C oil resistant][Sunlight resistant][Outdoor][Direct burial][Complies with flame test in cable trays]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

- a. Colors: As indicated on the Drawings.

B. UL DXOQ - Integral (Type B) Liquidtight Flexible Nonmetallic Conduit (LFNC-B):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Cambridge Resources]**
 - c. **[Electri-Flex Company]**
 - d. **[Superflex Ltd.]**
 - e. **[Topaz Lighting & Electric]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Cambridge Resources]**
 - c. **[Electri-Flex Company]**
 - d. **[Superflex Ltd.]**
 - e. **[Topaz Lighting & Electric]**
 - f. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DXOQ; including UL 1660.
4. Standard Features:
 - a. Type B conduit with smooth inner surface with integral reinforcement within conduit wall.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - c. Markings: **[80 deg C dry][90 deg C dry][105 deg C dry][70 deg C oil resistant][Sunlight resistant][Outdoor][Direct burial][Complies with flame test in cable trays]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project

- site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Colors: As indicated on the Drawings.
- C. UL DXOQ - Corrugated (Type C) Liquidtight Flexible Nonmetallic Conduit (LFNC-C):
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[HellermannTyton]**
 - c. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[HellermannTyton]**
 - c. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DXOQ; including UL 1660.
 - 4. Standard Features:
 - a. Type C conduit with corrugated internal and external surfaces without integral reinforcement within conduit wall.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - c. Markings: **[80 deg C dry][90 deg C dry][105 deg C dry][70 deg C oil resistant][Sunlight resistant][Outdoor][Direct burial][Complies with flame test in cable trays]**.
 - 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute

standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

- a. Colors: As indicated on the Drawings.

2.11 TYPE PVC DUCT RACEWAYS AND FITTINGS

A. UL DZYZR - Schedule 40 Rigid PVC Conduit (PVC-40) and Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Calconduit; Atkore International]**
 - c. **[JM Eagle]**
 - d. **[NAPCO; Westlake Chemical Corp.]**
 - e. **[National Pipe and Plastic, Inc. (Oldcastle)]**
 - f. **[Opti-Com Manufacturing Network, Inc (OMNI)]**
 - g. **[Topaz Lighting & Electric]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Calconduit; Atkore International]**
 - c. **[JM Eagle]**
 - d. **[NAPCO; Westlake Chemical Corp.]**
 - e. **[National Pipe and Plastic, Inc. (Oldcastle)]**
 - f. **[Opti-Com Manufacturing Network, Inc (OMNI)]**
 - g. **[Topaz Lighting & Electric]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DZYZR; including UL 651.
4. Standard Features:
 - a. Dimensional Specifications: Schedule 40.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - c. Markings: **[For use with maximum 90 deg C wire][For directional boring applications]**.
5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- B. UL DZYZR - Schedule 80 Rigid PVC Conduit (PVC-80) and Fittings:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Calconduit; Atkore International]**
 - c. **[JM Eagle]**
 - d. **[National Pipe and Plastic, Inc. (Oldcastle)]**
 - e. **[Opti-Com Manufacturing Network, Inc (OMNI)]**
 - f. **[Topaz Lighting & Electric]**
 - g. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Calconduit; Atkore International]**
 - c. **[JM Eagle]**
 - d. **[National Pipe and Plastic, Inc. (Oldcastle)]**
 - e. **[Opti-Com Manufacturing Network, Inc (OMNI)]**
 - f. **[Topaz Lighting & Electric]**
 - g. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DZYZR; including UL 651.
 - 4. Standard Features:
 - a. Dimensional Specifications: Schedule 80.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - c. Markings: **[For use with maximum 90 deg C wire][For directional boring applications]**.
 - 5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL DZYZR - Type A Rigid PVC Concrete-Encased Conduit (PVC-A) and Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Southern Pipe, Inc.]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Southern Pipe, Inc.]**
 - b. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DZYZR; including UL 651.
4. Standard Features:
 - a. Dimensional Specifications: Type A.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard

- development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- D. UL DZYZR - Type EB Rigid PVC Concrete-Encased Underground Conduit (PVC-EB) and Fittings:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[JM Eagle]**
 - b. **[Southern Pipe, Inc.]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[JM Eagle]**
 - b. **[Southern Pipe, Inc.]**
 - c. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DZYZR; including UL 651.
 4. Standard Features:
 - a. Dimensional Specifications: Type EB.
 - b. Minimum Trade Size: **[Metric designator 53 (trade size 2)][Metric designator 78 (trade size 3)][Metric designator 103 (trade size 4)]**.
 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.12 TYPE RTRC DUCT RACEWAYS AND FITTINGS

- A. UL DZKT - Heavy Wall, Low-Halogen, Aboveground Reinforced Thermosetting Resin Conduit (RTRC-AG-HW) and Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Champion Fiberglass, Inc]**
 - b. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Champion Fiberglass, Inc]**
 - b. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DZKT; including UL 2515.
 4. Standard Features:
 - a. Additional Characteristics: Type AG-HW.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- B. UL DZKT - Standard Wall, Low-Halogen, Aboveground Reinforced Thermosetting Resin Conduit (RTRC-AG-SW) and Fittings:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Champion Fiberglass, Inc]**
 - b. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[Champion Fiberglass, Inc]**
 - b. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN DZKT; including UL 2515.
4. Standard Features:
- a. Additional Characteristics: Type SW.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- C. UL DZKT - Extra Heavy Wall, Low-Halogen, Aboveground Reinforced Thermosetting Resin Conduit (RTRC-AG-XW) and Fittings:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Champion Fiberglass, Inc]**
 - b. **[FRE Composites]**
 - c. **[United Fiberglass of America (UFA)]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Champion Fiberglass, Inc]**
 - b. **[FRE Composites]**
 - c. **[United Fiberglass of America (UFA)]**
 - d. **<Insert manufacturer's name>**

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DZKT; including UL 2515 and UL 2515A.
4. Standard Features:
 - a. Additional Characteristics: Type AG-XW.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL DZKT - Low-Halogen, Belowground Reinforced Thermosetting Resin Conduit (RTRC-BG) and Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Champion Fiberglass, Inc]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Champion Fiberglass, Inc]**
 - b. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DZKT; including UL 2420.
4. Standard Features:
 - a. Additional Characteristics: Type BG.

- b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.13 FITTINGS FOR CONDUIT, TUBING, AND CABLE

A. UL EBMB - Duct Fittings for Hazardous (Classified) Locations:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - b. **[Power Feed-Thru Systems and Connectors LLC]**
 - c. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - b. **[Power Feed-Thru Systems and Connectors LLC]**
 - c. **<Insert manufacturer's name>**
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN EBMB; including UL 1203.
- 4. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project

- site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL DWTT - Fittings for Type ERM, Type IMC, Type PVC, Type HDPE, Type EPEC, and Type RTRC Duct Raceways:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Konkore Fittings; Atkore International]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Southwire Company, LLC]**
 - i. **[Topaz Lighting & Electric]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Konkore Fittings; Atkore International]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Southwire Company, LLC]**
 - i. **[Topaz Lighting & Electric]**
 - j. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DWTT; including UL 514B.
4. Standard Features:
 - a. Material: **[Steel][Die cast]**.
 - b. Coupling Method: **[Compression coupling][Raintight compression coupling with distinctive color gland nut][Setscrew coupling. Setscrew couplings with only single screw per conduit are unacceptable]**.

- c. Expansion and Deflection Fittings: UL 651 with flexible bonding jumper.
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- C. UL FKA V - Fittings for Type EMT Duct Raceways:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - d. **[Calconduit; Atkore International]**
 - e. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - f. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Southwire Company, LLC]**
 - i. **[Topaz Lighting & Electric]**
 - j. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - d. **[Calconduit; Atkore International]**
 - e. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - f. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Southwire Company, LLC]**
 - i. **[Topaz Lighting & Electric]**
 - j. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN FKA V; including UL 514B.

4. Standard Features:
 - a. Material: **[Steel][Die cast]**.
 - b. Coupling Method: **[Compression coupling][Raintight compression coupling with distinctive color gland nut][Setscrew coupling. Setscrew couplings with only single screw per conduit are unacceptable]**.
 - c. Expansion and Deflection Fittings: UL 651 with flexible bonding jumper.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL ILNR - Fittings for Type FMC Duct Raceways:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[American Fittings Corp. (AMFICO)]**
 - b. **[Liquid Tight Connector Co.]**
 - c. **[Southwire Company, LLC]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Fittings Corp. (AMFICO)]**
 - b. **[Liquid Tight Connector Co.]**
 - c. **[Southwire Company, LLC]**
 - d. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN ILNR; including UL 514B.
4. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts

- of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- E. UL DXAS - Fittings for Type LFMC and Type LFNC Duct Raceways:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Arlington Industries, Inc.]**
 - b. **[Liquid Tight Connector Co.]**
 - c. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arlington Industries, Inc.]**
 - b. **[Liquid Tight Connector Co.]**
 - c. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN DXAS; including UL 514B.
 - 4. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

**2.14 JOINT COMPOUNDS****A. UL FOIZ - Electrically Conductive Corrosion-Resistant Compound for Threaded Conduit:**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN FOIZ; including UL Subject 2419.
4. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.15 SOLVENT CEMENTS**A. UL VBEW - Solvent Cements for Nonmetallic Duct Raceways and Fittings:**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the

following:

- a. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Solvent Cements: UL CCN VBEW; including UL 340.
 - b. Solvent Cement Compatibility with PVC Conduit Fittings: UL CCN DWTT; including UL 514B. Follow solvent manufacturer's published instructions.
 - c. Solvent Cement Compatibility with Rigid PVC Conduit: UL CCN DZYR; including UL 651. Follow solvent manufacturer's published instructions.
 - d. Solvent Cement Compatibility with Rigid EPEC and HDPE Underground Conduit: UL CCN EAZX; including UL 651A. Follow solvent manufacturer's published instructions.
4. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

PART 3 - EXECUTION

3.1 SELECTION OF CONDUITS FOR ELECTRICAL SYSTEMS

- A. Unless more stringent requirements are specified in the Contract Documents or manufacturer's published instructions, comply with NFPA 70 for selection of duct raceways. Consult Architect for resolution of conflicting requirements.
- B. Special Instructions Regarding HDPE Conduits: Although Article 353 of NFPA 70 permits use of HDPE conduits where encased in concrete aboveground, UL CCN EAZX listing requirements state that HDPE[**and EPEC**] underground conduits are intended only for use where direct buried with or without being encased in concrete. Specified Type HDPE[**and Type EPEC**] underground conduits are not permitted to be used aboveground on the Project.
- C. Outdoors:
 1. Exposed and Subject to Severe Physical Damage: **[ERMC][IMC]**.
 2. Exposed and Subject to Physical Damage: **[ERMC][IMC][Corrosion-resistant EMT]**.
 3. Exposed and Not Subject to Physical Damage: **[ERMC][IMC][Corrosion-resistant EMT][PVC-80][RTRC-AG]**.

4. Concealed Aboveground: [ERMC][IMC][EMT][PVC-80][PVC-40][RTRC-AG].
5. Direct Buried: [PVC-80][PVC-40][HDPE-80][HDPE-40][RTRC-BG].
6. Concrete Encased Not in Trench: [PVC-80][PVC-40][PVC-A][RTRC-BG].
7. Concrete Encased in Trench: [PVC-80][PVC-40][PVC-A][PVC-EB][HDPE-80][HDPE-40][EPEC-A][EPEC-B][RTRC-BG].
8. Connection to Vibrating Equipment (Including Transformers and Hydraulic, Pneumatic, Electric Solenoid, or Motor-Driven Equipment): [LFMC][LFNC-A][LFNC-B].

D. Indoors:

1. Hazardous Classified Locations: [ERMC][IMC].
2. Exposed and Subject to Severe Physical Damage: [ERMC][IMC].
3. Exposed and Subject to Physical Damage: [ERMC][IMC][EMT].
4. Exposed and Not Subject to Physical Damage: [ERMC][IMC][EMT][PVC-80][RTRC-AG].
5. Concealed in Ceilings and Interior Walls and Partitions: [ERMC][IMC][EMT][PVC-80][PVC-40][RTRC-AG].
6. Damp or Wet Locations: [ERMC][IMC][RTRC-AG][Corrosion-resistant EMT].
7. Connection to Vibrating Equipment (Including Transformers and Hydraulic, Pneumatic, Electric Solenoid, or Motor-Driven Equipment): [LFMC][FMC][LFNC-A][LFNC-B].
8. Circuits Operating Above 60 Hz: [EMT-A][ERMC-A][RTRC-AG]. Provide nonmetallic sleeve where aluminum duct raceways pass through concrete.

E. Duct Fittings: Select fittings in accordance with NEMA FB 2.10 guidelines.

1. ERMC and IMC: Provide threaded-type fittings unless otherwise indicated.

3.2 INSTALLATION OF CONDUITS FOR ELECTRICAL SYSTEMS

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Safety: NFPA 70E.
3. Commissioning of Active and Passive Fire Protection Features: NFPA 3 and NFPA 4.
4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
5. Communications Work: BICSI N1.
6. Life Safety and Means of Egress Work: NFPA 101.
7. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
8. Work in Confined Spaces: NFPA 350.
9. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
10. Type EMT-A: Article 358 of NFPA 70 and NECA NEIS 102.
11. Type EMT-SS: Article 358 of NFPA 70 and NECA NEIS 101.
12. Type EMT-S: Article 358 of NFPA 70 and NECA NEIS 101.
13. Type ENT: Article 362 of NFPA 70 and NECA NEIS 102.
14. Type HDPE and Type EPEC: Article 353 of NFPA 70 and NECA NEIS 111.
15. Type ERMC-A: Article 344 of NFPA 70 and NECA NEIS 102.
16. Type ERMC-SS: Article 344 of NFPA 70 and NECA NEIS 101.
17. Type ERMC-S: Article 344 of NFPA 70 and NECA NEIS 101.
18. Type FMC-S: Article 348 of NFPA 70 and NECA NEIS 101.
19. Type FMC-A: Article 348 of NFPA 70 and NECA NEIS 102.
20. Type FMT: Article 360 of NFPA 70 and NECA NEIS 101.
21. Type IMC: Article 342 of NFPA 70 and NECA NEIS 101.

22. Type LFMC: Article 350 of NFPA 70 and NECA NEIS 101.
23. Type LFNC: Article 342 of NFPA 70 and NECA NEIS 111.
24. Type PVC: Article 356 of NFPA 70 and NECA NEIS 111.
25. Type RTRC: Article 355 of NFPA 70 and NECA NEIS 111.
26. Expansion Fittings: NEMA FB 2.40.
27. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. General Requirements for Installation of Duct Raceways:
 - a. Complete duct raceway installation before starting conductor installation.
 - b. Provide stub-ups through floors with coupling threaded inside for plugs, set flush with finished floor. Plug coupling until conduit is extended above floor to final destination or a minimum of **2 ft (0.6 m)** above finished floor.
 - c. Install no more than equivalent of three 90-degree bends in conduit run[**except for control wiring conduits, for which no more than equivalent of two 90-degree fewer bends are permitted**]. Support within **12 inch (300 mm)** of changes in direction.
 - d. Make bends in duct raceway using large-radius preformed ells except for parallel bends. Field bending must be in accordance with NFPA 70 minimum radii requirements. Provide only equipment specifically designed for material and size involved.
 - e. Conceal conduit within finished walls, ceilings, and floors unless otherwise indicated. Install conduits parallel or perpendicular to building lines.
 - f. Support conduit within **12 inch (300 mm)** of enclosures to which attached.
 - g. Install duct sealing fittings at accessible locations in accordance with NFPA 70 and fill them with listed sealing compound. For concealed duct raceways, install fitting in flush steel box with blank cover plate having finish similar to that of adjacent plates or surfaces. Install duct sealing fittings in accordance with NFPA 70.
 - h. Install devices to seal duct raceway interiors at accessible locations. Locate seals so no fittings or boxes are between the seal and the following changes of environments. Seal interior of duct raceways at the following points:
 - 1) Where conduits pass from warm to cold locations, such as boundaries of refrigerated spaces.
 - 2) Where an underground service duct raceway enters a building or structure.
 - 3) Conduit extending from interior to exterior of building.
 - 4) Conduit extending into pressurized duct raceway and equipment.
 - 5) Conduit extending into pressurized zones that are automatically controlled to maintain different pressure set points.
 - 6) Where otherwise required by NFPA 70.
 - i. Do not install duct raceways or electrical items on "explosion-relief" walls or rotating equipment.
 - j. Do not install conduits within **2 inch (50 mm)** of the bottom side of a metal deck roof.
 - k. Keep duct raceways at least **6 inch (150 mm)** away from parallel runs of flues and steam or hot-water pipes. Install horizontal duct raceway runs above water and steam piping.
 - l. Cut conduit perpendicular to the length. For conduits metric designator 53 (trade size 2) and larger, use roll cutter or a guide to make cut straight and perpendicular to the length. Ream inside of conduit to remove burrs.
 - m. Install pull wires in empty duct raceways. Provide polypropylene or monofilament plastic line with not less than **200 lb (90 kg)** tensile strength. Leave at least **12 inch (300 mm)** of slack at both ends of pull wire. Cap underground duct raceways designated as spare above grade alongside duct raceways in use.
 - n. Install duct raceways square to the enclosure and terminate at enclosures without hubs with locknuts on both sides of enclosure wall. Install locknuts hand tight, plus one-quarter turn more.

- 1) Termination fittings with shoulders do not require two locknuts.
- o. Terminate threaded conduits into threaded hubs or with locknuts on inside and outside of boxes or cabinets. Install bushings on conduits up to metric designator 35 (trade size 1-1/4) and insulated throat metal bushings on metric designator 41 (trade size 1-1/2) and larger conduits terminated with locknuts. **[Install insulated throat metal grounding bushings on service conduits].**
2. Types EMT-A, ERMCA-A, and FMC-A: Do not install aluminum duct raceways or fittings in contact with concrete or earth.
3. Types ERMCA and IMC:
 - a. Threaded Conduit Joints, Exposed to Wet, Damp, Corrosive, or Outdoor Conditions: Apply listed compound that maintains electrical conductivity to threads of duct raceway and fittings before making up joints. Follow compound manufacturer's published instructions.
4. Type ERMCA-S-PVC:
 - a. Follow manufacturer's installation instructions for clamping, cutting, threading, bending, and assembly.
 - b. Provide PVC-coated sealing locknut for exposed male threads transitioning into female NPT threads that do not have sealing sleeves, including transitions from PVC couplings/female adapters to Type ERMCA-S-PVC elbows in direct-burial applications. PVC-coated sealing locknuts must not be used in place of conduit hub. PVC-coated sealing locknut must cover exposed threads on Type ERMCA-S-PVC duct raceway.
 - c. Coat field-cut threads on PVC-coated duct raceway with manufacturer-approved corrosion-preventing conductive compound prior to assembly.
5. Types FMC, LFMC, and LFNC:
 - a. Provide a maximum of **[36 inch (915 mm)][72 inch (1830 mm)]** of flexible conduit for **[recessed and semirecessed luminaires]**, equipment subject to vibration, noise transmission, or movement; and for transformers and motors.
6. Types PVC, HDPE, and EPEC:
 - a. Do not install Type PVC, Type HDPE, or Type EPEC conduit where ambient temperature exceeds **[122 deg F (50 deg C)]<Insert temperature>**. Conductor ratings must be limited to 75 deg C except where installed in a trench outside buildings with concrete encasement, where 90 deg C conductors are permitted.
 - b. Comply with manufacturer's published instructions for solvent welding and fittings.
 - c. Join joints with solvent cement in accordance with manufacturer's published instructions and allowed to cure before handling. Joints to be bent, pushed, or pulled must set for minimum 24 h after joining.
7. Type RTRC: Do not install Type RTRC conduit where ambient temperature exceeds **[230 deg F (110 deg C)]<Insert temperature>**.
8. Duct Raceways Embedded in Slabs:
 - a. **[Run duct raceways larger than metric designator 27 (trade size 1) below concrete slab][Run duct raceways larger than metric designator 27 (trade size) parallel or at right angles to main reinforcement. Where at right angles to reinforcement, place duct raceway close to slab support. Secure duct raceways to reinforcement at maximum 10 ft (3 m) intervals].**
 - b. Arrange duct raceways to cross building expansion joints with expansion fittings at right

- angles to the joint.
 - c. Arrange duct raceways to ensure that each is surrounded by minimum of **[1 inch (25 mm)][2 inch (50 mm)]<Insert dimension>** of concrete without voids.
 - d. Do not embed threadless fittings in concrete unless locations have been specifically approved by Architect.
 - e. Change from ENT to **[PVC-80][PVC-40][ERMC][or][IMC]** before rising above floor.
9. Stub-ups to Above Recessed Ceilings:
- a. Provide EMT, IMC, or ERMC for duct raceways.
 - b. Provide a conduit bushing or insulated fitting to terminate stub-ups not terminated in hubs or in an enclosure.
10. Duct Raceway Terminations at Locations Subject to Moisture or Vibration:
- a. Provide insulating bushings to protect conductors, including conductors smaller than 4 AWG. **[Install insulated throat metal grounding bushings on service conduits].**
11. Duct Fittings: Install fittings in accordance with NEMA FB 2.10 guidelines.
- a. ERMC-S-PVC: Provide only fittings listed for use with this type of conduit. Patch and seal joints, nicks, and scrapes in PVC coating after installing conduits and fittings. Provide sealant recommended by fitting manufacturer and apply in thickness and number of coats recommended by manufacturer.
 - b. EMT: Provide **[setscrew][compression]**, **[steel][cast-metal]** fittings. Comply with NEMA FB 2.10.
 - c. Flexible Conduit: Provide only fittings listed for use with flexible conduit type. Comply with NEMA FB 2.20.
12. Expansion-Joint Fittings:
- a. Install in runs of aboveground PVC that are located where environmental temperature change may exceed **30 deg F (17 deg C)** and that have straight-run length that exceeds **25 ft (7.6 m)**. Install in runs of aboveground ERMC **[and EMT]** conduit that are located where environmental temperature change may exceed **100 deg F (55 deg C)** and that have straight-run length that exceeds **100 ft (30 m)**.
 - b. Install type and quantity of fittings that accommodate temperature change listed for the following locations:
 - 1) Outdoor Locations Not Exposed to Direct Sunlight: **[125 deg F (70 deg C)]<Insert temperature>** temperature change.
 - 2) Outdoor Locations Exposed to Direct Sunlight: **[155 deg F (86 deg C)]<Insert temperature>** temperature change.
 - 3) Indoor Spaces Connected with Outdoors without Physical Separation: **[125 deg F (70 deg C)]<Insert temperature>** temperature change.
 - 4) Attics: **[135 deg F (75 deg C)]<Insert temperature>** temperature change.
 - 5) **<Insert location and corresponding temperature change>**.
 - c. Install fitting(s) that provide expansion and contraction for at least **0.00041 inch per foot of length of straight run per deg F (0.06 mm per meter of length of straight run per deg C)** of temperature change for PVC conduits. Install fitting(s) that provide expansion and contraction for at least **0.000078 inch per foot of length of straight run per deg F (0.0115 mm per meter of length of straight run per deg C)** of temperature change for metal conduits.
 - d. Install expansion fittings at locations where conduits cross building or structure expansion joints.

- e. Install expansion-joint fitting with position, mounting, and piston setting selected in accordance with manufacturer's published instructions for conditions at specific location at time of installation. Install conduit supports to allow for expansion movement.
- 13. Duct Raceways Penetrating Rooms or Walls with Acoustical Requirements: Seal duct raceway openings on both sides of rooms or walls with acoustically rated putty[**or firestopping**].
- 14. Identification: Provide labels for conduit assemblies, duct raceways, and associated electrical equipment.
 - a. Provide warning signs.
- 15. **<Insert more stringent installation requirements that supplement or supersede listed standards and manufacturer's published instructions>.**

D. Interfaces with Other Work:

- 1. Firestop penetrations of fire-rated floor and wall assemblies.
- 2. Provide conduit hangers and supports.
- 3. Coordinate installation of new products for **<Insert system or product family/category>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>.**
- 4. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>.**
 - a. **<Insert requirements for transition between this Section and related Work>.**

3.3 FIELD QUALITY CONTROL OF CONDUITS FOR ELECTRICAL SYSTEMS

A. Administrant for Electrical Power Tests and Inspections:

- 1. **[Owner][Tenant]** will engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
- 2. Engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
- 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
- 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Administrant for Communications Tests and Inspections:

- 1. **[Owner][Tenant]** will engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
- 2. Engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
- 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
- 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Acceptance Testing Preparation:

1. <Insert requirements>.
 - D. Field tests and inspections must be witnessed by [Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>.
 - E. Tests and Inspections:
 1. Perform manufacturer's recommended tests and inspections.
 2. Pull solid aluminum or wood test mandrel through duct to prove joint integrity and adequate bend radii, and test for out-of-round duct. Provide minimum **12 inch (300 mm)** long mandrel equal to duct size minus **1/4 inch (6 mm)**. If obstructions are indicated, remove obstructions and retest.
 3. Conduit Placement:
 - a. Verify that center-line location and offsets are in accordance with the Drawings.
 - b. Verify that hangers and supports for conduits are attached to structure **[in accordance with the Drawings][as directed by qualified structural engineer]**.
 - c. Verify that nuts on bolts or hanger rods are secure.
 - d. Verify that space between raceways and cored holes are filled with non-shrinking grout or other approved material indicated on the Drawings and the Specifications.
 - e. Verify that expansion devices are installed at locations indicated on the Drawings and the Specifications.
 - f. Verify that ends are cut square to provide flush-butting surfaces when spliced and inside edges are free of burrs that could impede installation of cables.
 - g. Verify minimum separation of utilities, or that approved mechanical protection has been provided to surrounding conduit(s) where minimum separation cannot be achieved.
 4. Document all changes on Record Drawings.
 - F. Nonconforming Work:
 1. Conduit will be considered defective if it does not pass tests and inspections.
 2. Remove and replace defective units and retest.
 - G. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.
- 3.4 CLEANING
- A. Verify that bentonite or other drilling fluids are contained and removed, and site is restored to its original or improved condition.
- 3.5 PROTECTION
- A. Protect coatings, finishes, and cabinets from damage and deterioration.
 1. Repair damage to galvanized finishes with zinc-rich paint recommended by manufacturer.
 2. Repair damage to PVC coatings or paint finishes with matching touchup coating recommended by manufacturer.

END OF SECTION 26 05 33 13

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 05 33 13	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 33 13	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 33 13	27 11 00 00	Communications Equipment Room Fittings
26 05 33 13	27 13 13 00	Communications Copper Backbone Cabling
26 05 33 13	27 15 33 00	Communications Coaxial Horizontal Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 33 16 - BOXES AND COVERS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Metallic outlet boxes, device boxes, rings, and covers.
2. Nonmetallic outlet boxes, device boxes, rings, and covers.
3. Junction boxes and pull boxes.
4. Cover plates for device boxes.
5. Hoods for outlet boxes.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural load design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. Section 078413 "Penetration Firestopping" specifies materials and methods for sealing penetrations of rated walls and partitions referenced by this Section.
5. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs installed by this Section.
7. Section 260573 "Power System Studies" specifies arc-flash hazard analysis and warning labels referenced by this Section.
8. Section 270528 "Pathways for Communications Systems"[and **Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for identification of communications equipment and cabling.

1.2 DEFINITIONS

- A. Communications Outlet: One or more communications jacks, or cables and plugs, mounted in a box or ring, with a suitable protective cover.
- B. Enclosure: The case or housing of an apparatus, or the fence or wall(s) surrounding an installation, to prevent personnel from accidentally contacting energized parts or to protect the equipment from physical damage. Types of enclosures and enclosure covers include the following:
1. Cabinet: An enclosure that is designed for either surface mounting or flush mounting and is provided with a frame, mat, or trim in which a swinging door or doors are or can be hung.
 2. Concrete Box: A box intended for use in poured concrete.
 3. Conduit Body: A means for providing access to the interior of a conduit or tubing system through one or more removable covers at a junction or terminal point. In the United States, conduit bodies are listed in accordance with outlet box requirements.
 4. Conduit Box: A box having threaded openings or knockouts for conduit, EMT, or fittings.

5. Cover Plate: A cover designed for protecting wiring devices installed in flush-mounted device boxes while permitting their safe operation; also called a faceplate or wallplate.
6. Cutout Box: An enclosure designed for surface mounting that has swinging doors or covers secured directly to and telescoping with the walls of the enclosure.
7. Device Box: A box with provisions for mounting a wiring device directly to the box.
8. Extension Ring: A ring intended to extend the sides of an outlet box or device box to increase the box depth, volume, or both.
9. Floor Box: A box mounted in the floor intended for use with a floor box cover and other components to complete the floor box enclosure.
10. Floor-Mounted Enclosure: A floor box and floor box cover assembly with means to mount in the floor that is sealed against the entrance of scrub water at the floor level.
11. Floor Nozzle: An enclosure used on a wiring system, intended primarily as a housing for a receptacle, provided with a means, such as a collar, for surface-mounting on a floor, which may or may not include a stem to support it above the floor level, and is sealed against the entrance of scrub water at the floor level.
12. Junction Box: A box with a blank cover that joins different runs of raceway or cable and provides space for connection and branching of the enclosed conductors.
13. Outlet Box: A box that provides access to a wiring system having pryout openings, knockouts, threaded entries, or hubs in either the sides or the back, or both, for the entrance of conduit, conduit or cable fittings, or cables, with provisions for mounting an outlet box cover, but without provisions for mounting a wiring device directly to the box.
14. Pedestal Floor Box Cover: A floor box cover that, when installed as intended, provides a means for typically vertical or near-vertical mounting of receptacle outlets above the floor's finished surface.
15. Pull Box: A box with a blank cover that joins different runs of raceway and provides access for pulling or replacing the enclosed cables or conductors.
16. Raised-Floor Box: A floor box intended for use in raised floors.
17. Recessed Access Floor Box: A floor box with provisions for mounting wiring devices below the floor surface.
18. Recessed Access Floor Box Cover: A floor box cover with provisions for passage of cords to recessed wiring devices mounted within a recessed floor box.
19. Ring: A sleeve, which is not necessarily round, used for positioning a recessed wiring device flush with the plaster, concrete, drywall, or other wall surface.
20. Ring Cover: A box cover, with raised center portion to accommodate a specific wall or ceiling thickness, for mounting wiring devices or luminaires flush with the surface.
21. Termination Box: An enclosure designed for installation of termination base assemblies consisting of bus bars, terminal strips, or terminal blocks with provision for wire connectors to accommodate incoming or outgoing conductors, or both.

C. Receptacle: A fixed connecting device arranged for insertion of a power cord plug. Also called a power jack.

D. Receptacle Outlet: One or more receptacles mounted in a box with a suitable protective cover.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Samples: For each type of product requiring samples for source quality control.

C. Shop Drawings: Prepare and submit the following:

1. Shop Drawings for Floor Boxes: Show that floor boxes are located to avoid interferences and are structurally allowable. Indicate floor thickness **[at location]** where boxes are embedded in

concrete floors and underfloor clearances where boxes are installed in raised floors.

D. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

1.5 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures; conduct tests of complex equipment; analyze test and equipment data; plan a job; and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.
- C. Inspection and Testing of Fire-Alarm Systems (I&TFAS) Technician I: Possessing active NICET I&TFAS Level I certification. Able to perform periodic inspections and tests of basic fire-alarm systems and prepare related records and reports.
- D. Inspection and Testing of Fire-Alarm Systems (I&TFAS) Technician II: Possessing active NICET I&TFAS Level II certification. Able to plan, perform, and coordinate periodic inspections and tests of complex fire-alarm systems (including one or more of suppression interfaces, networked control units, smoke control interfaces, air sampling systems, multi-zone voice evacuation systems, or high-rise applications) and prepare related records and reports.
- E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.
- F. Communications Testing and Inspecting Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site communications testing supervisor must have **[BICSI Technician (TECH)]<Insert certification program>** certification and documented training, and be experienced with testing communications equipment in accordance with **[BICSI]<Insert code enforced by authorities having jurisdiction>** testing standards.
- G. Security Testing and Inspecting Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site security testing supervisor must have **[ASIS][PSP]<Insert organization>** certification and documented training and experience with testing security equipment in accordance with **[ASIS]<Insert organization>** testing standards.

- H. Fire-Alarm Testing Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site fire-alarm testing supervisor must possess active NICET I&TFAS Technician [I][II] certification.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. **<Insert additional performance requirements for the Project>.**

2.2 METALLIC OUTLET BOXES, DEVICE BOXES, RINGS, AND COVERS

- A. Source Quality Control:
 - 1. Samples:
 - a. Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
 - b. Raised Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
 - c. Recessed Access-Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
 - d. Concrete Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
- B. UL QCIT - Metallic Outlet Boxes and Covers:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - f. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[MonoSystems, Inc]**
 - i. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - j. **[Pass & Seymour; Legrand North America, LLC]**
 - k. **[Patriot Aluminum Products, LLC]**
 - l. **[Plasti-Bond; Robroy Industries]**

- m. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - n. [Spring City Electrical Manufacturing Company]
 - o. [Topaz Lighting & Electric]
 - p. [Wiremold; Legrand North America, LLC]
 - q. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Appleton; Emerson Electric Co., Automation Solutions]
 - c. [Arlington Industries, Inc.]
 - d. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - e. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - f. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - g. [Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - h. [MonoSystems, Inc]
 - i. [O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]
 - j. [Pass & Seymour; Legrand North America, LLC]
 - k. [Patriot Aluminum Products, LLC]
 - l. [Plasti-Bond; Robroy Industries]
 - m. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - n. [Spring City Electrical Manufacturing Company]
 - o. [Topaz Lighting & Electric]
 - p. [Wiremold; Legrand North America, LLC]
 - q. <Insert manufacturer's name>
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCIT; including UL 514A.
- 4. Standard Features:
 - a. Box having pryout openings, knockouts, threaded entries, or hubs in either the sides or the back, or both, for entrance of conduit, conduit or cable fittings, or cables, with provisions for mounting outlet box cover, but without provisions for mounting wiring device directly to box.
 - b. Material: [Sheet steel][Sheet aluminum][Cast metal].
 - c. Sheet Metal Depth: Minimum [1.5 inch (38 mm)][2 inch (50 mm)][2.5 inch (65 mm)][2.8 inch (70 mm)][3.5 inch (90 mm)].
 - d. Cast-Metal Depth: Minimum [1.8 inch (44.5 mm)][2.4 inch (60.3 mm)].
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.

- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

- a. Luminaire Outlet Boxes and Covers: Nonadjustable, listed and labeled for attachment of luminaire weighing **[up to 50 lb (23 kg)][more than 50 lb (23 kg) and marked with maximum allowable weight]**.
- b. Paddle Fan Outlet Boxes and Covers: Nonadjustable, designed for attachment of paddle fan weighing up to **70 lb (32 kg)**.

C. UL QCIT - Metallic Conduit Bodies:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Pass & Seymour; Legrand North America, LLC]**
 - g. **[Patriot Aluminum Products, LLC]**
 - h. **[Plasti-Bond; Robroy Industries]**
 - i. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - j. **[Topaz Lighting & Electric]**
 - k. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Pass & Seymour; Legrand North America, LLC]**
 - g. **[Patriot Aluminum Products, LLC]**
 - h. **[Plasti-Bond; Robroy Industries]**
 - i. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - j. **[Topaz Lighting & Electric]**
 - k. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCIT; including UL 514A.

4. Standard Features: Means for providing access to interior of conduit or tubing system through one or more removable covers at junction or terminal point. In the United States, conduit bodies are listed in accordance with outlet box requirements.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL QCIT - Metallic Device Boxes:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - f. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - i. **[Patriot Aluminum Products, LLC]**
 - j. **[Plasti-Bond; Robroy Industries]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Topaz Lighting & Electric]**
 - m. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - f. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**

- i. [Patriot Aluminum Products, LLC]
 - j. [Plasti-Bond; Robroy Industries]
 - k. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - l. [Topaz Lighting & Electric]
 - m. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN QCIT; including UL 514A.
4. Standard Features:
- a. Box with provisions for mounting wiring device directly to box.
 - b. Material: [Sheet steel][Sheet aluminum][Cast metal].
 - c. Sheet Metal Depth: minimum [1.5 inch (38 mm)][2 inch (50 mm)][2.5 inch (65 mm)][2.8 inch (70 mm)][3.5 inch (90 mm)].
 - d. Cast-Metal Depth: minimum [1.8 inch (44.5 mm)][2.4 inch (60.3 mm)].
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- E. UL QCIT - Metallic Extension Rings:
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [ABB, Electrification Business]
 - b. [Appleton; Emerson Electric Co., Automation Solutions]
 - c. [Cooper B-line; brand of Eaton, Electrical Sector]
 - d. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - e. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - f. [O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]
 - g. [Pass & Seymour; Legrand North America, LLC]
 - h. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - i. [Topaz Lighting & Electric]
 - j. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - f. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - g. **[Pass & Seymour; Legrand North America, LLC]**
 - h. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **[Topaz Lighting & Electric]**
 - j. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCIT; including UL 514A.
4. Standard Features: Ring intended to extend sides of outlet box or device box to increase box depth, volume, or both.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL QCIT - Metallic Floor Boxes and Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[AFC Cable Systems; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - e. **[FSR Inc.]**
 - f. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**

- h. [Leviton Manufacturing Co., Inc.]
 - i. [Pass & Seymour; Legrand North America, LLC]
 - j. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - k. [Wiremold; Legrand North America, LLC]
 - l. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [ABB, Electrification Business]
 - b. [AFC Cable Systems; Atkore International]
 - c. [Arlington Industries, Inc.]
 - d. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - e. [FSR Inc.]
 - f. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - g. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - h. [Leviton Manufacturing Co., Inc.]
 - i. [Pass & Seymour; Legrand North America, LLC]
 - j. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - k. [Wiremold; Legrand North America, LLC]
 - l. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN QCIT; including UL 514A.
4. Standard Features: Box mounted in floor with floor box cover and other components to complete floor box enclosure.
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- G. UL QCIT - Metallic Raised-Floor Boxes and Floor Box Covers:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[ABB, Electrification Business]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Wiremold; Legrand North America, LLC]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Wiremold; Legrand North America, LLC]**
 - d. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCIT; including UL 514A.
 4. Standard Features: Box mounted in raised-floor with floor box cover and other components to complete floor box enclosure.
 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- H. UL QCIT - Metallic Recessed Access-Floor Boxes and Recessed Floor Box Covers:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[FSR Inc.]**
 - c. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Wiremold; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the

following:

- a. **[ABB, Electrification Business]**
 - b. **[FSR Inc.]**
 - c. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Wiremold; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN QCIT; including UL 514A.
4. Standard Features: Floor box with provisions for mounting wiring devices below floor surface and floor box cover with provisions for passage of cords to recessed wiring devices mounted within floor box.
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

I. UL QCIT - Metallic Concrete Boxes and Covers:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Topaz Lighting & Electric]**
 - f. **[Wiremold; Legrand North America, LLC]**
 - g. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**

- b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Topaz Lighting & Electric]**
 - f. **[Wiremold; Legrand North America, LLC]**
 - g. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN QCIT; including UL 514A.
4. Standard Features: Box intended for use in poured concrete.
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.3 NONMETALLIC OUTLET BOXES, DEVICE BOXES, RINGS, AND COVERS

A. Source Quality Control:

1. Samples:
- a. Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
 - b. Raised Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
 - c. Recessed Access-Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
 - d. Concrete Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.

B. UL QCMZ - Nonmetallic Outlet Boxes and Covers:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**

- c. [Appleton; Emerson Electric Co., Automation Solutions]
 - d. [Arlington Industries, Inc.]
 - e. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - f. [Cantex Inc.]
 - g. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - h. [Ericson Manufacturing Company]
 - i. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - j. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - k. [Intermatic, Inc]
 - l. [JM Eagle]
 - m. [Leviton Manufacturing Co., Inc.]
 - n. [Panduit Corp]
 - o. [Pass & Seymour; Legrand North America, LLC]
 - p. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - q. [Topaz Lighting & Electric]
 - r. [Wiremold; Legrand North America, LLC]
 - s. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [ABB, Electrification Business]
 - b. [Allied Tube & Conduit; Atkore International]
 - c. [Appleton; Emerson Electric Co., Automation Solutions]
 - d. [Arlington Industries, Inc.]
 - e. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - f. [Cantex Inc.]
 - g. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - h. [Ericson Manufacturing Company]
 - i. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - j. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - k. [Intermatic, Inc]
 - l. [JM Eagle]
 - m. [Leviton Manufacturing Co., Inc.]
 - n. [Panduit Corp]
 - o. [Pass & Seymour; Legrand North America, LLC]
 - p. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - q. [Topaz Lighting & Electric]
 - r. [Wiremold; Legrand North America, LLC]
 - s. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN QCMZ; including UL 514C.
4. Standard Features: Box having pryout openings, knockouts, threaded entries, or hubs in either the sides or the back, or both, for entrance of conduit, conduit or cable fittings, or cables, with provisions for mounting outlet box cover, but without provisions for mounting wiring device directly

to box.

5. Sustainable Design Features:

- a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
- b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL QCMZ - Nonmetallic Conduit Bodies:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cantex Inc.]**
 - e. **[JM Eagle]**
 - f. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Topaz Lighting & Electric]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cantex Inc.]**
 - e. **[JM Eagle]**
 - f. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Topaz Lighting & Electric]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCMZ; including UL 514C.
4. Standard Features: Means for providing access to interior of conduit or tubing system through one or more removable covers at junction or terminal point. In the United States, conduit bodies

are listed in accordance with outlet box requirements.

5. Sustainable Design Features:

- a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
- b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL QCMZ - Nonmetallic Device Boxes:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cantex Inc.]**
 - e. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - f. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Pass & Seymour; Legrand North America, LLC]**
 - h. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cantex Inc.]**
 - e. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - f. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Pass & Seymour; Legrand North America, LLC]**
 - h. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. UL CCN QCMZ; including UL 514C.
- 4. Standard Features: Box with provisions for mounting wiring device directly to box.
- 5. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- E. UL QCMZ - Nonmetallic Extension Rings:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - e. **[Cantex Inc.]**
 - f. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - e. **[Cantex Inc.]**
 - f. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. UL CCN QCMZ; including UL 514C.
- 4. Standard Features: Ring intended to extend sides of outlet box or device box to increase box depth, volume, or both.
- 5. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL QCMZ - Nonmetallic Floor Boxes and Floor Box Covers:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cantex Inc.]**
 - e. **[JM Eagle]**
 - f. **[Pass & Seymour; Legrand North America, LLC]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Wiremold; Legrand North America, LLC]**
 - i. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cantex Inc.]**
 - e. **[JM Eagle]**
 - f. **[Pass & Seymour; Legrand North America, LLC]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Wiremold; Legrand North America, LLC]**
 - i. **<Insert manufacturer's name>**
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product

categories:

- a. UL CCN QCMZ; including UL 514C.
4. Standard Features: Box mounted in floor with floor box cover and other components to complete floor box enclosure.
5. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

G. UL QCMZ - Nonmetallic Raised-Floor Boxes and Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCMZ; including UL 514C.
4. Standard Features: Box mounted in raised-floor with floor box cover and other components to complete floor box enclosure.
5. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

- d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

H. UL QCMZ - Nonmetallic Recessed Access-Floor Boxes and Recessed Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Pass & Seymour; Legrand North America, LLC]**
 - f. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Wiremold; Legrand North America, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Pass & Seymour; Legrand North America, LLC]**
 - f. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Wiremold; Legrand North America, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCMZ; including UL 514C.
4. Standard Features: Floor box with provisions for mounting wiring devices below floor surface and floor box cover with provisions for passage of cords to recessed wiring devices mounted within floor box.
5. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts

- c. of extraction operations and activities associated with product and its supply chain.
- c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

I. UL QCMZ - Nonmetallic Floor Nozzles:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCMZ; including UL 514C.
4. Standard Features: Enclosure intended primarily as housing for receptacle, provided with means, such as collar, for surface-mounting on floor, which may or may not include stem to support it above floor level, and is sealed against the entrance of scrub water at floor level.
5. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

J. UL QCMZ - Nonmetallic Concrete Boxes and Covers:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cantex Inc.]**
 - e. **[JM Eagle]**
 - f. **[Leviton Manufacturing Co., Inc.]**
 - g. **[Wiremold; Legrand North America, LLC]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Cantex Inc.]**
 - e. **[JM Eagle]**
 - f. **[Leviton Manufacturing Co., Inc.]**
 - g. **[Wiremold; Legrand North America, LLC]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCMZ; including UL 514C.
4. Standard Features: Box intended for use in poured concrete.
5. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

**2.4 JUNCTION BOXES AND PULL BOXES****A. UL BGUZ - Indoor Sheet Metal Junction and Pull Boxes:**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Adalet; division of Scott Fetzer Co.]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[FSR Inc.]**
 - e. **[Hoffman; brand of nVent Electrical plc]**
 - f. **[Hubbell Industrial Controls; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Milbank Manufacturing Company]**
 - i. **[N J Sullivan Company]**
 - j. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Spring City Electrical Manufacturing Company]**
 - m. **[Square D; Schneider Electric USA]**
 - n. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Adalet; division of Scott Fetzer Co.]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[FSR Inc.]**
 - e. **[Hoffman; brand of nVent Electrical plc]**
 - f. **[Hubbell Industrial Controls; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Milbank Manufacturing Company]**
 - i. **[N J Sullivan Company]**
 - j. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Spring City Electrical Manufacturing Company]**
 - m. **[Square D; Schneider Electric USA]**
 - n. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN BGUZ; including UL 50 and UL 50E.
4. Standard Features:
 - a. Box with a blank cover that serves the purpose of joining different runs of raceway or

- cable.
- b. Degree of Protection: **[Type 1][Type 2][Type 5][Type 12][Type 12K][Type 13]**.

5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL BGUZ - Indoor Cast-Metal Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Adalet; division of Scott Fetzer Co.]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Adalet; division of Scott Fetzer Co.]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN BGUZ; including UL 50 and UL 50E.
4. Standard Features:
 - a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
 - b. Degree of Protection: **[Type 1][Type 2][Type 5][Type 12][Type 12K][Type 13]**.
5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL BGUZ - Indoor Polymeric Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Cantex Inc.]**
 - d. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[JM Eagle]**
 - f. **[Robroy Enclosures; Robroy Industries]**
 - g. **[Topaz Lighting & Electric]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Cantex Inc.]**
 - d. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[JM Eagle]**
 - f. **[Robroy Enclosures; Robroy Industries]**
 - g. **[Topaz Lighting & Electric]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN BGUZ; including UL 50 and UL 50E.
4. Standard Features:
 - a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
 - b. Degree of Protection: **[Type 1][Type 2][Type 5][Type 12][Type 12K][Type 13]**.

5. Sustainable Design Features:

- a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
- b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL BGUZ - Outdoor Sheet Metal Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Adalet; division of Scott Fetzer Co.]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[FSR Inc.]**
 - e. **[Hoffman; brand of nVent Electrical plc]**
 - f. **[Hubbell Industrial Controls; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Milbank Manufacturing Company]**
 - i. **[N J Sullivan Company]**
 - j. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Spring City Electrical Manufacturing Company]**
 - m. **[Square D; Schneider Electric USA]**
 - n. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Adalet; division of Scott Fetzer Co.]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[FSR Inc.]**
 - e. **[Hoffman; brand of nVent Electrical plc]**
 - f. **[Hubbell Industrial Controls; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**

- h. **[Milbank Manufacturing Company]**
 - i. **[N J Sullivan Company]**
 - j. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Spring City Electrical Manufacturing Company]**
 - m. **[Square D; Schneider Electric USA]**
 - n. **<Insert manufacturer's name>**
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN BGUZ; including UL 50 and UL 50E.
- 4. Standard Features:
 - a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
 - b. Degree of Protection: **[Type 3][Type 3X][Type 3R][Type 3RX][Type 3S][Type 3SX][Type 4][Type 4X][Type 6][Type 6P]**.
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- E. UL BGUZ - Outdoor Cast-Metal Junction and Pull Boxes:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Adalet; division of Scott Fetzer Co.]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - e. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Adalet; division of Scott Fetzer Co.]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**

- c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN BGUZ; including UL 50 and UL 50E.
4. Standard Features:
- a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
 - b. Degree of Protection: **[Type 3][Type 3X][Type 3R][Type 3RX][Type 3S][Type 3SX][Type 4][Type 4X][Type 6][Type 6P]**.
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL BGUZ - Outdoor Polymeric Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Cantex Inc.]**
 - d. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[JM Eagle]**
 - f. **[Robroy Enclosures; Robroy Industries]**
 - g. **[Topaz Lighting & Electric]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[ABB, Electrification Business]**

- b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Cantex Inc.]**
 - d. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[JM Eagle]**
 - f. **[Robroy Enclosures; Robroy Industries]**
 - g. **[Topaz Lighting & Electric]**
 - h. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN BGUZ; including UL 50 and UL 50E.
4. Standard Features:
- a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
 - b. Degree of Protection: **[Type 3][Type 3X][Type 3R][Type 3RX][Type 3S][Type 3SX][Type 4][Type 4X][Type 6][Type 6P]**.
5. Sustainable Design Features:
- a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.5 COVER PLATES FOR DEVICE BOXES

A. UL QCIT or QCMZ - Metallic Cover Plates for Device Boxes:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**

- f. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - g. [Intermatic, Inc]
 - h. [Leviton Manufacturing Co., Inc.]
 - i. [O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]
 - j. [Panduit Corp]
 - k. [Pass & Seymour; Legrand North America, LLC]
 - l. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - m. [Topaz Lighting & Electric]
 - n. [Wiremold; Legrand North America, LLC]
 - o. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Appleton; Emerson Electric Co., Automation Solutions]
 - c. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - d. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - e. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - f. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - g. [Intermatic, Inc]
 - h. [Leviton Manufacturing Co., Inc.]
 - i. [O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]
 - j. [Panduit Corp]
 - k. [Pass & Seymour; Legrand North America, LLC]
 - l. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - m. [Topaz Lighting & Electric]
 - n. [Wiremold; Legrand North America, LLC]
 - o. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.
4. Standard Features:
 - a. Cover plate-Securing Screws: Metal with head color to match cover plate finish.
 - b. Damp and Wet Locations: Listed, labeled, and marked for location and use. Provide gaskets and accessories necessary for compliance with listing.
 - c. Cover Plate Material: [0.032 inch (0.8 mm) thick, Type 302/304 non-magnetic stainless steel with brushed finish][0.040 inch (1.0 mm) thick aluminum, anodized or lacquered to prevent corrosion][0.04 inch (1 mm) thick, brushed brass with factory polymer finish][Steel with white baked enamel, suitable for field painting][0.04 inch (1 mm) thick steel with chrome-plated finish][Galvanized steel][Cast aluminum][As indicated on architectural Drawings].
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability

report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.

- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL QCIT or QCMZ - Nonmetallic Cover Plates for Device Boxes:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - e. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - f. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Intermatic, Inc]**
 - i. **[Leviton Manufacturing Co., Inc.]**
 - j. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - k. **[Panduit Corp]**
 - l. **[Pass & Seymour; Legrand North America, LLC]**
 - m. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - n. **[Topaz Lighting & Electric]**
 - o. **[Wiremold; Legrand North America, LLC]**
 - p. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Arlington Industries, Inc.]**
 - d. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - e. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - f. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Intermatic, Inc]**
 - i. **[Leviton Manufacturing Co., Inc.]**
 - j. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - k. **[Panduit Corp]**

- l. [Pass & Seymour; Legrand North America, LLC]
 - m. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - n. [Topaz Lighting & Electric]
 - o. [Wiremold; Legrand North America, LLC]
 - p. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.
4. Standard Features:
- a. Cover Plate-Securing Screws: Metal with head color to match cover plate finish.
 - b. Damp and Wet Locations: Listed, labeled, and marked for location and use. Provide gaskets and accessories necessary for compliance with listing.
 - c. Cover Plate Material: **[0.060 inch (1.5 mm) thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device][As indicated on architectural Drawings]**.
 - d. Color: **[Ivory][White][Gray][Brown][Black][Red][Orange][in accordance with NEMA WD 1][Blue][Office White][Almond][Light Almond][As indicated on architectural Drawings]**.
5. Sustainable Design Features:
- a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- C. UL QCIT or QCMZ - Illuminating Cover Plates for Device Boxes:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Leviton Manufacturing Co., Inc.]
 - b. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[Leviton Manufacturing Co., Inc.]**
- b. **<Insert manufacturer's name>**
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.
- 4. Standard Features:
 - a. Cover Plate-Securing Screws: Metal with head color to match cover plate finish.
 - b. Damp and Wet Locations: Listed, labeled, and marked for location and use. Provide gaskets and accessories necessary for compliance with listing.
 - c. Cover Plate Material: **[0.060 inch (1.5 mm) thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device][As indicated on architectural Drawings]**.
 - d. Color: **[Ivory][White][Gray][Brown][Black][Red][Orange][in accordance with NEMA WD 1][Blue][Office White][Almond][Light Almond][As indicated on architectural Drawings]**.
- 5. Sustainable Design Features:
 - a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than **[510][490]** g/L.
 - b. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.6 HOODS FOR OUTLET BOXES

A. UL QCIT or QCMZ - Retractable or Reattachable Hoods for Outlet Boxes:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[ABB, Electrification Business]**
 - b. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.
 - b. Receptacle, Hood, Cover Plate, Gaskets, and Seals: UL 498 Supplement SA when mated with box or enclosure complying with UL 514A, UL 514C, or UL 50E.
4. Standard Features:
- a. Mounts to box using fasteners different from wiring device.
 - b. Provides **[clear][gray][white]**, weatherproof, "while-in-use" cover.
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - d. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL QCIT or QCMZ - Extra-Duty, While-in-Use Hoods for Outlet Boxes:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - d. **[Arlington Industries, Inc.]**
 - e. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - f. **[Intermatic, Inc]**
 - g. **[Leviton Manufacturing Co., Inc.]**
 - h. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - d. **[Arlington Industries, Inc.]**

- e. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - f. **[Intermatic, Inc]**
 - g. **[Leviton Manufacturing Co., Inc.]**
 - h. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.
 - b. Receptacle, Hood, Cover Plate, Gaskets, and Seals: UL 498 Supplement SA when mated with box or enclosure complying with UL 514A, UL 514C, or UL 50E.
4. Standard Features:
- a. Mounts to box using fasteners different from wiring device.
 - b. Marked "Extra-Duty" in accordance with UL 514D.
 - c. Provides **[clear][gray][white]**, weatherproof, "while-in-use" cover.
 - d. Manufacturer may combine nonmetallic device box with hood as extra-duty rated assembly.
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

PART 3 - EXECUTION

3.1 SELECTION OF BOXES AND COVERS FOR ELECTRICAL SYSTEMS

- A. Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with NFPA 70 for selection of boxes and enclosures. Consult Architect for resolution of conflicting requirements.
- B. Degree of Protection:
 - 1. Outdoors:
 - a. **[Type 3][Type 3R][Type 4]** unless otherwise indicated.
 - b. Locations Exposed to Hosedown: **[Type 4][Type 4X][Type 6][Type 6P]**.
 - c. Locations Subject to Potential Flooding: Type 6P.
 - d. Locations Aboveground Where Mechanism Must Operate When Ice Covered: Type 3S.

- e. Locations in-Ground or Exposed to Corrosive Agents: **[Type 4X][Type 6P][Type 3RX]**.
- f. Locations in-Ground or Exposed to Corrosive Agents Where Mechanism Must Operate When Ice Covered: Type 3SX.

2. Indoors:

- a. Type 1 unless otherwise indicated.
- b. Damp or Dusty Locations: **[Type 12][Type 2][Type 4][Type 5]**.
- c. Surface Mounted in Kitchens and Other Locations Exposed to Oil or Coolants: Type 12.
- d. Flush Mounted in Kitchens and Other Locations Exposed to Oil or Coolants: **[Type 12][Type 12K]**.
- e. Locations Exposed to Airborne Dust, Lint, Fibers, or Flyings: **[Type 4][Type 6]**.
- f. Locations Exposed to Hosedown: **[Type 4][Type 6][Type 6P]**.
- g. Locations Exposed to Brief Submersion: **[Type 6][Type 6P]**.
- h. Locations Exposed to Prolonged Submersion: Type 6P.
- i. Locations Exposed to Corrosive Agents: **[Type 4X][Type 6P]**.
- j. Locations Exposed to Spraying Oil or Coolants: Type 13.

C. Exposed Boxes Installed Less Than 2.5 m (8 ft) Above Floor:

- 1. **[Provide cast-metal boxes][Boxes with knockouts or unprotected openings are prohibited]**.
- 2. Provide exposed cover. Flat covers with angled mounting slots or knockouts are prohibited.

3.2 INSTALLATION OF BOXES AND COVERS FOR ELECTRICAL SYSTEMS

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:

- 1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
- 2. Electrical Safety: NFPA 70E.
- 3. Commissioning of Active and Passive Fire Protection Features: NFPA 3 and NFPA 4.
- 4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
- 5. Communications Work: BICSI N1.
- 6. Life Safety and Means of Egress Work: NFPA 101.
- 7. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
- 8. Work in Confined Spaces: NFPA 350.
- 9. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
- 10. Outlet, Device, Pull, and Junction Boxes: Article 314 of NFPA 70.
- 11. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

- 1. Provide boxes in wiring and raceway systems wherever required for pulling of wires, making connections, and mounting of devices or fixtures.
- 2. Mount boxes at heights indicated on Drawings. If mounting heights of boxes are not individually indicated, give priority to ADA requirements. Install boxes with height measured to **[center][top][bottom]** of box unless otherwise indicated.
- 3. Recessed Boxes in Masonry Walls: Saw-cut opening for box in center of cell of masonry block, and install box flush with surface of wall. Prepare block surfaces to provide a flat surface for a raintight connection between box and cover plate or supported equipment and box, whether installed indoors or outdoors.
- 4. Horizontally separate boxes mounted on opposite sides of walls so they are not in the same

- vertical channel.
5. Locate boxes so that cover or plate will not span different building finishes.
 6. Support boxes in recessed ceilings independent of ceiling tiles and ceiling grid.
 7. Support boxes of three gangs or more from more than one side by spanning two framing members or mounting on brackets specifically designed for purpose.
 8. Fasten junction and pull boxes to, or support from, building structure. Do not support boxes by conduits.
 9. Set metal floor boxes level and flush with finished floor surface.
 10. Set nonmetallic floor boxes level. Trim after installation to fit flush with finished floor surface.
 11. Do not install aluminum boxes, enclosures, or fittings in contact with concrete or earth.
 12. Do not rely on locknuts to penetrate nonconductive coatings on enclosures. Remove coatings in the locknut area prior to assembling conduit to enclosure to ensure a continuous ground path.
 13. Boxes and Enclosures in Areas or Walls with Acoustical Requirements:
 - a. Seal openings and knockouts in back and sides of boxes and enclosures with acoustically rated putty.
 - b. Provide gaskets for cover plates and covers.
 14. **<Insert more stringent installation requirements that supplement or supersede listed standards and manufacturers' published instructions>.**

D. Interfaces with Other Work:

1. Identification: Provide labels for boxes and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
2. Coordinate installation of new products for **<Insert system or product family/category>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>.**
3. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>.**
 - a. **<Insert requirements for transition between this Section and related Work>.**

3.3 FIELD QUALITY CONTROL OF BOXES AND COVERS

A. Administrant for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Administrant for Communications Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified communications testing and inspecting agency to

- administer and perform tests and inspections.
2. Engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Administrant for Security Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified security testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified security testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

D. Administrant for Fire-Alarm Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified fire-alarm testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified fire-alarm testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

E. Acceptance Testing Preparation:

1. **<Insert requirements>**.

F. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

G. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. Perform tests and inspections recommended by standards listed in "Reference Standards for Installation" Paragraph.

H. Nonconforming Work:

1. Boxes and covers will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

I. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

3.4 CLEANING

- A. Remove construction dust and debris from boxes before installing cover plates, covers, and hoods.

3.5 PROTECTION

- A. After installation, protect boxes from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

END OF SECTION 26 05 33 16

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 05 33 16	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 33 16	26 27 26 00	Wiring Devices

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 43 00 - UNDERGROUND DUCTS AND UTILITY STRUCTURES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Type EPEC raceways and fittings.
2. Type ERMC-SS raceways, elbows, couplings, and nipples.
3. Type ERMC-S raceways, elbows, couplings, and nipples.
4. Type IMC raceways.
5. Type PVC raceways and fittings.
6. Type RTRC-BG raceways and fittings.
7. Fittings for conduit, tubing, and cable.
8. Electrically conductive corrosion-resistant compounds for threaded conduit.
9. Solvent cements.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" specifies additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" specifies seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
3. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** specifies preinstallation conference procedures.
4. Section 260519 "Low-Voltage for Electrical Power Conductors and Cables" specifies nonmetallic underground conduit with conductors (Type NUCC).
5. Section 260553 "Identification for Electrical Systems" specifies underground-line warning tape and concrete cable routing markers (warning planks).

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>**.

B. Preinstallation Coordination Meeting(s): For underground ducts and raceways. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location>** before **<Insert construction activity>**.

1. Attendees: Installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**], and **Owner's Commissioning Authority** of scheduled meeting dates.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. For concrete and steel used in precast concrete **[manholes][and][handholes]**, also include product certificates as required by ASTM C858.

B. Sustainable Design Product Data:

1. Laboratory Test Reports: For solvents and adhesives, indicating compliance with requirements for low-emitting materials.

C. Shop Drawings:

1. Electric Utility Duct Banks and Structures:

- a. Include plans, elevations, sections, and details, including attachments to other Work.
- b. Indicate locations of private property boundaries and utility easements.
- c. Include information required for approval by electric utility and for obtaining public space utility work permits.

2. Precast or Factory-Fabricated Concrete Structures:

- a. Include plans, elevations, sections, and details, including attachments to other Work.
- b. Include duct entry provisions, including locations and duct sizes, and methods and materials for waterproofing duct entry locations.
- c. Include reinforcement details.
- d. Include frame and cover design and manhole chimneys.
- e. Include [ladder][step] details.
- f. Include grounding details.
- g. Include dimensioned locations of cable rack inserts, pulling-in and lifting irons, sumps, and other accessories.
- h. Include joint details.

3. Factory-Fabricated Handholes and Boxes Other Than Precast Concrete:

- a. Include dimensioned plans, sections, and elevations, and fabrication and installation details.
- b. Include duct entry provisions, including locations and duct sizes, and methods and materials for waterproofing duct entry locations.
- c. Include cover design.
- d. Include grounding details.
- e. Include dimensioned locations of cable rack inserts, pulling-in and lifting irons, and other accessories.

D. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturer's Published Instructions: Prepare and submit installation, testing, and operating instructions for product.

B. Field Reports:

1. Factory Test Reports: For handholes and boxes.
2. Manufacturer's field reports for field quality-control support.

PART 2 - PRODUCTS

2.1 TYPE EPEC RACEWAYS AND FITTINGS

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 651A and UL CCN EAZX.

B. Schedule 40 Electrical HDPE Underground Conduit (EPEC-40):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Blue Diamond Industries, LLC]**
 - b. **[JM Eagle]**
 - c. **[Petroflex North America]**
 - d. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - e. **[Southwire Company, LLC]**
 - f. **<Insert manufacturer's name>**
2. Dimensional Specifications: Schedule 40.
3. Options:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.

C. Schedule 80 Electrical HDPE Underground Conduit (EPEC-80):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Blue Diamond Industries, LLC]**
 - b. **[JM Eagle]**
 - c. **[Petroflex North America]**
 - d. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - e. **[Southwire Company, LLC]**
 - f. **<Insert manufacturer's name>**
2. Dimensional Specifications: Schedule 80.
3. Options:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.

D. Type A Electrical HDPE Underground Conduit (EPEC-A):

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

- a. <Insert manufacturer's name>
- 2. Dimensional Specifications: Type A.
- 3. Options:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.

E. Type B Electrical HDPE Underground Conduit (EPEC-B):

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. <Insert manufacturer's name>
- 2. Dimensional Specifications: Type B.
- 3. Options:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.

2.2 TYPE ERM-SS RACEWAYS, ELBOWS, COUPLINGS, AND NIPPLES

A. Performance Criteria:

- 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
- 2. General Characteristics: UL 6A and UL CCN DYWV.

B. Stainless Steel Electrical Rigid Metal Conduit (ERM-SS), Elbows, Couplings, and Nipples:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Allied Tube & Conduit; Atkore International]**
 - c. **[Calconduit; Atkore International]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Patriot Aluminum Products, LLC]**
 - f. <Insert manufacturer's name>
- 2. Material: Stainless steel.
- 3. Options:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - b. Colors: As indicated on Drawings.

**2.3 TYPE ERM-S RACEWAYS, ELBOWS, COUPLINGS, AND NIPPLES****A. Performance Criteria:**

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 6 and UL CCN DYIX.

B. Galvanized-Steel Electrical Rigid Metal Conduit (ERM-S-G), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Allied Tube & Conduit; Atkore International]**
 - b. **[Calconduit; Atkore International]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Patriot Aluminum Products, LLC]**
 - f. **[Republic Conduit; Nucor Corporation, Nucor Tubular Products]**
 - g. **[Topaz Lighting & Electric]**
 - h. **[Western Tube; Zekelman Industries]**
 - i. **[Wheatland Tube; Zekelman Industries]**
 - j. **<Insert manufacturer's name>**
2. Exterior Coating: Zinc.
3. Options:
 - a. Interior Coating: **[Zinc with organic top coating][Zinc][Organic coating]**.
 - b. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - c. Colors: As indicated on Drawings.

C. PVC-Coated-Steel Electrical Rigid Metal Conduit (ERM-S-PVC), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Bluesteel Services LLC]**
 - c. **[Calbond; Atkore International]**
 - d. **[KorKap; Robroy Industries]**
 - e. **[Perma-Cote; Robroy Industries]**
 - f. **[Plasti-Bond; Robroy Industries]**
 - g. **<Insert manufacturer's name>**
2. Additional Characteristics:
3. Fittings for PVC-Coated Conduit:
 - a. Minimum coating thickness of **0.040 inch**, with overlapping sleeves protecting threaded joints.
 - b. Conduit bodies must be Form 8 with effective seal and positive placement feature to ease and assure proper installation. Certified results confirming seal performance at 15 psig

- (positive) and 25 inch Hg (vacuum) for 72 hours must be available. Conduit bodies must be supplied with plastic-encapsulated stainless steel cover screws.
- c. Form **2 inch** long or one pipe diameter long, whichever is less, PVC sleeve at openings of female fittings, except unions. Inside sleeve diameter must be matched to outside diameter of metal conduit.
- d. PVC coating on outside of conduit couplings must be protected from tool damage during installation.
- e. Female threads on fittings and couplings must be protected by urethane coating.
- f. Fittings must be from same manufacturer as conduit.
- g. Beam clamps and U bolts must be formed and sized to fit outside diameter of coated conduit. Plastic-encapsulated nuts must cover exposed portions of threads.

4. Options:

- a. Exterior Coating: PVC complying with NEMA RN 1[**and marked ETL Verified PVC-001**].
- b. Interior Coating: [**Zinc with organic top coating**][Zinc][**Organic coating**].
- c. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
- d. Colors: As indicated on Drawings.
- e. Conduit Fittings for Hazardous (Classified) Locations: UL 1203.
- f. Expansion and Deflection Fittings: UL 651 with flexible external bonding jumper.

2.4 TYPE IMC RACEWAYS

A. Performance Criteria:

- 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
- 2. General Characteristics: UL 1242 and UL CCN DYBY.

B. Steel Electrical Intermediate Metal Conduit (IMC):

- 1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:
 - a. [**ABB, Electrification Business**]
 - b. [**Allied Tube & Conduit; Atkore International**]
 - c. [**Calconduit; Atkore International**]
 - d. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
 - e. [**Topaz Lighting & Electric**]
 - f. [**Western Tube; Zekelman Industries**]
 - g. [**Wheatland Tube; Zekelman Industries**]
 - h. <Insert manufacturer's name>
- 2. Options:
 - a. Exterior Coating: [**Zinc**][**Alternative corrosion-resistant coating**].
 - b. Interior Coating: [**Zinc with organic top coating**][Zinc][**Organic coating**].
 - c. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
 - d. Colors: As indicated on Drawings.

**2.5 TYPE PVC RACEWAYS AND FITTINGS****A. Performance Criteria:**

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 651 and UL CCN DZYR.

B. Schedule 40 Rigid PVC Conduit (PVC-40) and Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Calconduit; Atkore International]**
 - c. **[JM Eagle]**
 - d. **[NAPCO; Westlake Chemical Corp.]**
 - e. **[Opti-Com Manufacturing Network, Inc (OMNI)]**
 - f. **[Topaz Lighting & Electric]**
 - g. **<Insert manufacturer's name>**
2. Dimensional Specifications: Schedule 40.
3. Options:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - b. Markings: **[For use with maximum 90 deg C wire.][For directional boring applications.]**

C. Schedule 80 Rigid PVC Conduit (PVC-80) and Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Calconduit; Atkore International]**
 - c. **[JM Eagle]**
 - d. **[Opti-Com Manufacturing Network, Inc (OMNI)]**
 - e. **[Topaz Lighting & Electric]**
 - f. **<Insert manufacturer's name>**
2. Dimensional Specifications: Schedule 80.
3. Options:
 - a. Minimum Trade Size: **[Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)]**.
 - b. Markings: **[For use with maximum 90 deg C wire.][For directional boring applications.]**

D. Type A Rigid PVC Concrete-Encased Conduit (PVC-A) and Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

- a. [Southern Pipe, Inc.]
 - b. <Insert manufacturer's name>
- 2. Dimensional Specifications: Type A.
 - 3. Options:
 - a. Minimum Trade Size: [Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)].

E. Type EB Rigid PVC Concrete-Encased Underground Conduit (PVC-EB) and Fittings:

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [JM Eagle]
 - b. [Southern Pipe, Inc.]
 - c. <Insert manufacturer's name>
- 2. Dimensional Specifications: Type EB.
- 3. Options:
 - a. Minimum Trade Size: [Metric designator 53 (trade size 2)][Metric designator 78 (trade size 3)][Metric designator 103 (trade size 4)].

2.6 TYPE RTRC-BG RACEWAYS AND FITTINGS

A. Performance Criteria:

- 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
- 2. General Characteristics: UL 2420 and UL CCN DZKT, for Type BG.

B. Low-Halogen, Belowground Reinforced Thermosetting Resin Conduit (RTRC-BG) and Fittings:

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. <Insert manufacturer's name>
- 2. Options:
 - a. Minimum Trade Size: [Metric designator 16 (trade size 1/2)][Metric designator 21 (trade size 3/4)].

2.7 FITTINGS FOR CONDUIT, TUBING, AND CABLE

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.

B. Metallic Fittings for Type ERM, Type IMC, Type PVC, Type EPEC, and Type RTRC Raceways:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - d. **[Konkore Fittings; Atkore International]**
 - e. **[O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group]**
 - f. **[Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway]**
 - g. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - h. **[Southwire Company, LLC]**
 - i. **[Topaz Lighting & Electric]**
 - j. **<Insert manufacturer's name>**
2. General Characteristics: UL 514B and UL CCN DWTT.
3. Options:
 - a. Material: **[Steel][Die cast]**.
 - b. Coupling Method: **[Compression coupling][Raintight compression coupling with distinctive color gland nut][Setscrew coupling. Setscrew couplings with only single screw per conduit are unacceptable]**.
 - c. Conduit Fittings for Hazardous (Classified) Locations: UL 1203.
 - d. Expansion and Deflection Fittings: UL 651 with flexible external bonding jumper.

2.8 ELECTRICALLY CONDUCTIVE CORROSION-RESISTANT COMPOUNDS FOR THREADED CONDUIT

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL Subject 2419 and UL CCN FOIZ.

B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

1. **[ABB, Electrification Business]**
2. **<Insert manufacturer's name>**

2.9 SOLVENT CEMENTS

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: As recommended by conduit manufacturer in accordance with UL 514B and UL CCN DWTT.
3. Sustainability Characteristics:
 - a. VOC Content: **[510][490]<Insert value>** g/L or less for **[PVC][CPVC]** conduit and fittings.
 - b. Low-Emitting Material Requirements: As recommended by solvent and adhesive manufacturer and that complies with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

B. Solvent Cements for Type PVC Raceways and Fittings:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **<Insert manufacturer's name>**

2.10 HANDHOLES AND BOXES FOR EXTERIOR UNDERGROUND WIRING

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics:
 - a. ASTM C858 for design and manufacturing processes.
 - b. SCTE 77.

2.11 MANHOLES FOR EXTERIOR UNDERGROUND WIRING

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics:
 - a. ASTM C858 for design and manufacturing processes.
 - b. SCTE 77.

B. Cast-in-Place Concrete Manholes:

1. Description: Underground utility structures, constructed in place, complete with accessories, hardware, and features. Include concrete knockout panels for duct entrance and sleeve for ground rod.

2. Additional Criteria: Comply with Section 033000 "Cast-in-Place Concrete."

2.12 SOURCE QUALITY CONTROL

A. Factory Tests for Handholes and Boxes:

1. Testing Administrator: **[Owner will engage][Engage]** qualified structural testing agency to evaluate handholes and boxes.
 - a. Tests of materials must be performed by independent testing agency.
 - b. Strength tests of complete boxes and covers must be by independent testing agency or manufacturer. Qualified registered professional engineer must certify tests by manufacturer.
2. Factory Tests and Inspections: Perform the following tests and inspections on handholes and boxes, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, before delivering to site. Affix label with name and date of **[manufacturer's][qualified testing laboratory's]** certification of system compliance.
 - a. Precast Concrete Utility Structures: Test and inspect in accordance with ASTM C1037.
 - b. Polymer Concrete and Nonconcrete Handhole and Pull-Box Prototypes: Test prototypes of handholes and boxes for compliance with SCTE 77. Strength tests must be for specified tier ratings of products supplied. Testing machine pressure gages must have current calibration certification, complying with ISO 9000 and ISO 10012, and traceable to NIST standards.
3. Nonconforming Work:
 - a. Equipment that does not pass tests and inspections will be considered defective.
4. Factory Test Reports: Prepare and submit factory test and inspection reports.

PART 3 - EXECUTION

3.1 INSTALLATION OF DUCTS AND DUCT BANKS

A. Reference Standards:

1. Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with NEMA TCB 2 for installation of underground ducts and duct banks.
2. Consult Architect for resolution of conflicting requirements.

B. Special Techniques:

1. Where indicated on Drawings, install duct, spacers, and accessories into duct-bank configuration shown. Duct installation requirements in this Section also apply to duct bank.
2. Steel raceway, bends, and fittings in **[single duct run or duct bank][on Project]** must be of same type.
3. Slope: Pitch duct minimum slope of 1:300 down toward manholes and handholes and away from buildings and equipment. Slope duct from high point between two manholes to drain in both directions.

4. Expansion and Deflection Fittings: Install expansion and deflection fitting in each duct in area of disturbed earth adjacent to manhole or handhole.
5. Install expansion fitting near center of straight line duct with calculated expansion of more than **3/4 inch**.
6. Curves and Bends:
 - a. Use 5-degree angle couplings for small changes in direction. Use manufactured long sweep bends with minimum radius of **[48 inch][12.5 ft][25 ft]**, both horizontally and vertically, at other locations unless otherwise indicated.
 - b. Field bending must be in accordance with NFPA 70 minimum radii requirements, except bends over 45 degrees must be made with minimum radius of **[48 inch][12.5 ft][25 ft]**. Use only equipment specifically designed for material and size involved. Use PVC heating bender for bending PVC conduit.
 - c. Duct must have maximum of 180 degrees of bends between pull points.
7. Joints: Use solvent-cemented joints in nonmetallic duct and fittings and make watertight in accordance with manufacturer's published instructions. Stagger couplings so those of adjacent duct do not lie in same plane. Couple steel conduits to ducts with adapters designed for this purpose, and encase coupling with minimum **3 inch** of concrete for minimum of **12 inch** on each side of coupling.
 - a. Install insulated grounding bushings on steel raceway terminations that are less than **12 inch** below grade or floor level and do not terminate in hubs.
8. Installation Adjacent to High-Temperature Steam Lines: Where duct is installed parallel to underground steam lines, perform calculations showing duct will not be subject to environmental temperatures above **104 deg F**. Where environmental temperatures are calculated to rise above **104 deg F**, and anywhere duct crosses above underground steam line, install insulation blankets listed for direct burial to isolate duct bank from steam line to maintain maximum environmental temperature of **104 deg F**.
9. End Bell Entrances to Manholes and Concrete and Polymer Concrete Handholes: Use end bells, spaced approximately **10 inch** o.c. for **5 inch** duct, and vary proportionately for other duct sizes.
 - a. Begin change from regular spacing to end-bell spacing **10 ft** from end bell, without reducing duct slope and without forming trap in line.
 - b. Grout end bells into structure walls from both sides to provide watertight entrances.
10. Duct Terminators for Entrances to Cast-in-Place Manholes and Concrete Handholes: Use manufactured, cast-in-place duct terminators, with entrances into structure spaced approximately **6 inch** o.c. for **4 inch** duct, and vary proportionately for other duct sizes.
 - a. Begin change from regular spacing to terminator spacing **10 ft** from terminator, without reducing duct line slope and without forming trap in line.
11. Building Wall Penetrations: Make transition from underground duct to steel raceway at least **10 ft** outside building wall, without reducing duct line slope away from building and without forming trap in line. Use fittings manufactured for transition to steel raceway type installed. Install steel raceway penetrations of building walls as specified in Section 260544 "Sleeves and Sleeve Seals for Electrical Raceways and Cabling."
12. Install manufactured steel raceway elbows for stub-ups at poles unless otherwise indicated. Encase elbows for stub-up ducts throughout length of elbow.
 - a. Couple steel elbows to ducts with adapters designed for this purpose, and encase coupling with minimum **3 inch** of concrete for minimum of **12 inch** on each side of coupling.

13. Sealing: Provide temporary closure at terminations of duct with pulled cables. Seal spare duct at terminations. Use sealing compound and plugs to withstand at least **15 psig** hydrostatic pressure.
14. Pulling Cord: Install **200 lbf** test nylon cord in empty ducts.
15. Concrete-Encased Ducts and Duct Bank:
 - a. Excavate trench bottom to provide firm and uniform support for duct. Prepare trench bottoms as specified in Section 312000 "Earth Moving" for pipes **6 inch** or less in nominal diameter.
 - b. Width: Excavate trench **[3 inch][12 inch]** wider than duct on each side.
 - c. Depth: Install so top of duct envelope is at least **24 inch** below finished grade in areas not subject to deliberate traffic, and at least **30 inch** below finished grade in deliberate traffic paths for vehicles unless otherwise indicated. Install so top of duct envelope is below local frost line.
 - d. Support duct on duct spacers coordinated with duct size, duct spacing, and outdoor temperature.
 - e. Spacer Installation: Place spacers close enough to prevent sagging and deforming of duct, with not less than **[four][five]** spacers per **20 ft** of duct. Place spacers within **24 inch** of duct ends. Stagger spacers approximately **6 inch** between tiers. Secure spacers to earth and to duct to prevent floating during concreting. Tie entire assembly together using fabric straps; do not use tie wires or reinforcing steel that may form conductive or magnetic loops around ducts or duct groups.
 - f. Minimum Space between Ducts: **3 inch** between edge of duct and exterior envelope wall, **2 inch** between ducts for like services, and **4 inch** between power and communications ducts.
 - g. Elbows:
 - 1) Use manufactured duct elbows for stub-ups and at changes of direction in duct unless otherwise indicated. Extend encasement throughout length of elbow.
 - 2) Use manufactured steel elbows for stub-ups, at building entrances, and at changes of direction in duct run.
 - h. Stub-ups to Outdoor Equipment: Extend concrete-encased steel raceway horizontally minimum of **60 inch** from edge of equipment base.
 - 1) Stub-ups must **[terminate in coupling installed flush with][be minimum 4 inch above]** finished floor and minimum **3 inch** from conduit side to edge of slab.
 - i. Stub-ups to Indoor Equipment: Extend concrete-encased steel raceway horizontally minimum of **60 inch** from edge of wall. Install insulated grounding bushings on terminations at equipment.
 - 1) Stub-ups must **[terminate in coupling installed flush with][be minimum 4 inch above]** finished floor and no less than **3 inch** from conduit side to edge of slab.
 - j. Reinforcement: Reinforce concrete-encased duct where crossing disturbed earth and where indicated. Arrange reinforcing rods and ties without forming conductive or magnetic loops around ducts or duct groups.
 - k. Forms: Use walls of trench to form side walls of duct bank where soil is self-supporting and concrete envelope can be poured without soil inclusions; otherwise, use forms.
 - l. Concrete Cover: Install minimum of **3 inch** of concrete cover between edge of duct to exterior envelope wall, **2 inch** between duct of like services, and **4 inch** between power and communications ducts.
 - m. Place minimum **6 inch** of engineered fill above concrete encasement of duct.
 - n. Concreting Sequence: Pour each run of envelope between manholes or other terminations in one continuous operation.

- 1) Start at one end and finish at other, allowing for expansion and contraction of duct as its temperature changes during and after pour. Use expansion fittings installed in accordance with manufacturer's published instructions, or use other specific measures to prevent expansion-contraction damage.
 - 2) If more than one pour is necessary, terminate each pour in vertical plane and install **3/4 inch** reinforcing-rod dowels extending minimum of **18 inch** into concrete on both sides of joint near corners of envelope.
- o. Pouring Concrete: Comply with requirements in "Concrete Placement" Article in Section 033000 "Cast-in-Place Concrete." Place concrete carefully during pours to prevent voids under and between duct and at exterior surface of envelope. Do not allow heavy mass of concrete to fall directly onto ducts. Allow concrete to flow around duct and rise up in middle, uniformly filling open spaces. Do not use power-driven agitating equipment unless specifically designed for duct-installation application.
16. Direct-Buried Duct and Duct Bank:
- a. Excavate trench bottom to provide firm and uniform support for duct. Comply with requirements in Section 312000 "Earth Moving" for preparation of trench bottoms for pipes less than **6 inch** in nominal diameter.
 - b. Width: Excavate trench [**3 inch**][**12 inch**] wider than duct on each side.
 - c. Depth: Install top of duct at least **36 inch** below finished grade unless otherwise indicated.
 - d. Set elevation of top of duct bank below frost line.
 - e. Place minimum **3 inch** of sand as bed for duct. Place sand to minimum of **6 inch** above top level of duct.
 - f. Support ducts on duct spacers coordinated with duct size, duct spacing, and outdoor temperature.
 - g. Spacer Installation: Place spacers close enough to prevent sagging and deforming of duct, with not less than [**four**][**five**] spacers per **20 ft** of duct. Place spacers within **24 inch** of duct ends. Stagger spacers approximately **6 inch** between tiers. Secure spacers to earth and to ducts to prevent floating during concreting. Tie entire assembly together using fabric straps; do not use tie wires or reinforcing steel that may form conductive or magnetic loops around ducts or duct groups.
 - h. Install duct with minimum of **3 inch** between ducts for like services and **6 inch** between power and communications duct.
 - i. Install manufactured duct elbows for stub-ups, at building entrances, and at changes of direction in duct direction unless otherwise indicated. Encase elbows for stub-up ducts throughout length of elbow.
 - j. Install manufactured steel elbows for stub-ups, at building entrances, and at changes of direction in duct.
- 1) Couple RNC duct to steel raceway with adapters designed for this purpose, and encase coupling with minimum **3 inch** of concrete.
 - 2) Stub-ups to Outdoor Equipment: Extend concrete-encased steel raceway horizontally minimum of **60 inch** from edge of base. Install insulated grounding bushings on terminations at equipment.
 - a) Stub-ups must [**terminate in coupling installed flush with**][**be minimum 4 inch above**] finished base and minimum **3 inch** from conduit side to edge of base.
 - 3) Stub-ups to Indoor Equipment: Extend concrete-encased steel raceway horizontally on exterior of wall minimum of **60 inch** from edge of wall. Install insulated grounding bushings on terminations at equipment.
 - 4) Stub-ups through interior floors must [**terminate in coupling installed flush**

with][be minimum 4 inch above] finished floor and no less than **3 inch** from conduit side to edge of equipment pad or floor slab.

- k. After installing first tier of duct, backfill and compact. Start at tie-in point and work toward end of duct run, leaving ducts at end of run free to move with expansion and contraction as temperature changes during this process. Repeat procedure after placing each tier. After placing last tier, hand place backfill to **4 inch** over duct and hand tamp. Firmly tamp backfill around ducts to provide maximum supporting strength. Use hand tamper only. After placing controlled backfill over final tier, make final duct connections at end of run and complete backfilling with normal compaction. Comply with requirements in Section 312000 "Earth Moving" for installation of backfill materials.
17. Warning Planks: Bury warning planks approximately **12 inch** above direct-buried duct, placing them **36 inch** o.c. Align planks along width and along centerline of duct or duct bank. Provide additional plank for each **12 inch** increment of duct-bank width over nominal **18 inch**. Space additional planks **12 inch** apart, horizontally across width of ducts.
18. Underground-Line Warning Tape: Bury **[nonconducting][conducting]** underground line specified in Section 260553 "Identification for Electrical Systems" no less than **12 inch** above concrete-encased duct and duct banks **and approximately 12 inch below grade]**. Align tape parallel to and within **3 inch** of centerline of duct bank. Provide additional warning tape for each **12 inch** increment of duct-bank width over nominal **18 inch**. Space additional tapes **12 inch** apart, horizontally across width of ducts.
19. Ground ducts and duct banks in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Interfaces with Other Work:

1. Coordinate installation of new products for **<Insert system or product group>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>**.
2. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>**.
 - a. **<Insert requirements for transition between this Section and related Work>**.

3.2 INSTALLATION OF CONCRETE MANHOLES, HANDHOLES, AND BOXES

A. Reference Standards:

1. Precast Concrete Handholes: Comply with ASTM C891 unless otherwise indicated.
2. Consult Architect for resolution of conflicting requirements.

B. Special Techniques:

1. Cast-in-Place Manholes:
 - a. Finish interior surfaces with smooth-troweled finish.
 - b. Knockouts for Future Duct Connections: Form and pour concrete knockout panels **1-1/2 to 2 inch** thick, arranged as indicated.
 - c. Comply with requirements in Section 033000 "Cast-in-Place Concrete" for cast-in-place concrete, formwork, and reinforcement.
2. Precast Concrete Handholes and Manholes:

- a. Install units level and plumb and with orientation and depth coordinated with connecting duct to minimize bends and deflections required for proper entrances.
 - b. Unless otherwise indicated, support units on level bed of crushed stone or gravel graded from **1 inch** sieve to **No. 4** sieve and compacted to same density as adjacent undisturbed earth.
 - c. Field-cut openings for conduits in accordance with enclosure manufacturer's published instructions. Cut wall of enclosure with tool designed for material to be cut. Size holes for terminating fittings to be used, and seal around penetrations after fittings are installed.
3. Elevations:
- a. Manhole Roof: Install with rooftop at least **15 inch** below finished grade.
 - b. Manhole Frame: In paved areas and trafficways, set frames flush with finished grade. Set other manhole frames **1 inch** above finished grade.
 - c. Install handholes with bottom below frost line, **<Insert depth of frost line below grade at Project site>** below grade.
 - d. Handhole Covers: In paved areas and trafficways, set surface flush with finished grade. Set covers of other handholes **1 inch** above finished grade.
 - e. Where indicated, cast handhole cover frame integrally with handhole structure.
4. Drainage: Install drains in bottom of manholes where indicated. Coordinate with drainage provisions indicated.
5. Manhole Access: Circular opening in manhole roof; sized to match cover size.
- a. Manholes with Fixed Ladders: Offset access opening from manhole centerlines to align with ladder.
 - b. Install chimney, constructed of **[precast concrete][cast-iron]** collars and rings, and cast-iron frame to connect cover with manhole roof opening. Provide moisture-tight joints and waterproof grouting for frame and chimney.
6. Waterproofing: Apply waterproofing to exterior surfaces of manholes **[and handholes]** after concrete has cured at least three days. Waterproofing materials and installation are specified in **[Section 071353 "Elastomeric Sheet Waterproofing"]****[Section 071354 "Thermoplastic Sheet Waterproofing"]****<Insert waterproofing Section>**. After duct has been connected and grouted, and before backfilling, waterproof joints and connections, and touch up abrasions and scars. Waterproof exterior of manhole chimneys after mortar has cured at least three days.
7. Dampproofing: Apply dampproofing to exterior surfaces of manholes **[and handholes]** after concrete has cured at least three days. Dampproofing materials and installation are specified in Section 071113 "Bituminous Dampproofing." After ducts are connected and grouted, and before backfilling, dampproof joints and connections, and touch up abrasions and scars. Dampproof exterior of manhole chimneys after mortar has cured at least three days.
8. Hardware: Install removable hardware, including pulling eyes, cable stanchions, **[and]** cable arms, **[and insulators]**, as required for installation and support of cables and conductors and as indicated.
9. Fixed Manhole Ladders: Arrange to provide for safe entry with maximum clearance from cables and other items in manholes.
10. Field-Installed Bolting Anchors in Manholes and Concrete Handholes: Do not drill deeper than **3-7/8 inch** for manholes and **2 inch** for handholes, for anchor bolts installed in field. Use minimum of two anchors for each cable stanchion.
11. Ground manholes, handholes, and boxes in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."
- C. Interfaces with Other Work:
1. Coordinate installation of new products for **<Insert system or product group>** with existing

conditions.

a. <Insert requirements for transition between new and existing>.

2. Coordinate with <Insert Section number and title> for <Insert description of interfacing related Work>.

a. <Insert requirements for transition between this Section and related Work>.

3.3 INSTALLATION OF HANDHOLES AND BOXES OTHER THAN PRECAST CONCRETE

A. Reference Standards:

1. <Insert reference standard> for <Insert reason>.
2. Consult Architect for resolution of conflicting requirements.

B. Special Techniques:

1. Install handholes and boxes level and plumb and with orientation and depth coordinated with connecting duct, to minimize bends and deflections required for proper entrances. Use box extension if required to match depths of duct, and seal joint between box and extension as recommended by manufacturer.
2. Unless otherwise indicated, support units on level bed of crushed stone or gravel, graded from **1/2 inch** sieve to **No. 4** sieve and compacted to same density as adjacent undisturbed earth.
3. Elevation: In paved areas and trafficways, set cover flush with finished grade. Set covers of other handholes **1 inch** above finished grade.
4. Install handholes and boxes with bottom below frost line, <Insert depth of frost line below grade at Project site> below grade.
5. Install removable hardware, including pulling eyes, cable stanchions, cable arms, and insulators, as required for installation and support of cables and conductors and as indicated. Select arm lengths to be long enough to provide spare space for future cables, but short enough to preserve adequate working clearances in enclosure.
6. Field cut openings for duct in accordance with enclosure manufacturer's published instructions. Cut wall of enclosure with tool designed for material to be cut. Size holes for terminating fittings to be used, and seal around penetrations after fittings are installed.
7. For enclosures installed in **[asphalt paving]**<and><Insert material> and subject to occasional, nondeliberate, heavy-vehicle loading, form and pour concrete ring encircling, and in contact with enclosure entry, and with top surface screeded to top of box cover frame. Bottom of ring must rest on **[compacted earth]**<Insert material>.
 - a. Concrete: **3000 psi**, 28-day strength, complying with Section 033000 "Cast-in-Place Concrete," with troweled finish.
 - b. Dimensions: **[10 inch wide by 12 inch deep]**<Insert dimensions>.
8. Ground handholes and boxes in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Interfaces with Other Work:

1. Coordinate installation of new products for <Insert system or product group> with existing conditions.
 - a. <Insert requirements for transition between new and existing>.
2. Coordinate with <Insert Section number and title> for <Insert description of interfacing

related Work>.

- a. <Insert requirements for transition between this Section and related Work>.

3.4 FIELD QUALITY CONTROL

A. Acceptance Testing Preparation:

1. <Insert requirements>.

B. Field tests and inspections must be witnessed by [Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>.

C. Tests and Inspections:

1. Demonstrate capability and compliance with requirements on completion of installation of underground duct, duct bank, and utility structures.
2. Pull solid aluminum or wood test mandrel through duct to prove joint integrity and adequate bend radii, and test for out-of-round duct. Provide minimum **12 inch** long mandrel equal to duct size minus **1/4 inch**. If obstructions are indicated, remove obstructions and retest.
3. Test manhole[**and handhole**] grounding to ensure electrical continuity of grounding and bonding connections. Measure and report ground resistance as specified in Section 260526 "Grounding and Bonding for Electrical Systems."

D. Nonconforming Work:

1. Underground ducts, raceways, and structures will be considered defective if they do not pass tests and inspections.
2. Correct deficiencies and retest as specified above to demonstrate compliance.

E. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to [**support**][**supervise**] field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at Project site.

SECTION 26 05 46 00 - POLES FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Lighting standards.
2. Lighting standard accessories.
3. Utility poles.
4. Utility pole accessories.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding components referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers and supports referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
7. Section 260573 "Power System Studies" specifies arc-flash hazard analysis and warning labels referenced by this Section.
8. **[Section 262726 "Wiring Devices"] [Section 262726.31 "General-Grade Single Straight-Blade Receptacles"] [and] [Section 262726.33 "General-Grade Duplex Straight-Blade Receptacles"]** specify receptacles referenced by this Section.
9. Section 270528 "Pathways for Communications Systems" specifies additional requirements for raceway materials, routing, locations, and identification of communications equipment and cabling.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include data on construction details, profiles, EPA, cable entrances, materials, dimensions, weight, rated design load, and ultimate strength of individual components.
2. Include finishes for lighting poles and luminaire-supporting devices.
3. Anchor bolts.
4. Manufactured pole foundations.
5. Product Certificates: Include product certificate, signed by manufacturers of poles, certifying that products are designed for indicated load requirements in accordance with AASHTO LTS-6-M and that load imposed by luminaire and attachments has been included in design. The certification must be based on design calculations signed and sealed by a professional engineer.
6. Include manufacturer's sample extended warranty language.

B. Samples: Submit finish samples for each exposed lighting pole, standard, and luminaire-supporting

device and for each color and texture specified.

C. Shop Drawings: Prepare and submit the following:

1. Plans, elevations, sections, and **[mounting][and][attachment]** details.
2. Details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Details of fabrication and assembly of **[poles][and][pole accessories]**.
4. Foundation construction details, including material descriptions, dimensions, anchor bolts, support devices, and calculations, signed and sealed by a professional engineer licensed in the state of installation.
5. Anchor bolt templates keyed to specific poles and certified by manufacturer.
6. Method and procedure of pole installation. Include manufacturer's published installations.

D. Field quality-control reports.

1.3 INFORMATIONAL SUBMITTALS

A. Material Test Reports:

1. For each foundation component, by qualified testing laboratory.
2. For each pole, by qualified testing laboratory.

B. Soil test reports.

C. Manufacturer's published instructions.

D. Field Reports:

1. Manufacturer's field reports for field quality-control support.

1.4 CLOSEOUT SUBMITTALS

A. Warranty documentation.

1.5 WARRANTY

A. Special Installer Extended Warranty: Installer warrants that fabricated and installed **[pole(s)][and luminaire-lowering device(s)]** perform in accordance with specified requirements and agrees to repair or replace products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.

1. Extended-Warranty Period: **[Two][Three][Four]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.

B. Special Manufacturer Extended Warranty: Manufacturer warrants that **[pole(s)][and luminaire-lowering device(s)]** perform in accordance with specified requirements and agrees to provide repair or replacement of products that fail to perform as specified within extended-warranty period, including materials that corrode, fade, stain, perforate, erode, or chalk due to effects of weather or solar radiation. Manufacturer may exclude lightning damage, hail damage, vandalism, abuse, or unauthorized repairs from special warranty period. Warranty must convey to Owner upon acceptance of the Work.

1. Extended-Warranty Period: **[Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
2. Warranty Period for Corrosion Resistance: **[Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
3. Warranty Period for Color Retention: **[Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Description: **<Insert brief description of desired system, assembly, or equipment>**.
- B. Performance Criteria:
 1. Regulatory Requirements:
 - a. Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 2. Utility Approval: Comply with **<Insert name of utility>** requirements.
 3. General Characteristics:
 - a. Structural Characteristics: Comply with AASHTO LTS-6-M.
 - b. Dead Load: Weight of luminaire and its horizontal and vertical supports, lowering devices, and supporting structure, applied in accordance with AASHTO LTS-6-M.
 - c. Live Load: Single load of **500 lb** distributed in accordance with AASHTO LTS-6-M.
 - d. Ice Load: Load of **3 lb/ft²**, applied in accordance with AASHTO LTS-6-M for applicable areas on the Ice Load Map.
 - e. Wind Load for Poles Exceeding 50 ft (15 m) Height:
 - 1) Basic Wind Speed: **[100 mile/h][90 mile/h]<Insert value from AASHTO LTS-6-M for this Project>**.
 - 2) Wind Importance Factor: **[1.0]<Insert value from AASHTO LTS-6-M>**.
 - 3) Minimum Design Life: **[50 years]<Insert value from AASHTO LTS-6-M>**.
 - 4) Velocity Conversion Factor: **[1.0]<Insert value from AASHTO LTS-6-M>**.
 - f. Wind Load for Poles Not Exceeding 50 ft (15 m) Height:
 - 1) Basic Wind Speed: **[100 mile/h][90 mile/h]<Insert value from AASHTO LTS-6-M for this Project>**.
 - 2) Wind Importance Factor: **[1.0]<Insert value from AASHTO LTS-6-M>**.
 - 3) Minimum Design Life: **[25 years]<Insert value from AASHTO LTS-6-M>**.
 - 4) Velocity Conversion Factor: **[1.0]<Insert value from AASHTO LTS-6-M>**.
 - g. Strength Analysis: For each pole, multiply the actual EPA of luminaires and brackets by a factor of **[1.1]<Insert number>** to obtain the EPA used in pole selection strength analysis.
 - h. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
 - i. General Finish Requirements:
 - 1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

- 2) Appearance of Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.

2.2 LIGHTING STANDARDS

A. Steel Lighting Standard:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[American LitePole]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Bridgewell Resources]**
 - d. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - e. **[E-conolight]**
 - f. **[H.E. Williams]**
 - g. **[Hapco]**
 - h. **[Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **[Kim Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - j. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - k. **[LSI Industries]**
 - l. **[Millerbernd Manufacturing Company]**
 - m. **[NAFCO; brand of Wisconsin Lighting Lab, Inc.]**
 - n. **[RAB Lighting]**
 - o. **[Ruud Lighting; brand of Cree Lighting; subsidiary of Ideal Industries, Inc.]**
 - p. **[Union Metal Industries Corp.]**
 - q. **<Insert manufacturer's name>**
2. Source Limitations: **[Obtain lighting standards from single manufacturer or producer][For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties].**
3. Standard Features:
 - a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
 - b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
 - c. General Finish Requirements:
 - 1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
 - 2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.
 - d. Carbon Steel Poles: Comply with ASTM A500/A500M, Grade B carbon steel with a minimum yield of **46,000 psig**; one-piece construction up to **40 ft** in height with access handhole in lighting standard wall.

- 1) Shape: **[Round, tapered][Round, straight][Square, tapered][Square, straight]**.
 - 2) Mounting Provisions: Butt flange for bolted mounting on foundation or breakaway support.
- e. Stainless Steel Poles: Comply with **[ASTM A240/A240M][ASTM A666]**, stainless steel with a minimum yield of **55,000 psi**; one-piece construction up to **40 ft** in height with access handhole in lighting standard wall.
- 1) Shape: **[Round, tapered][Round, straight][Square, tapered][Square, straight]**.
 - 2) Mounting Provisions: Butt flange for bolted mounting on foundation or breakaway support.
- f. Steel Mast Arms: **[Single-arm][Truss][Davit]** type, continuously welded to lighting standard attachment plate. Material and finish same as plate.
- g. Brackets for Luminaires: Detachable, cantilever, without underbrace.
- 1) Adaptor fitting welded to lighting standard, allowing the bracket to be bolted to the lighting standard-mounted adapter, then bolted together with **[stainless steel][galvanized-steel]** bolts.
 - 2) Cross Section: Tapered oval, with straight tubular end section to accommodate luminaire. Match lighting standard material and finish.
- h. Pole-Top Tenons: Fabricated to support luminaire or luminaires and brackets indicated, and securely fastened to lighting standard top.
- i. Grounding and Bonding Lugs: Welded **1/2 inch** threaded lug, listed for attaching grounding and bonding conductors of type and size indicated, and accessible through handhole.
- j. Steps: Fixed steel, with nonslip treads.
- 1) For climbing positions, install at **15 inch** vertical spacing, alternating on opposite sides of lighting standard, oriented 180 degrees from each other; first step must be at an elevation **10 ft** above finished grade.
 - 2) For working positions, install steps on opposite side of lighting standard, oriented 180 degrees from each other at the same elevation.
- k. Handhole: Oval shaped, with minimum clear opening of **2-1/2-by-5 inch**, with cover secured by stainless steel captive screws.
- l. Intermediate Handhole and Cable Support: Weatherproof, **3-by-5 inch** handhole located at midpoint of lighting standard, with cover for access to internal welded attachment lug for electric cable support grip.
- m. Cable Support Grip: Wire-mesh type with rotating attachment eye, sized for diameter of cable and rated for a minimum load equal to weight of supported load multiplied by a 5.0 safety factor.
- n. Platform for Lamp Ballast Servicing: Factory fabricated of steel, with finish matching that of lighting standard.
- o. Prime-Coat Finish: Manufacturer's standard prime-coat finish ready for field painting.
- p. Galvanized Finish: After fabrication, hot-dip galvanize in accordance with ASTM A123/A123M.
- q. Factory-Painted Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.
- 1) Surface Preparation: Clean surfaces in accordance with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair paint bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, in accordance with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
 - 2) Interior Surfaces of Pole: One coat of bituminous paint, or otherwise treat for equal corrosion protection.

- 3) Exterior Surfaces: Manufacturer's standard finish consisting of one or more coats of primer and two finish coats of high-gloss, high-build polyurethane enamel.
 - a) Color: **[As indicated by manufacturer's designations][Match Architect's sample][As selected by Architect from manufacturer's full range].**
- r. Powder-Coat Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.
 - 1) Surface Preparation: Clean surfaces in accordance with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair powder-coat bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, in accordance with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
 - 2) Powder Coat: Comply with AAMA 2604.
 - a) Electrostatic-applied powder coating; single application and cured to a minimum **2.5 to 3.5 mil** dry film thickness. Coat interior and exterior of lighting standard for equal corrosion protection.
 - b) Color: **[As indicated by manufacturer's designations][Match Architect's sample][As selected by Architect from manufacturer's full range].**
4. Other Available Features Required by the Project:
 - a. Fasteners: **[Stainless steel][Galvanized steel]<Insert finish or grade>**, size and type as determined by manufacturer. Corrosion-resistant items compatible with support components.
 - 1) Materials: Compatible with lighting standards as well as the substrates to which lighting standards are fastened and may not cause galvanic action at contact points.
 - 2) Anchor Bolts, Leveling Nuts, Bolt Caps, and Washers: Hot-dip galvanized after fabrication unless otherwise indicated.

B. Aluminum Lighting Standard:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[American LitePole]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Bridgewell Resources]**
 - d. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - e. **[E-conolight]**
 - f. **[H.E. Williams]**
 - g. **[Hapco]**
 - h. **[Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **[Kim Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - j. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - k. **[LSI Industries]**
 - l. **[Lyte Poles; brand of DWM Holdings, Inc.]**
 - m. **[NAFCO; brand of Wisconsin Lighting Lab, Inc.]**
 - n. **[Ruud Lighting; brand of Cree Lighting; subsidiary of Ideal Industries, Inc.]**
 - o. **[Sentry Electric, LLC]**

- p. **[Union Metal Industries Corp.]**
- q. **[Valmont Industries, Inc.]**
- r. **<Insert manufacturer's name>**
- 2. Source Limitations: **[Obtain lighting standards from single manufacturer or producer][For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties].**
- 3. Standard Features:
 - a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
 - b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
 - c. General Finish Requirements:
 - 1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
 - 2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.
 - d. **[Seamed][Seamless]**, extruded structural tube complying with ASTM B221, **[Alloy 6063-T6][Alloy 6061-T6]**, with access handhole in in lighting standard wall.
 - 1) Shape: **[Round, tapered][Round, straight][Square, tapered][Square, straight]**.
 - 2) Mounting Provisions: Butt flange for bolted mounting on foundation or breakaway support.
 - e. Mast Arms: **[Aluminum][Steel][Single-arm][Truss][Davit]** type, continuously welded to lighting standard attachment plate. Material and finish same as plate.
 - f. Brackets for Luminaires: Detachable, cantilever, without underbrace.
 - 1) Adaptor fitting welded to lighting standard, allowing the bracket to be bolted to the lighting standard-mounted adapter, then bolted together with **[stainless steel][galvanized-steel]** bolts.
 - 2) Cross Section: Tapered oval, with straight tubular end section to accommodate luminaire. Match lighting standard material and finish.
 - g. Pole-Top Tenons: Fabricated to support luminaire or luminaires and brackets indicated, and securely fastened to lighting standard top.
 - h. Grounding and Bonding Lugs: Bolted **1/2 inch** threaded lug, listed for attaching grounding and bonding conductors of type and size listed in that Section, and accessible through handhole.
 - i. Handhole: Oval shaped, with minimum clear opening of **2-1/2 by 5 inch**, with cover secured by stainless steel captive screws.
 - j. Prime-Coat Finish: Manufacturer's standard prime-coat finish ready for field painting.
 - k. Aluminum Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.
 - 1) Finish designations prefixed by AA comply with the system established by the Aluminum Association for designating aluminum finishes.
 - 2) Natural Satin Finish: Provide fine, directional, medium satin polish (AA-M32); buff complying with AA-M20 requirements; and seal aluminum surfaces with clear, hard-coat wax.
 - 3) Class I, Clear-Anodic Finish: AA-M32C22A41 (Mechanical Finish: Medium satin;

- Chemical Finish: Etched, medium matte; Anodic Coating: Architectural Class I clear coating of 0.018 mm or thicker), complying with AAMA 611.
- 4) Class I, Color-Anodic Finish: AA-M32C22A42/A44 (Mechanical Finish: Medium; Chemical Finish: Etched, medium matte; Anodic Coating: Architectural Class I integrally colored or electrolytically deposited color coating 0.018 mm or thicker), complying with AAMA 611.

- I. Factory-Painted Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.

- 1) Surface Preparation: Clean surfaces to comply with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair paint bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, in accordance with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
- 2) Interior Surfaces of Pole: One coat of bituminous paint, or otherwise treat for equal corrosion protection.
- 3) Exterior Surfaces: Manufacturer's standard finish consisting of one or more coats of primer and two finish coats of high-gloss, high-build polyurethane enamel.

- a) Color: **[As indicated by manufacturer's designations][Match Architect's sample][As selected by Architect from manufacturer's full range].**

- m. Powder-Coat Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.

- 1) Surface Preparation: Clean surfaces to comply with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair powder coat bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, in accordance with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
- 2) Powder coat must comply with AAMA 2604.

- a) Electrostatic applied powder coating; single application with a minimum **2.5 to 3.5 mil** dry film thickness; cured in accordance with manufacturer's published instructions. Coat interior and exterior of lighting standard for equal corrosion protection.
- b) Color: **[As indicated by manufacturer's designations][Match Architect's sample][As selected by Architect from manufacturer's full range].**

4. Other Available Features Required by the Project:

- a. Fasteners: **[Stainless steel][Galvanized steel]<Insert finish or grade>**, size and type as determined by manufacturer. Corrosion-resistant items compatible with support components.
 - 1) Materials: Compatible with lighting standards as well as to substrates to which lighting standards are fastened and may not cause galvanic action at contact points.
 - 2) Anchor Bolts, Leveling Nuts, Bolt Caps, and Washers: Hot-dip galvanized after fabrication unless otherwise indicated.

- C. Fiberglass Lighting Standard:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[Alliance; a division of GEOTEK]**
 - b. **[Bridgewell Resources]**
 - c. **[CMT; a Valmont Company]**
 - d. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - e. **[PLP Composite Technologies, Inc]**
 - f. **[Shakespeare; a Valmont Company]**
 - g. **[Valmont Industries, Inc.]**
 - h. **[Whately; a Valmont Company]**
 - i. **[Wood Preservers, Inc.]**
 - j. **<Insert manufacturer's name>**
2. Source Limitations: **[Obtain lighting standards from single manufacturer or producer][For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties].**
3. Standard Features:
- a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
 - b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
 - c. General Finish Requirements:
 - 1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
 - 2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.
 - d. Designed specifically for supporting luminaires, with factory-formed cable entrance and handhole.
 - e. Not less than 65 percent by weight of fiberglass roving, with resin and pigment making up the remainder.
 - f. Roving must be continuously applied with uniform tension, with multiple layers placed to meet axial and compressive strength requirements.
 - g. Shape: **[Round, tapered][Round, straight][Square, tapered][Square, straight].**
 - h. Mounting Provisions: Butt flange for bolted mounting on foundation or breakaway support.
 - i. Surface Finish: Smooth and uniform along surface of lighting standard.
 - j. Paint Finish: Pigmented polyurethane, with a minimum dry film thickness of **1.5 mil**. Polyurethane may be omitted if the surface layer of the lighting standard is inherently UV inhibited.
 - k. Mast Arms: **[Aluminum][Steel][Fiberglass][Single-arm][Truss][Davit]** type, continuously welded to lighting standard attachment plate. Material and finish same as plate. Adaptor plate must be steel hot-dip galvanized in accordance with ASTM A153/A153M or Alloy 6061-T6 aluminum encased within fiberglass roving, allowing the mast arm adaptor to be bolted to the lighting standard.
 - l. Brackets for Luminaires: Detachable, cantilever, without underbrace.
 - 1) Adaptor Fitting: Steel, hot-dip galvanized in accordance with ASTM A153/A153M, or Alloy 6061-T6 aluminum, permanently bonded within fiberglass roving, allowing the bracket to be bolted to the lighting standard-mounted adapter. Bolt together with **[stainless steel][galvanized-steel]** bolts; use anti-seize compound when bolting dissimilar metals.
 - 2) Cross Section: Tapered oval, with straight tubular end section to accommodate luminaire. Match lighting standard material and finish.

- m. Pole-Top Tenons: Steel, hot-dip galvanized in accordance with ASTM A153/A153M, or Alloy 6061-T6 aluminum, permanently bonded to the fiberglass shaft. Fabricated to support luminaire or luminaires and brackets indicated.
 - n. Handhole: Oval shaped, with minimum clear opening of **2-1/2 by 5 inch**, with cover secured by stainless steel captive screws.
 - o. Grounding: Bare, stranded copper, 6 AWG, **[suspended inside of lighting standard][inside 3/4 inch conduit fastened to the interior of the lighting standard]**, connected to luminaire(s), ground lug near handhole, and ground rod.
 - p. Grounding and Bonding Lugs: Bolted **1/2 inch** threaded lug, listed for attaching grounding and bonding conductors of type and size listed in that Section, and accessible through handhole.
4. Other Available Features Required by the Project:
- a. Resin Color: **[Black][Dark][Bronze]<Insert color>**; uniform coloration throughout entire wall thickness.
 - b. Anchor Base: Integral galvanized-steel or aluminum casting, enclosing and permanently bonded to the exterior of the fiberglass shaft.
 - c. Fasteners: **[Stainless steel][Galvanized steel]<Insert finish or grade>**, size and type as determined by manufacturer. Corrosion-resistant items compatible with support components.
 - 1) Materials: Compatible with lighting standards as well as the substrates to which lighting standards are fastened and may not cause galvanic action at contact points.
 - 2) Anchor Bolts, Leveling Nuts, Bolt Caps, and Washers: Hot-dip galvanized after fabrication unless otherwise indicated.
- D. Laminated Wood Lighting Standard:
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bell Lumber and Pole Company]**
 - b. **[Hughes Brothers, Inc.]**
 - c. **[Laminated Wood Systems, Inc.]**
 - d. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - e. **[McFarland Cascade]**
 - f. **[Timber Technologies, LLC]**
 - g. **[TimberWood Products; J.H. Baxter & Co.]**
 - h. **[Valmont Industries, Inc.]**
 - i. **<Insert manufacturer's name>**
 - 2. Source Limitations: **[Obtain lighting standards from single manufacturer or producer][For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties]**.
 - 3. Standard Features:
 - a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
 - b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
 - c. General Finish Requirements:

- 1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
 - 2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.
- d. Species and Grades for Structural Laminated Timber: Complying with APA A190.1. Use **[Southern pine][Douglas fir][Alaska cedar][any species listed in APA 117]**, engineered and fabricated to withstand indicated structural loads without exceeding allowable design working stresses in accordance with **[APA 117][AWPA/ANSI O5.2]**.
- e. Features include **[wood bracket][wood crossarm][lighting standard-top adaptor]<Insert items>** for mounting luminaire(s), metal lighting standard cap, and concealed raceway path connected to access handhole.
- f. Mounting Provisions: **[Embedded]<Insert description of other mounting unless detailed on the Drawings>**.
- g. Appearance Grade: Architectural appearance grade complying with AITC 110.
- h. Preservative Treatment:
- 1) Exposure: Comply with **[AWPA U1, Use Category UC4A][AWPA U1, Use Category UC4B][AWPA U1, Use Category UC4C]**.
 - 2) Treatment after Dressing and End Cutting: Comply with AWPA M4 for surface cuts to a depth of more than **1/16 inch**.
- i. Adhesive: Wet-use type complying with ASTM D2559.
- j. End Sealer: Manufacturer's standard, transparent, colorless wood sealer that is effective in retarding the transmission of moisture at cross-grain cuts and is compatible with indicated finish.
- k. Penetrating Sealer: Manufacturer's standard, transparent, penetrating wood sealer that is compatible with indicated finish.
- l. Finish: **[Natural, unstained wood][Semitransparent stain applied after erection][Factory-applied semitransparent stain]**, color as selected by Architect.
4. Other Available Features Required by the Project:
- a. Fasteners: **[Stainless steel][Galvanized steel]<Insert finish or grade>**, size and type as determined by manufacturer. Corrosion-resistant items compatible with support components.
 - 1) Materials: Compatible with lighting standards as well as to substrates to which lighting standards are fastened and may not cause galvanic action at contact points.
 - 2) Anchor Bolts, Leveling Nuts, Bolt Caps, and Washers: Hot-dip galvanized after fabrication unless otherwise indicated.
- E. Wood Lighting Standard:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[American Pole & Timber]**
 - b. **[Baldwin Pole & Piling Co., Inc.]**
 - c. **[Bell Lumber and Pole Company]**
 - d. **[Cavawood Architectural Products]**
 - e. **[Cobb Lumber Company]**

- f. [Cox Utility Products Division]
 - g. [Guelph Utility Pole Co., Ltd.; a Stella-Jones company]
 - h. [Koppers Performance Chemicals]
 - i. [Langdale Forest Products Company]
 - j. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
 - k. [McFarland Cascade]
 - l. [Stella-Jones]
 - m. [T.R. Miller Mill Co., Inc.]
 - n. [Texas Electric Cooperatives, Inc.]
 - o. [Thomasson Company]
 - p. [TimberWood Products; J.H. Baxter & Co.]
 - q. [United Wood Treating Company]
 - r. [Wood Preservers, Inc.]
 - s. <Insert manufacturer's name>
2. Source Limitations: [Obtain lighting standards from single manufacturer or producer][For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties].
 3. Standard Features:
 - a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
 - b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
 - c. General Finish Requirements:
 - 1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
 - 2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.
 - d. [Douglas fir][Southern yellow pine], [machine trimmed by turning,] for wood species used; and bored, roofed, and grained before treatment.
 - 1) Pole Brand: Brand the manufacturer's trademark and date of treatment, height and class of lighting standard, wood species, preservation code, and retention. Brand must be placed so that the bottom of the brand is minimum **10 ft** from lighting standard butt.
 - 2) Mounting Provisions: Embedded.
 - e. Preservative Treatment: Treat in accordance with [AWPA U1, Use Category UC4A][AWPA U1, Use Category UC4B][AWPA U1, Use Category UC4C].
 - f. Luminaire Brackets: Comply with NEMA/ANSI C136.13.
 4. Other Available Features Required by the Project:
 - a. Fasteners: [Stainless steel][Galvanized steel]<Insert finish or grade>, size and type as determined by manufacturer. Corrosion-resistant items compatible with support components.
 - 1) Materials: Compatible with lighting standards as well as the substrates to which lighting standards are fastened and may not cause galvanic action at contact points.
 - 2) Anchor Bolts, Leveling Nuts, Bolt Caps, and Washers: Hot-dip galvanized after

fabrication unless otherwise indicated.

F. Prestressed Concrete Lighting Standard:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Baldwin Pole & Piling Co., Inc.]**
 - b. **[Holophane; an Acuity Brands company]**
 - c. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - d. **[Lonestar Prestress Mfg., Inc.]**
 - e. **[NOV Ameron]**
 - f. **[Pre-Cast Specialties, Inc.]**
 - g. **[Seminole Pole, Inc.]**
 - h. **[StressCrete Group]**
 - i. **<Insert manufacturer's name>**
2. Source Limitations: **[Obtain lighting standards from single manufacturer or producer][For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties]**.
3. Standard Features:
 - a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
 - b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
 - c. General Finish Requirements:
 - 1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
 - 2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.
 - d. Comply with ASTM C1089**[and manufactured by centrifugal spin-casting process][and manufactured by static-casting method]**.
 - 1) Shape: **[Round, tapered][Round, straight][Square, tapered][Square, straight]**.
 - 2) Mounting Provisions: **[Steel butt flange for bolted mounting to foundation or breakaway support][Embedded]**.
 - 3) Finishing: Capped at top and plugged at bottom. Seat each reinforcing strand with epoxy adhesive.
 - 4) Grounding: Continuous copper ground wire cast into lighting standard. Terminate at top of lighting standard**[and attach to 24 inch lighting rod]**.
 - 5) Raceway: Smooth, internal, and not less than **3 inch** in diameter.
 - e. Concrete: Minimum 28-day compressive strength of **[7000 psi]<Insert value>**.
 - f. Cured with wet steam and aged for a minimum of 15 days prior to installation.
 - g. Reinforcement: **[Reinforcing bars complying with ASTM A615/A615M][Cold-drawn spiral wire complying with ASTM A1064/A1064M][Prestressing strand, 270 K, complying with ASTM A416/A416M]**.
 - h. Surface Treatment: Hard, nonporous, and resistant to water, frost, and road and soil chemicals; and must have a maximum water-absorption rate of 3 percent.

- i. Finish Texture: **[Standard form][Polished exposed aggregate][Etched exposed aggregate]**.
- 1) Exposed aggregate must be of **<Insert aggregate type selected from manufacturers' lists>** type.
- j. Nameplate: Aluminum cast into lighting standard wall at approximately **5 ft** above ground line, listing name of manufacturer, the Project identifier, overall height, and approximate weight.
- k. Pole Brackets: Comply with NEMA/ANSI C136.31.
- 4. Other Available Features Required by the Project:
 - a. Fasteners: **[Stainless steel][Galvanized steel]<Insert finish or grade>**, size and type as determined by manufacturer. Compatible with lighting standards as well as the substrates to which lighting standards are fastened and may not cause galvanic action at contact points.

2.3 LIGHTING STANDARD ACCESSORIES

- A. Duplex Receptacle: Ground-fault circuit interrupter type, 120 V(ac), 20 A in a weatherproof assembly.
 - 1. **[Surface mounted][Recessed][12 inch]<Insert dimensions>** above finished grade.
 - a. UL 50E, **[Type 3R][Type 4X]**, nonmetallic polycarbonate plastic or reinforced fiberglass, enclosure with cover; color to match pole.
 - b. Lockable hasp and latch complying with OSHA lockout and tag-out requirements.
- B. Minimum 1800 W transformer, protected by replaceable fuses, mounted behind access cover.
- C. Base Covers: Manufacturers' standard metal units, finished same as pole, and arranged to cover pole's mounting bolts and nuts.
- D. Transformer-Type Base: Same material and color as pole. Coordinate dimensions to suit pole's base flange and to accept **[ballast(s)][indicated accessories]**. Include removable flanged access cover secured with bolts or screws.
- E. Decorative accessories, supplied by decorative pole manufacturer, include the following:
 - 1. Banner Arms: **<Insert material>**.
 - 2. Flag Holders: **<Insert material>**.
 - 3. Ladder Rests: **<Insert material>**.
- F. Lowering System for Luminaires:
 - 1. System Description: Capable of lowering luminaire **[assembly]** to a service position within **36 inch** of finished grade in winds up to **30 mile/h**. Provide manual plug connection to electrical power accessible in lowered position. Assembled system of pole, luminaire, and lowering device must be capable of loads specified in "Performance Requirements" Article.
 - 2. Compatibility of Material: Materials for attachment and connection of luminaire-mounting assembly, lowering device, lowering cable, and portable winch must be compatible to avoid corrosion and electrolysis.
 - 3. Structural and Mechanical Design Safety Factor: 5.0, minimum, for static and dynamic loads of

- load-bearing components, including cable.
4. Luminaire-Mounting and Disconnect Arrangement: Multiple **[ring][carriage]**-mounted luminaires, arranged for lowering and rising as a group.
 - a. Electrical cable for normal operating power to luminaires must manually disconnect inside pole base, using weatherproof multi-pin connector, and must be arranged to move within the pole during lowering and rising of luminaire assembly.
 - b. Electrical cable for normal operating power to luminaires must automatically disconnect at weatherproof multi-pin connector within the pole-top lowering head at the beginning of the lowering cycle and reconnect when luminaire or luminaire assembly is raised to the operating position.
 5. Lowering Device: Weatherproof, cast-aluminum housing, and multiple mechanical latches. Moving parts of latching assembly must be located in the portion of the unit that is lowered to servicing position. Positive latching in the operating position must be indicated to the operator at the base of the pole by a clear visual signal or by other means acceptable to Owner or authorities having jurisdiction.
 6. Lowering Cable: **[Zinc-electroplated-steel][or][stainless steel]** aircraft cable.
 7. Portable Winch: **[Manual][120 V electric]** type. **[One]<Insert number>** required.
 - a. Winch Power Connection: Cord and plug.
 - b. Winch Raise-Lower Control: Remote-control station with **[15 ft]<Insert dimension>** of cable.

G. Mounting Hardware:

1. Anchor Bolts: Manufactured **[to ASTM F1554, Grade 55,]**with a minimum yield strength of **55,000 psi**.
 - a. Galvanizing: **[Hot-dip galvanized in accordance with ASTM A153/A153M, Class C][Mechanically deposited galvanization in accordance with ASTM B695, Class 50]**.
 - b. **[Bent][Headed]** rods **<Insert dimension>** in diameter by **<Insert dimension>** in length.
 - c. Threading: **[Uniform National Coarse][Uniform National 8]**, Class 2A.
2. Nuts: ASTM A563/A563M, Grade A, Heavy-Hex.
 - a. Galvanizing: **[Hot-dip galvanized in accordance with ASTM A153/A153M, Class C][Mechanically deposited galvanization in accordance with ASTM B695, Class 50]**.
 - b. **[Two][Four]<Insert number>** nuts provided per anchor bolt, **shipped with nuts preassembled to the anchor bolts**.
3. Washers: ASTM F436/F436M, Type 1.
 - a. Galvanizing: **[Hot-dip galvanized in accordance with ASTM A153/A153M, Class C][Mechanically deposited galvanization in accordance with ASTM B695, Class 50]**.
 - b. **[One][Two]<Insert number>** washer(s) provided per anchor bolt.

2.4 UTILITY POLES

A. Wood Utility Pole:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. [Ace Pole Company]
 - b. [Baxter, J. H. & Co]
 - c. [Bell Lumber and Pole Company]
 - d. [Brown Wood Preserving Co., Inc.]
 - e. [Dayton Superior Corporation]
 - f. [Koppers Performance Chemicals]
 - g. [McFarland Cascade]
 - h. <Insert manufacturer's name>
 2. Source Limitations: [Obtain poles from single manufacturer or producer][For poles, obtain each color, grade, finish, type, and variety of pole from single source with resources to provide products of consistent quality in appearance and physical properties].
 3. Standard Features:
 - a. Comply with ATIS O5.1 and RUS Bulletin 1728F-700, for wood poles pressure treated with [creosote][pentachlorophenol][ammoniacal copper arsenate][ammoniacal copper zinc arsenate][and][chromated copper arsenate].
 - b. Wood Species: [Douglas fir][Lodgepole pine][Western larch][Southern yellow pine]<Insert wood species selected from ATIS O5.1>.
 - c. Pole Marking:
 - 1) Manufacturer's Mark: Comply with ATIS O5.1; locate **10 ft** from the pole butt for poles **50 ft** long or less.
 - 2) Pole Number: Machine-embossed aluminum, alphanumeric characters not less than **2-1/2 inch** high, with aluminum nails.
 - d. Factory Operations: Machine trim poles by turning smooth, full length. Roof, gain, and bore poles before pressure treatment.
- B. Concrete Utility Pole:
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Accord Industries]
 - b. [Bayshore Concrete Products Corporation]
 - c. [CPI Concrete Products]
 - d. [StressCrete Group]
 - e. [Valmont Industries, Inc.]
 - f. <Insert manufacturer's name>
 2. Source Limitations: [Obtain poles from single manufacturer or producer][For poles, obtain each color, grade, finish, type, and variety of pole from single source with resources to provide products of consistent quality in appearance and physical properties].
 3. Standard Features:
 - a. Spun-cast prestressed concrete, complying with requirements of ASTM C1089.
 - 1) Comply with requirements of RUS Bulletin 1724E-216.
 - b. Design: Base design on calculation of strength required by IEEE C2 or indicated on the Drawings, whichever is greater. Design must be suitable for installation at a location where annual temperature range is between [minus 4 deg F and plus 100 deg F]<Insert design

- temperature range at site location**>. Include pole design for embedded attachments matching fittings, brackets, and other items installed in the field.
- c. Shaft: Hollow, for poles at overhead-to-underground connections. Provide metric designator 91 (trade size 3-1/2) minimum cable raceway capacity, with **[conduit elbow][cable entry port]** at base.
 - d. Water Absorption: Not more than 3 percent.
 - e. Surface: Smooth, hard, nonporous, and resistant to **[soil acids][road salts][frost and freezing damage]**.
 - f. Pole Marking:
 - 1) Manufacturer's Mark: Comply with ATIS O5.1; locate **10 ft** from the pole butt for poles **50 ft** long or less.
 - 2) Pole Number: Machine-embossed aluminum, alphanumeric characters not less than **2-1/2 inch** high.

2.5 UTILITY POLE ACCESSORIES

A. Crossarms:

- 1. Description: **[Solid-wood distribution type, complying with RUS Bulletin 1728H-701 for specified construction grade][Galvanized, steel angles]**, and complying with IEEE C2 for required climbing space and wire clearances.
- 2. Braces: Galvanized, flat, ferrous-metal units; **1/4 inch** thick by **1-1/4 inch** wide, minimum, with length to suit crossarm dimensions.

B. Guys and Anchors:

- 1. Guy Strand Assemblies: Cable and attachment assemblies must have uniform minimum breaking strength of the cable.
 - a. Cable: Seven strands. **[Zinc-coated steel, complying with ASTM A475][Aluminum-clad steel, complying with ASTM B416][Copper-clad steel, complying with ASTM B228]**. Breaking strength must be not less than **[10,000 lb]<Insert value>**.
 - b. Cable Termination:
 - 1) Thimble eye.
 - 2) Hooks and guy strain plates, complying with IEEE C135.1.
 - 3) Preformed galvanized-steel guy grips, matching material, galvanizing, and strength of the guy strand assembly.
- 2. Anchor and Anchor-Rod Assemblies: Hot-dip galvanized steel.
 - a. Power-installed, screw-type anchors.
 - 1) **15 inch** screw; with rod **8 ft** long by **1-1/2 inch** in diameter. Rated at **10,000 lb** when installed.
 - 2) Guy anchors must have strength and holding area as required for anchor load and soil conditions at location of that anchor.
 - b. **<Insert anchor size or type>**.
- 3. Strain Insulators: Epoxy-bonded fiberglass of length to meet clearance requirements specified in "Installation of Guys and Anchors" Subparagraph in "Installation of Utility Poles" Article.
- 4. Guy Markers: Round, of vinyl or PVC material, **[white][yellow]** color, **8 ft** long. Shatter resistant at temperatures below **0 deg F**.

PART 3 - EXECUTION

3.1 INSTALLATION OF FOUNDATIONS FOR POLES AND LIGHTING STANDARDS

- A. Concrete Pole Foundations: Cast in place, with anchor bolts to match pole-base flange. Structural steel complying with ASTM A36/A36M and hot-dip galvanized in accordance with ASTM A123/A123M; and with top-plate and mounting bolts to match pole-base flange and strength required to support pole, luminaire, and accessories. Concrete, reinforcement, and formwork are specified in Section 033000 "Cast-in-Place Concrete."
- B. Precast Foundations: Factory fabricated, with structural steel complying with ASTM A36/A36M and hot-dip galvanized in accordance with ASTM A123/A123M; and with top-plate and mounting bolts to match pole-base flange and strength required to support pole, luminaire, and accessories. Concrete, reinforcement, and formwork are specified in Section 033000 "Cast-in-Place Concrete."
- C. Power-Installed Screw Foundations: Factory fabricated by pole manufacturer, with structural steel complying with ASTM A36/A36M and hot-dip galvanized in accordance with ASTM A123/A123M; and with top-plate and mounting bolts to match pole-base flange and strength required to support pole, luminaire, and accessories.
 - 1. Baseplate: Stamped with manufacturer's name, date of production, and cable entry.
- D. Direct-Buried Foundations: Install to depth indicated on the Drawings, but not less than **[one-sixth of pole height][as indicated]**. Add backfill **[in 6 to 9 inch layers, tamping each layer before adding the next][as indicated on the Drawings]**<Insert requirement>. To ensure a plumb installation, continuously check pole orientation with plumb bob while tamping.
- E. Direct-Buried Poles with Concrete Backfill: Set poles in augered holes to depth below finished grade indicated on the Drawings, but not less than **[one-sixth of pole height][as indicated]**. To ensure a plumb installation, continuously check pole orientation with plumb bob while tamping.
 - 1. Make holes **6 inch** in diameter larger than pole diameter.
 - 2. Fill augered hole around pole with air-entrained concrete having a minimum compressive strength of **3000 psi** at 28 days and finish in a dome above finished grade.
 - 3. Use a short piece of **1/2 inch** diameter pipe to make a drain hole through grout. Arrange to drain condensation from interior of pole.
 - 4. Cure concrete a minimum of 72 hours before performing work on pole.
- F. Anchor Bolts: Install plumb using manufacturer-supplied **[steel][plywood]** template, uniformly spaced.

3.2 INSTALLATION OF LIGHTING STANDARDS

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturers' published instructions, comply with the following:
 - 1. Electrical Construction: NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Safety: NFPA 70E.
 - 3. Hot Work: NFPA 51B.
 - 4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 5. Consult Architect for resolution of conflicting requirements.

**C. Special Installation Techniques:**

1. Alignment: **[Align foundations and lighting standards for optimum directional alignment of luminaires and their mounting provisions on lighting standards][Align lighting standards as indicated]**.
2. Clearances: Maintain the following minimum horizontal distances of lighting standards from surface and underground features unless otherwise indicated on the Drawings:
 - a. Fire Hydrants and Water Piping: **[60 inch]<Insert dimension>**.
 - b. Water, Gas, Electric, Communications, and Sewer Lines: **[10 ft]<Insert dimension>**.
 - c. Trees: **15 ft** from tree trunk.
 - d. **<Insert features and clearance dimensions>**.
3. Concrete Lighting Standard Foundations: Set anchor bolts in accordance with anchor-bolt templates furnished by manufacturer. Concrete materials, installation, and finishing requirements are specified in Section 033000 "Cast-in-Place Concrete."
4. Foundation-Mounted Lighting Standards: Mount lighting standards with leveling nuts and tighten top nuts to torque level in accordance with manufacturer's published instructions.
 - a. Use anchor bolts and nuts selected to resist seismic forces specified for the application and approved by manufacturer.
 - b. Grout void between lighting standard base and foundation. Use nonshrink or expanding concrete grout firmly packed to fill space.
 - c. Install base covers unless otherwise indicated.
 - d. Use a short piece of **1/2 inch** diameter pipe to make a drain hole through grout. Arrange to drain condensation from interior of lighting standard.
5. Lighting Standards and Foundations Set in Concrete-Paved Areas: Install lighting standards with a minimum **6 inch** wide, unpaved gap between the lighting standard or foundation and the edge of the adjacent concrete slab. Fill unpaved ring with pea gravel. Insert material to a level **1 inch** below top of concrete slab.
6. Raise and set lighting standard using web fabric slings (not chain or cable) at locations indicated by manufacturer.
7. Corrosion Prevention:
 - a. Aluminum: Do not use in contact with earth or concrete. When in direct contact with a dissimilar metal, protect aluminum using insulating fittings or treatment.
 - b. Steel Conduits: Comply with requirements in Section 260533.13 "Conduits for Electrical Systems." In concrete foundations, wrap conduit with **0.010 inch** thick, pipe-wrapping plastic tape applied with a 50 percent overlap.

D. Interfaces with Other Work:

1. Grounding and Bonding: Bond metallic components of lighting standards and support structures as follows:
 - a. Provide insulated equipment grounding conductors with supply feeders for bonding luminaires and other pole-mounted electrical or electronic equipment to ground terminals of their supplying power sources in accordance with Article 250 of NFPA 70.
 - b. Bond metallic components of luminaires, pole accessories, and foundation to insulated equipment grounding conductor.
2. Identification: Provide labels for lighting standards, components, wiring, cabling, terminals, and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.

- b. Label each enclosure with engraved metal or laminated-plastic nameplate.
- c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.

3.3 INSTALLATION OF UTILITY POLES

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturers' published instructions, comply with the following:
 - 1. Electrical Construction: **[IEEE C2][NFPA 70 and NECA NEIS 1]**.
 - 2. Electrical Safety: NFPA 70E.
 - 3. Hot Work: NFPA 51B.
 - 4. Grounding and Bonding: **[IEEE C2][NECA NEIS 331 and Article 250 of NFPA 70]**.
 - 5. Communications Work: BICSI N1.
 - 6. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
 - 1. Engage the services of a licensed surveyor to verify dimensions by field measurement, to identify locations of poles, anchors, and other features, and to verify all clearances. The survey document must also identify locations of connections to new and existing supply lines and to primary and secondary services. Notify Architect of discrepancies and field conditions that are not indicated and that will affect installation.
 - 2. Pole Orientation: Align curve of curved wood poles with straight-line runs of three or more poles. Align gained surfaces perpendicular to runs.
 - 3. Elevation of Line above Grade: Install poles with top at same elevation, unless grade changes dictate elevation change in poles, and in accordance with the following:
 - a. On level ground, set poles so tops of consecutive poles vary not more than **60 inch** in elevation.
 - b. Shorten wood poles by cutting off the top and make cuts to shed water. Apply preservative to cuts.
 - 4. Set poles in accordance with the following:
 - a. Make pole holes vertical, uniform in diameter, and large enough to permit effective use of tamping bars all around. Bore or excavate holes with an average diameter at grade less than twice the diameter of the pole at the same grade.
 - b. Use minimum depths indicated, except at locations where hole is partly or entirely in rock and if hole is not vertical or has a diameter at grade more than two times the pole diameter at the same level; in these conditions, increase the depth of the hole by the following increments before setting the pole:
 - 1) Poles up to 35 ft (10.6 m) Long: **24 inch**.
 - 2) Poles 36 to 60 ft (11 to 18.3 m) Long: **30 inch**.
 - 3) Poles 61 to 75 ft (18.6 to 22.9 m) Long: **36 inch**.
 - c. For poles on slopes, indicated hole depth is from finished grade at lowest side of hole.
 - d. Set poles in alignment and plumb except at dead ends, angles, and points of extra strain; rake poles against conductor strain **1 inch** minimum, **2 inch** maximum, (after conductors are installed at required tension) for each **10 ft** of pole length. Rake poles so they will not lean or bend in direction of strain when loaded.
 - e. Backfill holes in **6 inch** maximum lifts, and thoroughly tamp each layer before starting the

- next.
- f. Place surplus earth around pole in a conical shape, and tamp thoroughly to provide drainage away from pole.
 - g. Set poles so alternate crossarm gains face in alternate directions, except at terminals and dead ends; place gains on last two poles on side facing terminal or dead end.
 - h. Poles Set in Concrete Paved Areas: Install poles with minimum of **6 inch** wide, unpaved gap between the pole and the edge of adjacent concrete slab. Fill unpaved ring with **[pea gravel]**<Insert appropriate material> to a level **1 inch** below top of concrete slab.
5. Field treat factory-treated poles and crossarms as follows:
- a. Poles Treated More Than One Year before Installation: Treat portion from **24 inch** above ground line to butt.
 - b. Field-Bored Holes and Field-Cut Gains and Pole Tops: Treat cut portions.
 - c. Unused Holes: Treat and plug with treated-wood-dowel drive pins.
 - d. Engage the services of qualified wood pole and crossarm treatment technician to apply treatment. Comply with requirements in AWWPA standards that govern original factory treatment for field-applied treatment and application of chemicals.
6. Installation of Crossarms: Set line crossarms at right angle to line for straight runs and for angles 45 degrees and more. Bisect angles less than 45 degrees.
- a. Buck Arms: Install at corners and junction poles unless otherwise indicated.
 - b. Double Crossarms: Install at dead ends, corners, angles, and line crossings.
 - c. Equipment Arms: Locate below lines and set parallel or at right angles to them, whichever provides best climbing space.
 - d. Gains: Install factory-cut or metal-pole gains only. Do not cut gains in field without specific written approval.
7. Installation of Guys and Anchors:
- a. Install guys to resist unbalanced loads, including those developed at angles, corners, and dead ends. Install two or more guys if a single guy will not provide adequate strength. Install separate guys if unbalanced loads are separated by **36 inch** or more. Comply with IEEE C2.
 - 1) Unless a thimble eye is used, at the pole end, install a minimum of two guy hooks and two guy strain plates.
 - 2) At the anchor end, attach guy strand assembly with preformed grips.
 - b. Protect guy strands from damage. Replace damaged guy strands. Install guy insulators where required to comply with IEEE C2 clearance requirements.
 - c. Install guys with a lead-to-height ratio of 1 to 1 unless otherwise indicated. The minimum lead-to-height ratio must be 1/2 to 1. When less than 1 to 1, increase guy strength by the ratio of the sine of the lead angle indicated to the sine of the lead angle provided.
 - d. Install screw-type guy anchors aligned in soil with guy. Set with anchor rod pointing at guy attachment on pole and rod projecting **6 to 9 inch** from ground.
 - e. Install strain insulators to provide a minimum of **12 inch** of clearance between the nearest energized surface and the strain insulator fitting farthest from the pole. When loaded to the tension indicated, fiberglass strain insulators must be loaded to not more than two-thirds of manufacturer's published rating.
8. Guy Markers: Install at anchor end of guys to visually mark the guy wire at all accessible locations. Clamp to guy strand or anchor at top and bottom of marker.

D. Interfaces with Other Work:

1. Grounding and Bonding:
 - a. Comply with [IEEE C2][NFPA 70] grounding and bonding requirements.
 - b. Ground Rods: [Copper-clad][Zinc-coated][Stainless] steel[, sectional type]; [3/4 inch by 10 ft][5/8 inch by 8 ft].
 - 1) Install [two]<Insert number> parallel ground rods if resistance to ground by a single, ground-rod electrode exceeds 25 Ω.
 - 2) Drive ground rods until tops are **12 inch** below finished grade in undisturbed earth.
 - c. Grounding (Earthing) Conductors:
 - 1) 4 AWG minimum, soft-drawn copper.
 - 2) Conductor Protectors for Wood Poles: Half-round PVC or wood molding; if wood, use pressure-treated fir, cypress, or cedar. Protect grounding conductors running on surface of wood poles with molding extended from grade level up to and through communications service and transformer spaces.
 - 3) Ground-Rod Connections: Install bolted connectors for underground connections and connections to rods.
 - 4) Lightning Arrester Grounding Conductors: Separate from other grounding conductors.
 - d. Bonding Conductors: Provide equipment grounding conductors with supply feeders for bonding pole-mounted electrical and electronic equipment to ground terminals of their supplying power sources in accordance with Article 250 of NFPA 70.
2. Identification: Provide labels for poles, components, wiring, cabling, terminals, and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - d. Locate pole numbers to provide maximum visibility from the road or patrol route.

3.4 FIELD QUALITY CONTROL

- A. Adminstrant for Electrical Power Tests and Inspections:
 1. [Owner][Tenant] will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].
- B. Acceptance Testing Preparation:
 1. <Insert requirements>.
- C. Field tests and inspections must be witnessed by [Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>.

D. Tests and Inspections:

1. Inspect poles for nicks, mars, dents, scratches, and other damage.
2. System function tests.
3. Guy Anchors: Test one of each type and capacity installed[, **plus additional units specifically indicated for testing**]. Apply rated pull-out force in the same pull direction applied by the guy at the test location.
 - a. Acceptable Test Results: Denoted by movement of less than **3/8 inch** by the holding component of the anchor in the earth or other medium in which it is installed.
 - b. Replace or reinstall, at Architect's option, all anchors of same type and capacity as anchor type that fails this test.
4. Pole Ground Resistance: Measure resistance of each separate grounding electrode, including pole grounds. Also measure resistance of separate grounding electrode systems before bonding together.
 - a. Perform tests and obtain acceptable results before energizing any portion of overhead electrical distribution system.
 - b. Results and Follow-up: If ground resistance for a single ground electrode or pole ground, tested individually, exceeds 25 Ω , add a ground electrode not less than **10 ft** away and interconnect with 2 AWG, minimum, bare conductor buried at least **12 inch** below furnished grade.
5. **<Insert special inspections>**.

E. Nonconforming Work:

1. Unit will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

G. Manufacturer Services: Engage factory-authorized service representative to [**support**][**supervise**] field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

7. Cable ties.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 284600 "Fire Detection and Alarm"[**and Section 284614 "Single- and Multiple-Station Alarms"**] specifies fire detection and alarm devices referenced in this Section.

1.2 ACTION SUBMITTALS

- A. Product Data: For each type of product.
- B. Samples: For each type of label and sign to illustrate composition, size, colors, lettering style, mounting provisions, and graphic features of identification products.
- C. Identification Schedule: For each piece of electrical equipment and electrical system components to be index of nomenclature for electrical equipment and system components used in identification signs and labels. Use same designations indicated on Drawings.

PART 2 - PRODUCTS

2.1 LABELS

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
2. Listing Criteria: UL CCN PGDQ2 for components; including UL 969.

- B. UL PGDQ2 - Vinyl Wraparound Labels: Preprinted, flexible labels laminated with clear, weather- and chemical-resistant coating and matching wraparound clear adhesive tape for securing label ends.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Brady Corporation]**
 - b. **[Champion America]**
 - c. **[emedco]**
 - d. **[Grafoplast Wire Markers]**
 - e. **[HellermannTyton]**
 - f. **[LEM Products Inc.]**
 - g. **[Marking Services Inc.]**
 - h. **[Panduit Corp]**
 - i. **[Seton Identification Products; a Brady Corporation company]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Brady Corporation]**
 - b. **[Champion America]**
 - c. **[emedco]**
 - d. **[Grafoplast Wire Markers]**
 - e. **[HellermannTyton]**
 - f. **[LEM Products Inc.]**
 - g. **[Marking Services Inc.]**
 - h. **[Panduit Corp]**
 - i. **[Seton Identification Products; a Brady Corporation company]**
 - j. **<Insert manufacturer's name>**

- C. UL PGDQ2 - Self-Adhesive Wraparound Labels: **[Preprinted][Write-on]**, **3 mil (0.08 mm)** thick, **[polyester][vinyl]** flexible label with acrylic pressure-sensitive adhesive.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[A'n D Cable Products]**
 - b. **[Brady Corporation]**
 - c. **[Brother International Corporation]**
 - d. **[emedco]**
 - e. **[Grafoplast Wire Markers]**
 - f. **[Ideal Industries, Inc.]**
 - g. **[LEM Products Inc.]**
 - h. **[Marking Services Inc.]**
 - i. **[Panduit Corp]**
 - j. **[Seton Identification Products; a Brady Corporation company]**
 - k. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[A'n D Cable Products]**
 - b. **[Brady Corporation]**
 - c. **[Brother International Corporation]**
 - d. **[emedco]**
 - e. **[Grafoplast Wire Markers]**
 - f. **[Ideal Industries, Inc.]**
 - g. **[LEM Products Inc.]**
 - h. **[Marking Services Inc.]**
 - i. **[Panduit Corp]**
 - j. **[Seton Identification Products; a Brady Corporation company]**
 - k. **<Insert manufacturer's name>**
3. Self-Lamination: Clear; UV-, weather-, and chemical-resistant; self-laminating, with protective shield over legend. Size labels such that clear shield overlaps entire printed legend.
 4. Marker for Labels:
 - a. Permanent, waterproof, black ink marker recommended by tag manufacturer.
 - b. Machine-printed, permanent, waterproof, black ink recommended by printer manufacturer.
- D. UL PGDQ2 - Self-Adhesive Labels: **[Polyester][Vinyl]**, thermal, transfer-printed, **3 mil (0.08 mm)** thick, multicolor, weather- and UV-resistant, pressure-sensitive adhesive labels, configured for intended use and location.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[A'n D Cable Products]**
 - b. **[Brady Corporation]**
 - c. **[Brother International Corporation]**
 - d. **[emedco]**
 - e. **[Grafoplast Wire Markers]**
 - f. **[HellermannTyton]**
 - g. **[Ideal Industries, Inc.]**
 - h. **[LEM Products Inc.]**
 - i. **[Marking Services Inc.]**
 - j. **[Panduit Corp]**
 - k. **[Seton Identification Products; a Brady Corporation company]**
 - l. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[A'n D Cable Products]**
 - b. **[Brady Corporation]**
 - c. **[Brother International Corporation]**
 - d. **[emedco]**
 - e. **[Grafoplast Wire Markers]**
 - f. **[HellermannTyton]**
 - g. **[Ideal Industries, Inc.]**
 - h. **[LEM Products Inc.]**

- i. [Marking Services Inc.]
- j. [Panduit Corp]
- k. [Seton Identification Products; a Brady Corporation company]
- l. <Insert manufacturer's name>

3. Minimum Nominal Size:

- a. 1-1/2 by 6 inch (37 by 150 mm) for raceway and conductors.
- b. 3-1/2 by 5 inch (76 by 127 mm) for equipment.
- c. As required by authorities having jurisdiction.

2.2 EXTRUDED INSULATING TUBING

A. Performance Criteria:

- 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- 2. Listing Criteria: UL CCN YDPU2 for components; including UL 224.

B. UL YDPU2 - Heat-Shrink Preprinted Tubes: Flame-retardant polyolefin tubes with machine-printed identification labels, sized to suit diameter and shrunk to fit firmly. Full shrink recovery occurs at maximum of **200 deg F (93 deg C)**.

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [Brady Corporation]
 - b. [Panduit Corp]
 - c. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. [Brady Corporation]
 - b. [Panduit Corp]
 - c. <Insert manufacturer's name>

2.3 BANDS

A. Snap-Around Labels: Slit, pretensioned, flexible, preprinted, color-coded acrylic sleeves, with diameters sized to suit diameters and that stay in place by gripping action.

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [Brady Corporation]

- b. **[HellermannTyton]**
 - c. **[Marking Services Inc.]**
 - d. **[Panduit Corp]**
 - e. **[Seton Identification Products; a Brady Corporation company]**
 - f. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Brady Corporation]**
 - b. **[HellermannTyton]**
 - c. **[Marking Services Inc.]**
 - d. **[Panduit Corp]**
 - e. **[Seton Identification Products; a Brady Corporation company]**
 - f. **<Insert manufacturer's name>**
- B. Snap-Around, Color-Coding Bands: Slit, pretensioned, flexible, solid-colored acrylic sleeves, **2 inch (50 mm)** long, with diameters sized to suit diameters and that stay in place by gripping action.
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Brady Corporation]**
 - b. **[HellermannTyton]**
 - c. **[Marking Services Inc.]**
 - d. **[Panduit Corp]**
 - e. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Brady Corporation]**
 - b. **[HellermannTyton]**
 - c. **[Marking Services Inc.]**
 - d. **[Panduit Corp]**
 - e. **<Insert manufacturer's name>**

2.4 TAPES AND STENCILS

- A. Marker Tapes: Vinyl or vinyl-cloth, self-adhesive wraparound type, with circuit identification legend machine printed by thermal transfer or equivalent process.
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[Champion America]**
 - d. **[HellermannTyton]**

- e. [Ideal Industries, Inc.]
 - f. [Marking Services Inc.]
 - g. [Panduit Corp]
 - h. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Brady Corporation]
 - b. [Carlton Industries, LP]
 - c. [Champion America]
 - d. [HellermannTyton]
 - e. [Ideal Industries, Inc.]
 - f. [Marking Services Inc.]
 - g. [Panduit Corp]
 - h. <Insert manufacturer's name>
- B. Self-Adhesive Vinyl Tape: Colored, heavy duty, waterproof, fade resistant; not less than **3 mil (0.08 mm)** thick by **1 to 2 inch (25 to 50 mm)** wide; compounded for outdoor use.
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Brady Corporation]
 - b. [Carlton Industries, LP]
 - c. [emedco]
 - d. [Marking Services Inc.]
 - e. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Brady Corporation]
 - b. [Carlton Industries, LP]
 - c. [emedco]
 - d. [Marking Services Inc.]
 - e. <Insert manufacturer's name>
- C. Tape and Stencil: **4 inch (100 mm)** wide black stripes on **10 inch (250 mm)** centers placed diagonally over orange background and are **12 inch (300 mm)** wide. Stop stripes at legends.
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [HellermannTyton]
 - b. [LEM Products Inc.]
 - c. [Marking Services Inc.]
 - d. [Pipemarker.com; Brimar Industries, Inc.]
 - e. [Seton Identification Products; a Brady Corporation company]

- f. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [HellermannTyton]
 - b. [LEM Products Inc.]
 - c. [Marking Services Inc.]
 - d. [Pipemarker.com; Brimar Industries, Inc.]
 - e. [Seton Identification Products; a Brady Corporation company]
 - f. <Insert manufacturer's name>
- D. Floor Marking Tape: 2 inch (50 mm) wide, 5 mil (0.125 mm) pressure-sensitive vinyl tape, with [black and white][yellow and black] stripes and clear vinyl overlay.
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Brady Corporation]
 - b. [Carlton Industries, LP]
 - c. [Seton Identification Products; a Brady Corporation company]
 - d. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Brady Corporation]
 - b. [Carlton Industries, LP]
 - c. [Seton Identification Products; a Brady Corporation company]
 - d. <Insert manufacturer's name>
- E. Underground-Line Warning Tape:
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Brady Corporation]
 - b. [Ideal Industries, Inc.]
 - c. [LEM Products Inc.]
 - d. [Marking Services Inc.]
 - e. [Pipemarker.com; Brimar Industries, Inc.]
 - f. [Reef Industries, Inc.]
 - g. [Seton Identification Products; a Brady Corporation company]
 - h. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Brady Corporation]

- b. [Ideal Industries, Inc.]
 - c. [LEM Products Inc.]
 - d. [Marking Services Inc.]
 - e. [Pipemarker.com; Brimar Industries, Inc.]
 - f. [Reef Industries, Inc.]
 - g. [Seton Identification Products; a Brady Corporation company]
 - h. <Insert manufacturer's name>
3. Tape:
- a. Recommended by manufacturer for method of installation and suitable to identify and locate underground electrical **[and communications]** utility lines.
 - b. Printing on tape must be permanent and may not be damaged by burial operations.
 - c. Tape material and ink must be chemically inert and not be subject to degradation when exposed to acids, alkalis, and other destructive substances commonly found in soils.
4. Color and Printing:
- a. Comply with APWA Uniform Color Code using NEMA Z535.1 safety colors.
 - b. Inscriptions for Red Tapes: **["CAUTION BURIED ELECTRIC LINE BELOW"]<Insert inscription>**.
 - c. Inscriptions for Orange Tapes: **["CAUTION BURIED CATV LINE BELOW"]**["CAUTION BURIED TELEPHONE LINE BELOW"]**["CAUTION BURIED FIBER OPTIC LINE BELOW"]**["CAUTION BURIED COMMUNICATION LINE BELOW"]<Insert inscription>****.****
5. Nonconducting Line-Warning Tape :
- a. Pigmented polyolefin, bright colored, **[continuous-printed on one side with inscription of utility]**, compounded for direct-burial service.
 - b. Width: **3 inch (75 mm)**.
 - c. Thickness: **4 mil (0.1 mm)**.
 - d. Weight: **18.5 lb/1000 sq. ft (9.0 kg/100 sq. m)**.
 - e. Tensile in accordance with ASTM D882: **30 lbf (133.4 N) and 2500 psi (17.2 MPa)**.
6. Reinforced Nonconducting Line-Warning Tape :
- a. Multilayer laminate, consisting of high-density polyethylene scrim coated with pigmented polyolefin; bright colored, **[continuous-printed on one side with inscription of utility]**, compounded for direct-burial service.
 - b. Width: **3 inch (75 mm)**.
 - c. Thickness: **12 mil (0.3 mm)**.
 - d. Weight: **36.1 lb/1000 sq. ft (17.6 kg/100 sq. m)**.
 - e. Tensile in accordance with ASTM D882: **400 lbf (1780 N) and 11,500 psi (79.2 MPa)**.
7. Detectable Line-Warning Tape :
- a. Detectable three-layer laminate, consisting of printed pigmented polyolefin film, solid aluminum-foil core, and clear protective film that allows inspection of continuity of conductive core; bright colored, **[continuous-printed on one side with inscription of utility]**, compounded for direct-burial service.
 - b. Width: **3 inch (75 mm)**.
 - c. Overall Thickness: **5 mil (0.125 mm)**.
 - d. Foil Core Thickness: **0.35 mil (8.9 m)**.
 - e. Weight: **28 lb/1000 sq. ft (13.7 kg/100 sq. m)**.
 - f. Tensile in accordance with ASTM D882: **70 lbf (311.3 N) and 4600 psi (31.7 MPa)**.

**8. Reinforced Detectable Line-Warning Tape :**

- a. Reinforced, detectable three-layer laminate, consisting of printed pigmented woven scrim, solid aluminum-foil core, and clear protective film that allows inspection of continuity of conductive core; bright-colored, **[continuous-printed on one side with inscription of utility]**, compounded for direct-burial service.
- b. Width: **3 inch (75 mm)**.
- c. Overall Thickness: **8 mil (0.2 mm)**.
- d. Foil Core Thickness: **0.35 mil (8.9 m)**.
- e. Weight: **34 lb/1000 sq. ft (16.6 kg/100 sq. m)**.
- f. Tensile in accordance with ASTM D882: **300 lbf (1334 N) and 12,500 psi (86.1 MPa)**.

F. Concrete Cable Route Markers :

- 1. Description: Concrete markers visually aid tracing the route of electrical cables. Monument markers are typically installed at grade. Protective cover markers are typically installed above the cables at grade or below grade.
- 2. Product Characteristics:

- a. Material: Precast reinforced concrete.
- b. Marker Type:
 - 1) Above-Ground Monument Post:
 - a) Nominal Dimensions (Height, Width, Depth): **30 inch (760 mm), 6 inch (150 mm), 3 inch (75 mm)**.
 - 2) Above-Ground Monument Block:
 - a) Nominal Dimensions (Height, Width, Depth): **[12 inch (300 mm), 12 inch (300 mm), 6 inch (150 mm)][24 inch (600 mm), 24 inch (600 mm), 4 inch (100 mm)]**.
 - 3) In-Ground Protective Cover (Plank or Slab):
 - a) Nominal Dimensions (Length, Width, Depth): **[36 inch (914 mm), 6 inch (150 mm), 2 inch (50 mm)][36 inch (914 mm), 9 inch (230 mm), 2 inch (50 mm)][12 inch (305 mm), 12 inch (305 mm), 2 inch (50 mm)][24 inch (610 mm), 12 inch (305 mm), 2 inch (50 mm)][36 inch (914 mm), 12 inch (305 mm), 2 inch (50 mm)]**.
- c. Legend: **["DANGER - ELECTRICITY"]["ELECTRIC CABLES"]["ELECTRIC SPLICE"]**.
- d. Lettering: Approximately **1/8 inch (3 mm)** deep, not less than **[1 inch (25 mm)][1.5 inch (38 mm)]** high, symmetrically spaced; marked on both sides to allow for reversal.

3. Required Product Options:

- a. Color: **[Red]<Insert color>** dye added to concrete during batching.
- b. Attach metal medallion or sign stamped with **[feeder number]<Insert required information>**.

- G. Stenciled Legend: In nonfading, waterproof, **[black]<Insert color>** ink or paint. Minimum letter height must be **[1 inch (25 mm)]<Insert dimension>**.

2.5 TAGS

- A. Metal Tags: Brass or aluminum, **2 by 2 by 0.05 inch (50 by 50 by 1.3 mm)**, with stamped legend, punched for use with self-locking cable tie fastener.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[emedco]**
 - d. **[Marking Services Inc.]**
 - e. **[Seton Identification Products; a Brady Corporation company]**
 - f. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[emedco]**
 - d. **[Marking Services Inc.]**
 - e. **[Seton Identification Products; a Brady Corporation company]**
 - f. **<Insert manufacturer's name>**
- B. Nonmetallic Preprinted Tags: Polyethylene tags, **[0.015 inch (0.38 mm)][0.023 inch (0.58 mm)]** thick, color-coded for phase and voltage level, with factory **[screened][printed]** permanent designations; punched for use with self-locking cable tie fastener.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[emedco]**
 - d. **[Grafoplast Wire Markers]**
 - e. **[LEM Products Inc.]**
 - f. **[Marking Services Inc.]**
 - g. **[Panduit Corp]**
 - h. **[Seton Identification Products; a Brady Corporation company]**
 - i. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[emedco]**
 - d. **[Grafoplast Wire Markers]**

- e. **[LEM Products Inc.]**
- f. **[Marking Services Inc.]**
- g. **[Panduit Corp]**
- h. **[Seton Identification Products; a Brady Corporation company]**
- i. **<Insert manufacturer's name>**

C. Write-on Tags:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[LEM Products Inc.]**
 - d. **[Pipemarker.com; Brimar Industries, Inc.]**
 - e. **[Seton Identification Products; a Brady Corporation company]**
 - f. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[LEM Products Inc.]**
 - d. **[Pipemarker.com; Brimar Industries, Inc.]**
 - e. **[Seton Identification Products; a Brady Corporation company]**
 - f. **<Insert manufacturer's name>**
- 3. Polyester Tags: **[0.010 inch (0.25 mm)][0.015 inch (0.38 mm)]<Insert dimension>** thick, with corrosion-resistant grommet and cable tie for attachment.
- 4. Marker for Tags:
 - a. Permanent, waterproof, black ink marker recommended by tag manufacturer.
 - b. Machine-printed, permanent, waterproof, black ink marker recommended by printer manufacturer.

2.6 SIGNS

A. Baked-Enamel Signs:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[Champion America]**
 - d. **[emedco]**
 - e. **[Marking Services Inc.]**
 - f. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[Brady Corporation]**
- b. **[Carlton Industries, LP]**
- c. **[Champion America]**
- d. **[emedco]**
- e. **[Marking Services Inc.]**
- f. **<Insert manufacturer's name>**

3. Preprinted aluminum signs, **[high-intensity reflective,]**punched or drilled for fasteners, with colors, legend, and size required for application.
4. **1/4 inch (6.4 mm)** grommets in corners for mounting.
5. Nominal Size: **7 by 10 inch (180 by 250 mm)**.

B. Metal-Backed Butyrate Signs:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. **[Brady Corporation]**
- b. **[Champion America]**
- c. **[emedco]**
- d. **[Marking Services Inc.]**
- e. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[Brady Corporation]**
- b. **[Champion America]**
- c. **[emedco]**
- d. **[Marking Services Inc.]**
- e. **<Insert manufacturer's name>**

3. Weather-resistant, nonfading, preprinted, cellulose-acetate butyrate signs, with **0.0396 inch (1 mm)** galvanized-steel backing, punched and drilled for fasteners, and with colors, legend, and size required for application.
4. **1/4 inch (6.4 mm)** grommets in corners for mounting.
5. Nominal Size: **10 by 14 inch (250 by 360 mm)**.

C. Laminated Acrylic or Melamine Plastic Signs:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. **[Brady Corporation]**
- b. **[Carlton Industries, LP]**
- c. **[emedco]**

- d. **[Marking Services Inc.]**
 - e. **[Seton Identification Products; a Brady Corporation company]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Brady Corporation]**
 - b. **[Carlton Industries, LP]**
 - c. **[emedco]**
 - d. **[Marking Services Inc.]**
 - e. **[Seton Identification Products; a Brady Corporation company]**
 - f. **<Insert manufacturer's name>**
3. Engraved legend.
4. Thickness:
- a. For signs up to **20 sq. inch (129 sq. cm)**, minimum **1/16 inch (1.6 mm)** thick.
 - b. For signs larger than **20 sq. inch (129 sq. cm)**, **1/8 inch (3.2 mm)** thick.
 - c. Engraved legend with **[black letters on white face][white letters on dark gray background]<Insert colors>**.
 - d. **[Punched or drilled for mechanical fasteners with 1/4 inch (6.4 mm) grommets in corners for mounting][Self-adhesive]**.
 - e. Framed with mitered acrylic molding and arranged for attachment at applicable equipment.

2.7 CABLE TIES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[HellermannTyton]**
 2. **[Ideal Industries, Inc.]**
 3. **[Marking Services Inc.]**
 4. **[Panduit Corp]**
 5. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[HellermannTyton]**
 2. **[Ideal Industries, Inc.]**
 3. **[Marking Services Inc.]**
 4. **[Panduit Corp]**
 5. **<Insert manufacturer's name>**
- C. Performance Criteria:
1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 2. Listing Criteria: UL CCN ZODZ; including UL 1565 or UL 62275.
- D. UL ZODZ - General-Purpose Cable Ties: Fungus inert, self-extinguishing, one piece, self-locking, and

Type 6/6 nylon.

1. Minimum Width: **3/16 inch (5 mm)**.
2. Tensile Strength at **73 deg F (23 deg C)** in accordance with ASTM D638: **12,000 psi (82.7 MPa)**.
3. Temperature Range: **Minus 40 to plus 185 deg F (Minus 40 to plus 85 deg C)**.
4. Color: Black, except where used for color-coding.

E. UL ZODZ - UV-Stabilized Cable Ties: Fungus inert, designed for continuous exposure to exterior sunlight, self-extinguishing, one piece, self-locking, and Type 6/6 nylon.

1. Minimum Width: **3/16 inch (5 mm)**.
2. Tensile Strength at **73 deg F (23 deg C)** in accordance with ASTM D638: **12,000 psi (82.7 MPa)**.
3. Temperature Range: **Minus 40 to plus 185 deg F (Minus 40 to plus 85 deg C)**.
4. Color: Black.

F. UL ZODZ - Plenum-Rated Cable Ties: Self-extinguishing, UV stabilized, one piece, and self-locking.

1. Minimum Width: **3/16 inch (5 mm)**.
2. Tensile Strength at **73 deg F (23 deg C)** in accordance with ASTM D638: **7000 psi (48.2 MPa)**.
3. UL 94 Flame Rating: 94V-0.
4. Temperature Range: **Minus 50 to plus 284 deg F (Minus 46 to plus 140 deg C)**.
5. Color: Black.

PART 3 - EXECUTION

3.1 PREPARATION

A. Self-Adhesive Identification Products: Before applying electrical identification products, clean substrates of substances that could impair bond, using materials and methods recommended by manufacturer of identification product.

3.2 SELECTION OF COLORS AND IDENTIFICATION MARKINGS

A. Comply with 29 CFR 1910.144 for color identification of hazards, and the following:

1. Fire-protection[**and fire-alarm**] equipment[, **including raceways**,] must be finished, painted, or suitably marked safety red.
2. Ceiling-mounted hangers, supports, cable trays, and raceways must be finished, painted, or suitably marked safety yellow where less than [7.7 ft (2.3 m)]<Insert height> above finished floor.

B. Pipe and Conduit Labeling: Comply with ASME A13.1[**and IEEE C2**].

C. Color-Coding for Phase- and Voltage-Level Identification, 1000 V or Less: Use colors listed below for ungrounded [service][feeder][and][branch-circuit] conductors.

1. Color must be factory applied[**or field applied for sizes larger than 6 AWG when permitted by authorities having jurisdiction**].
2. Colors for 208Y/120 V Circuits:
 - a. Phase A: Black.

- b. Phase B: Red.
 - c. Phase C: Blue.
- 3. Colors for 240 V Circuits:
 - a. Phase A: Black.
 - b. Phase B: Red.
- 4. Colors for 480Y/277 V Circuits:
 - a. Phase A: Brown.
 - b. Phase B: Orange.
 - c. Phase C: Yellow.
- 5. Color for Neutral (Grounded Conductor): **[White][or][gray]**.
- 6. Color for Equipment Ground: **[Bare copper][Green][Green with yellow stripe]**.
- 7. Color for Isolated Ground: Green with two or more yellow stripes.
- D. Color-Coding Raceways, Cable Trays, Junction Boxes, and Conductors for Intrinsically-Safe Circuits: Light blue. When used to identify intrinsically-safe circuits, Article 504 of NFPA 70 requires that the color light blue not be used for any other purpose.
- E. Color-Coding Instructional Signs: Self-adhesive labels, including color code for grounded and ungrounded conductors.
- F. Accessible Fittings for Raceways: Identify cover of junction and pull box of the following systems with wiring system legend and system voltage. System legends must be as follows:
 - 1. "EMERGENCY POWER."
 - 2. "POWER."
 - 3. "UPS."
 - 4. **<Insert name>**.
- G. Identify conductors, cables, and terminals in enclosures and at junctions, terminals, pull points, and locations of high visibility. Identify by system and circuit designation.
- H. Locations of Underground Lines: Underground-line warning tape for power and lighting.
- I. Vaults, Manholes, Handholes, and Pull and Junction Boxes, More Than 1000 V: For conductors in vaults, pull and junction boxes, manholes, and handholes, use **[write-on tags][nonmetallic preprinted tags colored and marked to indicate phase, and separate tag with circuit designation]**.
- J. Concealed Raceways, Duct Banks, More Than 1000 V, within Buildings: Tape and stencil. Stencil legend "DANGER - CONCEALED HIGH-VOLTAGE WIRING" with **3 inch (75 mm)** high, black letters on **20 inch (500 mm)** centers.
 - 1. Locate identification at changes in direction, at penetrations of walls and floors, and at **[10 ft (3 m)][30 ft (9 m)]** maximum intervals.
 - 2. Identify system voltage[**and system or service type**] with black letters on orange field.
 - 3. Apply floor marking tape to the following finished surfaces:
 - a. Floor surface directly above conduits running beneath and within **12 inch (300 mm)** of floor that is in contact with earth or is framed above unexcavated space.
 - b. Wall surfaces directly external to raceways concealed within wall.
 - c. Accessible surfaces of concrete envelope around raceways in vertical shafts, exposed in building, or concealed above suspended ceilings.

- K. Accessible Raceways, Armored and Metal-Clad Cables, More Than 1000 V: **[Vinyl wraparound labels][Snap-around labels][Self-adhesive labels][Snap-around color-coding bands for raceway and cables]**.
1. Locate identification at changes in direction, at penetrations of walls and floors, at **50 ft (15 m)** maximum intervals in straight runs, and at **25 ft (7.6 m)** maximum intervals in congested areas.
 2. Identify system voltage[**and system or service type**] with black letters on orange field.
- L. Vaults, Manholes, Handholes, and Pull and Junction Boxes, 1000 V or Less: For conductors in vaults, pull and junction boxes, manholes, and handholes, use **[vinyl wraparound labels][self-adhesive wraparound labels][snap-around labels][snap-around color-coding bands][self-adhesive vinyl tape]** to identify phase.
1. Locate identification at changes in direction, at penetrations of walls and floors, at **50 ft (15 m)** maximum intervals in straight runs, and at **25 ft (7.6 m)** maximum intervals in congested areas.
 2. Identify system voltage[**and system or service type**] with **[black letters on orange field]<Insert color scheme>**.
- M. Accessible Raceways and Metal-Clad Cables, 1000 V or Less, for Service, Feeder, and Branch Circuits, More Than **[30]<Insert number> A** and **[120]<Insert number> V** to Ground: Identify with self-adhesive **[raceway labels][vinyl tape applied in bands]**.
1. Locate identification at changes in direction, at penetrations of walls and floors, at **50 ft (15 m)** maximum intervals in straight runs, and at **25 ft (7.6 m)** maximum intervals in congested areas.
 2. Identify system voltage[**and system or service type**] with **[black letters on orange field]<Insert color scheme>**.
- N. Conductors to Be Extended in Future: Attach **[write-on tags][marker tape]** to conductors[**and list source**].
- O. Cover Plates: Label individual cover plates with self-adhesive labels. Place label at top of cover plate. Label cover plate with the following information, in the order listed:
1. Panelboard designation.
 2. Colon or dash.
 3. Branch circuit number.
- P. Workspace Indication: Apply **[floor marking tape][or][tape and stencil]** to finished surfaces. Show working clearances in direction of access to live parts. Workspace must comply with NFPA 70 and 29 CFR 1926.403 unless otherwise indicated. Do not install at flush-mounted panelboards and similar equipment in finished spaces.
- Q. Equipment Identification Labels:
1. Black letters on white field.
 2. Indoor Equipment: **[Self-adhesive label][Baked-enamel signs][Metal-backed butyrate signs][Laminated acrylic or melamine plastic sign]**.
 3. Outdoor Equipment: **[Laminated acrylic or melamine sign][Stenciled legend 4 inch (100 mm) high]**.
 4. Equipment to Be Labeled:
 - a. Racks, Frames, and Enclosures: Identify front and rear of each with self-adhesive labels[**containing equipment designation**].
 - b. Panelboards: Typewritten directory of circuits in location provided by panelboard manufacturer. Panelboard identification must be in form of **[self-adhesive,**

- engraved,][engraved,] laminated acrylic or melamine label.
- c. Enclosures and electrical cabinets.
- d. Access doors and panels for concealed electrical items.
- e. Switchgear.
- f. Switchboards.
- g. Transformers: Label that includes tag designation indicated on Drawings for transformer, feeder, and panelboards or equipment supplied by secondary.
- h. Substations.
- i. Emergency system boxes and enclosures.
- j. Motor-control centers.
- k. Enclosed switches.
- l. Enclosed circuit breakers.
- m. Enclosed controllers.
- n. Variable-speed controllers.
- o. Push-button stations.
- p. Power-transfer equipment.
- q. Contactors.
- r. Remote-controlled switches, dimmer modules, and control devices.
- s. Uninterruptible power supplies.
- t. Battery-inverter units.
- u. Battery racks.
- v. Power-generating units.
- w. Monitoring and control equipment.
- x. <Insert equipment>.

R. Cable Ties: General purpose, for attaching tags, except as listed below:

- 1. Outdoors: UV-stabilized nylon.
- 2. In Spaces Handling Environmental Air: Plenum rated.

3.3 SELECTION OF SIGNS AND HAZARD MARKINGS

A. Comply with 29 CFR 1910.145 for danger, caution, warning, and safety instruction signs.

B. Signs, labels, and tags required for personnel safety must comply with the following standards:

- 1. Safety Colors: NEMA Z535.1.
- 2. Facility Safety Signs: NEMA Z535.2.
- 3. Safety Symbols: NEMA Z535.3.
- 4. Product Safety Signs and Labels: NEMA Z535.4.
- 5. Safety Tags and Barricade Tapes for Temporary Hazards: NEMA Z535.5.

C. Electrical Hazard Warnings:

- 1. Arc-Flash Hazard Warning: Self-adhesive labels. Comply with **[NFPA 70E][and][Section 260573 "Power System Studies"]** requirements for arc-flash hazard warning labels.
- 2. Raceways and Cables Carrying Circuits at More Than 1000 V:
 - a. Black letters on orange field.
 - b. Legend: "DANGER - CONCEALED HIGH VOLTAGE WIRING."
- 3. Multiple Power Sources Warning Legend: "DANGER - ELECTRICAL SHOCK HAZARD - EQUIPMENT HAS MULTIPLE POWER SOURCES."
- 4. OSHA Workspace Clearance Warning Legend: "WARNING - OSHA REGULATION - AREA IN FRONT OF ELECTRICAL EQUIPMENT MUST BE KEPT CLEAR FOR 3 FEET MINIMUM."

5. <Insert names and wording of warning signs or labels (for example, multiple services and voltages, and others>.
 - D. Warning Labels for Indoor Cabinets, Boxes, and Enclosures for Power and Lighting: [**Self-adhesive labels**][**Baked-enamel warning signs**][**Metal-backed, butyrate warning signs**].
 1. Apply to exterior of door, cover, or other access.
 2. For equipment with multiple power or control sources, apply to door or cover of equipment, including, but not limited to, the following:
 - a. Power-transfer switches.
 - b. Controls with external control power connections.
 - c. <Insert items>.
 - E. Operating Instruction Signs: [**Self-adhesive labels**][**Baked-enamel warning signs**][**Metal-backed, butyrate warning signs**][**Laminated acrylic or melamine plastic signs**].
 - F. Emergency Operating Instruction Signs: [**Self-adhesive labels**][**Baked-enamel warning signs**][**Metal-backed, butyrate warning signs**][**Laminated acrylic or melamine plastic signs**] with white legend on red background with minimum 3/8 inch (10 mm) high letters for emergency instructions at equipment used for [**power transfer**][**load shedding**]<Insert emergency operations>.
- 3.4 SELECTION OF IDENTIFICATION PRODUCTS FOR COMMUNICATIONS, CONTROL, AUXILIARY, AND LIFE SAFETY SYSTEMS
- A. Comply with Section 270528 "Pathways for Communications Systems" and Section 271100 "Communications Equipment Room Fittings."
- 3.5 INSTALLATION
- A. Install identification materials and devices at locations for most convenient viewing without interference with operation and maintenance of equipment. Install access doors or panels to provide view of identifying devices.
 - B. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes typical for electrical equipment environments specified in Section 018116 "Facility Environmental Requirements" and Section 260010 "Supplemental Requirements for Electrical."
 - C. Paint: Comply with requirements in painting Sections for paint materials and application requirements. Retain paint system applicable for surface material and location (exterior or interior).
 - D. Fasteners for Labels and Signs: Self-tapping, stainless steel screws or stainless steel machine screws with nuts and flat and lock washers.
 - E. Verify and coordinate identification names, abbreviations, colors, and other features with requirements in other Sections requiring identification applications, Drawings, Shop Drawings, manufacturer's wiring diagrams, and operation and maintenance manual. Use consistent designations throughout Project.
 - F. Install identifying devices before installing acoustical ceilings and similar concealment.
 - G. Verify identity of item before installing identification products.

- H. Coordinate identification with Project Drawings, manufacturer's wiring diagrams, and operation and maintenance manual.
- I. Apply identification devices to surfaces that require finish after completing finish work.
- J. Install signs with approved legend to facilitate proper identification, operation, and maintenance of electrical systems and connected items.
- K. Elevated Components: Increase sizes of labels, signs, and letters to those appropriate for viewing from floor.
- L. Vinyl Wraparound Labels:
 - 1. Secure tight to surface of raceway or cable at location with high visibility and accessibility.
 - 2. Attach labels that are not self-adhesive type with clear vinyl tape, with adhesive appropriate to location and substrate.
- M. Snap-Around Labels: Secure tight to surface at location with high visibility and accessibility.
- N. Self-Adhesive Wraparound Labels: Secure tight to surface at location with high visibility and accessibility.
- O. Snap-Around Color-Coding Bands: Secure tight to surface at location with high visibility and accessibility.
- P. Heat-Shrink, Preprinted Tubes: Secure tight to surface at location with high visibility and accessibility.
- Q. Marker Tapes: Secure tight to surface at location with high visibility and accessibility.
- R. Self-Adhesive Vinyl Tape: Secure tight to surface at location with high visibility and accessibility.
 - 1. Field-Applied, Color-Coding Conductor Tape: Apply in half-lapped turns for minimum distance of **6 inch (150 mm)** where splices or taps are made. Apply last two turns of tape with no tension to prevent possible unwinding.
- S. Tape and Stencil: Comply with requirements in painting Sections for surface preparation and paint application.
- T. Floor Marking Tape: Apply stripes to finished surfaces following manufacturer's instructions.
- U. Underground Line Warning Tape:
 - 1. During backfilling of trenches, install continuous underground-line warning tape not less than **12 inch (300 mm)** directly above cables or raceways buried **18 inch (450 mm)** or more below grade. Use multiple tapes where width of multiple lines installed in common trench [**or concrete envelope**]exceeds **16 inch (400 mm)** overall.
 - 2. Limit use of underground-line warning tape to direct-buried cables.
 - 3. Install underground-line warning tape for direct-buried cables and cables in raceways.
- V. Concrete Cable Route Markers: **[As indicated on Drawings]<Insert Project-specific requirements>**.
- W. Metal Tags:
 - 1. Place in location with high visibility and accessibility.
 - 2. Secure using **[general-purpose][UV-stabilized][plenum-rated]** cable ties.

- X. Nonmetallic Preprinted Tags:
 - 1. Place in location with high visibility and accessibility.
 - 2. Secure using **[general-purpose][UV-stabilized][plenum-rated]** cable ties.
- Y. Write-on Tags:
 - 1. Place in location with high visibility and accessibility.
 - 2. Secure using **[general-purpose][UV-stabilized][plenum-rated]** cable ties.
- Z. Baked-Enamel Signs: Attach signs that are not self-adhesive type with mechanical fasteners appropriate to location and substrate.
- AA. Metal-Backed Butyrate Signs: Attach signs that are not self-adhesive type with mechanical fasteners appropriate to location and substrate.
- BB. Laminated Acrylic or Melamine Plastic Signs: Attach signs that are not self-adhesive type with mechanical fasteners appropriate to location and substrate.

END OF SECTION 26 05 53 00

Task	Specification	Specification Description
26 05 53 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 83 00	26 05 13 00	Medium-Voltage Cables
26 05 83 00	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 83 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 09 00 00 - ADDRESSABLE LUMINAIRE LIGHTING CONTROLS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Bus power supply.
2. Controller/gateways.
3. User interface.
4. Lighting control system management software.
5. Luminaire switching and dimming modules.
6. Ballast switching and dimming modules.
7. Sensors.
8. Relays.
9. Manual switches and plates.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 DEFINITIONS

- A. DALI:** Digital addressable lighting interface.
- B. Data Bus:** Two wires used to communicate with bus connected devices.
- C. Device:** A collective term for DALI-compliant bus connected devices, including fluorescent ballasts, incandescent luminaires, manual switches, switching relays, and similar. Sometimes also called "slave unit."
- D. Group:** A set of devices that respond at the same time to messages on the data bus.
- E. Monitoring:** Acquisition, processing, communication, and display of equipment status data, metered electrical parameter values, power quality evaluation data, event and alarm signals, tabulated reports, and event logs.
- F. Scene:** Digital light level associated with a preset; stored in the luminaire ballast.

1.3 ACTION SUBMITTALS

A. Product Data:

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for control modules, power distribution components, relays, manual switches

- and plates, and conductors and cables.
2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
3. Sound data including results of operational tests of central dimming controls.
4. Operational documentation for software and firmware.

B. Shop Drawings:

1. Floor Plans: Location, orientation, and coverage area of each sensor; group designations; and other specific design symbols and designations as required to define the installation, location, and configuration of all control devices.
2. Address Drawing: Reflected ceiling plan and floor plans, showing data-bus-connected devices, address for each device, and device groups. The plans must be based on construction plans, using the same legend, symbols, and schedules.
3. Point List and Data Bus Load: Summary list of all control devices, sensors, ballasts, and other loads connected to each data bus and total connected load for each data bus. Include percentage of rated connected load and device addresses.
4. Wire Termination Diagrams and Schedules: Coordinate nomenclature and presentation with Drawings and block diagram. Differentiate between manufacturer-installed and field-installed wiring.
5. Block Diagram: Show interconnections between components specified in this Section and devices furnished with power distribution system components. Indicate data communication paths and identify networks, data buses, data gateways, concentrators, and other devices used. Describe characteristics of network and other data communication lines.
6. Submit evidence that lighting controls are compatible with connected monitoring and control devices and systems specified in **[Section 230923 "Direct Digital Control (DDC) System for HVAC."]****<Insert Section number and title.>**
 - a. Show interconnecting signal and control wiring, and interface devices that show compatibility of inputs and outputs.
 - b. For control interfaces and adapters, list network protocols and provide statements from manufacturers that input and output devices comply with interoperability requirements of the protocol.

1.4 INFORMATIONAL SUBMITTALS

- A. Field quality-control reports.
- B. Sample Warranty: For manufacturer's special warranty.

1.5 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 1. Bus Power Supplies: Equal to **[two]<Insert number>** percent of amount installed, but no fewer than **[two]<Insert number>**.
 2. Controller/Gateways: Equal to **[two]<Insert number>** percent of amount installed, but no fewer than **[two]<Insert number>**.
 3. Incandescent Switching and Dimming Modules: Equal to **[two]<Insert number>** percent of amount installed, but no fewer than **[two]<Insert number>**.
 4. Fluorescent Ballasts: Equal to **[two]<Insert number>** percent of amount installed, but no fewer than **[two]<Insert number>**.

5. Lighting Control Relays: Equal to **[two]<Insert number>** percent of amount installed, but no fewer than **[two]<Insert number>**.

1.6 WARRANTY

- A. Manufacturer's Warranty: Manufacturer agrees to repair or replace components of lighting controls that fail in materials or workmanship within specified warranty period.
 1. Failures include, but are not limited to, the following:
 - a. Software: Failure of input and output to execute switching or dimming commands.
 - b. Failure of modular relays to operate under manual or software commands.
 - c. Ballast failure.
 - d. Damage of electronic components due to transient voltage surges.
 2. Warranty Periods:
 - a. For DALI Ballasts: **[Three]<Insert number>** years from date of Substantial Completion.
 - b. For Control Components That Are Not Part of Ballasts: **[Three]<Insert number>** years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

- A. DALI:
 1. Components: Individually addressable devices (such as ballasts, relays, dimmers, and switches) that are operated from digital signals received through a DALI-compliant bus, from data-entry and -retrieval devices (such as computers, Internet portals, hand-held IR programming devices, wired Ethernet hubs, wireless IEEE 802.11 hubs[, **and<Insert digital communications device>**]). Devices also report status to data-entry and -retrieval devices through the bus.
 2. Digital Control: Use peer-to-peer communication and distributed logic, where the failure of any single component must be automatically isolated and not affect global system functions.
- B. Ethernet LAN:
 1. Provide an Ethernet LAN to connect controller/gateways to a PC running a Microsoft Windows operating system. Comply with requirements in Section 271513 "Communications Copper Horizontal Cabling."
 2. Ethernet Protocols: Comply with and be compatible with 10/100 BaseT TCP/IP routers and networks.
 3. TCP/IP Modem: Capable of maintaining a secure Internet connection using VPN or equivalent protocol.
- C. Interface with HVAC DDC System: Hardware and software must interface with HVAC DDC system to monitor, control, display, and record data for use in processing reports. Comply with requirements in Section 230923 "Direct Digital Control (DDC) System for HVAC."
 1. Hardwired Points:
 - a. Monitoring: On-off status, **<Insert monitoring point>**.

b. Control: On-off operation, **<Insert control point>**.

2. Communication Interface: Comply with **[ASHRAE 135]<Insert type of interface>**. Communication must interface with HVAC DDC system to remotely control and monitor lighting from HVAC DDC system operator workstation. Control features and monitoring points displayed locally at lighting panel must be available through DDC system for HVAC. Comply with requirements in Section 230923 "Direct Digital Control (DDC) System for HVAC."

D. Surge Protective Device: Factory installed as an integral part of control components or field-mounted surge protective device complying with UL 1449, SPD Type 2.

E. Operation: Input signal from digital signal sources switches or dims DALI devices associated with ballasts or luminaires, or switches field-deployed, DALI-compliant, control relays.

1. Each device and relay is connected to a digital data bus.
2. Each DALI device and relay has a digital address and can be operated by a digital signal.
3. Each device or relay can be assigned to any or all of 16 available groups connected to a single data bus.
4. Each dimming ballast may have as many as 16 preset lighting levels or scenes. Scenes can be programmed to ballasts and may be applied to groups.

F. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

G. Comply with 47 CFR 15, Subparts A and B, for Class A digital devices.

H. Comply with protocol described in IEC 60929, Annexes E and G, for DALI lighting control devices, wiring, and computer hardware and software.

I. Comply with UL 916.

2.2 BUS POWER SUPPLY

A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. **[Leviton Manufacturing Co., Inc.]**
2. **[Lutron Electronics Co., Inc]**
3. **[nLight; Acuity Brands Lighting, Inc.]**
4. **[Philips; Signify North America; Signify Holding]**
5. **[Starfield Controls, Inc.]**
6. **[Tridonic]**
7. **<Insert manufacturer's name>**

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[Leviton Manufacturing Co., Inc.]**
2. **[Lutron Electronics Co., Inc]**
3. **[nLight; Acuity Brands Lighting, Inc.]**
4. **[Philips; Signify North America; Signify Holding]**
5. **[Starfield Controls, Inc.]**
6. **[Tridonic]**

7. <Insert manufacturer's name>

- C. Description: Supply power to data bus for 64 addressable devices, suitable for use with NFPA 70, Class 2 control circuit.

1. Primary Power: Field selectable, 120 and 277 V.
2. Power Supply: Regulated to maintain the operating voltage above 15 V(dc) under full load, and rated for full charging load of 250 mA and a minimum maintained connected load of 190 mA.
3. Pilot Lights: Indicate data bus ground-fault and data bus traffic.

2.3 CONTROLLER/GATEWAYS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. **[Leviton Manufacturing Co., Inc.]**
2. **[Lutron Electronics Co., Inc]**
3. **[Philips; Signify North America; Signify Holding]**
4. **[RAB Lighting]**
5. **[Starfield Controls, Inc.]**
6. **[Tridonic]**
7. **<Insert manufacturer's name>**

- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[Leviton Manufacturing Co., Inc.]**
2. **[Lutron Electronics Co., Inc]**
3. **[Philips; Signify North America; Signify Holding]**
4. **[RAB Lighting]**
5. **[Starfield Controls, Inc.]**
6. **[Tridonic]**
7. **<Insert manufacturer's name>**

- C. Description: DALI controller/gateways link the distributed data buses with an Ethernet network to provide computer configuration, control, analysis, and maintenance. Controller/gateways operate independently and continue to process local inputs and schedules when disconnected from the LAN. Controller/gateways must provide local intelligence and features including the following:

1. Integrated real-time clock with automatic daylight savings adjustment and leap-year correction.
2. Integrated sunrise/sunset support based on the site location (latitude and longitude).
3. Automatic time schedules, to control groups for scheduled occupancy with support for holiday exceptions.
4. Two digital outputs for additional control and interlocking with external equipment such as fans, valves, and security panels.
5. Support **[one][two]** data bus(es).
6. Computer Monitoring and Configuration: The controller/gateway must allow configuration, monitoring, and analysis from PCs on the Ethernet LAN.

- D. Each data bus must have the capacity to control 64 addressable devices, using NFPA 70, Class 2 control circuit.

1. Each data bus must have the capacity to control up to 16 groups and scenes.
2. 10 BaseT Ethernet port for DDC system for HVAC connection.

3. LED indicator lights for Ethernet status (link, send, and receive), power-on, and LAN failure.
4. Linking of switch and sensor inputs to relay and ballast outputs.
5. Viewing relay and ballast output status.
6. Controlling relay and ballast outputs.
7. Setting device addresses.
8. Assigning switch and sensor inputs and relay and ballast output modes.

E. Allow connection of the following DALI-compliant addressable devices:

1. Fluorescent luminaire switching and dimming, for linear and compact lamps.
2. Incandescent luminaire switching and dimming.
3. HID and HPS luminaire switching and dimming.
4. LED luminaire switching and dimming.
5. Occupancy and photoelectric sensors.
6. Emergency lighting interface complying with UL 924.

F. Stores system programming in nonvolatile memory.

1. Switch to enable or disable software programming.

2.4 USER INTERFACE

- A. Workstations: A laptop PC, with Microsoft Windows operating system and lighting control system management software installed. With automatic backup.
 1. Include documentation, storage media, and licensing for a minimum of five concurrent users.
- B. Tablet Computer: Handheld, with custom graphical user-interface software, supplied by the controller/gateway supplier. The software must provide for all DALI-protocol programming commands to be applied to the controller/gateway via a tethered connection.
- C. Web Interface: Internet portal, with **[one][10]<Insert number>** unique username and password(s), and a custom graphical user interface, allowing DALI-protocol programming commands to be applied to the controller gateway via **[LAN][the Internet]**.
- D. IR Programming Assistant: Handheld, with custom graphical user-interface software, supplied by the controller/gateway supplier to program the manual switches.

2.5 LIGHTING CONTROL SYSTEM MANAGEMENT SOFTWARE

- A. The software must provide for programming, configuring, and monitoring all devices connected to all data buses of the lighting control system, using application-specific software with Microsoft Windows-based, user-friendly software with graphical user-interface designed screens.
 1. The software must be object oriented with pop-up menus and built-in help screens. All specified features of the data-bus-connected devices and those associated with controller/gateways must be included in the software.

2.6 LUMINAIRE SWITCHING AND DIMMING MODULES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide**

products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [Leviton Manufacturing Co., Inc.]
2. [Lutron Electronics Co., Inc]
3. [Philips; Signify North America; Signify Holding]
4. [Starfield Controls, Inc.]
5. <Insert manufacturer's name>

- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [Leviton Manufacturing Co., Inc.]
2. [Lutron Electronics Co., Inc]
3. [Philips; Signify North America; Signify Holding]
4. [Starfield Controls, Inc.]
5. <Insert manufacturer's name>

- C. Description: Comply with DALI exponential dimming curve calibrated for the connected lamp type, group, and scene settings, and with DALI light-level and configuration commands. Dimmer rise time must be not less than 15 microseconds.

2.7 BALLAST SWITCHING AND DIMMING MODULES

- A. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [Lutron Electronics Co., Inc]
2. [OSRAM SYLVANIA]
3. [Philips; Signify North America; Signify Holding]
4. [Tridonic]
5. <Insert manufacturer's name>

- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [Lutron Electronics Co., Inc]
2. [OSRAM SYLVANIA]
3. [Philips; Signify North America; Signify Holding]
4. [Tridonic]
5. <Insert manufacturer's name>

- C. Each ballast or group must be addressable and must include on-off, fade, dimming, scene settings, and other standard DALI control functions and as required to meet the sequence of operation.

- D. Ballasts: Comply with requirements in [Section 265116 "Fluorescent Interior Lighting" for ballasts for linear fluorescent lamps][and][Section 265123 "HID Interior Lighting" for ballasts for HID lamps]; electronic programmed-start; and the following:

1. Starting Method: Programmed rapid start with antiflash (turns on at previously set light level).
2. Dimming Range: 100 to 10 percent of rated lumens unless otherwise indicated.
3. Ballast Factor: 1.0 at full output; 0.01 at full dim.
4. Input Voltage Range: 108 to 305 V.

2.8 SENSORS

- A. Comply with requirements in Section 260923 "Lighting Control Devices." All sensors must be DALI-protocol compliant.
- B. Daylight Harvesting Switching and Dimming Controls:
 - 1. Adjustments and Set Points: All adjustments with exception of sensor range must be made via the communication network.
 - 2. Remote Monitoring and Reporting: Sensor value must be displayed when queried by lighting management software or must automatically report based on a change of value or change of time period setting.
- C. Indoor Occupancy Sensors: May be powered directly from the lighting control network or with a standalone power supply. Units powered with a standalone power supply must interface with the lighting control system through an electrically isolated digital input.

2.9 RELAYS

- A. Relays: Electrically operated, mechanically held single-pole switch, rated at 20 A at 277 V. Short-circuit current rating must be not less than 5 kA. Pilot light indicates when relay is closed and latched. Control must be by DALI digital data bus. Relay status must be displayed when queried by lighting management software.
- B. Relay Panel: A single enclosure with incoming lighting branch circuits, relays, and connection to the DALI digital control network.
 - 1. Enclosure: NEMA 250, Type 1 unless otherwise indicated.
 - 2. Barriers to separate control-voltage and low-voltage components.
 - 3. Directory: Cover mounted, identifying each relay with its device address and naming the load controlled.
- C. Individually Mounted Relays:
 - 1. Enclosure: Standard outlet box or NEMA 250, Type 1 unless otherwise indicated.
 - 2. Directory: Cover mounted, identifying each relay with its device address.

2.10 MANUAL SWITCHES AND PLATES

- A. Connection Type: RS-485 protocol, **[Category 5][Category 5e]** UTP cable, using 8PSJ connectors. Power must be from the control unit.
- B. Push-Button Switches: Modular, operating over the DALI digital data bus.
 - 1. Each switch must control the following functions, in coordination with programmed sequence of operation and related sensors:
 - a. On.
 - b. Off.
 - c. Dimming, increase light level.
 - d. Dimming, decrease light level.
 - e. Return to preset light level.

- 2. LED Pilot Lights: On to indicate that the control is active, or when the manual control is operated.
- 3. Match color and style specified in Section 262726 "Wiring Devices."
- 4. Integral IR receiver for programming.
- C. Wall Plates: Single and multigang plates as specified in Section 262726 "Wiring Devices."
- D. Legend: Engraved or permanently silk-screened on wall plate where indicated. Use designations indicated on Drawings.

2.11 CONDUCTORS AND CABLES

- A. Power Wiring to Supply Side of Class 2 Power Source: Not smaller than No. 12 AWG, complying with Section 260523 "Control-Voltage Electrical Power Cables."
- B. Class 2 Control Cables: Multiconductor cable with copper conductors not smaller than **[No. 18][No. 22][No. 24]** AWG, complying with Section 260523 "Control-Voltage Electrical Power Cables."
- C. Class 1 Control Cables: Multiconductor cable with copper conductors not smaller than **[No. 14][No. 16][No. 18]** AWG, complying with Section 260523 "Control-Voltage Electrical Power Cables."
- D. Digital and Multiplexed Signal Cables: UTP cable with copper conductors, complying with **[Category 5e][Category 6]** for horizontal copper cable and with Section 271513 "Communications Copper Horizontal Cabling."

PART 3 - EXECUTION

3.1 INSTALLATION OF WIRING

- A. Wiring Method: Comply with Section 260523 "Control-Voltage Electrical Power Cables" and Section 260523 "Control-Voltage Electrical Power Cables."
 - 1. Comply with requirements for cable trays specified in Section 260536 "Cable Trays for Electrical Systems."
 - 2. Comply with requirements for raceways specified in Section 260533.13 "Conduits for Electrical Systems."
- B. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.

3.2 IDENTIFICATION

- A. Identify system components, wiring, cabling, boxes, cabinets, and terminals. Comply with identification requirements specified in Section 260553 "Identification for Electrical Systems."
- B. Identify field-installed conductors, interconnecting wiring, and components; install warning signs complying with Section 260553 "Identification for Electrical Systems."
- C. Identify all ceiling-mounted controls with data bus number and device address.
- D. Label each device cable within **6 inch (152 mm)** of connection to bus power supply or termination block.

3.3 FIELD QUALITY CONTROL

- A. Acceptance Testing Preparation:
 - 1. Test continuity of each circuit.
- B. Field tests must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- C. Tests and Inspections:
 - 1. Test each bus controller using local and remote controls.
 - 2. Perform each visual and mechanical inspection and electrical test stated in NETA ATS. Certify compliance with test parameters.
- D. Nonconforming Work:
 - 1. Lighting controls will be considered defective if they do not pass tests and inspections.
 - 2. Correct malfunctioning units on-site, where possible, and retest to demonstrate compliance; otherwise, replace with new units and retest.
- E. Field Test Reports:
 - 1. Prepare test and inspection reports, including a certified report that identifies bus controllers included and describes query results. Include notation of deficiencies detected, remedial action taken, and observations made after remedial action.
 - 2. Printed list of all points created from actual queries of all addressed control points to include lamps, ballasts, manual controls, and sensors.
 - 3. Event log verifying the performance of all devices generating event messages to include occupancy sensors, control buttons, alarm messages, and any other change of value messages.

3.4 STARTUP SERVICE

- A. **[Engage a factory-authorized service representative to perform][Perform]** startup service.
 - 1. Complete installation and startup checks according to manufacturer's written instructions.
 - 2. Activate luminaires and verify that all lamps are operating at 100 percent.
 - 3. Burn-in fluorescent lamps at 100 percent for 100 hours.
 - 4. Confirm correct communications wiring, initiate communications between DALI devices and controller/gateways, and program the lighting control system according to approved configuration schedules, time-of-day schedules, and input override assignments.
 - 5. **<Insert startup steps if any>**.

3.5 ADJUSTING

- A. Occupancy Adjustments: When requested within **[12]<Insert number>** months from date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions. Provide up to **[two]<Insert number>** visits to Project during other-than-normal occupancy hours for this purpose.

3.6 SOFTWARE SERVICE AGREEMENT

- A. Technical Support: Beginning at Substantial Completion, service agreement must include software support for **[two]<Insert number>** years.
- B. Upgrade Service: At Substantial Completion, update software to latest version. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. Upgrading software must include operating system and new or revised licenses for using software.
 - 1. Upgrade Notice: At least **[30]<Insert number>** days to allow Owner to schedule and access the system and to upgrade computer equipment if necessary.

END OF SECTION 26 09 00 00

THIS PAGE INTENTIONALLY LEFT BLANK

**SECTION 26 09 00 00A - RELAY-BASED LIGHTING CONTROLS****PART 1 - GENERAL****1.1 SUMMARY****A. Section Includes:**

1. Lighting control relay panels.
2. Networked lighting control panels.
3. Manual switches and cover plates.
4. Field-mounted signal sources.
5. Conductors and cables.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 DEFINITIONS

- A. Monitoring: Acquisition, processing, communication, and display of equipment status data, metered electrical parameter values, power quality evaluation data, event and alarm signals, tabulated reports, and event logs.

1.3 ACTION SUBMITTALS**A. Product Data:**

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for control modules, power distribution components, relays, manual switches and cover plates, and conductors and cables.
2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
3. Sound data including results of operational tests of central dimming controls.
4. Operational documentation for software and firmware.

B. Shop Drawings: For each relay panel and related equipment.

1. Include dimensioned plans, elevations, sections, and details. Show tabulations of installed devices, equipment features, and ratings.
2. Detail enclosure types and details for types other than Type 1.
3. Detail wiring partition configuration, current, and voltage ratings.
4. Short-circuit current rating of relays.
5. Address Drawing: Reflected ceiling plan and floor plans, showing connected luminaires, address for each luminaire, and luminaire groups. Base plans on construction plans, using the same legend, symbols, and schedules.

6. Point List and Data Bus Load: Summary list of all control devices, sensors, ballasts, and other loads. Include percentage of rated connected load and device addresses.
7. Wire Termination Diagrams and Schedules: Coordinate nomenclature and presentation with Drawings and block diagram. Differentiate between manufacturer-installed and field-installed wiring.
8. Block Diagram: Show interconnections between components specified in this Section and devices furnished with power distribution system components. Indicate data communication paths and identify networks, data buses, data gateways, concentrators, and other devices to be used. Describe characteristics of network and other data communication lines.
9. Submit evidence that lighting controls are compatible with connected monitoring and control devices and systems specified in **[Section 230923 "Direct Digital Control (DDC) System for HVAC."]****<Insert Section number and title.>**
 - a. Show interconnecting signal and control wiring, and interface devices that show compatibility of inputs and outputs.
 - b. For control interfaces and adapters, list network protocols and provide statements from manufacturers that input and output devices comply with interoperability requirements of the protocol.

C. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Sample warranties.

1.5 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Lighting Control Relays: Equal to **<Insert number>** percent of amount installed[**for each size indicated**], but no fewer than **<Insert number>**.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Handle and prepare panels for installation in accordance with NECA 407.

1.7 WARRANTY

A. Special Manufacturer Extended Warranty: Manufacturer warrants that components of standalone multipreset modular dimming controls perform in accordance with specified requirements and agrees to provide repair or replacement of components that fail to perform as specified within extended warranty period.

1. Initial Extended Warranty Period: **[Two][Three][Four]<Insert number>** year(s) from date of Substantial Completion, for labor, materials, and equipment.
2. Follow-on Extended Warranty Period: **[Eight]<Insert number>** year(s) from date of Substantial Completion, for materials that failed because of transient voltage surges only, f.o.b. the nearest shipping point to Project site.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

- A. Sequence of Operations: Input signal from field-mounted manual switches, or digital signal sources, must open or close one or more lighting control relays in the lighting control panels. Any combination of inputs must be programmable to any number of control relays.
- B. Interface with HVAC DDC System: Hardware and software must interface with HVAC DDC system to monitor, control, display, and record data for use in processing reports. Comply with requirements in Section 230923 "Direct Digital Control (DDC) System for HVAC."
 - 1. Hardwired Points:
 - a. Monitoring: On-off status, **<Insert monitoring point>**.
 - b. Control: On-off operation, **<Insert control point>**.
 - 2. Communication Interface: Comply with **[ASHRAE 135][ISO/IEC 14908-1][MODBUS Application Protocol Specification]****<Insert type of interface>**. The communication interface must enable the HVAC DDC system operator to remotely control and monitor lighting from a HVAC DDC system operator workstation. Control features and monitoring points displayed locally at lighting panel must be available through the HVAC DDC system. Comply with requirements in Section 230923 "Direct Digital Control (DDC) System for HVAC."
- C. Surge Protective Device: Factory installed as an integral part of control components or field-mounted surge suppressors complying with UL 1449, SPD Type 2.
- D. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70 by qualified electrical testing laboratory recognized by authorities having jurisdiction and marked for intended location and application.
- E. Comply with 47 CFR 15, Subparts A and B, for Class A digital devices.
- F. Comply with UL 916.

2.2 LIGHTING CONTROL RELAY PANELS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[ABB, Electrification Business]**
 - 2. **[Intermatic, Inc]**
 - 3. **[Leviton Manufacturing Co., Inc.]**
 - 4. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - 5. **[Lutron Electronics Co., Inc]**
 - 6. **[Philips; Signify North America; Signify Holding]**
 - 7. **[Siemens Industry, Inc., Energy Management Division]**
 - 8. **[Touch-Plate Technologies]**
 - 9. **[WattStopper; Legrand North America, LLC]**
 - 10. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. [ABB, Electrification Business]
2. [Intermatic, Inc]
3. [Leviton Manufacturing Co., Inc.]
4. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
5. [Lutron Electronics Co., Inc]
6. [Philips; Signify North America; Signify Holding]
7. [Siemens Industry, Inc., Energy Management Division]
8. [Touch-Plate Technologies]
9. [WattStopper; Legrand North America, LLC]
10. <Insert manufacturer's name>

C. Description: Standalone lighting control panel using mechanically latched relays to control lighting and appliances.

D. Lighting Control Panel:

1. A single enclosure with incoming lighting branch circuits, control circuits, switching relays, and on-board timing and control unit.
2. A vertical barrier separating branch circuits from control wiring.

E. Control Unit: Contain the power supply and electronic control for operating and monitoring individual relays.

1. Timing Unit:

- a. 365-day calendar, astronomical clock, and automatic adjustments for daylight savings and leap year.
- b. Clock configurable for 12-hour (A.M./P.M.) or 24-hour format.
- c. [Four]<Insert number> independent schedules, each having [24]<Insert number> time periods.
- d. Schedule periods settable to the minute.
- e. Day-of-week, day-of-month, day-of-year with one-time or repeating capability.
- f. [10]<Insert number> special date periods.

2. Sequencing Control with Override:

- a. Automatic sequenced on and off switching of selected relays at times set at the timing unit, allowing timed overrides from external switches.
- b. Sequencing control must operate relays one at a time, completing the operation of all connected relays in not more than 10 seconds.
- c. Override control must allow any relay connected to it to be switched on or off by a field-deployed manual switch or by an automatic switch, such as an occupancy sensor.
- d. Override control "blink warning" must warn occupants approximately [five minutes]<Insert time> before actuating the off sequence.

3. Nonvolatile memory must retain all setup configurations. After a power failure, the controller must automatically reboot and return to normal system operation, including accurate time of day and date.

F. Relays:

1. Electrically operated, mechanically held single-pole switch, rated at 20 A at 277 V. Short-circuit current rating must be not less than 5 kA. Control must be three-wire, 24 V(ac).
2. Electrically operated, mechanically held single-pole switch, rated at 20 A at 120 V for tungsten, 30 A at 277 V for ballast, 1.5 hp at 120 V, and 3 hp at 277 V. Short-circuit current rating must be not

less than 14 kA. Control must be three-wire, 24 V(ac).

- G. Power Supply: NFPA 70, Class 2, sized for connected equipment, plus 20 percent spare capacity. Powered from a dedicated branch circuit of the panelboard that supplies power to the line side of the relays, sized to provide control power for the local panel-mounted relays, bus system, control-voltage inputs, field-installed occupancy sensors, and photo sensors.
- H. Operator Interface:
 - 1. Integral alphanumeric keypad and digital display, and intuitive drop-down menus to assist in programming.
 - 2. Log and display relay on-time.
 - 3. Connect relays to one or more time and sequencing schemes.

2.3 NETWORKED LIGHTING CONTROL PANELS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - 1. **[ABB, Electrification Business]**
 - 2. **[Intermatic, Inc]**
 - 3. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - 4. **[Lutron Electronics Co., Inc]**
 - 5. **[Touch-Plate Technologies]**
 - 6. **[WattStopper; Legrand North America, LLC]**
 - 7. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[ABB, Electrification Business]**
 - 2. **[Intermatic, Inc]**
 - 3. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - 4. **[Lutron Electronics Co., Inc]**
 - 5. **[Touch-Plate Technologies]**
 - 6. **[WattStopper; Legrand North America, LLC]**
 - 7. **<Insert manufacturer's name>**
- C. Description: Lighting control panels using mechanically latched relays to control lighting and appliances. The panels must be capable of being interconnected with digital communications to appear to the operator as a single lighting control system.
- D. Lighting Control Panels:
 - 1. A single enclosure with incoming lighting branch circuits, control circuits, switching relays, and on-board timing and control unit.
 - 2. A vertical barrier separating branch circuits from control wiring.
- E. Main Control Unit: Installed in the main lighting control panel only; powered from the branch circuit of the standard control unit.
 - 1. Ethernet Communications: Comply with **[TCP/IP]<Insert network protocol>** protocol. The main control unit must provide for programming of all control functions of the main and all networked slave lighting control panels including timing, sequencing, and overriding.

2. Protocol: Controllers must support serial MS/TP and Ethernet IP communications in accordance with **[ASHRAE 135][ISO/IEC 14908-1][MODBUS Application Protocol Specification]**, and must be able to communicate directly via DDC system for HVAC TIA-485 serial networks and Ethernet 10Base-T networks as a native device.
 3. Web Server: Display information listed below over a standard Web-enabled server for displaying information over a standard browser.
 - a. A secure, password-protected login screen for modifying operational parameters, accessible to authorized users via Web page interface.
 - b. Panel summary showing the master and slave panels connected to the controller.
 - c. Controller diagnostic information.
 - d. Show front panel mimic screens for setting up controller parameters, input types, zones, and operating schedules. These mimic screens must also allow direct breaker control and zone overrides.
 4. Timing Unit:
 - a. 365-day calendar, astronomical clock, and automatic adjustments for daylight savings and leap year.
 - b. Clock configurable for 12-hour (A.M./P.M.) or 24-hour format.
 - c. **[Four]<Insert number>** independent schedules, each having **[24]<Insert number>** time periods.
 - d. Schedule periods settable to the minute.
 - e. Day-of-week, day-of-month, day-of-year with one-time or repeating capability.
 - f. **[16]<Insert number>** special date periods.
 5. Time Synchronization: The timing unit must be updated not less than every **<Insert number>** hour(s) with the network time server.
 6. Sequencing Control with Override:
 - a. Automatic sequenced on and off switching of selected relays at times set at the timing unit, allowing timed overrides from external switches.
 - b. Sequencing control must operate relays one at a time, completing the operation of all connected relays in not more than 10 seconds.
 - c. Override control must allow any relay connected to it to be switched on or off by a field-deployed manual switch or by an automatic switch, such as an occupancy sensor.
 - d. Override control "blinking warning" must warn occupants approximately **[five minutes]<Insert time>** before actuating the off sequence.
 - e. Activity log, storing previous relay operation, including the time and cause of the change of status.
 - f. Download firmware to the latest version offered by manufacturer.
- F. Standard Control Unit, Installed in All Lighting Control Panels: Contain electronic controls for programming the operation of the relays in the control panel, contain the status of relays, and contain communications link to enable the digital functions of the main control unit. Comply with UL 916.
1. Electronic control for operating and monitoring individual relays, and display relay on-time.
 2. Nonvolatile memory must retain all setup configurations. After a power failure, the controller must automatically reboot and return to normal system operation.
 3. Integral keypad and digital-display front panel for local setup, including the following:
 - a. Blink notice, time adjustable from software.
 - b. Ability to log and display relay on-time.
 - c. Capability for accepting downloadable firmware so that the latest production features may be added in the future without replacing the module.

**G. Relays:**

1. Electrically operated, mechanically held single-pole switch, rated at 20 A at 277 V. Short-circuit current rating must be not less than 5 kA. Control must be **[three-wire, 24 V(ac)][digital control network]**.
2. Electrically operated, mechanically held single-pole switch, rated at 20 A at 120 V for tungsten, 30 A at 277 V for ballast, 1.5 hp at 120 V, and 3 hp at 277 V. Short-circuit current rating must be not less than 14 kA. Control must be **[three-wire, 24 V(ac)][digital control network]**.

H. Power Supply: NFPA 70, Class 2, UL listed, sized for connected equipment, plus not less than 20 percent spare capacity. Powered from a dedicated branch circuit of the panelboard that supplies power to the line side of the relays, sized to provide control power for the local panel-mounted relays, bus system, control-voltage inputs, field-installed occupancy sensors, and control-voltage photo sensors.**I. Operator Interface:** At the main control unit, provide interface for a tethered connection of **[a portable PC running MS Windows]<Insert digital device and operating system>** for configuring all networked lighting control panels using setup software designed for the specified operating system. Include one portable device for initial programming of the system and training of Owner's personnel. That device must remain the property of Owner.**J. Software:**

1. Menu-driven data entry.
2. Online and offline programming and editing.
3. Provide for entry of the room or space designation for the load side of each relay.
4. Monitor and control all relays, showing actual relay state and the name of the automatic actuating control, if any.
5. Size the software appropriate to the system.

2.4 MANUAL SWITCHES AND COVER PLATES**A. Push-Button Switches:** Modular, momentary contact, three wire, for operating one or more relays and to override automatic controls.

1. Match color and style specified in Section 262726 "Wiring Devices."
2. Integral green LED pilot light to indicate when circuit is on.
3. Internal white LED locator light to illuminate when circuit is off.

B. Cover Plates: Single and multigang cover plates as specified in Section 262726 "Wiring Devices."**C. Legend:** Engraved or permanently silk-screened on cover plate where indicated. Use designations indicated on Drawings.**2.5 FIELD-MOUNTED SIGNAL SOURCES****A. Daylight Harvesting Switching Controls:** Comply with Section 260923 "Lighting Control Devices." Control power may be taken from the lighting control panel, and signal must be compatible with the relays.**B. Indoor Occupancy Sensors and Extreme-Temperature Occupancy Sensors:** Comply with Section 260923 "Lighting Control Devices." Control power may be taken from the lighting control panel, and signal must be compatible with the relays.

2.6 CONDUCTORS AND CABLES

- A. Power Wiring to Supply Side of Class 2 Power Source: Not smaller than No. 12 AWG. Comply with requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- B. Classes 2 and 3 Control Cables: Multiconductor cable with copper conductors not smaller than **[No. 18][No. 22][No. 24]** AWG. Comply with requirements in Section 260523 "Control-Voltage Electrical Power Cables."
- C. Class 1 Control Cables: Multiconductor cable with copper conductors not smaller than **[No. 14][No. 16][No. 18]** AWG. Comply with requirements in Section 260523 "Control-Voltage Electrical Power Cables."
- D. Twisted-Pair Data Cable: **[Category 5e][Category 6][Category 6a]**.
 - 1. Comply with requirements for twisted pair cabling in Section 260523 "Control-Voltage Electrical Power Cables."
 - 2. Comply with requirements in Section 271513 "Communications Copper Horizontal Cabling."

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Receive, inspect, handle, and store panels in accordance with NECA 407.
- B. Examine panels before installation. Reject panels that are damaged or rusted or have been subjected to water saturation.
- C. Examine elements and surfaces to receive panels for compliance with installation tolerances and other conditions affecting performance of the Work.
- D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF WIRING

- A. Wiring Methods:
 - 1. Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters.
 - 2. Install cables in raceways and cable trays except within consoles, cabinets, desks, counters, accessible ceiling spaces, and gypsum board partitions where unenclosed wiring method may be used.
 - 3. Install conductors and cables concealed in accessible ceilings, walls, and floors where possible.
 - 4. Conceal raceway and cables except in unfinished spaces.
 - 5. Provide plenum-rated cable, where installed exposed or in open cable tray, within environmental airspaces, including plenum ceilings.
 - 6. Comply with requirements for cable trays specified in Section 260536 "Cable Trays for Electrical Systems."
 - 7. Comply with requirements for raceways specified in Section 260533.13 "Conduits for Electrical Systems."
- B. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and

without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.

3.3 INSTALLATION OF PANELS

- A. Install panels and accessories in accordance with NECA 407.
- B. Comply with mounting and anchoring requirements specified in Section 260548.16 "Seismic Controls for Electrical Systems."
- C. Mount top of trim [**90 inch (2286 mm)**]**<Insert dimension>** above finished floor unless otherwise indicated.
- D. Mount panel cabinet plumb and rigid without distortion of box.
- E. Install filler plates in unused spaces.

3.4 IDENTIFICATION

- A. Identify system components, wiring, cabling, and terminals. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
- B. Identify field-installed conductors, interconnecting wiring, and components; provide warning signs complying with Section 260553 "Identification for Electrical Systems."
- C. Create a directory to indicate loads served by each relay; incorporate Owner's final room designations. Obtain approval before installing. Use a PC or typewriter to create directory; handwritten directories are unacceptable.
- D. Lighting Control Panel Nameplates: Label each panel with a nameplate complying with requirements for identification specified in Section 260553 "Identification for Electrical Systems."

3.5 FIELD QUALITY CONTROL

- A. Field tests must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]**<Insert names or titles of witnesses>**.
- B. Tests and Inspections:
 - 1. Perform each visual and mechanical inspection and electrical test for low-voltage air circuit breakers described below[**and low-voltage surge arrestors**]. Certify compliance with manufacturer's test parameters.
 - a. Circuit-Breaker Tests:
 - 1) Compare nameplate with Drawings and Specifications.
 - 2) Inspect physical and mechanical conditions.
 - 3) Inspect anchorage and alignment.
 - 4) Verify that the units are clean.
 - 5) Operate the circuit breaker to ensure smooth operation.
 - 6) Inspect bolted electrical connections for high resistance using one or more of the following methods:

- a) A low-resistance ohmmeter.
- b) Verify tightness of bolted electrical connections by calibrated torque wrench.
- c) Thermographic survey.

- 7) Inspect operating mechanism, contacts, and arc chutes in unsealed units.
- 8) Perform adjustments for final protective device settings in accordance with the overcurrent protective device coordination study. Comply with requirements in Section 260573.16 "Coordination Studies."
- 9) Perform insulation resistance tests for one minute on each pole, phase-to-phase, and phase-to-ground with the circuit breaker closed and across each pole using manufacturer's published data.
- 10) Perform a contact/pole-resistance test.
- 11) Perform insulation-resistance tests on control wiring with respect to ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be for one minute. Follow manufacturer's instructions for solid-state units.
- 12) Determine long-time pickup and delay by primary current injection.
- 13) Determine short-time pickup and delay by primary current injection.
- 14) Determine ground-fault pickup and time delay by primary current injection.
- 15) Determine instantaneous pickup by primary current injection.
- 16) Test functions of the trip unit by means of secondary injection.
- 17) Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published data.
- 18) Verify correct operation of auxiliary features such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free, anti-pump function, and trip unit battery condition. Reset trip logs and indicators.
- 19) Verify operation of charging mechanism.

b. Surge Arrestor Tests:

- 1) Compare nameplate with the Contract Documents.
- 2) Inspect physical and mechanical conditions.
- 3) Inspect anchorage, alignment, grounding, and clearances.
- 4) Verify that the units are clean.
- 5) Inspect bolted electrical connections for high resistance using one or more of the following methods:
 - a) Low-resistance ohmmeter.
 - b) Verify tightness of bolted electrical connections by calibrated torque wrench.
- 6) Verify that the ground lead on each device is individually attached to a ground bus or ground electrode.
- 7) Perform an insulation-resistance test on each arrestor, phase terminal-to-ground using voltage in accordance with manufacturer instructions.
- 8) Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems" for grounding tests.

C. Nonconforming Work:

- 1. Lighting control panel will be considered defective if it does not pass tests and inspections.
- 2. Correct malfunctioning units on-site, where possible, and retest to demonstrate compliance; otherwise, replace with new units and retest.

D. Prepare test and inspection reports, including a certified report that identifies lighting control panels and describes scanning results. Include notation of deficiencies detected, remedial action taken, and

observations made after remedial action.

E. Manufacturer Services:

1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

3.6 SYSTEM STARTUP

A. **[Engage a factory-authorized service representative to perform][Perform]** startup service.

1. Complete installation and startup checks in accordance with manufacturer's instructions.
2. Confirm correct communications wiring, initiate communications between panels, and program the lighting control system in accordance with approved configuration schedules, time-of-day schedules, and input override assignments.
3. **<Insert startup steps if any>**.

3.7 ADJUSTING

- A. Occupancy Adjustments: When requested within **[12]<Insert number>** months from date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions. Provide up to **[two]<Insert number>** visits to Project during other-than-normal occupancy hours for this purpose.

3.8 MAINTENANCE

A. Software and Firmware Service Agreement:

1. Technical Support: Beginning at Substantial Completion, verify that software and firmware service agreement includes software support for **[two]<Insert number>** years.
2. Upgrade Service: At Substantial Completion, update software and firmware to latest version. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. Verify upgrading software includes operating system and new or revised licenses for using software.
 - a. Upgrade Notice: No fewer than **[30]<Insert number>** days to allow Owner to schedule and access the system and to upgrade computer equipment if necessary.
3. Upgrade Reports: Prepare written report after each update, documenting upgrades installed.

END OF SECTION 26 09 00 00A

THIS PAGE INTENTIONALLY LEFT BLANK

**SECTION 26 09 23 00 - ELECTRICAL POWER MONITORING****PART 1 - GENERAL****1.1 SUMMARY****A. Section Includes:**

1. Multifunction energy meters.
2. Power meters.
3. Circuit meters and monitors.
4. Circuit meter and explorer.
5. PC operating system software.
6. Networked PC operating system software.
7. Power monitoring and control software.
8. Network configuration software.
9. Monitoring and control of power distribution equipment.
10. System operator interfaces.
11. Desktop workstations.
12. Portable workstations.
13. Raceways and boxes.
14. Wires and cables.
15. Surge protection devices.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
3. Section 230923.13 "Energy Meters" for electricity meters for HVAC equipment.
4. Section 262713 "Electricity Metering" for equipment to meter electricity consumption and demand for tenant submetering.

1.2 DEFINITIONS

- A. Active Power: The average power consumed by a unit. Also known as "real power."
- B. Analog: A continuously varying signal value, such as current, flow, pressure, or temperature.
- C. Apparent (Phasor) Power: " $S = VI$ " where "S" is the apparent power, "V" is the RMS value of the voltage, and "I" is the RMS value of the current.
- D. Firmware: Software (programs or data) that has been written onto read-only memory (ROM). Firmware is a combination of software and hardware. Storage media with ROMs that have data or programs recorded on them are firmware.
- E. KY Pulse: A method of measuring consumption of electricity that is based on a relay operating like a SPST switch.

- F. KYZ Pulse: A method of measuring consumption of electricity based on a relay operating like a SPDT switch.
- G. L-G: Line to ground.
- H. L-L: Line to line.
- I. L-N: Line to neutral.
- J. MODBUS TCP/IP: An open protocol for exchange of process data.
- K. Monitoring: Acquisition, processing, communication, and display of equipment status data, metered electrical parameter values, power quality evaluation data, event and alarm signals, tabulated reports, and event logs.
- L. N-G: Neutral to ground.
- M. Power Factor: The ratio of active power to apparent power, sometimes expressed in percentage.

1.3 ACTION SUBMITTALS

A. Product Data:

1. Multifunction energy meters.
2. Power meters.
3. Circuit meters and monitors.
4. Circuit meter and explorer.
5. PC operating system software.
6. Networked PC operating system software.
7. Power monitoring and control software.
8. Network configuration software.
9. Monitoring and control of power distribution equipment.
10. System operator interfaces.
11. Desktop workstations.
12. Portable workstations.
13. Raceways and boxes.
14. Wires and cables.
15. Surge protection devices.

B. Sustainable Design Submittals:

1. Product Data: Indicating that computers used by the system are certified by ENERGY STAR.

C. Shop Drawings: For power monitoring and control equipment.

1. Include plans, elevations, sections, and attachment details.
2. Include details of equipment assemblies. Indicate dimensions, method of field assembly, components, and location and size of each field connection.
 - a. Attach copies of approved Product Data submittals for products (such as switchboards, switchgear, and motor-control centers) that describe the following:
 - 1) Location of the meters and gateways, and routing of the connecting wiring.

- 2) Details of power monitoring and control features to illustrate coordination among related equipment and power monitoring and control.
3. Block Diagram: Show interconnections between components specified in this Section and devices furnished with power distribution system components. Indicate data communication paths and identify networks, data buses, data gateways, concentrators, and other devices to be used. Describe characteristics of network and other data communication lines.
4. Network naming and numbering scheme.
5. Include diagrams for power, signal, and control wiring. Coordinate nomenclature and presentation with a block diagram.
6. Specifications for workstations.
7. UPS sizing calculations for workstation.
8. Surge Suppressors: Data for each device used and where applied.

1.4 INFORMATIONAL SUBMITTALS

A. Field quality-control reports.

B. Design Data:

1. Manufacturer's system installation and setup guides, with data forms to plan and record options and setup decisions.
 - a. Project Record Drawings of as-built versions of submittal Shop Drawings provided in electronic PDF format on compact disk or portable storage device with a USB interface.
 - b. Testing and commissioning reports and checklists of completed final versions of reports, checklists, and trend logs.
 - c. As-built versions of submittal Product Data.
 - d. Names, addresses, e-mail addresses, and 24-hour telephone numbers of Installer and service representatives for the system and products.
 - e. Operator's manual with procedures for operating control systems including logging on and off, handling alarms, producing point reports, trending data, overriding computer control, and changing set points and variables.
 - f. Programming manuals with description of programming language and syntax, of statements for algorithms and calculations used, of point database creation and modification, of program creation and modification, and of editor use.
 - g. Engineering, installation, and maintenance manuals that explain how to do the following:
 - 1) Design and install new points, panels, and other hardware.
 - 2) Perform preventive maintenance and calibration.
 - 3) Debug hardware problems.
 - 4) Repair or replace hardware.
 - h. Documentation of programs created using custom programming language including set points, tuning parameters, and object database.
 - i. Backup copy of graphic files, programs, and database on compact disk or portable storage device with a USB interface.
 - j. Complete original-issue documentation, installation, and maintenance information for furnished third-party hardware including computer equipment and sensors.
 - k. Complete original-issue copies of furnished software, including operating systems, custom programming language, workstation software, and graphics software on compact disk or portable storage device with a USB interface.
 - l. Recommended preventive maintenance procedures for system components, including schedule of tasks such as inspection, cleaning, and calibration; time between tasks; and task descriptions.

- m. Owner training materials.

1.5 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Addressable Relays: One for every [10]<Insert number> installed. Furnish at least one of each type.
 - 2. Data Line Surge Suppressors: One for every [10]<Insert number> of each type installed. Furnish at least one of each type.
 - 3. <Insert material>.

1.6 COORDINATION

- A. Coordinate features of distribution equipment and power monitoring and control components to form an integrated interconnection of compatible components.
 - 1. Match components and interconnections for optimum performance of specified functions.
- B. Coordinate Work of this Section with those in Sections specifying distribution components that are monitored or controlled by power monitoring and control equipment.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

- A. Microprocessor-based monitoring and control of electrical power distribution system(s) that includes the following:
 - 1. Electrical meters that monitor, control, and connect to the data transmission network.
 - 2. LAN: High-speed, multi-access, open, nonproprietary, industry-standard communication protocols.
 - 3. Include [**PC-based workstation**][**multiple PC-based workstations**][**with web access**], with its operating system and application software, connected to data transmission network.
- B. The electrical power monitoring and control system must be Internet based.
 - 1. System software must be based on server thin-client architecture, designed around open standards of internet technology.
 - 2. Intent of thin-client architecture is to provide operators complete access to power monitoring and control system via an Internet browser. No special software other than an Internet browser must be required to access graphics, point displays, and trends; to configure trends, points, and controllers; and to edit programming.
 - 3. Internet access must be password protected.
- C. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with UL 61010-1 and marked for intended location and application.

2.2 PERFORMANCE REQUIREMENTS

- A. Surge Protection: For external wiring of each conductor entry connection to components to protect components from voltage surges originating external to equipment housing and entering through power, communication, signal, control, or sensing leads.
 - 1. Minimum Protection for Power Lines 120 V and More: **[SPDs complying with UL 1449, listed and labeled for intended use by an NRTL acceptable to authorities having jurisdiction.][Auxiliary panel suppressors complying with requirements in Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."]**
 - 2. Minimum Protection for Communication, Signal, Control, and Low-Voltage Power Lines: Comply with requirements as recommended by manufacturer for type of line being protected.
- B. Addressable Devices: Transmitters and receivers must communicate unique device identification and status reports to monitoring and control clients.
- C. Interface with DDC System for HVAC: Provide factory-installed hardware and software to enable the DDC system for HVAC to monitor, display, and record data for use in processing reports.
 - 1. Hardwired Monitoring Points: Electrical power demand (kilowatts), electrical power consumption (kilowatt-hours)[, **power factor**]**<Insert monitoring point>**.
 - 2. **[ASHRAE 135 (BACnet)][ISO/IEC 14908-1 (LonTalk)][MODBUS Application Protocol Specification][Industry-accepted, open-protocol]****<Insert type of interface>** communication interface with the DDC system for HVAC must enable the DDC system for HVAC operator to remotely monitor meter information from a DDC system for HVAC workstation. Control features and monitoring points displayed locally at metering panel must be available through the DDC system for HVAC.
- D. Backup Power Source:
 - 1. Electrical power distribution equipment served by a backup power source for controls must have associated power monitoring and control system products that monitor and control such systems and equipment also served from a backup power source.

2.3 MULTIFUNCTION ENERGY METERS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[Eaton]**
 - 2. **[GE Power; General Electric Company]**
 - 3. **[Leviton Manufacturing Co., Inc.]**
 - 4. **[Schneider Electric USA, Inc.]**
 - 5. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[Eaton]**
 - 2. **[GE Power; General Electric Company]**
 - 3. **[Leviton Manufacturing Co., Inc.]**
 - 4. **[Schneider Electric USA, Inc.]**
 - 5. **<Insert manufacturer's name>**

- C. Multifunction Energy Meter: Separately mounted, modular, permanently installed, solid-state, digital I/O instrument for power and energy metering and monitoring; complying with UL 61010-1.
 - 1. Capable of metering four-wire wye, three-wire wye, three-wire delta, and single-phase power systems.
 - 2. Equipped with security lock to protect revenue related metering from unauthorized and accidental changes.
- D. Comply with IEC 60529 degree of protection code of IP65 for the front of the meter, and code of IP30 for the body.
- E. Overvoltage: Comply with UL 61010-1 overvoltage withstand rating for CAT III.
- F. Accuracy:
 - 1. Comply with ANSI C12.20, Class 0.5.
 - 2. Neutral Current Measurement: Not more than 0.65 percent.
 - 3. Power Factor: 1.0 percent.
 - 4. Frequency: 0.1 percent.
 - 5. THD: 1.0 percent.
 - 6. Waveform Sampling: 64 per cycle.
- G. Data Link:
 - 1. MODBUS TIA-485, RTU protocol, [2][4]-wire connection to host devices with a compatible port.
 - 2. **<Insert protocol>**.
- H. Meter Physical Characteristics:
 - 1. Display: Backlit LCD with antiglare and scratch-resistant lens.
 - 2. Display of Metered Values:
 - a. One screen to show at least **[three]<Insert number>** user-selected values displayed at the same time. Selections available to display must include the following:
 - 1) Meters.
 - 2) Measurements.
 - 3) THD.
 - 4) Energy.
 - 5) Demand.
 - 6) Minimum and maximum values.
 - 7) Power demand.
- I. Sampling Rate: Continuously sample and record voltage and current at a rate not less than **[64]<Insert number>** samples per cycle, simultaneously on voltage and current channels of the meter.
- J. Meters:
 - 1. Instantaneous, RMS:
 - a. Current: Each phase, **[neutral]** and three-phase average.
 - b. Voltage: L-L each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - c. Active Power (kW): **[Each phase and]** three-phase total.
 - d. Reactive Power (kVAR): **[Each phase and]** three-phase total.

- e. Apparent Power (kVA): **[Each phase and]**three-phase total.
- f. Power Factor: **[Each phase and]**three-phase total.
- 2. Energy:
 - a. Active Energy (kWh): Three-phase total.
- 3. Demand, Derived from Instantaneous RMS Meters:
 - a. Current: Present and maximum.
 - b. Active: Present and maximum.
 - c. Reactive: Present and maximum.
 - d. Apparent: Present and maximum.
- 4. Power Quality Measurements:
 - a. THD: Current and voltage from measurements simultaneously from the same cycle, as can be calculated from the specified sampling rate.
- K. I/O: Two optically isolated digital outputs for KY pulsing or control. Output signal characteristics must be 150 mA at 200 V.
 - 1. KY Pulse: Generate standard KY pulses for a user-defined increment of metered active energy as follows:
 - a. User-defined pulse output, associated with kWh.
 - b. User-defined pulse output, associated with kVARh.
 - 2. **<Insert control function>**.
- L. Capacities and Characteristics:
 - 1. Power Supply: **[120 V(ac), 60 Hz]<Insert text>**.
 - 2. Circuit Connections:
 - a. Voltage: Measurement autoranging, 60 to 400 V(ac) L-N. **[Connect directly to low-voltage (600 V and less) without using voltage transformers.][Connect to instrument grade potential transformers secondary at 120 V.]** Meter impedance must be 2 megohm L-L or greater. Overload Tolerance: 1500 V(ac), RMS, continuously.
 - b. Current: Connect to instrument grade current transformer with a metering range of 5 mA to 6 A. Overcurrent tolerance of the instrument must be 10 A continuous, 50 A for 10 seconds once per hour, and 120 A for one second per hour.
 - c. Frequency: 45 to 65 Hz.
 - d. Time: Input from a GPS receiver to synchronize the internal clock of the instrument and to time-synchronize this instrument with the network to a deviation of not greater than 1 ms.

2.4 POWER METERS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[Eaton]**
 - 2. **[GE Power; General Electric Company]**

3. [Leviton Manufacturing Co., Inc.]
 4. [Schneider Electric USA, Inc.]
 5. [Siemens Industry, Inc., Energy Management Division]
 6. <Insert manufacturer's name>
- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
1. [Eaton]
 2. [GE Power; General Electric Company]
 3. [Leviton Manufacturing Co., Inc.]
 4. [Schneider Electric USA, Inc.]
 5. [Siemens Industry, Inc., Energy Management Division]
 6. <Insert manufacturer's name>
- C. Description: Separately mounted, modular, permanently installed, solid-state, digital I/O instrument for power monitoring and control; complying with UL 61010-1.
1. Capable of metering four-wire wye, three-wire wye, three-wire delta, and single-phase power systems.
 2. Equipped with security lock to protect revenue related metering from unauthorized and accidental changes.
- D. Comply with IEC 60529 degree of protection code of IP51 for the front of the meter, and code of IP30 for the body.
- E. Overvoltage: Comply with UL 61010-1 overvoltage withstand rating for CAT III.
- F. Accuracy:
1. Comply with ANSI C12.20, Class 0.5.
 2. Neutral Current Measurement: Not more than 0.65 percent.
 3. Power: 0.6 percent.
 4. Power Factor: 0.5 percent.
 5. Active Energy: 0.6 percent.
 6. Reactive Energy: 2.5 percent.
 7. Frequency: 0.05 percent.
 8. THD: 1.0 percent.
 9. Waveform Sampling: 32 per cycle.
- G. Data Link:
1. MODBUS TIA-485 RTU protocol, [2][4]-wire connection.
 - a. Provide for firmware and software updates through the communications port.
 2. <Insert protocol>.
- H. Meter Physical Characteristics:
1. Display: Backlit LCD with antiglare and scratch-resistant lens.
 2. Display of Metered Values: One screen to show at least [four]<Insert number> lines of user-selected values on one screen at the same time. Provide graphical representation of user-selected values. The screen selections available at the display must include the following:

- a. Meters, including those listed under the following:
 - 1) Measurements.
 - 2) THD.
 - 3) Energy.
 - 4) Demand.
 - 5) Minimum and maximum values.
 - 6) Power demand.
- I. Sampling Rate: Continuously sample and record voltage and current at a rate not less than **[32 samples per cycle]<Insert number>**, simultaneously on voltage and current channels of the meter.
- J. Meters:
 - 1. Measurements: Instantaneous, in real time, RMS to the 15th harmonic.
 - a. Voltage: L-L each phase, L-N each phase, and three-phase average.
 - b. Current: Each phase, three-phase average, and neutral.
 - c. Unbalanced current, L-L V(ac) and L-N V(ac).
 - d. Active Power (+/- kW): Each phase and three-phase total.
 - e. Reactive Power (+/- kVAR): Each phase and three-phase total.
 - f. Apparent Power (+/- kVA): Each phase and three-phase total.
 - g. Displacement Power Factor: Each phase and three-phase total.
 - h. Distortion Power Factor: Each phase and three-phase total.
 - i. Frequency.
 - 2. THD from measurements simultaneously from the same cycle, through **[15th]<Insert number>** harmonic.
 - a. Voltage THD: L-L each phase, L-N each phase, and three-phase average.
 - b. Current THD: Each phase and three-phase average.
 - c. Total demand distortion.
 - 3. Energy: Accumulated, indicate whether in-flow or out-flow, net and absolute values. Store the values in instrument's nonvolatile memory.
 - a. Active kWh.
 - b. Reactive kVARh.
 - c. Apparent kVAh.
 - 4. Demand: Present, last, predicted, peak.
 - a. Three-phase average current.
 - b. Three-phase total active power (kW).
 - c. Reactive power (kVAR).
 - d. Apparent power (kVA).
 - 5. Minimum and Maximum Values:
 - a. L-L and L-N voltages.
 - b. Current in each phase.
 - c. Power factor.
 - d. Active power total.
 - e. Reactive power total.
 - f. Apparent power total.
 - g. THD L-L and L-N voltages.

- h. THD current in each phase.
- i. Frequency.

K. Power Demand, User Selectable:

1. Thermal Demand: Sliding window updated every second for the present demand and at end of the interval for the last interval. Adjustable window that can be set in 1-minute intervals, from 1 to 60 minutes.
2. Block Interval with Optional Subintervals: Adjustable for 1-minute intervals, from 1 to 60 minutes. User-defined parameters for the following block intervals:
 - a. Sliding block that calculates demand every second, with intervals less than 15 minutes, and every 15 seconds with an interval between 15 and 60 minutes.
 - b. Fixed block that calculates demand at end of the interval.
 - c. Rolling block subinterval that calculates demand at end of each subinterval and displays it at end of the interval.
3. Demand Calculation Initiated by a Synchronization Signal:
 - a. Signal is a pulse from an external source. Demand period begins with every pulse. Calculation must be configurable as either a block or rolling block calculation.
 - b. Signal is a communication signal. Calculation must be configurable as either a block or rolling block calculation.
 - c. Provide for synchronizing the demand with the internal of this instrument.

L. Data Recording: Store the listed values in instrument's nonvolatile memory, indicate which of the three phases relates to the value. Attach a date and time stamp to the peak values and the alarms.

1. Minimum and maximum of real-time RMS measurement.
2. Energy.
3. Demand values.
4. Alarms, store the last 40 events.

M. Alarms: Transmit a digital output and show on display when alarmed. Provide for no fewer than [15]<Insert number> metered items. Each alarm must be user configured, by using the following options:

1. Date and time stamp.
2. Enable-disable (default) or enable.
3. Pickup magnitude.
4. Pickup time delay.
5. Dropout magnitude.
6. Dropout time delay.
7. Alarm type.
8. Alarm label.

N. Output Signals: Provide two mechanical relays, rated not less than 250 V(ac), 2 A resistive, and rated for 200,000 cycles or more. The relays must be user configurable in one of the following listed modes:

1. Normal contact closure where the contacts change state for as long as the signal exists.
2. Latched mode when the contacts change state when a pickup signal is received and are held until a dropout signal is received.
3. Timed mode when the contacts change state when a pickup signal is received and are held for a preprogrammed duration.

O. Meter Face:

1. Display: Backlit LCD display, six lines, with antiglare and scratch-resistant lens.
2. Display of Metered Values: One screen to show at least **[four]<Insert number>** user-selected values on one screen at the same time.
3. Provide for the reset of metered peak values.

P. Capacities and Characteristics:

1. Power Supply: **[120 V(ac), 60 Hz]<Insert text>**.
2. Circuit Connections:
 - a. Voltage: Measurements autoranging, 60 to 400 V(ac) L-N. **[Connect directly to low-voltage (600 V and less) without using voltage transformers.][Connect to instrument grade potential transformers secondary at 120 V.]** Meter impedance must be 2 megohm L-L or greater. Overload Tolerance: 1500 V(ac), RMS, continuously.
 - b. Current: Connect to instrument grade current transformer with a metering range of 5 mA to 6 A. Overcurrent tolerance of the instrument must be 10 A continuous, 50 A for 10 seconds once per hour, and 120 A for one second per hour.
 - c. Frequency: 45 to 65 Hz.
 - d. Time: Input from a GPS receiver to synchronize the internal clock of the instrument and to time-synchronize this instrument with the network to a deviation of not greater than 1 ms.

2.5 CIRCUIT METERS AND MONITORS

A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. **[Eaton]**
2. **[GE Power; General Electric Company]**
3. **[Schneider Electric USA, Inc.]**
4. **[Siemens Industry, Inc., Energy Management Division]**
5. **<Insert manufacturer's name>**

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[Eaton]**
2. **[GE Power; General Electric Company]**
3. **[Schneider Electric USA, Inc.]**
4. **[Siemens Industry, Inc., Energy Management Division]**
5. **<Insert manufacturer's name>**

C. Description: Separately mounted, modular, permanently installed, solid-state, digital I/O instrument for power monitoring and control; complying with UL 61010-1. Capable of metering four-wire wye, three-wire wye, three-wire delta, and single-phase power systems.

1. Equipped with security lock to protect revenue related metering from unauthorized and accidental changes.

D. Comply with IEC 60529 degree of protection code of IP52 for the front of the meter, and code of IP30 for the back.

E. Overvoltage: Comply with UL 61010-1 overvoltage withstand rating for CAT III.

F. Accuracy:

1. Comply with ANSI C12.20, Class 0.5.
2. For Voltage and Current: 0.5 percent of reading.
3. For Active Power: 0.2 percent.
4. For Active and Reactive Energy: ANSI 12.20, Class 0.2.
5. For Frequency: 0.01 Hz in the range of 45 to 65 Hz.
6. For Power Factor: 0.2 percent from 0.5 leading to 0.5 lagging.

G. Data Links:

1. MODBUS TIA-485 RTU protocol, [2][4]-wire connection.
2. MODBUS TIA-232/TIA-485 RTU/ASCII protocol, [2][4]-wire connection.
3. MODBUS TCP:
 - a. 10/100BaseTX balanced twisted pair cabling. 8PSJ connector, 100 m link.
 - b. Optical fiber 100BaseFX, LC duplex connector, 1300 m link. Multimode 62.5/125 microsecond, 2000 m link.
4. Provide for firmware and software updates through the communications port.
5. Ethernet 10/100BaseTX balanced twisted pair cabling and MODBUS TIA-485 serial master port.
6. Ethernet 10/100BaseTX balanced twisted pair cabling and MODBUS TIA-485 serial master port, Ethernet to serial line gateway, and embedded web server.
7. <Insert protocol>.

H. Meter Physical Characteristics:

1. Display: Backlit LCD screen with antiglare and scratch-resistant lens.
2. Display of Metered Values: One screen to show at least [four]<Insert number> lines of user-selected values on one screen at the same time. Provide graphical representation of user-selected values.
3. Allow user to select a date/time format and the ability to create additional screens for user-specified views and custom quantities without overwriting existing standard screens.

I. Sampling Rate:

1. Continuously sample and record voltage and current at a rate not less than [128 samples per cycle]<Insert number>, simultaneously on voltage and current channels of the meter.

J. Meters must measure, record with time stamp, calculate, and on request display the following:

1. Measurements: Instantaneous, in real time, RMS to the [31st][63rd] harmonic:
 - a. Voltage: L-L each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - b. Current: Each phase, three-phase average, and neutral.
 - c. Active Power (kW): Each phase and three-phase total.
 - d. Reactive Power (kVAR): Each phase and three-phase total.
 - e. Apparent Power (kVA): Each phase and three-phase total.
 - f. Displacement Power Factor: Each phase and three-phase total.
 - g. Distortion Power Factor: Each phase and three-phase total.
 - h. Frequency.
2. THD from measurements simultaneously from the same cycle, through [31st][63rd]<insert number> harmonic:

- a. Voltage: L-L each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - b. Current: Each phase, three-phase average, and neutral.
 3. Energy: Accumulated, indicate in-flow or out-flow, net and absolute values. Store the values in instrument's nonvolatile memory. Provide for storing accumulated energy at user-defined intervals, up to three intervals per day.
 - a. Active kWh.
 - b. Reactive kVARh.
 - c. Apparent kVAh.
 4. Demand: Three-phase totals, present, predicted, peak.
 - a. Average current.
 - b. Active power (kW).
 - c. Reactive power (kVAR).
 - d. Apparent power (kVA).
 5. Average, Minimum and Maximum Values:
 - a. Record, date and time stamp, and save the minimum and maximum values of RMS metered values since the last reset.
 - b. **<Insert values>**.
- K. Power Demand, User Selectable:
 1. Thermal Demand: Sliding window updated every second for the present demand and at end of the interval for the last interval. Adjustable window that can be set in 1-minute intervals, from 1 to 60 minutes.
 2. Block Interval with Optional Subintervals: Adjustable for 1-minute intervals, from 1 to 60 minutes. User-defined parameters for the following block intervals:
 - a. Sliding block that calculates demand every second, with intervals less than 15 minutes, and every 15 seconds with an interval between 15 and 60 minutes.
 - b. Fixed block that calculates demand at end of the interval.
 - c. Rolling block subinterval that calculates demand at end of each subinterval and displays it at end of the interval.
 3. Demand Calculation Initiated by a Synchronization Signal:
 - a. Synchronize demand with receipt of a signal pulse from an external source. Demand period begins with every pulse. Calculation must be configurable as either a block or rolling block calculation.
 - b. Synchronize demand with receipt of a communication signal. Calculation must be configurable as either a block or rolling block calculation.
 - c. Provide for synchronization to the clock in the instrument.
- L. Trend Curves: Provide for recording four trend curves at intervals of one minute, one hour, one day, or one month; and forecast values for the trended parameters.
 1. Record minimum, maximum, and average values of eight user-selected parameters as follows:
 - a. Every second for one minute for the one-minute curve.
 - b. Every minute for one hour for the one-hour curve.
 - c. Every hour for one day for the one-day curve.

- d. Every day for one month for the one-month curve.
- 2. Forecast the trended parameters for the following:
 - a. The next four hours.
 - b. The next four days.

M. Waveform Capture:

- 1. Steady State Waveform Capture: Manually initiated.
 - a. Capture, record with time stamp, and store voltage and current waveforms for two cycles.
 - b. Capture, record with time stamp, and store 128 digitally sampled data points for each cycle of each phase voltage. The number of waveform captures stored onboard must be user configurable.
 - c. Harmonic analysis performed on the captured waveforms must resolve harmonics through the 63rd.
 - d. Captured waveforms must be recorded from actual circuit performance.
- 2. Disturbance Waveform Capture:
 - a. Capture, record with time stamp, and store 128 digitally sampled data points for each cycle of each phase voltage. Disturbance waveform capture may be initiated manually, by an external contact closure, or by an alarm. The waveform captures must be user configurable from 185 cycles on 1 channel at 16 points per cycle, to 3 cycles on 6 channels at 128 points per cycle.

N. Disturbance Detection and Alarm:

- 1. Detect and initiate alarm when detecting voltage or current sag and swell.
 - a. Detect disturbance events of less than half-cycle in length, by monitoring and calculating RMS magnitude of each half-cycle.
 - b. Event detection must be with user-defined parameters of threshold and delay. The threshold must be user defined as a fixed or relative set point. With relative set point, the instrument will alarm based on the nominal current or voltage equal to its present average value. The instrument must automatically adjust the nominal current and voltage values to avoid nuisance alarms caused by gradual daily variations of currents and voltages.
 - c. When detecting an alarm condition:
 - 1) Initiate disturbance waveform capture.
 - 2) Record the disturbance parameters into an onboard alarm log with a date and time stamp to the millisecond.
 - 3) Alarm on must be visible on the display and be transmitted over the data link.
 - 4) Display the voltage sag/swell events on ITIC or SEMI graphs to quantify the event for accepted industry standards.

O. Harmonics Information:

- 1. Calculate the harmonic magnitudes and angles for each phase voltage and current through the 63rd harmonic. Provide harmonic power flows up to the 41st harmonic for active, reactive, and apparent power.
- 2. The current and voltage information for phases must be obtained simultaneously from the same cycle.
- 3. Report harmonic information as a percentage of the fundamental or as a percentage of the RMS

values, as selected by the user.

P. Alarms: Alarm events must be user definable. Provide a minimum of 40 user-defined alarm conditions.

1. User Configuration Options:

- a. Date and time stamp.
- b. Enable-disable (default) or enable.
- c. Pickup magnitude.
- d. Pickup time delay.
- e. Dropout magnitude.
- f. Dropout time delay.
- g. Alarm type.
- h. Alarm label.

2. The following classes of events must be available to be programmed as alarm events:

- a. Over/under current.
- b. Over/undervoltage.
- c. Current imbalance.
- d. Phase loss, current.
- e. Phase loss, voltage.
- f. Voltage imbalance.
- g. Over kVA.
- h. Over kW or kVAR into/out of load.
- i. Over/under frequency.
- j. Under power factor, true or displacement.
- k. Over THD.
- l. Over demand, current or power.
- m. Reverse power.
- n. Phase reversal.
- o. Status input change.
- p. End of incremental energy interval.
- q. End of demand interval.
- r. Over/under analog inputs.
- s. Current sag/swell.
- t. Voltage sag/swell.

3. For each over/under metered alarm value, provide for the user to define a pickup, dropout, and delay.
4. The circuit meter and monitor alarms response time must be not less than one second.
5. Provide for up to four alarms to be combined to give a single result using Boolean algebra operations.

Q. EN 50160 Evaluation: Report EN 50160 evaluation data in the following formats: summary of active evaluations, summary of evaluation status, detailed information for each evaluated parameter, and detailed information for each abnormal event.

R. I/O Module: Modular, with multiple I/O options to accomplish specified performance and one or more spare positions for future.

1. KY Pulse: Generate a standard KY pulses for a user-defined increment of metered active energy as follows:
 - a. User-defined pulse output, associated with kWh.
 - b. Alarm pulse output, which turns on the pulsing at user-defined point.

2. Digital Inputs: As follows:
 - a. One input connection rated 24 to 125 V(ac) or V(dc), +/- 10 percent, less than 5 mA burden, 1350 V RMS isolation.
 - b. Six input connections rated 19 to 30 V(dc), 5 mA maximum at 24 V(dc). Provide an onboard 24 V(dc) power supply.
 - c. Two input connections rated 20 to 150 V(dc) or V(ac), 2 mA maximum.
 3. Analog inputs, no fewer than two, adjustable from zero to 5 V(dc) or 4 to 20 mA.
 4. Outputs to operate field-installed relays, no fewer than two, providing 6 to 240 V(ac) or 6 to 30 V(dc), 2 A RMS. 5 A maximum for 10 seconds per hour.
 5. Analog outputs, no fewer than two, 4 to 20 mA(dc) into 600 ohms maximum.
- S. Data Recording: Store the listed values in instrument's nonvolatile memory, indicate which of the three phases relates to the value. Attach a date and time stamp to the peak values and the alarms.
1. Data Logs, General: User configurable. Automatically stamp each entry to the millisecond with date and time.
 - a. Each log entry must hold data of up to 96 parameters each.
 - b. Each log must be user configurable to log data at a different user-defined schedule interval.
 - c. Provide each log with user-defined event or a minimum/maximum condition that will trigger log file entries.
 - d. Configure log entries to be recorded as Fill & Hold or Circular (First in, First out, or FIFO), as defined by the user.
 2. Minimum/Maximum Logs:
 - a. Minimum/Maximum/Average interval log also logs minimum/maximum/average of selected parameters on a selected interval from a user-selected interval length from 1 to 1440 seconds.
 - b. Minimum/Maximum log must include the time, date, and value for the minimum and maximum of each of the real-time metered values.
 3. Alarm Log: Record time, date, event information, and coincident information for each user-defined and automatically initiated alarm or event. Record selected parameters at 100 ms intervals during events and alarms. Automatically stamp each entry to the millisecond with date and time.
 4. Waveform Logs: Capture and store waveforms, from 185 cycles on one channel at 16 samples per cycle, up to 3 cycles on six channels at 128 samples per cycle as defined by the user. Waveform log entries must be externally triggered or forced in response to a user-defined event. Configure log entries to be recorded as Fill & Hold or Circular (FIFO), as defined by the user.
- T. Capacities and Characteristics:
1. Power Supply: [120 V(ac), 60 Hz]<Insert text>.
 2. Circuit Connections:
 - a. Voltage: Measurement autoranging, zero to 600 V(ac) L-L, zero to 347 V(ac) L-N.[
Connect directly to low-voltage (600 V and less) without using voltage transformers.][Connect to instrument grade potential transformers secondary at 120 V.] Meter impedance must be 2 megohm L-L or greater. Overload Tolerance: 1500 V(ac), RMS, continuously.
 - b. Current: Connect to instrument grade current transformer with a metering range of 5 mA to 6 A. Overcurrent tolerance of the instrument must be 10 A continuous, 50 A for 10 seconds

- once per hour, and 120 A for one second per hour.
- c. Frequency: 45 to 65 Hz.
- d. Time: Input from a GPS receiver to synchronize the internal clock of the instrument and to time-synchronize this instrument with the network to a deviation of not greater than 1 ms.

2.6 CIRCUIT METER AND EXPLORER

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[Eaton]**
 - 2. **[GE Power; General Electric Company]**
 - 3. **[Schneider Electric USA, Inc.]**
 - 4. **[Siemens Industry, Inc., Energy Management Division]**
 - 5. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[Eaton]**
 - 2. **[GE Power; General Electric Company]**
 - 3. **[Schneider Electric USA, Inc.]**
 - 4. **[Siemens Industry, Inc., Energy Management Division]**
 - 5. **<Insert manufacturer's name>**
- C. Description: Separately mounted, modular, permanently installed, solid-state, digital I/O instrument for power monitoring, control, and power quality explorer; complying with UL 61010-1.
 - 1. Provide for metering four-wire wye, three-wire wye, and three-wire delta power systems.
 - 2. Equip the instrument with security lock to protect revenue related metering from unauthorized and accidental changes.
- D. Comply with IEC 60529 degree of protection code of IP52.
- E. The circuit meter and monitor must meet UL 61010-1 overvoltage withstand rating of CAT IV.
- F. Accuracy to the following plus/minus values:
 - 1. Voltage and Current Meter: 0.04 percent of reading plus 0.025 percent of full scale.
 - 2. Power and Energy Meter: 0.075 percent of reading plus 0.025 percent of full scale.
 - 3. Energy Meter: Comply with ANSI C12.20, Class 0.20.
 - 4. Frequency Meter: 0.01 Hz in the range of 45 to 67 Hz and accurate to 0.1 Hz in the range of 350 to 450 Hz.
 - 5. Power Factor: 0.002 from 0.5 leading to 0.5 lagging.
- G. Data Links:
 - 1. TIA-232 port.
 - 2. MODBUS TIA-485 RTU protocol, **[2][4]**-wire connection.
 - 3. MODBUS Ethernet TCP/IP protocol:
 - a. 10/100BaseTX balanced twisted pair cabling. 8PSJ connector, 100 m link.
 - b. Optical fiber 100BaseFX, LC duplex connector, 1300 m link. Multimode 62.5/125 microsecond, 2000 m link.

c. HTML server, with standard home page and five customizable pages.

4. Firmware and software updates must be accessible through the communications port.
5. **<Insert protocol>**.

H. Physical Characteristics:

1. Display: Backlit LCD screen with antiglare and scratch-resistant lens.
2. Display of Metered Values: One screen to show at least **[four]<Insert number>** lines of user-selected values on one screen at the same time. Provide graphical representation of user-selected values.
3. Allow user to select a date/time format and the ability to create additional screens for user-specified views and custom quantities without overwriting existing standard screens.

I. Sampling Rate:

1. Sample current and voltage to provide RMS accuracy to 255th harmonic of the fundamental frequency of 60 Hz.
2. Continuously sample and record voltage and current at a rate not less than **[512 samples per cycle][83,333 points per cycle]<Insert rate>**, simultaneously on voltage and current channels of the meter.

J. Measure, record with time stamp, and calculate; and, on request, display the following:

1. Measurements: Instantaneous, in real time, RMS to the 63rd harmonic:
 - a. Voltage: L-L each phase, L-L three-phase average, L-N each phase, L-N three-phase average, and percent unbalanced.
 - b. Current: Each phase, neutral, ground, three-phase average, apparent RMS, and percent unbalanced.
 - c. Active Power (kW): Each phase and three-phase total.
 - d. Reactive Power (kVAR): Each phase and three-phase total.
 - e. Apparent Power (kVA): Each phase and three-phase total.
 - f. Displacement Power Factor: Each phase and three-phase total.
 - g. Distortion Power Factor: Each phase and three-phase total.
 - h. Frequency.
 - i. K-factor for each phase.
2. THD from measurements simultaneously from the same cycle, through **[255th]<Insert number>** harmonic:
 - a. Voltage: L-L each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - b. Current: Each phase, three-phase average, and neutral.
 - c. Power: Active, reactive, and apparent power including power of up to **[41st]<Insert number>**.
3. Energy: Accumulated, indicate whether in-flow or out-flow, net and absolute values. Store the values in instrument's nonvolatile memory. Provide for storing accumulated energy at user-defined intervals, up to three intervals per day.
 - a. Active kWh.
 - b. Reactive kVARh.
 - c. Apparent kVAh.

4. Demand:
- a. Voltage: L-L each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - 1) Present.
 - 2) Running average.
 - 3) Last completed interval.
 - 4) Peak.
 - b. Current: Each phase, three-phase average, and neutral.
 - 1) Present.
 - 2) Last completed interval.
 - 3) Minimum.
 - 4) Peak.
 - c. Active Power (kW): Three-phase totals.
 - 1) Last completed interval.
 - 2) Predicted.
 - 3) Peak.
 - 4) Coincident with peak kVA demand.
 - 5) Coincident with peak kVAR demand.
 - d. Reactive Power (kVAR): Three-phase totals.
 - 1) Last completed interval.
 - 2) Predicted.
 - 3) Peak.
 - 4) Coincident with peak kW demand.
 - 5) Coincident with peak kVA demand.
 - e. Apparent Power (kVA): Three-phase totals.
 - 1) Last completed interval.
 - 2) Predicted.
 - 3) Peak.
 - 4) Coincident with peak kW demand.
 - 5) Coincident with peak kVA demand.
 - f. Distortion Power Factor: Three-phase totals.
 - 1) Last completed interval.
 - 2) Predicted.
 - 3) Peak.
 - 4) Coincident with peak kVA demand.
 - 5) Coincident with peak kVAR demand.

K. Average, Minimum and Maximum Values:

- 1. Record, date and time stamp, and save the minimum and maximum values of RMS metered values since the last reset.
- 2. Record, date and time stamp, and save maximum, minimum and average over a user-defined interval for the following metered values:

- a. Voltage: L-L each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
- b. Voltage Unbalance: L-L each phase and L-N each phase.
- c. Current:
 - 1) RMS each phase, three-phase average, and calculated neutral current.
 - 2) Apparent, RMS average.
 - 3) Active Power (kW): Each phase and three-phase total.
- d. Demand Current: RMS each phase and three-phase average.
- e. Reactive Power (kVAR): Each phase and three-phase total.
- f. Apparent Power (kVA): Each phase and three-phase total.
- g. Demand Active Power: Each phase and three-phase total.
- h. Demand Reactive Power: Each phase and three-phase total.
- i. Demand Apparent Power: Each phase and three-phase total.
- j. Accumulated Energy: MWh, MVAh, and MVARh.
- k. Reactive energy (MVARh) by quadrant.
- l. Power Factor: Three-phase displacement and distortion power factors.
- m. K-factor for each phase.
- n. THD L-L and L-N voltages.
- o. THD current in each phase and neutral.
- p. Frequency.

L. Power Demand, User Selectable:

1. Thermal Demand: Sliding window updated every second for the present demand and at end of the interval for the last interval. Adjustable window that can be set in 1-minute intervals, from 1 to 60 minutes.
2. Block Interval with Optional Subintervals: Adjustable for 1-minute intervals, from 1 to 60 minutes. User-defined parameters for the following block intervals:
 - a. Sliding block that calculates demand every second, with intervals less than 15 minutes, and every 15 seconds with an interval between 15 and 60 minutes. The default setting must be the 15-minute continuous sliding block.
 - b. Fixed block that calculates demand at end of the interval.
 - c. Rolling block subinterval that calculates demand at end of each subinterval and displays it at end of the interval.
3. Demand Calculation Initiated by a synchronization signal. Synchronize demand with clock in the circuit meter and monitor.
 - a. Synchronize demand with receipt of a signal pulse from an external source. Demand period begins with every pulse. Calculation must be configurable as either a block or rolling block calculation.
 - b. Synchronize demand with receipt of a communication signal. Calculation must be configurable as either a block or rolling block calculation.
 - c. Provide for synchronization to the clock in the instrument.
4. Record, date and time stamp, and save the following demand values of RMS metered values since the last reset, including the following:
 - a. Average demand current, per phase.
 - b. Peak demand current, per phase.
 - c. Average demand for active power, reactive power, and apparent power.
 - d. Predicted demand for active power, reactive power, and apparent power.

- e. Peak demand for active power, reactive power, and apparent power.
- M. Trend Curves: Provide for recording four trend curves at intervals of one minute, one hour, one day, or one month; and forecast values for the trended parameters:
 - 1. Record minimum, maximum, and average values of eight user-selected parameters as follows:
 - a. Every second for one minute for the one-minute curve.
 - b. Every minute for one hour for the one-hour curve.
 - c. Every hour for one day for the one-day curve.
 - d. Every day for one month for the one-month curve.
 - 2. Forecast the trended parameters for the following:
 - a. The next four hours.
 - b. The next four days.
- N. Power Analysis Values:
 - 1. THD Voltage: L-L each phase, L-N each phase, and L-N three-phase average.
 - 2. THD Current: Each phase, three-phase average, and neutral current.
 - 3. Total demand distortion.
 - 4. K-factor for each phase.
 - 5. Crest factor, each phase.
 - 6. Displacement power factor.
 - 7. Fundamental voltage, magnitude and angle, each phase.
 - 8. Fundamental currents, magnitude and angle, each phase.
 - 9. Fundamental active power, each phase and three-phase total.
 - 10. Fundamental reactive power, each phase and three-phase total.
 - 11. Harmonic power, each phase and three-phase total.
 - 12. Phase rotation.
 - 13. Voltage and current unbalances.
 - 14. Harmonic magnitudes and angles, each phase.
 - 15. Distortion power.
 - 16. Distortion power factor.
- O. Waveform Capture:
 - 1. Steady State Waveform Capture: Manually initiated over the communications network.
 - a. Capture, record with time stamp, and store voltage and current waveforms at a user-defined resolution of 16 to 512 samples/cycle for up to 30 seconds.
 - b. Capture, record with time stamp, and store 512 digitally sampled data points for each cycle of each phase voltage. The number of waveform captures stored onboard must be user configurable.
 - c. Harmonic analysis performed on the captured waveforms must resolve harmonics through the 255th for the following:
 - 1) Voltage: L-N and L-G each phase.
 - 2) Current: Of each phase and neutral current.
 - d. Captured waveforms must be recorded from actual circuit performance.
 - 2. Disturbance Waveform Capture:
 - a. Capture, record with time stamp, and store digitally sampled data points for each cycle of

each phase voltage. Disturbance waveform capture may be initiated manually, by an external contact closure, or by an alarm. The captured waveform must be at a user-defined resolution of 16 to 512 samples/cycle per second. The number of pre-alarm cycles must be adjustable.

3. Waveform samples must be available for transmission over the communications network, for display, archival, and analysis at computer workstations.

P. Transient Detection:

1. Detect and capture transient voltage surge events up to 10 kV L-L with a duration as short as 200 ns.

Q. Flicker Detection:

1. Detect and capture flicker events, defined by IEEE 1453, at three levels: instantaneous, short term, and long term.
2. Display the flicker event as plots of magnitude versus time on semi-log graph background.

R. Sag and Swell Detection and Alarm:

1. Detect and initiate alarm when detecting voltage or current sag and swell.
 - a. Detect disturbance events of less than half-cycle in length, by monitoring and calculating RMS magnitude of each half-cycle.
 - b. Event detection must be with user-defined parameters of threshold and delay. The threshold must be user defined as a fixed or relative set point. With relative set point, the instrument will alarm based on the nominal current or voltage equal to its present average value. The instrument must automatically adjust the nominal current and voltage values to avoid nuisance alarms caused by gradual daily variations of currents and voltages.
 - c. When detecting an alarm condition:
 - 1) Initiate disturbance waveform capture.
 - 2) Initiate 100 ms event recording.
 - 3) Recording the disturbance parameters into an onboard alarm log with a date and time stamp to the millisecond.
 - 4) Causing an alarm on the display and transmit the alarm over the data link.
 - 5) The user must have the ability to display the voltage sag/swell events on ITIC or SEMI graphs to quantify the event for accepted industry standards.

S. 100 ms Event Recording: Capture, record with time stamp, and store.

1. Initiate recording by an alarm or external contact closure.
2. User-configured recording, to record for the duration of the alarm up to 300 seconds and can be delayed for 1 to 10 seconds.
3. Records current per-phase and neutral, voltage L-L each phase and L-N each phase, active power per-phase and three-phase total, reactive power each phase and three-phase total, apparent power each phase and three-phase total, and true power factor three-phase total.
4. Operate an output relay in the I/O module of the instrument.

T. Harmonics Information:

1. Calculate the harmonic magnitudes and angles for each phase voltage and current in each phase and neutral, through the 255th harmonic. Provide harmonic power flows up to the 41st harmonic for active, reactive, and apparent power.

2. The current and voltage information for phases must be obtained simultaneously from the same cycle.
3. Report harmonic information as a percentage of the fundamental or as a percentage of the RMS values, as selected by the user.

U. Alarms:

1. Alarm events may be either user defined or preconfigured by manufacturer from the applicable standards. Provide for multiple levels for each alarm that is based on metered data.
2. The instrument must calculate the listed key electrical parameters at not less than 100 ms intervals to initiate and record an alarm event. Provide for user-selected range of 1 to 10 seconds of pre-event and up to five minutes of post-event data recording.
3. The following classes of events must be available to be programmed as alarm events:
 - a. Over/under current.
 - b. Over/undervoltage.
 - c. Current imbalance.
 - d. Phase loss, current.
 - e. Phase loss, voltage.
 - f. Voltage imbalance.
 - g. Wave shape alarm.
 - h. Over kVA.
 - i. Over kW or kVAR into/out of load.
 - j. Over/under frequency.
 - k. Under power factor, true or displacement.
 - l. Over THD.
 - m. Over K-factor.
 - n. Over demand, current or power.
 - o. Reverse power.
 - p. Phase reversal.
 - q. Status input change.
 - r. End of incremental energy interval.
 - s. End of demand interval.
 - t. Over/under analog inputs.
 - u. Current sag/swell.
 - v. Voltage sag/swell.
 - w. Transient events.
4. For each over/under metered alarm value, the user must define a pickup, dropout, and delay.
5. Waveform Alarms:
 - a. The instrument must detect anomalous waveform events that are less than half-cycle in length.
 - b. Provide for the user to set a threshold value and an upper limit to determine whether the waveform triggers an alarm. The threshold value and upper limit must be a value between 1 and 100. The threshold value is the limit at which a waveform triggers the alarm. The upper limit defines the highest waveform value that triggers a waveform alarm. The settable values are as follows:
 - 1) Phase voltages.
 - 2) N-G voltages.
 - 3) Phase currents.
 - 4) Neutral currents.
 - c. In response to a waveform alarm, the instrument must:

- 1) Log the event and record phase currents and voltages as defined in the 100 ms event recording.
 - 2) Determine the source of the disturbance (upstream or downstream from the meter) and a statistical level of confidence (low, medium, or high) of the accuracy of the source location.
6. Provide four alarm severity levels to allow the user to respond to the most important events first.
7. Indicate an alarm condition on the front panel of the instrument, as well as reported over the data link to designated workstations.
8. The circuit meter and monitor alarms response time must be not less than the following:
 - a. Standard, one second.
 - b. High speed, 100 ms.
 - c. Disturbance, half-cycle.
9. Up to four alarms may be combined to give a single result using Boolean algebra operations.
10. Provide e-mail notification of alarm conditions.
11. Automatic Alarm Set-Point Adjustment:
 - a. The instrument software must provide for recognizing and learning the characteristics of the normal operation of the electrical power system it is connected to, and to select and adjust alarm set points based on that recognition.
 - b. The metered data to be recognized and learned, and the period of time for learning for alarms, disturbances, and waveform alarms, must be set by the user by selection one of the following two modes:
 - 1) Fixed Learning: Initially configured user set points are used during the entire learning period.
 - 2) Dynamic Learning: Initially configured user set points are temporarily replaced by learned set points at the interval specified by the user in the learning setup. The set points continue to be updated at the specified interval until the learning period expires.
 - c. The learning period must be user configurable. If the learned set points do not change over a predefined period, the learning process can be stopped and the set points either installed or held for review.
- V. EN 50160 Evaluation: Report EN 50160 evaluation data in the following formats: summary of active evaluations, summary of evaluation status, detailed information for each evaluated parameter, and detailed information for each abnormal event.
- W. I/O Module: Modular, with multiple I/O options, programmable to accomplish specified performance and one or more spare positions for future. At minimum, the instrument must provide the following:
 1. KYZ Pulse: Solid-state output relay, programmed to generate a standard KYZ pulses for a user-defined increment of metered active energy as follows:
 - a. User-defined pulse output, associated with kWh.
 - b. Alarm pulse output, which turns on the pulsing at user-defined point.
 2. Digital inputs, each having the following operating modes:
 - a. Normal: Simple on/off digital inputs.
 - b. Demand Interval Synch Pulse Accept a demand synch pulse from a utility demand meter.
 - c. Conditional Energy Control input to control conditional energy accumulation.

3. Output Relays and Control: Output relays must have normally open and normally closed contacts and must operate in response to a user sent command over the data link, or automatically responding to an alarm event. The relays must be user configured in one of the following listed modes:
 - a. Normal contact closure where the contacts change state for as long as the signal exists.
 - b. Latched mode when the contacts change state when a pickup signal is received and are held until a dropout signal is received.
 - c. Timed mode when the contacts change state when a pickup signal is received and are held for a preprogrammed duration.
 - d. End of Power Demand Interval: When the relay operates as a synch pulse for other devices.
 - e. Energy Pulse Output: Relay will pulse quantities used for Absolute kWh, Absolute kVARh, kVAh, kWh In, kVARh In, kWh Out, and kVARh Out.
 - f. Programmed Output: Relay will operate in response to multiple alarms that are arranged to give a single result using Boolean algebra operations.
- X. Onboard Data Logs:
 1. Log data, alarms and events, and waveforms in onboard solid-state nonvolatile memory.
 2. Onboard data logs must be available for transmission over the communications network for display, archival, and analysis at computer workstations on demand.
 3. Data Logs, General: User configurable. Automatically stamp each entry to the millisecond with date and time.
 - a. Each log entry must hold data of up to 96 parameters each.
 - b. Each log must be user configurable to log data at a different user-defined schedule interval.
 - c. Provide each log with user-defined event or a minimum/maximum condition that will trigger log file entries.
 - d. Configure log entries to be recorded as Fill & Hold or Circular (FIFO), as defined by the user.
 4. Minimum/Maximum Logs:
 - a. Minimum/Maximum/Average interval log also logs minimum/maximum/average of selected parameters on a selected interval from a user-selected interval length from 1 to 1440 seconds.
 - b. Minimum/Maximum log must include the time, date, and value for the minimum and maximum of each of the active-time metered values.
 5. Alarm Log: Record time, date, event information, and coincident information for each user-defined and automatically initiated alarm or event. The log capacity must be not less than 1000 events. Record selected parameters at 100 ms intervals during events and alarms. Automatically stamp each entry to the millisecond with date and time.
 6. Waveform Logs: Capture and store waveforms as follows:
 - a. One cycle, 512 samples, to the 255th harmonic. Manually triggered.
 - b. Adjustable from 8 seconds at 18 samples per cycle, to 264 seconds at 16 samples per cycle. Triggered manually or by a user set alarm.
 - c. Voltage sampling at 5 MHz (83,333 samples per cycle) more than 2 ms to capture transient peaks of less than 1 microsecond.
- Y. Programming: Programming of instrument functions must be similar to BASIC syntax. Provide for initial programming and changes to programs through the communications links.

1. Programming language must include the following capabilities:
 - a. Scheduled tasks.
 - b. Event tasks.
 - c. Math functions including add, subtract, multiple, divide, sine, cosine, and square root.
 - d. Logical functions including: AND, OR, XOR, NOT, shift, and so forth.
 - e. Loop commands.
 - f. Compare statements.
 - g. Counters and timers.
2. Manufacturer must provide custom programs to meet Project requirements that are described in "Capacities and Characteristics" Paragraph below.
3. Metering of specialized utility rate structures, including real-time pricing and curtailable rates.
4. Data reduction using smart data logging.
5. Automatic monthly logging/reset of kWh and peak demand.
6. Statistical profile analysis of metered quantities.
7. ITIC/SEMI power quality analysis.
8. Calculations for IEEE 519 verification.
9. Metering of combined utilities: gas, water, steam, and electric.
10. Non-critical control schemes, such as load control or power factor correction, based on multiple conditions, for example, time of day and input status.

Z. Capacities and Characteristics:

1. Power Supply: **[120 V(ac), 60 Hz]<Insert text>**.
2. Circuit Connections:
 - a. Voltage: Measurements autoranging, zero to 600 V(ac) L-L, zero to 347 V(ac) L-N.[
Connect directly to low-voltage (600 V and less) without using voltage transformers.][Connect to instrument grade potential transformers secondary at 120 V.] Meter impedance must be 2 megohm L-L or greater.
 - b. Current: Connect to instrument grade current transformer with a metering range of 5 mA to 6 A. Overcurrent tolerance of the instrument must be 15 A continuous, 50 A for 10 seconds once per hour, and 120 A for one second per hour.
 - c. Frequency: 45 to 67 Hz, and 350 to 450 Hz.
 - d. Time: Input from a GPS receiver to synchronize the internal clock of the instrument and to time-synchronize this instrument with the network to a deviation of not greater than 1 ms.
3. Onboard, Field-Upgradeable, Solid-State Nonvolatile Memory: **[8]<Insert number>** MB.
4. Number of Onboard Data Logs: **[14]<Insert number>**.
5. Number of Minimum/Maximum Log Files: **[Two]<Insert number>**.
6. Alarm Log Capacity: Not less than 1000 events.
7. Custom Programs: Provide the following programs with the instrument:
 - a. Metering of specialized utility rate structures, including real-time pricing and curtailable rates.
 - b. Data reduction using smart data logging.
 - c. Automatic monthly logging/reset of kWh and peak demand.
 - d. Statistical profile analysis of metered quantities.
 - e. Calculations for IEEE 519 verification.
 - f. Metering of combined utilities: gas, water, steam, and electric.
 - g. Non-critical control schemes, such as load control or power factor correction, based on multiple conditions such as time of day and input status.
 - h. **<Insert requirements>**.

**2.7 PC OPERATING SYSTEM SOFTWARE**

- A. Description: System software must monitor, analyze, display, control, and save the parameters and features available at the connected meter.
- B. Software: Configured to run on a portable laptop computer, a single PC, or a tablet computer, with capability for accessing a single meter at a time, at the location of the meter. System is not connected to LAN.
- C. Minimum Requirements:
 - 1. Real-time multitasking and multiuser [32-][or][64-]bit operating system that allows execution of multiple real-time programs and custom program development.
 - 2. Operating system must be capable of operating Microsoft Windows applications.
 - 3. Scheduling software must schedule centrally based time and event, temporary, and exception day programs.

2.8 NETWORKED PC OPERATING SYSTEM SOFTWARE

- A. Description: System software must monitor, analyze, display, control, and save parameters and features available at each of the connected meters.
- B. Software: Configured to run on a single PC, with capability for accessing multiple devices simultaneously. Software must include interactive graphics client and must be web enabled.
- C. System Software Minimum Requirements:
 - 1. Real-time multitasking and multiuser [32-][or][64-]bit operating system that allows concurrent multiple workstations operating and concurrent execution of multiple real-time programs and custom program development.
 - 2. Operating system must be capable of operating Microsoft Windows applications.
 - 3. Database management software must manage data on an integrated and non-redundant basis. Additions and deletions to database must be without detriment to existing data. Include cross linkages so no data required by a program can be deleted by an operator until that data have been deleted from respective programs.
 - 4. Scheduling software must schedule centrally based time and event, temporary, and exception day programs.
- D. Operator Interface Software:
 - 1. Minimize operator training through use of English language prorating and English language point identification.
 - 2. Minimize use of a typewriter-style keyboard through use of a pointing device, touchscreen, or mouse.
 - 3. Operator sign-off must be a manual operation or, if no keyboard or mouse activity takes place, an automatic sign-off.
 - 4. Automatic sign-off period must be programmable from 1 to 60 minutes in 1-minute increments on a per operator basis.
 - 5. Record operator sign-on and sign-off activity.
 - 6. Security Access:
 - a. Operator access to electrical monitoring and control system must be under password control.
 - b. An alphanumeric password must be user assignable to each operator.
 - c. Software must have at least five access levels.

- 1) View - View information. No change privileges allowed.
 - 2) User - Same as View, but is able to initiate control functions.
 - 3) Controller - Same as User, but is able to initiate communications.
 - 4) Operator - Same as Controller, but is able to modify configurations.
 - 5) Supervisor - Same as Operator, but is able to administer security privileges.
- d. Each menu item must be assigned an access level so that a one-for-one correspondence between operator-assigned access level(s) and menu-item access level(s) is required to gain access to menu item.
- e. Display menu items to operator with those menu items capable of access highlighted. Menu and operator access level assignments must be online programmable and under password control.

E. Graphic Interface Software:

1. Include a full interactive graphical selection means of accessing and displaying system data to operator.
2. Descriptors for graphics, points, alarms, and such must be modified through workstation under password control.
3. Display operator accessed data on the monitor.
4. Help Features: On-line context-sensitive help utility to facilitate operator training and understanding.

2.9 POWER MONITORING AND CONTROL SOFTWARE

A. Data Storage and Data Sharing:

1. Query and download logs of interval data stored on metering devices.
2. Query and download logs of alarm and event data stored on metering devices.
3. Query and download logs of waveform capture data stored on metering devices.
4. Query and download logs of interval data generated by the software and calculated by the meters.
5. Query and download logs of alarm and event data generated by the software and calculated by the meters.
6. Automatically re-arm the waveform recorders, on upload of information.
7. Provide a facility to archive, trim, and back up the database on demand, or on a schedule.
8. Provide a facility to view historical data from archived databases.
9. Support user changes to the database.
 - a. Support on-line changes while the data storage/retrieval application is running.
 - b. Suffer no interruption to its operation while changes are being made.
 - c. Require no restart once the configuration has been performed.

B. Project-Specific Graphics: Graphics documentation including, but not limited to, the following:

1. Site plan showing each building, and additional site elements, which are being controlled or monitored by the electrical power monitoring and control system.
2. Plan for each building floor, showing the following:
 - a. Locations and identification of monitored and controlled electrical equipment.
 - b. **<Insert requirements>.**
3. Control schematic for each device that is controlled by the meters of this Section, including a graphic system schematic representation[, **similar to that indicated on Drawings,**] with device

- identification.
- 4. Graphic display for each piece of equipment connected to the electrical monitoring and control system through a data link.
- 5. Electrical power monitoring and control system network riser diagram that shows schematic layout for entire system including meters, **[gateways][and][other network devices]**.

2.10 NETWORK CONFIGURATION SOFTWARE

A. Network Management Graphical Interface Features:

- 1. Add and remove devices in the power monitoring and control network.
- 2. Application for naming devices based on a user-defined naming scheme.
- 3. Add and remove I/O servers in the power monitoring and control network.
- 4. Edit communication properties for devices including timeouts and delays.
- 5. Display mandatory fields when adding a new device.
- 6. Allow to manually connect and disconnect serial, Ethernet, modem, and Ethernet gateway sites.
- 7. Enable and disable devices and sites in the power monitoring and control network without interruption to other devices or sites.
- 8. Pool modem resources so that the software uses any available modem.
- 9. Monitor the following diagnostics:
 - a. Communication request/response and error rates, and timeouts.
 - b. Log acquisition services.

B. Database Maintenance Features:

- 1. Backup, archive, and trim data, event, and waveform logs.
 - a. Record start and end date for operation.
 - b. Allow copying data to another database.
 - c. Be capable of selecting logs specified for the meters that are Work of this Section.
 - 1) Data logs.
 - 2) Event logs.
 - 3) Waveform logs.

C. Web Reporter: Allow viewing historical data in preformatted report templates via a web browser.

- 1. Features:
 - a. User-configurable report generator to trigger on event, based on a schedule, or manual initiation.
 - b. Format reports in HTML, PDF, TIF, Excel, XML, or user-selected printer, or network folder.
 - c. Distribution of reports via email.
- 2. Report on power and demand profiles.
- 3. Power quality report with CBEMA evaluation.
- 4. EN 50160 compliance report.
- 5. 100 ms PQ report.
- 6. Energy over Period Report:
 - a. User-defined rollup interval by day, week, month, or year.
 - b. Compare daily energy to the following:
 - 1) Previous day.

- 2) Same day, previous week.
 - 3) Same day, previous month.
 - 4) User-defined specific day.
 - c. Compare weekly energy to the following:
 - 1) Previous week.
 - 2) Same week from previous month.
 - 3) Same week from previous year.
 - 4) User-defined specific week.
 - d. Compare monthly energy to the following:
 - 1) Previous month.
 - 2) Same month from previous year.
 - 3) User-defined specific month.
 - e. Compare annual energy to the following:
 - 1) Previous year.
 - 2) User-defined specific year.
7. Energy by daily period report for the user-defined periods. Aggregate consumption of the periods by the day, week, and year.
8. Tabular Report: Show values for multiple measurements and measurements from multiple devices in tabular format.
9. Trend Report:
 - a. Show values for multiple measurements and measurements from multiple devices in the following graphical formats:
 - 1) Line chart.
 - 2) Pie graph.
 - 3) Bar chart.
 - 4) Column chart.
 - 5) Smooth line chart.
 - 6) Stacked column chart.
 - 7) Stacked bar chart.
10. Alarm and Event History: User formatted, based on the meters and priority; and with user-defined alarm and event reports.
11. System Configuration Report:
 - a. Device name.
 - b. Device type.
 - c. Device address.
 - d. Connection status.
 - e. Device protocol.
 - f. Device description.
12. Each default report must include the following:
 - a. Summary aggregation of data from the selected devices.
 - b. Individual device information.
 - c. Raw data.

13. The reporting tool must provide a graphical interface to create and manage multiple Time of Use schedules:
 - a. Tariffs including energy cost rates per kWh, kVARh, and kVAh, and demand charges per kW, kVAR, and kVA.
 - b. Off-peak and on-peak times.

2.11 MONITORING AND CONTROL OF POWER DISTRIBUTION EQUIPMENT

- A. Power Distribution Equipment: Web-enabled, direct connected to the LAN or intranet.
- B. Instrument Transformers: Comply with IEEE C57.13.
 1. Potential Transformers: Secondary voltage rating of 120 V and NEMA C12.11 accuracy class of 0.3 with burdens of W, X, and Y.
 2. Current Transformers: Burden and accuracy class suitable for connected relays, meters, and instruments.
- C. Ethernet Connectivity:
 1. A multipoint, MODBUS TIA-485 serial communications network must be included within the equipment to interconnect breaker trip units, protective relays, drives, and metering devices equipped with communications.
 2. Serial communications network must be wired to an Ethernet server in the incoming section of the equipment. Hardware and cabling required for the connection to the network must be included within the power distribution equipment.
 3. Serial communications devices within the equipment must be factory addressed and tested to verify reliable communications to the equipment's Ethernet Server.
- D. Ethernet Gateways:
 1. User configurable; complying with UL 60950-1, and IEEE 802.3, Class 3 PoE.
 2. Include provisions to set initial Ethernet parameters via a local operator interface, or standard (8PSJ) Ethernet port, that is accessible from the front of the equipment. Initial setup must be limited to basic Ethernet addressing parameters, as assigned by Owner.
 3. Common Gateway Features:
 - a. User configurable, with secure password-protected login process.
 - b. Include communications diagnostic information for serial and Ethernet ports as well as internal health status and memory management information through embedded HTML web pages for viewing using a standard web browser.
 - c. Include embedded HTML pages providing real-time information from devices connected to the Ethernet gateway's TIA-485 port(s) through a standard web browser.
 - d. Allow firmware upgrades through the communications port.
 4. Include a "Quick-Start" guide with the equipment to describe the commissioning process for setting the equipment's Ethernet network address and for ensuring trouble-free data access from any PC on the network, using a standard web browser.
 5. Implement a common user interface ("look and feel") across different styles of power equipment.
- E. Distribution Equipment Monitoring:
 1. Main menu and summary pages, factory configured, to display data for each communicating device within the power equipment lineup.
 2. Display Data:

- a. Circuit summary page to display circuit name, three-phase average RMS current, real power (kW), power factor, and breaker status (if applicable).
- b. Load current summary page to display circuit name, and phase a, b, and c RMS current values.
- c. Demand current summary page to display circuit name, and phase a, b, and c average demand current values.
- d. Power summary page to display circuit name, present demand power (kW), peak demand power (kW), and recorded time and date.
- e. Energy summary page to display circuit name, real energy (kWh), reactive energy (kVARh), and time/date of last reset.
- f. For unit substations equipped with dry-type transformer(s) and microbased temperature controller(s), the circuit summary web page listed above must be augmented with transformer coil temperatures, phase a, b and c current values, and cooling fan status (on/off).
- g. For motor-control centers, the circuit summary web page must be tailored specifically for this application, to display circuit name, three-phase average RMS current, thermal capacity (percentage), drive output frequency (in Hertz, where applicable), and contactor status.

2.12 SYSTEM OPERATOR INTERFACES

- A. Operator means of system access must be through the following:
 1. Desktop workstation with hardwired connection through LAN port.
 2. Portable terminal with hardwired connection through LAN port at each meter.
 3. Remote connection using outside of system PC, tablet, or phone using an internet portal.

2.13 DESKTOP WORKSTATIONS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 1. **[Dell Technologies Inc.]**
 2. **[HP Inc.]**
 3. **[Lenovo Holding Co., Inc.; Lenovo Group Ltd.]**
 4. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 1. **[Dell Technologies Inc.]**
 2. **[HP Inc.]**
 3. **[Lenovo Holding Co., Inc.; Lenovo Group Ltd.]**
 4. **<Insert manufacturer's name>**
- C. Performance Requirements:
 1. Performance requirements may dictate equipment exceeding minimum requirements indicated.
 2. Capable of running **[Microsoft Windows]<Insert operating system name>**.
 3. ENERGY STAR compliant.
- D. Personal Computer:

1. Minimum Processor Speed: <Insert gigahertz>, [Core i3][Core i5][Core i7].
2. RAM:
 - a. Capacity: [2][4][8]<Insert value>[GB].
 - b. Speed and Type: [1333]<Insert value> MHz, <Insert type>.
3. Primary Hard Drive:
 - a. Media: [Solid state][Rotating disc, nominal rotational speed of 7200 rpm][Hybrid solid-state and rotating disc].
 - b. Number of Hard Drives: [One][Two]<Insert number>.
 - c. Capacity: <Insert number and measurement unit>.
 - d. Minimum Average Seek Time: <Insert number and measurement unit>.
 - e. Cache Buffer Size: <Insert number and measurement unit>.
 - f. <Insert requirements>.
4. Second Hard Drive:
 - a. Media: [Solid state][Rotating disc, nominal rotational speed of 7200 rpm][Hybrid solid-state and rotating disc].
 - b. Capacity: <Insert number and measurement unit>.
 - c. Minimum Average Seek Time: <Insert number and measurement unit>.
 - d. Cache Buffer Size: <Insert number and measurement unit>.
 - e. <Insert requirements>.
5. Optical Drive:
 - a. Type: <Insert type>.
 - b. Minimum Average Access Time: <Insert number> ms.
 - c. Data Transfer Speed: <Insert number>[MB][TB]/s.
 - d. Reading Formats: Data, audio, recordable, <Insert other> and rewritable.
6. Optical Read and Write Drive:
 - a. Include with at least 2 MB of data buffer.
 - b. Type: <Insert type>.
 - c. Minimum Data Buffer Capacity: <Insert number and measurement unit>.
 - d. Minimum Average Access Time: <Insert number> ms.
 - e. Nominal Data Transfer Rates:
 - 1) Reading: <Insert number>[MB][TB]/s.
 - 2) Writing: <Insert number>[MB][TB]/s.
 - f. Average access time of 150 ms or less.
 - g. MTBF of at least 100,000 power-on hours.
7. Expansion Slots: Minimum of 4, [32][64]<Insert number> bit.
8. Video Card:
 - a. Capable of supporting [one][two][three][four] monitors.
 - b. Resolution: [1920 by 1200]<Insert values> pixels minimum for each monitor.
 - c. RAM: <Insert number>[GB][TB].
 - d. Controller Speed: <Insert number>[MHz][GHz].
 - e. On-Board Memory Speed: <Insert number>[MHz][GHz].
 - f. On-Board Memory Data Width: <Insert number> bit.

9. Sound Card:
 - a. At least 128 voice wavetable synthesis.
 - b. Capable of delivering three-dimensional sound effects.
 - c. High-resolution 16-bit stereo digital audio recording and playback with user-selectable sample rates up to 48,000 Hz.
 10. Network Interface Card: Include card with connection, as applicable.
 - a. 10-100-1000 base TX Ethernet with 8PSJ connector port.
 - b. 100 base FX Ethernet with SC or ST port.
 11. Wireless Ethernet, 802.11 a/b/g/n.
 12. Optical Modem: Full duplex link for connection to optical fiber cable provided.
 13. I/O Ports:
 - a. Two USB 3.0 ports on front panel, six on back panel, and three internal on motherboard.
 - b. One serial port.
 - c. One parallel port.
 - d. Two PS/2 ports.
 - e. One 8PSJ.
 - f. One stereo line-in and line-out on back panel.
 - g. One microphone and headphone connector on front panel.
 - h. One IEEE 1394 on front and back panel with PCI-e card.
 - i. One ESATA port on back panel.
 14. Battery: Life of at least three years to maintain system clock/calendar and ROM, as a minimum.
- E. Keyboard:
1. 101-key enhanced keyboard.
 2. Full upper- and lowercase ASCII keyset, numeric keypad, dedicated cursor control keypad, and 12 programmable function keys.
 3. Wireless operation within up to **72 inch (1800 mm)** in front of workstation.
- F. Pointing Device:
1. Either a two- or three-button mouse.
 2. Wireless operation within up to **72 inch (1800 mm)** in front of workstation.
- G. Flat Panel Display Monitor:
1. Number of Displays: **[One][Two]<Insert number>**.
 - a. Display Support: **[Individual tilt adjustable base.][Desk mounted, adjustable bracket capable of supporting number of monitors specified above with integral power and display cable organization.][Wall mounted, adjustable bracket capable of supporting number of monitors specified above with integral power and display cable organization.]<Insert description.>**
 2. Color display with **<Insert inch (mm)>** diagonal viewable area.
 3. Aspect Ratio: **[16 to 9]<Insert value>**.
 4. Resolution: **[1920 by 1080]<Insert value>** pixels at 60 Hz with pixel size of **[0.277]<Insert number>** mm or smaller.
 5. **[Digital][or][analog]** input signal.

6. Response Time: <Insert number> ms.
7. Dynamic Contrast Ratio: [50000 to 1]<Insert ratio>.
8. Brightness: [250 cd/sq. m]<Insert value>.
9. ENERGY STAR compliant.
10. Antiglare display.

H. Speakers:

1. Two, with individual controls for volume, bass, and treble.
2. Signal to Noise Ratio: At least 65 dB.
3. Power: At least 4 W per speaker/channel.
4. Magnetic shielding to prevent distortion on the video monitor.

I. I/O Cabling: Include applicable cabling to connect I/O devices.

J. Software:

1. Factory-installed operating system.

2.14 PORTABLE WORKSTATIONS

A. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [Dell Technologies Inc.]
2. [HP Inc.]
3. [Lenovo Holding Co., Inc.; Lenovo Group Ltd.]
4. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [Dell Technologies Inc.]
2. [HP Inc.]
3. [Lenovo Holding Co., Inc.; Lenovo Group Ltd.]
4. <Insert manufacturer's name>

C. Performance Requirements:

1. Performance requirements may dictate equipment exceeding minimum requirements indicated.
2. ENERGY STAR compliant.
3. Hardware and software must support local downloading to DDC controllers.
4. Data transfer rate to DDC controller must be at network speed.

D. Processor:

1. Minimum Processor Speed: <Insert gigahertz>.
2. RAM:
 - a. Capacity: <Insert value>[GB][TB].
 - b. Speed and Type: <Insert value> MHz, <Insert type>.
3. Hard Drive:

- a. Media: **[Solid state][Rotating disc, nominal rotational speed of 7200 rpm][Hybrid solid-state and rotating disc]**.
 - b. Number of Hard Drives: **[One][Two]<Insert number>**.
 - c. Capacity: **<Insert number and measurement unit>**.
 - d. Minimum Average Seek Time: **<Insert number and measurement unit>**.
 - e. Cache Buffer Size: **<Insert number and measurement unit>**.
 - f. **<Insert requirements>**.
4. Video Card: **<Insert number and measurement unit>** of RAM.
- E. Input and Output Ports:
1. Serial port.
 2. Shared port for external keyboard or mouse.
 3. Four USB 3.0 ports.
 4. Ethernet port.
 5. HDMI port.
 6. IEEE 1394 port.
- F. Battery:
1. Capable of supporting operation of portable workstation for a minimum of **[8]<Insert number>** hours.
 2. Battery life of at least three years.
 3. Battery charge time of less than three hours.
 4. Spare Batteries: **[One][Two]**.
- G. Keyboard:
1. 85-key **[backlit]** keyboard.
 2. Full upper- and lowercase ASCII keyset.
- H. Integral Pointing Device: Touchpad with two buttons. Gesture enabled.
- I. Display:
1. **<Insert inch (mm)>** diagonal or larger high-definition WLED color display.
 2. Antiglare screen.
 3. **[1920 by 1080]<Insert value>** pixel resolution.
 4. Brightness: 300 nits.
- J. Network Interfaces:
1. Network Interface Card: Include card with connection, as application.
 - a. 10-100-1000 base TX Ethernet with 8PSJ connector port.
 - b. 100 base FX Ethernet with SC or ST port.
 2. Wireless:
 - a. Internal with integrated antenna, capable of supporting 802.11 a/b/g/n.
- K. Digital Video Disc Rewrite Recorder (DVD+/-RW):

1. Compatible with DVD disks and data, audio, recordable and rewritable compact disks.
2. Nominal Data Transfer Rates:
 - a. Reading: <Insert number>[MB][TB]/s.
 - b. Writing: <Insert number>[MB][TB]/s.
3. 160 ms access time.

L. Accessories:

1. Nylon carrying case.
2. Docking station.
3. Mobile broadband card.
4. Wireless optical mouse.
5. <Insert value>[GB][TB] portable hard drive.
6. Light-sensitive web cam and noise-cancelling digital array microphone.
7. Category 6a patch cable. Minimum cable length must be <Insert length>.
8. HDMI cable. Minimum cable length must be <Insert length>.

2.15 RACEWAYS AND BOXES

- A. Comply with requirements in Section 260533.13 "Conduits for Electrical Systems" for raceways for electrical power wiring and NFPA 70 Class 1 remote-control and signaling circuits.
- B. Comply with requirements in Section 270528 "Pathways for Communications Systems" for control wiring, TIA-232 cable, and NFPA 70 Class 2 remote-control and signaling circuits.

2.16 WIRES AND CABLES

- A. Electrical Power Wiring: Comply with requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
 1. Copper conductors are Type THHN/THWN-2.
- B. Control Wiring: Comply with requirements in Section 260523 "Control-Voltage Electrical Power Cables."
 1. Optical-Fiber Cable: Multimode, 50/125 micrometer OM3, six-fiber, [nonconductive,]tight-buffer, optical-fiber cable, with aqua jacket.
 2. Balanced Twisted Pair Cable: 100 ohm, four-pair [Category 5e][Category 6].
 3. Workstation Outlets: Four-port-connector assemblies mounted in single or multigang faceplate. Coordinate color and labels with Section 262726 "Wiring Devices."
 4. TIA-485 Cable: Paired, [one pair][two pairs], twisted, No. 22 AWG, stranded (7x30) tinned-copper conductors.
 5. Control-Voltage Cable: Multiple conductor, color-coded, No. 20 AWG copper, minimum.
 - a. Sheath: PVC; except in plenum-type spaces, use sheath listed for plenums.
 - b. Ordinary Switching Circuits: Three conductors unless otherwise indicated.
 - c. Switching Circuits with Pilot Lights or Locator Feature: Five conductors unless otherwise indicated.
- C. TIA-232 Cable:
 1. PVC-Jacketed, TIA-232 Cable: Paired, two pairs, No. 22 AWG, stranded (7x30) tinned copper

conductors, polypropylene insulation, and individual aluminum foil-polyester tape shielded pairs with 100 percent shield coverage; PVC jacket. Pairs are cabled on common axis with No. 24 AWG, stranded (7x32) tinned copper drain wire.

- a. Type CM.
 - b. Flame Resistance: UL 1581, vertical tray.
2. Plenum-Type, TIA-232 Cable: Paired, two pairs, No. 22 AWG, stranded (7x30) tinned copper conductors, plastic insulation, and individual aluminum foil-polyester tape shielded pairs with 100 percent shield coverage; plastic jacket. Pairs are cabled on common axis with No. 24 AWG, stranded (7x32) tinned copper drain wire.
 - a. Type CMP.
 - b. Flame Resistance: NFPA 262, flame test.

2.17 SURGE PROTECTION DEVICES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

1. **[ABB, Electrification Business]**
2. **[Advanced Protection Technologies Inc. (APT)]**
3. **[ALLTEC LLC]**
4. **[Eaton]**
5. **[Emerson Electric Co., Automation Solutions]**
6. **[LEA International]**
7. **[Leviton Manufacturing Co., Inc.]**
8. **[Mersen USA]**
9. **[PowerLogics, Inc./PQ Protection]**
10. **[Schneider Electric USA, Inc.]**
11. **[Siemens Industry, Inc., Energy Management Division]**
12. **<Insert manufacturer's name>**

- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[ABB, Electrification Business]**
2. **[Advanced Protection Technologies Inc. (APT)]**
3. **[ALLTEC LLC]**
4. **[Eaton]**
5. **[Emerson Electric Co., Automation Solutions]**
6. **[LEA International]**
7. **[Leviton Manufacturing Co., Inc.]**
8. **[Mersen USA]**
9. **[PowerLogics, Inc./PQ Protection]**
10. **[Schneider Electric USA, Inc.]**
11. **[Siemens Industry, Inc., Energy Management Division]**
12. **<Insert manufacturer's name>**

- C. SPDs: Comply with UL 1449, **[Type 1][Type 2]**.

1. Include LED indicator lights for power and protection status.
2. Internal thermal protection that disconnects the SPD before damaging internal suppressor

- components.
3. Include Form-C contacts rated at 5 A and 250 V(ac), one normally open and one normally closed, for remote monitoring of protection status. [**Contacts must reverse on failure of surge diversion module or on opening of current-limiting device. Coordinate with building power monitoring and control system.**]
- D. Peak Surge Current Rating: The minimum single-pulse surge current withstand rating per phase must not be less than **[100 kA]<Insert value>**. The peak surge current rating must be the arithmetic sum of the ratings of the individual metal-oxide varistors in a given mode.
- E. Comply with UL 1283.
- F. Protection modes and UL 1449 SPD for grounded wye circuits with **[480Y/277 V][208Y/120 V]**, three-phase, four-wire circuits must not exceed the following:
1. L-N: **[1200 V for 480Y/277 V][700 V for 208Y/120 V]**.
 2. L-G: **[1200 V for 480Y/277 V][700 V for 208Y/120 V]**.
 3. N-G: **[1200 V for 480Y/277 V][700 V for 208Y/120 V]**.
 4. L-L: **[2000 V for 480Y/277 V][1200 V for 208Y/120 V]**.
- G. Protection modes and UL 1449 SPD for 240/120 V, single-phase, three-wire circuits must not exceed the following:
1. L-N: 700 V.
 2. L-G: 700 V.
 3. N-G: 700 V.
 4. L-L: 1200 V.
- H. SCCR: Equal or exceed **[100][200]<Insert value>** kA.
- I. Nominal Rating: **[20][10]** kA.
- J. Indoor Enclosures: NEMA 250, Type 1.
- K. Outdoor Enclosures: NEMA 250, **[Type 3R][Type 4][Type 4X]**.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine pathway elements intended for cables. Check raceways, cable trays, and other elements for compliance with space allocations, installation tolerances, hazards to cable installation, and other conditions affecting performance of the Work.
- B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF POWER MONITORING AND CONTROL SYSTEMS

- A. Wiring Method: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters. Conceal raceway and cables except in unfinished spaces.
- B. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and

without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.

C. Wiring and Cabling Installation:

1. Comply with Section 260519 "Low-Voltage Electrical Power Conductors and Cables" for electrical power wiring.
2. Comply with Section 260523 "Control-Voltage Electrical Power Cables" for control wiring.

D. Raceways Installation:

1. Comply with Section 260533.13 "Conduits for Electrical Systems" for electrical power wiring and NFPA 70 Class 1 remote-control and signaling circuits.
2. Comply with Section 270528 "Pathways for Communications Systems" for control wiring, TIA-232 cable, and NFPA 70 Class 2 remote-control and signaling circuits.

E. Identification Installation:

1. Comply with Section 260519 "Low-Voltage Electrical Power Conductors and Cables" for electrical power wiring.
2. Comply with Section 271513 "Communications Copper Horizontal Cabling" for identification products and cable management system requirements for twisted pair cable, TIA-485 cable, control-voltage cable, and TIA-232 cable.
3. Comply with Section 271523 "Communications Optical Fiber Horizontal Cabling" for identification products and cable management system requirements for optical-fiber cable.

3.3 INSTALLATION OF WORKSTATIONS

A. Desktop Workstations Installation:

1. Install workstation(s) at location(s) directed by Owner.
2. Install multiple-receptacle power strip with cord for use in connecting multiple workstation components to a single, duplex electrical power receptacle.
3. Install software on workstation(s) and verify that software functions properly.
4. Develop Project-specific graphics, trends, reports, logs, and historical database.
5. Power workstation through a UPS unit. Locate UPS adjacent to workstation.

B. Portable Workstations Installation:

1. Turn over portable workstations to Owner at Substantial Completion.
2. Install software on workstation(s) and verify that software functions properly.

C. Graphics Application:

1. Use system schematics indicated as starting point to create graphics.
2. Develop Project-specific library of symbols for representing system equipment and products.
3. Incorporate digital images of Project-completed installation into graphics where beneficial to enhance effect.
4. Submit sketch of graphic layout with description of text for each graphic for Owner's[and **Architect's**] review before creating graphic using graphics software.
5. Seek Owner input in graphics development once using graphics software.
6. Final editing must be done on-site with Owner's review and feedback.
7. Refine graphics as necessary for Owner acceptance.
8. On receiving Owner acceptance, print a hard copy to include in operation and maintenance manual. Prepare a scanned copy PDF file of each graphic and include with softcopy of the

system operation and maintenance manual.

3.4 NETWORK NAMING AND NUMBERING

- A. Coordinate with Owner and provide unique naming and addressing for networks and devices.

3.5 GROUNDING

- A. For data communication wiring, comply with BICSI N1.
- B. For control-voltage wiring and cabling, comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."

3.6 FIELD QUALITY CONTROL

- A. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- B. Tests and Inspections:
 - 1. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
 - 2. Visually inspect balanced twisted pair cabling and optical-fiber cable jacket materials for UL or third-party certification markings. Inspect cabling terminations to confirm color-coding for pin assignments, and inspect cabling connections to confirm compliance with TIA-568-C.1.
 - 3. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of components.
 - 4. Test balanced twisted pair cabling for direct-current loop resistance, shorts, opens, intermittent faults, and polarity between conductors. Test operation of shorting bars in connection blocks. Test cables after termination, but not after cross-connection.
 - a. Test instruments must meet or exceed applicable requirements in TIA-568-C.2. Perform tests with a tester that complies with performance requirements in its "Test Instruments (Normative)" Annex, complying with measurement accuracy specified in its "Measurement Accuracy (Informative)" Annex. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.
 - b. Document data for each measurement. Print data for submittals in a summary report that is formatted using Table 10.1 in BICSI TDMM as a guide, or transfer the data from the instrument to the computer, save as text files, print, and submit.
 - 5. Optical-Fiber Cable Tests:
 - a. Test instruments must meet or exceed applicable requirements in TIA-568-C.0. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.
 - b. Link End-to-End Attenuation Tests:
 - 1) Multimode Link Measurements: Test at 850 or 1300 nm in one direction according to IEC 61280-4-1.
 - 2) Attenuation test results for links must be less than **[2.0 dB][that calculated according to equation in TIA-568-C.0]**.

- c. Document data for each measurement. Print data for submittals in a summary report that is formatted using Table 10.1 in BICSI TDMM as a guide, or transfer the data from the instrument to the computer, save as text files, print, and submit.

6. Power Monitoring and Control System Tests.

a. Test Analog Signals:

- 1) Check analog voltage signals using a precision voltage meter at zero, 50, and 100 percent.
- 2) Check analog current signals using a precision current meter at zero, 50, and 100 percent.
- 3) Check resistance signals for temperature sensors at zero, 50, and 100 percent of operating span using a precision-resistant source.

b. Test Digital Signals:

- 1) Check digital signals using a jumper wire.
- 2) Check digital signals using an ohmmeter to test for contact making or breaking.

c. I/O Control Loop Tests:

- 1) Test every I/O point to verify that safety and operating control set points are as indicated and as required to operate controlled system safely and at optimum performance.
- 2) Test every I/O point throughout its full operating range.
- 3) Test every control loop to verify that operation is stable and accurate.
- 4) Adjust control loop proportional, integral, and derivative settings to achieve optimum performance while complying with performance requirements indicated. Document testing of each control loop's precision and stability via trend logs.
- 5) Test and adjust every control loop for proper operation according to sequence of operation.
- 6) Test software and hardware interlocks for proper operation.
- 7) Operate each analog point at the following:
 - a) Upper quarter of range.
 - b) Lower quarter of range.
 - c) At midpoint of range.
- 8) Exercise each binary point.
- 9) For every I/O point in the system, read and record each value at workstation, at controller, and at field instrument simultaneously. Value displayed at workstation and at field instrument must match.
- 10) Prepare and submit a report documenting results for each I/O point in the system, and include in each I/O point a description of corrective measures and adjustments made to achieve desired results.

C. Nonconforming Work:

- 1. Wiring and cabling will be considered defective if they do not pass tests and inspections.

D. Prepare test and inspection reports.

**3.7 FINAL REVIEW**

- A. Submit written request to Architect **[and][Construction Manager]** when the power monitoring and control system is ready for final review. Written request must state the following:
 - 1. The system has been thoroughly inspected for compliance with Contract Documents and found to be in full compliance.
 - 2. The system has been calibrated, adjusted, and tested and found to comply with requirements of operational stability, accuracy, speed, and other performance requirements indicated.
 - 3. The system monitoring and control of electrical distribution systems results in operation according to sequences of operation indicated.
 - 4. The system is complete and ready for final review.
- B. Review by **[Architect][and][Construction Manager]** will be made after receipt of written request. A field report must be issued to document observations and deficiencies.
- C. Take prompt action to remedy deficiencies indicated in field report and submit a second written request when deficiencies have been corrected. Repeat process until no deficiencies are reported.
- D. Final review must include a demonstration to parties participating in final review.

3.8 MAINTENANCE SERVICE

- A. Beginning at Substantial Completion, maintenance service must include **[three][six][nine][12]** months' full maintenance by manufacturer's authorized service representative. Include **[quarterly][semiannual][annual]** preventive maintenance, repair or replacement of defective components, cleaning, and adjusting as required for proper system operation. Parts and supplies must be manufacturer's authorized replacement parts and supplies.

3.9 SOFTWARE SERVICE AGREEMENT

- A. Technical Support: Beginning at Substantial Completion, service agreement must include software support for **[two]<Insert number>** years.
- B. Upgrade Service: At Substantial Completion, update software to latest version. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. Upgrading software must include operating system and new or revised licenses for using software.
 - 1. Upgrade Notice: At least **[30]<Insert number>** days to allow Owner to schedule and access the system and to upgrade computer equipment if necessary.

3.10 TRAINING

- A. Attendee Training Manuals:
 - 1. Provide each attendee with a color hard copy of training materials and visual presentations.
 - 2. Hard-copy materials must be organized in a three-ring binder with table of contents and individual divider tabs marked for each logical grouping of subject matter. Organize material to provide space for attendees to take handwritten notes within training manuals.
 - 3. In addition to hard-copy materials included in training manual, provide each binder with a sleeve or pocket that includes a DVD or flash drive with PDF copy of hard-copy materials.

- B. On-Site Training:
1. Owner will provide conditioned classroom or workspace with ample desks or tables, chairs, power, and data connectivity for instructor and each attendee.
 2. Instructor must provide training materials, projector, and other audiovisual equipment used in training.
 3. Provide as much of training located on-site as deemed feasible and practical by Owner.
 4. On-site training must include regular walk-through tours, as required, to observe each unique product type installed with hands-on review of operation, calibration, and service requirements.
 5. The workstation provided with the system must be used in training. If workstation is not indicated, provide a temporary workstation to convey training content.
- C. Off-Site Training:
1. Provide conditioned training rooms and workspace with ample tables, chairs, power, and data connectivity for each attendee.
 2. Provide capability to remotely access to Project monitoring and control system for use in training.
 3. Provide a workstation for use by each attendee.
- D. At Completion of Training: Staff familiar with the system installed are capable of demonstrating operation of the system during final review.
- E. Demonstration must include, but not be limited to, the following:
1. Accuracy and calibration of [10]<Insert number> I/O points randomly selected by reviewers. If review finds that some I/O points are not properly calibrated and not satisfying performance requirements indicated, additional I/O points may be selected by reviewers until total I/O points being reviewed that satisfy requirements equals quantity indicated.
 2. Reporting of alarm conditions for randomly selected alarms, including different classes of alarms, to ensure that alarms are properly received by operators and workstations.
 3. Trends, summaries, logs, and reports set-up for Project.
 4. Software's ability to communicate with controllers, workstations, and uploading and downloading of control programs.
 5. Software's ability to edit control programs off-line.
 6. Data entry to show Project-specific customizing capability including parameter changes.
 7. Step through penetration tree, display graphics, demonstrate dynamic update, and direct access to graphics.
 8. Execution of digital and analog commands in graphic mode.
 9. Spreadsheet and curve plot software and its integration with database.
 10. Online user guide and help functions.
 11. For Each Meter:
 - a. Memory: Programmed data, parameters, trend, and alarm history collected during normal operation is not lost during power failure.
 - b. Operator Interface: Ability to connect directly to each meter with a portable workstation.
 - c. Wiring Labels: Match control drawings.
 - d. Network Communication: Ability to locate a meter on the network. Communication architecture matches Shop Drawings.
 - e. Nameplates and Tags: Accurate and permanently attached to control panel doors, instrument, actuators, and devices.
 12. For Each Workstation:
 - a. I/O point lists agree with naming conventions.
 - b. Graphics are complete.

- c. UPS unit, if applicable, operates.

END OF SECTION 26 09 23 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 09 23 00A - LIGHTING CONTROL DEVICES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Time switches.
2. Outdoor photoelectric switches.
3. Daylight-harvesting controls.
4. Business occupancy and vacancy sensors.
5. Storage occupancy sensors.
6. Outdoor motion sensors.
7. Industrial control switches.
8. Emergency lighting controls.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding of lighting control devices referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers and supports referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
7. **[Section 262726 "Wiring Devices"]****[Section 262726.11 "General-Use Switches, Dimmer Switches, and Fan-Speed Controller Switches"]** for wall-box dimmers and manual light switches.

1.2 DEFINITIONS

- A. BCELTS: Branch circuit emergency lighting transfer switch.
- B. DPDT: Double pole double throw.
- C. DPST: Double pole single throw.
- D. N.C.: Normally closed.
- E. N.O.: Normally open.
- F. PIR: Passive infrared.

- G. SPDT: Single pole double throw.
- H. SPST: Single pole single throw.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.
 - 2. Include manufacturer's sample extended warranty language.
- B. Shop Drawings: Prepare and submit the following:
 - 1. Show installation details for the following:
 - a. Occupancy sensors.
 - b. Vacancy sensors.
 - 2. Interconnection diagrams showing field-installed wiring.
 - 3. Diagrams for power, signal, and control wiring.
- C. Sustainable Design Submittals:
 - 1. ASHRAE/IES 90.1 LPD Compliance Documentation: Prepare plans and calculations demonstrating that as-constructed lighting power density complies with mandatory provisions of ASHRAE/IES 90.1 and that as-constructed lighting, including daylighting and controls, improves on baseline energy performance. If included with Project, indicate locations of energy meters for lighting loads.
 - 2. Lighting Control Documentation: Floor plans indicating the following information:
 - a. As-installed locations of switches and dimmers.
 - b. Lighting zones and control strategy for each switch or dimmer, including unoccupied time-delay setting for shut-off and override time-delay setting for shut-off.
 - c. Multilevel or dimming range capability for each switch or dimmer.
 - d. Which switches or dimmers are operated by occupancy sensors, vacancy sensors, daylighting sensors, or time clocks.
- D. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Field Reports:
 - 1. Manufacturer's field reports for field quality-control support.
 - 2. Field reports for software and firmware upgrades.

1.5 CLOSEOUT SUBMITTALS

- A. Warranty documentation.
- B. Software and firmware service agreement.

1.6 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, conduct tests of complex equipment, analyze test and equipment data, plan a job, and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multiteam projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.
- D. Lighting Testing and Inspecting Agency: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with documented training and experience with testing and inspecting lighting installations in accordance with applicable IES standards.

1.7 WARRANTY

- A. Special Installer Extended Warranty: Installer warrants that installed lighting control devices perform in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Extended-Warranty Period: [Two][Three][Four]<Insert number> years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that lighting control devices perform in accordance with specified requirements and agrees to provide repair or replacement of components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.

1. Failures include, but are not limited to, the following:
 - a. Faulty operation of lighting control software.
 - b. Faulty operation of lighting control devices.
 - c. **<Insert failure modes>**.
2. Initial Extended-Warranty Period: **[Three][Four][Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
3. Follow-On Extended-Warranty Period: **[Eight]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for materials only, free on board **[origin][destination]**, freight prepaid.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements:

1. Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
2. Must comply with CCR Title 24.

2.2 TIME SWITCHES

A. UL WGZR - Electronic Time Switch :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Intermatic, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[nLight; Acuity Brands Lighting, Inc.]**
 - e. **[NSi Industries LLC]**
 - f. **[Schneider Electric USA, Inc.]**
 - g. **[TE Connectivity Ltd.]**
 - h. **[Touché Lighting Control]**
 - i. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Intermatic, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[nLight; Acuity Brands Lighting, Inc.]**
 - e. **[NSi Industries LLC]**
 - f. **[Schneider Electric USA, Inc.]**

- g. **[TE Connectivity Ltd.]**
- h. **[Touché Lighting Control]**
- i. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Clock-Operated Switches: UL CCN WGZR, including UL 917.
- 5. Standard Features:
 - a. Contact Configuration: **[SPST][DPST][DPDT]<Insert configuration>**.
 - b. Contact Rating: **[30 A inductive or resistive, 240 V(ac)][20 A driver load, 120/240 V(ac)]<Insert rating>**.
 - c. Programs:
 - 1) Eight on-off set points on a 24-hour schedule **[and an annual holiday schedule that overrides the weekly operation on holidays]**.
 - 2) Two on-off set points on a 24-hour schedule, allowing different set points for each day of the week **[and an annual holiday schedule that overrides the weekly operation on holidays]**.
 - 3) **<Insert number>** channels; each channel is individually programmable with eight on-off set points on a 24-hour schedule.
 - 4) **<Insert number>** channels; each channel is individually programmable with two on-off set points on a 24-hour schedule with a skip-a-day weekly schedule.
 - 5) **<Insert number>** channels; each channel is individually programmable with two on-off set points on a 24-hour schedule, allowing different set points for each day of the week.
 - 6) **<Insert number>** channels; each channel is individually programmable with 40 on-off operations per week and an annual holiday schedule that overrides the weekly operation on holidays.
 - 7) **<Insert number>** channels; each channel is individually programmable with 40 on-off operations per week, plus four seasonal schedules that modify the basic program and an annual holiday schedule that overrides the weekly operation on holidays.
 - 8) **<Insert configuration>[and an annual holiday schedule that overrides the weekly operation on holidays]**.
 - d. Circuitry: Allow connection of a photoelectric relay as substitute for on-off function of a program **[on selected channels]**.
 - e. Astronomic Time: **[All][Selected]** channels.
 - f. Automatic daylight savings time changeover.
 - g. Battery Backup: Not less than seven days' reserve, to maintain schedules and time clock.

B. UL WGZR - Electromechanical-Dial Time Switch :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Intermatic, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[NSi Industries LLC]**

- e. [Schneider Electric USA, Inc.]
 - f. [TE Connectivity Ltd.]
 - g. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Eaton]
 - b. [Intermatic, Inc]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [NSi Industries LLC]
 - e. [Schneider Electric USA, Inc.]
 - f. [TE Connectivity Ltd.]
 - g. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Clock-Operated Switches: UL CCN WGZR, including UL 917.
5. Standard Features:
- a. Contact Configuration: [SPST][DPST][SPDT][DPDT]<Insert configuration>.
 - b. Contact Rating: [30 A inductive or resistive, 240 V(ac)][20 A driver load, 120/240 V(ac)]<Insert rating>.
 - c. Circuitry: Allows connection of a photoelectric relay as a substitute for the on-off function of a program.
 - d. Astronomic time dial.
 - e. Eight-Day Program: Uniquely programmable for each weekday and holidays.
 - f. Skip-a-day mode.
 - g. Wound-spring reserve carryover mechanism to keep time during power failures, minimum of [16]<Insert number> hours.

C. UL WGZR - Digital Timer Light Switch :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [Eaton]
 - b. [Intermatic, Inc]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [nLight; Acuity Brands Lighting, Inc.]
 - e. [NSi Industries LLC]
 - f. [Schneider Electric USA, Inc.]
 - g. [TE Connectivity Ltd.]
 - h. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[Eaton]**
 - b. **[Intermatic, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[nLight; Acuity Brands Lighting, Inc.]**
 - e. **[NSi Industries LLC]**
 - f. **[Schneider Electric USA, Inc.]**
 - g. **[TE Connectivity Ltd.]**
 - h. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Clock-Operated Switches: UL CCN WGZR, including UL 917.
5. Standard Features:
 - a. Combination digital timer and conventional switch lighting control unit. Switchbox-mounted, backlit LCD display, with selectable time interval in **[10][20]**-minute increments.
 - b. Rated 960 W at 120 V(ac) for tungsten lighting, 10 A at 120 V(ac) or 10 A at 277 V(ac) for fluorescent or LED lighting, and 1/4 hp at 120 V(ac).
 - c. Standards: Comply with UL 20.
 - d. Integral relay for connection to BAS.
 - e. Voltage: **[Match the circuit voltage][120 V][277 V][Dual voltage - 120 and 277 V]**.
 - f. Color: **[White][Black]<Insert color>**.
 - g. Faceplate: Color matched to switch.

2.3 OUTDOOR PHOTOELECTRIC SWITCHES

A. UL WJFX - Solid-State Outdoor Photoelectric Switch, Flexible Mounting :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Intermatic, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[nLight; Acuity Brands Lighting, Inc.]**
 - e. **[NSi Industries LLC]**
 - f. **[TE Connectivity Ltd.]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Intermatic, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[nLight; Acuity Brands Lighting, Inc.]**
 - e. **[NSi Industries LLC]**
 - f. **[TE Connectivity Ltd.]**

g. <Insert manufacturer's name>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Plug-in, Locking-Type Photocontrols: UL CCN WJFX, including UL 773.
5. Standard Features:
 - a. Solid state, with [SPST][DPST]<Insert configuration> dry contacts rated for **[1000 W incandescent][or][1800 VA inductive]<Insert value>**, to operate connected relay, contactor coils, or microprocessor input; and compatible with drivers and LED lamps.
 - b. Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - c. Light-Level Monitoring Range: **1.5 to 10 fc (16.14 to 108 lx)**, with an adjustment for turn-on and turn-off levels within that range[, and a directional lens in front of the photocell to prevent fixed light sources from causing turn-off].
 - d. Time Delay: Fifteen-second minimum, to prevent false operation.
 - e. Surge Protection: Metal-oxide varistor.
 - f. Mounting: Twist lock complies with ANSI C136.10, with base-and-stem mounting or stem-and-swivel mounting accessories as required to direct sensor to the north sky exposure[**from same source and manufacturer as switch**].
 - g. Failure Mode: Luminaire stays ON.

B. UL WJFX - Solid-State Outdoor Photoelectric Switch, Luminaire-Mounted :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Eaton]
 - b. [Intermatic, Inc]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [nLight; Acuity Brands Lighting, Inc.]
 - e. [NSi Industries LLC]
 - f. [TE Connectivity Ltd.]
 - g. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Eaton]
 - b. [Intermatic, Inc]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [nLight; Acuity Brands Lighting, Inc.]
 - e. [NSi Industries LLC]
 - f. [TE Connectivity Ltd.]
 - g. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.

4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Plug-in, Locking-Type Photocontrols: UL CCN WJFX, including UL 773.
5. Standard Features:
 - a. Solid state, with **[SPST][DPST]** dry contacts rated for **[1000 W incandescent][or][1800 VA inductive]**, to operate connected load, and compatible with CFL and LED lamps.
 - b. Light-Level Monitoring Range: **1.5 to 10 fc (16.14 to 108 lx)**, with an adjustment for turn-on and turn-off levels within that range.
 - c. Time Delay: Thirty-second minimum, to prevent false operation.
 - d. Lightning Arrester: Air-gap type.
 - e. Mounting: Twist lock complying with ANSI C136.10, with base **[from same source and manufacturer as switch]**.
 - f. Failure Mode: Luminaire stays ON.

C. UL WJFX - Solid-State, Low-Voltage, Outdoor Photoelectric Switch :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Intermatic, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[nLight; Acuity Brands Lighting, Inc.]**
 - e. **[NSi Industries LLC]**
 - f. **[TE Connectivity Ltd.]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Intermatic, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[nLight; Acuity Brands Lighting, Inc.]**
 - e. **[NSi Industries LLC]**
 - f. **[TE Connectivity Ltd.]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Plug-in, Locking-Type Photocontrols: UL CCN WJFX, including UL 773.
5. Standard Features:
 - a. Solid state; one set of N.O. dry contacts rated for **[24 V(dc) at 1 A][24 V(ac) at 1 A]**, to operate connected load, and compatible with **[luminaire][power pack][lighting control**

- panelboard].**
- b. Light-Level Monitoring Range: **1.5 to 10 fc (16.14 to 108 lx)**, with an adjustment for turn-on and turn-off levels within that range.
 - c. Time Delay: Thirty-second minimum, to prevent false operation.
 - d. Mounting: **1/2 inch (13 mm)** threaded male conduit.
 - e. Failure Mode: Luminaire stays ON.
 - f. Power Pack:
 - 1) Dry contacts rated for **[20 A]<Insert value>[driver][or][LED]** load at 120 and 277 V(ac), for **[13 A]<Insert value>** tungsten at 120 V(ac), and for **[1 hp]<Insert value>** at 120 V(ac). Sensor has 24 V(dc), 150 mA, Class 2 power source.
 - a) LED status lights to indicate load status.
 - b) Plenum rated.
 - 2) Digital controller capable of accepting **[three][four]<Insert number>** 8PSJ inputs with **[one][two]** outputs rated for **[20 A]<Insert value>** incandescent **[or LED]** load at 120 and 277 V(ac), for **[13 A][16 A]<Insert value>[driver][or][LED]** at 120 and 277 V(ac), and for **[1 hp]<Insert value>** at 120 V(ac). Sensor has 24 V(dc), Class 2 power source.
 - a) With integral current monitoring.
 - b) Compatible with digital addressable lighting interface.
 - c) Plenum rated.

2.4 DAYLIGHT-HARVESTING CONTROLS

A. UL WJCT - Daylight-Harvesting Control Switch :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Eaton]**
 - b. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - e. **[nLight; Acuity Brands Lighting, Inc.]**
 - f. **[NSi Industries LLC]**
 - g. **[Sensor Switch, Inc]**
 - h. **[TE Connectivity Ltd.]**
 - i. **[WattStopper; Legrand North America, LLC]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**

- d. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
 - e. [nLight; Acuity Brands Lighting, Inc.]
 - f. [NSi Industries LLC]
 - g. [Sensor Switch, Inc]
 - h. [TE Connectivity Ltd.]
 - i. [WattStopper; Legrand North America, LLC]
 - j. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Photoelectric Switches: UL CCN WJCT, including UL 773A.
5. Standard Features:
- a. System operates indoor lighting.
 - b. Ceiling-Mounted Switching Controls:
 - 1) Solid-state, light-level sensor unit, with [integrated]power pack, that detects changes in indoor lighting levels that are perceived by the eye.
 - 2) Solid-state, light-level sensor unit, with separate power pack[mounted on luminaire], that detects changes in indoor lighting levels that are perceived by the eye.
 - c. Operating Ambient Conditions: Dry interior conditions, **32 to 120 deg F (0 to 49 deg C)**.
 - d. Sensor Output:
 - 1) Contacts rated to operate the associated power pack, complying with UL 773A. Sensor must be powered by the power pack.
 - 2) Digital signal compatible with power pack.
 - e. Sensor Type: [Open loop][Closed loop].
 - f. Zone: [Single][Multi].
 - g. Power Pack:
 - 1) Dry contacts rated for [20 A]<Insert value>[driver][or][LED] load at 120 and 277 V(ac), for [13 A]<Insert value> tungsten at 120 V(ac), and for [1 hp]<Insert value> at 120 V(ac). Sensor has 24 V(dc), 150 mA, Class 2 power source.
 - a) LED status lights to indicate load status.
 - b) Plenum rated.
 - 2) Digital controller capable of accepting [three][four]<Insert number> 8PSJ inputs with [one][two] outputs rated for [20 A]<Insert value> incandescent [or][LED] load at 120 and 277 V(ac), for [13 A][16 A]<Insert value>[driver][or LED] at 120 and 277 V(ac), and for [1 hp]<Insert value> at 120 V(ac). Sensor has 24 V(dc) Class 2 power source.
 - a) With integral current monitoring
 - b) Compatible with digital addressable lighting interface.
 - c) Plenum rated.
 - h. General Space Sensors Light-Level Monitoring Range: **10 to 200 fc (108 to 2152 lx)**, with an adjustment for turn-on and turn-off levels within that range.

- i. Atrium Space Sensors Light-Level Monitoring Range: **100 to 1000 fc (1080 to 10 800 lx)**, with an adjustment for turn-on and turn-off levels within that range.
 - j. Skylight Sensors Light-Level Monitoring Range: **1000 to 10 000 fc (10 800 to 108 000 lx)**, with an adjustment for turn-on and turn-off levels within that range.
 - k. Time Delay: Adjustable from 5 to 300 seconds to prevent cycling.
 - l. Set-Point Adjustment: Equip with deadband adjustment of 25, 50, and 75 percent above the "on" set point, or provide with separate adjustable "on" and "off" set points.
 - m. Test Mode: User selectable, overriding programmed time delay to allow settings check.
 - n. Control Load Status: User selectable to confirm that load wiring is correct.
 - o. Indicator: Two digital displays to indicate the beginning of on-off cycles.
6. Sequence of Operation: As daylight increases, the lights are turned off at a predetermined level. As daylight decreases, the lights are turned on at a predetermined level.
- a. Lighting control set point is based on two lighting conditions:
 - 1) When no daylight is present.
 - 2) When significant daylight is present (target level).
 - b. System programming is done with two handheld, remote-control tools.

B. UL WJCT - Daylight-Harvesting Analog Control Dimmer :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Deep Roof Lighting]**
 - b. **[Eaton]**
 - c. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[WattStopper; Legrand North America, LLC]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Deep Roof Lighting]**
 - b. **[Eaton]**
 - c. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[WattStopper; Legrand North America, LLC]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Photoelectric Switches: UL CCN WJCT, including UL 773A.
- 5. Standard Features:
 - a. Sensing daylight and electrical lighting levels, the system adjusts the indoor electrical lighting levels. As daylight increases, the lights are dimmed.
 - b. System programming is done with two handheld, remote-control tools.
 - 1) Initial setup tool.
 - 2) Tool for occupants to adjust the target levels by increasing the set point up to 25 percent, or by minimizing the electric lighting level.
 - c. Ceiling-Mounted Dimming Controls: Solid-state, light-level sensor unit, with **[integrated][separate]** power pack **[mounted on luminaire]**, to detect changes in indoor lighting levels that are perceived by the eye.
 - d. Sensor Output: 0-10 V(dc) to operate luminaires. Sensor is powered by controller unit.
 - e. Light-Level Sensor Set-Point Adjustment Range: **20 to 60 fc (120 to 640 lx)**.
 - f. Power Pack: Dry contacts rated for **[20 A]<Insert value>** **[driver][or][LED]** load at 120 and 277 V(ac), for **[13 A]<Insert value>** tungsten at 120 V(ac), and for **[1 hp]<Insert value>** at 120 V(ac). Sensor has 24 V(dc), 150 mA, Class 2 power source.
 - 1) LED status lights to indicate load status.
 - 2) Plenum rated.
- 6. Sequence of Operation: Lighting control set point is based on two lighting conditions:
 - a. When no daylight is present (target level).
 - b. When significant daylight is present.
- C. UL WJCT - Daylight-Harvesting Digital Control Dimmer :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Deep Roof Lighting]**
 - b. **[Eaton]**
 - c. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[nLight; Acuity Brands Lighting, Inc.]**
 - g. **[WattStopper; Legrand North America, LLC]**
 - h. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Deep Roof Lighting]**
 - b. **[Eaton]**
 - c. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**

- f. [nLight; Acuity Brands Lighting, Inc.]
 - g. [WattStopper; Legrand North America, LLC]
 - h. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Photoelectric Switches: UL CCN WJCT, including UL 773A.
5. Standard Features:
- a. Sensing daylight and electrical lighting levels, the system adjusts the indoor electrical lighting levels. As daylight increases, lights are dimmed.
 - b. System programming is done with two handheld, remote-control tools.
 - 1) Initial setup tool.
 - 2) Tool for occupants to adjust the target levels by increasing the set point up to 25 percent, or by minimizing the electric lighting level.
 - c. Ceiling-Mounted Dimming Controls: Solid-state, light-level sensor unit, with [integrated][separate] power pack[mounted on luminaire], to detect changes in indoor lighting levels that are perceived by the eye.
 - d. Sensor Output: 0-10 V(dc) to operate luminaires. Sensor is powered by controller unit.
 - e. Light-Level Sensor Set-Point Adjustment Range: 20 to 60 fc (120 to 640 lx).
 - f. Power Pack: Digital controller capable of accepting [three][four]<Insert number> 8PSJ inputs with [one][two] output(s) rated for [20 A]<Insert value> incandescent [or][LED] load at 120 and 277 V(ac), for [13 A][16 A]<Insert value>[driver load][or][LED] at 120 and 277 V(ac), and for [1 hp]<Insert value> at 120 V(ac). Sensor has 24 V(dc) Class 2 power source.
 - 1) With integral current monitoring.
 - 2) Compatible with digital addressable lighting interface.
 - 3) Plenum rated.
6. Sequence of Operation: Lighting control set point is based on the following two lighting conditions:
- a. When no daylight is present (target level).
 - b. When significant daylight is present.

2.5 BUSINESS OCCUPANCY AND VACANCY SENSORS

A. Passive-Infrared (PIR) Occupancy or Vacancy Sensor :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [Ademco; Honeywell]
 - b. [ADT Security Services, Inc]
 - c. [Cooper Lighting Solutions; Signify North America Corp.]

- d. **[Crestron Electronics, Inc.]**
 - e. **[Honeywell Security Group]**
 - f. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Leviton Manufacturing Co., Inc.]**
 - h. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - i. **[Lutron Electronics Co., Inc]**
 - j. **[Napco Security Technologies, Inc.]**
 - k. **[Pass & Seymour; Legrand North America, LLC]**
 - l. **[RAB Lighting]**
 - m. **[WattStopper; Legrand North America, LLC]**
 - n. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Ademco; Honeywell]**
 - b. **[ADT Security Services, Inc]**
 - c. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - d. **[Crestron Electronics, Inc.]**
 - e. **[Honeywell Security Group]**
 - f. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Leviton Manufacturing Co., Inc.]**
 - h. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - i. **[Lutron Electronics Co., Inc]**
 - j. **[Napco Security Technologies, Inc.]**
 - k. **[Pass & Seymour; Legrand North America, LLC]**
 - l. **[RAB Lighting]**
 - m. **[WattStopper; Legrand North America, LLC]**
 - n. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for one of the following UL product categories:
- a. Photoelectric Controls: UL CCN WJCT, including UL 773A.
 - b. Energy Management Equipment: UL CCN PAZX, including UL 916 or UL 60730-1.
 - c. Intrusion Detection Units: UL CCN ANSR, including UL 639.
5. Standard Features:
- a. **[Wall][Ceiling]-mounted, solid-state indoor [occupancy][and][vacancy] sensors.**
 - b. **[Integrated][Separate] power pack.**
 - c. **[Hardwired][Wireless] connection to switch[and BAS][; and BAS and lighting control system].**
 - d. Sensor Output: **[Contacts rated to operate the connected relay, complying with UL 773A][Sensor is powered from the power pack][Wireless].**
 - e. Power: **[Line voltage][Integral photovoltaic collector].**
 - f. Power Pack: Dry contacts rated for 20 A **[driver][or][LED]** load at 120 and 277 V(ac), for 13 A tungsten at 120 V(ac), and for 1 hp at 120 V(ac). Sensor has 24 V(dc), 150 mA, Class 2 power source.
 - g. Mounting:

- 1) Sensor: Suitable for mounting in any position in a standard device box or outlet box.
 - 2) Relay: Externally mounted through a **1/2 inch (13 mm)** knockout in a standard electrical enclosure.
 - 3) Time-Delay and Sensitivity Adjustments: Recessed and concealed behind hinged door.
- h. Indicator: Digital display, to show when motion is detected during testing and normal operation of sensor.
- i. Bypass Switch: Override the "on" function in case of sensor failure.
- j. Automatic Light-Level Sensor: Adjustable from **2 to 200 fc (21.5 to 2152 lx)**; turn lights off when selected lighting level is present.
- k. Detector Sensitivity: Detect occurrences of **6 inch (150 mm)** minimum movement of any portion of a human body that presents a target of not less than **36 sq. inch (23 200 sq. mm)**.
- 1) Detection Coverage (Room, Ceiling Mounted): Detect occupancy anywhere in a circular area of **1000 sq. ft (93 sq. m)** when mounted on a **96 inch (2440 mm)** high ceiling.
 - 2) Detection Coverage (Corridor, Ceiling Mounted): Detect occupancy within **90 ft (27.4 m)** when mounted on a **10 ft (3 m)** high ceiling.
 - 3) Detection Coverage (Room, Wall Mounted): Detect occupancy anywhere within a 180-degree pattern centered on the sensor over an area of [**1000 sq. ft (110 sq. m)**][**2000 sq. ft (220 sq. m)**][**3000 sq. ft (330 sq. m)**] when mounted **48 inch (1200 mm)** above finished floor.
6. Operation:
- a. Occupancy Sensor: Unless otherwise indicated, turn lights on when coverage area is occupied, and turn them off when unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
 - b. Vacancy Sensor: Unless otherwise indicated, lights are manually turned on and sensor turns lights off when the room is unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
 - c. Combination Sensor: Unless otherwise indicated, sensor must be programmed to turn lights on when coverage area is occupied and turn them off when unoccupied, or to turn off lights that have been manually turned on; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
- B. Ultrasonic Occupancy or Vacancy Sensor :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - b. **[Eaton]**
 - c. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Lutron Electronics Co., Inc]**
 - e. **[WattStopper; Legrand North America, LLC]**
 - f. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the

following:

- a. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - b. **[Eaton]**
 - c. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Lutron Electronics Co., Inc]**
 - e. **[WattStopper; Legrand North America, LLC]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for one of the following UL product categories:
- a. Appliance Controls: UL CCN ATNZ, including UL 60730-1.
 - b. Energy Management Equipment: UL CCN PAZX, including UL 916 or UL 60730-1.
 - c. Intrusion Detection Units: UL CCN ANSR, including UL 639.
5. Standard Features:
- a. **[Wall][Ceiling]**-mounted, solid-state indoor **[occupancy][and][vacancy]** sensors.
 - b. **[Integrated][Separate]** power pack.
 - c. **[Hardwired][Wireless]** connection to switch **[and BAS][; and BAS and lighting control system]**.
 - d. Power: Line voltage.
 - e. Power Pack: Dry contacts rated for 20 A **[driver][or][LED]** load at 120 and 277 V(ac), for 13 A tungsten at 120 V(ac), and for 1 hp at 120 V(ac). Sensor has 24 V(dc), 150 mA, Class 2 power source.
 - f. Mounting:
 - 1) Sensor: Suitable for mounting in any position in a standard device box or outlet box.
 - 2) Relay: Externally mounted through a **1/2 inch (13 mm)** knockout in a standard electrical enclosure.
 - 3) Time-Delay and Sensitivity Adjustments: Recessed and concealed behind hinged door.
 - g. Indicator: Digital display, to show when motion is detected during testing and normal operation of sensor.
 - h. Bypass Switch: Override the "on" function in case of sensor failure.
 - i. Automatic Light-Level Sensor: Adjustable from **2 to 200 fc (21.5 to 2152 lx)**; turn lights off when selected lighting level is present.
 - j. Detector Sensitivity: Detect a person of average size and weight moving not less than **12 inch (305 mm)** in either a horizontal or a vertical manner at an approximate speed of **12 inch/s (305 mm/s)**.
 - 1) Detection Coverage (Small Room): Detect occupancy anywhere within a circular area of **600 sq. ft (56 sq. m)** when mounted on a **96 inch (2440 mm)** high ceiling.
 - 2) Detection Coverage (Standard Room): Detect occupancy anywhere within a circular area of **1000 sq. ft (93 sq. m)** when mounted on a **96 inch (2440 mm)** high ceiling.
 - 3) Detection Coverage (Large Room): Detect occupancy anywhere within a circular area of **2000 sq. ft (186 sq. m)** when mounted on a **96 inch (2440 mm)** high ceiling.
 - 4) Detection Coverage (Corridor): Detect occupancy anywhere within **90 ft (27.4 m)** when mounted on a **10 ft (3 m)** high ceiling in a corridor not wider than **14 ft (4.3 m)**.
 - 5) Detection Coverage (Room, Wall Mounted): Detect occupancy anywhere within a 180-degree pattern centered on the sensor over an area of **[1000 sq. ft**

(110 sq. m)][2000 sq. ft (220 sq. m)][3000 sq. ft (330 sq. m)] when mounted 84 inch (2100 mm) above finished floor.

6. Operation:

- a. Occupancy Sensor: Unless otherwise indicated, turn lights on when coverage area is occupied, and turn them off when unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
- b. Vacancy Sensor: Unless otherwise indicated, lights are manually turned on and sensor turns lights off when the room is unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
- c. Combination Sensor: Unless otherwise indicated, sensor must be programmed to turn lights on when coverage area is occupied and turn them off when unoccupied, or to turn off lights that have been manually turned on; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.

C. Dual-Technology, Passive-Infrared (PIR) and Ultrasonic, Occupancy or Vacancy Sensor :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - b. **[HLI Solutions; brand of GE Current, a Daintree Company]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - b. **[HLI Solutions; brand of GE Current, a Daintree Company]**
 - c. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for one of the following UL product categories:
 - a. Energy Management Equipment: UL CCN PAZX, including UL 916 or UL 60730-1.
 - b. Appliance Controls: UL CCN ATNZ, including UL 60730-1.
 - c. Intrusion Detection Units: UL CCN ANSR, including UL 639.
5. Standard Features:
 - a. **[Wall][Ceiling]-mounted, solid-state indoor [occupancy][and][vacancy] sensors.**
 - b. **[Integrated][Separate] power pack.**
 - c. **[Hardwired][Wireless] connection to switch[and BAS][; and BAS and lighting control system].**
 - d. Sensitivity Adjustment: Separate for each sensing technology.
 - e. Detector Sensitivity: Detect occurrences of **6 inch (150 mm)** minimum movement of any portion of a human body that presents a target of not less than **36 sq. inch (23 200 sq. mm)**, and detect a person of average size and weight moving not less than **12 inch (305 mm)** in either a horizontal or a vertical manner at an approximate speed of

12 inch/s (305 mm/s).

- 1) Detection Coverage (Standard Room): Detect occupancy anywhere within a circular area of **1000 sq. ft (93 sq. m)** when mounted on a **96 inch (2440 mm)** high ceiling.
- 2) Detection Coverage (Room, Wall Mounted): Detect occupancy anywhere within a 180-degree pattern centered on the sensor over an area of **[1000 sq. ft (110 sq. m)][2000 sq. ft (220 sq. m)][3000 sq. ft (330 sq. m)]** when mounted **48 inch (1200 mm)** above finished floor.

6. Operation:

- a. Occupancy Sensor: Unless otherwise indicated, turn lights on when coverage area is occupied, and turn them off when unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
- b. Vacancy Sensor: Unless otherwise indicated, lights are manually turned on and sensor turns lights off when the room is unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
- c. Combination Sensor: Unless otherwise indicated, sensor must be programmed to turn lights on when coverage area is occupied and turn them off when unoccupied, or to turn off lights that have been manually turned on; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.

D. Dual-Technology, Passive-Infrared (PIR) and Passive-Acoustic, Occupancy or Vacancy Sensor :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[HLI Solutions; brand of GE Current, a Daintree Company]**
 - b. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - c. **[SensorWorx; brand of BLP Technologies, Inc.]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[HLI Solutions; brand of GE Current, a Daintree Company]**
 - b. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - c. **[SensorWorx; brand of BLP Technologies, Inc.]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for one of the following UL product categories:
 - a. Energy Management Equipment: UL CCN PAZX, including UL 916 or UL 60730-1.
 - b. Appliance Controls: UL CCN ATNZ, including UL 60730-1.
 - c. Intrusion Detection Units: UL CCN ANSR, including UL 639.
5. Standard Features:
 - a. **[Wall][Ceiling]**-mounted, solid-state indoor **[occupancy][and][vacancy]** sensors.
 - b. **[Integrated][Separate]** power pack.

- c. [Hardwired][Wireless] connection to switch[and BAS][; and BAS and lighting control system].
- d. Sensitivity Adjustment: Separate for each sensing technology.
- e. Detector Sensitivity: Detect occurrences of **6 inch (150 mm)** minimum movement of any portion of a human body that presents a target of not less than **36 sq. inch (23 200 sq. mm)**, and detect a person of average size and weight moving not less than **12 inch (305 mm)** in either a horizontal or a vertical manner at an approximate speed of **12 inch/s (305 mm/s)**.
 - 1) Detection Coverage (Standard Room): Detect occupancy anywhere within a circular area of **1000 sq. ft (93 sq. m)** when mounted on a **96 inch (2440 mm)** high ceiling.
 - 2) Detection Coverage (Room, Wall Mounted): Detect occupancy anywhere within a 180-degree pattern centered on the sensor over an area of **[1000 sq. ft (110 sq. m)][2000 sq. ft (220 sq. m)][3000 sq. ft (330 sq. m)]** when mounted **48 inch (1200 mm)** above finished floor.

6. Operation:

- a. Occupancy Sensor: Unless otherwise indicated, turn lights on when coverage area is occupied, and turn them off when unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
- b. Vacancy Sensor: Unless otherwise indicated, lights are manually turned on and sensor turns lights off when the room is unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
- c. Combination Sensor: Unless otherwise indicated, sensor must be programmed to turn lights on when coverage area is occupied and turn them off when unoccupied, or to turn off lights that have been manually turned on; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.

E. Wall-Switch Occupancy Sensor :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Bryant; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - b. [Douglas Lighting Controls]
 - c. [Eaton]
 - d. [Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - e. [Intermatic, Inc]
 - f. [Leviton Manufacturing Co., Inc.]
 - g. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
 - h. [Lutron Electronics Co., Inc]
 - i. [nLight; Acuity Brands Lighting, Inc.]
 - j. [NSi Industries LLC]
 - k. [Philips; Signify North America; Signify Holding]
 - l. [RAB Lighting]
 - m. [Sensor Switch, Inc]
 - n. [Square D; Schneider Electric USA]
 - o. [WattStopper; Legrand North America, LLC]
 - p. <Insert manufacturer's name>

- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[Bryant; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Douglas Lighting Controls]**
 - c. **[Eaton]**
 - d. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Intermatic, Inc]**
 - f. **[Leviton Manufacturing Co., Inc.]**
 - g. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - h. **[Lutron Electronics Co., Inc]**
 - i. **[nLight; Acuity Brands Lighting, Inc.]**
 - j. **[NSi Industries LLC]**
 - k. **[Philips; Signify North America; Signify Holding]**
 - l. **[RAB Lighting]**
 - m. **[Sensor Switch, Inc]**
 - n. **[Square D; Schneider Electric USA]**
 - o. **[WattStopper; Legrand North America, LLC]**
 - p. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for one of the following UL product categories:
- a. Photoelectric Controls: UL CCN WJCT, including UL 773A.
 - b. Energy Management Equipment: UL CCN PAZX, including UL 916 or UL 60730-1.
 - c. Intrusion Detection Units: UL CCN ANSR, including UL 639.
5. Standard Features:
- a. Automatic-wall-switch occupancy sensor with manual on-off switch, suitable for mounting in single gang switchbox, **with provisions for connection to BAS****[using hardwired connection][using wireless connection]**.
 - 1) Occupancy Sensor Operation: Unless otherwise indicated, turn lights on when coverage area is occupied, and turn lights off when unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 15 minutes.
 - 2) Operating Ambient Conditions: Dry interior conditions, **32 to 120 deg F (0 to 49 deg C)**.
 - 3) Switch Rating: Not less than 800 VA **[driver][or][LED]** load at 120 V, 1200 VA **[driver][or][LED]** load at 277 V, and 800 W incandescent.
 - b. Standard Range: **[180-degree field of view, field adjustable from 180 to 40 degrees][210-degree field of view]**; with a minimum coverage area of **[900 sq. ft (84 sq. m)][2100 sq. ft (196 sq. m)]**.
 - c. Sensing Technology: **[PIR][Dual technology - PIR and ultrasonic]**.
 - d. Switch Type: **[Single pole.][Single pole, dual circuit.][Single pole, manual "on," automatic "off."][Single pole, field-selectable automatic "on," or manual "on," automatic "off."]**
 - e. Capable of controlling load in three-way application.
 - f. Voltage: **[Match circuit voltage][120 V][277 V][Dual voltage - 120 and 277 V]**.
 - g. Ambient-Light Override: Concealed, field-adjustable, light-level sensor from **10 to 150 fc (108 to 1600 lx)**. Switch prevents lights from turning on when light level is higher than set point of sensor.

- h. Time Delay:
 - 1) Concealed, field-adjustable, "off" time-delay selector at up to 30 minutes.
 - 2) Concealed, "off" time-delay selector at 30 seconds and 5, 10, and 20 minutes.
- i. Adaptive Technology: Self-adjusting circuitry detects and memorizes usage patterns of the space and helps eliminate false "off" switching.
- j. Color: **[White][Black]<Insert color>**.
- k. Faceplate: Color matched to switch.

2.6 STORAGE OCCUPANCY SENSORS

A. High-Bay Occupancy Sensor :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[nLight; Acuity Brands Lighting, Inc.]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[nLight; Acuity Brands Lighting, Inc.]**
 - c. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Photoelectric Controls: UL CCN WJCT, including UL 773A.
5. Standard Features:
 - a. Solid-State Unit: Designed to operate with the lamp and ballasts or drivers indicated.
 - b. Power: Line voltage.
 - 1) Operating Ambient Conditions: **32 to 149 deg F (0 to 65 deg C)**.
 - 2) Mounting: Threaded pipe.
 - 3) Time-Delay and Sensitivity Adjustments: Recessed and concealed behind hinged door.
 - 4) Detector Technology: PIR.
 - c. Detector Coverage: User selectable by interchangeable PIR lenses, suitable for mounting heights from **12 to 50 ft (3.7 to 15.2 m)**.

6. Other Available Features Required for the Project:
 - a. HID Continuous Lamp Monitoring: When lamps are dimmed continuously for 24 hours, automatically turn lamps on to full power for 15 minutes for every 24 hours of continuous dimming.
 - b. HID Dimming Adapter: Power and dimming control from the luminaire ballast that has been modified to include the dimming capacitor[**and MyzerPORT option**].
7. Operation: Turn lights on when coverage area is occupied, and to half-power when unoccupied; with a time delay for turning lights to half-power that is adjustable over a minimum range of 1 to 16 minutes.
8. Accessories: Obtain manufacturer's installation and maintenance kit with laser alignment tool for sensor positioning and power port connectors.

B. Ceiling-Mounted, Solid-State, Extreme-Temperature Occupancy Sensor :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Eaton]**
 - b. **[nLight; Acuity Brands Lighting, Inc.]**
 - c. **[Sensor Switch, Inc]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[nLight; Acuity Brands Lighting, Inc.]**
 - c. **[Sensor Switch, Inc]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Photoelectric Controls: UL CCN WJCT, including UL 773A.
5. Standard Features:
 - a. Operating Ambient Conditions: From **minus 40 to plus 125 deg F (minus 40 to plus 52 deg C)**.
 - b. Sensor Output: Contacts rated to operate the connected relay, complying with UL 773A. Sensor is powered from the power pack.
 - c. Separate Power Pack: Dry contacts rated for 20 A **[driver][or][LED]** load at 120 and 277 V(ac), for 13 A tungsten at 120 V(ac), and for 1 hp at 120 V(ac). Sensor has 24 V(dc), 150 mA, Class 2 power source.
 - d. Mounting:
 - 1) Sensor: Suitable for mounting in any position in a standard device box or outlet box.
 - 2) Relay: Externally mounted through a **1/2 inch (13 mm)** knockout in a standard electrical enclosure.

- 3) Time-Delay and Sensitivity Adjustments: Recessed and concealed behind cover.
- e. Bypass Switch: Override the "on" function in case of sensor failure.
- f. Automatic Light-Level Sensor: Adjustable from **2 to 10 fc (21.5 to 108 lx)**; keep lighting off when selected lighting level is present.
- g. Detector Technology: PIR. Ceiling mounted; detect occupants in coverage area by their heat and movement.
 - 1) Detector Sensitivity: Detect occurrences of **6 inch (150 mm)** minimum movement of any portion of a human body that presents a target of not less than **36 sq. inch (23 200 sq. mm)**.
 - 2) Detection Coverage (Room): Detect occupancy anywhere in a circular area of **1500 sq. ft (139 sq. m)** when mounted on a **96 inch (2440 mm)** high ceiling.
 - 3) Detection Coverage (High Bay): Detect occupancy within **25 ft (7.6 m)** when mounted on a **25 ft (7.6 m)** high ceiling.
6. Operation: Turn lights on when coverage area is occupied, and turn them off when unoccupied; with a time delay for turning lights off, adjustable over a minimum range of 1 to 30 minutes.

2.7 OUTDOOR MOTION SENSORS

A. Solid-State Outdoor Motion Sensor :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bryant; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Eaton]**
 - c. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[nLight; Acuity Brands Lighting, Inc.]**
 - g. **[NSi Industries LLC]**
 - h. **[RAB Lighting]**
 - i. **[Sensor Switch, Inc]**
 - j. **[WattStopper; Legrand North America, LLC]**
 - k. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bryant; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Eaton]**
 - c. **[Hubbell Control Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[nLight; Acuity Brands Lighting, Inc.]**
 - g. **[NSi Industries LLC]**
 - h. **[RAB Lighting]**

- i. **[Sensor Switch, Inc]**
- j. **[WattStopper; Legrand North America, LLC]**
- k. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for one of the following UL product categories:
 - a. Plug-in, Locking-Type Photocontrols: UL CCN WJFX, including UL 773.
 - b. Energy Management Equipment: UL CCN PAZX, including UL 916 or UL 60730-1.
 - c. Intrusion Detection Units: UL CCN ANSR, including UL 639.
- 5. Standard Features:
 - a. **[PIR][Dual-technology (PIR and ultrasonic)]** type, weatherproof. Detect occurrences of **6 inch (150 mm)** minimum movement of any portion of a human body that presents a target of not less than **36 sq. inch (23 200 sq. mm)**.
 - b. Switch Rating:
 - 1) Luminaire-Mounted Sensor: **[1000 W incandescent, 500 VA fluorescent/LED]<Insert rating>**.
 - 2) Separately Mounted Sensor: Dry contacts rated for 20 A **[driver][or][LED]** load at 120 and 277 V(ac), for 13 A tungsten at 120 V(ac), and for 1 hp at 120 V(ac). Sensor has 24 V(dc), 150 mA, Class 2 power source.
 - 3) Switch Type: **[Single pole.][Single pole, dual circuit.][Single pole, manual "on," automatic "off."][Single pole, field-selectable automatic "on," or manual "on," automatic "off."][With bypass switch to override the "on" function in case of sensor failure.]**
 - c. Voltage: **[Match the circuit voltage][120 V][277 V][Dual voltage, 120 and 277 V]** type.
 - d. Detector Coverage:
 - 1) Standard Range: 210-degree field of view, with a minimum coverage area of **900 sq. ft (84 sq. m)**.
 - 2) Long Range: 180-degree field of view and **110 ft (34 m)** detection range.
 - 3) **<Insert coverage area>**.
 - e. Ambient-Light Override: Concealed, field-adjustable, light-level sensor from **10 to 150 fc (108 to 1600 lx)**. The switch prevents the lights from turning on when the light level is higher than the set point of the sensor.
 - f. Time Delay:
 - 1) Concealed, field-adjustable, "off" time-delay selector at up to 30 minutes.
 - 2) Concealed, "off" time-delay selector at 30 seconds and 5, 10, and 20 minutes.
 - g. Adaptive Technology: Self-adjusting circuitry detects and memorizes usage patterns of the space and help eliminate false "off" switching.
 - h. Operating Ambient Conditions: Suitable for operation in ambient temperatures ranging from **minus 40 to plus 130 deg F (minus 40 to plus 54 deg C)**, rated as "raintight" in accordance with UL 773A.

2.8 INDUSTRIAL CONTROL SWITCHES

A. Lighting Contactor :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Allen-Bradley/Rockwell Automation]**
 - c. **[ASCO Power Technologies]**
 - d. **[Eaton]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Allen-Bradley/Rockwell Automation]**
 - c. **[ASCO Power Technologies]**
 - d. **[Eaton]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Industrial Control Switches: UL CCN NRNT, including UL 508.
5. Standard Features:
 - a. Electrically operated and **[mechanically][electrically]** held, combination-type lighting contactors with **[fusible switch][nonfused disconnect]**, complying with NEMA ICS 2.
 - b. Current Rating for Switching: Listing or rating consistent with type of load served, including tungsten filament, inductive, and high-inrush driver (driver with 15 percent or less THD of normal load current).
 - c. Fault Current Withstand Rating: Equal to or exceeding the available fault current at the point of installation.
 - d. Enclosure Rating: Comply with UL 50E.
 - e. Provide with control and pilot devices as **[indicated on the Drawings][scheduled]**, matching the enclosure rating specified for the enclosure.
 - f. Interface with DDC System for HVAC: Provide hardware interface to enable the DDC system for HVAC to monitor and control lighting contactors.
 - 1) Monitoring: On-off status, **<Insert monitoring point>**.
 - 2) Control: On-off operation, **<Insert control point>**.

2.9 EMERGENCY LIGHTING CONTROLS

- A. UL FTBR - Automatic Load Control Relay :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bodine; Signify North America; Signify Holding]**
 - b. **[Chloride; Signify North America; Signify Holding]**
 - c. **[HLI Solutions; brand of GE Current, a Daintree Company]**
 - d. **[Intelligent Lighting Controls Inc.]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[nLight; Acuity Brands Lighting, Inc.]**
 - g. **[WattStopper; Legrand North America, LLC]**
 - h. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bodine; Signify North America; Signify Holding]**
 - b. **[Chloride; Signify North America; Signify Holding]**
 - c. **[HLI Solutions; brand of GE Current, a Daintree Company]**
 - d. **[Intelligent Lighting Controls Inc.]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[nLight; Acuity Brands Lighting, Inc.]**
 - g. **[WattStopper; Legrand North America, LLC]**
 - h. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.
 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Emergency Lighting and Power Equipment: UL CCN FTBR, including UL 924.
 5. Standard Features:
 - a. N.C., electrically held relay.
 - b. Coil Rating: **[120][277]** V.
- B. UL WPWR - Branch Circuit Emergency Lighting Transfer Switch (BCE LTS) :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bodine; Signify North America; Signify Holding]**
 - b. **[Chloride; Signify North America; Signify Holding]**
 - c. **[HLI Solutions; brand of GE Current, a Daintree Company]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bodine; Signify North America; Signify Holding]**

- b. **[Chloride; Signify North America; Signify Holding]**
- c. **[HLI Solutions; brand of GE Current, a Daintree Company]**
- d. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Automatic Transfer Switches: UL CCN WPWR, including UL 1008.
- 5. Standard Features:
 - a. Automatically transfers emergency lighting load from normal branch circuit to emergency branch circuit in accordance with Article 700 of NFPA 70.
 - b. Rating: **[120][277]** V, not exceeding 20 A.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine lighting control devices before installation. Reject lighting control devices that are wet, moisture damaged, or mold damaged.
- B. Examine walls and ceilings for suitable conditions where lighting control devices will be installed.
- C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 SELECTION OF CONDUCTORS AND CABLES

- A. Power Wiring to Supply Side of Remote-Control Power Sources: Not smaller than 12 AWG. Comply with requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- B. Classes 2 and 3 Control Cable: Multiconductor cable with stranded-copper conductors not smaller than **[18 AWG][22 AWG][24 AWG]**. Comply with requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- C. Class 1 Control Cable: Multiconductor cable with stranded-copper conductors not smaller than **[14 AWG][16 AWG][18 AWG]**. Comply with requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

3.3 INSTALLATION OF LIGHTING CONTROL DEVICES

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B.

3. Electrical Safety: NFPA 70E.
4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
5. Communications Work: BICSI N1.
6. Life Safety and Means of Egress Work: NFPA 101.
7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
8. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Coordinate layout and installation of ceiling-mounted devices with other construction that penetrates ceilings or is supported by them, including light fixtures, HVAC equipment, smoke detectors, fire-suppression systems, and partition assemblies.
2. Install and aim sensors in locations to achieve not less than 90 percent coverage of areas indicated. Do not exceed coverage limits specified in manufacturer's instructions.
3. Installation of Industrial Control Switches: Mount electrically held lighting contactors with elastomeric isolator pads to eliminate structure-borne vibration unless contactors are installed in an enclosure with factory-installed vibration isolators.
4. Installation of Wiring:
 - a. Conduit: Minimum conduit size is **1/2 inch (13 mm)**.
 - b. Wiring within Enclosures: Separate power-limited and nonpower-limited conductors in accordance with conductor manufacturer's published instructions.
 - c. Size conductors in accordance with lighting control device manufacturer's published instructions unless otherwise indicated.
 - d. Splices, Taps, and Terminations: Make connections only on numbered terminal strips in junction, pull, device, and outlet boxes; terminal cabinets; and equipment enclosures.

D. Interfaces with Other Work:

1. Identification: Provide labels for lighting control devices and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Identify controlled circuits in lighting contactors.
 - d. Identify circuits or luminaires controlled by photoelectric and occupancy sensors at each sensor.
 - e. Label time switches and contactors with a unique designation.

3.4 FIELD QUALITY CONTROL

A. Adminstrant for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Adminstrant for Lighting Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified lighting testing and inspecting agency to administer and perform tests and inspections.

2. Engage qualified lighting testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Field tests must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

D. Tests and Inspections:

1. Operational Test: After installing time switches and sensors, and after electrical circuitry has been energized, start units to confirm proper unit operation.
2. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.

E. Nonconforming Work:

1. Lighting control devices will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

G. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.5 ADJUSTING

A. Occupancy Adjustments: When requested within **[12]<Insert number>** months from date of Substantial Completion, provide on-site assistance in adjusting lighting control devices to suit actual occupied conditions. Provide up to **[two]<Insert number>** visits to the Project site during other-than-normal occupancy hours for this purpose. Some of the Work may be required during hours of darkness.

1. For occupancy and motion sensors, verify operation at outer limits of detector range. Set time delay to suit Owner's operations.
2. For daylighting controls, adjust set points and deadband controls to suit Owner's operations.
3. Align high-bay occupancy sensors using manufacturer's laser aiming tool.

3.6 CLOSEOUT ACTIVITIES

A. Demonstration:

1. **[With assistance from factory-authorized service representatives, demonstrate][Demonstrate]** to Owner's maintenance and clerical personnel[**and building occupants**] how to operate the following systems and equipment:

- a. Lighting control devices.

B. Training:

1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain lighting control devices.

3.7 MAINTENANCE

A. Software and Firmware Service Agreement:

1. Technical Support: Beginning at Substantial Completion, verify that software and firmware service agreement includes software support for **[two]<Insert number>** years.
2. Upgrade Service: At Substantial Completion, update software and firmware to latest version. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. Verify upgrading software includes operating system and new or revised licenses for using software.
 - a. Upgrade Notice: Not less than **[30 days]<Insert duration>**; to allow Owner to schedule and access the system **[and to upgrade computer equipment if necessary]**.
3. Field Reports for Software and Firmware Upgrades: Prepare and submit report after each update, documenting upgrades installed.

END OF SECTION 26 09 23 00A

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 09 23 00	26 01 50 51	Handling of Lighting Ballasts and Lamps Containing PCBs and Mercury
26 09 23 00	26 09 00 00	Addressable Luminaire Lighting Controls
26 09 23 00	26 09 00 00a	Relay-Based Lighting Controls
26 09 23 00	26 24 19 00	Motor-Control Centers

SECTION 26 11 16 00 - SECONDARY UNIT SUBSTATIONS WITH SWITCHBOARD SECONDARY

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Secondary unit substation equipment.

B. Products Installed, but Not Furnished, under This Section:

1. **<Insert products identified in "Existing Products to be Modified" Article or "Existing Products to be Removed and Re-Installed" Article>.**

C. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 078413 "Penetration Firestopping" specifies materials and methods for sealing penetrations of rated walls and partitions referenced by this Section.
5. Section 260513 "Medium-Voltage Cables" for requirements for terminating cables in incoming section of substation.
6. Section 260519 "Low-Voltage Electrical Power Conductors and Cables" for requirements for connecting wires.
7. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
8. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
9. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic-[**and wind**]- control devices referenced by this Section.
10. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
11. Section 260573 "Power System Studies" specifies short-circuit current studies, overcurrent protective device coordination studies, arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.
12. Section 260913 "Electrical Power Monitoring" specifies remote monitoring of metering instruments and for remote control of circuit breakers and switches.
13. Section 264313 "Surge Protective Devices for Low-Voltage Electrical Power Circuits" specifies field-mounted surge-suppression devices referenced in this Section.

1.2 DEFINITIONS

- A. ICCB: Insulated-case circuit breaker.
- B. MCCB: Molded-case circuit breaker.

- C. PCB: Polychlorinated biphenyl.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.

1. Include rated capacities, operating characteristics, and furnished specialties and accessories.
2. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.
3. Include manufacturer's sample extended warranty language.
4. Include product certificates for secondary unit substations, signed by manufacturer.

- B. Shop Drawings: Prepare and submit the following:

1. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
2. Wiring Diagrams: Power, signal, and control wiring.
3. Dimensioned plans and elevations showing major components and features.
 - a. Include a plan view and cross section of equipment base, showing clearances, manufacturer's recommended workspace that accounts for breaker service and removal, and locations of penetrations for grounding and conduits.
4. One-line diagram.
5. List of materials.
6. Nameplate legends.
7. The material, size and number of bus bars, and current rating for each bus, including mains and branches of phase, neutral, and ground buses.
8. Short-time and short-circuit current ratings of secondary unit substations and components.
9. Ratings of individual protective devices.
10. Design Data:
 - a. Time-Current Characteristic Curves: For overcurrent protective devices.
 - b. Primary Fuses: Submit recommendations and size calculations.
 - c. Utility company's metering provisions with indication of approval by utility company.

- C. Factory test reports.

- D. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Field Reports:
 - 1. Manufacturer's field reports for field quality-control support.
 - 2. Manufacturer's field reports for system startup support.
 - 3. Field reports for voltage monitoring and adjusting.
 - 4. Field reports for infrared scanning.

1.5 CLOSEOUT SUBMITTALS

- A. Warranty documentation.
- B. Maintenance service agreement.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare parts.
- B. Special tools.
- C. Consumable items.

1.7 REGULATORY AGENCY APPROVALS

- A. Submittals for secondary unit substations requiring approval by <Insert name of electrical utility> must be signed by qualified electrical professional engineer responsible for their preparation. **[Obtain approval by electrical utility prior to submitting for action by Architect][Submit for action by Architect prior to submitting for approval by electrical utility].**

1.8 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician I: Possessing active NICET EPT Level I certification. Able to work safely around electrical power equipment and cabling under supervision.
- B. Electrical Power Testing (EPT) Technician II: Possessing active NICET EPT Level II certification. Able to isolate and ground electrical power equipment, to connect test equipment, and to conduct and document standard tests of basic equipment.
- C. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- D. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.

- E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.
 - F. Electrical Professional Engineer: Professional engineer possessing active qualifications specified in Section 014000 "Quality Requirements," with expertise in electrical engineering, including electrical power system modeling and analysis of electrical safety in accordance with NFPA 70E.
 - G. Medium-Voltage Cable Installer: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with training and manufacturer certification to install, splice, and terminate medium-voltage cable[**in accordance with electrical utility service provider's requirements**].
 1. Medium-voltage cable Installer must be approved by <**Insert name of electrical utility service provider**>.
 - H. Medium-Voltage Duct Installer: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with documented training and experience with installation of medium-voltage duct banks[**in accordance with electrical utility service provider's requirements**].
 1. Medium-voltage duct Installer must be approved by <**Insert name of electrical utility service provider**>.
 - I. Medium-Voltage Equipment Installer: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with documented training and experience with hazards and safety requirements associated with installation and operation of medium-voltage equipment[**in accordance with electrical utility service provider requirements**].
 1. Medium-voltage equipment Installer must be approved by <**Insert name of electrical utility service provider**>.
 - J. Electrical Power Monitoring Installers: Installer possessing active qualifications specified in Section 014000 "Quality Requirements," and able to present unexpired certified Installer credentials issued by manufacturer prior to starting installation.
 - K. Power Quality Specialist: Recognized experts possessing active NICET Electrical Power Testing (EPT) Technician IV certification and documented experience in power quality testing for installations similar in complexity to the Project.
- 1.9 DELIVERY, STORAGE, AND HANDLING
- A. Deliver in shipping splits in sizes that can be moved past obstructions in delivery path.
 - B. Coordinate delivery of secondary unit substations to allow movement into designated space.
 - C. Store secondary unit substation components[**protected from weather and**] so condensation will not form on or in units. Provide temporary heating in accordance with manufacturer's instructions.
 - D. Handle secondary unit substation components in accordance with manufacturer's instructions. Use factory-installed lifting provisions.

**1.10 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT**

- A. Modeling, analysis, product selection, installation, and quality control for all electrical Work on the Project must comply with service condition requirements specified in Section 018116 "Facility Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria."
- B. Usual Service Conditions: Unless unusual service conditions have been specified in "General Equipment Service Conditions," "Outdoor Equipment Service Conditions," and "Indoor Equipment Services Conditions" articles of Section 018116 "Facility Environmental Requirements," electrical service and distribution equipment must be suitable for operation under usual service conditions specified in applicable IEEE C37 series and IEEE C57 series standards.

1.11 WARRANTY FOR SECONDARY UNIT SUBSTATIONS

- A. Special Installer Extended Warranty: Installer warrants that assembled and installed secondary unit substation performs in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Extended-Warranty Period: **[Two][Three][Four]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that secondary unit substations performs in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Initial Extended-Warranty Period: **[Three][Four][Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
 - 2. Follow-On Extended-Warranty Period: **[Eight]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for materials only, free on board **[origin][destination]**, freight prepaid.

PART 2 - PRODUCTS**2.1 EXISTING PRODUCTS TO BE MODIFIED**

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>**.
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>**.
- C. Accessories: **<Insert accessories included with existing product>**.

2.2 EXISTING PRODUCTS TO BE REMOVED AND RE-INSTALLED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>**.
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>**.

- C. Accessories: **<Insert accessories included with existing product>**.

2.3 PERFORMANCE REQUIREMENTS

- A. Description: Medium-voltage, primary incoming section; transformer section; and low-voltage secondary switchgear section; and including coordinated circuit breakers, fusible switches, and metering components.
- B. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- C. General Characteristics:
1. Referenced Standards: IEEE C2 and IEEE C37.121.
 2. Indoor Unit Arrangement: Single assembly.
 3. Outdoor Unit Arrangement: Single assembly.
 - a. Weatherproof, listed for installation outdoors, complying with IEEE C37.20.1.
 - b. Aisleless Construction: Full-height doors in front of basic weatherproof equipment.
 4. Connections between the primary device and transformer must be **[cable][bus]**, and between the transformer and secondary must be flexible bus braid unless noted otherwise.
 5. Indoor Enclosure: Steel.
 6. Outdoor Enclosure: Weatherproof, galvanized steel, listed for installation outdoors, complying with IEEE C37.20.1. Aisleless, full-height doors, with provisions for padlocking, in front of basic weatherproof equipment. Integral structural-steel base frame with factory-applied asphaltic undercoating.
 7. Each compartment must have the following features:
 - a. Structural design and anchorage adequate to resist loads imposed by **[125 mile/h (200 km/h)]<Insert wind speed>** wind.
 - b. Space heater operating at one-half or less of rated voltage, sized to prevent condensation, controlled by thermostats to maintain temperature of each section above expected dew point.
 - c. Louvers equipped with insect and rodent screens and filters, and arranged to permit air circulation while excluding rodents and exterior dust.
 - d. Weatherproof ground-fault circuit interrupter duplex receptacle.
 - e. Power for heaters and receptacles must be provided **[by control power transformer][as indicated]**.
 - f. Skid Mounted: Mount each shipping group on an integral base frame as a complete weatherproof unit.
 8. Enclosure Finish:
 - a. Outdoor Finish: Provide factory-applied finish in manufacturer's standard color, including under surfaces treated with corrosion-resistant undercoating.
 - b. Indoor Finish: Provide factory-applied finish in manufacturer's standard gray over a rust-inhibiting primer on treated metal surface.
 - c. Severe Environment Finish: Provide factory-applied corrosion-resistant finish in manufacturer's standard color that withstands **[120][480]** hours of exposure to the salt spray test specified in ASTM B117 without loss of paint or release of adhesion of the paint primer coat to the metal surface in excess of **1/16 inch (1.6 mm)** from the test mark. The

scribed test mark and test evaluation must be conducted in accordance with ASTM D1654, with a rating of not less than 7 arrived at in accordance with Table 1 (procedure A). Cut edges or otherwise damaged surfaces of hot-dip galvanized sheet steel or mill-galvanized sheet steel must be coated with a manufacturer's standard zinc-rich paint.

2.4 SECONDARY UNIT SUBSTATION EQUIPMENT

A. Source Quality Control:

1. Factory Tests:

- a. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
- b. Testing Administrant: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate secondary unit substation equipment.
- c. Factory Tests and Inspections: Perform the following tests and inspections on secondary unit substation equipment, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with the following standards before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.
 - 1) Conduct transformer tests in accordance with IEEE C57.12.90.
 - 2) Conduct primary switchgear tests in accordance with NEMA C37.51.
 - 3) Conduct routine tests of completely assembled switchboard.
 - 4) Resistance measurements of windings on rated voltage connection and on tap extreme connections.
 - 5) Ratios on rated voltage connection and on tap extreme connections.
 - 6) Polarity and phase relation on rated voltage connection.
 - 7) No-load loss at rated voltage on rated voltage connection.
 - 8) Exciting current at rated voltage on rated voltage connection.
 - 9) Impedance and load loss at rated current on rated voltage connection and on tap extreme connections.
 - 10) Applied potential.
 - 11) Induced potential.

2. Temperature Test: If transformer is supplied with auxiliary cooling equipment to provide more than one rating, test at lowest kVA Class ONAN or Class AA rating and highest kVA Class ONAF or Class AFA rating.

- a. Temperature test is not required if record of temperature test on essentially duplicate unit is available.
- b. Nonconforming Work:
 - 1) Equipment that does not pass tests and inspections will be considered defective.
- c. Factory Test Reports: Compile and submit factory test and inspection reports.

B. UL YEFV or DLAH or WVG N - Medium-Voltage Terminal Compartment Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**

- b. [Eaton]
 - c. [Siemens Industry, Inc., Energy Management Division]
 - d. [Square D; Schneider Electric USA]
 - e. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Eaton]
 - c. [Siemens Industry, Inc., Energy Management Division]
 - d. [Square D; Schneider Electric USA]
 - e. <Insert manufacturer's name>
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Unit Substation Over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - b. Metal-Clad Switchgear Over 1000 V: UL CCN DLAH, including IEEE C37.20.2 and NEMA C37.55.
 - c. Metal-Enclosed Arc-Resistant Switchgear Over 1000 V: UL CCN WVGN, including IEEE C37.20.3 and IEEE C37.20.7.
- 4. Standard Features:
 - a. Primary Incoming Section: Terminal assembly with adequate space for incoming-cable terminations and surge arresters, complying with NEMA SG 4 and meeting thermal, mechanical, and dielectric requirements specified for the transformer section.
 - b. Ratings: Suitable for application in three-phase, 60 Hz, solidly grounded-neutral system.
 - c. System Voltage: [4.16 kV nominal; 4.76 kV maximum][7.2 kV nominal; 15 kV maximum][13.8 kV nominal; 15 kV maximum][34.5 kV nominal; 38 kV maximum]<Insert other voltage>.
 - d. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, connected in each phase of incoming circuit and ahead of disconnecting device.
- C. UL YEFV or DLAH or WVGN - Medium-Voltage Metal-Enclosed Switchgear Section :
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [ABB, Electrification Business]
 - b. [Eaton]
 - c. [Siemens Industry, Inc., Energy Management Division]
 - d. [Square D; Schneider Electric USA]
 - e. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Unit Substation Over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - b. Metal-Clad Switchgear Over 1000 V: UL CCN DLAH, including IEEE C37.20.2 and NEMA C37.55.
 - c. Metal-Enclosed Arc-Resistant Switchgear Over 1000 V: UL CCN WVGW, including IEEE C37.20.3 and IEEE C37.20.7.
4. Standard Features:
 - a. Metal-enclosed, air-interrupter switchgear, **[with][without]** fuses, complying with IEEE C37.20.3.
 - 1) Switchgear must be arc-resistant, complying with IEEE C37.20.7, **[Type 1A][Type 2A][Type 1C][Type 2C]**.
 - b. Ratings: Comply with IEEE C37.04; and suitable for application in three-phase, 60 Hz, solidly grounded-neutral system.
 - 1) System Voltage: **[4.16 kV nominal; 4.76 kV maximum][7.2 kV nominal; 15 kV maximum][13.8 kV nominal; 15 kV maximum][34.5 kV nominal; 38 kV maximum]<Insert other voltage>**.
 - 2) Design Level of Available-Source Fault Current: Integrated short-circuit rating consistent with value of fault current indicated.
 - 3) Main-Bus Rating: **[600][1200][2000]** A, continuous.
 - c. Interrupter Switches: Stationary, gang operated, and suitable for application at maximum short-circuit rating of integrated switchgear assembly.
 - 1) Rating: **[600][1200]** A continuous duty and load break.
 - 2) Two-Time Duty-Cycle Fault Closing: **[25 000][40 000]** A, asymmetrical.
 - 3) Switch Action: No external arc and no significant quantities of ionized gas released into the enclosure.
 - 4) Switch Construction: Supported entirely by interior framework of structure, with copper switchblades and stored-energy operating mechanism.
 - 5) Phase Barriers: Full length of switchblades and fuses for each pole; designed for easy removal; allow visual inspection of switch components if barrier is in place.
 - 6) Protective Shields: Cover live components and terminals.

- a) Fuse Mounts: Single-frame mounted and de-energized when switch is open.
 - 7) Mechanical Interlock: Prevent opening switch compartment door unless switchblades are open, and prevent closing switch if door is open. **[Interlock air-interrupter switch with transformer secondary main circuit breaker, preventing switch from being opened or closed unless secondary main circuit breaker is open.]**
 - 8) Window: Permits viewing switch-blade positions when door is closed.
 - 9) Accessory Set: Tools and miscellaneous items required for interrupter switchgear test, inspection, maintenance, and operation. Include fuse-handling tool as recommended by switchgear manufacturer.
 - d. Fuses: Sizes recommended by secondary unit substation manufacturer, considering fan cooling, temperature-rise specification, and cycle loading.
 - 1) Current-Limiting Fuses: Full-range, fast-replaceable, current-limiting type that will operate without explosive noise or expulsion of gas, vapor, or foreign matter from tube.
 - 2) Expulsion Fuses: Furnished in disconnect-type mountings and renewable with replacement fuse units. Gases emitted on interruption are controlled and silenced by chambers designed for that purpose.
 - 3) Indicator integral with each fuse to show when it has blown.
 - 4) Spares: Include three fuses in use and three spare fuses in storage clips in each switch.
 - e. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, with ratings as indicated, connected in each phase of incoming circuit and ahead of disconnecting device.
- D. UL YEFV or DLAH or WVG N - Medium-Voltage Instruments Section :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product

categories:

- a. Unit Substation Over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - b. Metal-Clad Switchgear Over 1000 V: UL CCN DLAH, including IEEE C37.20.2 and NEMA C37.55.
 - c. Metal-Enclosed Arc-Resistant Switchgear Over 1000 V: UL CCN WVGN, including IEEE C37.20.3 and IEEE C37.20.7.
4. Standard Features:
- a. Instrument Transformers: Comply with IEEE C57.13.
 - 1) Potential and Current Transformers: Burden and Accuracy Class suitable for connected meters.
 - b. Multifunction Digital-Metering Monitor: Microprocessor-based unit suitable for three- or four-wire systems.
 - 1) Inputs from sensors or 5 A current-transformer secondaries, and potential terminals rated to 600 V.
 - 2) Switch-selectable digital display with the following features:
 - a) Phase Currents, Each Phase: Plus or minus 1 percent.
 - b) Phase-to-Phase Voltages, Three Phase: Plus or minus 1 percent.
 - c) Phase-to-Neutral Voltages, Three Phase: Plus or minus 1 percent.
 - d) Three-Phase Real Power: Plus or minus 2 percent.
 - e) Three-Phase Reactive Power: Plus or minus 2 percent.
 - f) Power Factor: Plus or minus 2 percent.
 - g) Frequency: Plus or minus 0.5 percent.
 - h) Integrated Demand, with Demand Interval Selectable from 5 to 60 Minutes: Plus or minus 2 percent.
 - i) Accumulated energy, in **MWh (MJ)**, plus or minus 2 percent; stored values unaffected by power outages for up to 72 hours.
 - 3) Communications module suitable for remote monitoring of meter quantities and functions. Interface communication and metering.
 - 4) Mounting: Display and control unit that is flush or semiflush mounted in instrument compartment door.
 - c. Analog Instruments: Rectangular, **4-1/2 inch (115 mm)** square, 1 percent accuracy, semiflush mounting, with antiparallax 250-degree scale and external zero adjustment.
 - 1) Voltmeters: Cover an expanded scale range of normal voltage plus 10 percent.
 - 2) Voltmeter Selector Switch: Rotary type with off position to provide readings of phase-to-phase[**and phase-to-neutral**] voltages.
 - 3) Ammeters: Cover an expanded scale range of bus rating plus 10 percent.
 - 4) Ammeter Selector Switch: Permits current reading in each phase and keeps current-transformer secondary circuits closed in off position.
 - 5) Locate meter and selector switch on circuit-breaker compartment door for indicated feeder circuits only.
 - 6) Watt-Hour Meters: Flush- or semiflush-mounting type, 5 A, 120 V, three phase, three

wire; with three elements, **[15 min]<Insert value>** indicating demand register, and provision for testing and adding pulse initiation.

- 7) Recording Demand Meter: Usable as totalizing relay or indicating and recording maximum demand meter with **[15 min]<Insert value>** interval.
 - a) Operation: Counts and records a succession of pulses entering two channels.
 - b) Housing: Drawout, back-connected case arranged for semiflush mounting.

E. UL YEFV or XPLH - Liquid-Filled Transformer Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Siemens Industry, Inc., Energy Management Division]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Siemens Industry, Inc., Energy Management Division]**
 - c. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Unit Substation Over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - 3) Liquid-Immersed Transformers: IEEE C57.12.00.
 - b. Liquid-Filled Distribution Transformers Over 600 V: UL CCN XPLH, including IEEE C57.12.00 and IEEE C57.12.28.
4. Standard Features:
 - a. Insulating Liquid:
 - 1) Mineral oil complying with ASTM D3487, Type II, and tested in accordance with ASTM D117.
 - 2) Less flammable, edible-seed-oil based, and listed and labeled by a qualified electrical testing laboratory as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic.
 - 3) Less flammable, dielectric, and listed and labeled by a qualified electrical testing laboratory as complying with NFPA 70 requirements for fire point of not less than

- 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic.
- 4) Less flammable, silicone-based dielectric, and listed and labeled by a qualified electrical testing laboratory as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must have low toxicity and be nonhazardous.
- b. Insulation Temperature Rise:
- 1) 55 deg C, based on an average ambient temperature of **86 deg F (30 deg C)** over 24 hours with a maximum ambient temperature of **104 deg F (40 deg C)**. Insulation system must be rated to continuously allow an additional 12-percent kVA output, at 65 deg C temperature rise, without decreasing rated transformer life.
 - 2) 65 deg C, based on an average ambient temperature of **86 deg F (30 deg C)** over 24 hours with a maximum ambient temperature of **104 deg F (40 deg C)**.
- c. BIL: **[60][75][95][110]** kV.
- d. Full-Capacity Voltage Taps: Four nominal 2.5 percent taps[, **two above and two**] below rated primary voltage; with externally operable tap changer for de-energized use and with position indicator and padlock hasp.
- e. Cooling System: **[Class ONAN, liquid cooled][Class ONAN/ONAF, liquid cooled, and with forced-air rating][Class ONAN/ONAF/ONAF, liquid cooled, and with provisions for future forced-air rating]**. Cooling systems must include auxiliary cooling equipment, automatic controls, and status indicating lights.
- f. Impedance: **<Insert number>** percent.
- g. Accessories: Grounding pads, lifting lugs, and provisions for jacking under base. Transformers must have a steel base and frame allowing use of pipe rollers in any direction, and an insulated, low-voltage, neutral bushing with removable ground strap.
Include the following additional accessories:
- 1) Liquid-level gage.
 - 2) Pressure-vacuum gage.
 - 3) Liquid temperature indicator.
 - 4) Drain and filter valves.
 - 5) Pressure-relief device.
- F. UL YEFV - Dry-Type Transformer Section :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Square D; Schneider Electric USA]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Square D; Schneider Electric USA]**
 - c. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in

accordance with guide information and standards specified for the following UL product categories:

- a. Unit Substation Over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - 3) Dry-Type Transformers: UL 1562.
4. Standard Features:
 - a. Primary Incoming Section: Transformer cover-mounted bushings. The bushings must meet thermal, mechanical, and dielectric requirements as specified for the transformer section.
 - b. Style:
 - 1) **[Indoor, ventilated][Outdoor, ventilated][Totally enclosed, nonventilated]**, cast coil/encapsulated coil, with primary and secondary windings individually cast in epoxy; with insulation system rated at 185 deg C with an 80 deg C average winding temperature rise above a maximum ambient temperature of **104 deg F (40 deg C)**.
 - 2) **[Indoor, ventilated][Outdoor, ventilated][Totally enclosed, nonventilated]**, vacuum-pressure, impregnated type, and with insulation system rated at 220 deg C with an 80 deg C average winding temperature rise above a maximum ambient temperature of **104 deg F (40 deg C)**.
 - c. Cooling System:
 - 1) Class AA, air cooled, complying with IEEE C57.12.01.
 - 2) Class AFA, air cooled with forced-air rating, complying with IEEE C57.12.01.
 - a) Manual forced-air cooling system controls, including manual switch for fans, fan controller and associated power and control wiring, and power panel with current-limiting fuses.
 - b) Include mounting provision for fans.
 - 3) Class AA/FA, air cooled with provisions for future forced-air rating, complying with IEEE C57.12.01.
 - a) Automatic forced-air cooling system controls, including thermal sensors, fans, control wiring, temperature controller with test switch, power panel with current-limiting fuses, indicating lights, alarm, and alarm-silencing relay.
 - b) Include mounting provision for fans.
 - 4) Class AFA, forced-air cooling, complying with IEEE C57.12.01.
 - a) Automatic forced-air cooling system controls, including thermal sensors, fans, control wiring, temperature controller with test switch, power panel with current-limiting fuses, indicating lights, alarm, and alarm-silencing relay.
 - b) Include cooling fans.
 - d. Insulation Materials: IEEE C57.12.01, rated **[220]<Insert number>** deg C.
 - 1) Insulation Temperature Rise: **[80][115][150]** deg C, maximum rise above **104 deg F**

(40 deg C).

- e. BIL: **[60][75][95][110]** kV.
- f. Full-Capacity Voltage Taps: Four nominal 2.5 percent taps[, **two above and two**] below rated primary voltage.
- g. Impedance: **<Insert number>** percent.
- h. High-Temperature Alarm: Sensor at transformer with local audible and visual alarm and contacts for remote alarm.

G. UL WEVC - Secondary Distribution Section Switchboard :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Dead-Front Switchboards: UL CCN WEVZ, including UL 891.
 - 1) Arc Resistance: Annex J of IEEE C37.20.7.
4. Standard Features:
 - a. The secondary distribution section must be drawout, **[fused][fused where indicated]**, low-voltage switchgear, complying with NEMA PB 2.
 - b. Switchboard Structure: Front and rear accessible.
 - 1) Match and align the **[front][front and rear]** of the switchgear.
 - 2) Comply with UL requirements for service entrance equipment.
 - c. Switchboard Bus:
 - 1) Use bus bars to connect compartments and vertical sections. Cable connections are not permitted.
 - 2) Main Phase Bus: Uniform capacity the entire length of section.
 - 3) Neutral Bus: **[50][100]** percent of phase-bus ampacity, except as indicated. Equip bus with pressure-connector terminations for outgoing circuit neutral conductors.

- 4) Include braces for neutral-bus extensions for busway feeders.
 - 5) Vertical Section Bus: Extend to spaces for future circuit breakers.
 - 5) Phase- and Neutral-Bus Material:
 - a) Hard-drawn copper of 98 percent minimum conductivity, with copper feeder circuit-breaker line connections.
 - b) Hard-drawn copper of 98 percent minimum conductivity or tin-plated, high-strength, electrical-grade aluminum alloy.
 - 6) Ground Bus: Hard-drawn copper of 98 percent minimum conductivity, with pressure connector for feeder and branch-circuit ground conductors, minimum size **1/4-by-2 inch (6 by 50 mm)**.
 - 7) Neutral bus equipped with pressure-connector terminations for outgoing circuit neutral conductors. Neutral-bus extensions for busway feeders are braced.
 - 8) Neutral Disconnect Link: Bolted, uninsulated, **1/4-by-2 inch (6-by-50 mm)** copper bus, arranged to connect neutral bus to ground bus.
- d. Switchboard Arrangement:
- 1) Main Disconnect Device(s): **[Power circuit breakers][Bolted pressure switches][ICCBs][MCCBs][Fusible switches]**.
 - 2) Feeder Protective Devices: **[Bolted pressure switches][ICCBs][MCCBs][Fusible switches]**.
- e. Power Circuit Breakers: **[Fixed][Drawout]** mounted, electrically operated air-circuit breakers, complying with UL 1066.
- 1) With "close" and "open" push buttons and red and green lighted breaker position indicators. Charging time of the motor operator must not exceed 8 seconds. Operator power must be from a control power transformer internal to the switchboard.
 - 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) LED indicators or display, with manual reset, to show cause of automatic trip.
 - 5) Display panel to indicate that the status of the system circuitry is fully operational, or give fault location based on automatic diagnosis.
 - 6) Trip the circuit breaker when closing on a fault.
 - 7) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-delay pickup and time.
 - b) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
 - c) Adjustable instantaneous pickup.
 - d) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - 8) One test kit to test each trip function.
 - 9) Battery backup for informational displays after automatic trip, with battery status indicator LED.
- f. Bolted Pressure Switches: Fixed-mounted, manually operated, **[electrically tripped],[fusible]**, bolted pressure contact switch. Comply with UL 977.

- 1) Stored energy deadfront mechanism, compressed and released by the operating handle; switching action must be independent of the speed of the operating handle.
 - 2) Indication whether the switch is open or closed, and provisions for padlocking the operating handle.
 - 3) With fuse clips and fuses for UL 248 Class L time-delay fuses.
 - 4) Electrically tripped switches must include:
 - a) Ground-fault protection, with adjustable time delay and test panel.
 - b) Single-phase protection, tripping the switch on loss of a source phase.
 - c) Blown fuse protection, tripping the switch on a blown fuse, with blown fuse indication.
- g. ICCBs: **[Fixed][Drawout]**-mounted, **[manually][electrically]** operated air-circuit breakers. Comply with UL 1066.
- 1) With "close" and "open" push buttons and red and green lighted breaker position indicators. Charging time of the motor operator must not exceed 8 seconds. Operator power must be from a control power transformer internal to the switchboard.
 - 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) LED indicators or display, with manual reset, to show cause of automatic trip.
 - 5) Display panel to indicate that the status of the system circuitry is fully operational, or give fault location based on automatic diagnosis.
 - 6) Trip the circuit breaker when closing on a fault.
 - 7) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-delay pickup and time.
 - b) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
 - c) Adjustable instantaneous pickup.
 - d) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - 8) With built-in connector to test the breaker settings. Provide one test set.
 - 9) Battery backup for informational displays after automatic trip, with battery status indicator.
- h. MCCBs (to 2500 A): Fixed-mounted, manually operated air-circuit breakers. Comply with UL 489.
- 1) With quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, and its position is shown by the position of the handle. With manual push-to-trip push button.
 - 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) With trip-setting dials or interchangeable plugs to establish the continuous trip of the circuit breaker. Plugs must not be interchangeable between frames, and the breaker may not be closed without the plug. With neutral ground-fault sensor.
 - 5) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-time delay.
 - b) Adjustable short-time setting and delay to shape the time-current curve.

- c) Adjustable instantaneous setting.
 - d) Individually adjustable ground-fault setting and time delay.
- 6) With built-in connector to test the long-time delay, instantaneous, and ground-fault functions of the breaker. **[Provide one test set for testing installed circuit breakers with 225 A frame and higher.]**
- 7) With built-in digital ammeter display, showing load current and tripping cause.
- i. MCCBs (1600 to 2500 A): Fixed-mounted, manually operated air-circuit breakers. Comply with UL 489.
 - 1) With quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, and its position is shown by the position of the handle. With manual push-to-trip push button.
 - 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) LED indicators or display, with manual reset, to show reasons of automatic trip.
 - 5) Display panel to indicate that the status of the system circuitry is fully operational, or give fault location based on automatic diagnosis.
 - 6) Trip the circuit breaker when closing on a fault.
 - 7) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-delay pickup and time.
 - b) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
 - c) Adjustable instantaneous pickup.
 - d) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - 8) One test kit to test each trip function.
 - 9) Battery backup for informational displays after automatic trip, with battery status indicator.
- j. Fusible Switches: Fixed-mounted, manually operated, **[electrically tripped]**, fusible, quick-make, quick-break switch. Comply with UL 98.
 - 1) Indication whether the switch is open or closed, and provisions for padlocking the operating handle.
 - 2) With fuse clips and fuses.
 - 3) Electrically tripped switches must include:
 - a) Shunt trip.
 - b) Ground-fault protection, with adjustable time delay and test panel.
 - c) Single-phase protection, tripping the switch on loss of a source phase.
 - d) Blown fuse protection, tripping the switch on a blown fuse, with blown fuse indication.

H. UL YEFV or YEFR - Low-Voltage Instruments Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

Secondary Unit Substations with Switchboard

Secondary

- a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Unit Substation Over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - b. Unit Substation Rated 600 V or Less: UL CCN YEFR, including UL 1062.
4. Standard Features:
- a. Instrument Transformers: Comply with IEEE C57.13.
 - 1) Potential Transformers: Secondary voltage rating of 120 V and NEMA C 12.11 Accuracy Class of 0.3 with burdens of W, X, and Y.
 - 2) Current Transformers: Burden and Accuracy Class suitable for connected relays, meters, and instruments.
 - b. Multifunction Digital-Metering Monitor: Microprocessor-based unit suitable for three- or four-wire systems.
 - 1) Inputs from sensors or 5 A current-transformer secondaries, and potential terminals rated to 600 V.
 - 2) Switch-selectable digital display with the following features:
 - a) Phase Currents, Each Phase: Plus or minus 1 percent.
 - b) Phase-to-Phase Voltages, Three Phase: Plus or minus 1 percent.
 - c) Phase-to-Neutral Voltages, Three Phase: Plus or minus 1 percent.
 - d) Three-Phase Real Power: Plus or minus 2 percent.
 - e) Three-Phase Reactive Power: Plus or minus 2 percent.
 - f) Power Factor: Plus or minus 2 percent.
 - g) Frequency: Plus or minus 0.5 percent.
 - h) Integrated Demand, with Demand Interval Selectable from 5 to 60 Minutes: Plus or minus 2 percent.
 - i) Accumulated energy, in **MWh (MJ)**, plus or minus 2 percent; stored values unaffected by power outages for up to 72 hours.

- 3) Communications module suitable for remote monitoring of meter quantities and functions. Interface communication and metering.
 - 4) Mounting: Display and control unit that is flush or semiflush mounted in instrument compartment door.
- c. Analog Instruments: Rectangular, **4-1/2 inch (115 mm)** square, 1 percent accuracy, semiflush mounting, with antiparallax 250-degree scale and external zero adjustment.
- 1) Voltmeters: Cover an expanded scale range of normal voltage plus 10 percent.
 - 2) Voltmeter Selector Switch: Rotary type with "off" position to provide readings of phase-to-phase[**and phase-to-neutral**] voltages.
 - 3) Ammeters: Cover an expanded scale range of bus rating plus 10 percent.
 - 4) Ammeter Selector Switch: Permits current reading in each phase and keeps current-transformer secondary circuits closed in "off" position.
 - 5) Locate meter and selector switch on circuit-breaker compartment door for indicated feeder circuits only.
 - 6) Watt-Hour Meters: Flush- or semiflush-mounting type, 5 A, 120 V, three phase, three wire; with three elements, 15-minute indicating demand register, and provision for testing and adding pulse initiation.
 - 7) Recording Demand Meter: Usable as totalizing relay or indicating and recording maximum demand meter with 15-minute interval.
 - a) Operation: Counts and records a succession of pulses entering two channels.
 - b) Housing: Drawout, back-connected case arranged for semiflush mounting.
- d. Relays: Comply with IEEE C37.90, types and settings as indicated; with test blocks and plugs.
- e. Surge Suppression: Factory installed as an integral part of the low-voltage switchgear, complying with UL 1449 SPD, Type 1, with the following features and accessories:
- 1) Integral disconnect switch.
 - 2) Internal thermal protection that disconnects the SPD before damaging internal suppressor components.
 - 3) Indicator light display for protection status.
 - 4) Form-C contacts rated at 5 A and 250 V(ac), one N.O. and one N.C., for remote monitoring of protection status.[**Contacts must reverse on failure of surge diversion module or on opening of current-limiting device. Coordinate with building power monitoring and control system.**]
 - 5) Surge counter.
- f. Control Power Supply: Control power transformer supplying 120 V control circuits through secondary disconnect devices.
- g. Control Wiring: Factory installed, complete with bundling, lacing, and protection; and complying with the following:
- 1) Flexible conductors for 8 AWG and smaller, for conductors across hinges and for conductors for interconnections between shipping units.
 - 2) Conductors sized in accordance with NFPA 70 for duty required.

2.5 MAINTENANCE MATERIAL ITEMS

- A. Spare Parts: Furnish to Owner spare parts, for repairing unit substation equipment, that are packaged with protective covering for storage on-site and identified with labels describing contents.[**Include the**

Secondary Unit Substations with Switchboard

Secondary

following:]

1. Spare Fuses: **[Six]<Insert number>** of each type and rating of fuse and fusible device used, except for medium-voltage fuses. Include spares for the following:
 - a. Primary disconnect fuses.
 - b. Potential transformer fuses.
 - c. Control power fuses.
 - d. Fuses and fusible devices for fused circuit breakers.
 - e. Fuses for secondary fusible devices.
 2. Spare Indicating Lights: Six of each type installed.
 3. Spare Mounting Gaskets: **[One]<Insert number>** set(s) for bushings, handholes, and the gasket between relief cover and flange of pressure-relief device.
- B. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to secondary unit substation equipment, that are packaged with protective covering for storage on-site and identified with labels describing contents.**[Include the following:]**
1. Racking handle, to manually move circuit breaker between "connected" and "disconnected" positions.
 2. Portable test set for testing functions of circuit-breaker, solid-state trip devices without removal from switchboard.
 3. Relay and meter test plugs suitable for testing switchgear meters and switchgear class relays.
 4. Circuit-Breaker Removal Apparatus: Portable, floor-supported, roller-base, elevating carriage arranged for moving circuit breakers in and out of compartments.
 5. Spare-Fuse Cabinet: Identified and compartmented steel box or cabinet with lockable door.
 6. Storage for Manual: Include rack or holder, near operating instructions, for copy of maintenance manual.
- C. Consumable Items: Furnish to Owner extra consumable items for storage on-site, identified with labels describing contents.**[Include the following:]**
1. Touchup Paint: **[Three]<Insert number>** half-pint containers of paint matching enclosure's exterior finish.
 2. Primary Switch Contact Lubricant: **[One]<Insert number>** container(s).

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and space conditions for compliance with requirements for secondary unit substations and other conditions affecting performance of the Work.
- B. Examine roughing-in of conduits and grounding systems to verify the following:
 1. Wiring entries comply with layout requirements.
 2. Entries are within conduit-entry tolerances specified by manufacturer, and no feeders will have to cross section barriers to reach load or line lugs.
- C. Examine walls, floors, roofs, and concrete bases for suitable conditions for secondary unit substation installation.

- D. Verify that ground connections are in place. Maximum ground resistance must be 5 Ω at secondary unit substation location.
- E. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF SECONDARY UNIT SUBSTATION EQUIPMENT

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Temporary Electric Power Work: NECA NEIS 200.
 - 5. Commissioning of Electrical Systems: NECA NEIS 90.
 - 6. Hot Work: NFPA 51B.
 - 7. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 8. Life Safety and Means of Egress Work: NFPA 101.
 - 9. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
 - 10. Work in Confined Spaces: NFPA 350.
 - 11. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 12. Evaluation of Unlabeled Electrical Equipment: NFPA 791.
 - 13. Installation of Switchboards: NECA NEIS 400.
 - 14. Installation of Liquid-Filled Transformers: NECA NEIS 410.
 - 15. Installation of Medium-Voltage Switchgear: NECA NEIS 430.
 - 16. AC Outdoor High-Voltage Circuit Breakers: NEMA SG 11.
 - 17. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
 - 1. Install secondary unit substations on cast-in-place concrete equipment base(s).
 - 2. Comply with requirements for vibration isolation and seismic control devices.
- D. Interfaces with Other Work:
 - 1. Identification: Provide labels for secondary unit substation equipment and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - d. Install the number of signs required to be readable from each accessible side, but space the signs a maximum of **30 ft (9 m)** apart.
 - e. Operating Instructions: Place printed operating instructions for secondary unit substations, including key interlocking, control sequences, elementary single-line diagram, and emergency procedures with the maintenance materials.
 - 2. Grounding and Bonding:
 - a. At Interior Locations: For grounding to grounding electrodes, use bare copper cable not

smaller than 4/0 AWG. Bond surge arrester and neutrals directly to the transformer enclosure and then to the grounding electrode system with bare copper conductors. Keep leads as short as practicable with no kinks or sharp bends. Make joints in grounding conductors and loops by exothermic weld or compression connector.

- b. At Exterior Locations:
- c. For counterpoise, use tinned bare copper cable not smaller than 4/0 AWG, buried not less than **30 inch (765 mm)** below grade interconnecting the grounding electrodes. Bond surge arrester and neutrals directly to the transformer enclosure and then to the grounding electrode system with bare copper conductors, sized as shown. Keep lead lengths as short as practicable with no kinks or sharp bends.
 - 1) Fence and equipment connections must not be smaller than 4 AWG. Ground fence at each gate post and corner post and at intervals not exceeding **10 ft (3050 mm)**. Bond each gate section to the fence post using **1/8 by 1 inch (3 by 25 mm)** **[tinned]**flexible braided copper strap and clamps.
 - 2) Make joints in grounding conductors and loops by exothermic weld or compression connector.

3.3 FIELD QUALITY CONTROL

A. Administrant for Electrical Power Tests and Inspections:

- 1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
- 2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
- 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
- 4. Administer and perform tests and inspections **[with assistance of factory-authorized service representative]**.

B. Acceptance Testing Preparation:

- 1. **<Insert requirements>**.

C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

D. Tests and Inspections:

- 1. Comply with the provisions of NFPA 70B Ch. 11, "Testing and Test Methods."
- 2. Perform each visual and mechanical inspection and electrical test. Certify compliance with test parameters.
- 3. After installing secondary unit substation but before primary is energized, verify that grounding system at the substation is tested at the specified value or less.
- 4. After installing secondary unit substation and after electrical circuitry has been energized, test for compliance with requirements.
- 5. Visual and Mechanical Inspection:
 - a. Verify equipment nameplate data complies with the Contract Documents.
 - b. Inspect bolted electrical connections for high resistance using one of the following two methods:

- 1) Use a low-resistance ohmmeter to compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar

- 2) bolted connections by more than 50 percent of the lowest value.
- 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, use NETA ATS, Table 100.12.

E. Switchgear Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, grounding, and required area clearances.
- c. Verify the unit is clean and shipping bracing, loose parts, and documentation shipped inside cubicles have been removed.
- d. Verify that fuse and circuit-breaker sizes and types correspond to the Drawings and coordination study as well as the address of the circuit breaker that is used to identify it in microprocessor-communication software.
- e. Verify that current and voltage-transformer ratios correspond to the Drawings.
- f. Confirm correct operation and sequencing of electrical and mechanical interlock systems.
 - 1) Attempt closure on locked-open devices. Attempt to open locked-closed devices.
 - 2) Make key exchange with devices operated in off-normal positions.
- g. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
- h. Inspect insulators for evidence of physical damage or contaminated surfaces.
- i. Verify correct barrier and shutter installation and operation.
- j. Exercise active components.
- k. Inspect mechanical indicating devices for correct operation.
- l. Verify that filters are in place and vents are clear.
- m. Inspect control power transformers as follows:
 - 1) Inspect for physical damage, cracked insulation, broken leads, connection tightness, defective wiring, and overall general condition.
 - 2) Verify that primary- and secondary-use or circuit-breaker ratings match the Drawings and comply with manufacturer's published instructions.
 - 3) Verify correct functioning of drawout disconnecting and grounding contacts and interlocks.

2. Electrical Tests:

- a. Perform dc voltage insulation-resistance tests on each bus section, phase-to-phase and phase-to-ground, for one minute. If the temperature of the bus is other than plus or minus 20 deg C, adjust the resulting resistance as provided in NETA ATS Table 100.11.
 - 1) Insulation-resistance values of bus insulation must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than manufacturer's published instructions or NETA ATS, Table 100.1.
 - 2) Do not proceed to the dielectric-withstand-voltage tests until insulation-resistance levels are raised above minimum values.

- b. Perform a dielectric-withstand-voltage test on each bus section, each phase-to-ground with phases not under test grounded, in accordance with manufacturer's published data. If manufacturer has no recommendation for this test, it must be conducted in accordance with NETA ATS, Table 100.2. Apply the test voltage for one minute.
 - 1) If no evidence of distress or insulation failure is observed by the end of the total time of voltage application during the dielectric-withstand-voltage test, the test specimen is considered to have passed the test.
 - c. Voltage Transformers:
 - 1) Perform secondary wiring integrity test. Verify correct potential at devices.
 - 2) Verify secondary voltages by energizing the primary winding with system voltage.
 - d. Perform current-injection tests on the entire current circuit in each section of switchgear.
 - 1) Perform current tests by secondary injection with magnitudes such that a minimum current of 1.0 A flows in the secondary circuit. Verify correct magnitude of current at each device in the circuit.
 - 2) Perform current tests by primary injection with magnitudes such that a minimum of 1.0 A flows in the secondary circuit. Verify correct magnitude of current at each device in the circuit.
 - e. Verify operation of space heaters.
 - f. Perform phasing checks on double-ended or dual-source switchgear to ensure correct bus phasing from each source.
- F. Medium-Voltage Surge Arrester Field Tests:
- 1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Inspect anchorage, alignment, grounding, and clearances.
 - c. Verify the arresters are clean.
 - d. Verify that the ground lead on each device is individually attached to a ground bus or ground electrode.
 - e. Verify that the stroke counter is correctly mounted and electrically connected if applicable. Record the stroke counter reading.
 - 2. Electrical Test:
 - a. Perform an insulation-resistance test on each arrester, phase terminal-to-ground. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Replace units that fail to meet recommended minimum insulation resistance listed in the table.
 - b. Perform a watts-loss test. Evaluate watts-loss values by comparison with similar units and test equipment manufacturer's published data.
- G. Instrument Transformer Field Tests:
- 1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Verify correct connection of transformers with system requirements.
 - c. Verify that adequate clearances exist between primary and secondary circuit wiring.
 - d. Verify the unit is clean.

- e. Verify that required grounding and shorting connections provide contact.
- f. Verify correct operation of transformer withdrawal mechanism and grounding operation.
- g. Verify correct primary- and secondary-fuse sizes for voltage transformers.
- h. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.

2. Electrical Tests of Current Transformers:

- a. Perform insulation-resistance test of each current transformer and its secondary wiring with respect to ground at 1000 V(dc) for one minute. For units with solid-state components that cannot tolerate the applied voltage, comply with manufacturer's published instructions. Insulation-resistance values of instrument transformers must not be less than values shown in NETA ATS, Table 100.5.
- b. Perform a polarity test of each current transformer in accordance with IEEE C57.13.1. Polarity results must agree with transformer markings.
- c. Perform a ratio-verification test using the voltage or current method in accordance with IEEE C57.13.1. Ratio errors must comply with IEEE C57.13.
- d. Perform an excitation test on transformers used for relaying applications in accordance with IEEE C57.13.1. Excitation results must match the curve supplied by the manufacturer or must comply with IEEE C57.13.1.
- e. Measure current circuit burdens at transformer terminals in accordance with IEEE C57.13.1. The measured burdens must match the instrument transformer Accuracy Class rating.
- f. Perform insulation-resistance tests on the primary winding with the secondary grounded. Test voltages must comply with NETA ATS, Table 100.5. The insulation-resistance value must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.5.
- g. Perform dielectric-withstand-voltage tests on the primary winding with the secondary grounded. Test voltages must comply with NETA ATS, Table 100.9. If no evidence of distress or insulation failure is observed by the end of the total time of voltage application, the primary winding is considered to have passed the test.
- h. Perform power-factor or dissipation-factor tests in accordance with test equipment manufacturer's published data. Power-factor or dissipation-factor values must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with test equipment manufacturer's published data.
- i. Verify that current-transformer secondary circuits are grounded and have only one grounding point in accordance with IEEE C57.13.3.

3. Electrical Tests of Voltage and Potential Transformers:

- a. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply the test voltage for one minute in accordance with NETA ATS, Table 100.5. For units with solid-state components that cannot tolerate the applied voltage, follow manufacturer's published instructions. Insulation-resistance values of instrument transformers must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.5.
- b. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Test voltages must be applied for one minute in accordance with NETA ATS, Table 100.5. Insulation-resistance values of the transformers must not be less than values shown in NETA ATS, Table 100.5.
- c. Perform a polarity test on each transformer to verify the polarity marks or H(1)- X(1) relationship. Polarity results must agree with transformer markings.
- d. Perform a turns-ratio test on tap positions. Ratio errors must not exceed the tolerances specified in IEEE C57.13.

- e. Measure voltage circuit burdens at transformer terminals. Measured burdens must be compared to instrument transformer ratings. The measured burdens must match the instrument transformer Accuracy Class rating.
- f. Perform a dielectric-withstand-voltage test on the primary windings with the secondary windings connected to ground. The dielectric voltage must comply with NETA ATS, Table 100.9. The test voltage must be applied for one minute. If no evidence of distress or insulation failure is observed by the end of the total time of voltage application during the dielectric-withstand-voltage test, the primary windings are considered to have passed the test.
- g. Perform power-factor or dissipation-factor tests in accordance with test equipment manufacturer's published data. Power-factor or dissipation-factor values must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with test equipment manufacturer's published data.
- h. Verify that voltage-transformer secondary circuits are grounded and have only one grounding point in accordance with IEEE C57.13.3.

H. Microprocessor-Based Protective Relay Field Tests:

1. Visual and Mechanical Inspection:

- a. Record model number, style number, serial number, firmware revision, software revision, and rated control voltage.
- b. Verify operation of light-emitting diodes, display, and targets.
- c. Record passwords for each access level.
- d. Clean the front panel and remove foreign material from the case.
- e. Check tightness of connections.
- f. Verify that the frame is grounded in accordance with manufacturer's instructions.
- g. Set the relay in accordance with results in Section 260573 "Power System Studies."
- h. Download settings from the relays. Print a copy of the settings for the report and compare the settings to those specified in the coordination study.

2. Electrical Tests:

- a. Perform insulation-resistance tests from each circuit to the grounded frame in accordance with manufacturer's published data.
- b. Apply voltage or current to analog inputs, and verify correct registration of the relay meter functions.
- c. Functional Operation: Check functional operation of each element used in the protection scheme.

I. Liquid-Filled Transformer Section Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect impact recorder prior to unloading.
- c. Test dew point of tank gases if applicable.
- d. Inspect anchorage, alignment, and grounding.
- e. Verify the presence of PCB content labeling.
- f. Verify removal of shipping bracing after placement.
- g. Verify the bushings are clean.
- h. Verify that alarm, control, and trip settings on temperature and level indicators are set and operate within manufacturer's recommended settings.
- i. Verify that cooling fans and pumps operate correctly and have appropriate overcurrent protection.
- j. Verify that liquid level in tanks and bushings is within manufacturer's published tolerances.

- k. Perform specific inspections and mechanical tests recommended by the manufacturer.
- l. Verify presence of transformer surge arresters and that their ratings are as specified.
- m. Verify that as-left tap connections are as specified.
- n. Verify the presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; the value of the index must not be less than 1.0.
- b. Perform power-factor or dissipation-factor tests on windings in accordance with test equipment manufacturer's published data. Maximum winding insulation power-factor/dissipation-factor values must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.3.
- c. Measure core insulation resistance at 500 V(dc) if the core is insulated and the core ground strap is removable. Core insulation-resistance values must not be less than 1 MΩ at 500 V(dc).
- d. Perform a power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV.
- e. Perform turns-ratio tests at tap positions. Turns-ratio test results must not deviate by more than one-half percent from either the adjacent coils or the calculated ratio. If the test fails, replace the transformer.
- f. Perform an excitation-current test on each phase. The typical excitation-current test data pattern for a three-legged core transformer is two similar current readings and one lower current reading. Investigate and correct if the test shows a different pattern.
- g. Measure the resistance of each winding at each tap connection, and record temperature-corrected winding-resistance values in the Operations and Maintenance Manual.
- h. Perform an applied-voltage test on high- and low-voltage windings-to-ground. Comply with IEEE C57.12.91, Sections 10.2 and 10.9.
- i. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.
- j. Remove a sample of insulating liquid in accordance with ASTM D923. Insulating liquid values must comply with NETA ATS, Table 100.4. Sample must be tested for the following:
 - 1) Dielectric Breakdown Voltage: ASTM D877 or ASTM D1816.
 - 2) Acid Neutralization Number: ASTM D974.
 - 3) Specific Gravity: ASTM D1298.
 - 4) Interfacial Tension: ASTM D971.
 - 5) Color: ASTM D1500.
 - 6) Visual Condition: ASTM D1524.
 - 7) Water in Insulating Liquids: ASTM D1533.
 - 8) Power Factor or Dissipation Factor: ASTM D924.
- k. Remove a sample of insulating liquid in accordance with ASTM D923 and perform dissolved-gas analysis in accordance with IEEE C57.104 or ASTM D3612.

J. Small Dry-Type Transformer Section Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify that resilient mounts are free and that shipping brackets have been removed.
- d. Verify the unit is clean.

- e. Perform specific inspections and mechanical tests recommended by the manufacturer.
- f. Verify that as-left tap connections are as specified.
- g. Verify the presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; the value of the index must not be less than 1.0.
- b. Perform turns-ratio tests at tap positions. The test results must not deviate by more than one-half percent from either the adjacent coils or the calculated ratio. If the test fails, replace the transformer.
- c. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

K. Large Dry-Type Transformer Section Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify that resilient mounts are free and that shipping brackets have been removed.
- d. Verify the unit is clean.
- e. Verify that alarm, control, and trip settings on temperature and level indicators are set and operate within manufacturer's recommended settings.
- f. Verify that cooling fans operate and that fan motors have correct overcurrent protection.
- g. Perform specific inspections and mechanical tests recommended by the manufacturer.
- h. Verify that as-left tap connections are as specified.
- i. Verify the presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; the value of the index must not be less than 1.0.
- b. Perform power-factor or dissipation-factor tests on windings in accordance with the test equipment manufacturer's published data. Investigate and correct power-factor values that exceed:
 - 1) 2.0 percent for power transformers.
 - 2) 5.0 percent for distribution transformers.
 - 3) Measure core insulation resistance at 500 V dc if the core is insulated and the core ground strap is removable. Core insulation-resistance values must not be less than 1 M Ω at 500 V(dc).
- c. Perform a power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV. Tip-up test result exceeding 1.0 percent must be investigated.
- d. Perform turns-ratio tests at tap positions. The test results must not deviate by more than one-half percent from either the adjacent coils or the calculated ratio. If the test fails, replace the transformer.
- e. Perform an excitation-current test on each phase. The typical excitation-current test data pattern for a three-legged core transformer is two similar current readings and one lower current reading. Investigate and correct if the test shows a different pattern.
- f. Measure the resistance of each winding at each tap connection.

- g. Perform an applied-voltage test on high- and low-voltage windings-to-ground. See IEEE C57.12.91, Sections 10.2 and 10.9. The AC dielectric-withstand-voltage test result must not exceed 75 percent of factory test voltage for one-minute duration. The dc dielectric-withstand-voltage test result must not exceed 100 percent of the AC RMS test voltage specified in IEEE C57.12.91, Section 10.2, for one-minute duration. If no evidence of distress or insulation failure is observed by the end of the total time of voltage application during the dielectric-withstand-voltage test, the test specimen is considered to have passed the test.
- h. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

L. Low-Voltage Power Circuit-Breaker Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify that maintenance devices are available for servicing and operating the breaker.
- d. Verify the unit is clean.
- e. Verify that the arc chutes are intact.
- f. Inspect moving and stationary contacts for condition and alignment.
- g. Verify that primary and secondary contact wipe and other dimensions vital to satisfactory operation of the breaker are correct.
- h. Perform mechanical operator and contact alignment tests on both the breaker and its operating mechanism in accordance with manufacturer's published data.
- i. Verify cell fit and element alignment.
- j. Verify racking mechanism operation.
- k. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
- l. Perform adjustments for final protective-device settings in accordance with coordination study provided by end user.
- m. Record as-found and as-left operation counter readings.

2. Electrical Tests:

- a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with switch closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Insulation-resistance values must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Values of insulation resistance less than this table or manufacturer's published instructions must be investigated.
- b. Measure contact resistance across each power contact of the circuit breaker. Drop values for $\mu\Omega$ or mV(dc) must not exceed the high levels of the normal range as indicated in the manufacturer's published data. If manufacturer's published data is not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of the lowest value.
- c. Determine long-time pickup and delay by primary current injection. Long-time pickup values must be as specified, and the trip characteristic must not exceed manufacturer's published time-current characteristic tolerance band, including adjustment factors. If manufacturer's curves are not available, trip times must not exceed the value shown in NETA ATS, Table 100.7.
- d. Determine short-time pickup and delay by primary current injection. Short-time pickup values must be as specified, and the trip characteristic must not exceed manufacturer's

- published time-current tolerance band.
- e. Determine ground-fault pickup and delay by primary current injection. Ground-fault pickup values must be as specified, and the trip characteristic must not exceed manufacturer's published time-current tolerance band.
- f. Determine instantaneous pickup value by primary current injection. Instantaneous pickup values must be as specified and within manufacturer's published tolerances. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.8.
- g. Test functions of the trip unit by means of secondary injection. Pickup values and trip characteristic must be as specified and within manufacturer's published tolerances.
- h. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of the shunt trip and close coils must conform to the manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.20.
- i. Measure fuse resistance. Investigate fuse-resistance values that deviate from each other by more than 15 percent.
- j. Verify correct operation of auxiliary features, such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free operation, antipump function, and trip unit battery condition. Reset trip logs and indicators. Auxiliary features must operate in accordance with manufacturer's published data.
- k. Verify operation of charging mechanism. The charging mechanism must operate in accordance with manufacturer's published data.

M. Insulated-Case/Molded-Case Air-Circuit-Breaker Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage and alignment.
- c. Verify the unit is clean.
- d. Operate the circuit breaker to ensure smooth operation.
- e. Inspect operating mechanism, contacts, and arc chutes in unsealed units.
- f. Perform adjustments for final protective-device settings in accordance with the coordination study. Set the protective devices in accordance with coordination study report.

2. Electrical Tests:

- a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with the circuit breaker closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Insulation-resistance values must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Values of insulation resistance less than this table or manufacturer's published instructions must be investigated.
- b. Perform a contact/pole-resistance test. Drop values for $\mu\Omega$ or mV(dc) must not exceed the high levels of the normal range as indicated in the manufacturer's published data. If manufacturer's published data is not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of the lowest value.
- c. Determine long-time pickup and delay by primary current injection. Ground-fault pickup values must be as specified, and the trip characteristic must not exceed manufacturer's published time-current tolerance band, including adjustment factors.
- d. Determine short-time pickup and delay by primary current injection. Short-time pickup values must be as specified, and the trip characteristic must not exceed manufacturer's published time-current tolerance band.
- e. Determine ground-fault pickup and time delay by primary current injection. Ground-fault pickup values must be as specified, and the trip characteristic must not exceed manufacturer's published time-current tolerance band.

- f. Determine instantaneous pickup by primary current injection. Instantaneous pickup values must be as specified and within manufacturer's published tolerances. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.8.
- g. Test functions of the trip unit by means of secondary injection. Pickup values and trip characteristic must be as specified and within manufacturer's published tolerances.
- h. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of the shunt trip and close coils must conform to the manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.20.
- i. Verify correct operation of auxiliary features, such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free operation, anti-pump function, and trip unit battery condition. Reset trip logs and indicators. Auxiliary features must operate in accordance with manufacturer's published data.
- j. Verify operation of charging mechanism. The charging mechanism must operate in accordance with manufacturer's published data.

N. Low-Voltage Ground-Fault Protection System Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect the components for damage and errors in polarity or conductor routing.
 - 1) Verify that ground connection is made on the source side of the neutral disconnect link and on the source side of ground-fault sensor.
 - 2) Verify that the neutral sensors are connected with correct polarity on both primary and secondary.
 - 3) Verify that phase conductors and the neutral pass through the sensor in the same direction for zero sequence systems.
 - 4) Verify that grounding conductors do not pass through zero sequence sensors.
 - 5) Verify that grounded conductor is solidly grounded.
- b. Verify the unit is clean.
- c. Operate the circuit breaker to ensure smooth operation.
- d. Verify correct operation of functions of the self-test panel if provided.
- e. Verify that the control power transformer has adequate capacity for the system.
- f. Set pickup and time-delay settings. Record appropriate operation and test sequences in accordance with Section 230.95 "Ground-Fault Protection of Equipment" of NFPA 70.

2. Electrical Tests:

- a. Measure the system neutral-to-ground insulation resistance with the neutral disconnect link temporarily removed. Replace the neutral disconnect link after testing. System neutral-to-ground insulation resistance must be a minimum of 1 MΩ. Correct wiring until the minimum is achieved.
- b. Perform ground-fault protective-device pickup tests using primary injection. Results of pickup test must be greater than 90 percent of the ground-fault protective-device pickup setting and less than 1200 A or 125 percent of the pickup setting, whichever is smaller. Adjust or replace the device until these parameters are achieved.
- c. For summation-type systems utilizing phase and neutral current transformers, verify correct polarities by applying current to each phase-neutral current-transformer pair. This test also applies to MCCBs utilizing an external neutral current transformer. The ground-fault protective device must operate when current direction is the same relative to polarity marks in the two current transformers. The ground-fault protective device must not operate when current direction is opposite relative to polarity marks in the two current transformers.

- d. Measure time delay of the ground-fault protective device at a value equal to or greater than 150 percent of the pickup value. Relay timing must be in accordance with manufacturer's published data but must be no longer than one second at 3000 A in accordance with Section 230.95 "Ground-Fault Protection of Equipment" of NFPA 70.
- e. Verify reduced control voltage tripping capability is 55 percent for AC systems and 80 percent for DC systems. Replace the ground-fault system if the reduced control voltage tripping requirement is not achieved, and retest.
- f. Verify blocking capability of zone interlock systems. Results of zone-blocking tests must be in accordance with manufacturer's published data and design specifications.

O. Metering Device Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect cover gasket, cover glass, condition of spiral spring, disk clearance, contacts, and case shorting contacts, as applicable.
- c. Verify the unit is clean.
- d. Verify freedom of movement, end play, and alignment of rotating disk(s).

2. Electrical Tests:

- a. Verify accuracy of meters at cardinal points. Meter accuracy must be in accordance with manufacturer's published data.
- b. Calibrate meters in accordance with manufacturer's published data. Calibration results must be within manufacturer's published tolerances.
- c. Verify instrument multipliers. Instrument multipliers must be in accordance with system design specifications.
- d. Verify that current-transformer and voltage-transformer secondary circuits are intact. Test results must confirm the integrity of the secondary circuits of current and voltage transformers.

P. Nonconforming Work:

- 1. Equipment and devices will be considered defective if they do not pass tests and inspections.
- 2. Remove and replace defective units and retest.

Q. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports. Record as-left set points of adjustable devices.

R. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

- 1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.4 SYSTEM STARTUP

A. Perform startup service.

- 1. Complete installation and startup checks in accordance with manufacturer's published instructions.
- 2. **<Insert startup steps if any>.**

- B. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.
 - 1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.5 CLEANING

- A. After completing equipment installation and before energizing, inspect unit components. Remove paint splatters and other spots, dirt, and debris. Repair damaged finish to match original finish. Vacuum interiors of secondary unit substation sections.

3.6 CLOSEOUT ACTIVITIES

- A. Training:
 - 1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain secondary unit substation equipment.
 - 2. **[Provide video recordings of training sessions to Owner][Allow Owner to record training sessions].**

3.7 PROTECTION

- A. After installation, protect secondary unit substation equipment from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

3.8 MAINTENANCE

- A. Voltage Monitoring and Adjusting: After Substantial Completion, if requested by Owner, but not more than six months after Final Acceptance, perform the following voltage monitoring:
 - 1. During a period of normal load cycles as evaluated by Owner, perform seven days of three-phase voltage recording at the outgoing section of each secondary unit substation. Use voltmeters with calibration traceable to the National Institute of Science and Technology standards and with a chart speed of not less than **1 inch (25 mm)** per hour. Voltage unbalance greater than 1 percent between phases, or deviation of phase voltage from the nominal value by more than plus or minus 5 percent during the test period, is unacceptable.
 - 2. Corrective Action: If test results are unacceptable, perform the following corrective action, as appropriate:
 - a. Adjust transformer taps.
 - b. Rebalance loads.
 - c. Prepare written request for voltage adjustment by electric utility.

3. Retests: Repeat monitoring, after corrective action has been performed, until satisfactory results are obtained.
 4. Field Reports for Voltage Monitoring and Adjusting:
 - a. Prepare a written report covering monitoring performed and corrective action taken.
 - b. For each relay and adjustable circuit breaker, tag the device with adjusting technician's initials and the date of the adjustment. Record the settings and file with test records specified in "Field Quality Control" Article.
- B. Infrared Scanning of Secondary Unit Substation Equipment: Perform the survey during periods of maximum possible loading. Remove covers prior to the inspection. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison.
1. After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of the electrical power connections of the unit substation.
 2. Follow-On Infrared Scanning: Perform an additional follow-up infrared scan of each switchgear 11 months after date of Substantial Completion.
 3. Instrument: Inspect distribution systems with imaging equipment capable of detecting a minimum temperature difference of 1 deg C at 30 deg C. Provide documentation of device calibration.
 4. Field Reports for Infrared Scanning: Prepare a certified report that identifies the testing technician and equipment used, and lists the results as follows:
 - a. Description of equipment to be tested.
 - b. Discrepancies.
 - c. Temperature difference between the area of concern and the reference area.
 - d. Probable cause of temperature difference.
 - e. Areas inspected. Identify inaccessible and unobservable areas and equipment.
 - f. Identify load conditions at time of inspection.
 - g. Provide photographs and thermograms of the deficient area.
 5. Act on inspection results in accordance with the recommendations of NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.
- C. Maintenance Service Agreement: Beginning at Substantial Completion, verify that maintenance service agreement includes **[one year]<Insert duration>** period for full maintenance by **[skilled employees of secondary unit substation equipment Installer][manufacturer's authorized service representative]**. Include annual preventive maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper secondary unit substation equipment operation. Verify that parts and supplies are manufacturer's authorized replacement parts and supplies.

END OF SECTION 26 11 16 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 11 16 00A - SECONDARY UNIT SUBSTATIONS WITH MOTOR CONTROL CENTER SECONDARY

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Secondary unit substation equipment.

B. Products Installed, but Not Furnished, under This Section:

1. **<Insert products identified in "Existing Products to be Modified" Article or "Existing Products to be Removed and Re-Installed" Article>.**

C. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** for preinstallation conference procedures.
5. Section 078413 "Penetration Firestopping" specifies materials and methods for sealing penetrations of rated walls and partitions referenced by this Section.
6. Section 260513 "Medium-Voltage Cables" for requirements for terminating cables in incoming section of substation.
7. Section 260519 "Low-Voltage Electrical Power Conductors and Cables" for requirements for connecting wires.
8. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
9. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
10. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic[**and wind**] control devices referenced by this Section.
11. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
12. Section 260573 "Power System Studies" specifies short-circuit current studies, overcurrent protective device coordination studies, arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.
13. Section 260913 "Electrical Power Monitoring" specifies remote monitoring of metering instruments and for remote control of circuit breakers and switches.
14. Section 264313 "Surge Protective Devices for Low-Voltage Electrical Power Circuits" specifies field-mounted surge-suppression devices referenced in this Section.

1.2 DEFINITIONS

- A. Combination Motor Controller: A combination motor-control unit that includes externally operable circuit-disconnecting means, branch-circuit overcurrent protection, and a motor controller with associated auxiliary devices when used.
- B. CPT: Control power transformer.
- C. ICCB: Insulated-case circuit breaker.
- D. MCCB: Molded-case circuit breaker.
- E. MCP: Motor-circuit protector.
- F. PCB: Polychlorinated biphenyl.
- G. SCR: Silicon controlled rectifier.
- H. SPD: Surge protection device.

1.3 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>**.
- B. Preinstallation Coordination Meeting(s): For unit substation. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location> before <Insert construction activity>**.
 - 1. Attendees: Installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**][, and **Owner's Commissioning Authority**] of scheduled meeting dates.

1.4 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Include rated capacities, operating characteristics, and furnished specialties and accessories.
 - 2. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.
 - 3. Include manufacturer's sample extended warranty language.
 - 4. Include product certificates for secondary unit substations, signed by manufacturer.

- B. Shop Drawings: Prepare and submit the following:
1. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of field connections.
 2. Wiring Diagrams: Power, signal, and control wiring.
 3. Dimensioned plans and elevations showing major components and features.
 - a. Include plan view and cross section of equipment base, showing clearances, manufacturer's published instructions for minimum workspace clearances that account for breaker service and removal, and locations of penetrations for grounding and conduits.
 4. One-line diagram.
 5. List of materials.
 6. Nameplate legends.
 7. Material, size and number of bus bars, and current rating for buses, including mains and branches of phase, neutral, and ground buses.
 8. Short-time and short-circuit current ratings of secondary unit substations and components.
 9. Ratings of individual protective devices.
 10. For motor-control secondary section, submit manufacturer's standard drawings complying with requirements of UL 845.
 - a. Manufacturer's production drawings as defined in UL 845.
 - b. Schematic and Connection Wiring Diagrams: For power, signal, and control wiring for installed controllers.
 - c. Nameplate legends.
 - d. Vertical and horizontal bus capacities.
 - e. Features, characteristics, ratings, and factory settings of installed units.
 - f. **<Insert required information>**.
 11. Design Data:
 - a. Time-Current Characteristic Curves: For overcurrent protective devices.
 - b. Primary Fuses: Submit recommendations and size calculations.
 - c. Utility company's metering provisions with indication of approval by utility company.
- C. Factory test reports.
- D. Field quality-control reports.

1.5 INFORMATIONAL SUBMITTALS

- A. For motor-control secondary section, submit the following:
1. Manufacturer's approval drawings as defined in UL 845.
 2. Manufacturer's custom drawings as defined in UL 845.
 3. Manufacturer's production drawings as defined in UL 845.
- B. Manufacturer's published instructions.
- C. Field Reports:
1. Manufacturer's field reports for field quality-control support.
 2. Manufacturer's field reports for system startup support.

3. Field reports for voltage monitoring and adjusting.
4. Field reports for infrared scanning.

1.6 CLOSEOUT SUBMITTALS

- A. Warranty documentation.
- B. Maintenance service agreement.

1.7 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare parts.
- B. Special tools.
- C. Consumable items.

1.8 REGULATORY AGENCY APPROVALS

- A. Submittals for secondary unit substations requiring approval by <Insert name of electrical utility> must be signed by qualified electrical professional engineer responsible for their preparation. **[Obtain approval by electrical utility prior to submitting for action by Architect][Submit for action by Architect prior to submitting for approval by electrical utility].**

1.9 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician I: Possessing active NICET EPT Level I certification. Able to work safely around electrical power equipment and cabling under supervision.
- B. Electrical Power Testing (EPT) Technician II: Possessing active NICET EPT Level II certification. Able to isolate and ground electrical power equipment, to connect test equipment, and to conduct and document standard tests of basic equipment.
- C. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- D. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.
- E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

- F. Electrical Professional Engineer: Professional engineer possessing active qualifications specified in Section 014000 "Quality Requirements," with expertise in electrical engineering, including electrical power system modeling and analysis of electrical safety in accordance with NFPA 70E.
- G. Medium-Voltage Cable Installer: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with training and manufacturer certification to install, splice, and terminate medium-voltage cable[**in accordance with electrical utility service provider's requirements**].
 - 1. Medium-voltage cable Installer must be approved by <Insert name of electrical utility service provider>.
- H. Medium-Voltage Duct Installer: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with documented training and experience with installation of medium-voltage duct banks[**in accordance with electrical utility service provider's requirements**].
 - 1. Medium-voltage duct Installer must be approved by <Insert name of electrical utility service provider>.
- I. Medium-Voltage Equipment Installer: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with documented training and experience with hazards and safety requirements associated with installation and operation of medium-voltage equipment[**in accordance with electrical utility service provider requirements**].
 - 1. Medium-voltage equipment Installer must be approved by <Insert name of electrical utility service provider>.
- J. Electrical Power Monitoring Installers: Installer possessing active qualifications specified in Section 014000 "Quality Requirements," and able to present unexpired certified Installer credentials issued by manufacturer prior to starting installation.
- K. Power Quality Specialist: Recognized experts possessing active NICET Electrical Power Testing (EPT) Technician IV certification and documented experience in power quality testing for installations similar in complexity to the Project.

1.10 DELIVERY, STORAGE, AND HANDLING

- A. Deliver in shipping splits in sizes that can be moved past obstructions in delivery path.
- B. Coordinate delivery of secondary unit substations to allow movement into designated space.
- C. Store secondary unit substation components[**protected from weather and**] so condensation will not form on or in units. Provide temporary heating in accordance with manufacturer's written instructions.
- D. Handle secondary unit substation components in accordance with manufacturer's written instructions. Use factory-installed lifting provisions.
 - 1. Handle MCCs in accordance with NEMA ICS 2.3 and NECA NEIS 402.

1.11 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Modeling, analysis, product selection, installation, and quality control for all electrical Work on the Project must comply with service condition requirements specified in Section 018116 "Facility

Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria."

- B. Usual Service Conditions: Unless unusual service conditions have been specified in "General Equipment Service Conditions," "Outdoor Equipment Service Conditions," and "Indoor Equipment Services Conditions" articles of Section 018116 "Facility Environmental Requirements," electrical service and distribution equipment must be suitable for operation under usual service conditions specified in applicable IEEE C37 series and IEEE C57 series standards.

1.12 WARRANTY FOR SECONDARY UNIT SUBSTATIONS

- A. Special Installer Extended Warranty: Installer warrants that assembled and installed secondary unit substation performs in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Extended-Warranty Period: **[Two][Three][Four]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that secondary unit substation performs in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Initial Extended-Warranty Period: **[Three][Four][Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
 - 2. Follow-On Extended-Warranty Period: **[Eight]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for materials only, free on board **[origin][destination]**, freight prepaid.

PART 2 - PRODUCTS

2.1 EXISTING PRODUCTS TO BE MODIFIED

- A. Basis for Pricing: **<Insert name of manufacturer and model number or series for existing product>**.
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact Work>**.
- C. Accessories: **<Insert accessories included with existing product>**.

2.2 EXISTING PRODUCTS TO BE REMOVED AND RE-INSTALLED

- A. Basis for Pricing: **<Insert name of manufacturer and model number or series for existing product>**.
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact Work>**.
- C. Accessories: **<Insert accessories included with existing product>**.

**2.3 PERFORMANCE REQUIREMENTS**

- A. Description: Medium-voltage, primary incoming section; transformer section; and low-voltage MCC section; and including coordinated circuit breakers, fusible switches, and metering components.
- B. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- C. General Characteristics:
 - 1. Referenced Standards: IEEE C2 and IEEE C37.121.
 - 2. Indoor Unit Arrangement: Single assembly, with secondary section MCC complying with **[UL 50E, Type 1][UL 50E, Type 1 (gasketed)][UL 50E, Type 12]** construction.
 - 3. Outdoor Unit Arrangement: Single assembly.
 - a. Weatherproof, listed for installation outdoors, with primary and transformer sections complying with IEEE C37.20.1, and MCC section complying with UL 50E, Type 3R.
 - b. Aisleless Construction: Full-height doors in front of basic weatherproof equipment.
 - 4. Connections between primary device and transformer must be **[cable][bus]**, and between transformer and secondary must be flexible bus braid unless noted otherwise.
 - 5. Indoor Enclosure: Steel.
 - 6. Outdoor Enclosure: Weatherproof, galvanized steel, listed for installation outdoors, complying with IEEE C37.20.1. Aisleless, full-height doors, with provisions for padlocking, in front of basic weatherproof equipment. Integral structural-steel base frame with factory-applied asphaltic undercoating.
 - a. Compartments must have the following features:
 - 1) Structural design and anchorage adequate to resist loads imposed by **[125 mph (200 km/h)]<Insert wind speed>** wind.
 - 2) Space heater operating at one-half or less of rated voltage, sized to prevent condensation, controlled by thermostats to maintain temperature of section above expected dew point.
 - 3) Louvers equipped with insect and rodent screens and filters, and arranged to permit air circulation while excluding rodents and exterior dust.
 - 4) Weatherproof ground-fault circuit interrupter (GFCI) duplex receptacle.
 - 5) Power for heaters and receptacles must be provided **[by control power transformer][as indicated on the Drawings]**.
 - 6) Skid Mounted: Mount shipping group on integral base frame as complete weatherproof unit.
 - 7. Unit Substation Enclosures Finish:
 - a. Factory-applied finish in manufacturer's standard color, including under surfaces treated with corrosion-resistant undercoating.
 - b. Factory-applied finish in manufacturer's standard gray over rust-inhibiting primer on treated metal surface.
 - c. Factory-applied corrosion-resistant finish in manufacturer's standard color that withstands **[120 h][480 h]** of exposure to salt spray test specified in ASTM B117 without loss of paint or release of adhesion of paint primer coat to metal surface in excess of **1/16 inch (1.6 mm)** from test mark. Scribed test mark and test evaluation must be in accordance with ASTM D1654, with rating of not less than 7, in accordance with Table 1 (procedure A). Cut edges or otherwise damaged surfaces of hot-dip galvanized sheet steel or mill-galvanized

Secondary Unit Substations with Motor Control Center

sheet steel must be coated with manufacturer's standard zinc-rich paint.

2.4 SECONDARY UNIT SUBSTATION EQUIPMENT

A. Source Quality Control:

1. Factory Tests:

- a. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
- b. Testing Administrant: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate secondary unit substation equipment.
- c. Factory Tests and Inspections: Perform the following tests and inspections on secondary unit substation equipment, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with the following standards before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.

- 1) Conduct transformer tests in accordance with IEEE C57.12.90.
- 2) Conduct primary switchgear tests in accordance with NEMA C37.51.
- 3) Conduct routine tests of completely assembled MCC, including the following:
 - a) Dielectric Tests: Comply with NEMA ICS 1.
 - b) Verify correct operation of circuit breaker, **[motor circuit protector,]** magnetic contactor, and control devices, accessories and indicating lamps. Verification checks must be made at rated voltage with power supplies to main buses.
 - c) Verify correct operation of magnetic contactors with power at 90 percent of rated voltage.
- 4) Resistance measurements of windings on rated voltage connection and on tap extreme connections.
- 5) Ratios on rated voltage connection and on tap extreme connections.
- 6) Polarity and phase relation on rated voltage connection.
- 7) No-load loss at rated voltage on rated voltage connection.
- 8) Exciting current at rated voltage on rated voltage connection.
- 9) Impedance and load loss at rated current on rated voltage connection and on tap extreme connections.
- 10) Applied potential.
- 11) Induced potential.

2. Temperature Test: If transformer is supplied with auxiliary cooling equipment to provide more than one rating, test at lowest kVA Class ONAN or Class AA rating and highest kVA Class ONAF or Class AFA rating.

- a. Temperature test is not required if record of temperature test on essentially duplicate unit is available.
- b. Nonconforming Work:
 - 1) Equipment that does not pass tests and inspections will be considered defective.
- c. Factory Test Reports: Compile and submit factory test and inspection reports.

**B. UL YEFV or DLAH or WVG N - Medium-Voltage Terminal Compartment Section :**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Unit Substation over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - b. Metal-Clad Switchgear over 1000 V: UL CCN DLAH, including IEEE C37.20.2 and NEMA C37.55.
 - c. Metal-Enclosed Arc-Resistant Switchgear over 1000 V: UL CCN WVG N, including IEEE C37.20.3 and IEEE C37.20.7.
4. Standard Features:
 - a. Primary Incoming Section: Terminal assembly with adequate space for incoming-cable terminations and surge arresters, complying with NEMA SG 4 and meeting thermal, mechanical, and dielectric requirements specified for transformer section.
 - b. Ratings: Suitable for application in three-phase, 60 Hz, solidly grounded-neutral system.
 - c. System Voltage: **[4.16 kV nominal; 4.76 kV maximum][7.2 kV nominal; 15 kV maximum][13.8 kV nominal; 15 kV maximum][34.5 kV nominal; 38 kV maximum]<Insert other voltage>**.
 - d. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, connected in each phase of incoming circuit and ahead of disconnecting device.

C. UL YEFV or DLAH or WVG N - Medium-Voltage Metal-Enclosed Switchgear Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

Secondary Unit Substations with Motor Control Center

following]:

- a. [ABB, Electrification Business]
 - b. [Eaton]
 - c. [Siemens Industry, Inc., Energy Management Division]
 - d. [Square D; Schneider Electric USA]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Eaton]
 - c. [Siemens Industry, Inc., Energy Management Division]
 - d. [Square D; Schneider Electric USA]
 - e. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Unit Substation over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - b. Metal-Clad Switchgear over 1000 V: UL CCN DLAH, including IEEE C37.20.2 and NEMA C37.55.
 - c. Metal-Enclosed Arc-Resistant Switchgear over 1000 V: UL CCN WVGW, including IEEE C37.20.3 and IEEE C37.20.7.
4. Standard Features:
 - a. Metal-enclosed, air-interrupter switchgear, [with][without] fuses, complying with IEEE C37.20.3.
 - 1) Switchgear must be arc-resistant, complying with IEEE C37.20.7, [Type 1A][Type 2A][Type 1C][Type 2C].
 - b. Ratings: Comply with IEEE C37.04; and suitable for application in three-phase, 60 Hz, solidly grounded-neutral system.
 - 1) System Voltage: [4.16 kV nominal; 4.76 kV maximum][7.2 kV nominal; 15 kV maximum][13.8 kV nominal; 15 kV maximum][34.5 kV nominal; 38 kV maximum]<Insert other voltage>.
 - 2) Design Level of Available-Source Fault Current: Integrated short-circuit rating consistent with value of fault current indicated.
 - 3) Main-Bus Rating: [600 A][1200 A][2000 A], continuous.
 - c. Interrupter Switches: Stationary, gang operated, and suitable for application at maximum short-circuit rating of integrated switchgear assembly.

- 1) Rating: **[600 A][1200 A]** continuous duty and load break.
 - 2) Two-Time Duty-Cycle Fault Closing: **[25 000 A(asym)][40 000 A(asym)]**.
 - 3) Switch Action: No external arc and no significant quantities of ionized gas released into enclosure.
 - 4) Switch Construction: Supported entirely by interior framework of structure, with copper switchblades and stored-energy operating mechanism.
 - 5) Phase Barriers: Full length of switchblades and fuses for each pole; designed for easy removal; allow visual inspection of switch components if barrier is in place.
 - 6) Protective Shields: Cover live components and terminals.
 - a) Fuse Mounts: Single-frame mounted and de-energized when switch is open.
 - 7) Mechanical Interlock: Prevent opening switch compartment door unless switchblades are open, and prevent closing switch if door is open. **[Interlock air-interrupter switch with transformer secondary main circuit breaker, preventing switch from being opened or closed unless secondary main circuit breaker is open.]**
 - 8) Window: Permits viewing switch-blade positions when door is closed.
 - 9) Accessory Set: Tools and miscellaneous items required for interrupter switchgear test, inspection, maintenance, and operation. Include fuse-handling tool as recommended by switchgear manufacturer.
- d. Fuses: Sizes recommended by secondary unit substation manufacturer, considering fan cooling, temperature-rise specification, and cycle loading.
- 1) Current-Limiting Fuses: Full-range, fast-replaceable, current-limiting type that will operate without explosive noise or expulsion of gas, vapor, or foreign matter from tube.
 - 2) Expulsion Fuses: Furnished in disconnect-type mountings and renewable with replacement fuse units. Gases emitted on interruption are controlled and silenced by chambers designed for that purpose.
 - 3) Indicator integral with fuse to show when it has blown.
 - 4) Spares: Include three fuses in use and three spare fuses in storage clips in switch.
- e. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, with ratings as indicated, connected in each phase of incoming circuit and ahead of disconnecting device.

D. UL YEFV or DLAH or WVG N - Medium-Voltage Instruments Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [ABB, Electrification Business]
 - b. [Eaton]
 - c. [Siemens Industry, Inc., Energy Management Division]
 - d. [Square D; Schneider Electric USA]
 - e. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Unit Substation over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - b. Metal-Clad Switchgear over 1000 V: UL CCN DLAH, including IEEE C37.20.2 and NEMA C37.55.
 - c. Metal-Enclosed Arc-Resistant Switchgear over 1000 V: UL CCN WVGN, including IEEE C37.20.3 and IEEE C37.20.7.
4. Standard Features:
 - a. Instrument Transformers: Comply with IEEE C57.13.
 - 1) Potential and Current Transformers: Burden and Accuracy Class suitable for connected meters.
 - b. Multifunction Digital-Metering Monitor: Microprocessor-based unit suitable for three- or four-wire systems.
 - 1) Inputs from sensors or 5 A current-transformer secondaries, and potential terminals rated to 600 V.
 - 2) Switch-selectable digital display with the following features:
 - a) Phase Currents, Each Phase: Plus or minus 1 percent.
 - b) Phase-to-Phase Voltages, Three Phase: Plus or minus 1 percent.
 - c) Phase-to-Neutral Voltages, Three Phase: Plus or minus 1 percent.
 - d) Three-Phase Real Power: Plus or minus 2 percent.
 - e) Three-Phase Reactive Power: Plus or minus 2 percent.
 - f) Power Factor: Plus or minus 2 percent.
 - g) Frequency: Plus or minus 0.5 percent.
 - h) Integrated Demand: Demand interval selectable from 5 to 60 min; plus or minus 2 percent.
 - i) Accumulated Energy in MWh (MJ): Plus or minus 2 percent; stored values unaffected by power outages for up to 72 h.
 - 3) Communications module suitable for remote monitoring of meter quantities and functions. Interface communication and metering.
 - 4) Mounting: Display and control unit that is flush or semiflush mounted in instrument compartment door.
 - c. Analog Instruments: Rectangular, **4-1/2 inch (115 mm)** square, 1 percent accuracy, semiflush mounting, with antiparallax 250-degree scale and external zero adjustment.

- 1) Voltmeters: Cover expanded scale range of normal voltage plus 10 percent.
 - 2) Voltmeter Selector Switch: Rotary type with off position to provide readings of phase-to-phase[**and phase-to-neutral**] voltages.
 - 3) Ammeters: Cover expanded scale range of bus rating plus 10 percent.
 - 4) Ammeter Selector Switch: Permits current reading in each phase and keeps current-transformer secondary circuits closed in off position.
 - 5) Locate meter and selector switch on circuit-breaker compartment door for indicated feeder circuits only.
 - 6) Watt-Hour Meters: Flush- or semiflush-mounting type, 5 A, 120 V, three phase, three wire; with three elements, **[15 min]<Insert duration>** indicating demand register, and provision for testing and adding pulse initiation.
 - 7) Recording Demand Meter: Usable as totalizing relay or indicating and recording maximum demand meter with **[15 min]<Insert duration>** interval.
- d. Operation: Counts and records succession of pulses entering two channels.
 - e. Housing: Drawout, back-connected case arranged for semiflush mounting.

E. UL YEFV or XPLH - Liquid-Filled Transformer Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Siemens Industry, Inc., Energy Management Division]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Siemens Industry, Inc., Energy Management Division]**
 - c. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Unit Substation over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - 3) Liquid-Immersed Transformers: IEEE C57.12.00.
 - b. Liquid-Filled Distribution Transformers over 600 V: UL CCN XPLH, including IEEE C57.12.00 and IEEE C57.12.28.
4. Standard Features:
 - a. Insulating Liquid:
 - 1) Mineral oil complying with ASTM D3487, Type II, and tested in accordance with

Secondary Unit Substations with Motor Control Center

- ASTM D117.
- 2) Less flammable, edible-seed-oil based, listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic.
- 3) Less flammable, dielectric, listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic.
- 4) Less flammable, silicone-based dielectric, listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must have low toxicity and be nonhazardous.

b. Insulation Temperature Rise:

- 1) 55 deg C, based on average ambient temperature of 30 deg C over 24 h with maximum ambient temperature of 40 deg C. Insulation system must be rated to continuously allow additional 12 percent kVA output, at 65 deg C temperature rise, without decreasing rated transformer life.
- 2) 65 deg C, based on average ambient temperature of 30 deg C over 24 h with maximum ambient temperature of 40 deg C.

c. BIL: **[60 kV][75 kV][95 kV][110 kV]**.

d. Full-Capacity Voltage Taps:

- 1) Four nominal 2.5 percent taps, two above and two below rated primary voltage, with externally operable tap changer for de-energized use and with position indicator and padlock hasp.
- 2) Four nominal 2.5 percent taps below rated primary voltage, with externally operable tap changer for de-energized use and with position indicator and padlock hasp.

e. Cooling System: **[Class ONAN, liquid cooled][Class ONAN/ONAF, liquid cooled, and with forced-air rating][Class ONAN/ONAF/ONAF, liquid cooled, and with provisions for future forced-air rating]**. Cooling systems must include auxiliary cooling equipment, automatic controls, and status indicating lights.

f. Impedance: **<Insert number>** percent.

g. Accessories: Grounding pads, lifting lugs, and provisions for jacking under base. Transformers must have steel base and frame allowing use of pipe rollers in any direction, and insulated, low-voltage, neutral bushing with removable ground strap. **[Include the following additional accessories:]**

- 1) Liquid-level gauge.
- 2) Pressure-vacuum gauge.
- 3) Liquid temperature indicator.
- 4) Drain and filter valves.
- 5) Pressure-relief device.

F. UL YEFV - Dry-Type Transformer Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[Eaton]**
 - b. **[Square D; Schneider Electric USA]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Square D; Schneider Electric USA]**
 - c. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Unit Substation over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - 3) Dry-Type Transformers: UL 1562.
4. Standard Features:
 - a. Primary Incoming Section: Transformer cover-mounted bushings. Bushings must meet thermal, mechanical, and dielectric requirements as specified for transformer section.
 - b. Style:
 - 1) **[Indoor, ventilated][Outdoor, ventilated][Totally enclosed, nonventilated]**, cast coil/encapsulated coil, with primary and secondary windings individually cast in epoxy; with insulation system rated at 185 deg C with 80 deg C average winding temperature rise above maximum ambient temperature of 40 deg C.
 - 2) **[Indoor, ventilated][Outdoor, ventilated][Totally enclosed, nonventilated]**, vacuum-pressure, impregnated type, and with insulation system rated at 220 deg C with 80 deg C average winding temperature rise above maximum ambient temperature of 40 deg C.
 - c. Cooling System:
 - 1) Class AA: air cooled, complying with IEEE C57.12.01.
 - 2) Class AFA: air cooled with forced-air rating, complying with IEEE C57.12.01.
 - a) Manual forced-air cooling system controls, including manual switch for fans, fan controller and associated power and control wiring, and power panel with current-limiting fuses.
 - b) Include **[mounting provisions for]** cooling fans.
 - 3) Class AA/FA: air cooled with provisions for future forced-air rating, complying with IEEE C57.12.01.
 - a) Automatic forced-air cooling system controls, including thermal sensors, fans, control wiring, temperature controller with test switch, power panel with current-limiting fuses, indicating lights, alarm, and alarm-silencing relay.
 - b) Include mounting provisions for fans.

Secondary Unit Substations with Motor Control Center

- d. Insulation Materials: IEEE C57.12.01, rated **[220 deg C]<Insert deg C>**.
 - 1) Insulation Temperature Rise: **[80 deg C][115 deg C][150 deg C]** maximum rise above 40 deg C.
 - e. BIL: **[60 kV][75 kV][95 kV][110 kV]**.
 - f. Full-Capacity Voltage Taps:
 - 1) Four nominal 2.5 percent taps, two above and two below rated primary voltage.
 - 2) Four nominal 2.5 percent taps below rated primary voltage.
 - g. Impedance: **<Insert number>** percent.
5. High-Temperature Alarm: Sensor at transformer with local audible and visual alarm and contacts for remote alarm.

G. UL NJAV - Secondary Distribution Section MCC :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Motor Control Center: UL CCN NJAV, including UL 845.
- 4. Standard Features:
 - a. MCC: Combination motor controllers, complying with NEMA ICS 18.
 - 1) Wiring:
 - a) NEMA ICS 18, **[Class I][Class I-S], [Type A][Type B, for starters larger than Size 3][Type B-D, for starter Size 3 and smaller][Type B-T, for starter**

- Size 3 and smaller][Type C].**
- b) NEMA ICS 18, **[Class II][Class II-S], [Type B, for starters larger than Size 3][Type B-D, for starter Size 3 and smaller][Type B-T, for starter Size 3 and smaller][Type C].**
- 2) Short-Circuit Current Rating for Each Unit: **[Combination series rated][Fully rated]; [22 kA][42 kA][65 kA][100 kA]<Insert kA>.**
- 3) Short-Circuit Current Rating of MCC: **[Combination series rated][Fully rated]** with its main overcurrent device; **[22 kA][42 kA][65 kA][100 kA]<Insert kA>.**
- b. MCC Structure: Front and rear accessible.
- 1) Match and align front[**and rear**] of MCC.
- 2) Comply with UL requirements for service entrance equipment.
- c. MCC Bus:
- 1) Use bus bars to connect compartments and vertical sections. Cable connections are prohibited.
- 2) Main Phase Bus: Uniform capacity entire length of section.
- 3) Neutral Bus: **[50][100]** percent of phase-bus ampacity, except as indicated on the Drawings. Equip bus with pressure-connector terminations for outgoing circuit neutral conductors.
- 4) Vertical Section Bus: Extend to spaces for future controllers.
- 5) Phase- and Neutral-Bus Material:
- a) Hard-drawn copper of 98 percent minimum conductivity, with copper feeder circuit-breaker line connections.
- b) Hard-drawn copper of 98 percent minimum conductivity or tin-plated, high-strength, electrical-grade aluminum alloy.
- 6) Ground Bus: Hard-drawn copper of 98 percent minimum conductivity, with pressure connector for ground conductors, minimum size **1/4 by 2 inch (6 by 50 mm)**.
- 7) Neutral Disconnect Link: Bolted, uninsulated, **1/4 by 2 inch (6 by 50 mm)** copper bus, arranged to connect neutral bus to ground bus.
- d. Power Circuit Breaker: **[Fixed][Drawout]** mounted, electrically operated air-circuit breaker. Comply with UL 1066.
- 1) With "close" and "open" push-buttons and red and green lighted breaker position indicators. Charging time of motor operator must not exceed 8 s. Operator power must be from supply internal to MCC.
- 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
- 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
- 4) LED indicators or display, with manual reset, to show cause of automatic trip.
- 5) Display panel to indicate that status of system circuitry is fully operational, or give fault location based on automatic diagnosis.
- 6) Trip circuit breaker when closing on fault.
- 7) Time-current adjustments to achieve protective-device coordination as follows:
- a) Adjustable long-delay pickup and time.
- b) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
- c) Adjustable instantaneous pickup.

Secondary Unit Substations with Motor Control Center

- d) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - 8) One test kit to test trip function.
 - 9) Battery backup for informational displays after automatic trip, with battery status indicator LED.
- e. Bolted Pressure Switch: Fixed mounted, manually operated, **[electrically tripped,][fusible,]** bolted pressure contact switch. Comply with UL 977.
 - 1) Stored energy deadfront mechanism, compressed and released by operating handle; switching action must be independent of speed of operating handle.
 - 2) Indication whether switch is open or closed, and provisions for padlocking operating handle.
 - 3) With fuse clips and fuses for UL 248 Class L time-delay fuses.
 - 4) Electrically tripped switches must include:
 - a) Ground-fault protection, with adjustable time delay and test panel.
 - b) Single-phase protection, tripping switch on loss of source phase.
 - c) Blown fuse protection, tripping switch on blown fuse, with blown fuse indication.
 - d) Operator power must be from supply internal to MCC.
- f. Insulated Case Circuit Breaker: **[Fixed][Drawout]** mounted, **[manually][electrically]** operated air-circuit breaker. Comply with UL 1066.
 - 1) With "close" and "open" push-buttons and red and green lighted breaker position indicators. Charging time of motor operator must not exceed 8 s. Operator power must be from supply internal to MCC.
 - 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) LED indicators or display, with manual reset, to show cause of automatic trip.
 - 5) Display panel to indicate that status of system circuitry is fully operational, or give fault location based on automatic diagnosis.
 - 6) Trip circuit breaker when closing on fault.
 - 7) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-delay pickup and time.
 - b) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
 - c) Adjustable instantaneous pickup.
 - d) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - 8) With built-in connector to test breaker settings. Provide one test set.
 - 9) Battery backup for informational displays after automatic trip, with battery status indicator.
- g. MCCB (to 2500 A): Fixed mounted, manually operated air-circuit breaker. Comply with UL 489.
 - 1) With quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, and its position is shown by position of handle. With manual

- push-to-trip push-button.
- 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
- 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
- 4) With trip-setting dials or interchangeable plugs to establish continuous trip of circuit breaker. Plugs must not be interchangeable between frames, and breaker may not be closed without plug. With neutral ground-fault sensor.
- 5) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-time delay.
 - b) Adjustable short-time setting and delay to shape time-current curve.
 - c) Adjustable instantaneous setting.
 - d) Individually adjustable ground-fault setting and time delay.
- 6) With built-in connector to test long-time delay, instantaneous, and ground-fault functions of breaker. **[Provide one test set for testing installed circuit breakers 225 A frame and higher.]**
- 7) With built-in digital ammeter display, showing load current and tripping cause.
- h. MCCB (1600 to 2500 A): Fixed mounted, manually operated air-circuit breaker. Comply with UL 489.
 - 1) With quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, and its position is shown by position of handle. With manual push-to-trip push-button.
 - 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) LED indicators or display, with manual reset, to show reasons of automatic trip.
 - 5) Display panel to indicate that status of system circuitry is fully operational, or give fault location based on automatic diagnosis.
 - 6) Trip circuit breaker when closing on fault.
 - 7) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-delay pickup and time.
 - b) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
 - c) Adjustable instantaneous pickup.
 - d) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - 8) One test kit to test trip function.
 - 9) Battery backup for informational displays after automatic trip, with battery status indicator.
- i. Fusible Switch: Fixed-mounted, manually operated, **[electrically tripped,]** quick-make, quick-break switch. Comply with UL 98.
 - 1) Indication whether switch is open or closed, and provisions for padlocking operating handle.
 - 2) With fuse clips and fuses.
 - 3) Electrically tripped switches must include:
 - a) Shunt trip.

- b) Ground-fault protection, with adjustable time delay and test panel.
 - c) Single-phase protection, tripping switch on loss of source phase.
 - d) Blown fuse protection, tripping switch on blown fuse, with blown fuse indication.
 - e) Operator power must be from supply internal to MCC.
- j. Full-Voltage Magnetic Controllers: Electrically held, full voltage, NEMA ICS 2, general purpose, Class A.
 - 1) Configurations: **[Nonreversing][and][reversing]<Insert configuration>**.
- k. Reduced-Voltage Magnetic Controllers: Electrically held, NEMA ICS 2, general purpose, Class A; closed transition; adjustable time delay on transition.
 - 1) Configurations: Reduced voltage, electrically held.
 - a) Wye-Delta Controller: Four contactors, with three-phase starting resistor/reactor bank.
 - b) Part-Winding Controller: Separate START and RUN contactors, field selectable for one-half or two-thirds winding start mode, with either six- or nine-lead motors; with separate overload relays for starting and running sequences.
 - c) Autotransformer Reduced-Voltage Controller: Medium-duty service, with integral overtemperature protection; taps for starting at 50, 65, and 80 percent of line voltage; one RUN and two START contactors.
- l. Reduced-Voltage, Solid-State Controllers: Comply with UL 508.
 - 1) Description: Integrated unit with power SCRs, heat sink, microprocessor logic board, door-mounted digital display and keypad, bypass contactor, and overload relays.
 - 2) Application: Suitable for use with NEMA MG 1 Design B, polyphase induction motors.
 - 3) Configuration: **[Standard duty][Severe duty]; [nonreversible][reversible]**.
 - 4) Starting Mode: **[Voltage ramping][Current limit][Torque control][Torque control with voltage boost]; field selectable**.
 - 5) Stopping Mode: **[Coast to stop][Adjustable torque deceleration][Adjustable braking]; field selectable**.
 - 6) Surge Suppression: Factory installed as integral part of controller, SPD complying with UL 1449 as Type 2, or SPD complying with UL 1449, Type 4, suitable for use in Type 2 application.
 - 7) Bypass Contactor: Operates automatically to bypass SCRs when motor has reached rated speed and full voltage is applied to motor. Solid-state controller protective features must remain active when bypass relay is in bypass mode.
 - a) Manufacturer's standard product.
 - b) NEMA ICS 2, general-purpose, Class A contactor, rated to start load across the line.
 - 8) Bypass Contactor Coils: Pressure-encapsulated type; manufacturer's standard operating voltage, matching control power or line voltage, depending on contactor size and line-voltage rating. **[Provide coil with SPD.]**
 - 9) Adjustable acceleration-rate control using voltage or current ramp, and adjustable starting torque control with up to **[400]<Insert number>** percent current limitation for 20 s.

- 10) SCR Bridge: At least two SCRs per phase, for stable and smooth acceleration **[with][without]** external feedback from motor or driven equipment.
- 11) Keypad: Front accessible; for programming controller parameters, functions, and features; must be manufacturer's standard and include not less than the following functions:
 - a) Adjusting motor full-load amperes, as percentage of controller's rating.
 - b) Adjusting current limitation on starting, as percentage of motor full-load current rating.
 - c) Adjusting linear acceleration and deceleration ramps, in seconds.
 - d) Setting initial torque, as percentage of nominal motor torque.
 - e) Adjusting torque limit, as percentage of nominal motor torque.
 - f) Adjusting maximum start time, in seconds.
 - g) Adjusting voltage boost, as percentage of nominal supply voltage.
 - h) Selecting stopping mode and adjusting parameters.
 - i) Selecting motor thermal-overload protection class between 5 and 30.
 - j) Activating and deactivating protection modes.
 - k) Selecting or activating communications modes.
 - l) **<Insert function>**.
- 12) Digital display, front accessible; for showing motor, controller, and fault status; must be manufacturer's standard and include not less than the following:
 - a) Controller Condition: Ready, starting, running, stopping.
 - b) Motor Condition: Amperes, voltage, power factor, power, and thermal state.
 - c) Fault Conditions: Controller thermal fault, motor overload alarm and trip, motor underload, overcurrent, shorted SCRs, line or phase loss, phase reversal, and line frequency over or under normal.
 - d) **<Insert items>**.
- 13) Controller Diagnostics and Protection:
 - a) Microprocessor-based thermal protection system for monitoring SCR and motor thermal characteristics, and providing controller overtemperature and motor overload alarm and trip; settings selectable via keypad.
 - b) Protection from line-side reverse phasing; line-side and motor-side phase loss; motor jam, stall, and underload conditions; and line frequency over or under normal.
 - c) Input isolation contactor that opens when controller diagnostics detect faulted solid-state component, or when motor is stopped.
 - d) Shunt trip that opens disconnecting means when controller diagnostics detect faulted solid-state component.
 - e) **<Insert items>**.
- 14) Remote Output Features:
 - a) All outputs prewired to terminal blocks.
 - b) Form C status contacts that change state when controller is running.
 - c) Form C alarm contacts that change state when fault condition occurs.
 - d) **<Insert items>**.
- 15) Optional Features:
 - a) Analog output for field-selectable assignment of motor operating characteristics; **[Zero to 10 V(dc)][4 to 20 mA(dc)]**.

- b) **[Two]<Insert number>** additional field-assignable Form C contacts for alarm outputs.
 - c) Full-voltage/BYPASS selector switch. Power contacts must be totally enclosed, double break, and made of silver-cadmium oxide; and assembled to allow inspection and replacement without disturbing line or load wiring.
- m. Multispeed Magnetic Controllers: Electrically held, full voltage, NEMA ICS 2, general purpose, Class A.
 - 1) Nonreversing Configuration: **[Consequent pole][Two winding]**.
 - a) Two speed, with compelling relays to ensure that motor will start only at low speed.
 - b) Accelerating timer relays, for properly timed acceleration through speeds lower than that selected.
 - c) Decelerating timer relays, for automatically timed deceleration through each speed.
 - 2) Reversing Configuration: **[Consequent pole][Two winding]**.
 - a) Two speed, with compelling relay to ensure that motor will start only at low speed.
 - b) Compelling relays must ensure that motor starts only at low speed.
 - c) Accelerating timer relays, for properly timed acceleration through speeds lower than that selected.
 - d) Decelerating timer relays, for automatically timed deceleration through each speed.
 - e) Antiplugging timer relays, for time delay when transferring from FORWARD to REVERSE and back.
- n. Controller Disconnect and OCPD:
 - 1) Fusible Disconnecting Means:
 - a) NEMA KS 1, heavy-duty, horsepower-rated fusible switch, with clips or bolt pads to accommodate **[Class J][Class L]<Insert class>** fuses.
 - b) Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c) Auxiliary Contacts: N.O./N.C., arranged to activate before switch blades open.
 - 2) MCP Disconnecting Means:
 - a) UL 489, with interrupting capacity complying with available fault currents, instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
 - b) Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c) Auxiliary contacts "a" and "b" arranged to activate with MCP handle.
 - d) **[N.C.][N.O.]** alarm contact that operates only when MCP has tripped.
 - e) Current-limiting module to increase controller short-circuit current (withstand) rating to 100 kA.
 - 3) MCCB Disconnecting Means:

- a) UL 489, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.
 - b) Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
 - c) Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - d) Auxiliary contacts "a" and "b" arranged to activate with MCCB handle.
 - e) **[N.C.][N.O.]** alarm contact that operates only when MCCB has tripped.
- 4) Molded-Case Switch Disconnecting Means:
- a) UL 489, with in-line fuse block for Class J or Class L power fuses (depending on ampere rating), providing interrupting capacity to comply with available fault currents; MCCB with fixed, high-set instantaneous trip only.
 - b) Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c) Auxiliary contacts "a" and "b" arranged to activate with molded-case switch handle.
 - d) **[N.C.][N.O.]** alarm contact that operates only when molded-case switch has tripped.
- o. Overload Relays:
- 1) Melting-Alloy Overload Relays:
- a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
- 2) Bimetallic Overload Relays:
- a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - d) Ambient compensated.
 - e) Automatic resetting.
- 3) Solid-State Overload Relays:
- a) Switch or dial selectable for motor-running overload protection.
 - b) Sensors in each phase.
 - c) **[Class 10][Class 20][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
 - d) Class II ground-fault protection, with start and run delays to prevent nuisance trip on starting.
 - e) Analog communication module.
- 4) **[N.C.][N.O.]** isolated overload alarm contact.
- 5) External overload reset push-button.
- p. Control Power:

- 1) Control Circuits: **[24 V(ac)][120 V(ac)]<Insert voltage>**; obtained from **[integral CPT, with primary and secondary fuses]<Insert source of control power>**, with **[CPT][control power source]** of sufficient capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 2) CPT Spare Capacity: **[50 VA][100 VA][200 VA]<Insert VA>**.
- q. Control Wiring: Factory installed, complete with bundling, lacing, and protection; and complying with the following:
- 1) Flexible conductors for 8 AWG and smaller, for conductors across hinges and for conductors for interconnections between shipping units.
 - 2) Conductors sized in accordance with NFPA 70 for duty required.
- r. ICCB Feeder Tap Units: **[Fixed][Drawout]**-mounted, **[manually][electrically]** operated air-circuit breakers. Comply with UL 1066.
- 1) With "close" and "open" push-buttons and red and green lighted breaker position indicators. Charging time of motor operator must not exceed 8 s. Operator power must be from control power transformer internal to switchboard.
 - 2) Solid-state monitoring and tripping system must provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) LED indicators or display, with manual reset, to show cause of automatic trip.
 - 5) Display panel to indicate that status of system circuitry is fully operational, or give fault location based on automatic diagnosis.
 - 6) Trip circuit breaker when closing on fault.
 - 7) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-delay pickup and time.
 - b) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
 - c) Adjustable instantaneous pickup.
 - d) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - 8) Built-in connector tests breaker settings. Provide one test set.
 - 9) Battery backup for informational displays after automatic trip, with battery status indicator.
- s. MCCB Feeder Tap Units (to 2500 A): Fixed-mounted, manually operated air-circuit breakers, complying with UL 489.
- 1) Include quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, and its position is shown by position of handle. Include manual push-to-trip push-button.
 - 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) Include trip-setting dials or interchangeable plugs to establish continuous trip of circuit breaker. Plugs must not be interchangeable between frames, and circuit breaker may not be closed without plug. With neutral ground-fault sensor.
 - 5) Time-current adjustments to achieve protective-device coordination as follows:

- a) Adjustable long-time delay.
 - b) Adjustable short-time setting and delay to shape time-current curve.
 - c) Adjustable instantaneous setting.
 - d) Individually adjustable ground-fault setting and time delay.
- 6) With built-in connector to test long-time delay, instantaneous, and ground-fault functions of breaker. **[Provide one test set for testing installed circuit breakers 225 A frame and higher.]**
- 7) With built-in digital ammeter and digital display, showing tripping cause.
- t. MCCB Feeder Tap Units (1600 to 2500 A): Fixed-mounted, manually operated air-circuit breakers, complying with UL 489.
 - 1) With quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, and its position is shown by position of handle. With manual push-to-trip push-button.
 - 2) Solid-state monitoring and tripping system to provide system status monitoring, adjustable time-current protection, and shunt trip.
 - 3) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 4) LED indicators or display, with manual reset, to show reasons of automatic trip.
 - 5) Display panel indicates that status of system circuitry is fully operational or gives fault location based on automatic diagnosis.
 - 6) Trip circuit breaker when closing on fault.
 - 7) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-delay pickup and time.
 - b) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
 - c) Adjustable instantaneous pickup.
 - d) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - 8) One test kit to test trip function.
 - 9) Battery backup for informational displays after automatic trip, with battery status indicator.
- u. Fusible Switch Feeder Tap Units: Fixed-mounted, manually operated, **[electrically tripped]**, fusible, quick-make, quick-break switch. Comply with UL 98.
 - 1) Indication whether switch is open or closed, and provisions for padlocking operating handle.
 - 2) Include fuse clips and fuses.
 - 3) Electrically tripped switches must include:
 - a) Shunt trip.
 - b) Ground-fault protection, with adjustable time delay and test panel.
 - c) Single-phase protection, tripping switch on loss of source phase.
 - d) Blown fuse protection, tripping switch on blown fuse, with blown fuse indication.
- v. Compartments: Modular; individual **[lift-off]** doors with concealed hinges and quick-captive screw fasteners. Interlocks on units require disconnecting means in off position before door can be opened or closed, except by operating permissive release device.
- w. Interchangeability: Compartments constructed to allow for removal of units without opening adjacent doors, disconnecting adjacent compartments, or disturbing operation of other

Secondary Unit Substations with Motor Control Center

units in MCC. Same-size compartments permit interchangeability and ready rearrangement of units, such as replacing three single units with unit requiring three spaces, without cutting or welding.

x. Wiring Spaces:

- 1) Vertical wireways in vertical section for vertical wiring to unit compartments; supports to hold wiring in place.
- 2) Horizontal wireways in **[bottom][and][top]** of vertical section for horizontal wiring between vertical sections; supports to hold wiring in place.

y. General Requirements for Control-Circuit and Pilot Devices: NEMA ICS 5; factory installed in controller enclosure cover unless otherwise indicated.

- 1) Push-Buttons, Pilot Lights, and Selector Switches: **[Heavy][Standard]-duty[, oiltight]** type.
 - a) Push-Buttons: **[Covered][Lockable][Recessed][Shielded][Shrouded][Unguarded]** types; **[maintained][momentary]** contact unless otherwise indicated.
 - b) Pilot Lights: **[Incandescent][LED][Neon][Resistor][Transformer]** types; **<Insert color(s)>; push to test**.
 - c) Selector Switches: **[Rotary]<Insert description>** type.
- 2) Elapsed-Time Meters: Heavy duty with digital readout in hours[; **nonresettable**][; **resettable**].

z. Meters: Panel type, **2 1/2 inch (64 mm)** minimum size with 90- or 120-degree scale and plus or minus 2 percent accuracy, with selector switches having off position.

- aa. **[N.C.][N.O.][Reversible N.C./N.O.]** contactor auxiliary contact(s).
- bb. Control Relays: Auxiliary and adjustable **[pneumatic][solid-state]** time-delay relays.
- cc. Phase-Failure, Phase-Reversal, and Undervoltage and Overvoltage Relays: Solid-state sensing circuit with isolated output contacts for hard-wired connections and adjustable undervoltage, overvoltage, and time-delay settings.
- dd. Space heaters, with N.C. auxiliary contacts, to mitigate condensation in enclosures installed outdoors or in unconditioned interior spaces subject to humidity and temperature swings.
- ee. Sun shields, installed on fronts, sides, and tops of enclosures installed outdoors and subject to direct and extended sun exposure.
- ff. Cover gaskets, for UL 50E, Type 1 enclosures.
- gg. Terminals, for connecting power-factor correction capacitors to **[line][load]** side of overload relays.
- hh. Spare control-wiring terminal blocks[; **unwired**][; **wired**].
- ii. **<Insert auxiliary device>**.

H. UL YEFV or YEFR - Low-Voltage Instruments Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**

- d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Unit Substation over 600 V: UL CCN YEFV, including the following referenced standards:
 - 1) Articulated Unit Substations: IEEE C37.121.
 - 2) Integral Unit Substations: IEEE C37.20.2, IEEE C37.20.3, NEMA C37.55, and NEMA C37.57.
 - b. Unit Substation Rated 600 V or Less: UL CCN YEFR, including UL 1062.
4. Standard Features:
- a. Instrument Transformers: Comply with IEEE C57.13.
 - 1) Potential Transformers: Secondary voltage rating of 120 V and NEMA C12.11 Accuracy Class 0.3 with burdens of W, X, and Y.
 - 2) Current Transformers: Burden and Accuracy Class suitable for connected relays, meters, and instruments.
 - b. Multifunction Digital-Metering Monitor: Microprocessor-based unit suitable for three- or four-wire systems.
 - 1) Inputs from sensors or 5 A current-transformer secondaries, and potential terminals rated to 600 V.
 - 2) Switch-selectable digital display with the following features:
 - a) Phase Currents, Each Phase: Plus or minus 1 percent.
 - b) Phase-to-Phase Voltages, Three Phase: Plus or minus 1 percent.
 - c) Phase-to-Neutral Voltages, Three Phase: Plus or minus 1 percent.
 - d) Three-Phase Real Power: Plus or minus 2 percent.
 - e) Three-Phase Reactive Power: Plus or minus 2 percent.
 - f) Power Factor: Plus or minus 2 percent.
 - g) Frequency: Plus or minus 0.5 percent.
 - h) Integrated Demand, with Demand Interval: Selectable from 5 to 60 min, plus or minus 2 percent.
 - i) Accumulated energy, in **MWh (MJ)**, plus or minus 2 percent; stored values unaffected by power outages for up to 72 h.
 - 3) Communications module suitable for remote monitoring of meter quantities and functions. Interface communication and metering.

Secondary Unit Substations with Motor Control Center

- 4) Mounting: Display and control unit that is flush or semiflush mounted in instrument compartment door.
- c. Analog Instruments: Rectangular, **4-1/2 inch (115 mm)** square, 1 percent accuracy, semiflush mounting, with antiparallax 250-degree scale and external zero adjustment.
 - 1) Voltmeters: Cover expanded scale range of normal voltage plus 10 percent.
 - 2) Voltmeter Selector Switch: Rotary type with "off" position to provide readings of phase-to-phase[**and phase-to-neutral**] voltages.
 - 3) Ammeters: Cover expanded scale range of bus rating plus 10 percent.
 - 4) Ammeter Selector Switch: Permits current reading in each phase and keeps current-transformer secondary circuits closed in "off" position.
 - 5) Locate meter and selector switch on circuit-breaker compartment door for indicated feeder circuits only.
 - 6) Watt-Hour Meters: Flush- or semiflush-mounting type, 5 A, 120 V, three phase, three wire; with three elements, 15 min indicating demand register, and provision for testing and adding pulse initiation.
 - 7) Recording Demand Meter: Usable as totalizing relay or indicating and recording maximum demand meter with 15 min interval.
 - a) Operation: Counts and records succession of pulses entering two channels.
 - b) Housing: Drawout, back-connected case arranged for semiflush mounting.
- d. Surge Suppression: Factory installed as integral part of low-voltage switchgear, complying with UL 1449 SPD, Type 1, with the following features and accessories:
 - 1) Integral disconnect switch.
 - 2) Internal thermal protection that disconnects SPD before damaging internal suppressor components.
 - 3) Indicator light display for protection status.
 - 4) Form-C contacts rated at 5 A and 250 V(ac), one N.O. and one N.C., for remote monitoring of protection status.[**Contacts must reverse on failure of surge diversion module or on opening of current-limiting device. Coordinate with building power monitoring and control system.**]
 - 5) Surge counter.

2.5 MAINTENANCE MATERIAL ITEMS

- A. Spare Parts: Furnish to Owner spare parts, for repairing unit substation equipment, that are packaged with protective covering for storage on-site and identified with labels describing contents.[**Include the following:**]
 1. Spare Fuses: [**Six**]**<Insert number>** of each type and rating of fuse and fusible device used, except for medium-voltage fuses. Include spares for the following:
 - a. Primary disconnect fuses.
 - b. Potential transformer fuses.
 - c. Control power fuses.
 - d. Fuses for secondary fusible devices.
- B. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to secondary unit substation equipment, that are packaged with protective covering for storage on-site and identified with labels describing contents.[

Secondary Unit Substations with Motor Control Center

Secondary

**Include the following:]**

1. Racking handle, to manually move circuit breaker between "connected" and "disconnected" positions.
 2. Spare-Fuse Cabinet: Identified and compartmented steel box or cabinet with lockable door.
 3. Storage for Manual: Include rack or holder, near operating instructions, for copy of maintenance manual.
- C. Consumable Items: Furnish to Owner extra consumable items for storage on-site, identified with labels describing contents. **[Include the following:]**
1. Touchup Paint: **[Three]<Insert number>** half-pint containers of paint matching enclosure's exterior finish.
 2. Primary Switch Contact Lubricant: **[One]<Insert number>** container(s).

PART 3 - EXECUTION**3.1 EXAMINATION**

- A. Examine areas and space conditions for compliance with requirements for secondary unit substations and other conditions affecting performance of the Work.
- B. Examine roughing-in of conduits and grounding systems to verify the following:
 1. Wiring entries comply with layout requirements.
 2. Entries are within conduit-entry tolerances specified by manufacturer, and no feeders will have to cross section barriers to reach load or line lugs.
- C. Examine walls, floors, roofs, and concrete bases for suitable conditions for secondary unit substation installation.
- D. Verify that ground connections are in place. Maximum ground resistance must be 5 Ω at secondary unit substation location.
- E. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF SECONDARY UNIT SUBSTATION EQUIPMENT

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 2. Electrical Maintenance: NFPA 70B.
 3. Electrical Safety: NFPA 70E.
 4. Temporary Electric Power Work: NECA NEIS 200.
 5. Commissioning of Electrical Systems: NECA NEIS 90.
 6. Hot Work: NFPA 51B.
 7. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 8. Life Safety and Means of Egress Work: NFPA 101.

9. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
10. Work in Confined Spaces: NFPA 350.
11. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
12. Evaluation of Unlabeled Electrical Equipment: NFPA 791.
13. Installation of Liquid-Filled Transformers: NECA NEIS 410.
14. Installation of Medium-Voltage Switchgear: NECA NEIS 430.
15. Installation of Motor Control Centers: NEMA ICS 2.3.
16. AC Outdoor High-Voltage Circuit Breakers: NEMA SG 11.
17. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Install secondary unit substations on cast-in-place concrete equipment base(s).
2. Comply with requirements for vibration isolation and seismic control devices.

D. Interfaces with Other Work:

1. Identification: Provide labels for secondary unit substation equipment and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - d. Install number of signs required to be readable from accessible side, but space signs maximum of **30 ft (9 m)** apart.
 - e. Operating Instructions: Place printed operating instructions for secondary unit substations, including key interlocking, control sequences, elementary single-line diagram, and emergency procedures with maintenance materials.
2. Grounding and Bonding:
 - a. At Interior Locations: For grounding to grounding electrodes, use bare copper cable not smaller than 4/0 AWG. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors. Keep leads as short as practicable with no kinks or sharp bends. Make joints in grounding conductors and loops by exothermic weld or compression connector.
 - b. At Exterior Locations:
 - 1) For counterpoise use tinned bare copper cable not smaller than 4/0 AWG, buried not less than **24 inch (610 mm)** below grade interconnecting grounding electrodes. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors, sized as shown. Keep lead lengths as short as practicable with no kinks or sharp bends.
 - 2) Fence and equipment connections must not be smaller than 4 AWG. Ground fence at gate post and corner post and at intervals not exceeding **10 ft (3 m)**. Bond gate section to fence post using **1/8 by 1 inch (3 by 25 mm) [tinned]** flexible braided copper strap and clamps.
 - 3) Make joints in grounding conductors and loops by exothermic weld or compression connector.

3.3 FIELD QUALITY CONTROL

A. Administrant for Electrical Power Tests and Inspections:

Secondary Unit Substations with Motor Control Center

Secondary

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].
- B. Acceptance Testing Preparation:
1. **<Insert requirements>**.
- C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- D. Tests and Inspections:
1. Comply with provisions of "Testing and Test Methods" Chapter in NFPA 70B.
 2. Perform visual and mechanical inspections and electrical tests. Certify compliance with test parameters.
 3. After installing secondary unit substation but before primary is energized, verify that grounding system measurement at substation does not exceed specified value.
 4. After installing secondary unit substation and after electrical circuitry has been energized, test for compliance with requirements.
 5. Visual and Mechanical Inspection:
 - a. Verify equipment nameplate data complies with Contract Documents.
 - b. Inspect bolted electrical connections for high resistance using one of the following two methods:
 - 1) Use low-resistance ohmmeter to compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.
- E. Switchgear and MCC Field Tests:
1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Inspect anchorage, alignment, grounding, and required area clearances.
 - c. Verify unit is clean and shipping bracing, loose parts, and documentation shipped inside cubicles have been removed.
 - d. Verify that fuse and circuit-breaker sizes and types correspond to Drawings and coordination study as well as address of circuit breaker that is used to identify it in microprocessor-communication software.
 - e. Verify that current and voltage-transformer ratios correspond to Drawings.
 - f. Confirm correct operation and sequencing of electrical and mechanical interlock systems.
 - 1) Attempt closure on locked-open devices. Attempt to open locked-closed devices.

Secondary Unit Substations with Motor Control Center

- 2) Make key exchange with devices operated in off-normal positions.
 - g. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
 - h. Inspect insulators for evidence of physical damage or contaminated surfaces.
 - i. Verify correct barrier and shutter installation and operation.
 - j. Exercise active components.
 - k. Inspect mechanical indicating devices for correct operation.
 - l. Verify that filters are in place and vents are clear.
 - m. Inspect control power transformers as follows:
 - 1) Inspect for physical damage, cracked insulation, broken leads, connection tightness, defective wiring, and overall general condition.
 - 2) Verify that primary- and secondary-fuse or circuit-breaker ratings match Drawings and comply with manufacturer's published instructions.
 - 3) Verify correct functioning of drawout disconnecting and grounding contacts and interlocks.
2. Electrical Tests:
- a. Perform DC voltage insulation-resistance tests on bus section, phase-to-phase and phase-to-ground, for 1 min. If temperature of bus is other than plus or minus 20 deg C, adjust resulting resistance as provided in NETA ATS, Table 100.11.
 - 1) Insulation-resistance values of bus insulation must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than manufacturer's published recommendations or NETA ATS, Table 100.1.
 - 2) Do not proceed to dielectric withstand-voltage tests until insulation-resistance levels are raised above minimum values.
 - b. Perform dielectric withstand-voltage test on bus section, phase-to-ground with phases not under test grounded, in accordance with manufacturer's published data. If manufacturer has no published recommendation for this test, it must be conducted to in accordance with NETA ATS, Table 100.2. Apply test voltage for 1 min.
 - 1) If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric withstand-voltage test, test specimen is considered to have passed test.
 - c. Voltage Transformers:
 - 1) Perform secondary wiring integrity test. Verify correct potential at devices.
 - 2) Verify secondary voltages by energizing primary winding with system voltage.
 - d. Perform current-injection tests on entire current circuit in section of switchgear.
 - 1) Perform current tests by secondary injection with magnitudes such that minimum current of 1.0 A flows in secondary circuit. Verify correct magnitude of current at device in circuit.
 - 2) Perform current tests by primary injection with magnitudes such that minimum of 1.0 A flows in secondary circuit. Verify correct magnitude of current at device in circuit.
 - e. Verify operation of space heaters.

- f. Perform phasing checks on double-ended or dual-source switchgear to ensure correct bus phasing from every source.

F. Medium-Voltage Surge Arrester Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, grounding, and clearances.
- c. Verify that arresters are clean.
- d. Verify that ground lead on device is individually attached to ground bus or ground electrode.
- e. Verify that stroke counter is correctly mounted and electrically connected if applicable. Record stroke counter reading.

2. Electrical Test:

- a. Perform insulation-resistance test on arrester, phase terminal-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Replace units that fail to meet recommended minimum insulation resistance listed in table.
- b. Perform watts loss test. Evaluate watts loss values by comparison with similar units and test equipment manufacturer's published data.

G. Instrument Transformer Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Verify correct connection of transformers with system requirements.
- c. Verify that adequate clearances exist between primary and secondary circuit wiring.
- d. Verify that unit is clean.
- e. Verify that required grounding and shorting connections provide contact.
- f. Verify correct operation of transformer withdrawal mechanism and grounding operation.
- g. Verify correct primary- and secondary-fuse sizes for voltage transformers.
- h. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.

2. Electrical Tests of Current Transformers:

- a. Perform insulation-resistance test of current transformer and its secondary wiring with respect to ground at 1000 V(dc) for 1 min. For units with solid-state components that cannot tolerate applied voltage, comply with manufacturer's published instructions. Insulation-resistance values of instrument transformers must not be less than values shown in NETA ATS, Table 100.5.
- b. Perform polarity test of current transformer in accordance with IEEE C57.13.1. Polarity results must agree with transformer markings.
- c. Perform ratio-verification test using voltage or current method in accordance with IEEE C57.13.1. Ratio errors must comply with IEEE C57.13.
- d. Perform excitation test on transformers used for relaying applications in accordance with IEEE C57.13.1. Excitation results must match curve supplied by manufacturer or must comply with IEEE C57.13.1.
- e. Measure current circuit burdens at transformer terminals in accordance with IEEE C57.13.1. Measured burdens must match instrument transformer Accuracy Class rating.
- f. Perform insulation-resistance tests on primary winding with secondary grounded. Test

Secondary Unit Substations with Motor Control Center

- voltages must comply with NETA ATS, Table 100.5. Insulation-resistance value must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5.
- g. Perform dielectric withstand-voltage tests on primary winding with secondary grounded. Test voltages must comply with NETA ATS, Table 100.9. If no evidence of distress or insulation failure is observed by end of total time of voltage application, primary winding is considered to have passed test.
 - h. Perform power-factor or dissipation-factor tests in accordance with test equipment manufacturer's published data. Power-factor or dissipation-factor values must be in accordance with substation equipment manufacturer's published data. In absence of substation equipment manufacturer's published data, comply with test equipment manufacturer's published data.
 - i. Verify that current-transformer secondary circuits are grounded and have only one grounding point in accordance with IEEE C57.13.3.
3. Electrical Tests of Voltage and Potential Transformers:
- a. Perform insulation-resistance tests winding-to-winding and winding-to-ground. Apply test voltage for 1 min in accordance with NETA ATS, Table 100.5. For units with solid-state components that cannot tolerate applied voltage, follow manufacturer's published instructions. Insulation-resistance values of instrument transformers must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5.
 - b. Perform insulation-resistance tests winding-to-winding and winding-to-ground. Test voltages must be applied for 1 min in accordance with NETA ATS, Table 100.5. Insulation-resistance values of transformers must not be less than values shown in NETA ATS, Table 100.5.
 - c. Perform polarity test on transformer to verify polarity marks or H(1) to X(1) relationship. Polarity results must agree with transformer markings.
 - d. Perform turns-ratio test on tap positions. Ratio errors must not exceed tolerances specified in IEEE C57.13.
 - e. Measure voltage circuit burdens at transformer terminals. Measured burdens must be compared to instrument transformer ratings. Measured burdens must match instrument transformer Accuracy Class rating.
 - f. Perform dielectric withstand-voltage test on primary windings with secondary windings connected to ground. Dielectric voltage must comply with NETA ATS, Table 100.9. Test voltage must be applied for 1 min. If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric withstand-voltage test, primary windings are considered to have passed test.
 - g. Perform power-factor or dissipation-factor tests in accordance with test equipment manufacturer's published data. Power-factor or dissipation-factor values must be in accordance with substation equipment manufacturer's published data. In absence of substation equipment manufacturer's published data, comply with test equipment manufacturer's published data.
 - h. Verify that voltage-transformer secondary circuits are grounded and have only one grounding point in accordance with IEEE C57.13.3.
- H. Liquid-Filled Transformer Section Field Tests:
1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Inspect impact recorder prior to unloading.
 - c. Test dew point of tank gases if applicable.

- d. Inspect anchorage, alignment, and grounding.
- e. Verify presence of PCB content labeling.
- f. Verify removal of shipping bracing after placement.
- g. Verify that bushings are clean.
- h. Verify that alarm, control, and trip settings on temperature and level indicators are set and operate within manufacturer's recommended settings.
- i. Verify that cooling fans and pumps operate correctly and have appropriate overcurrent protection.
- j. Verify that liquid level in tanks and bushings is within manufacturer's published tolerances.
- k. Perform specific inspections and mechanical tests recommended by manufacturer.
- l. Verify presence of transformer surge arresters and that their ratings are as specified.
- m. Verify that as-left tap connections are as specified.
- n. Verify presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and winding-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index must not be less than 1.0.
- b. Perform power-factor or dissipation-factor tests on windings in accordance with test equipment manufacturer's published data. Maximum winding insulation power-factor/dissipation-factor values must be in accordance with substation equipment manufacturer's published data. In absence of substation equipment manufacturer's published data, comply with NETA ATS, Table 100.3.
- c. Measure core insulation resistance at 500 V(dc) if core is insulated and core ground strap is removable. Core insulation-resistance values must not be less than 1 MΩ at 500 V(dc).
- d. Perform power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV.
- e. Perform turns-ratio tests at tap positions. Turns-ratio test results must not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- f. Perform excitation-current test on each phase. Typical excitation-current test data pattern for three-legged core transformer is two similar current readings and one lower current reading. Investigate and correct if test shows different pattern.
- g. Measure resistance of winding at tap connection, and record temperature-corrected winding-resistance values in Operations and Maintenance Manual.
- h. Perform applied-voltage test on high- and low-voltage windings-to-ground. Comply with IEEE C57.12.91, Sections 10.2 and 10.9.
- i. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.
- j. Remove sample of insulating liquid in accordance with ASTM D923. Insulating liquid values must comply with NETA ATS, Table 100.4. Sample must be tested for the following:
 - 1) Dielectric Breakdown Voltage: ASTM D877 or ASTM D1816.
 - 2) Acid Neutralization Number: ASTM D974.
 - 3) Specific Gravity: ASTM D1298.
 - 4) Interfacial Tension: ASTM D971.
 - 5) Color: ASTM D1500.
 - 6) Visual Condition: ASTM D1524.
 - 7) Water in Insulating Liquids: ASTM D1533.
 - 8) Power Factor or Dissipation Factor: ASTM D924.
- k. Remove sample of insulating liquid in accordance with ASTM D923 and perform dissolved-gas analysis in accordance with IEEE C57.104 or ASTM D3612.

**I. Small Dry-Type Transformer Section Field Tests:****1. Visual and Mechanical Inspection:**

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify that resilient mounts are free and that shipping brackets have been removed.
- d. Verify that unit is clean.
- e. Perform specific inspections and mechanical tests recommended by manufacturer.
- f. Verify that as-left tap connections are as specified.
- g. Verify presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and winding-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index must not be less than 1.0.
- b. Perform turns-ratio tests at tap positions. Test results must not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- c. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

J. Large Dry-Type Transformer Section Field Tests:**1. Visual and Mechanical Inspection:**

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify that resilient mounts are free and that shipping brackets have been removed.
- d. Verify that unit is clean.
- e. Verify that alarm, control, and trip settings on temperature and level indicators are set and operate within manufacturer's recommended settings.
- f. Verify that cooling fans operate and that fan motors have correct overcurrent protection.
- g. Perform specific inspections and mechanical tests recommended by manufacturer.
- h. Verify that as-left tap connections are as specified.
- i. Verify presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and winding-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index must not be less than 1.0.
- b. Perform power-factor or dissipation-factor tests on windings in accordance with test equipment manufacturer's published data. Investigate and correct power-factor values that exceed:
 - 1) 2 percent for power transformers.
 - 2) 5 percent for distribution transformers.
- c. Measure core insulation resistance at 500 V(dc) if core is insulated and core ground strap is removable. Core insulation-resistance values must not be less than 1 M Ω at 500 V(dc).
- d. Perform power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV. Tip-

- up test result exceeding 1 percent must be investigated.
- e. Perform turns-ratio tests at tap positions. Test results must not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
 - f. Perform excitation-current test on each phase. Typical excitation-current test data pattern for three-legged core transformer is two similar current readings and one lower current reading. Investigate and correct if test shows different pattern.
 - g. Measure resistance of winding at tap connection.
 - h. Perform applied-voltage test on high- and low-voltage windings-to-ground. See IEEE C57.12.91, Sections 10.2 and 10.9. AC dielectric-withstand-voltage test result must not exceed 75 percent of factory test voltage for 1 min duration. DC dielectric-withstand-voltage test result must not exceed 100 percent of AC RMS test voltage specified in IEEE 57.12.91, Section 10.2, for 1 min duration. If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric-withstand-voltage test, test specimen is considered to have passed test.
 - i. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

K. Low-Voltage Motor Controller Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect anchorage, alignment, grounding, and clearances.
- b. Verify that unit is clean.
- c. Inspect contactors:
 - 1) Verify mechanical operation.
 - 2) Verify contact gap, wipe, alignment, and pressure are in accordance with manufacturer's published data.
- d. Motor-Running Protection:
 - 1) Verify that overload element rating is correct for its application.
 - 2) If motor-running protection is provided by fuses, verify correct fuse rating.
- e. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.

2. Electrical Tests:

- a. **[For contactor and circuit breaker, perform][Perform]**insulation-resistance tests for 1 min on each pole, phase-to-phase and phase-to ground with switch closed, and across each open pole. Insulation-resistance values must comply with manufacturer's published data or NETA ATS, Table 100.1. In absence of manufacturer's published data, comply with Table 100.5. Investigate and correct values of insulation resistance less than this table or manufacturer's published instructions.
- b. Test circuit breakers as follows:
 - 1) Operate circuit breaker to ensure smooth operation.
 - 2) Perform contact/pole-resistance test. Drop values for $\mu\Omega$ or mV(dc) must not exceed high levels of normal range as indicated in manufacturer's published data. If manufacturer's published data is not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
- c. Perform operational tests by initiating control devices. Control devices must perform in accordance with system design requirements.

Secondary Unit Substations with Motor Control Center

L. Low-Voltage Power Circuit-Breaker Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify that maintenance devices are available for servicing and operating breaker.
- d. Verify that unit is clean.
- e. Verify that arc chutes are intact.
- f. Inspect moving and stationary contacts for condition and alignment.
- g. Verify that primary and secondary contact wipe and other dimensions vital to satisfactory operation of breaker are correct.
- h. Perform mechanical operator and contact alignment tests on both breaker and its operating mechanism in accordance with manufacturer's published data.
- i. Verify cell fit and element alignment.
- j. Verify racking mechanism operation.
- k. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
- l. Perform adjustments for final protective-device settings in accordance with coordination study provided by end user.
- m. Record as-found and as-left operation counter readings.

2. Electrical Tests:

- a. Perform insulation-resistance tests for 1 min on each pole, phase-to-phase and phase-to-ground with switch closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Insulation-resistance values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Values of insulation resistance less than this table or manufacturer's published recommendations must be investigated.
- b. Measure contact resistance across power contact of circuit breaker. Drop values for $\mu\Omega$ or mV(dc) must not exceed high levels of normal range as indicated in manufacturer's published data. If manufacturer's published data is not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
- c. Determine long-time pickup and delay by primary current injection. Long-time pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current characteristic tolerance band, including adjustment factors. If manufacturer's curves are not available, trip times must not exceed value shown in NETA ATS, Table 100.7.
- d. Determine short-time pickup and delay by primary current injection. Short-time pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current tolerance band.
- e. Determine ground-fault pickup and delay by primary current injection. Ground-fault pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current tolerance band.
- f. Determine instantaneous pickup value by primary current injection. Instantaneous pickup values must be as specified and within manufacturer's published tolerances. In absence of manufacturer's published data, comply with NETA ATS, Table 100.8.
- g. Test functions of trip unit by means of secondary injection. Pickup values and trip characteristic must be as specified and within manufacturer's published tolerances.
- h. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of shunt trip and close coils must conform to manufacturer's published data. In absence of manufacturer's published data,

- comply with NETA ATS, Table 100.20.
- i. Measure fuse resistance. Investigate fuse-resistance values that deviate from others by more than 15 percent.
- j. Verify correct operation of auxiliary features, such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free operation, antipump function, and trip unit battery condition. Reset trip logs and indicators. Auxiliary features must operate in accordance with manufacturer's published data.
- k. Verify operation of charging mechanism. Charging mechanism must operate in accordance with manufacturer's published data.

M. Insulated-Case/Molded-Case Air-Circuit-Breaker Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage and alignment.
- c. Verify that unit is clean.
- d. Operate circuit breaker to ensure smooth operation.
- e. Inspect operating mechanism, contacts, and arc chutes in unsealed units.
- f. Perform adjustments for final protective-device settings in accordance with coordination study. Set protective devices in accordance with coordination study report.

2. Electrical Tests:

- a. Perform insulation-resistance tests for 1 min on each pole, phase-to-phase and phase-to-ground with circuit breaker closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Insulation-resistance values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Values of insulation resistance less than this table or manufacturer's published recommendations must be investigated.
- b. Perform contact/pole-resistance test. Drop values for $\mu\Omega$ or mV(dc) must not exceed high levels of normal range as indicated in manufacturer's published data. If manufacturer's published data is not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
- c. Determine long-time pickup and delay by primary current injection. Ground-fault pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current tolerance band, including adjustment factors.
- d. Determine short-time pickup and delay by primary current injection. Short-time pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current tolerance band.
- e. Determine ground-fault pickup and time delay by primary current injection. Ground-fault pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current tolerance band.
- f. Determine instantaneous pickup by primary current injection. Instantaneous pickup values must be as specified and within manufacturer's published tolerances. In absence of manufacturer's published data, comply with NETA ATS, Table 100.8.
- g. Test functions of trip unit by means of secondary injection. Pickup values and trip characteristic must be as specified and within manufacturer's published tolerances.
- h. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of shunt trip and close coils must conform to manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.20.
- i. Verify correct operation of auxiliary features, such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free operation, anti-pump function, and

trip unit battery condition. Reset trip logs and indicators. Auxiliary features must operate in accordance with manufacturer's published data.

- j. Verify operation of charging mechanism. Charging mechanism must operate in accordance with manufacturer's published data.

N. Low-Voltage Ground-Fault Protection System Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect components for damage and errors in polarity or conductor routing.
 - 1) Verify that ground connection is made on source side of neutral disconnect link and on source side of ground-fault sensor.
 - 2) Verify that neutral sensors are connected with correct polarity on both primary and secondary.
 - 3) Verify that phase conductors and neutral pass through sensor in same direction for zero sequence systems.
 - 4) Verify that grounding conductors do not pass through zero sequence sensors.
 - 5) Verify that grounded conductor is solidly grounded.
- b. Verify that unit is clean.
- c. Operate circuit breaker to ensure smooth operation.
- d. Verify correct operation of functions of self-test panel if provided.
- e. Verify that control power transformer has adequate capacity for system.
- f. Set pickup and time-delay settings. Record appropriate operation and test sequences in accordance with Section 230.95 "Ground-Fault Protection Equipment" of NFPA 70.

2. Electrical Tests:

- a. Measure system neutral-to-ground insulation resistance with neutral disconnect link temporarily removed. Replace neutral disconnect link after testing. System neutral-to-ground insulation resistance must be minimum of 1 MΩ. Correct wiring until minimum is achieved.
- b. Perform ground-fault protective-device pickup tests using primary injection. Results of pickup test must be greater than 90 percent of ground-fault protective-device pickup setting and less than 1200 A or 125 percent of pickup setting, whichever is smaller. Adjust or replace device until these parameters are achieved.
- c. For summation-type systems utilizing phase and neutral current transformers, verify correct polarities by applying current to phase-neutral current-transformer pair. This test also applies to MCCBs utilizing external neutral current transformer. Ground-fault protective device must operate when current direction is same relative to polarity marks in two current transformers. Ground-fault protective device must not operate when current direction is opposite relative to polarity marks in two current transformers.
- d. Measure time delay of ground-fault protective device at value equal to or greater than 150 percent of pickup value. Relay timing must be in accordance with manufacturer's published data but must be no longer than 1 s at 3000 A in accordance with Section 230.95 "Ground-Fault Protection Equipment" of NFPA 70.
- e. Verify that reduced control voltage tripping capability is 55 percent for AC systems and 80 percent for DC systems. Replace ground-fault system if reduced control voltage tripping requirement is not achieved, and retest.
- f. Verify blocking capability of zone interlock systems. Results of zone-blocking tests must be in accordance with manufacturer's published data and design specifications.

O. Metering Device Field Tests:

Secondary Unit Substations with Motor Control Center

Secondary

2026

1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Inspect cover gasket, cover glass, condition of spiral spring, disk clearance, contacts, and case shorting contacts, as applicable.
 - c. Verify that unit is clean.
 - d. Verify freedom of movement, end play, and alignment of rotating disk(s).
2. Electrical Tests:
 - a. Verify accuracy of meters at cardinal points. Meter accuracy must be in accordance with manufacturer's published data.
 - b. Calibrate meters in accordance with manufacturer's published data. Calibration results must be within manufacturer's published tolerances.
 - c. Verify instrument multipliers. Instrument multipliers must be in accordance with system design specifications.
 - d. Verify that current-transformer and voltage-transformer secondary circuits are intact. Test results must confirm integrity of secondary circuits of current and voltage transformers.

P. Nonconforming Work:

1. Equipment and devices will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

Q. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports. Record as-left set points of adjustable devices.

R. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.4 SYSTEM STARTUP

A. Perform startup service.

1. Complete installation and startup checks in accordance with manufacturer's published instructions.
2. **<Insert startup steps if any>.**

B. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.

1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.5 CLEANING

A. After completing equipment installation and before energizing, inspect unit components. Remove paint

splatters and other spots, dirt, and debris. Repair damaged finish to match original finish. Vacuum interiors of secondary unit substation sections.

3.6 CLOSEOUT ACTIVITIES

A. Training:

1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain secondary unit substation equipment.
2. **[Provide video recordings of training sessions to Owner][Allow Owner to record training sessions].**

3.7 PROTECTION

- #### A.
- After installation, protect secondary unit substation equipment from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

3.8 MAINTENANCE

- #### A.
- Voltage Monitoring and Adjusting: After Substantial Completion, if requested by Owner, but not more than six months after Final Acceptance, perform the following voltage monitoring:
1. During period of normal load cycles as evaluated by Owner, perform seven days of three-phase voltage recording at outgoing section of secondary unit substation. Use voltmeters with calibration traceable to National Institute of Science and Technology standards and with chart speed of not less than **1 inch/h (25 mm/h)**. Voltage unbalance greater than 1 percent between phases, or deviation of phase voltage from nominal value by more than plus or minus 5 percent during test period, is unacceptable.
 2. Corrective Action: If test results are unacceptable, perform the following corrective action, as appropriate:
 - a. Adjust transformer taps.
 - b. Rebalance loads.
 - c. Prepare written request for voltage adjustment by electric utility.
 3. Retests: Repeat monitoring, after corrective action has been performed, until satisfactory results are obtained.
 4. Field Reports for Voltage Monitoring and Adjusting:
 - a. Prepare written report covering monitoring performed and corrective action taken.
 - b. For relay and adjustable circuit breaker, tag device with adjusting technician's initials and date of adjustment. Record settings and file with test records specified in "Field Quality Control" Article.
- #### B.
- Infrared Scanning of Secondary Unit Substation Equipment: Perform survey during periods of maximum possible loading. Remove necessary covers prior to inspection. Take visible light photographs at same

locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison.

1. After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of electrical power connections of unit substation.
 2. Follow-On Infrared Scanning: Perform additional follow-up infrared scan of switchgear 11 months after date of Substantial Completion.
 3. Instrument: Inspect distribution systems with imaging equipment capable of detecting minimum temperature difference of 1 deg C at 30 deg C. Provide documentation of device calibration.
 4. Field Reports for Infrared Scanning: Prepare certified report that identifies testing technician and equipment used, and lists results as follows:
 - a. Description of equipment to be tested.
 - b. Discrepancies.
 - c. Temperature difference between area of concern and reference area.
 - d. Probable cause of temperature difference.
 - e. Areas inspected. Identify inaccessible and unobservable areas and equipment.
 - f. Identify load conditions at time of inspection.
 - g. Provide photographs and thermograms of deficient area.
 5. Act on inspection results in accordance with recommendations of NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.
- C. Maintenance Service Agreement: Beginning at Substantial Completion, verify that maintenance service agreement includes **[one year]<Insert duration>** period for full maintenance by **[skilled employees of substation equipment Installer][manufacturer's authorized service representative]**. Include annual preventive maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper substation equipment operation. Verify that parts and supplies are manufacturer's authorized replacement parts and supplies.

END OF SECTION 26 11 16 00A

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 11 16 11 - SECONDARY UNIT SUBSTATIONS WITH SWITCHGEAR SECONDARY

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Articulated secondary unit substations with switchgear secondary.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 260513 "Medium-Voltage Cables" for requirements for terminating cables in substation medium-voltage sections.
5. Section 260519 "Low-Voltage Electrical Power Conductors and Cables" for requirements for terminating cables in substation low-voltage sections.
6. Section 260523 "Control-Voltage Electrical Power Cables" for requirements for terminating cables in substation instrumentation sections.
7. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
8. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
9. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic[**and wind**] control devices referenced by this Section.
10. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
11. Section 260573 "Power System Studies" specifies coordination studies, arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.
12. Section 262300 "Low-Voltage Switchgear" specifies low-voltage distribution sections referenced by this Section.

1.2 DEFINITIONS

- A. NETA ATS: Acceptance testing specification.
- B. PCB: Polychlorinated biphenyl.
- C. RTD: Resistance temperature detector (IEEE C37.2 Device No. 26).
- D. SCR: Silicon-controlled rectifier.
- E. SPD: Surge protective device.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Include rated capacities, operating characteristics, and furnished specialties and accessories.
 - 2. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.
 - 3. Include manufacturer's sample extended warranty language.
- B. Factory test reports.
- C. Shop Drawings: Prepare and submit the following:
 - 1. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
 - 2. Wiring Diagrams: Power, signal, and control wiring.
 - 3. Dimensioned plans and elevations showing major components and features.
 - a. Include a plan view and cross section of equipment base, showing clearances, workspace that accounts for breaker service and removal, and locations of penetrations for grounding and conduits in accordance with manufacturer's published instructions.
 - 4. One-line diagram.
 - 5. List of materials.
 - 6. Nameplate legends.
 - 7. The material, size and number of bus bars, and current rating for each bus, including mains and branches of phase, neutral, and ground buses.
 - 8. Short-time and short-circuit current ratings of secondary unit substations and components.
 - 9. Ratings of individual protective devices.
 - 10. Mimic-bus diagram.
 - 11. Utility company's metering provisions with indication of approval by utility company.
- D. Time-Current Characteristic Curves: For overcurrent protective devices.
- E. Primary Fuses: Submit recommendations and size calculations.
- F. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.

B. Field Reports:

1. Manufacturer's field reports for field quality-control support.
2. Manufacturer's field reports for system startup support.
3. Field reports for voltage monitoring and adjusting.
4. Field reports for infrared scanning.
5. Field reports for software and firmware upgrades.

1.5 CLOSEOUT SUBMITTALS

- A. Warranty documentation.
- B. Maintenance service agreement.
- C. Software and firmware service agreement.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare parts.
- B. Special tools.
- C. Consumable items.

1.7 REGULATORY AGENCY APPROVALS

- A. Submittals for secondary unit substations requiring approval by authorities having jurisdiction must be signed by qualified electrical professional engineer responsible for their preparation. **[Obtain approval by authorities having jurisdiction prior to submitting for action by Architect.][Submit for action by Architect prior to submitting for approval by authorities having jurisdiction.]**

1.8 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, conduct tests of complex equipment, analyze test and equipment data, plan a job, and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.
- D. Electrical Professional Engineer: Professional engineer possessing active qualifications specified in Section 014000 "Quality Requirements," with expertise in electrical engineering, including electrical

power system modeling and analysis of electrical safety in accordance with NFPA 70E.

1.9 DELIVERY, STORAGE, AND HANDLING

- A. Deliver in shipping splits in sizes that can be moved past obstructions in delivery path.
- B. Coordinate delivery of secondary unit substations to allow movement into designated space.
- C. Store secondary unit substation components[**protected from weather and**] so condensation does not form on or in units. Provide temporary heating in accordance with manufacturer's published instructions.
- D. Handle secondary unit substation components in accordance with manufacturer's published instructions. Use factory-installed lifting provisions.

1.10 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Modeling, analysis, product selection, installation, and quality control for all electrical Work on the Project must comply with service condition requirements specified in Section 018116 "Facility Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria."
- B. Usual Service Conditions: Unless unusual service conditions have been specified in "General Environmental Conditions," "Outdoor Conditions," and "Indoor Conditions" articles of Section 018116 "Facility Environmental Requirements," electrical service and distribution equipment must be suitable for operation under usual service conditions specified in applicable IEEE C37 series and IEEE C57 series standards.

1.11 WARRANTY FOR SECONDARY UNIT SUBSTATIONS

- A. Special Installer Extended Warranty: Installer warrants that assembled and installed secondary unit substation performs in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Extended-Warranty Period: [**Two**][**Three**][**Four**]**<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that secondary unit substation performs in accordance with specified requirements and agrees to provide repair or replacement of components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Initial Extended-Warranty Period: [**Three**][**Four**][**Five**]**<Insert number>** years from date of Substantial Completion; [**full**][**prorated**] coverage for labor, materials, and equipment.
 - 2. Follow-On Extended-Warranty Period: [**Eight**]**<Insert number>** years from date of Substantial Completion; [**full**][**prorated**] coverage for materials only, free on board [**origin**][**destination**], freight prepaid.

1.12 WARRANTY FOR BATTERIES

- A. Special DC Control System Manufacturer Extended Warranty: Manufacturer warrants that components

of DC control system perform in accordance with specified requirements and agrees to provide repair or replacement of batteries that fail to perform as specified within extended warranty period.

1. DC Control System Equipment (Excluding Batteries) Extended Warranty Period: **[Two]<Insert number>** year(s) from date of Substantial Completion, for labor, materials, and equipment.
2. Standard VRLA Batteries:
 - a. Initial Extended Warranty Period: **[Two]<Insert number>** year(s) from date of Substantial Completion, full coverage for materials only.
 - b. Follow-on Extended Warranty Period: **[Nine]<Insert number>** year(s) from date of Substantial Completion, pro-rated coverage for materials only.
3. Premium VRLA Batteries:
 - a. Initial Extended Warranty Period: **[Two]<Insert number>** year(s) from date of Substantial Completion, full coverage for materials only.
 - b. Follow-on Extended Warranty Period: **[19]<Insert number>** year(s) from date of Substantial Completion, pro-rated coverage for materials only.
4. Vented Ni-Cd Batteries:
 - a. Initial Extended Warranty Period: **[Five]<Insert number>** year(s) from date of Substantial Completion, full coverage for materials only.
 - b. Follow-on Extended Warranty Period: **[15]<Insert number>** year(s) from date of Substantial Completion, pro-rated coverage for materials only.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 1. Unit Substations over 600 V: UL CCN YEFV, including IEEE C37.121 and the following:
 - a. Metal-Clad Switchgear: IEEE C37.20.2 and NEMA C 37.55.
 - b. Metal-Enclosed Switchgear: IEEE C37.20.3 and NEMA C 37.57.
 - c. Liquid-Filled Transformer: IEEE C57.12.00.
 - d. Dry-Type Transformer: UL 1562.
- C. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
 1. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational after seismic events**].
 2. Component Importance Factor (Ip): **[1.0][1.5]**.
 3. Component Amplification Factor (ap):

- a. Batteries: [1.0]<Insert value>.
 - b. Transformers: [1.0]<Insert value>.
 - c. Sheet Metal Enclosed Electrical Equipment: [2.5]<Insert value>.
 - d. Cabling and Bus Ducts: [2.5]<Insert value>.
4. Component Response Modification Factor (R_p):
- a. Batteries: [2.5]<Insert value>.
 - b. Transformers: [2.5]<Insert value>.
 - c. Sheet Metal Enclosed Electrical Equipment: [6.0]<Insert value>.
 - d. Cabling and Bus Ducts: [6.0]<Insert value>.
5. Component Overstrength Factor (Ω_o): [1.5][2.5]<Insert value>.
- a. Batteries: [2.5]<Insert value>.
 - b. Transformers: [2.5]<Insert value>.
 - c. Sheet Metal Enclosed Electrical Equipment: [2.5]<Insert value>.
 - d. Cabling and Bus Ducts: [1.5]<Insert value>.

2.2 ARTICULATED SECONDARY UNIT SUBSTATIONS WITH SWITCHGEAR SECONDARY

- A. Description: **[Medium-voltage, primary incoming section; transformer section; and low-voltage secondary switchgear section; and including coordinated circuit breakers, fusible switches, and metering components]**<Insert brief description of desired system, assembly, or equipment>.
- B. Indoor Unit Arrangement: **[Single assembly][Separate secondary distribution equipment connected with busway]**.
- C. Outdoor Unit Arrangement: **[Single assembly][Separate secondary distribution equipment connected with busway]**.
 - 1. Weatherproof, listed for installation outdoors, complying with IEEE C37.20.1.
 - 2. Aisle-less Construction: Full-height doors in front of basic weatherproof equipment.
- D. Selection of Components for Secondary Unit Substation:
 - 1. Source Limitations: Obtain components for secondary unit substation from sources approved by **[manufacturer][fabricator]** warranting performance of entire **[system][assembly]**.
 - 2. Provide the following specified products with the secondary unit substation:
 - a. Secondary Unit Substation No. 1 :
 - 1) Medium-voltage terminal compartment section .
 - 2) Medium-voltage metal-clad switchgear section .
 - 3) Medium-voltage metal-enclosed switchgear section .
 - 4) Medium-voltage instruments section .
 - 5) Liquid-filled medium-voltage transformer section .
 - 6) Dry-type medium-voltage transformer section .
 - 7) Secondary distribution terminal compartment section .
 - 8) Secondary distribution network protectors section .
 - 9) Secondary distribution low-voltage instrument section .
 - 10) Secondary distribution switchgear section .
 - 11) Secondary Distribution Low-Voltage Distribution Section : As specified in Section 262300 "Low-Voltage Switchgear."

**E. General Criteria:**

1. Connections between primary device and transformer must be **[cable][bus]**, and between transformer and secondary must be flexible bus braid unless noted otherwise.
2. Indoor Enclosure: Steel.
3. Outdoor Enclosure: **[Weatherproof, aisle-less construction][Weatherproof, sheltered-aisle construction, with interior-lighted walk-in aisle]** for outdoor service. Galvanized-steel, weatherproof construction; integral structural-steel base frame with factory-applied asphaltic undercoating.
 - a. Enclosure: **[Flat][Downward, rearward sloping]** roof; **[bolt-on rear covers][rear hinged doors]** for each section, with provisions for padlocking.
 - b. Each compartment must have the following features:
 - 1) Structural design and anchorage adequate to resist loads imposed by **[125 mph (200 km/h)]<Insert wind speed>** wind.
 - 2) Space heater operating at one-half or less of rated voltage, sized to prevent condensation, controlled by **[thermostats to maintain temperature of each section above expected dew point][manual switching of branch-circuit protective device]**.
 - 3) Louvers equipped with insect and rodent screens and filters, and arranged to permit air circulation while excluding rodents and exterior dust.
 - 4) LED lighting fixtures, ceiling mounted; wired to a three-way light switch at each end of aisle
 - 5) Weatherproof ground-fault circuit interrupter (GFCI) duplex receptacle.
 - 6) Power for heaters, lights, and receptacles must be provided **[by control power transformer][as indicated]**.
 - c. Weatherproof internal-aisle construction must have the following features:
 - 1) Common internal aisle of sufficient width to permit protective device withdrawal, disassembly, and servicing in aisle.
 - 2) Doors: Personnel door at each end of aisle, minimum width of **[30 inch (762 mm)]<Insert dimension>**; opening outwards; with panic hardware and provisions for **[padlocking][cylinder lock]**.
 - 3) Aisle space heaters operating at one-half or less of rated voltage and thermostatically controlled.
 - 4) Vapor-proof fluorescent aisle lights with low-temperature ballasts and controlled by wall switch at each entrance.
 - 5) Emergency battery pack lighting fixture installed on wall of aisle midway between personnel doors
 - 6) GFCI duplex receptacles, a minimum of two, located in aisle.
 - 7) Factory-installed electric unit heater(s), wall or ceiling mounted, with integral thermostat and disconnect and with capacities to maintain switchboard interior temperature of **[plus 10 deg F (minus 12 deg C)]<Insert temperature>** with outside design temperature of **[minus 20 deg F (minus 29 deg C)]<Insert temperature>**.
 - 8) Factory-installed exhaust fan with capacities to maintain switchboard interior temperature of **[85 deg F (29 deg C)]<Insert temperature>** with outside design temperature of **[104 deg F (40 deg C)]<Insert temperature>**.
 - 9) Ventilating openings **[complete with replaceable fiberglass air filters]**.
 - 10) Thermostat: Single stage; wired to control heat and exhaust fan.
4. Skid Mounted: Mount each shipping group on an integral base frame as a complete weatherproof unit.
5. Unit Substation Enclosures Finish:

- a. Factory-applied finish in manufacturer's standard color, including under surfaces treated with corrosion-resistant undercoating.
- b. Factory-applied finish in manufacturer's standard gray over a rust-inhibiting primer on treated metal surface.
- c. Factory-applied corrosion-resistant finish in manufacturer's standard color that withstands **[120][480]** hours of exposure to salt spray test specified in ASTM B117 without loss of paint or release of adhesion of paint primer coat to metal surface in excess of **1/16 inch (1.6 mm)** from test mark. The scribed test mark and test evaluation must be conducted in accordance with ASTM D1654, with a rating of not less than 7 arrived at in accordance with Table 1 (procedure A). Cut edges or otherwise damaged surfaces of hot-dip galvanized sheet steel or mill-galvanized sheet steel must be coated with a manufacturer's standard zinc-rich paint.

F. Source Quality Control:

1. Factory Tests:

- a. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
- b. Testing Administrant: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate secondary unit substation components.
- c. Factory Tests and Inspections: Perform the following tests and inspections on secondary unit substation components, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.
 - 1) Perform design and routine tests in accordance with standards specified for components. Conduct transformer tests in accordance with IEEE C57.12.90. Conduct switchgear and switchboard tests in accordance with NEMA C 37.51.
 - 2) Perform the following factory-certified tests on each secondary unit substation:
 - a) Resistance measurements of all windings on rated voltage connection and on tap extreme connections.
 - b) Ratios on rated voltage connection and on tap extreme connections.
 - c) Polarity and phase relation on rated voltage connection.
 - d) No-load loss at rated voltage on rated voltage connection.
 - e) Exciting current at rated voltage on rated voltage connection.
 - f) Impedance and load loss at rated current on rated voltage connection and on tap extreme connections.
 - g) Applied potential.
 - h) Induced potential.
 - i) Temperature Test: If a transformer is supplied with auxiliary cooling equipment to provide more than one rating, test at lowest kVA Class ONAN or Class AA rating and highest kVA Class ONAF or Class AFA rating. Temperature test is not required if a record of a temperature test on an essentially duplicate unit is available.
- d. Nonconforming Work:
 - 1) Equipment that does not pass tests and inspections will be considered defective.
- e. Factory Test Reports: Compile and submit factory test and inspection reports.

G. Medium-Voltage Terminal Compartment Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:
 - a. Primary Incoming Section: Terminal assembly with adequate space for incoming-cable terminations and surge arresters, complying with NEMA SG 4 and meeting thermal, mechanical, and dielectric requirements specified for transformer section.
 - b. Ratings: Suitable for application in three-phase, 60 Hz, solidly grounded-neutral system.
 - c. System Voltage: **[4.16 kV nominal; 4.76 kV maximum][7.2 kV nominal; 15 kV maximum][13.8 kV nominal; 15 kV maximum][34.5 kV nominal; 38 kV maximum]<Insert other voltage>**.
 - d. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, connected in each phase of incoming circuit and ahead of any disconnecting device.

H. Medium-Voltage Metal-Clad Switchgear Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**

- d. [Siemens Industry, Inc., Energy Management Division]
- e. [Square D; Schneider Electric USA]
- f. <Insert manufacturer's name>

3. Standard Features:

- a. Metal-clad, circuit-breaker switchgear, complying with IEEE C37.20.2 and NEMA SG 4 and tested for compliance in accordance with NEMA C 37.55.
 - 1) Arc Resistant: Comply with IEEE C37.20.7, [Type 1][Type 2][Type 1C][Type 2C].
- b. Ratings must comply with IEEE C37.04, suitable for application in three-phase, 60 Hz, solidly grounded-neutral system.
 - 1) System Voltage: [4.16 kV nominal; 4.76 kV maximum][7.2 kV nominal; 15 kV maximum][13.8 kV nominal; 15 kV maximum][34.5 kV nominal; 38 kV maximum]<Insert other voltage>.
 - 2) Nominal Interrupting-Capacity Class: [250][350][500][750][1000] MVA.
 - 3) Main-Bus Rating: [1200][2000][3000] A, continuous.
- c. Circuit Breakers: Electrically operated, drawout mounting; using three individual vacuum-sealed interrupter modules, and including the following features:
 - 1) Designed to operate at rated voltage to interrupt fault current within its rating within [three][five] cycles of trip initiation. For systems with X/R ratio of 17 or less, transient voltage during interruption must not exceed twice rated line-to-ground voltage of system.
 - 2) Contact-Wear Indicator: Readily accessible to field maintenance personnel.
 - 3) Minimum of six Type A and six Type B spare contacts.
 - 4) Interchangeability: Interchangeable with vacuum circuit breakers of same current and interrupting ratings.
 - 5) Operating Mechanism: Electrically charged, mechanically and electrically trip-free, stored-energy operation.
- d. Control Power:
 - 1) [48][125]<Insert voltage> V(dc) for closing and tripping.
 - 2) [120][240]<Insert voltage> V(ac) for closing and tripping.
- e. Low-DC-Voltage Alarm: Monitor DC control power voltage with a remote alarm. Alarm must sound if voltage falls to an adjustable value to indicate an impending battery failure. Factory set alarm value at 80 percent of full-charge voltage.
- f. Remote-Tripping Device: Wall-mounting emergency control station to open circuit breakers; located in red cast-metal box with break-glass operation.
- g. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, connected in each phase of incoming circuit and ahead of any disconnecting device.

I. Medium-Voltage Metal-Enclosed Switchgear Section :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [ABB, Electrification Business]

- b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:
- a. Metal-enclosed, air-interrupter switchgear, **[with][without]** fuses, complying with IEEE C37.20.3.
 - 1) Switchgear must be arc resistant, complying with IEEE C37.20.7, **[Type 1][Type 2][Type 1C][Type 2C]**.
 - b. Ratings: Comply with IEEE C37.04; and suitable for application in three-phase, 60 Hz, solidly grounded-neutral system.
 - 1) System Voltage: **[4.16 kV nominal; 4.76 kV maximum][7.2 kV nominal; 15 kV maximum][13.8 kV nominal; 15 kV maximum][34.5 kV nominal; 38 kV maximum]<Insert other voltage>**.
 - 2) Design Level of Available-Source Fault Current: Integrated short-circuit rating consistent with value of fault current indicated.
 - 3) Main-Bus Rating: **[600][1200][2000]** A, continuous.
 - c. Interrupter Switches: Stationary, gang operated, and suitable for application at maximum short-circuit rating of integrated switchgear assembly.
 - 1) Rating: **[600][1200]** A continuous duty and load break.
 - 2) Two-Time Duty-Cycle Fault Closing: **[25 000][40 000]** A, asymmetrical.
 - 3) Switch Action: No external arc and no significant quantities of ionized gas released into enclosure.
 - 4) Switch Construction: Supported entirely by interior framework of structure, with copper switchblades and stored-energy operating mechanism.
 - 5) Phase Barriers: Full length of switchblades and fuses for each pole; designed for easy removal; allow visual inspection of switch components if barrier is in place.
 - 6) Protective Shields: Cover live components and terminals.
 - 7) Fuse Mounts: Single-frame mounted and de-energized when switch is open.
 - 8) Mechanical Interlock: Prevent opening of switch compartment door unless switchblades are open, and prevent closing switch if door is open. **[Interlock air-interrupter switch with transformer secondary main circuit breaker, preventing switch from being opened or closed unless secondary main circuit breaker is open.]**
 - 9) Window: Permits viewing switchblade positions when door is closed.
4. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, with

ratings as indicated, connected in each phase of incoming circuit and ahead of any disconnecting device.

J. Medium-Voltage Instruments Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:
 - a. Instrument Transformers: Comply with IEEE C57.13.
 - 1) Potential Transformers: Secondary voltage rating of 120 V and NEMA C 12.11 Accuracy Class of 0.3 with burdens of W, X, and Y.
 - 2) Current Transformers: Burden and Accuracy Class suitable for connected relays, meters, and instruments.
 - b. Multifunction Digital-Metering Monitor: Microprocessor-based unit suitable for three- or four-wire systems.
 - 1) Inputs from sensors or 5 A current-transformer secondaries, and potential terminals rated to 600 V.
 - 2) Switch-selectable digital display with the following features:
 - a) Phase Currents, Each Phase: Plus or minus 1 percent.
 - b) Phase-to-Phase Voltages, Three Phase: Plus or minus 1 percent.
 - c) Phase-to-Neutral Voltages, Three Phase: Plus or minus 1 percent.
 - d) Three-Phase Real Power: Plus or minus 2 percent.
 - e) Three-Phase Reactive Power: Plus or minus 2 percent.
 - f) Power Factor: Plus or minus 2 percent.
 - g) Frequency: Plus or minus 0.5 percent.
 - h) Integrated Demand, with Demand Interval Selectable from 5 to 60 Minutes: Plus or minus 2 percent.
 - i) Accumulated energy, in **MWh (MJ)**, plus or minus 2 percent; stored values unaffected by power outages for up to 72 hours.

- 3) Communications module suitable for remote monitoring of meter quantities and functions. Interface communication and metering requirements in accordance with Section 260913 "Electrical Power Monitoring."
 - 4) Mounting: Display and control unit that is flush or semiflush mounted in instrument compartment door.
- c. Analog Instruments: Rectangular, **4-1/2 inch (115 mm)** square, 1 percent accuracy, semiflush mounting, with antiparallax 250-degree scale and external zero adjustment.
- 1) Voltmeters: Cover an expanded scale range of normal voltage plus 10 percent.
 - 2) Voltmeter Selector Switch: Rotary type with off position to provide readings of phase-to-phase[**and phase-to-neutral**] voltages.
 - 3) Ammeters: Cover an expanded scale range of bus rating plus 10 percent.
 - 4) Ammeter Selector Switch: Permits current reading in each phase and keeps current-transformer secondary circuits closed in off position.
 - 5) Locate meter and selector switch on circuit-breaker compartment door for indicated feeder circuits only.
 - 6) Watt-Hour Meters: Flush- or semiflush-mounting type, 5 A, 120 V, three phase, three wire; with three elements, [**15-minute**]<Insert value> indicating demand register, and provision for testing and adding pulse initiation.
 - 7) Recording Demand Meter: Usable as totalizing relay or indicating and recording maximum demand meter with [**15-minute**]<Insert value> interval.
 - a) Operation: Counts and records a succession of pulses entering two channels.
 - b) Housing: Drawout, back-connected case arranged for semiflush mounting.
- d. Overcurrent and Ground-Fault Protective Relays: Multifunctional, solid-state microprocessor-based, medium-voltage relay, for operation from specified control power. Comply with IEEE C37.90.
- 1) Field-Selectable Relay Settings: Required by overcurrent protective device coordination study and arc-flash study.
 - 2) Primary Current-Transformer Ratings: Programmable from 5 to 5000 A.
 - 3) Phase and Ground Protection: Field-selectable curves from IEEE moderately inverse, very inverse, or extremely inverse.
 - 4) Phase Instantaneous Overcurrent Trip Pickup Point: Field selectable as "none" or from 1.0 to 25 times current-transformer primary rating. Include discriminator circuit with "on" and "off" switch, so that when phase instantaneous overcurrent has been programmed to "none," discriminator circuit protects against currents exceeding 11 times current-transformer primary rating when breaker is being closed and must be deactivated after approximately eight cycles.
 - 5) Contacts: Two Form A contacts, field selectable into contact pairs as follows and as required by overcurrent protective device coordination study and arc-flash study:
 - a) One contact assigned IEEE Device No. 51 phase and IEEE Device No. 51 ground, and other contact assigned IEEE Device No. 50 phase and IEEE Device No. 50 ground.
 - b) One contact assigned IEEE Device No. 51/50 phase, and other contact assigned 51/50 ground.
 - 6) Alphameric display to show the following parameters with metering accuracy not to exceed 2 percent of full scale:
 - a) Individual phase currents.
 - b) Ground current.
 - c) Cause of trip.

- d) Magnitude and phase of current causing trip.
 - e) Phase or ground indication.
 - f) Peak current demand for each phase and ground since last reset.
 - g) Current-transformer primary rating.
 - h) Programmed phase and ground set points.
- 7) Communications module to transmit the following data in accordance with Section 260913 "Electrical Power Monitoring."
- a) Relay's metered and target data, such as currents, set points, cause of trip, magnitude of trip current, and open-close trip status.
 - b) Ability to close and open associated breaker with proper access code from remote location over communication network when relay is configured in remote open-close mode.
- 8) Relay alarm and trip contacts must not change state if power is lost or an undervoltage occurs. These contacts must only cause a trip on detection of an overcurrent or fault condition based on programmed settings. Provide a "protection off" alarm, which must be normally energized when relay is powered and self-diagnostics indicates unit is functional. On loss of power or relay failure, this alarm relay must be de-energized providing a fail-safe protection off alarm.
- 9) The relay must operate reliably solely from breaker main current transformers during a fault condition, if normally connected auxiliary AC voltage is not available, even after an extended power outage.
- 10) Mount relay in a drawout case with a two-stage quick-release operation. The removal of relay from case must disconnect trip circuits and short current-transformer secondaries before unit control power is disconnected. When relay is inserted into case, control power connections must be made before trip circuits are activated. Include a self-shorting contact on case terminal block to provide alarm indication and tripping of circuit breaker upon removal of relay from case.
- e. <Insert other relay types>.
- f. Control Power Supply Transformer:
- 1) Control power transformer supplies 120 V control circuits through secondary disconnect devices.
 - a) Dry-type transformers, in separate compartments for units larger than 3 kVA, including primary and secondary fuses.
 - b) Two control power transformers in separate compartments with necessary interlocking relays; each transformer connected to line side of associated main circuit breaker.
 - c) Secondary windings connected through relay(s) to control bus to affect an automatic transfer scheme.
 - d) Secondary windings connected through an internal automatic transfer switch to switchgear control power bus.
 - e) Control Power Fuses: Primary and secondary fuses provide current-limiting and overload protection.
- g. Control Power Supply DC Battery System:
- 1) System Requirements: Battery must have number of cells and ampere-hour capacity based on an initial specific gravity of 1.210 at **77 deg F (25 deg C)** with electrolyte at normal level and minimum ambient temperature of **55 deg F (13 deg C)**. Cycle battery before shipment to guarantee rated capacity on installation. Arrange battery

to operate ungrounded. Battery system capacity must be in accordance with switchgear manufacturer's published instructions to operate circuit breakers for intended duty.

- 2) Battery: **[Standard VRLA][Premium VRLA][Vented Ni-Cd]** batteries, with battery disconnect and overcurrent protective device.
- 3) Rack: Two-step rack with electrical connections between battery cells and between rows of cells; include two flexible connectors with bolted-type terminals for output leads. **[Rate battery rack, cell supports, and anchorage for seismic requirements.]**
 - a) Thermometers with specific-gravity correction scales.
 - b) Hydrometer syringes.
 - c) Set of cell numerals.
- 4) Charger: Static-type silicon rectifier equipped with automatic regulation and provision for manual and automatic adjustment of charging rate. Unit must automatically maintain output voltage within 0.5 percent from no load to rated charger output current, with AC input-voltage variation of plus or minus 10 percent and input-frequency variation of plus or minus 3 Hz.
 - a) DC ammeter.
 - b) DC Voltmeter: Maximum error of 5 percent at full-charge voltage, with toggle switch to select between battery and charger voltages.
 - c) Ground Indication: Two appropriately labeled lights to indicate circuit ground, connected in series between negative and positive terminals, with midpoint junction connected to ground by N.O. push-button contact.
 - d) Capacity: Sufficient to supply steady load, float-charge battery between 2.20 and 2.25 V per cell and equalizing charge at 2.33 V per cell.
 - e) Charging-Rate Switch: Manually operated switch to transfer to higher charging rate. Charger operation must be automatic until manually reset.
 - f) AC Power Supply: 120 V, 60 Hz, subject to plus or minus 10 percent variation in voltage and plus or minus 3 Hz variation in frequency. Automatic charger operation must resume after loss of AC power supply for any interval.
 - g) Charging Regulator: Protect charger from damage due to overload, including short circuit on output terminals. The device must regulate charging current, but must not disconnect charger from either battery or AC supply.
 - h) Charger's Audible Noise: Less than 26 dB(A-weighted).
- 5) Control Wiring: Factory installed, complete with bundling, lacing, and protection.
 - a) Conductors across Hinges and for Interconnections between Shipping Units: Flexible conductors for 8 AWG and smaller.
 - b) Conductors: Sized in accordance with NFPA 70 for duty required.

K. Liquid-Filled Medium-Voltage Transformer Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**

- f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Eaton]
 - c. [Hitachi Energy USA Inc.; business of Hitachi, Ltd.]
 - d. [Siemens Industry, Inc., Energy Management Division]
 - e. [Square D; Schneider Electric USA]
 - f. <Insert manufacturer's name>
 3. Standard Features:
 - a. IEEE C57.12.00 [and UL 1062,] liquid-filled, two-winding, secondary unit substation transformer.
 - b. Primary Incoming Section: Transformer cover-mounted bushings. The bushings must meet thermal, mechanical, and dielectric requirements as specified for transformer section.
 - c. Insulating Liquid:
 - 1) Mineral oil complying with ASTM D3487, Type II, and tested in accordance with ASTM D117.
 - 2) Less flammable, edible-seed-oil based, and listed and labeled for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic.
 - 3) Less flammable, dielectric, and listed and labeled for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic.
 - 4) Less flammable, silicone-based dielectric, and listed and labeled for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must have low toxicity and be nonhazardous.
 - d. Insulation Temperature Rise:
 - 1) 55 deg C, based on an average ambient temperature of **86 deg F (30 deg C)** over 24 hours with a maximum ambient temperature of **104 deg F (40 deg C)**. Insulation system must be rated to continuously allow an additional 12 percent kVA output, at 65 deg C temperature rise, without decreasing rated transformer life.
 - 2) 65 deg C, based on an average ambient temperature of **86 deg F (30 deg C)** over 24 hours with a maximum ambient temperature of **104 deg F (40 deg C)**.
 - e. BIL: [60][75][95][110][150][200] kV.
 - f. Full-Capacity Voltage Taps:
 - 1) Four nominal 2.5 percent taps, two above and two below rated primary voltage; with externally operable tap changer for de-energized use and with position indicator and padlock hasp.
 - 2) Four nominal 2.5 percent taps below rated primary voltage, with externally operable tap changer for de-energized use and with position indicator and padlock hasp.
 - g. Cooling System: [Class ONAN, liquid cooled][Class ONAN/ONAF, liquid cooled, and with forced-air rating][Class ONAN/OFAF, liquid cooled, and with provisions for future forced-air rating]. Cooling systems must include auxiliary cooling equipment, automatic controls, and status indicating lights.

h. Impedance: **<Insert number>** percent.

L. Dry-Type Medium-Voltage Transformer Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:
 - a. IEEE C57.12.01 and IEEE C57.12.51, dry-type, two-winding, secondary unit substation transformer.
 - b. Primary Incoming Section: Transformer cover-mounted bushings. The bushings must meet thermal, mechanical, and dielectric requirements as specified for transformer section.
 - c. Style:
 - 1) **[Indoor, ventilated][Outdoor, ventilated][Totally enclosed, nonventilated]**, cast coil/encapsulated coil, with primary and secondary windings individually cast in epoxy; with insulation system rated at 185 deg C with an 80 deg C average winding temperature rise above a maximum ambient temperature of **104 deg F (40 deg C)**.
 - 2) **[Indoor, ventilated][Outdoor, ventilated][Totally enclosed, nonventilated]**, vacuum-pressure, impregnated type, and with insulation system rated at 220 deg C with an 80 deg C average winding temperature rise above a maximum ambient temperature of **104 deg F (40 deg C)**.
 - d. Cooling System:
 - 1) Class AA, air cooled, complying with IEEE C57.12.01.
 - 2) Class AFA, air cooled with forced-air rating, complying with IEEE C57.12.01.
 - a) Manual forced-air cooling system controls, including manual switch for fans, fan controller and associated power and control wiring, and power panel with current-limiting fuses.
 - b) Include mounting provision for fans.
 - 3) Class AA/AFA, air cooled with provisions for future forced-air rating, complying with IEEE C57.12.01.

- a) Automatic forced-air cooling system controls, including thermal sensors, fans, control wiring, temperature controller with test switch, power panel with current-limiting fuses, indicating lights, alarm, and alarm-silencing relay.
 - b) Include mounting provision for fans.
- 4) Class AFA, forced-air cooling, complying with IEEE C57.12.01.
 - a) Automatic forced-air cooling system controls, including thermal sensors, fans, control wiring, temperature controller with test switch, power panel with current-limiting fuses, indicating lights, alarm, and alarm-silencing relay.
 - b) Include cooling fans.
- e. Insulation Materials: IEEE C57.12.01, rated **[220]<Insert number> deg C**.
 - 1) Insulation Temperature Rise: **[80][115][150] deg C** maximum rise above **104 deg F (40 deg C)**.
- f. BIL: **[60][75][95][110][150][200] kV**.
- g. Full-Capacity Voltage Taps:
 - 1) Four nominal 2.5 percent taps, two above and two below rated primary voltage.
 - 2) Four nominal 2.5 percent taps below rated primary voltage.
- h. Impedance: **<Insert number> percent**.
- i. High-Temperature Alarm: Sensor at transformer with local audible and visual alarm and contacts for remote alarm.

M. Secondary Distribution Terminal Compartment Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:
 - a. Low-Voltage Terminal Compartment: Bus **[bars mounted on standoff insulators][duct**

flange for close coupling with busway].

N. Secondary Distribution Switchgear Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:
 - a. The secondary distribution section must be drawout, **[fused][fused where indicated]**, low-voltage switchgear, complying with IEEE C37.20.1 and UL 1558.
 - 1) Section barriers between main and tie circuit-breaker compartments must be extended to rear of section.
 - b. Switchgear Structure:
 - 1) Match and align front and back of switchgear.
 - 2) Isolate line bus from load bus at each main and tie circuit breaker with bus isolation barriers.
 - 3) Allow the following circuit-breaker functions to be performed when compartment door is closed:
 - a) Operate manual charging system.
 - b) Open and close circuit breaker.
 - c) Examine and adjust trip unit.
 - d) Read breaker nameplate.
 - 4) Locate instrumentation transformers within breaker cell, and make front accessible and removable.
 - c. Switchgear Bus:
 - 1) Use bus bars to connect compartments and vertical sections. Cable connections are not permitted.
 - 2) Main Phase Bus: Uniform capacity the entire length of section.

- 3) Neutral Bus: **[50][100]** percent of phase-bus ampacity, except as indicated. Equip bus with pressure-connector terminations for outgoing circuit neutral conductors. Include braces for neutral-bus extensions for busway feeders.
 - 4) Vertical Section Bus Size: Comply with IEEE C37.20.1, including allowance for spare circuit breakers and spaces for future circuit breakers.
 - 5) Phase- and Neutral-Bus Material:
 - a) Hard-drawn copper of 98 percent minimum conductivity, with copper feeder circuit-breaker line connections.
 - b) Silver- or tin-plated, high-strength, electrical-grade aluminum alloy, with copper or tin-plated aluminum circuit-breaker line connections.
 - c) Hard-drawn copper of 98 percent minimum conductivity or tin-plated, high-strength, electrical-grade aluminum alloy.
 - 6) Use silver-plated copper or tin-plated aluminum for connecting circuit-breaker line to aluminum bus.
 - 7) Use copper for connecting circuit-breaker line to copper bus.
 - 8) Contact Surfaces of Buses: Silver plated.
 - 9) Feeder Circuit-Breaker Load Terminals: Silver-plated copper bus extensions equipped with pressure connectors for outgoing circuit conductors.
 - 10) Ground Bus: Hard-drawn copper of 98 percent minimum conductivity, with pressure connector for feeder and branch-circuit ground conductors, minimum size **1/4 by 2 inch (6 by 50 mm)**.
 - 11) Neutral bus equipped with pressure-connector terminations for outgoing circuit neutral conductors. Neutral-bus extensions for busway feeders are braced.
 - 12) Neutral Disconnect Link: Bolted, uninsulated, **1/4 by 2 inch (6 by 50 mm)** copper bus, arranged to connect neutral bus to ground bus.
 - 13) Provide for future extensions from either end of main phase, neutral, and ground bus by means of predrilled bolt-holes and connecting links.
 - 14) Bus-Bar Insulation: Individual bus bars wrapped with factory-applied, flame-retardant tape or spray-applied, flame-retardant insulation.
 - 15) Sprayed Insulation Thickness: **3 mils (0.08 mm)**, minimum.
 - 16) Bolted Bus Joints: Insulate with secure joint covers that can easily be removed and reinstalled.
- d. Circuit-Breaker Compartment:
- 1) Drawout Features: Circuit-breaker mounting assembly equipped with a racking mechanism to position circuit breaker and hold it rigidly in "connected," "test," and "disconnected" positions. Include the following features:
 - a) Interlocks: Prevent movement of circuit breaker to or from "connected" position when it is closed, and prevent closure of circuit breaker unless it is in "connected," "test," or "disconnected" position.
 - b) Primary Disconnect: Mount on stationary part of compartment. The disconnect must consist of a set of contacts extending to rear through an insulating support barrier, and of corresponding moving finger contacts on power circuit-breaker studs, which engage in only "connected" position. The assembly must provide multiple silver-to-silver full floating, spring-loaded, high-pressure-point contacts with uniform pressure on each finger. Load studs must connect to bus extensions that terminate in solderless terminals in rear cable compartment.
 - c) Secondary Disconnect: Floating terminals mounted on stationary part of compartment that engage mating contacts at front of breaker. Disconnecting devices must be gold plated, and engagement must be maintained in

"connected" and "test" positions.

- e. Circuit-Breaker Positioning: Permit racking of an open circuit breaker to or from "connected," "test," and "disconnected" positions only when compartment door is closed unless live parts are covered by a full dead-front shield. Permit manual withdrawal of an open circuit breaker to a position for removal from structure. When compartment door is open, status for connection devices for different positions includes the following:
 - 1) Test Position: Primary disconnects disengaged, and secondary disconnect devices and ground contact engaged.
 - 2) Disconnected Position: Primary and secondary devices and ground contact disengaged.
- f. Circuit Breakers:
 - 1) Comply with IEEE C37.13 and UL 1066.
 - 2) Ratings: Continuous, interrupting, and short-time current ratings for each circuit breaker must match voltage and frequency ratings for switchgear.
 - 3) Operating Mechanism: Mechanically and electrically trip-free, stored-energy operating mechanism with the following features:
 - a) Normal Closing Speed: Independent of both control and operator.
 - b) Slow Closing Speed: Optional with operator for inspection and adjustment.
 - c) Stored-Energy Mechanism: **[Manually charged][Electrically charged][Electrically charged, and operator's choice of manual charging]**.
 - d) Operating Handle: One for each circuit breaker capable of manual operation.
 - e) Electric Close Button: One for each electrically operated circuit breaker.
 - f) Operation counter.
 - 4) Trip Devices: Solid-state, overcurrent trip-device system consisting of one or two current transformers or sensors per phase, a release mechanism, and the following features:
 - a) Functions: Long-time-delay, short-time-delay, and instantaneous-trip functions, independent of each other in both action and adjustment.
 - b) Temperature compensation that ensures accuracy and calibration stability from **plus 23 to 104 deg F (minus 5 to plus 40 deg C)**.
 - c) Field-adjustable, time-current characteristics.
 - d) Current Adjustability: Dial settings and rating plugs on trip units, or sensors on circuit breakers, or a combination of these methods.
 - e) Three bands, minimum, for long-time- and short-time-delay functions; marked "minimum," "intermediate," and "maximum."
 - 5) Pickup Points:
 - a) Five minimum, for long-time- and short-time-trip functions. Equip short-time-trip function for switchable I-squared-t operation.
 - b) Five minimum, for instantaneous-trip functions.
 - 6) Ground-fault protection with at least three short-time-delay settings and three trip-time-delay bands; adjustable current pickup.
 - a) Arrange to provide protection for three-wire circuit or system.
 - b) Arrange to provide protection for four-wire circuit or system.
 - c) Arrange to provide protection for four-wire, double-ended substation.

- 7) Trip Indication: Labeled, battery-powered lights or mechanical targets on trip device to indicate type of fault.
 - 8) Auxiliary Contacts:
 - a) Contacts and switches required for normal circuit-breaker operation, sufficient for interlocking and remote indication of circuit-breaker position.
 - b) Spare auxiliary switches, at least two, unless other quantity is indicated. Each switch must consist of two Type A and two Type B contacts wired through secondary disconnect devices to a terminal block in stationary circuit-breaker compartment.
 - 9) Arc Chutes: Readily removable from associated circuit breaker when it is in "disconnected" position, and arranged to permit inspection of contacts without removing circuit breaker from switchgear.
 - 10) Padlocking Provisions: For installing at least three padlocks on each circuit breaker to secure its enclosure and prevent movement of drawout mechanism.
- g. Mechanical Interlocking of Circuit Breakers: Uses a mechanical tripping lever or equivalent design and electrical interlocks.
- h. Key Interlocks: Arranged to prevent opening or closing interlocked circuit breakers, except in a specified sequence. Include mountings and hardware for future installation of key interlocks.
- i. Undervoltage Trip Devices:
- 1) Instantaneous, with adjustable pickup voltage.
 - 2) Adjustable time-delay and pickup voltage.
- j. Shunt-trip devices.
- k. Fused Circuit Breakers: Circuit-breaker and fuse combinations complying with requirements for circuit breakers and trip devices.
- 1) Fuses: NEMA FU 1, Class L current limiting, sized to coordinate with and protect associated circuit breaker.
 - 2) Circuit Breakers with Frame Size **[1600]<Insert number> A and Smaller**: Mount fuses on line side of associated circuit breaker, **on a common drawout carriage**, arranged so fuses are accessible only when circuit breaker is in "disconnected" position.
 - 3) Circuit Breakers with Frame Sizes More than **[1600]<Insert number> A**: Fuses and circuit breakers **[may][must]** be installed in separate compartments on separate drawout mountings. Interlock fuse drawout element with associated power circuit breaker to prevent drawing out fuse element unless circuit breaker is in "open" position.
 - 4) Open-Fuse Trip Device: Provide for a positive means of tripping and holding circuit breaker in "open" position when a fuse opens. Indicate open-fuse status **[at front of circuit breaker][or][fuse drawout element]**.
- l. Indicating Lights: To indicate circuit breaker is open or closed, for main and bus tie circuit breakers interlocked either with each other or with external devices.

O. Secondary Distribution Network Protectors Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:
 - a. The secondary distribution section must be composed of drawout, fused, low-voltage network protectors, complying with IEEE C57.12.44 and IEEE C37.20.1. The switch must comply with UL 1066.
 - 1) Rated for continuous service in an ambient temperature of up to **104 deg F (40 deg C)**, applied to three-phase, four-wire, solidly grounded wye secondary networks. Comply with IEEE C57.12.44.
 - 2) Dead-front, drawout design with externally mounted fuses, using hand-cranked rail system. Include mechanical interlocks to prevent racking in and racking out when protector is closed.
 - 3) Locate relay and control panel on a separate drawout module.
 - 4) Protector Operator: **[Spring-close][and][or][stored-energy]** mechanism, rated to close on a **[25 000][40 000]** A RMS symmetrical load.
 - 5) Control Voltage: 125 V.
 - 6) Program relay with factory default values. Provide one hand-held pendant to field adjust these values using relay calibration procedures. Include an anti-pumping program to lock protector open under abnormal conditions.
 - 7) Include current-limiting fuses on network side of protector for protection against switchboard bus faults.
 - b. Coordinate and comply with requirements of low-voltage switchgear supplied by network.
 - c. Controls: Microprocessor-based, three-phase network relay, with features and functions as follows:
 - 1) The protector control must use a positive and negative sequence-based algorithm for current and voltage.
 - 2) Close protector if positive sequence power flows into network. Adjustable closing range must be from 0.5 to 3.5 V in phase difference between network and transformer voltages.
 - 3) Trip protector if there is a net, three-phase, reverse power flow through protector. Trip protectors must be adjustable from 0.05 to 5 percent of continuous-current rating of current transformers within protector.
 - 4) Trip protector if there is a flow of reverse magnetizing current to its associated transformer.
 - 5) Relay parameters and watt or watt-var trip values must be field adjustable.
 - 6) Protector must not open under any fault on network side of protector.

- 7) Include auxiliary contacts and control wiring for use with remote pilot devices that provide remote trip and lockout functions in low-voltage switchgear. Include **[two]<Insert number>** spare auxiliary contacts and an equal number of N.O. and N.C. types.
- d. Network Communications: Data and digital data-transmission interface must be compatible with system specified in Section 260913 "Electrical Power Monitoring." Communicate the following network relay parameters:
 - 1) Current in each phase.
 - 2) Phase-to-phase and phase-to-neutral voltages.
 - 3) Three-phase watts, VARs, and VA.
 - 4) Frequency.
 - 5) Power factor.
 - 6) Network relay set points.
- e. Enclosure:
 - 1) With top-mounted transition to connect to low-voltage power network.
 - 2) Network Switchgear-Mounted Disconnect Switch:
 - a) Supply each network-protector circuit with a switchgear-mounted fuse truck, with Class L fuses rated for 200 kA interrupting capacity and key interlocked with each associated protector.
 - b) Supply each network-protector circuit with a switchgear-mounted main circuit breaker rated for fault current that can be delivered by network transformers, less one. Use drawout type to provide a means of isolating load side of each protector from network bus.

P. Secondary Distribution Low-Voltage Instrument Section :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Standard Features:

- a. Instrument Transformers: Comply with IEEE C57.13.
 - 1) Potential Transformers: Secondary voltage rating of 120 V and NEMA C 12.11 Accuracy Class of 0.3 with burdens of W, X, and Y.
 - 2) Current Transformers: Burden and Accuracy Class suitable for connected relays, meters, and instruments.
- b. Multifunction Digital-Metering Monitor: Microprocessor-based unit suitable for three- or four-wire systems.
 - 1) Inputs from sensors or 5 A current-transformer secondaries, and potential terminals rated to 600 V.
 - 2) Switch-selectable digital display with the following features:
 - a) Phase Currents, Each Phase: Plus or minus 1 percent.
 - b) Phase-to-Phase Voltages, Three Phase: Plus or minus 1 percent.
 - c) Phase-to-Neutral Voltages, Three Phase: Plus or minus 1 percent.
 - d) Three-Phase Real Power: Plus or minus 2 percent.
 - e) Three-Phase Reactive Power: Plus or minus 2 percent.
 - f) Power Factor: Plus or minus 2 percent.
 - g) Frequency: Plus or minus 0.5 percent.
 - h) Integrated Demand, with Demand Interval Selectable from 5 to 60 Minutes: Plus or minus 2 percent.
 - i) Accumulated energy, in **MWh (MJ)**, plus or minus 2 percent; stored values unaffected by power outages for up to 72 hours.
 - 3) Communications module suitable for remote monitoring of meter quantities and functions. Interface communication and metering requirements in accordance with Section 260913 "Electrical Power Monitoring."
 - 4) Mounting: Display and control unit that is flush or semiflush mounted in instrument compartment door.
- c. Analog Instruments: Rectangular, **4-1/2 inch (115 mm)** square, 1 percent accuracy, semiflush mounting, with antiparallax 250-degree scale and external zero adjustment.
 - 1) Voltmeters: Cover an expanded scale range of normal voltage plus 10 percent.
 - 2) Voltmeter Selector Switch: Rotary type with "off" position to provide readings of phase-to-phase[**and phase-to-neutral**] voltages.
 - 3) Ammeters: Cover an expanded scale range of bus rating plus 10 percent.
 - 4) Ammeter Selector Switch: Permits current reading in each phase and keeps current-transformer secondary circuits closed in "off" position.
 - 5) Locate meter and selector switch on circuit-breaker compartment door for indicated feeder circuits only.
 - 6) Watt-Hour Meters: Flush- or semiflush-mounting type, 5 A, 120 V, three phase, three wire; with three elements, 15-minute indicating demand register, and provision for testing and adding pulse initiation.
 - 7) Recording Demand Meter: Usable as totalizing relay or indicating and recording maximum demand meter with 15-minute interval.
 - a) Operation: Counts and records a succession of pulses entering two channels.
 - b) Housing: Drawout, back-connected case arranged for semiflush mounting.
- d. Relays: Comply with IEEE C37.90, types and settings as indicated; with test blocks and plugs.
- e. Surge Suppression:

- 1) Factory installed as an integral part of low-voltage switchgear, complying with UL 1449 SPD, Type 1, with the following features and accessories:
 - a) Integral disconnect switch.
 - b) Internal thermal protection that disconnects SPD before damaging internal suppressor components.
 - c) Indicator light display for protection status.
 - d) Form-C contacts rated at 5 A 250 V(ac), one N.O. and one N.C., for remote monitoring of protection status. [**Contacts must reverse on failure of any surge diversion module or on opening of any current-limiting device. Coordinate with building power monitoring and control system.**]
 - e) Surge counter.
- 2) Field-mounted surge suppressors complying with Section 264313 "Surge Protective Devices for Low-Voltage Electrical Power Circuits." Include the following features and accessories:
 - a) Integral disconnect switch.
 - b) Internal thermal protection that disconnects SPD before damaging internal suppressor components.
 - c) Indicator light display for protection status.
 - d) Form-C contacts rated at 5 A 250 V(ac), one N.O. and one N.C., for remote monitoring of protection status. [**Contacts must reverse on failure of any surge diversion module or on opening of any current-limiting device. Coordinate with building power monitoring and control system.**]
 - e) Surge counter.
- f. Control Power Supply:
 - 1) From medium-voltage instruments section.
 - 2) Control power transformer supplying 120 V control circuits through secondary disconnect devices.
- g. Control Wiring: Factory installed, complete with bundling, lacing, and protection; and complying with the following:
 - 1) Flexible conductors for 8 AWG and smaller, for conductors across hinges and for conductors for interconnections between shipping units.
 - 2) Conductors sized in accordance with NFPA 70 for duty required.

2.3 MAINTENANCE MATERIAL ITEMS

- A. Spare Parts: Furnish to Owner spare parts, for repairing secondary unit substation, that are packaged with protective covering for storage on-site and identified with labels describing contents. [**Include the following:**]
 1. Spare Fuses: [Six]<Insert number> of each type and rating of fuse and fusible device used, except for medium-voltage fuses [**and fuses associated with network protector**]. Include spares for the following:
 - a. Fuses: Sizes recommended by secondary unit substation manufacturer, considering fan cooling, temperature-rise specification, and cycle loading.
 - 1) Current-Limiting Fuses: Full-range, fast-replaceable, current-limiting type that will

- operate without explosive noise or expulsion of gas, vapor, or foreign matter from tube.
- 2) Expulsion Fuses: Furnished in disconnect-type mountings and renewable with replacement fuse units. Gases emitted on interruption are controlled and silenced by chambers designed for that purpose.
 - 3) Indicator integral with each fuse to show when it has blown.
 - 4) Spares: Include three fuses in use and three spare fuses in storage clips in each switch.
2. Spare Indicating Lights: Six of each type installed.
 3. **[One]<Insert number>** set(s) of spare mounting gaskets for bushings, handholes, and gasket between relief cover and flange of pressure-relief device.
- B. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to secondary unit substation, that are packaged with protective covering for storage on-site and identified with labels describing contents. **[Include the following:]**
1. Control-power battery hoist.
 2. Switchgear Circuit-Breaker Test Cabinet:
 - a. Separately mounted.
 - b. Containing push buttons for circuit-breaker closing and tripping, control relay, fuses, and secondary coupler with cable approximately **108 inch (2740 mm)** long.
 - c. Include secondary devices for operating circuit breaker if removed from switchgear and moved near test cabinet.
 - d. Include provision for storage of test and maintenance accessories in cabinet.
 3. Switchgear Maintenance Tools: Furnish tools and miscellaneous items required for switchgear test, inspection, maintenance, and operation.
 - a. Fuse-handling tool.
 - b. Relay and meter test plugs.
 - c. Extension rails, lifting device, transport or dockable dolly or mobile lift, and all other items necessary to remove circuit breaker from housing and transport to remote location.
 - d. Racking handle to move circuit breaker manually between "connected" and "disconnected" positions, and a secondary test coupler to permit testing of circuit breaker without removal from switchgear.
 4. Transformer Accessories Set: Grounding pads, lifting lugs, and provisions for jacking under base. Transformers must have a steel base and frame allowing use of pipe rollers in any direction, and an insulated, low-voltage, neutral bushing with removable ground strap. **[Include the following additional accessories:]**
 - a. Liquid-level gauge.
 - b. Pressure-vacuum gauge.
 - c. Liquid temperature indicator.
 - d. Drain and filter valves.
 - e. Pressure-relief device.
 5. Low-Voltage Instruments Maintenance Tools: Furnish tools and miscellaneous items required for circuit-breaker and switchgear test, inspection, maintenance, and operation.
 - a. Racking handle to manually move circuit breaker between "connected" and "disconnected" positions.
 - b. Portable test set for testing all functions of circuit-breaker, solid-state trip devices without

- removal from switchgear.
- c. Relay and meter test plugs suitable for testing switchgear meters and switchgear class relays.
- d. Circuit-Breaker Removal Apparatus:
 - 1) Portable, floor-supported, roller-base, elevating carriage arranged for moving circuit breakers in and out of compartments.
 - 2) Overhead-circuit-breaker lifting device, track mounted at top front of switchgear and complete with hoist and lifting yokes matching each size of drawout circuit breaker installed.
- e. Spare-Fuse Cabinet: Identified and compartmented steel box or cabinet with lockable door.
- f. Storage for Manual: Include a rack or holder, near operating instructions, for a copy of maintenance manual.

C. Consumable Items:

- 1. After completion of field quality control, startup, commissioning, adjusting, and closeout activities, replace air filters and refill fuel tanks and fluid reservoirs.
- 2. Furnish to Owner extra consumable items for storage on-site, identified with labels describing contents.[**Include the following:**]
 - a. Touchup Paint: **[Three]<Insert number>** half-pint containers of paint matching enclosure's exterior finish.
 - b. Primary Switch Contact Lubricant: **[One]<Insert number>** container(s).

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and space conditions for compliance with requirements for secondary unit substations and other conditions affecting performance of the Work.
- B. Examine roughing-in of conduits and grounding systems to verify the following:
 - 1. Wiring entries comply with layout requirements.
 - 2. Entries are within conduit-entry tolerances specified by manufacturer, and no feeders will have to cross section barriers to reach load or line lugs.
- C. Examine walls, floors, roofs, and concrete bases for suitable conditions for secondary unit substation installation.
- D. Verify that ground connections are in place and that requirements in Section 260526 "Grounding and Bonding for Electrical Systems" have been met. Maximum ground resistance must be 5 Ω at secondary unit substation location.
- E. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF SECONDARY UNIT SUBSTATIONS

- A. Comply with manufacturer's published instructions.

- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
 2. Electrical Maintenance: NFPA 70B.
 3. Electrical Safety: NFPA 70E.
 4. Commissioning of Electrical Systems: NECA NEIS 90.
 5. Hot Work: NFPA 51B.
 6. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 7. Communications Work: BICSI N1.
 8. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
 9. Work in Confined Spaces: NFPA 350.
 10. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 11. Evaluation of Unlabeled Electrical Equipment: NFPA 791.
 12. Installation of Switchboards: NECA NEIS 400.
 13. Installation of Liquid-Filled Transformers: NECA NEIS 410.
 14. Installation of Medium-Voltage Metal-Clad Switchgear: NECA NEIS 430.
 15. Installation and Maintenance of AC Outdoor High-Voltage Circuit Breakers: NEMA SG 11.
 16. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
1. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's instructions and NFPA 70.
- D. Interfaces with Other Work:
1. Identification: Provide signs and labels for secondary unit substation and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - d. Install number of signs required to be readable from each accessible side, but space signs a maximum of **30 ft (9 m)** apart.
 - e. Operating Instructions: Place printed operating instructions for secondary unit substations, including key interlocking, control sequences, elementary single-line diagram, and emergency procedures with maintenance materials.
 2. Install secondary unit substations on concrete equipment base(s).
 3. Provide vibration isolation and seismic control devices.
 4. Grounding and Bonding:
 - a. At Interior Locations: For grounding to grounding electrodes, use bare copper cable not smaller than 4/0 AWG. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors. Keep leads as short as practicable with no kinks or sharp bends. Make joints in grounding conductors and loops by exothermic weld or compression connector.
 - b. At Exterior Locations:
 - 1) For counterpoise, use tinned bare copper cable not smaller than 4/0 AWG, buried not less than **30 inch (765 mm)** below grade interconnecting grounding electrodes. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors, sized as indicated. Keep lead lengths as short as practicable with no kinks or sharp bends.
 - 2) Fence and equipment connections must not be smaller than 4 AWG. Ground fence

at each gate post and corner post and at intervals not exceeding **10 ft (3 m)**. Bond each gate section to fence post using **1/8 by 1 inch (3 by 25 mm) [tinned]** flexible braided copper strap and clamps.

- 3) Make joints in grounding conductors and loops by exothermic weld or compression connector.

5. Connect feeder, branch-circuit, and instrumentation wiring.

3.3 FIELD QUALITY CONTROL

A. Administrant for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Field tests must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

C. General Field Testing Requirements:

1. Comply with provisions of NFPA 70B, "Testing and Test Methods" Chapter.
2. Perform each visual and mechanical inspection and electrical test. Certify compliance with test parameters.
3. After installing secondary unit substation but before primary is energized, verify that grounding system at substation is tested at specified value or less.
4. After installing secondary unit substation and after electrical circuitry has been energized, test for compliance with requirements.
5. Visual and Mechanical Inspection:
 - a. Verify equipment nameplate data complies with Contract Documents.
 - b. Inspect bolted electrical connections for high resistance using one of the following two methods:
 - 1) Use a low-resistance ohmmeter to compare bolted-connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.
6. Remove and replace malfunctioning units and retest.
7. Prepare test and inspection reports. Record as-left set points of all adjustable devices.

D. Switchgear Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, grounding, and required area clearances.
- c. Verify unit is clean and shipping bracing, loose parts, and documentation shipped inside cubicles have been removed.
- d. Verify that fuse and circuit-breaker sizes and types correspond to Drawings and coordination study as well as to address of circuit breaker that is used to identify it in microprocessor-communication software.
- e. Verify that current and voltage-transformer ratios correspond to Drawings.
- f. Confirm correct operation and sequencing of electrical and mechanical interlock systems.
 - 1) Attempt closure on locked-open devices. Attempt to open locked-closed devices.
 - 2) Make key exchange with devices operated in off-normal positions.
- g. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
- h. Inspect insulators for evidence of physical damage or contaminated surfaces.
- i. Verify correct barrier and shutter installation and operation.
- j. Exercise all active components.
- k. Inspect mechanical indicating devices for correct operation.
- l. Verify that filters are in place and vents are clear.
- m. Inspect control power transformers as follows:
 - 1) Inspect for physical damage, cracked insulation, broken leads, connection tightness, defective wiring, and overall general condition.
 - 2) Verify that primary- and secondary-fuse or circuit-breaker ratings match Drawings and comply with manufacturer's published instructions.
 - 3) Verify correct functioning of drawout disconnecting and grounding contacts and interlocks.

2. Electrical Tests:

- a. Perform DC voltage insulation-resistance tests on each bus section, phase-to-phase and phase-to-ground, for one minute. If temperature of bus is other than plus or minus 20 deg C, adjust resulting resistance as provided in NETA ATS, Table 100.11.
 - 1) Insulation-resistance values of bus insulation must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than manufacturer's published instructions or NETA ATS, Table 100.1.
 - 2) Do not proceed to dielectric-withstand-voltage tests until insulation-resistance levels are raised above minimum values.
- b. Perform a dielectric-withstand-voltage test on each bus section, each phase-to-ground with phases not under test grounded, in accordance with manufacturer's published data. If manufacturer has no recommendation for this test, conduct it in accordance with NETA ATS, Table 100.2. Apply test voltage for one minute.
 - 1) If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric-withstand-voltage test, test specimen is considered to have passed test.
- c. Perform insulation-resistance tests on control wiring with respect to ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid-state components or control devices that cannot tolerate applied voltage, follow manufacturer's published instructions.

- 1) Minimum insulation-resistance values of control wiring must not be less than 2 MΩ.
 - d. Voltage Transformers:
 - 1) Perform secondary wiring integrity test. Verify correct potential at all devices.
 - 2) Verify secondary voltages by energizing primary winding with system voltage.
 - e. Perform current-injection tests on entire current circuit in each section of switchgear.
 - 1) Perform current tests by secondary injection with magnitudes such that a minimum current of 1.0 A flows in secondary circuit. Verify correct magnitude of current at each device in circuit.
 - 2) Perform current tests by primary injection with magnitudes such that a minimum of 1.0 A flows in secondary circuit. Verify correct magnitude of current at each device in circuit.
 - f. Verify operation of space heaters.
 - g. Perform phasing checks on double-ended or dual-source switchgear to ensure correct bus phasing from each source.
- E. Medium-Voltage Surge Arrester Field Tests:
1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Inspect anchorage, alignment, grounding, and clearances.
 - c. Verify arresters are clean.
 - d. Verify that ground lead on each device is individually attached to a ground bus or ground electrode.
 - e. Verify that stroke counter is correctly mounted and electrically connected if applicable. Record stroke counter reading.
 2. Electrical Tests:
 - a. Perform an insulation-resistance test on each arrester, phase terminal-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Replace units that fail to meet recommended minimum insulation resistance listed in table.
 - b. Perform a watts-loss test. Evaluate watts-loss values by comparison with similar units and test equipment manufacturer's published data.
- F. Medium-Voltage Vacuum Circuit Breaker Field Tests:
1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Inspect anchorage, alignment, grounding, and required clearances.
 - c. Verify that maintenance devices such as special tools and gauges specified by manufacturer are available for servicing and operating breaker.
 - d. Verify unit is clean.
 - e. Perform mechanical operation tests on operating mechanism in accordance with manufacturer's published data.
 - f. Measure critical distances on operating mechanism in accordance with manufacturer's published instructions. Critical distances of operating mechanism must be in accordance with manufacturer's published data.

- g. Verify cell fit and element alignment.
- h. Verify racking mechanism operation.
- i. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
- j. Perform time-travel analysis. Travel and velocity values must be in accordance with manufacturer's published data.
- k. Record as-found and as-left operation counter reading. Operation counter must advance one digit per close-open cycle.

2. Electrical Tests:

- a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with switch closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Insulation-resistance values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than this table or manufacturer's published instructions. Dielectric-withstand-voltage tests must not proceed until insulation-resistance levels are raised above minimum values.
- b. Perform a contact/pole-resistance test. Compare bolted-connection resistance values to values of similar connections. Investigate values which deviate from those of similar bolted connections by more than 50 percent of lowest value. Microhm or DC millivolt drop values must not exceed high levels of normal range as indicated in manufacturer's published data. If manufacturer's published data is not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
- c. Perform minimum pickup voltage tests on trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of trip and close coils must comply with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.20.
- d. Verify correct operation of any auxiliary features, such as electrical close and trip operation, trip-free operation, and anti-pump function. Auxiliary features must operate in accordance with manufacturer's published data.
- e. Trip circuit breaker by operation of each protective device. Reset all trip logs and indicators.
- f. Perform power-factor or dissipation-factor tests on each pole with breaker open and each phase with breaker closed. Power-factor or dissipation-factor values must meet manufacturer's published data.
- g. Perform vacuum bottle integrity (dielectric-withstand-voltage) test across each vacuum bottle, with contacts in "open" position in accordance with manufacturer's published data. If no evidence of distress or insulation failure is observed by end of total time of voltage application during vacuum bottle integrity test, test specimen is considered to have passed test.
- h. Perform a dielectric-withstand-voltage test in accordance with manufacturer's published data. If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric-withstand-voltage test, test specimen is considered to have passed test.
- i. Verify operation of heaters.

G. Instrument Transformer Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Verify correct connection of transformers with system requirements.
- c. Verify that adequate clearances exist between primary and secondary circuit wiring.

- d. Verify unit is clean.
- e. Verify that required grounding and shorting connections provide contact.
- f. Verify correct operation of transformer withdrawal mechanism and grounding operation.
- g. Verify correct primary- and secondary-fuse sizes for voltage transformers.
- h. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.

2. Electrical Tests of Current Transformers:

- a. Perform insulation-resistance test of each current transformer and its secondary wiring with respect to ground at 1000 V(dc) for one minute. For units with solid-state components that cannot tolerate applied voltage, comply with manufacturer's published instructions. Insulation-resistance values of instrument transformers must not be less than values shown in NETA ATS, Table 100.5.
- b. Perform a polarity test of each current transformer in accordance with IEEE C57.13.1. Polarity results must agree with transformer markings.
- c. Perform a ratio-verification test using voltage or current method in accordance with IEEE C57.13.1. Ratio errors must comply with IEEE C57.13.
- d. Perform an excitation test on transformers used for relaying applications in accordance with IEEE C57.13.1. Excitation results must match curve supplied by manufacturer or must comply with IEEE C57.13.1.
- e. Measure current circuit burdens at transformer terminals in accordance with IEEE C57.13.1. The measured burdens must match instrument transformer Accuracy Class rating.
- f. Perform insulation-resistance tests on primary winding with secondary grounded. Test voltages must comply with NETA ATS, Table 100.5. The insulation-resistance value must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5.
- g. Perform dielectric-withstand-voltage tests on primary winding with secondary grounded. Test voltages must comply with NETA ATS, Table 100.9. If no evidence of distress or insulation failure is observed by end of total time of voltage application, primary winding is considered to have passed test.
- h. Perform power-factor or dissipation-factor tests in accordance with test equipment manufacturer's published data. Power-factor or dissipation-factor values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with test equipment manufacturer's published data.
- i. Verify that current-transformer secondary circuits are grounded and have only one grounding point in accordance with IEEE C57.13.3.

3. Electrical Tests of Voltage and Potential Transformers:

- a. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply test voltage for one minute in accordance with NETA ATS, Table 100.5. For units with solid-state components that cannot tolerate applied voltage, follow manufacturer's published instructions. Insulation-resistance values of instrument transformers must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5.
- b. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Test voltages must be applied for one minute in accordance with NETA ATS, Table 100.5. Insulation-resistance values of transformers must not be less than values shown in NETA ATS, Table 100.5.
- c. Perform a polarity test on each transformer to verify polarity marks or H(1)-X(1) relationship. Polarity results must agree with transformer markings.
- d. Perform a turns-ratio test on all tap positions. Ratio errors must not exceed tolerances specified in IEEE C57.13.

- e. Measure voltage circuit burdens at transformer terminals. Measured burdens must be compared to instrument transformer ratings. The measured burdens must match instrument transformer Accuracy Class rating.
- f. Perform a dielectric-withstand-voltage test on primary windings with secondary windings connected to ground. The dielectric voltage must comply with NETA ATS, Table 100.9. The test voltage must be applied for one minute. If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric-withstand-voltage test, primary windings are considered to have passed test.
- g. Perform power-factor or dissipation-factor tests in accordance with test equipment manufacturer's published data. Power-factor or dissipation-factor values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with test equipment manufacturer's published data.
- h. Verify that voltage-transformer secondary circuits are grounded and have only one grounding point in accordance with IEEE C57.13.3.

H. Microprocessor-Based Protective Relay Field Tests:

1. Visual and Mechanical Inspection:

- a. Record model number, style number, serial number, firmware revision, software revision, and rated control voltage.
- b. Verify operation of light-emitting diodes, display, and targets.
- c. Record passwords for each access level.
- d. Clean front panel and remove foreign material from case.
- e. Check tightness of connections.
- f. Verify that frame is grounded in accordance with manufacturer's published instructions.
- g. Set relay in accordance with results in Section 260573 "Power System Studies."
- h. Download settings from relay. Print a copy of settings for report and compare settings to those specified in coordination study.

2. Electrical Tests:

- a. Perform insulation-resistance tests from each circuit to grounded frame in accordance with manufacturer's published data.
- b. Apply voltage or current to analog inputs, and verify correct registration of relay meter functions.
- c. Functional Operation: Check functional operation of each element used in protection scheme as follows:
 - 1) Timing Relay (IEEE C37.2 Device No. 2):
 - a) Determine time delay.
 - b) Verify operation of instantaneous contacts.
 - 2) Volts Per Hertz Relay (IEEE C37.2 Device No. 24):
 - a) Determine pickup frequency at rated voltage.
 - b) Determine pickup frequency at a second voltage level.
 - c) Determine time delay.
 - 3) Sync Check Relay (IEEE C37.2 Device No. 25):
 - a) Determine closing zone at rated voltage.
 - b) Determine maximum voltage differential that permits closing at zero degrees.
 - c) Determine live line, live bus, dead line, and dead bus set points.
 - d) Determine time delay.

- e) Verify dead bus/live line, dead line/live bus, and dead bus/dead line control functions.
- 4) Undervoltage Relay (IEEE C37.2 Device No. 27):
- a) Determine dropout voltage.
 - b) Determine time delay.
 - c) Determine time delay at a second point on timing curve for inverse time relays.
- 5) Directional Power Relay (IEEE C37.2 Device No. 32):
- a) Determine minimum pickup at maximum torque angle.
 - b) Determine closing zone.
 - c) Determine maximum torque angle.
 - d) Determine time delay.
 - e) Verify time delay at a second point on timing curve for inverse time relays.
 - f) Plot operating characteristic.
- 6) Loss of Excitation/Field Relay (IEEE C37.2 Device No. 40):
- a) Determine maximum reach.
 - b) Determine maximum torque angle.
 - c) Determine offset.
 - d) Plot impedance circle.
- 7) Phase Balance Current Relay (IEEE C37.2 Device No. 46):
- a) Determine pickup of each unit.
 - b) Determine percent slope.
 - c) Determine time delay.
- 8) Negative Sequence Current Relay (IEEE C37.2 Device No. 46):
- a) Determine negative sequence alarm level.
 - b) Determine negative sequence minimum trip level.
 - c) Determine maximum time delay.
 - d) Verify two points on I-two-squared-t curve.
- 9) Phase Sequence or Phase Balance Voltage Relay (IEEE C37.2 Device No. 47):
- a) Determine positive sequence voltage to close N.O. contact.
 - b) Determine positive sequence voltage to open N.C. contact (undervoltage trip).
 - c) Verify negative sequence trip.
 - d) Determine time delay to close N.O. contact with sudden application of 120 percent of pickup.
 - e) Determine time delay to close N.C. contact upon removal of voltage when previously set to rated system voltage.
- 10) Thermal Replica Relay (IEEE C37.2 Device No. 49):
- a) Determine time delay at 300 percent of setting.
 - b) Determine a second point on operating curve.
 - c) Determine pickup.

- 11) RTD Biased Thermal Overload Relay (IEEE C37.2 Device No. 49RTD):
 - a) Determine RTD resistance trip setting.
 - b) Determine RTD resistance reset setting.
- 12) Instantaneous Overcurrent Relay (IEEE C37.2 Device No. 50):
 - a) Determine pickup.
 - b) Determine dropout.
 - c) Determine time delay.
- 13) Time Overcurrent Relay (IEEE C37.2 Device No. 51):
 - a) Determine minimum pickup.
 - b) Determine time delay at two points on time current curve.
- 14) Power-Factor Relay (IEEE C37.2 Device No. 55):
 - a) Determine tripping angle.
 - b) Determine time delay.
- 15) Overvoltage Relay (IEEE C37.2 Device No. 59):
 - a) Determine overvoltage pickup.
 - b) Determine time delay to close contact with sudden application of 120 percent of pickup.
- 16) Voltage Balance Relay (IEEE C37.2 Device No. 60):
 - a) Determine voltage difference to close contacts with one source at rated voltage.
 - b) Plot operating curve for relay.
- 17) Sudden Pressure Relay (IEEE C37.2 Device No. 63):
 - a) Determine rate-of-rise or pickup level of suddenly applied pressure in accordance with manufacturer's published data.
 - b) Verify operation of auxiliary relay (IEEE C37.2 Device No. 63X) seal-in circuit.
 - c) Verify trip circuit to remote operating device.
- 18) Ground Detector Relay (IEEE C37.2 Device No. 64):
 - a) Determine maximum impedance to ground causing relay pickup.
- 19) Directional Overcurrent Relay (IEEE C37.2 Device No. 67):
 - a) Determine directional unit minimum pickup at maximum torque angle.
 - b) Determine closing zone.
 - c) Determine maximum torque angle.
 - d) Plot operating characteristics.
 - e) Determine overcurrent unit pickup.
 - f) Determine overcurrent unit time delay at two points on time current curve.
- 20) Reclosing Relay (IEEE C37.2 Device No. 79):

- a) Determine time delay for each programmed reclosing interval.
- b) Verify lockout for unsuccessful reclosing.
- c) Determine reset time.
- d) Determine close pulse duration.
- e) Verify instantaneous overcurrent lockout.

21) Frequency Relay (IEEE C37.2 Device No. 81):

- a) Verify frequency set points.
- b) Determine time delay.
- c) Determine undervoltage cutoff.

22) Pilot Wire Monitor (IEEE C37.2 Device No. 85):

- a) Determine overcurrent pickup.
- b) Determine undercurrent pickup.
- c) Determine pilot wire ground pickup level.

23) Differential Protective Relay (IEEE C37.2 Device No. 87):

- a) Determine operating unit pickup.
- b) Determine operation of each restraint unit.
- c) Determine slope.
- d) Determine harmonic restraint.
- e) Determine instantaneous pickup.
- f) Plot operating characteristics for each restraint.

d. Control Verification:

1) Functional Tests:

- a) Check operation of all active digital inputs.
- b) Check output contacts or SCRs, preferably by operating controlled device, such as circuit breaker, auxiliary relay, or alarm.
- c) Check internal logic functions used in protection scheme.
- d) For pilot schemes, perform a loop-back test to check receive and transmit communication circuits.
- e) For pilot schemes, perform satellite synchronized end-to-end tests.
- f) For pilot schemes with direct transfer trip (DTT), perform transmit and received DTT at each terminal.
- g) Upon completion of testing, reset min/max recorders, communications statistics, fault counters, sequence-of-events recorder, and event records.

2) In-Service Monitoring: After equipment is initially energized, measure magnitude and phase angle of inputs and verify expected values.

I. DC System VRLA Batteries Field Tests:

1. Visual and Mechanical Inspection:

- a. Verify that batteries are adequately located.
- b. Verify that battery area ventilation system is operable.
- c. Verify existence of suitable eyewash equipment.
- d. Verify equipment nameplate data complies with Contract Documents.
- e. Inspect physical and mechanical condition.

- f. Verify adequacy of battery support racks, mounting, anchorage, alignment, grounding, and clearances.
- g. Verify units are clean.
- h. Inspect spill containment installation.
- i. Verify application of an oxide inhibitor on battery terminal connections.

2. Electrical Tests:

- a. Measure charger float and equalizing voltage levels. Adjust voltage in accordance with battery manufacturer's published instructions.
- b. Verify charger functions and that alarms comply with system manufacturer's published instructions.
- c. Measure negative post temperature. Negative post temperature must comply with manufacturer's published data or IEEE 1188.
- d. Measure charger float and equalizing voltage levels. Charger float and equalizing voltage levels must be in accordance with battery manufacturer's published data.
- e. Measure each monoblock/cell voltage and total battery voltage with charger energized and in float mode of operation. Monoblock/cell voltages must be in accordance with manufacturer's published data.
- f. Measure intercell connection resistances.
- g. Perform internal ohmic measurement tests. Cell internal ohmic values (resistance, impedance, or conductance) must not vary by more than 25 percent between identical cells that are in a fully charged state. Monoblock/cell internal ohmic values (resistance, impedance, or conductance) must not vary by more than 25 percent between identical monoblocks/cells in a fully charged state.
- h. Perform a load test in accordance with manufacturer's published data or IEEE 1188. Replace units that fail to pass test.
- i. Measure battery system voltage from positive-to-ground and negative-to-ground. Voltage measured from positive-to-ground must be equal in magnitude to voltage measured from negative-to-ground.

J. DC System Vented Ni-Cd Batteries Field Tests:

1. Visual and Mechanical Inspection:

- a. Verify that batteries are adequately located.
- b. Verify that battery area ventilation system is operable.
- c. Verify existence of suitable eyewash equipment.
- d. Verify equipment nameplate data complies with Contract Documents.
- e. Inspect physical and mechanical condition.
- f. Verify adequacy of battery support racks, mounting, anchorage, alignment, grounding, and clearances.
- g. Verify electrolyte level. Measure pilot-cell electrolyte temperature, and correct in accordance with manufacturer's maintenance procedures to bring temperature and electrolyte level to within normal limits.
- h. Verify units are clean.
- i. Inspect spill containment installation.
- j. Verify application of an oxide inhibitor on battery terminal connections.

2. Electrical Tests:

- a. Measure charger float and equalizing voltage levels. Adjust voltage in accordance with battery manufacturer's published instructions.
- b. Verify charger functions and that alarms comply with system manufacturer's published instructions.
- c. Measure each cell voltage and total battery voltage with charger energized and in float

mode of operation. Cell voltages must be within 0.05 volt of each other or in accordance with manufacturer's published data.

- d. Measure intercell connection resistances.
- e. Perform internal ohmic measurement tests. Cell internal ohmic values (resistance, impedance, or conductance) must not vary by more than 25 percent between identical cells that are in a fully charged state.
- f. Perform a load test in accordance with manufacturer's published data or IEEE 1106. Replace units that fail to pass test.
- g. Measure battery system voltage from positive-to-ground and negative-to-ground. Voltage measured from positive-to-ground must be equal in magnitude to voltage measured from negative-to-ground.

K. DC System Charger Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect for physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify unit is clean.
- d. Inspect filter and tank capacitors.
- e. Verify operation of cooling fans and presence of filters.

2. Electrical Tests:

- a. Verify float voltage, equalizing voltage, and overvoltage shutdown settings. Float and equalizing voltage settings must be in accordance with battery manufacturer's published data.
- b. Verify current limit. Current limit must be set in accordance with manufacturer's published instructions.
- c. Verify operation of alarms. Results of alarm operation must be in accordance with manufacturer's published data and system design.
- d. Measure and record input and output voltage and current. Input and output voltage must be in accordance with manufacturer's published data.
- e. Measure and record AC ripple current and voltage imposed on battery. AC ripple current and voltage imposed on battery must be in accordance with manufacturer's published data.
- f. Perform full-load testing of charger. Charger must be capable of manufacturer's specified full load.

L. Liquid-Filled Transformer Section Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect impact recorder prior to unloading.
- c. Test dew point of tank gases if applicable.
- d. Inspect anchorage, alignment, and grounding.
- e. Verify presence of PCB content labeling.
- f. Verify removal of any shipping bracing after placement.
- g. Verify bushings are clean.
- h. Verify that alarm, control, and trip settings on temperature and level indicators are set and operate in accordance with manufacturer's published instructions.
- i. Verify that cooling fans and pumps operate correctly and have appropriate overcurrent protection.
- j. Verify that liquid level in tanks and bushings is within manufacturer's published tolerances.
- k. Perform specific inspections and mechanical tests recommended by manufacturer's

- published instructions.
- l. Verify presence of transformer surge arresters and that their ratings are as specified.
- m. Verify that as-left tap connections are as specified.
- n. Verify presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index must not be less than 1.0.
- b. Perform power-factor or dissipation-factor tests on all windings in accordance with test equipment manufacturer's published data. Maximum winding insulation power-factor/dissipation-factor values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.3.
- c. Measure core insulation resistance at 500 V(dc) if core is insulated and core ground strap is removable. Core insulation-resistance values must not be less than 1 MΩ at 500 V(dc).
- d. Perform a power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV.
- e. Perform turns-ratio tests at tap positions. Turns-ratio test results must not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- f. Perform an excitation-current test on each phase. The typical excitation-current test data pattern for a three-legged core transformer is two similar current readings and one lower current reading. Investigate and correct if test shows a different pattern.
- g. Measure resistance of each winding at each tap connection, and record temperature-corrected winding-resistance values in Operations and Maintenance Manual.
- h. Perform an applied-voltage test on primary and secondary windings-to-ground. Comply with IEEE C57.12.91, Sections 10.2 and 10.9.
- i. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.
- j. Remove a sample of insulating liquid in accordance with ASTM D923. Insulating liquid values must comply with NETA ATS, Table 100.4. Sample must be tested for the following:
 - 1) Dielectric Breakdown Voltage: ASTM D877/D877M or ASTM D1816.
 - 2) Acid Neutralization Number: ASTM D974.
 - 3) Specific Gravity: ASTM D1298.
 - 4) Interfacial Tension: ASTM D971.
 - 5) Color: ASTM D1500.
 - 6) Visual Condition: ASTM D1524.
 - 7) Water in Insulating Liquids: ASTM D1533.
 - 8) Power Factor or Dissipation Factor: ASTM D924.
- k. Remove a sample of insulating liquid in accordance with ASTM D923 and perform dissolved-gas analysis in accordance with IEEE C57.104 or ASTM D3612.

M. Small Dry-Type Transformer Section Field Tests:

- 1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Inspect anchorage, alignment, and grounding.
 - c. Verify that resilient mounts are free and that any shipping brackets have been removed.
 - d. Verify unit is clean.
 - e. Perform specific inspections and mechanical tests recommended by manufacturer's published instructions.
 - f. Verify that as-left tap connections are as specified.

- g. Verify presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index must not be less than 1.0.
- b. Perform turns-ratio tests at all tap positions. The test results must not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- c. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

N. Large Dry-Type Transformer Section Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify that resilient mounts are free and that any shipping brackets have been removed.
- d. Verify unit is clean.
- e. Verify that alarm, control, and trip settings on temperature and level indicators are set and operate in accordance with manufacturer's published instructions.
- f. Verify that cooling fans operate and that fan motors have correct overcurrent protection.
- g. Perform specific inspections and mechanical tests recommended by manufacturer's published instructions.
- h. Verify that as-left tap connections are as specified.
- i. Verify presence of surge arresters and that their ratings are as specified.

2. Electrical Tests:

- a. Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index must not be less than 1.0.
- b. Perform power-factor or dissipation-factor tests on windings in accordance with test equipment manufacturer's published data. Investigate and correct power-factor values that exceed:
 - 1) 2.0 percent for power transformers.
 - 2) 5.0 percent for distribution transformers.
- c. Measure core insulation resistance at 500 V(dc) if core is insulated and core ground strap is removable. Core insulation-resistance values must not be less than 1 MΩ at 500 V(dc).
- d. Perform a power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV. Tip-up test result exceeding 1.0 percent must be investigated.
- e. Perform turns-ratio tests at all tap positions. The test results must not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- f. Perform an excitation-current test on each phase. The typical excitation-current test data pattern for a three-legged core transformer is two similar current readings and one lower current reading. Investigate and correct if test shows a different pattern.
- g. Measure resistance of each winding at each tap connection.
- h. Perform an applied-voltage test on all primary and secondary windings-to-ground. See

IEEE C57.12.91, Sections 10.2 and 10.9. The AC dielectric-withstand-voltage test result must not exceed 75 percent of factory test voltage for one-minute duration. The DC dielectric-withstand-voltage test result must not exceed 100 percent of AC RMS test voltage specified in IEEE C57.12.91, Section 10.2, for one-minute duration. If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric-withstand-voltage test, test specimen is considered to have passed test.

- i. Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

O. Secondary Distribution Section Network Protector Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify unit is clean.
- d. Verify arc chutes are intact.
- e. Inspect moving and stationary contacts for condition and alignment.
- f. Verify that maintenance devices are available for servicing and operating network protector.
- g. Verify that primary and secondary contact wipe and other dimensions vital to satisfactory operation of network protector are correct.
- h. Perform mechanical operator and contact alignment tests on both network protector and its operating mechanism. Operations counter must advance one digit per close-open cycle.
- i. Verify cell fit and element alignment.
- j. Verify racking mechanism operation.
- k. Verify compliance with manufacturer's published instructions for lubrication on moving current-carrying parts and on moving and sliding surfaces.
- l. Record as-found and as-left operation counter readings.
- m. Perform a leak test on submersible enclosure in accordance with manufacturer's published data.

2. Electrical Tests:

- a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with network protector closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1.
 - 1) Insulation-resistance values of bus insulation must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than manufacturer's published instructions or Table 100.1.
 - 2) Do not conduct insulation-resistance tests of control wiring until insulation-resistance levels of power circuits are raised above minimum values.
- b. Perform a contact/pole-resistance test. Microhm or DC millivolt drop values must not exceed high levels of normal range as indicated in manufacturer's published data. In absence of manufacturer's published data, investigate values that deviate from adjacent poles or similar protectors by more than 50 percent of lowest value.

3. Perform insulation-resistance tests on all control wiring with respect to ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid-state components or control devices that cannot tolerate applied voltage, follow manufacturer's published instructions.

- a. Minimum insulation-resistance values of control wiring must not be less than 2 MΩ.
- b. Verify current-transformer ratios in accordance with IEEE C57.13.
- c. Measure resistance of each network protector power fuse. Investigate and correct fuse-resistance values that deviate from each other by more than 15 percent.
- d. Measure minimum pickup voltage of motor-control relay. Minimum pickup voltage of motor-control relay must be in accordance with manufacturer's published data, but not more than 75 percent of rated control circuit voltage.
- e. Verify that motor can charge closing mechanism at minimum voltage specified by manufacturer. Minimum operating voltage of motor on closing mechanism must not exceed 75 percent of rated control circuit voltage.
- f. Measure minimum pickup voltage of trip actuator. Trip actuator minimum pickup voltage must not exceed 7.5 percent of rated control circuit voltage. Verify that actuator resets correctly.
- g. Calibrate network protector relays in accordance with "Medium-Voltage Instruments Section" Paragraph, "Overcurrent and Ground-Fault Protective Relays" Subparagraph, specifying microprocessor-based protective relays.
- h. Perform the following operational tests:
 - 1) Verify correct operation of all mechanical and electrical interlocks.
 - 2) Verify trip-free operation.
 - 3) Verify correct operation of auto-open-close control handle.
 - 4) Verify protector will close with voltage on transformer side only.
 - 5) Verify protector will open when source feeder breaker is opened.
- i. Verify phase rotation, phasing, and synchronized operation.

P. Low-Voltage Power Circuit-Breaker Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, and grounding.
- c. Verify that all maintenance devices are available for servicing and operating breaker.
- d. Verify unit is clean.
- e. Verify that arc chutes are intact.
- f. Inspect moving and stationary contacts for condition and alignment.
- g. Verify that primary and secondary contact wipe and other dimensions vital to satisfactory operation of breaker are correct.
- h. Perform mechanical operator and contact alignment tests on both breaker and its operating mechanism in accordance with manufacturer's published data.
- i. Verify cell fit and element alignment.
- j. Verify racking mechanism operation.
- k. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
- l. Perform adjustments for final protective-device settings in accordance with coordination study provided by end user.
- m. Record as-found and as-left operation counter readings.

2. Electrical Tests:

- a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with switch closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.1. Insulation-resistance values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply

with NETA ATS, Table 100.1. Values of insulation resistance less than this table or manufacturer's published instructions must be investigated.

- b. Measure contact resistance across each power contact of circuit breaker. Microhm or DC millivolt drop values must not exceed high levels of normal range as indicated in manufacturer's published data. If manufacturer's published data is not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
- c. Determine long-time pickup and delay by primary current injection. Long-time pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current characteristic tolerance band, including adjustment factors. If manufacturer's curves are not available, trip times must not exceed value shown in NETA ATS, Table 100.7.
- d. Determine short-time pickup and delay by primary current injection. Short-time pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current tolerance band.
- e. Determine ground-fault pickup and delay by primary current injection. Ground-fault pickup values must be as specified, and trip characteristic must not exceed manufacturer's published time-current tolerance band.
- f. Determine instantaneous pickup value by primary current injection. Instantaneous pickup values must be as specified and within manufacturer's published tolerances. In absence of manufacturer's published data, comply with NETA ATS, Table 100.8.
- g. Test functions of trip unit by means of secondary injection. Pickup values and trip characteristic must be as specified and within manufacturer's published tolerances.
- h. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of shunt trip and close coils must conform to manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.20.
- i. Measure fuse resistance. Investigate fuse-resistance values that deviate from each other by more than 15 percent.
- j. Verify correct operation of any auxiliary features, such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free operation, anti-pump function, and trip unit battery condition. Reset trip logs and indicators. Auxiliary features must operate in accordance with manufacturer's published data.
- k. Verify operation of charging mechanism. The charging mechanism must operate in accordance with manufacturer's published data.

Q. Metering Device Field Tests:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect cover gasket, cover glass, condition of spiral spring, disk clearance, contacts, and case shorting contacts, as applicable.
- c. Verify unit is clean.
- d. Verify freedom of movement, end play, and alignment of rotating disk(s).

2. Electrical Tests:

- a. Verify accuracy of meters at cardinal points. Meter accuracy must be in accordance with manufacturer's published data.
- b. Calibrate meters in accordance with manufacturer's published data. Calibration results must be within manufacturer's published tolerances.
- c. Verify instrument multipliers. Instrument multipliers must be in accordance with system design specifications.
- d. Verify that current-transformer and voltage-transformer secondary circuits are intact. Test results must confirm integrity of secondary circuits of current and voltage transformers.

R. Nonconforming Work:

1. Equipment will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

S. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

T. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.4 SYSTEM STARTUP

A. Perform startup service.

1. Complete installation and startup checks in accordance with manufacturer's published instructions.
2. Complete installation and startup checks required by electric utility provider.
3. **<Insert startup steps if any>**.

B. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.

1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.5 ADJUSTING

A. Voltage Monitoring and Adjusting: After Substantial Completion, if requested by Owner, but not more than six months after Final Acceptance, perform the following voltage monitoring:

1. During a period of normal load cycles as evaluated by Owner, perform seven days of three-phase voltage recording at outgoing section of each secondary unit substation. Use voltmeters with calibration traceable to National Institute of Science and Technology standards and with a chart speed of not less than **1 inch (25 mm)** per hour. Voltage unbalance greater than 1 percent between phases, or deviation of any phase voltage from nominal value by more than plus or minus 5 percent during test period, is unacceptable.
2. Corrective Action: If test results are unacceptable, perform the following corrective action, as appropriate:
 - a. Adjust transformer taps.
 - b. Rebalance loads.
 - c. Prepare written request for voltage adjustment by electric utility.
3. Retests: Repeat monitoring, after corrective action has been performed, until satisfactory results are obtained.
4. Report:

- a. Prepare a written report covering monitoring performed and corrective action taken.
 - b. For each relay and adjustable circuit breaker, tag device with adjusting technician's initials and date of adjustment. Record settings and file with test records specified in "Field Quality Control" Article.
- B. Infrared Inspection and Adjusting: Perform survey during periods of maximum possible loading. Remove all necessary covers prior to inspection.
 1. After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of electrical power connections of unit substation.
 2. Follow-up Infrared Scanning: Perform an additional follow-up infrared scan of each switchgear 11 months after date of Substantial Completion.
 3. Instrument: Inspect distribution systems with imaging equipment capable of detecting a minimum temperature difference of **1.8 deg F (1 deg C) at 104 deg F (30 deg C)**.
 4. Record of Infrared Inspection: Prepare a certified report that identifies testing technician and equipment used, and lists the following results:
 - a. Description of equipment to be tested.
 - b. Discrepancies.
 - c. Temperature difference between area of concern and reference area.
 - d. Probable cause of temperature difference.
 - e. Areas inspected. Identify inaccessible and unobservable areas and equipment.
 - f. Identify load conditions at time of inspection.
 - g. Provide photographs and thermograms of deficient area.
 5. Act on inspection results in accordance with recommendations of NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.

3.6 CLEANING

- A. After completing equipment installation and before energizing, inspect unit components. Remove paint splatters and other spots, dirt, and debris. Repair damaged finish to match original finish. Vacuum interiors of secondary unit substation sections.

3.7 CLOSEOUT ACTIVITIES

- A. Training:
 1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to operate normal and emergency electrical systems, including justifications for, and limitations of, protective device settings recommended in coordination study report.
 - b. How to adjust, operate, and maintain secondary unit substation equipment.
 2. **[Provide video recordings of training sessions to Owner.][Allow Owner to record training sessions.]**

3.8 MAINTENANCE

- A. Maintenance Service Agreement: Beginning at Substantial Completion, verify that maintenance service agreement includes **[three month][six month][nine month][one year]<Insert duration>** period for full

maintenance by **[skilled employees of secondary unit substation Installer][manufacturer's authorized service representative]**. Include periodic preventive maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper secondary unit substation equipment operation. Verify that parts and supplies are manufacturer's authorized replacement parts and supplies.

B. Software and Firmware Service Agreement:

1. Technical Support: Beginning at Substantial Completion, verify that software and firmware service agreement includes secondary unit substation equipment software and firmware support for **[two years]<Insert duration>**.
2. Upgrade Service: At Substantial Completion, update software and firmware to latest version. Install and program software and firmware upgrades that become available within **[two years]<Insert duration>** from date of Substantial Completion. **[Verify that upgrading software includes operating system and new or revised licenses for using software.]**
 - a. Upgrade Notice: Not less than **[30 days]<Insert duration>**; to allow Owner to schedule and access the system **[and to upgrade computer equipment if necessary]**.
3. Field Reports for Software and Firmware Upgrades: Prepare and submit report after each update, documenting upgrades installed.

END OF SECTION 26 11 16 11

Task	Specification	Specification Description
26 11 16 11	26 11 16 00	Secondary Unit Substations with Switchboard Secondary

SECTION 26 12 13 00 - LIQUID-FILLED, MEDIUM-VOLTAGE TRANSFORMERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Liquid-filled, medium-voltage substation transformers, with primary and secondary bushings within or without air-terminal enclosures.
2. Control network.
3. Warning labels and signs.

B. Products Furnished, but Not Installed, under This Section:

1. **<Insert products furnished, but not installed>.**

C. Products Installed, but Not Furnished, under This Section:

1. **<Insert products installed, but not furnished>.**

D. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
3. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** for preinstallation conference procedures.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>.**

B. Preinstallation Coordination Meeting(s): For liquid-filled, medium-voltage transformers. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location>** before **<Insert construction activity>.**

1. Attendees: Installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**][, and **Owner's Commissioning Authority**] of scheduled meeting dates.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.
 - a. Include rated capacities, operating characteristics, and furnished specialties and

accessories.

B. Shop Drawings:

1. For liquid-filled, medium-voltage transformers.

a. Include plans and elevations showing major components and features.

1) Include plan view and cross section of equipment base, showing clearances, manufacturer's recommended workspace, and locations of penetrations for grounding and conduits.

b. Include details of equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of field connections.

c. Include single-line diagram.

d. Include list of materials.

e. Include nameplate legends.

C. Field Quality-Control Submittals:

1. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Product Certificates: For transformers, signed by product manufacturer.

B. Source quality-control reports.

PART 2 - PRODUCTS

2.1 OWNER-FURNISHED PRODUCTS

A. Basis for Pricing: **<Insert name of manufacturer; model number or series for product that Owner intends to furnish to Contractor>.**

B. Description: **<Insert description of product, including special features, options, and finishes for Owner-furnished product that may impact Contractor's installation>.**

C. Accessories: **<Insert accessories that will be provided with product>.**

2.2 EXISTING PRODUCTS TO BE MODIFIED

A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**

B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact Work>.**

C. Accessories: **<Insert accessories included with existing product>.**

2.3 EXISTING PRODUCTS TO BE REMOVED AND RE-INSTALLED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact Work>.**
- C. Accessories: **<Insert accessories included with existing product>.**

2.4 LIQUID-FILLED, MEDIUM-VOLTAGE TRANSFORMERS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - 1. **[Eaton]**
 - 2. **[GE Power; General Electric Company]**
 - 3. **[Prolec GE; A Xignux and General Electric Company Joint Venture]**
 - 4. **[Siemens Industry, Inc., Energy Management Division]**
 - 5. **[Square D; Schneider Electric USA]**
 - 6. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[Eaton]**
 - 2. **[GE Power; General Electric Company]**
 - 3. **[Prolec GE; A Xignux and General Electric Company Joint Venture]**
 - 4. **[Siemens Industry, Inc., Energy Management Division]**
 - 5. **[Square D; Schneider Electric USA]**
 - 6. **<Insert manufacturer's name>**

2.5 SYSTEM DESCRIPTION

- A. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Comply with IEEE C2.
- C. Comply with IEEE C57.12.00.

2.6 PERFORMANCE REQUIREMENTS

- A. Windings Material: **[Aluminum][Copper]**.
- B. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, connected in each phase of incoming circuit and ahead of disconnecting device.
- C. Winding Connections: Connection of windings and terminal markings must comply with IEEE C57.12.70.

- D. Efficiency: Comply with 10 CFR 431, Subpart K.
- E. Insulation:
 - 1. Transformer kVA Rating[, **when Indicated at 65 deg C Rise,**] Must Be as Follows: Average winding temperature rise above ambient temperature must not exceed 65 deg C and 80 deg C hottest-spot temperature rise at rated kVA when tested in accordance with IEEE C57.12.90, using combination of connections and taps that give highest average winding temperature rise.
 - 2. Transformer kVA Rating[, **when Indicated at 55/65 deg C Rise,**] Must Be as Follows: Average winding temperature rise above ambient temperature must not exceed 55 deg C, based on average ambient temperature of 30 deg C over 24 hours with maximum ambient temperature of 40 deg C. Insulation system must be rated to continuously allow additional 12-percent kVA output, at 65 deg C temperature rise, without decreasing rated transformer life. Rating must conform to requirements of IEEE C57.12.90.
- F. Bushings must comply with IEEE C57.19.01 requirements for impulse and low-frequency insulation levels.
- G. Tap Changer: External, for de-energized operation.
- H. Tank: Sealed, with welded-on cover. [**Designed to withstand internal pressure of not less than 7 psi (50 kPa) without permanent distortion and 15 psig (104 kPa) without rupture. Comply with IEEE C57.12.36.**]
- I. Mounting: Integral skid mounting frame, suitable to allow skidding or rolling of transformer in any direction, and with provision for anchoring frame to pad.
- J. Insulating Liquids:
 - 1. Mineral Oil: ASTM D3487, Type II, and tested for compliance with ASTM D117.
 - 2. Less-Flammable Liquids:
 - a. Edible-Seed-Oil-Based Dielectric: Listed and labeled by qualified electrical testing laboratory recognized by authorities having jurisdiction as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic, having passed Organisation for Economic Co-operation and Development G.L.203 with zero mortality, and must be certified by U.S. Environmental Protection Agency as biodegradable, meeting Environmental Technology Verification requirements.
 - b. Biodegradable and Nontoxic Dielectric: Listed and labeled by qualified electrical testing laboratory recognized by authorities having jurisdiction as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92.
 - c. Silicone-Based Dielectric: Listed and labeled by qualified electrical testing laboratory recognized by authorities having jurisdiction as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must have low toxicity and be nonhazardous.
- K. Sound level must comply with NEMA TR 1 requirements.
- L. Capacities and Characteristics:
 - 1. Location: [**Indoors**][**Outdoors**].
 - 2. Additional Standards: Comply with [**IEEE C57.12.10**][**IEEE C57.12.36**].

- a. Comply with **[IEEE C57.12.10][IEEE C57.12.36]**.
 - b. Comply with UL 1062 listing requirements.
 - c. Comply with FM Global Class No. 3990.
 - d. Comply with UL listing requirements for combination classification and listing for transformer and less-flammable insulating liquid.
3. Connections:
 - a. Primary: **[Air-filled terminal cabinet for cable connection][Throat for busway connection][Terminals for close connection to primary switch][Open wire]**.
 - b. Secondary: **[Air-filled terminal cabinet for cable connection][Throat for busway connection][Open wire]**.
4. Transformer Ratings. Comply with IEEE C57.12.00 for cooling class.
 - a. Self-Cooled Rating, Class **<Insert letters>**: **<Insert number>** kVA.
 - b. Future Forced-Air-Cooled Rating, Class **<Insert letters>**:
 - 1) Self-Cooled: **<Insert number>** kVA.
 - 2) Forced-Air Cooled: **<Insert number>** kVA.
 - 3) Make provision for future addition of forced-air-cooling equipment. Transformer bushings, leads, and related components must be sized for future equipment. Provide fan mounts, conduit supports, and terminal boxes.
 - c. Forced-Air-Cooled Rating, Class **<Insert letters>**:
 - 1) Self-Cooled: **<Insert number>** kVA.
 - 2) Forced-Air Cooled: **<Insert number>** kVA.
 - 3) Equip with forced-air-cooling equipment, including fans, conduit, wiring, motor controllers, and top liquid thermometer for fan control.
 - d. Impedance: Not less than **[5.75]<Insert number>** percent.
 - e. Temperature Rise: **[65 deg C][55/65 deg C]**.
 - f. Coils Connection:
 - 1) Line-Side Winding: **[Delta]<Insert connection>**.
 - 2) Load-Side Winding: **[Wye]<Insert connection>**.
 - g. Voltage and BIL Ratings:
 - 1) Nominal primary phase-to-phase voltage and BIL: **[4160 V, 60 kV][13 800 V, 95 kV][34 500 V, 125 kV]<Insert requirements>**.
 - 2) Nominal secondary voltage and BIL: **[208Y/120 V, 45 kV][480Y/277 V, 45 kV]<Insert requirements>**.
 - h. K-Factor: **<Insert number>**, complying with UL 1561.
5. Finish:
 - a. Outdoor Transformer Enclosure Finish: Factory-applied finish in manufacturer's standard color, corrosion resistance complying with IEEE C57.12.28.
 - b. Indoor Transformer Enclosure Finish: Factory-applied finish in manufacturer's standard gray over rust-inhibiting primer on treated metal surface.
 - c. Special Corrosion-Resistant Enclosure Finish: Factory-applied, corrosion-resistant finish in manufacturer's standard color that withstands **[120][480]** hours of exposure to salt-spray test specified in ASTM B117 without loss of paint or release of adhesion of paint primer

coat to metal surface in excess of **1/16 inch (2 mm)** from test mark. Scribed test mark and test evaluation must be in accordance with ASTM D1654 with rating of not less than 7, in accordance with Table 1 (Procedure A). Cut edges or otherwise damaged surfaces of hot-dip galvanized sheet steel, or mill-galvanized sheet steel must be coated with manufacturer's standard zinc-rich paint.

6. Taps: Two 2-1/2 percent, full-capacity taps above, and two 2-1/2 percent, full-capacity taps below rated voltage. Comply with IEEE C57.12.36 requirements.
7. Transformer Accessories:
 - a. Drain and filter connection.
 - b. Filling and top filter press connections.
 - c. Pressure-vacuum gauge.
 - d. Dial-type analog thermometer with alarm contacts.
 - e. Magnetic liquid level indicator with high and low alarm contacts.
 - f. Pressure-relief device set to operate at 10 psig, plus or minus 2 psig, and then automatically reseal when pressure drops to 6 psig minimum. Device flow must be as recommended by manufacturer. With alarm contacts and manual bleeder.
 - g. At least four stainless steel ground connection pads.
 - h. Provisions for jacking, lifting, and towing.
 - i. Machine-engraved nameplate made of anodized aluminum or stainless steel.
 - j. Sudden pressure relay for remote alarm or trip when internal transformer pressure rises at field-set rate. Provide **[with][without]** seal-in delay.

2.7 CONTROL NETWORK

- A. Controllers: Support serial MS/TP and Ethernet IP communications, and able to communicate directly via RS-485 serial networks and Ethernet 10Base-T networks as native device.

2.8 WARNING LABELS AND SIGNS

- A. Comply with requirements for labels and signs specified in Section 260553 "Identification for Electrical Systems."
 1. Warning signs must be made of baked enamel.
 2. Equipment Identification Labels: **[Engraved, laminated-acrylic or -melamine label][Stenciled legend 4 inch (100 mm) high]**.

2.9 SOURCE QUALITY CONTROL

- A. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
- B. Testing Administrator: **[Owner will engage][Engage]** qualified testing agency to evaluate liquid-filled, medium-voltage transformer.
- C. Testing: Test and inspect liquid-filled, medium-voltage transformer in accordance with IEEE C57.12.90.
- D. Factory Tests and Inspections: Perform the following tests and inspections on liquid-filled, medium-voltage transformer, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance on

control units.

1. Resistance.
2. Turns ratio, polarity, and phase relation.
3. Transformer no-load losses and excitation current at 100 percent of ratings.
4. Transformer impedance voltage and load loss.
5. Operation of devices.
6. Control (auxiliary) and consumption losses.
7. Lightning impulse.
8. Low frequency.
9. Leak.
10. Transformer no-load losses and excitation current at 110 percent of ratings.
11. Insulation power factor.
12. Applied potential.
13. Induced potential.
14. Resistance measurements of windings on rated voltage connection and at tap extreme connections.
15. Ratios on rated voltage connection and at tap extreme connections.
16. Polarity and phase relation on rated voltage connection.
17. No-load loss at rated voltage on rated voltage connection.
18. Exciting current at rated voltage on rated voltage connection.
19. Impedance.

E. Nonconforming Work:

1. System equipment that does not pass tests and inspections will be considered defective.

F. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine liquid-filled, medium-voltage transformers upon delivery.

1. Upon delivery of transformers and prior to unloading, inspect equipment for damage that may have occurred during shipment or storage.
2. Verify that tie rods and chains are undamaged and tight, and that blocking and bracing is tight. Verify that there is no evidence of load shifting in transit, and that readings from transportation shock recorders, if equipped, are within manufacturer's recommendations.
3. Verify that there is no indication of external damage and no dents or scratches in doors and sill, tank walls, radiators and fins, or termination provisions.
4. Verify that there is no evidence of insulating-liquid leakage on transformer surfaces, at weld seams, on line- or load-side bushing parts, and at transformer base.
5. Verify that there is positive pressure or vacuum on tank. Check pressure gauge; it is required to read other than zero.
6. Compare transformers and accessories received with bill of materials to verify that shipment is complete. Verify that transformers and accessories conform with manufacturer's quotation and shop drawings. If shipment is incomplete or does not comply with Project requirements, notify manufacturer in writing immediately.
7. Verify presence of polychlorinated biphenyl content labeling.
8. Unload transformers carefully, observing packing label warnings and handling instructions.
9. Open termination compartment doors and inspect components for damage or displaced parts, loose or broken connections, cracked or chipped insulators, bent mounting flanges, dirt or foreign

material, and water or moisture.

B. Handling:

1. Handle transformers carefully, in accordance with manufacturer recommendations, to avoid damage to enclosure, termination compartments, base, frame, tank, and internal components. Do not subject transformers to impact, jolting, jarring, or rough handling.
2. Protect transformer termination compartments against entrance of dust, rain, and snow.
3. Transport transformers upright, to avoid internal stresses on core and coil mounting assembly and to prevent trapping air in windings. Do not tilt or tip transformers.
4. Verify that transformer weights are within rated capacity of handling equipment.
5. Use only manufacturer-recommended points for lifting, jacking, and pulling. Use lifting lugs when lifting transformers.
6. Use jacks only at corners of tank base plate.
7. Use nylon straps of same length to balance and distribute weight when handling transformers with crane.
8. Use spreaders or lifting beam to obtain vertical lift and to protect transformer from straps bearing against enclosure. Lifting cable pull angles may not be greater than 15 degrees from vertical.
9. Exercise care not to damage tank base structure when handling transformer using skids or rollers. Use skids to distribute stresses over tank base when using rollers under large transformers.

C. Storage:

1. Store transformers in accordance with manufacturer's recommendations.
2. Transformers may be stored outdoors. If possible, store transformers at final installation locations on concrete pads. If dry concrete surfaces are unavailable, use pallets of adequate strength to protect transformers from direct contact with ground. Ensure transformer is level.
3. Ensure that transformer storage location is clean and protected from severe conditions. Protect transformers from dirt, water, contamination, and physical damage. Do not store transformers in presence of corrosive or explosive gases. Protect transformers from weather when stored for more than three months.
4. Store transformers with compartment doors closed.
5. Regularly inspect transformers while in storage and maintain documentation of storage conditions, noting discrepancies or adverse conditions. Verify that effective pressure seal is maintained using pressure gauges. Visually check for insulating-liquid leaks and rust spots.

D. Examine areas and space conditions for compliance with requirements for liquid-filled, medium-voltage transformers and other conditions affecting performance of the Work.

E. Examine roughing-in of conduits and grounding systems to verify the following:

1. Wiring entries comply with layout requirements.
2. Entries are within conduit-entry tolerances specified by manufacturer, and no feeders will cross section barriers to reach load or line lugs.

F. Examine walls, floors, roofs, and concrete bases for suitable conditions for transformer installation.

G. Pre-Installation Checks:

1. Verify removal of shipping bracing after placement.
2. Remove sample of insulating liquid in accordance with ASTM D923. Insulating-liquid values must comply with NETA ATS, Table 100.4. Sample must be tested for the following:
 - a. Dielectric Breakdown Voltage: ASTM D877 or ASTM D1816.

- b. Acid Neutralization Number: ASTM D974.
 - c. Specific Gravity: ASTM D1298.
 - d. Interfacial Tension: ASTM D971.
 - e. Color: ASTM D1500.
 - f. Visual Condition: ASTM D1524.
 - g. Water in Insulating Liquids: ASTM D1533.
 - h. Power Factor or Dissipation Factor: ASTM D924.
- H. Verify that ground connections are in place and that requirements in Section 260526 "Grounding and Bonding for Electrical Systems" have been met. Maximum ground resistance must be 5Ω at transformer location.
- I. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

- A. Install transformers on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 260529 "Hangers and Supports for Electrical Systems."
- B. Transformer must be installed level and plumb and must tilt less than 1.5 degrees while energized.
- C. Comply with requirements for vibration isolation and seismic control devices specified in Section 260529 "Hangers and Supports for Electrical Systems" and **[Section 260548 "Vibration and Seismic Controls for Electrical Systems."][Section 260548.16 "Seismic Controls for Electrical Systems."]**
- D. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's written instructions and NFPA 70.

3.3 CONNECTIONS

- A. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."
 - 1. At Interior Locations: For grounding to grounding electrodes, use bare copper cable not smaller than 4/0 AWG. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors. Keep leads as short as practicable, with no kinks or sharp bends. Make joints in grounding conductors and loops by exothermic weld or compression connector.
 - 2. At Exterior Locations:
 - a. For counterpoise, use tinned bare copper cable not smaller than 4/0 AWG, buried not less than **30 inch (765 mm)** below grade interconnecting grounding electrodes. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors. Keep lead lengths as short as practicable, with no kinks or sharp bends.
 - b. Fence and equipment connections must not be smaller than 4 AWG. Ground fence at gate post and corner post and at intervals not exceeding **10 ft (3 m)**. Bond gate section to fence post using **1/8 by 1 inch (3 by 25 mm) [tinned]** flexible braided copper strap and clamps.
 - c. Make joints in grounding conductors and loops by exothermic weld or compression connector.
 - 3. Terminate grounding and bonding conductors on common equipment grounding terminal on transformer enclosure. Install supplemental terminal bars, lugs, and bonding jumpers as required to accommodate number of conductors for termination.

4. Complete transformer tank grounding and lightning arrester connections prior to making other electrical connections.

B. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

1. Maintain air clearances between energized live parts and between live parts and ground for exposed connections in accordance with manufacturer recommendations.
2. Bundle associated phase, neutral, and equipment grounding conductors together within transformer enclosure. Arrange conductors such that there is not excessive strain that could cause loose connections. Allow adequate slack for expansion and contraction of conductors.

C. Terminate medium-voltage cables in incoming section of substations in accordance with Section 260513 "Medium-Voltage Cables."

3.4 SIGNS AND LABELS

A. Comply with installation requirements for labels and signs specified in Section 260553 "Identification for Electrical Systems."

B. Install warning signs as required to comply with 29 CFR 1910.269.

3.5 FIELD QUALITY CONTROL

A. **[Acceptance]**Testing Preparation:

1. **<Insert requirements>**.

B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

C. Tests and Inspections:

1. General Field-Testing Requirements:

- a. Comply with provisions of "Testing and Test Methods" Chapter in NFPA 70B.
- b. Perform visual and mechanical inspection and electrical test. Certify compliance with test parameters.
- c. After installing transformer but before primary is energized, verify that grounding system at substation is tested at specified value or less.
- d. After installing transformer and after electrical circuitry has been energized, test for compliance with requirements.
- e. Visual and Mechanical Inspection:

- 1) Verify equipment nameplate data complies with Contract Documents.
- 2) Inspect bolted electrical connections for high resistance using one of the following two methods:

- a) Use low-resistance ohmmeter to compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
- b) Verify tightness of accessible bolted electrical connections by calibrated

torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.

2. Medium-Voltage Surge Arrester Field Tests:

a. Visual and Mechanical Inspection:

- 1) Inspect physical and mechanical condition.
- 2) Inspect anchorage, alignment, grounding, and clearances.
- 3) Verify arresters are clean.
- 4) Verify that ground lead on device is individually attached to ground bus or ground electrode.
- 5) Verify that stroke counter is correctly mounted and electrically connected if applicable. Record stroke counter reading.

b. Electrical Test:

- 1) Perform insulation-resistance test on arrester, phase terminal-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Replace units that fail to comply with recommended minimum insulation resistance listed in that table.
- 2) Perform watts-loss test. Evaluate watts-loss values by comparison with similar units and test equipment manufacturer's published data.

3. Liquid-Filled Transformer Field Tests:

a. Visual and Mechanical Inspection:

- 1) Test dew point of tank gases if applicable.
- 2) Inspect anchorage, alignment, and grounding.
- 3) Verify bushings are clean.
- 4) Verify that alarm, control, and trip settings on temperature and level indicators are set and operate within manufacturer's recommended settings.
- 5) Verify that cooling fans and pumps operate correctly and have appropriate overcurrent protection.
- 6) Verify that liquid level in tanks and bushings is within manufacturer's published tolerances.
- 7) Perform specific inspections and mechanical tests recommended by manufacturer.
- 8) Verify presence of transformer surge arresters and that their ratings are as specified.
- 9) Verify that as-left tap connections are as specified.
- 10) Verify presence of surge arresters and that their ratings are as specified.

b. Electrical Tests:

- 1) Perform insulation-resistance tests winding-to-winding and winding-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index must not be less than 1.0.
- 2) Perform power-factor or dissipation-factor tests on windings in accordance with test equipment manufacturer's published data. Maximum winding insulation power-factor/dissipation-factor values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.3.

- 3) Measure core insulation resistance at 500 V(dc) if core is insulated and core ground strap is removable. Core insulation-resistance values must not be less than 1 M Ω at 500 V(dc).
- 4) Perform power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV.
- 5) Perform turns-ratio tests at tap positions. Turns-ratio test results must not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- 6) Perform excitation-current test on each phase. Typical excitation-current test data pattern for three-legged core transformer is two similar current readings and one lower current reading. Investigate and correct if test shows different pattern.
- 7) Measure resistance of winding at tap connection, and record temperature-corrected winding-resistance values in Operations and Maintenance Manual.
- 8) Perform applied-voltage test on high- and low-voltage windings-to-ground. Comply with IEEE C57.12.91, Sections 10.2 and 10.9.
- 9) Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.
- 10) Remove sample of insulating liquid in accordance with ASTM D923, and perform dissolved-gas analysis in accordance with IEEE C57.104 or ASTM D3612.

D. Nonconforming Work:

1. Equipment and devices will be considered defective if they do not pass tests and inspections.
2. Remove and replace malfunctioning units and retest.

E. Assemble and submit test and inspection reports. Record as-left set points of adjustable devices.

F. Manufacturer Services:

1. Engage factory-authorized service representative to [support][supervise] field tests and inspections.

3.6 MAINTENANCE

A. Voltage Monitoring and Adjusting: After Substantial Completion, if requested by Owner, but not more than six months after Final Acceptance, perform the following voltage monitoring:

1. During period of normal load cycles as evaluated by Owner, perform seven days of three-phase voltage recording at outgoing section of transformer. Use voltmeters with calibration traceable to National Institute of Science and Technology standards and with chart speed of not less than **1 inch (25 mm)** per hour. Voltage unbalance greater than 1 percent between phases, or deviation of phase voltage from nominal value by more than plus or minus 5 percent during test period, is unacceptable.
2. Corrective Action: If test results are unacceptable, perform the following corrective action, as appropriate:
 - a. Adjust transformer taps.
 - b. Prepare written request for voltage adjustment by electric utility.
3. Retests: Repeat monitoring, after corrective action is performed, until satisfactory results are obtained.
4. Report:
 - a. Prepare written report covering monitoring performed and corrective action taken.

- B. Infrared Inspection: Perform survey during periods of maximum possible loading. Remove necessary covers prior to inspection.
1. After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of transformer's electrical power connections.
 2. Instrument: Inspect distribution systems with imaging equipment capable of detecting minimum temperature difference of 1 deg C at 30 deg C.
 3. Record of Infrared Inspection: Prepare certified report that identifies testing technician and equipment used, and lists results as follows:
 - a. Description of equipment to be tested.
 - b. Discrepancies.
 - c. Temperature difference between area of concern and reference area.
 - d. Probable cause of temperature difference.
 - e. Areas inspected. Identify inaccessible and unobservable areas and equipment.
 - f. Identify load conditions at time of inspection.
 - g. Provide photographs and thermograms of deficient area.
 4. Act on inspection results in accordance with recommendations of NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 12 16 00 - DRY-TYPE, MEDIUM-VOLTAGE TRANSFORMERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Dry-type, medium-voltage transformers.

B. Products Installed, but Not Furnished, under This Section:

1. **<Insert products identified in "Existing Products to be Modified" or "Existing Products to be Removed and Reinstalled" Article>.**

C. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** for preinstallation conference procedures.
5. Section 260513 "Medium-Voltage Cables" specifies installation of medium-voltage cables.
6. Section 260519 "Low-Voltage Electrical Power Conductors and Cables" specifies installation of low-voltage wiring.
7. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
8. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
9. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic control devices referenced by this Section.
10. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
11. Section 260573 "Power System Studies" specifies arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.

1.2 DEFINITIONS

A. VPE: Vacuum Pressure Encapsulation.

B. VPI: Vacuum Pressure Impregnation.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>**.

- B. Preinstallation Coordination Meeting(s): For dry-type, medium-voltage transformers. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location> before <Insert construction activity>.**
1. Attendees: Installers, fabricators, representatives of manufacturers, and administrants for field tests and inspections. Notify Architect[, **Construction Manager**][, and **Owner's Commissioning Authority**] of scheduled meeting dates.

1.4 ACTION SUBMITTALS

- A. Product Data: For each type of product.
1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.
 2. Product Certificates: Include product certificate stating compliance with IEEE C57.16, signed by manufacturer or fabricator.
- B. Factory test reports.
- C. Shop Drawings: Prepare and submit the following:
1. Include plans and elevations showing major components and features.
 - a. Include plan view and cross section of equipment base, showing clearances, manufacturer's recommended workspace, and locations of penetrations for grounding and conduits.
 2. Include details of equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of field connections.
 3. Include single-line diagram.
 4. Include list of materials.
 5. Include nameplate legends.
- D. Sustainable Design Submittals:
1. Product data for sustainable design features for each type of product.
- E. Field quality-control reports.

1.5 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.

**B. Field Reports:**

1. Manufacturer's field reports for field quality-control support.
2. Field reports for voltage monitoring and adjusting.
3. Field reports for infrared scanning.

1.6 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, conduct tests of complex equipment, analyze test and equipment data, plan a job, and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

1.7 DELIVERY, STORAGE, AND HANDLING**A. Delivery:**

1. Upon delivery of transformers and prior to unloading, inspect equipment for damage that may have occurred during shipment or storage.
2. Verify that tie rods and chains are undamaged and tight, and that blocking and bracing is tight. Verify that there is no evidence of load shifting in transit, and that readings from transportation shock recorders, if equipped, are within manufacturer's recommendations.
3. Verify that there is no indication of external damage and no dents or scratches in doors and sill, tank walls, radiators and fins, or termination provisions.
4. Compare transformers and accessories received with bill of materials to verify that shipment is complete. Verify that transformers and accessories conform with manufacturer's quotation and shop drawings. If shipment is incomplete or does not comply with Project requirements, notify manufacturer in writing immediately.
5. Unload transformers carefully, observing packing label warnings and handling instructions.
6. Open termination compartment doors and inspect components for damage or displaced parts, loose or broken connections, cracked or chipped insulators, bent mounting flanges, dirt or foreign material, and water or moisture.

B. Storage:

1. Store transformers in accordance with manufacturer's recommendations.
2. Transformers may be stored outdoors. If possible, store transformers at final installation locations on concrete pads. If dry concrete surfaces are unavailable, use pallets of adequate strength to protect transformers from direct contact with ground. Ensure transformer is level.
3. Ensure that transformer storage location is clean and protected from severe conditions. Protect transformers from dirt, water, contamination, and physical damage. Do not store transformers in presence of corrosive or explosive gases. Protect transformers from weather when stored for more than three months.

4. Store transformers with compartment doors closed.
5. Regularly inspect transformers while in storage and maintain documentation of storage conditions, noting discrepancies or adverse conditions. Visually check for rust spots.

C. Handling:

1. Handle transformers carefully, in accordance with manufacturer recommendations, to avoid damage to enclosure, termination compartments, base, frame, and internal components. Do not subject transformers to impact, jolting, jarring, or rough handling.
2. Protect transformer against entrance of dust, rain, and snow.
3. Transport transformers upright, to avoid internal stresses on core and coil mounting assembly and transformer case.
4. Verify that transformer weights are within rated capacity of handling equipment.
5. Use only manufacturer-recommended points for lifting, jacking, and pulling. Use lifting lugs when lifting transformers.
6. Use jacks only at corners of base plate of transformer case.
7. Use nylon straps of same length to balance and distribute weight when handling transformers with crane.
8. Use spreaders or lifting beam to obtain vertical lift and to protect transformer from straps bearing against enclosure. Lifting cable pull angles may not be greater than 15 degrees from vertical.
9. Exercise care not to damage base structure of case when handling transformer using skids or rollers. Use skids to distribute stresses over case base when using rollers under large transformers.

1.8 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Modeling, analysis, product selection, installation, and quality control for all electrical Work on the Project must comply with service condition requirements specified in Section 018116 "Facility Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria."
- B. Usual Service Conditions: Unless unusual service conditions have been specified in "General Environmental Conditions," "Outdoor Conditions," and "Indoor Conditions" articles of Section 018116 "Facility Environmental Requirements," electrical service and distribution equipment must be suitable for operation under usual service conditions specified in applicable IEEE C57 series standards.

PART 2 - PRODUCTS

2.1 EXISTING PRODUCTS TO BE MODIFIED

- A. Basis for Pricing: **<Insert name of manufacturer and model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>.**
 1. Sustainable Design Features:
 - a. Material Reuse: Product is salvaged, refurbished, or reused.
- C. Accessories: **<Insert accessories included with existing product>.**

2.2 EXISTING PRODUCTS TO BE REMOVED AND REINSTALLED

- A. Basis for Pricing: **<Insert name of manufacturer and model number or series for existing product>**.
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>**.
 - 1. Sustainable Design Features:
 - a. Material Reuse: Product is salvaged, refurbished, or reused.
- C. Accessories: **<Insert accessories included with existing product>**.

2.3 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.4 MEDIUM-VOLTAGE TRANSFORMERS

- A. Source Quality Control:
 - 1. Factory Tests:
 - a. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
 - b. Testing Administrant: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate transformer.
 - c. Factory Tests and Inspections: Perform the following tests and inspections on transformer by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with IEEE C57.16 before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.
 - 1) Tests for Transformers 500 kVA and Smaller:
 - a) Turns ratio, polarity, and phase relation on rated voltage connection.
 - b) Transformer no-load losses and excitation current at 100 percent of ratings. This test may be based on a statistical sample.
 - c) Applied voltage and induced voltage.
 - d) Partial discharge.
 - e) Impedance voltage and load loss at rated current and rated frequency on rated voltage connection and at tap extremes.
 - f) Temperature rise at minimum and maximum ratings.
 - g) Impulse.
 - h) Insulation power factor.
 - i) Insulation resistance.
 - j) Audible sound level.
 - k) Short-circuit capability.
 - l) Operation of devices.
 - m) Control (auxiliary) and consumption loss data values.
 - 2) Tests for Transformers 501 kVA and Larger:

- a) Resistance measurements of windings on rated voltage tap and at tap extremes.
 - b) Turns ratio, polarity, and phase relation on rated voltage connection.
 - c) Transformer no-load losses and excitation current at 100 percent of ratings.
 - d) Impedance voltage and load loss at rated current and rated frequency on rated voltage connection and at tap extremes.
 - e) Applied voltage and induced voltage.
 - f) Partial discharge.
 - g) Leak test.
 - h) Temperature rise at minimum and maximum ratings.
 - i) Impulse.
 - j) Insulation power factor.
 - k) Insulation resistance.
 - l) Audible sound level.
 - m) Short-circuit capability.
 - n) Operation of devices.
 - o) Control (auxiliary) and consumption loss data values.
- d. Nonconforming Work:
- 1) Equipment that does not pass tests and inspections will be considered defective.
- e. Factory Test Reports: Compile and submit factory test and inspection reports.

B. Dry-Type, Medium-Voltage Transformers :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[GE Power; General Electric Company]**
 - d. **[Hammond Power Solutions Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[GE Power; General Electric Company]**
 - d. **[Hammond Power Solutions Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Transformers, Distribution, Dry Type, Over 600 V: UL CCN XPFS; including UL 1562 or IEEE C57.16.

4. Standard Features:

- a. Referenced Standards: IEEE C2 and IEEE C57.16.
- b. Windings Material: **[Aluminum][Copper]**.
- c. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, connected in each phase of incoming circuit and ahead of disconnecting device.
- d. Cooling Systems: Comply with IEEE C57.12.01 for cooling class.
 - 1) Self-Cooled Rating, Class **<Insert letters>**: **<Insert number>** kVA.
 - 2) Future Forced-Air-Cooled Rating, Class **<Insert letters>**:
 - a) Self-Cooled: **<Insert number>** kVA.
 - b) Forced-Air Cooled: **<Insert number>** kVA.
 - c) Make provision for future addition of forced-air-cooling equipment. Transformer bushings, leads, and related components must be sized for future equipment. Provide fan mounts, conduit supports, and terminal boxes.
 - 3) Forced-Air-Cooled Rating, Class **<Insert letters>**:
 - a) Self-Cooled: **<Insert number>** kVA.
 - b) Forced-Air Cooled: **<Insert number>** kVA.
 - c) Equip with forced-air-cooling equipment, including fans, conduit, wiring, motor controllers, and thermometer with alarm contacts for fan control.
 - d) Forced-air cooling must be regulated automatically by sensors placed in load-side winding's air ducts. Forced-air cooling must include three-phase electronic digital temperature monitor, fans, control wiring, control panel with test switch, indicating lights, alarm, and alarm silencing switch. **[Connect to control network.]**
- e. Coils Insulation Systems:
 - 1) Primary and secondary coil assemblies must be manufactured using polyester VPI system.
 - 2) Primary and secondary coil assemblies must be manufactured using silicone resin VPE system.
 - 3) Primary coil assembly must be manufactured using **<Insert system description>**. Secondary coil assembly must be manufactured using **<Insert system description>**.
- f. Winding Connections: Connection of windings and terminal markings must comply with IEEE C57.12.70.
- g. Efficiency: Comply with 10 CFR 431, Subpart K.
- h. Bushings must comply with IEEE C57.19.01 requirements for impulse and low-frequency insulation levels.
- i. Tap Changer: External, for de-energized operation.
 - 1) Taps: Two 2-1/2 percent, full-capacity taps above and two 2-1/2 percent, full-capacity taps below rated voltage. Comply with IEEE C57.12.36 requirements.
- j. Enclosure:
 - 1) Provide with provisions for lifting and anchoring frame to concrete pad.
 - 2) With integral skid-mounting frame, suitable to allow skidding or rolling of transformer

- in any direction.
- 3) Enclosure Finish:
 - a) Outdoor Transformer Enclosure Finish: Factory-applied finish in manufacturer's standard color, corrosion resistant complying with IEEE C57.12.28.
 - b) Indoor Transformer Enclosure Finish: Factory-applied finish in manufacturer's standard gray over rust-inhibiting primer on treated metal surface.
 - c) Special Corrosion-Resistant Enclosure Finish: Factory-applied, corrosion-resistant finish in manufacturer's standard color that withstands [120][480] hours of exposure to salt-spray test specified in ASTM B117 without loss of paint or release of adhesion of paint primer coat to metal surface in excess of **1/16 inch (1.6 mm)** from test mark. Scribed test mark and test evaluation must be in accordance with ASTM D1654 with rating of not less than 7 in accordance with Table 1 (Procedure A). Cut edges or otherwise damaged surfaces of hot-dip galvanized sheet steel, or mill-galvanized sheet steel must be coated with manufacturer's standard zinc-rich paint.
- k. Sound level must comply with requirements of NEMA TR 1.
- l. Capacities and Characteristics:
 - 1) Enclosure: **[Ventilated][Nonventilated]** power transformer, UL 50E **[Type 1][Type 2][Type 3R]** enclosure.
 - 2) Additional IEEE Standards: Comply with IEEE C57.12.51.
 - 3) Connections:
 - a) Primary: **[Air-filled terminal cabinet for cable connection][Throat for busway connection][Terminals for close connection to primary switch]**.
 - b) Secondary: **[Air-filled terminal cabinet for cable connection][Throat for busway connection]**.
 - 4) Transformer Ratings.
 - a) Impedance: Not less than **[5.75]<Insert number>** percent.
 - b) Temperature Rise: **[150 deg C]<Insert deg C>**.
 - 5) Coils Connection:
 - a) Line-Side Winding: **[Delta]<Insert connection>**.
 - b) Load-Side Winding: **[Wye]<Insert connection>**.
 - 6) Voltage and BIL Ratings:
 - a) Nominal primary phase-to-phase voltage and BIL: **[4160 V, 30 kV][13 800 V, 60 kV][34 500 V, 150 kV]<Insert requirements>**.
 - b) Nominal secondary voltage and BIL: **[208Y/120 V, 10 kV][480Y/277 V, 10 kV]<Insert requirements>**.
 - c) K-Factor: **<Insert number>**, complying with UL 1562.
 - 7) Taps: Two 2-1/2 percent, full-capacity taps above and two 2-1/2 percent, full-capacity taps below rated voltage. Comply with IEEE C57.12.51 requirements.
 - 8) Transformer Accessories:
 - a) Dial-type analog thermometer with alarm contacts.
 - b) At least four stainless steel ground connection pads.

- c) Provisions for jacking, lifting, and towing.
 - d) Machine-engraved nameplate made of anodized aluminum or stainless steel.
- 9) Heaters: Where outdoor cast-coil transformers are indicated on Drawings, they must include thermostatically controlled space heaters powered from **[external source that remains energized when transformer is de-energized][a fused control power transformer connected to primary side of substation transformer]**.
- m. Control Network: Support serial MS/TP and Ethernet IP communications, and able to communicate directly via TIA-485 serial networks and Ethernet 10Base-T networks as native device.
- 5. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
 - a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational after seismic events**].
 - b. Component Importance Factor (Ip): **[1.0][1.5]**.
 - c. Component Amplification Factor (ap): **[1.0]<Insert value>**.
 - d. Component Response Modification Factor (Rp): **[2.5]<Insert value>**.
 - e. Component Overstrength Factor (Ωo): **[2.5]<Insert value>**.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and space conditions for compliance with requirements for dry-type, medium-voltage transformers and other conditions affecting performance of the Work.
- B. Examine roughing-in of conduits and grounding systems to verify the following:
 - 1. Wiring entries comply with layout requirements.
 - 2. Entries are within conduit-entry tolerances specified by manufacturer, and no feeders may cross section barriers to reach load or line lugs.
- C. Examine walls, floors, roofs, and concrete bases for suitable conditions for transformer installation.
- D. Pre-Installation Checks:
 - 1. Verify removal of shipping bracing after placement.
- E. Verify that grounding and bonding connections are in place. Ground (earth) resistance at transformer location may not be greater than **[5 Ω]<Insert resistance in ohms>**.
- F. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF TRANSFORMERS

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the

Contract Documents or manufacturer's published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Maintenance: NFPA 70B.
3. Electrical Safety: NFPA 70E.
4. Commissioning of Electrical Systems: NECA NEIS 90.
5. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
6. Communications Work: BICSI N1.
7. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
8. Work in Confined Spaces: NFPA 350.
9. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
10. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Transformer must be installed level and plumb and must tilt less than 1.5 degrees while energized.
2. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's published instructions and NFPA 70.
3. Grounding and Bonding:
 - a. At Interior Locations: For grounding to grounding electrodes, provide bare copper cable not smaller than 4/0 AWG. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors. Keep leads as short as practicable, with no kinks or sharp bends. Make joints in grounding conductors and loops by exothermic weld or compression connector.
 - b. At Exterior Locations:
 - 1) For counterpoise, provide tinned bare copper cable not smaller than 4/0 AWG, buried not less than **30 inch (765 mm)** below grade interconnecting grounding electrodes. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors. Keep lead lengths as short as practicable, with no kinks or sharp bends.
 - 2) Fence and equipment connections may not be smaller than 4 AWG. Ground fence at gate posts and corner post and at intervals not exceeding **10 ft (3 m)**. Bond gate sections to fence posts using **1/8 by 1 inch (3 by 25 mm) [tinned]** flexible braided copper strap and clamps.
 - 3) Make joints in grounding conductors and loops by exothermic weld or compression connector.
 - c. Terminate grounding and bonding conductors on common equipment grounding terminal on transformer enclosure. Install supplemental terminal bars, lugs, and bonding jumpers as required to accommodate number of conductors for termination.
 - d. Complete transformer tank grounding and lightning arrester connections prior to making other electrical connections.
4. Connect low-voltage wiring.
 - a. Maintain air clearances between energized live parts and between live parts and ground for exposed connections in accordance with manufacturer's published instructions.
 - b. Bundle associated phase, neutral, and equipment grounding conductors together within transformer enclosure. Arrange conductors such that there is not excessive strain that could cause loose connections. Allow adequate slack for expansion and contraction of conductors.

5. Terminate medium-voltage cables in incoming section of substations.

D. Interfaces with Other Work:

1. Identification: Provide labels for transformers and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
2. Install transformers on cast-in-place concrete equipment base(s).
3. Provide vibration isolation and seismic control devices.

3.3 FIELD QUALITY CONTROL

A. Administrant for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Acceptance Testing Preparation:

1. **<Insert requirements>**.

C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

D. Tests and Inspections:

1. General Field-Testing Requirements:
 - a. Comply with provisions of "Testing and Test Methods" Chapter in NFPA 70B.
 - b. Perform visual and mechanical inspections and electrical tests. Certify compliance with test parameters.
 - c. After installing transformer but before primary is energized, verify that grounding system at substation is tested at specified value or less.
 - d. After installing transformer and after electrical circuitry has been energized, test for compliance with requirements.
 - e. Visual and Mechanical Inspection:
 - 1) Verify equipment nameplate data complies with Contract Documents.
 - 2) Inspect bolted electrical connections for high resistance using one of the following two methods:
 - a) Use low-resistance ohmmeter to compare bolted-connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - b) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or

NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.

2. Medium-Voltage Surge Arrester Field Tests:

a. Visual and Mechanical Inspection:

- 1) Inspect physical and mechanical condition.
- 2) Inspect anchorage, alignment, grounding, and clearances.
- 3) Verify arresters are clean.
- 4) Verify that ground leads on devices are individually attached to ground bus or ground electrode.
- 5) Verify that stroke counter is correctly mounted and electrically connected if applicable. Record stroke counter reading.

b. Electrical Test:

- 1) Perform insulation-resistance test on arresters, phase terminal-to-ground. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Replace units that fail to meet recommended minimum insulation resistance listed in that table.
- 2) Perform watts-loss test. Evaluate watts-loss values by comparison with similar units and test equipment manufacturer's published data.

3. Dry-Type Transformer Field Tests:

a. Visual and Mechanical Inspection:

- 1) Test dew point of tank gases if applicable.
- 2) Inspect anchorage, alignment, and grounding.
- 3) Verify that resilient mounts are free and that shipping brackets have been removed.
- 4) Verify bushings are clean.
- 5) Verify that alarm, control, and trip settings on temperature and level indicators are set and operate within manufacturer's recommended settings.
- 6) Verify that cooling fans operate correctly and have appropriate overcurrent protection.
- 7) Perform specific inspections and mechanical tests recommended by manufacturer.
- 8) Verify that as-left tap connections are as specified.

b. Electrical Tests:

- 1) Perform insulation-resistance tests winding-to-winding and each winding-to-ground. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index may not be less than 1.0.
- 2) Perform power-factor or dissipation-factor tests on windings in accordance with test equipment manufacturer's published data.
- 3) Perform power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV.
- 4) Perform turns-ratio tests at tap positions. Turns-ratio test results may not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- 5) Perform excitation-current test on each phase. The typical excitation-current test data pattern for three-legged core transformer is two similar current readings and

- one lower current reading. Investigate and correct if test shows different pattern.
- 6) Measure resistance of windings at tap connections, and record temperature-corrected winding-resistance values in Operations and Maintenance Manual.
- 7) Perform applied-voltage test on high- and load-side windings-to-ground. Comply with IEEE C57.12.91 provisions for field-deployed dielectric tests. Measurements must be made only when voltage and current have reached stable value. Test must be discontinued immediately in the event current begins to increase without stabilizing. Record test values in Operations and Maintenance Manual.
- 8) Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

E. Nonconforming Work:

- 1. Equipment and devices will be considered defective if they do not pass tests and inspections.
- 2. Remove and replace malfunctioning units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports. Record as-left set points of adjustable devices.

G. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

- 1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.4 CLOSEOUT ACTIVITIES

A. Training:

- 1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain transformer equipment.
- 2. **[Provide video recordings of training sessions to Owner.][Allow Owner to record training sessions.]**

3.5 PROTECTION

- A. After installation, protect transformer from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

3.6 MAINTENANCE

- A. Voltage Monitoring and Adjusting: After Substantial Completion, if requested by Owner, but not more than six months after Final Acceptance, perform the following voltage monitoring:

- 1. During period of normal load cycles as evaluated by Owner, perform seven days of three-phase voltage recording at outgoing section of transformers. Use voltmeters with calibration traceable to National Institute of Science and Technology standards and with chart speed of not less than **1 inch (25 mm)** per hour. Voltage unbalance greater than 1 percent between phases, or

deviation of phase voltage from nominal value by more than plus or minus 5 percent during test period, is unacceptable.

2. Corrective Action: If test results are unacceptable, perform the following corrective action, as appropriate:

- a. Adjust transformer taps.
- b. Prepare written request for voltage adjustment by electric utility.

3. Retests: Repeat monitoring, after corrective action is performed, until satisfactory results are obtained.
4. Field Reports for Voltage Monitoring and Adjusting: Prepare written report covering monitoring performed and corrective action taken.

- B. Infrared Scanning of Transformers: Perform survey during periods of maximum possible loading. Remove necessary covers prior to inspection.

1. After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of transformer's electrical power connections. Remove covers so joints and connections are accessible to portable scanner. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison.
2. Instrument: Inspect distribution systems with imaging equipment capable of detecting a minimum temperature difference of 1 deg C at 30 deg C. Provide documentation of device calibration.
3. Field Reports for Infrared Scanning: Prepare certified report that identifies transformer equipment checked, testing technician, equipment used, and that describes scanning results. Include notation of deficiencies detected, remedial actions taken, and scanning observations after remedial action. List results as follows:
 - a. Description of equipment to be tested.
 - b. Discrepancies.
 - c. Temperature difference between area of concern and reference area.
 - d. Probable cause of temperature difference.
 - e. Areas inspected. Identify inaccessible and unobservable areas and equipment.
 - f. Identify load conditions at time of inspection.
 - g. Provide photographs and thermograms of deficient area.
4. Act on inspection results in accordance with recommendations of NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.

END OF SECTION 26 12 16 00

Task	Specification	Specification Description
26 12 16 00	26 22 13 00	Low-Voltage Distribution Transformers

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 12 19 00 - PAD-MOUNTED, LIQUID-FILLED, MEDIUM-VOLTAGE TRANSFORMERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Pad-mounted, liquid-filled, medium-voltage transformers.

B. Products Installed, but Not Furnished, under This Section:

1. **<Insert products identified in "Existing Products to be Modified" Article or "Existing Products to be Removed and Reinstalled" Article>.**

C. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** for preinstallation conference procedures.
5. Section 260513 "Medium-Voltage Cables" specifies installation of medium-voltage cables.
6. Section 260519 "Low-Voltage Electrical Power Conductors and Cables" specifies installation of low-voltage wiring.
7. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
8. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
9. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic control devices referenced by this Section.
10. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
11. Section 260573 "Power System Studies" specifies arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.

1.2 DEFINITIONS

- A. Bushing: An insulating structure including a central conductor, or providing a central passage for a conductor, with provision for mounting on a barrier, conducting or otherwise, for the purpose of insulating the conductor from the barrier and conducting current from one side of the barrier to the other.
- B. Bushing Elbow: An insulated device used to connect insulated conductors to separable insulated connectors on dead-front, pad-mounted transformers and to provide a fully insulated connection. This is also called an "elbow connector."
- C. Bushing Insert: That component of a separable insulated connector that is inserted into a bushing well to complete a dead-front, load break or nonload break, separable insulated connector (bushing).

- D. Bushing Well: A component of a separable insulated connector, either permanently welded or clamped to an enclosure wall or barrier, having a cavity that receives a replaceable component (bushing insert) to complete the separable insulated connector (bushing).
- E. Elbow Connector: See "bushing elbow" above.

1.3 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>**.
- B. Preinstallation Coordination Meeting(s): For {Insert system or product}. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location>** before **<Insert construction activity>**.
 - 1. Attendees: Installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**][, and **Owner's Commissioning Authority**] of scheduled meeting dates.

1.4 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.
 - 2. Product Certificates: Include product certificate stating compliance with IEEE C57.12.00, signed by manufacturer or fabricator.
- B. Factory test reports.
- C. Shop Drawings: Prepare and submit the following:
 - 1. Plans and elevations showing major components and features.
 - a. Plan view and cross section of equipment base, showing clearances, required workspace, and locations of penetrations for grounding and conduits.
 - 2. Details of equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of field connections.
 - 3. Single-line diagram.
 - 4. List of materials.
 - 5. Nameplate data.

6. Manufacturer's published time-current curves of transformer line-side fuses, with transformer damage curve, inrush curve, and thru fault current indicated.

D. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

E. Field quality-control reports.

1.5 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Manufacturer's field reports for field quality-control support.
- C. Field reports for voltage monitoring and adjusting.
- D. Field reports for infrared scanning.

1.6 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, conduct tests of complex equipment, analyze test and equipment data, plan a job, and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

1.7 DELIVERY, STORAGE, AND HANDLING

- A. Delivery:
 1. Upon delivery of transformers and prior to unloading, inspect equipment for damage that may have occurred during shipment or storage.
 2. Verify that tie rods and chains are undamaged and tight, and that blocking and bracing is tight. Verify that there is no evidence of load shifting in transit, and that readings from transportation shock recorders, if equipped, are within manufacturer's recommendations.
 3. Verify that there is no indication of external damage and no dents or scratches in doors and sill, tank walls, radiators and fins, or termination provisions.
 4. Verify that there is no evidence of insulating-liquid leakage on transformer surfaces, at weld seams, on line- or load-side bushing parts, and at transformer base.
 5. Verify that there is positive pressure or vacuum on tank. Check pressure gauge; it is required to read other than zero.

6. Compare transformers and accessories received with bill of materials to verify that shipment is complete. Verify that transformers and accessories conform with manufacturer's quotation and shop drawings. If shipment is incomplete or does not comply with Project requirements, notify manufacturer in writing immediately.
7. Verify presence of polychlorinated biphenyl content labeling.
8. Unload transformers carefully, observing packing label warnings and handling instructions.
9. Open termination compartment doors and inspect components for damage or displaced parts, loose or broken connections, cracked or chipped insulators, bent mounting flanges, dirt or foreign material, and water or moisture.

B. Storage:

1. Store transformers in accordance with manufacturer's recommendations.
2. Transformers may be stored outdoors. If possible, store transformers at final installation locations on concrete pads. If dry concrete surfaces are unavailable, use pallets of adequate strength to protect transformers from direct contact with ground. Ensure that transformer is level.
3. Ensure that transformer storage location is clean and protected from severe conditions. Protect transformers from dirt, water, contamination, and physical damage. Do not store transformers in the presence of corrosive or explosive gases. Protect transformers from weather when stored for more than three months.
4. Store transformers with compartment doors closed.
5. Regularly inspect transformers while in storage and maintain documentation of storage conditions, noting discrepancies or adverse conditions. Verify that effective pressure seal is maintained using pressure gauges. Visually check for insulating-liquid leaks and rust spots.

C. Handling:

1. Handle transformers carefully, in accordance with manufacturer's recommendations, to avoid damage to enclosure, termination compartments, base, frame, tank, and internal components. Do not subject transformers to impact, jolting, jarring, or rough handling.
2. Protect transformer termination compartments against entrance of dust, rain, and snow.
3. Transport transformers upright, to avoid internal stresses on core and coil mounting assembly and to prevent trapping air in windings. Do not tilt or tip transformers.
4. Verify that transformer weights are within rated capacity of handling equipment.
5. Use only manufacturer-recommended points for lifting, jacking, and pulling. Use lifting lugs when lifting transformers.
6. Use jacks only at corners of tank base plate.
7. Use nylon straps of same length to balance and distribute weight when handling transformers with crane.
8. Use spreaders or lifting beam to obtain vertical lift and to protect transformer from straps bearing against enclosure. Lifting cable pull angles may not be greater than 15 degrees from vertical.
9. Exercise care not to damage tank base structure when handling transformer using skids or rollers. Use skids to distribute stresses over tank base when using rollers under large transformers.

1.8 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Modeling, analysis, product selection, installation, and quality control for all electrical Work on the Project must comply with service condition requirements specified in Section 018116 "Facility Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria."
- B. Usual Service Conditions: Unless unusual service conditions have been specified in "General Environmental Conditions," "Outdoor Conditions," and "Indoor Conditions" articles of Section 018116

"Facility Environmental Requirements," electrical service and distribution equipment must be suitable for operation under usual service conditions specified in applicable IEEE C57 series standards.

PART 2 - PRODUCTS

2.1 EXISTING PRODUCTS TO BE MODIFIED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>.**
 - 1. Sustainable Design Features:
 - a. Material Reuse: Product is salvaged, refurbished, or reused.
- C. Accessories: **<Insert accessories included with existing product>.**

2.2 EXISTING PRODUCTS TO BE REMOVED AND REINSTALLED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>.**
 - 1. Sustainable Design Features:
 - a. Material Reuse: Product is salvaged, refurbished, or reused.
- C. Accessories: **<Insert accessories included with existing product>.**

2.3 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.4 PAD-MOUNTED, LIQUID-FILLED, MEDIUM-VOLTAGE TRANSFORMERS

- A. Source Quality Control:
 - 1. Factory Tests:
 - a. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
 - b. Testing Administrator: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate transformer.
 - c. Factory Tests and Inspections: Perform the following tests and inspections on transformer, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with IEEE C57.12.00 before delivering to site. Affix label

with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.

- 1) Resistance.
- 2) Turns ratio, polarity, and phase relation.
- 3) Transformer no-load losses and excitation current at 100 percent of ratings.
- 4) Transformer impedance voltage and load loss.
- 5) Operation of devices.
- 6) Lightning impulse.
- 7) Low frequency.
- 8) Leak.
- 9) Perform Optional Tests:
 - a) Transformer no-load losses and excitation current at 110 percent of ratings.
 - b) Insulation power factor.
 - c) Applied potential, except that this test is not required for single-phase transformers or for three-phase Y-Y-connected transformers.
 - d) Induced potential.
 - e) Resistance measurements of windings on rated voltage connection and at tap extreme connections.
 - f) Ratios on rated voltage connection and at tap extreme connections.
 - g) Polarity and phase relation on rated voltage connection.
 - h) No-load loss at rated voltage on rated voltage connection.
 - i) Exciting current at rated voltage on rated voltage connection.
 - j) Impedance.

d. Nonconforming Work:

- 1) Equipment that does not pass tests and inspections will be considered defective.

e. Factory Test Reports: Compile and submit factory test and inspection reports.

B. Single-Phase, Pad-Mounted Transformers :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[ERMCO-ECI]**
 - c. **[GE Power; General Electric Company]**
 - d. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - e. **[Howard Industries, Inc]**
 - f. **[Prolec GE; A Xignux and General Electric Company Joint Venture]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[ERMCO-ECI]**
 - c. **[GE Power; General Electric Company]**

- d. [Hitachi Energy USA Inc.; business of Hitachi, Ltd.]
 - e. [Howard Industries, Inc]
 - f. [Prolec GE; A Xignux and General Electric Company Joint Venture]
 - g. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Transformers, Distribution, Liquid-Filled Type, Over 600 V: UL CCN XPLH; including IEEE C57.12.00 and IEEE C57.12.28.
4. Standard Features:
- a. [Oil-filled][Less-flammable-liquid-filled], two-winding, 60 Hz, 65 deg C rise above 30 deg C average ambient, self-cooled transformer.
 - b. Reference Standards: IEEE C2 and IEEE C57.12.38.
 - c. Windings Material: [Aluminum][Copper].
 - d. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, fully shielded, separable-elbow type, suitable for plugging into inserts provided in line-side section of transformer. Connected in each phase of incoming circuit and ahead of disconnecting device.
 - e. Winding Connections: Connection of windings and terminal markings must comply with IEEE C57.12.70.
 - f. Efficiency: Comply with 10 CFR 431, Subpart K.
 - g. Insulation: Transformer kVA rating must be as follows: Average winding temperature rise above 30 deg C ambient temperature must not exceed 65 deg C and 80 deg C hottest-spot temperature rise at rated kVA when tested in accordance with IEEE C57.12.90, using combination of connections and taps that give highest average winding temperature rise.
 - h. Tap Changer: External handle, for de-energized operation.
 - i. Tank: Sealed, with welded-on cover. **Designed to withstand internal pressure of not less than 7 psi (50 kPa) without permanent distortion and 15 psig (104 kPa) without rupture. Comply with IEEE C57.12.36.]**
 - j. Enclosure Integrity: Comply with IEEE C57.12.28 for pad-mounted enclosures that contain energized electrical equipment in excess of 600 V that may be exposed to public.
 - k. Mounting: Integral skid mounting frame, suitable to allow skidding or rolling of transformer in any direction, and with provision for anchoring frame to pad.
 - l. Insulating Liquids:
 - 1) Mineral Oil: ASTM D3487, Type II, and tested for compliance with ASTM D117.
 - 2) Less-Flammable Liquids:
 - a) Edible-Seed-Oil-Based Dielectric: Listed and labeled by qualified electrical testing laboratory recognized by authorities having jurisdiction as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic, having passed Organisation for Economic Co-operation and Development G.L.203 with zero mortality, and must be certified by U.S. Environmental Protection Agency as biodegradable, meeting Environmental Technology Verification requirements.
 - b) Biodegradable and Nontoxic Dielectric: Listed and labeled by qualified electrical testing laboratory recognized by authorities having jurisdiction as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92.
 - m. Sound level must comply with NEMA TR 1 requirements.

- n. Corrosion Protection:
- 1) Transformer coating system must be factory applied, complying with requirements of [IEEE C57.12.28][IEEE C57.12.29], in manufacturer's standard color [green]<Insert color>.
 - 2) Fabricate front sill, hood, and tank base of single-compartment transformers from stainless steel in accordance with ASTM A167, Type 304 or 304L, not less than No. 13 U.S. gage, complying with requirements of [IEEE C57.12.28][IEEE C57.12.29], standard color [green]<Insert color>.
 - 3) Base and Cabinets of Two Compartment Transformers: Fabricate from stainless steel in accordance with ASTM A167, Type 304 or 304L, not less than No. 13 U.S. gage. Coat transformer with manufacturer's standard green color coating complying with requirements of [IEEE C57.12.28][IEEE C57.12.29], in manufacturer's standard color [green]<Insert color>.
- o. Compartment Construction:
- 1) Single compartment for line- and load-side sections, clamshell style, with provision for padlocking hinged cover and single-point latching.
 - 2) Individual compartments for line- and load-side sections, formed by steel isolating barriers that extend full height and depth of compartments. With hinged, lift-off doors, with stop in open position, three-point latching, and provision for padlocking.
 - 3) Provide [Type 1][Type 2] terminal arrangement.
- p. Primary Fusing: Designed and rated to provide thermal protection of transformer by sensing overcurrent and high liquid temperature.
- 1) 150 kV BIL current-limiting fuses, conforming to requirements of IEEE C37.42.
 - 2) Interrupting Rating: 50 000 A(rms sym) at system voltage.
 - 3) Fuse Assembly: Bayonet-type, liquid-immersed, expulsion fuses in series with liquid-immersed, partial-range, current-limiting fuses. Bayonet fuse must sense both high currents and high oil temperatures to provide transformer with thermal protection.
 - 4) Provide bayonet fuse assembly with oil retention valve and external drip shield inside housing to eliminate or minimize oil spills. Valve must close when fuse holder is removed.
 - 5) Provide conspicuously displayed warning adjacent to bayonet fuse(s), cautioning against removing or inserting fuses unless transformer has been de-energized and tank pressure has been released.
- q. Line-Side Section: Dead-front design.
- 1) To connect primary cable, use separable insulated connectors. Bushings must be one-piece units, with ampere and BIL ratings same as connectors.
 - 2) Bushing inserts[**and feed-through inserts**]:
 - a) Conform to requirements of IEEE 386.
 - b) Rated at 200 A, with voltage class matching connectors. Provide parking stand near bushing wells.[**Parking stands must be with insulated standoff bushings for parking of energized load-break elbow connectors on parking stands.**]
 - c) Provide insulated protective caps for insulating and sealing out moisture from unused bushing inserts[**and insulated standoff bushings**].
 - 3) Bushing wells configured for loop-feed application.

- 4) Access to liquid-immersed fuses.
 - 5) Dead-front surge arrester(s).
 - 6) Tap-changer operator.
 - 7) Ground pad.
 - r. Load-Side Section:
 - 1) Bushings with spade terminals drilled for terminating number of conductors indicated on the Drawings, and lugs that comply with requirements of Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
 - 2) Metering: Coordinated with and complying with requirements of Section 262713 "Electricity Metering." **[Install][Make provision for installation by providing mounting space, brackets, and cable and conduit routing as well as]** the following:
 - a) Sensors.
 - b) BAS interface.
 - c) Kilowatt-hour meter.
 - d) Kilowatt-hour demand meter.
 - s. Capacities and Characteristics:
 - 1) Power Rating: **<Insert number>** kVA.
 - 2) Voltage Ratings: **<Insert primary voltage>** V - **[240/120][480/240]** V.
 - 3) Taps: **[Four 2.5 percent, full-capacity taps below rated primary voltage]<Insert description>**.
 - 4) Transformer BIL (kV): **[Comply with IEEE C57.12.38 requirements]<Insert number>**.
 - 5) Minimum Tested Impedance (Percent) at 85 deg C: **[1.25][2.1][3.0][3.2]<Insert number>**.
 - t. Transformer Accessories:
 - 1) Drain and filter connection.
 - 2) Filling and top filter press connections.
 - 3) Pressure-vacuum gauge.
 - 4) Dial-type analog thermometer with alarm contacts.
 - 5) Magnetic liquid level indicator with high and low alarm contacts.
 - 6) Automatically resetting pressure-relief device. Device flow must be as recommended by manufacturer. **[With alarm contacts and manual bleeder.]**
 - 7) Stainless steel ground connection pads.
 - 8) Machine-engraved nameplate made of anodized aluminum or stainless steel.
 - 9) Sudden pressure relay for remote alarm or trip when internal transformer pressure rises at field-set rate. Provide **[with][without]** seal-in delay.
 - u. Control Network: Support serial MS/TP and Ethernet IP communications, and able to communicate directly via TIA-485 serial networks and Ethernet 10Base-T networks as native device.
5. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
 - a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events **[and unit must be fully operational after seismic events]**.
 - b. Component Importance Factor (Ip): **[1.0][1.5]**.

- c. Component Amplification Factor (ap): **[1.0]<Insert value>**.
- d. Component Response Modification Factor (Rp): **[2.5]<Insert value>**.
- e. Component Overstrength Factor (Ω_o): **[2.5]<Insert value>**.

C. Three-Phase, Pad-Mounted Transformers :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[ERMCO-ECI]**
 - c. **[GE Power; General Electric Company]**
 - d. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - e. **[Howard Industries, Inc]**
 - f. **[Prolec GE; A Xignux and General Electric Company Joint Venture]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[ERMCO-ECI]**
 - c. **[GE Power; General Electric Company]**
 - d. **[Hitachi Energy USA Inc.; business of Hitachi, Ltd.]**
 - e. **[Howard Industries, Inc]**
 - f. **[Prolec GE; A Xignux and General Electric Company Joint Venture]**
 - g. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Transformers, Distribution, Liquid-Filled Type, Over 600 V: UL CCN XPLH; including IEEE C57.12.00 and IEEE C57.12.28.
4. Standard Features:
 - a. **[Oil-filled][Less-flammable-liquid-filled]**, two-winding, 60 Hz, 65 deg C rise above 30 deg C average ambient, self-cooled transformer.
 - b. Reference Standards: IEEE C2 and IEEE C57.12.26.
 - c. Windings Material: **[Aluminum][Copper]**.
 - d. Surge Arresters: Comply with IEEE C62.11, Distribution Class; metal-oxide-varistor type, fully shielded, separable-elbow type, suitable for plugging into inserts provided in line-side section of transformer. Connected in each phase of incoming circuit and ahead of disconnecting device.
 - e. Winding Connections: Connection of windings and terminal markings must comply with IEEE C57.12.70.
 - f. Efficiency: Comply with 10 CFR 431, Subpart K.
 - g. Insulation: Transformer kVA rating must be as follows: Average winding temperature rise above 30 deg C ambient temperature must not exceed 65 deg C and 80 deg C hottest-spot temperature rise at rated kVA when tested in accordance with IEEE C57.12.90, using

- combination of connections and taps that give highest average winding temperature rise.
- h. Tap Changer: External handle, for de-energized operation.
- i. Tank: Sealed, with welded-on cover. [**Designed to withstand internal pressure of not less than 7 psi (50 kPa) without permanent distortion and 15 psig (104 kPa) without rupture. Comply with IEEE C57.12.36.**]
- j. Enclosure Integrity: Comply with IEEE C57.12.28 for pad-mounted enclosures that contain energized electrical equipment in excess of 600 V that may be exposed to public.
- k. Mounting: Integral skid mounting frame, suitable to allow skidding or rolling of transformer in any direction, and with provision for anchoring frame to pad.
- l. Insulating Liquids:
 - 1) Mineral Oil: ASTM D3487, Type II, and tested for compliance with ASTM D117.
 - 2) Less-Flammable Liquids:
 - a) Edible-Seed-Oil-Based Dielectric: Listed and labeled by qualified electrical testing laboratory recognized by authorities having jurisdiction as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92. Liquid must be biodegradable and nontoxic, having passed Organisation for Economic Co-operation and Development G.L.203 with zero mortality, and must be certified by U.S. Environmental Protection Agency as biodegradable, meeting Environmental Technology Verification requirements.
 - b) Biodegradable and Nontoxic Dielectric: Listed and labeled by qualified electrical testing laboratory recognized by authorities having jurisdiction as complying with NFPA 70 requirements for fire point of not less than 300 deg C when tested in accordance with ASTM D92.
