- m. Sound level must comply with NEMA TR 1 requirements.
- n. Corrosion Protection:
 - 1) Transformer coating system must be factory applied, complying with requirements of [IEEE C57.12.28][IEEE C57.12.29], in manufacturer's standard color [green]<Insert color>.
 - 2) Fabricate front sill, hood, and tank base of single-compartment transformers from stainless steel in accordance with ASTM A167, Type 304 or 304L, not less than No. 13 U.S. gage, complying with requirements of [IEEE C57.12.28][IEEE C57.12.29], standard color [green]<Insert color>.
 - 3) Base and Cabinets of Two Compartment Transformers: Fabricate from stainless steel in accordance with ASTM A167, Type 304 or 304L, not less than No. 13 U.S. gage. Coat transformer with manufacturer's standard green color coating complying with requirements of [IEEE C57.12.28][IEEE C57.12.29], in manufacturer's standard color [green]<Insert color>.
- o. Compartment Construction:
 - 1) Single-Compartment Construction: Clamshell style, with provision for padlocking, hinged cover, and single-point latching.
 - 2) Double-Compartment Construction: Individual compartments for line- and load-side sections, formed by steel isolating barriers that extend full height and depth of compartments, with hinged, lift-off doors and three-point latching, with stop in open position and provision for padlocking.
- p. Primary Fusing: Designed and rated to provide thermal protection of transformer by sensing overcurrent and high liquid temperature.
 - 1) 150 kV BIL current-limiting fuses, conforming to requirements of IEEE C37.42.

- 2) Interrupting Rating: 50 000 A(rms sym) at system voltage.
 - 3) Fuse Assembly: Bayonet-type, liquid-immersed, expulsion fuses in series with liquid-immersed, partial-range, current-limiting fuses. Bayonet fuse must sense both high currents and high oil temperature to provide thermal protection to transformer.[
Connect current-limiting fuses ahead of radial-feed load-break switch.]
 - 4) Provide bayonet fuse assembly with oil retention valve and external drip shield inside housing to eliminate or minimize oil spills. Valve must close when fuse holder is removed and external drip shield is installed.
 - 5) Provide conspicuously displayed warning adjacent to bayonet fuse(s), cautioning against removing or inserting fuses unless transformer has been de-energized and tank pressure has been released.
- q. Line-Side Section: Dead-front design.
- 1) To connect primary cable, use separable insulated connectors; coordinated with and complying with requirements of Section 260513 "Medium-Voltage Cables." Bushings must be one-piece units, with ampere and BIL ratings same as connectors.
 - 2) Bushing inserts[**and feed-through inserts**]:
 - a) Conform to requirements of IEEE 386.
 - b) Rated at 200 A, with voltage class matching connectors. Provide parking stand near bushing wells.[**Parking stands must be equipped with insulated standoff bushings for parking of energized load-break elbow connectors on parking stands.**]
 - c) Provide insulated protective caps for insulating and sealing out moisture from unused bushing inserts[**and insulated standoff bushings**].
 - 3) Bushing wells configured for loop-feed application.
 - 4) Access to liquid-immersed fuses.
 - 5) Dead-front surge arresters.
 - 6) Tap-changer operator.
 - 7) Ground pad.
- r. Load-Break Switch:
- 1) Radial-feed, liquid-immersed type with voltage class and BIL matching that of separable connectors, with continuous current rating and load-break rating of **[200 A][300 A]<Insert amperage>**, and make-and-latch rating of 12 kA(rms sym).
 - 2) Loop-feed sectionalizing switches, using three two-position, liquid-immersed-type switches for closed transition loop-feed and sectionalizing operation. Voltage class and BIL must match that of separable connectors, with continuous current rating and load-break rating of **[200 A][300 A]<Insert amperage>**, and make-and-latch rating of 12 kA(rms sym). Switch operation must be as follows:
 - a) Position I: Line A connected to line B and both lines connected to transformer.
 - b) Position II: Transformer connected to line A only.
 - c) Position III: Transformer connected to line B only.
 - d) Position IV: Transformer disconnected and line A not connected to line B.
 - e) Position V: Transformer disconnected and line A connected to line B.
- s. Load-Side Section:
- 1) Bushings with spade terminals drilled for terminating number of conductors indicated on the Drawings, and lugs that comply with requirements of Section 260519 "Low-

- Voltage Electrical Power Conductors and Cables."
- 2) Metering: Coordinated with and complying with requirements of Section 262713 "Electricity Metering." **[Install][Make provision for installation by providing mounting space, brackets, and cable and conduit routing as well as]** the following:
- a) Sensors.
 - b) BAS interface.
 - c) Kilowatt-hour meter.
 - d) Kilowatt-hour demand meter.
- t. Capacities and Characteristics:
- 1) Power Rating: **<Insert number>** kVA.
 - 2) Voltage Ratings: **<Insert primary voltage>** V - **[208Y/120][480Y/277]** V.
 - 3) Taps: **[Comply with IEEE C57.12.26 requirements]<Insert values>**.
 - 4) Transformer BIL (kV): **[Comply with IEEE C57.12.26 requirements]<Insert number>**.
 - 5) Minimum Tested Impedance (Percent) at 85 deg C: **[2.50][2.87][4.03][5.75]<Insert number>**.
 - 6) K-factor: **<Insert number>**.
 - 7) Comply with FM Global Class No. 3990.
 - 8) Comply with UL listing requirements for combination classification and listing for transformer and less-flammable insulating liquid.
- u. Transformer Accessories:
- 1) Drain and filter connection.
 - 2) Filling and top filter press connections.
 - 3) Pressure-vacuum gauge.
 - 4) Dial-type analog thermometer with alarm contacts.
 - 5) Magnetic liquid level indicator with high and low alarm contacts.
 - 6) Automatically resetting pressure-relief device. Device flow must be as recommended by manufacturer. **[With alarm contacts and manual bleeder.]**
 - 7) Stainless steel ground connection pads.
 - 8) Machine-engraved nameplate, made of anodized aluminum or stainless steel.
 - 9) Sudden pressure relay for remote alarm or trip when internal transformer pressure rises at field-set rate. Provide **[with][without]** seal-in delay.
- v. Control Network: Support serial MS/TP and Ethernet IP communications, and able to communicate directly via TIA-485 serial networks and Ethernet 10Base-T networks as native device.
5. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events **[and unit must be fully operational after seismic events]**.
 - b. Component Importance Factor (Ip): **[1.0][1.5]**.
 - c. Component Amplification Factor (ap): **[1.0]<Insert value>**.
 - d. Component Response Modification Factor (Rp): **[2.5]<Insert value>**.
 - e. Component Overstrength Factor (Qo): **[2.5]<Insert value>**.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and space conditions for compliance with requirements for pad-mounted, liquid-filled, medium-voltage transformers and other conditions affecting performance of the Work.
- B. Examine roughing-in of conduits and grounding systems to verify the following:
 - 1. Wiring entries comply with layout requirements.
 - 2. Entries are within conduit-entry tolerances specified by manufacturer, and no feeders will cross section barriers to reach load or line lugs.
- C. Examine concrete bases for suitable conditions for transformer installation.
- D. Preinstallation Checks:
 - 1. Verify removal of shipping bracing after placement.
 - 2. Remove sample of insulating liquid in accordance with ASTM D923. Insulating-liquid values must comply with NETA ATS, Table 100.4. Sample must be tested for the following:
 - a. Dielectric Breakdown Voltage: ASTM D877 or ASTM D1816.
 - b. Acid Neutralization Number: ASTM D974.
 - c. Specific Gravity: ASTM D1298.
 - d. Interfacial Tension: ASTM D971.
 - e. Color: ASTM D1500.
 - f. Visual Condition: ASTM D1524.
 - g. Water in Insulating Liquids: Comply with ASTM D1533.
 - h. Power Factor or Dissipation Factor: ASTM D924.
- E. Verify that grounding and bonding connections are in place. Ground (Earth) resistance may not exceed **[5 Ω]<Insert resistance in ohms>** at transformer location.
- F. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Commissioning of Electrical Systems: NECA NEIS 90.
 - 5. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 6. Communications Work: BICSI N1.
 - 7. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
 - 8. Work in Confined Spaces: NFPA 350.
 - 9. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.

10. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Install transformers on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 260529 "Hangers and Supports for Electrical Systems."
2. Transformer must be installed level and plumb and must tilt less than 1.5 degrees while energized.
3. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's published instructions and IEEE C2.

D. Grounding and Bonding:

1. For counterpoise, use tinned bare copper cable not smaller than 4/0 AWG, buried not less than **30 inch (765 mm)** below grade interconnecting grounding electrodes. Bond surge arrester and neutrals directly to transformer enclosure and then to grounding electrode system with bare copper conductors, sized as shown. Keep lead lengths as short as practicable, with no kinks or sharp bends.
2. Fence and equipment connections may not be smaller than 4 AWG. Ground fence at gate posts and corner posts and at intervals not exceeding **10 ft (3 m)**. Bond gate sections to fence posts using **1/8 by 1 inch (3 by 25 mm) [tinned]** flexible braided copper strap and clamps.
3. Make joints in grounding conductors and loops by exothermic weld or compression connector.
4. Terminate grounding and bonding conductors on common equipment grounding terminal on transformer enclosure.
5. Complete transformer tank grounding and lightning arrester connections prior to making other electrical connections.

E. Connect low-voltage wiring.

1. Maintain air clearances between energized live parts and between live parts and ground for exposed connections in accordance with manufacturer recommendations.
2. Bundle associated phase, neutral, and equipment grounding conductors together within transformer enclosure. Arrange conductors such that there is not excessive strain that could cause loose connections. Allow adequate slack for expansion and contraction of conductors.

F. Terminate medium-voltage cables in incoming section of transformers.

G. Interfaces with Other Work:

1. Identification: Provide labels for transformers and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
2. Install transformers on cast-in-place concrete equipment base(s).
3. Provide vibration isolation and seismic control devices.

3.3 FIELD QUALITY CONTROL

A. Administrator for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.

2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].
- B. Acceptance Testing Preparation:
1. **<Insert requirements>**.
- C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- D. Tests and Inspections:
1. General Field-Testing Requirements:
 - a. Comply with provisions of "Testing and Test Methods" Chapter in NFPA 70B.
 - b. Perform visual and mechanical inspections and electrical tests. Certify compliance with test parameters.
 - c. After installing transformer but before primary is energized, verify that grounding system at transformer is tested at specified value or less.
 - d. After installing transformer and after electrical circuitry has been energized, test for compliance with requirements.
 - e. Visual and Mechanical Inspection:
 - 1) Verify equipment nameplate data complies with the Contract Documents.
 - 2) Inspect bolted electrical connections for high resistance using one of the following two methods:
 - a) Use low-resistance ohmmeter to compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - b) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.
 2. Medium-Voltage Surge Arrester Field Tests:
 - a. Visual and Mechanical Inspection:
 - 1) Inspect physical and mechanical condition.
 - 2) Verify arresters are clean.
 - 3) Verify that ground leads on devices are individually attached to ground bus or ground electrode.
 - b. Electrical Test:
 - 1) Perform insulation-resistance test on arresters, phase terminal-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of

- manufacturer's published data, comply with NETA ATS, Table 100.1. Replace units that fail to comply with recommended minimum insulation resistance listed in that table.
- 2) Perform watts-loss test. Evaluate watts-loss values by comparison with similar units and test equipment manufacturer's published data.
3. Liquid-Filled Transformer Field Tests:
- a. Visual and Mechanical Inspection:
 - 1) Test dew point of tank gases if applicable.
 - 2) Inspect anchorage, alignment, and grounding.
 - 3) Verify bushings are clean.
 - 4) Verify that alarm, control, and trip settings on temperature and level indicators are set and operate within manufacturer's recommended settings.
 - 5) Verify that liquid level in tanks is within manufacturer's published tolerances.
 - 6) Perform specific inspections and mechanical tests recommended by manufacturer.
 - 7) Verify presence of transformer surge arresters and that their ratings are as specified.
 - 8) Verify that as-left tap connections are as specified.
 - b. Electrical Tests:
 - 1) Perform insulation-resistance tests winding-to-winding and windings-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index; value of index may not be less than 1.0.
 - 2) Perform power-factor or dissipation-factor tests on windings in accordance with test equipment manufacturer's published data. Maximum winding insulation power-factor/dissipation-factor values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.3.
 - 3) Measure core insulation resistance at 500 V(dc) if core is insulated and core ground strap is removable. Core insulation-resistance values may not be less than 1 MΩ at 500 V(dc).
 - 4) Perform power-factor or dissipation-factor tip-up test on windings greater than 2.5 kV.
 - 5) Perform Optional Field Tests:
 - a) Perform turns-ratio tests at tap positions. Turns-ratio test results may not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
 - b) Perform excitation-current test on each phase. Typical excitation-current test data pattern for three-legged core transformer is two similar current readings and one lower current reading. Investigate and correct if test shows different pattern.
 - c) Measure resistance of windings at tap connections, and record temperature-corrected winding-resistance values in Operations and Maintenance Manual.
 - d) Perform applied-voltage test on line- and load-side windings-to-ground. Comply with IEEE C57.12.91, Sections 10.2 and 10.9. This test is not required for single-phase transformers and for three-phase wye-wye-connected transformers.
 - 6) Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.
 - 7) Remove sample of insulating liquid in accordance with ASTM D923, and perform dissolved-gas analysis in accordance with IEEE C57.104 or ASTM D3612.

- E. Nonconforming Work:
 - 1. Equipment and devices will be considered defective if they do not pass tests and inspections.
 - 2. Remove and replace malfunctioning units and retest.
- F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports. Record as-left set points of adjustable devices.
- G. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.
 - 1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.4 CLOSEOUT ACTIVITIES

- A. Training:
 - 1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain transformer equipment.
 - 2. **[Provide video recordings of training sessions to Owner][Allow Owner to record training sessions].**

3.5 PROTECTION

- A. After installation, protect transformer from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

3.6 MAINTENANCE

- A. Voltage Monitoring and Adjusting: After Substantial Completion, if requested by Owner, but not more than six months after Final Acceptance, perform the following voltage monitoring:
 - 1. During period of normal load cycles as evaluated by Owner, perform seven days of three-phase voltage recording at outgoing section of transformers. Use voltmeters with calibration traceable to National Institute of Science and Technology standards and with chart speed of not less than **1 inch (25 mm)** per hour. Voltage unbalance greater than 1 percent between phases, or deviation of phase voltage from nominal value by more than plus or minus 5 percent during test period, is unacceptable.
 - 2. Corrective Action: If test results are unacceptable, perform the following corrective action, as appropriate:
 - a. Adjust transformer taps.
 - b. Prepare written request for voltage adjustment by electric utility.
 - 3. Retests: Repeat monitoring, after corrective action is performed, until satisfactory results are

- obtained.
4. Field Reports for Voltage Monitoring and Adjusting: Prepare written report covering monitoring performed and corrective action taken.
- B. Infrared Scanning of Transformers: Perform survey during periods of maximum possible loading. Remove necessary covers prior to inspection.
1. After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of transformer's electrical power connections. Remove covers so joints and connections are accessible to portable scanner. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison.
 2. Instrument: Inspect distribution systems with imaging equipment capable of detecting minimum temperature difference of 1 deg C at 30 deg C. Provide documentation of device calibration.
 3. Field Reports for Infrared Scanning: Prepare certified report that identifies transformer equipment checked, testing technician, and equipment used, and that describes scanning results. Include notation of deficiencies detected, remedial actions taken, and scanning observations after remedial action. List results as follows:
 - a. Description of equipment to be tested.
 - b. Discrepancies.
 - c. Temperature difference between area of concern and reference area.
 - d. Probable cause of temperature difference.
 - e. Areas inspected. Identify inaccessible and unobservable areas and equipment.
 - f. Identify load conditions at time of inspection.
 - g. Provide photographs and thermograms of deficient area.
 4. Act on inspection results in accordance with recommendations of NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.

END OF SECTION 26 12 19 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 12 19 00A - LOW-VOLTAGE SWITCHGEAR

PART 1 - GENERAL

1.1 SUMMARY

A. The Work of This Section Includes:

1. Metal-enclosed, low-voltage switchgear, with drawout power circuit breakers and metering and control accessories.
 - a. Switchgear structure.
 - b. Additional requirements for indoor switchgear.
 - c. Additional requirements for outdoor switchgear.
 - d. Circuit breakers.
 - e. Arc-flash limiting feeder circuit breakers.
 - f. Zone-selective interlocking.
 - g. Network protectors.
 - h. Surge suppression.
 - i. Control power supply, 120 V(ac).
 - j. Control power supply, 24 V(dc).
 - k. Instrumentation and control.

B. Products Furnished, but Not Installed, under This Section:

1. **<Insert products furnished, but not installed>.**

C. Products Installed, but Not Furnished, under This Section:

1. **<Insert products installed, but not furnished>.**

D. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
3. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** for preinstallation conference procedures.
4. Section 230923.13 "Energy Meters" for electricity meters for HVAC equipment.
5. Section 262713 "Electricity Metering" for equipment to meter electricity consumption and demand for submetering.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>**.

B. Preinstallation Coordination Meeting(s): For switchgear. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location>** before **<Insert construction activity>**.

1. Attendees: Installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**][, and **Owner's Commissioning Authority**] of scheduled meeting dates.

1.3 ACTION SUBMITTALS

A. Product Data:

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for switchgear.
2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.

B. Shop Drawings:

1. For low-voltage switchgear.
 - a. System Power One-Line Diagrams: Depict power sources, feeders, distribution components, and major loads. Include as-built data for low-voltage power switchgear and connections as follows:
 - 1) Frame size of circuit breakers.
 - 2) Trip rating for circuit breakers.
 - 3) Conduit and wire size for feeders.
 - b. Include plans, elevations, sections, shipping splits, and mounting details.
 - c. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of field connections.
 - d. Wire Termination Diagrams and Schedules: Include diagrams for power, signal, and control wiring. Identify terminals and wiring designations and color-codes to facilitate installation, operation, and maintenance. Indicate recommended types, wire sizes, and circuiting arrangements for field-installed wiring, and show circuit protection features. Differentiate between manufacturer-installed and field-installed wiring.
 - e. Block Diagram: Show interconnections between components specified in this Section and devices furnished with power distribution system components. Indicate data communication paths and identify networks, data buses, data gateways, concentrators, and other devices used. Describe characteristics of network and other data communication lines.
 - f. Indicate short-time and short-circuit current rating of switchgear assembly.
 - g. Include features, characteristics, ratings, and factory settings of individual overcurrent protective devices and auxiliary components.
 - h. Include mimic-bus diagram.

C. Delegated Design Submittals: For low-voltage switchgear.

1. Comply with Section 260572 "Overcurrent Protective Device Short-Circuit Study" and Section 260573.16 "Coordination Studies."
2. For differential ground-fault protection scheme. Include wiring diagram of differential system along with test procedure recommended by UL 1558, using high-current injection equipment.

D. Field quality-control reports.

**1.4 INFORMATIONAL SUBMITTALS**

- A. Product Test Reports: Submit evidence that switchgear is compatible with connected monitoring and control devices and systems specified in [**Section 260913 "Electrical Power Monitoring"**]**<Insert Section number and title for integrated controls>**.
 - 1. Show interconnecting signal and control wiring, and interface devices to show compatibility of meters.
 - 2. For reporting and billing interfaces and adapters, list network protocols and provide statements from manufacturers that input and output devices comply with interoperability requirements of protocol.
- B. Manufacturers' Published Instructions: Record copy of official installation[**and testing**] instructions issued to Installer by manufacturer for the following:
 - 1. For unloading and inspection, clearances, torque values, insulation-resistance testing, dielectric withstand-voltage testing, breaker testing, power factor testing, grounding, ground-fault protection testing, batteries and chargers testing, and system functional testing.
- C. Source quality-control reports.

1.5 CLOSEOUT SUBMITTALS

- A. System Power Riser Diagram: For switchgear, using non-fugitive ink on high-quality paper. Post on wall at switchgear location.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare Parts: Furnish to Owner the following spare parts for repairing switchgear that are packaged with protective covering for storage on-site and identified with labels describing contents:
 - 1. Drawout Circuit Breakers: One of each type and rating used for circuit breaker in switchgear.
 - 2. Fuses: [**One**]**<Insert number>** for every [**three**]**<Insert number>** of each type and rating, but no fewer than three of each for the following:
 - a. Potential transformers.
 - b. Control power circuits.
- B. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to switchgear, packaged with protective covering for storage on-site and identified with labels describing contents. Include the following:
 - 1. Portable test set for testing functions of circuit-breaker, solid-state trip devices without removal from switchgear.
 - 2. Relay and meter test plugs suitable for testing switchgear meters and switchgear class relays.
 - 3. Racking handle to move circuit breaker manually between connected and disconnected positions.
 - 4. Circuit-Breaker Removal Apparatus:
 - a. Floor Type: Portable, floor-supported, roller-base, elevating carriage arranged for moving circuit breakers in and out of compartments.
 - b. Overhead Type: Overhead-circuit-breaker lifting device, track mounted at top front of switchgear and complete with hoist and lifting yokes matching each size of drawout circuit breaker installed.

5. Spare-Fuse Cabinet: Identified and compartmented steel box or cabinet with lockable door.
6. Storage for Manual: Include rack or holder, near operating instructions, for copy of maintenance manual.

C. Consumable Items:

1. After completion of field quality control, startup, commissioning, adjusting, and closeout activities, replace air filters and refill fluid reservoirs.

1.7 DELIVERY, STORAGE, AND HANDLING

- A. Indoor Switchgear Storage: Store in dry, clean location, placed on level surface to prevent strain and possible distortion. During construction period, provide protection against dust, dirt, falling objects, dripping water, water, excessive moisture, and other possible causes of damage to equipment. Temporary covering may not restrict ventilation and may not be removed until equipment is ready for installation. **[Store indoor equipment within heated building.][Take special precaution to keep equipment sufficiently warm with adequate ventilation to prevent condensation during storage period. Install temporary heating if necessary.]**
- B. When provisions for temporary power connection are provided as part of switchgear assembly, provisions must be included to prevent energization of primary buses or connections by means of backfeed through fuses or control power transformers connected to primary buses or connections.
- C. If outdoor switchgear cannot be installed and energized, temporary power must be provided for operation of space heaters provided so as to prevent condensation of moisture within housing.
- D. Ventilation openings must be left open to permit proper air circulation.

PART 2 - PRODUCTS

2.1 OWNER-FURNISHED PRODUCTS

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for product that Owner intends to furnish to Contractor>.**
- B. Description: **<Insert description of product, including special features, options, and finishes for Owner-furnished product that may impact Contractor's installation>.**
- C. Accessories: **<Insert accessories that will be provided with product>.**

2.2 EXISTING PRODUCTS TO BE MODIFIED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact Work>.**
- C. Accessories: **<Insert accessories included with existing product>.**

**2.3 EXISTING PRODUCTS TO BE REMOVED AND RE-INSTALLED**

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact Work>.**
- C. Accessories: **<Insert accessories included with existing product>.**

2.4 LOW-VOLTAGE SWITCHGEAR

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - 1. **[ABB, Electrification Business]**
 - 2. **[Eaton]**
 - 3. **[SAI Advanced Power Solutions/Switchboard Apparatus Inc.]**
 - 4. **[Siemens Industry, Inc., Energy Management Division]**
 - 5. **[Square D; Schneider Electric USA]**
 - 6. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[ABB, Electrification Business]**
 - 2. **[Eaton]**
 - 3. **[SAI Advanced Power Solutions/Switchboard Apparatus Inc.]**
 - 4. **[Siemens Industry, Inc., Energy Management Division]**
 - 5. **[Square D; Schneider Electric USA]**
 - 6. **<Insert manufacturer's name>**

2.5 SYSTEM DESCRIPTION

- A. Description: Metal-enclosed, low-voltage switchgear with drawout **[fused][fused, where indicated,]** power circuit breakers, with accessories and metering components.
 - 1. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - 2. Comply with IEEE C37.20.1.
 - 3. Listed and labeled as complying with UL 1558.
 - 4. Listed and labeled for use as service entrance equipment.

2.6 PERFORMANCE REQUIREMENTS

- A. Capacities and Characteristics:
 - 1. Nominal System Voltage: **[480 V, three][480/277 V, four][240 V, three][208/120 V, four]** wire, 60 Hz.
 - 2. Rated Maximum Voltage: **[254 V][508 V][635 V]**.
 - 3. Rated Power Frequency: 60 Hz.

4. Rated Insulation Level: Power frequency withstand must be not less than 2.2 kV(rms).
5. Rated Continuous Current:
 - a. Main-Bus Continuous: **[1600 A][2000 A][3000 A][3200 A][4000 A][5000 A]**.
 - b. Vertical Section Bus Riser: Equal to frame size of low-voltage power circuit breaker connected to that riser.
6. Rated Short-Circuit Withstand Current: **[42 000 A(sym)][65 000 A(sym)][85 000 A(sym)][100 000 A(sym)][200 000 A(sym)]**.
7. Short-Time and Short-Circuit Current: Match rating of integrated short-circuit current rating.

2.7 SWITCHGEAR STRUCTURE

- A. Bus isolation barriers must be arranged to isolate line bus from load bus at main and tie circuit breaker. Extend section barriers between main and tie circuit breakers to rear of section.
- B. Allow the following circuit-breaker functions to be performed when compartment door is closed:
 1. Operate manual charging system.
 2. Open and close circuit breaker.
 3. Examine and adjust trip unit.
 4. Read breaker nameplate.
- C. Install instrument compartments when additional space is required for metering and instrumentation. Allow for routing of instrumentation, control and communications wires, and cables.
- D. Switchgear Bus:
 1. Use bus bars to connect compartments and vertical sections. Cable connections are not permitted.
 2. Main Phase Bus: Uniform capacity entire length of assembly.
 3. Neutral Bus: **[50][100]** percent of phase-bus ampacity unless otherwise indicated. Equip bus with pressure-connector terminations for outgoing circuit neutral conductors. Include braces for neutral-bus extensions for busway feeders.
 4. Ground Bus: Uniform capacity entire length of assembly, with pressure connector terminations for feeder and branch-circuit ground conductors, minimum size **1/4 by 2 inch (6 by 50 mm)**.
 5. Vertical Section Bus Size: **[Comply with IEEE C37.20.1, including allowance for spare circuit breakers and spaces for future circuit breakers][Fully rated to system continuous current, equal to horizontal bus]**.
 6. Bus Material and Connections:
 - a. Phase- and Neutral-Bus Material:
 - 1) Hard-drawn copper of 98 percent minimum conductivity, with copper feeder circuit-breaker line connections.
 - 2) Silver- or tin-plated, high-strength, electrical-grade aluminum alloy, with copper or tin-plated aluminum circuit-breaker line connections.
 - 3) Hard-drawn copper of 98 percent minimum conductivity or tin-plated, high-strength, electrical-grade aluminum alloy.
 - b. Use silver-plated copper or tin-plated aluminum for connecting circuit-breaker line to aluminum bus.
 - c. Use copper for connecting circuit-breaker line to copper bus.
 - d. Contact Surfaces of Buses: Silver plated.

- e. Feeder Circuit-Breaker Load Terminals: Silver-plated copper bus extensions equipped with pressure connectors for outgoing circuit conductors.
- 7. Neutral Disconnect Link: Bolted, uninsulated, bus, arranged to connect neutral bus to ground bus.
- 8. Provide for future extensions from either end of main phase, neutral, and ground bus by means of predrilled bolt-holes and connecting links.
- 9. Bus-Bar Insulation: Individual bus bars wrapped with factory-applied, flame-retardant tape or spray-applied, flame-retardant insulation.
 - a. Sprayed Insulation Thickness: **3 mil (0.08 mm)**, minimum.
 - b. Bolted Bus Joints: Insulate with secure joint covers that can easily be removed and reinstalled.
- E. Circuit-Breaker Compartment:
 - 1. Drawout Features: Circuit-breaker mounting assembly equipped with racking mechanism to position circuit breaker and hold it rigidly in connected, test, disconnected, and withdrawn positions. Include the following features:
 - a. Provide circuit-breaker racking system with positive stops at connected, test, disconnected, and withdrawn positions.
 - b. Interlocks: Prevent racking of circuit breaker to or from connected position when it is closed, and prevent closure of circuit breaker unless it is in connected, test, or disconnected position.
 - c. Circuit-Breaker Positioning: Permit racking of open circuit breaker to or from connected, test, and disconnected positions only when compartment door is closed unless live parts are covered by full dead-front shield. Permit manual withdrawal of open circuit breaker to position for removal from structure. When compartment door is open, status for connection devices for different positions includes the following:
 - 1) Test Position: Primary disconnects disengaged, and secondary disconnect devices and ground contact engaged.
 - 2) Disconnected Position: Primary and secondary devices and ground contact disengaged.
 - d. Primary Disconnect: Mount on stationary part of compartment. Disconnect must consist of set of contacts extending to rear through insulating support barrier, and of corresponding moving finger contacts on power circuit-breaker studs, which engage in only connected position. Assembly must provide multiple silver-to-silver full floating, spring-loaded, high-pressure-point contacts with uniform pressure on fingers. Load studs must connect to bus extensions that terminate in solderless terminals in rear cable compartment.
 - e. Secondary Disconnect: Floating terminals mounted on stationary part of compartment that engage mating contacts at front of breaker.
 - f. Provide verification of positive ground contact between circuit breaker and its compartment when accessory cover is removed while circuit breaker is in connected, test, disconnected, and withdrawn positions.
 - g. Place 2400 A frame and larger circuit breakers at bottom of switchgear.
- F. Auxiliary Compartments: Match and align with basic switchgear assembly. Include the following:
 - 1. Utility metering compartment that complies with utility-company requirements.
 - 2. Bus transition sections.
 - 3. Incoming-line pull sections.
 - 4. Hinged front panels for access to metering, accessory, and blank compartments.
- G. Pull Boxes: Pull box on top of switchgear for extra room for pulling cable, with removable top, front, and

side covers and with ventilation provisions adequate to maintain air temperature in pull box within same limits as switchgear.

1. Set pull box back from front to clear circuit-breaker lifting mechanism.
2. Pull-Box Bottom: Insulating, fire-resistant material with separate holes for cable drops into switchgear.
3. Cable Supports: Arranged to ease cabling and adequate to support cables, including those for future installation.

2.8 ADDITIONAL REQUIREMENTS FOR INDOOR SWITCHGEAR

- A. Enclosure Rating: Indoor.
- B. Enclosure Material: Steel.
- C. Enclosure Finish: IEEE C37.20.1, manufacturer's standard gray finish over rust-inhibiting primer on phosphatizing-treated metal surfaces.
- D. Enclosure Rear Panels: Removable and hinged, to allow access to rear interior of switchgear.

2.9 ADDITIONAL REQUIREMENTS FOR OUTDOOR SWITCHGEAR

- A. Outdoor Enclosure Rating: UL 1558.
- B. Outdoor Enclosure Description: Weatherproof; integral structural-steel base frame with factory-applied asphaltic undercoating
- C. Outdoor Enclosure Material: **[Steel][12 gage, ASTM A240, Type 304 or 304L stainless steel]**.
- D. Outdoor Enclosure Finish:
 1. Factory-applied finish in manufacturer's standard color, including under surfaces treated with corrosion-resistant undercoating.
 2. Factory-applied, corrosion-resistant finish in manufacturer's standard color that withstands **[120][480]** hours of exposure to salt-spray test specified in ASTM B117, without loss of paint or release of adhesion of paint primer coat to metal surface in excess of **1/16 inch (1.6 mm)** from test mark. Scribed test mark and test evaluation must be conducted in accordance with ASTM D1654, with rating of not less than 7 in accordance with Table 1 (Procedure A). Cut edges or otherwise damaged surfaces of hot-dip galvanized sheet steel or mill-galvanized sheet steel must be coated with manufacturer's standard zinc-rich paint.
 3. Front and rear doors must be provided with stainless steel padlockable vault handles with three-point catch. Bases, frames, and channels of enclosure must be corrosion resistant, fabricated of ASTM A240 Type 304 or 304L stainless steel. Base must include part of enclosure that is within **3 inch (75 mm)** of concrete pad. Coat enclosure, including bases, must be ASTM D1535 light gray No. 61 or No. 49. Coating system must comply with IEEE C57.12.29 for stainless steel.
- E. Features:
 1. Structural design and anchorage adequate to resist seismic and wind loads specified in Section 260011 "Facility Performance Requirements for Electrical."
 2. Sloping, standing-seam type, insulated roof panels.
 3. Mount shipping group on integral base frame as complete weatherproof unit.

4. Aisle-Less Construction: Vertical sections must have the following:
 - a. Hinged front door with padlocking provisions.
 - b. Interior light with switch.
 - c. Weatherproof duplex receptacle.
 - d. With draft-stop where busway exits vertical section.
 - e. Vertical Section Space Conditioning: Provide outside-air openings with insect and rodent screens and filters; arranged to permit air circulation while excluding insects, rodents, and exterior dust. Provide thermostatically controlled space heaters operating at one-half or less of rated voltage.
5. Common Internal Aisle-Type Construction:
 - a. With aisle of sufficient width to permit protective-device withdrawal, disassembly, and servicing in aisle.
 - b. Aisle access doors with outside padlocking provisions and interior panic latches.
 - c. Vaporproof **[LED aisle lights][fluorescent aisle lights with low-temperature ballasts]**, controlled by wall switches at entrances.
 - d. GFCI duplex receptacles, minimum of two, located in aisle.
 - e. Interior Space Conditioning:
 - 1) Forced-air aisle ventilation with thermostatically controlled vent fans, interlocked with aisle space heaters operating at one-half or less of rated voltage. Provide outside-air openings with insect and rodent screens and filters; arranged to permit air circulation while excluding insects, rodents, and exterior dust.
 - 2) Air conditioned.

2.10 CIRCUIT BREAKERS

- A. Drawout type, unfused, power operated, with electromechanical or electronic trip devices. Comply with IEEE C37.13, IEEE C37.13a, and UL 1066.
- B. Ratings: For continuous, interrupting, and short-time current ratings for circuit breakers; voltage and frequency ratings same as switchgear. Comply with IEEE C37.16.
 1. Circuit breakers must have 30-cycle short-time withstand ratings equal to their symmetrical interrupting ratings through 85 000 A, whether or not equipped with instantaneous trip protection.
- C. Operating Mechanism: Mechanically and electrically trip-free, stored-energy operating mechanism with the following features:
 1. Normal Closing Speed: Independent of both control and operator.
 2. Slow Closing Speed: Optional with operator for inspection and adjustment.
 3. Stored-Energy Mechanism: **[Manually charged][Electrically charged][Electrically charged, and operator's choice of manual charging]**.
 - a. Operating Handle: One for each circuit breaker capable of manual operation.
 - b. Electric Close Button: One for each electrically operated circuit breaker.
 4. Provide interlock to discharge stored energy mechanism before circuit breaker can be withdrawn from its compartment.
 5. Operation counter.
- D. Operator Display: Located on face of circuit breaker.

1. Electrical operation buttons to open and close circuit breaker.[**Provide clear lockable cover over buttons.**]
 2. Indicating Lights: To indicate circuit breaker is open or closed, for main and bus tie circuit breakers interlocked either with each other or with external devices. Energized or hot condition must be indicated by red light. De-energized, open, and safe condition must be indicated by green light.
 3. Indicator to show position of circuit-breaker contacts, status of closing springs, and circuit-breaker position in its compartment.
 4. Provide "Charged-not OK to close" indicator when closing springs are charged but circuit breaker is not ready to close.
 5. Computer Display: One or more **[touchscreen]**computer displays with dedicated CPU, to display data that are generated for transmission via Ethernet connection. Display the following functions:
 - a. Circuit-breaker status and circuit-breaker controls status.
 - b. Onboard meters.
 - c. User settings for overcurrent protection and undervoltage protection.
 - d. **<Insert features>**.
- E. Overcurrent Protective Tripping: Microprocessor-based, programmable, time-current shaping adjustments; complete with current transformers and sensors and the following features:
1. Programmable functions independent of each other in both action and adjustment.
 - a. Long-time setting.
 - b. Long-time-delay with selectable I2T or I4T curve shaping.
 - c. Short-time setting.
 - d. Short-time-delay with flat or selectable I2T curve shaping.
 - e. Instantaneous trip.
 2. Field-adjustable, time-current characteristics.
 3. Current Adjustability: Dial settings and rating plugs on trip units, or sensors on circuit breakers, or combination of these methods.
 4. Three bands, minimum, for long-time- and short-time-delay functions; marked "minimum," "intermediate," and "maximum."
 5. Pickup Points:
 - a. Five minimum, for long-time- and short-time-trip functions. Equip short-time-trip function for switchable I2T operation.
 - b. Five minimum, for instantaneous-trip functions.
- F. Ground-Fault Protection:
1. Ground-fault protection with at least three short-time-delay settings and three trip-time-delay bands; adjustable current pickup.
 2. Trip Indication: Labeled, battery-powered lights or mechanical targets on trip device to indicate type of fault.
 3. Test Form: Provide ground-fault relays with information sheets describing system-testing instructions, and with test form; comply with UL 1558.
- G. Undervoltage Trip Devices:
1. Instantaneous, with adjustable pickup voltage.
 2. Adjustable time-delay and pickup voltage.
- H. Shunt-Trip Devices.

**I. Metering:**

1. Accuracy: **[0.5][1.0]** percent of reading, complying with ANSI C12.20.
2. Values must be RMS average over period of one second.
 - a. Current: Each phase, **[neutral]** and three-phase average.
 - b. Voltage: L-L for each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - c. Active Power (kW): **[Each phase and]** three-phase total.
 - d. Reactive Power (kVAR): **[Each phase and]** three-phase total.
 - e. Apparent Power (kVA): **[Each phase and]** three-phase total.
 - f. Power Factor: **[Each phase and]** three-phase total.
 - g. Active Energy (kWh): Three-phase total.

J. Auxiliary Contacts:

1. Contacts and switches required for normal circuit-breaker operation, sufficient for interlocking and remote indication of circuit-breaker position.
2. Spare auxiliary switches, at least two, unless otherwise indicated. Switches must consist of two Type A and two Type B contacts wired through secondary disconnect devices to terminal block in stationary circuit-breaker compartment.

K. Arc Chutes: Readily removable from associated circuit breaker when it is in disconnected position, and arranged to permit inspection of contacts without removing circuit breaker from switchgear.**L. Padlocking Provisions:** For installing at least three padlocks on circuit breakers to secure its enclosure and prevent movement of drawout mechanism.**M. Mechanical Interlocking of Circuit Breakers:** Uses mechanical tripping lever or equivalent design and electrical interlocks.**N. Key Interlocks:** Arranged to prevent opening or closing of interlocked circuit breakers, except in specified sequence. Include mountings and hardware for future installation of key interlocks.**2.11 ARC-FLASH LIMITING FEEDER CIRCUIT BREAKERS**

- A. Feeder circuit breakers must be without current-limiting fuses, listed as complying with UL 1066.
- B. Short-circuit withstand current rating must be 200 kA.
- C. Equip arc-flash limiting feeder circuit breakers with Arc-Flash Maintenance Setting switch for use as temporary arc-flash incident energy-reduction device during maintenance activities on that feeder.
 1. Provide manual switch on compartment door to switch circuit-breaker short-time tripping characteristics to instantaneous with minimum pickup setting, to reduce danger from potential arc-flash at downstream equipment.
 2. Provide lock feature for switch so that it may be locked in either off or on maintenance-mode position.
 3. Provide blue LED indicating light to indicate that switch is in maintenance mode.
 4. Provide dry relay contacts on switches for annunciation of switch position.

2.12 ZONE-SELECTIVE INTERLOCKING

- A. Trip units for indicated circuit breakers must include zone-interlocking capability for short-time delay and ground-fault delay trip functions for system coordination and arc energy reduction. Zone-interlocking system must restrain tripping of upstream circuit breaker and allow circuit breaker closest to fault to trip with no intentional time delay. In event that downstream breaker does not trip, upstream breaker must trip after preset time delay. **[Zone-interlock system must be factory wired and tested for circuit breakers within switchgear.]**

2.13 NETWORK PROTECTORS

- A. Comply with IEEE 57.12.44 and IEEE C37.20.1. Switch must comply with UL 1066.
1. Dead-front, drawout design with externally mounted fuses, using hand-cranked rail system. Include mechanical interlocks to prevent racking in and racking out when protector is closed.
 2. Locate relay and control panel on separate drawout module.
 3. Protector Operator: **[Spring-close][and][or][stored-energy]** mechanism, rated to close on **[25 000 A(rms sym)][40 000 A(rms sym)]** load.
 4. Program relay with factory-default values. Make provisions to field adjust these values using relay calibration procedures. Include antipumping program to lock protector open under abnormal conditions.
 5. Include current-limiting fuses on network side of protector for protection against switchboard bus faults.
- B. Controls must be via microprocessor-based, three-phase network relay, with the following features and functions:
1. Protector control must use positive and negative sequence-based algorithm for current and voltage.
 2. Close protector if positive sequence power flows into network. Adjustable closing range must be from 0.5 to 3.5 V in phase difference between network and transformer voltages.
 3. Trip protector if there is net, three-phase, reverse power flow through protector. Trip protectors must be adjustable from 0.05 to 5 percent of continuous-current rating of current transformers within protector.
 4. Trip protector if there is flow of reverse magnetizing current to its associated transformer.
 5. Relay parameters and W or VAR trip values must be field adjustable.
 6. Protector may not open under fault on network side of protector.
 7. Include auxiliary contacts and control wiring for use with remote pilot devices that provide remote trip and lockout functions in low-voltage switchgear. Include **[two]<Insert number>** spare auxiliary contacts and equal number of N.O. and N.C. types.
- C. Communicate the following network relay parameters:
1. Current in each phase.
 2. Phase-to-phase and phase-to-neutral voltages.
 3. Three-phase W, VAR, and VA.
 4. Frequency.
 5. Power factor.
 6. Network relay set points.

2.14 SURGE SUPPRESSION

- A. Factory Installed: Integral part of low-voltage switchgear, complying with UL 1449 SPD, Type 1, with the

following features and accessories:

1. Integral disconnect switch.
2. Internal thermal protection that disconnects SPD before damaging internal suppressor components.
3. Indicator light display for protection status.
4. Form-C contacts rated at 5 A 250 V(ac), one N.O. and one N.C., for remote monitoring of protection status. [**Contacts must reverse on failure of surge diversion module or on opening of current-limiting device. Coordinate with building power monitoring and control system.**]
5. Surge counter.

- B. Field Mounted: Complying with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits." Include the following features and accessories:

1. Integral disconnect switch.
2. Internal thermal protection that disconnects SPD before damaging internal suppressor components.
3. Indicator light display for protection status.
4. Form-C contacts rated at 5 A 250 V(ac), one N.O. and one N.C., for remote monitoring of protection status. [**Contacts must reverse on failure of surge diversion module or on opening of current-limiting device. Coordinate with building power monitoring and control system.**]
5. Surge counter.

2.15 CONTROL POWER SUPPLY, 120 V(ac)

- A. Control Power Transformer: Supply 120 V control circuits through dry-type control power transformers, include secondary disconnect devices.

1. Place transformers larger than 3 kVA in separate compartments at bottom of vertical section, including related primary and secondary fuses.
2. Two control power transformers in separate compartments with necessary interlocking relays; transformers connected to line side of associated main circuit breaker.
 - a. Secondary windings connected through relay(s) to control bus to affect automatic transfer scheme.
 - b. Secondary windings connected through internal automatic transfer switch to switchgear control power bus.
3. Control Power Fuses: Primary and secondary fuses provide current-limiting and overload protection.

2.16 CONTROL POWER SUPPLY, 24 V(dc)

- A. System Requirements: Battery must have number of cells and ampere-hour capacity based on initial specific gravity of 1.210 at 25 deg C with electrolyte at normal level and minimum ambient temperature of 13 deg C. Cycle battery before shipment to guarantee rated capacity on installation. Arrange battery to operate ungrounded. Battery system capacity must be as recommended by switchgear manufacturer to operate circuit breakers for intended duty.
- B. Battery: [**Standard VRLA**] [**Premium VRLA**] [**Vented NiCd** ,] batteries, with battery disconnect and overcurrent protective device.

- C. Rack: Two-step rack with electrical connections between battery cells and between rows of cells; include two flexible connectors with bolted-type terminals for output leads. **[Rate battery rack, cell supports, and anchorage for seismic requirements.]**
- D. Accessories:
 - 1. Thermometers with specific-gravity correction scales.
 - 2. Hydrometer syringes.
 - 3. Set of cell numerals.
- E. Charger: Static-type silicon rectifier equipped with automatic regulation and provision for manual and automatic adjustment of charging rate. Unit must automatically maintain output voltage within 0.5 percent from no load to rated charger output current, with AC input-voltage variation of plus or minus 10 percent and input-frequency variation of plus or minus 3 Hz.
 - 1. DC ammeter.
 - 2. DC Voltmeter: Maximum error of 5 percent at full-charge voltage, with toggle switch to select between battery and charger voltages.
 - 3. Ground Indication: Two appropriately labeled lights to indicate circuit ground, connected in series between negative and positive terminals, with midpoint junction connected to ground by N.O. push-button contact.
 - 4. Capacity: Sufficient to supply steady load, float-charge battery between 2.20 and 2.25 V per cell, and equalizing charge at 2.33 V per cell.
 - 5. Charging-Rate Switch: Manually operated switch to transfer to higher charging rate. Charger operation must be automatic until manually reset.
 - 6. AC Power Supply: 120 V, 60 Hz, subject to plus or minus 10 percent variation in voltage and plus or minus 3 Hz variation in frequency. Automatic charger operation must resume after loss of AC power supply for interval.
 - 7. Charging Regulator: Protect charger from damage due to overload, including short circuit on output terminals. Device must regulate charging current but may not disconnect charger from either battery or AC supply.
 - 8. Charger's Audible Noise: Less than 26 dB(A-weighted).

2.17 INSTRUMENTATION AND CONTROL

- A. Power Distribution Equipment must be web enabled, direct connected to Local Area Network (LAN) or Intranet.
- B. Ethernet Connectivity:
 - 1. Install multipoint, TIA-485 MODBUS serial communications network within switchgear to interconnect breaker trip units, protective relays, drives, and metering devices equipped with communications.
 - 2. Serial communications network must be wired to Ethernet gateway in switchgear. Gateway must be web enabled, with integral network port and embedded web server with factory-configured firmware and HTML-formatted web pages for viewing of power monitoring and equipment status information from switchgear devices equipped with digital communication ports.
 - 3. LAN must consist of multipoint, TIA-485 MODBUS serial communication network to interconnect breaker trip units, protective relays, drives, and metering devices equipped with communications. Serial communication network must be connected to Ethernet server that functions as gateway and server, providing data access via **[10 Base-T][100 Base-T][100 Base-TX][100 Base FX]** LAN.
 - 4. Server Configuration:

- a. Initial network parameters set using standard web browser. Connect via local operator interface, or TIA-1096 Type 8P8C jack accessible from front of equipment.
 - b. Network server must be factory programmed with embedded HTML-formatted web pages that are user configurable and that provide detailed communication diagnostic information for serial and Ethernet ports as status of TIA-485 network; with internal memory management information pages for viewing using standard web browser.
 - c. Password-protected login, with password administration accessible from LAN using standard web browser.
 - d. Operating Software: Suitable for local access; firewall protected.
5. All serial communications devices within equipment must be addressed at factory and tested.
- C. Instrument Transformers: Comply with IEEE C57.13. Instrument transformers may not be used to power space conditioning equipment associated with outdoor switchgear, or for power to convenience receptacles and lighting.
 1. Potential Transformers: Secondary voltage rating of 120 V and NEMA C12.11 Accuracy class of 0.3 with burdens of W, X, and Y.
 2. Current Transformers: Burden and Accuracy class suitable for connected relays, meters, and instruments.
- D. Analog Instruments: Rectangular, **4-1/2 inch (115 mm)** square, 1 percent accuracy, semiflush mounting, with antiparallax 250-degree scale and external zero adjustment.
 1. Voltmeters: Cover expanded scale range of normal voltage plus 10 percent.
 2. Voltmeter Selector Switch: Rotary type with off position to provide readings of phase-to-phase[**and phase-to-neutral**] voltages.
 3. Ammeters: Cover expanded scale range of bus rating plus 10 percent.
 4. Ammeter Selector Switch: Permits current reading in each phase and keeps current-transformer secondary circuits closed in off position.
 5. Locate meter and selector switch on circuit-breaker compartment door for indicated feeder circuits only.
 6. Watt-Hour Meters: Flush- or semiflush-mounting type, 5 A, 120 V, three phase, three wire; with three elements, 15-minute indicating demand register, and provision for testing and adding pulse initiation.
 7. Recording Demand Meter: Usable as totalizing relay or indicating and recording maximum demand meter with 15-minute interval.
 - a. Operation: Counts and records succession of pulses entering two channels.
 - b. Housing: Drawout, back-connected case arranged for semiflush mounting.
- E. Power Monitoring: Separately mounted, modular, permanently installed, solid-state, digital I/O multifunction metering instrument for power and energy metering and monitoring, complying with UL 61010-1.
 1. Capable of metering four-wire wye, three-wire wye, three-wire delta, and single-phase power systems.
 2. Equipped with security lock to protect revenue-related metering from unauthorized and accidental changes.
 3. Comply with IEC 60529 degree of protection code of IP65 for front of meter, and code of IP30 for body.
 4. Overvoltage: Comply with UL 61010-1 overvoltage withstand rating for CAT III.
 5. Accuracy:
 - a. Comply with ANSI C12.20, Class 0.5.
 - b. Neutral Current Measurement: Not more than 0.65 percent.

- c. Power Factor: 1.0 percent.
 - d. Frequency: 0.1 percent.
 - e. THD: 1.0 percent.
 - f. Waveform Sampling: 64 per cycle.
6. Data Link: Ethernet connectivity specified in this article.
7. Meter Physical Characteristics:
- a. Display: Backlit LCD with antiglare and scratch-resistant lens.
 - b. Display of Metered Values: One screen to show at least **[three]<Insert number>** user-selected values displayed at same time. Selections available to display must include the following:
 - 1) All meters.
 - 2) Measurements.
 - 3) THD.
 - 4) Energy.
 - 5) Demand.
 - 6) Minimum and maximum values.
 - 7) Power demand.
8. Sampling Rate: Continuously sample and record voltage and current at rate not less than **[64]<Insert number>** samples per cycle, simultaneously on voltage and current channels of meter.
9. Meters:
- a. Instantaneous, RMS:
 - 1) Current: Each phase, **[neutral]** and three-phase average.
 - 2) Voltage: L-L for each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - 3) Active Power (kW): **[Each phase and]** three-phase total.
 - 4) Reactive Power (kVAR): **[Each phase and]** three-phase total.
 - 5) Apparent Power (kVA): **[Each phase and]** three-phase total.
 - 6) Power Factor: **[Each phase and]** three-phase total.
 - b. Energy:
 - 1) Active Energy (kWh): Three-phase total.
 - c. Demand, Derived from Instantaneous RMS Meters:
 - 1) Current: Present and maximum.
 - 2) Active: Present and maximum.
 - 3) Reactive: Present and maximum.
 - 4) Apparent: Present and maximum/
 - d. Power Quality Measurements:
 - 1) THD: Current and voltage from measurements simultaneously from same cycle, as can be calculated from specified sampling rate.
10. I/O: Two optically isolated digital outputs for KYZ pulsing or control. Output signal characteristics must be 150 mA at 200 V.

- a. KYZ Pulse: Generate standard KYZ pulses for user-defined increment of metered active energy as follows:
 - 1) User-defined pulse output, associated with kWh.
 - 2) User-defined pulse output, associated with kVARh.
 - b. <Insert control function>.
11. Capacities and Characteristics:
- a. Circuit Connections:
 - 1) Voltage: Measurement autoranging, 60 to 400 V(ac rms) L-N. [**Connect directly to low-voltage (600 V and less) without using voltage transformers.**] [**Connect to instrument-grade potential transformers secondary at 120 V.**] Meter impedance must be 2 MΩ L-L or greater.
 - 2) Overload Tolerance: 1500 V(ac rms) continuously.
 - 3) Current: Connect to instrument-grade current transformer with metering range of 5 mA to 6 A. Overcurrent tolerance of instrument must be 10 A continuous, 50 A for 10 seconds once per hour, and 120 A for one second per hour.
 - 4) Frequency: 45 to 65 Hz.
 - 5) Time: Input from GPS receiver to synchronize internal clock of instrument and to time-synchronize this instrument with network to deviation of not greater than 1 ms.

2.18 POWER TRANSFER CONFIGURATIONS

- A. Factory-installed and -tested controls of circuit breakers to accomplish automatic transfer controls for switchgear having two power sources.
- B. Relays: Comply with IEEE C37.90, types and settings as indicated; with test blocks and plugs.
- C. Control Wiring:
 - 1. Factory installed, complete with bundling, lacing, and protection.
 - 2. Provide flexible conductors for 8 AWG and smaller, for conductors across hinges and for conductors for interconnections between shipping units.
 - 3. Install plugs in control wiring at shipping splits.
- D. Two-Breaker Transfer Control:
 - 1. Two-breaker transfer control must provide for switchgear assembly with common load bus and two normally energized medium-voltage power sources, designated "normal" and "standby," connected to load bus. Circuit breakers connecting two power sources to load bus must be controlled by microprocessor-based automatic transfer control. Power for transfer control must be from voltage sensing transformers.
 - 2. In automatic mode, load bus is connected to normal power source. When normal source fails, control must automatically open normal power source and close standby source circuit breaker.
 - 3. Sequence of Operation:
 - a. Default operation must be with normal source main breaker closed and standby main breaker open. On detection of undervoltage to line side of normal main breaker and after field-adjustable time delay, that main breaker must open and after additional field-adjustable time delay, standby breaker must close restoring power to facility.
 - b. On restoration of voltage to line side of normal main breaker and after field-adjustable time delay, standby main breaker must open and after field-adjustable time delay, normal main

breaker must close.

4. Field-Adjustable Transfer Parameters:

- a. Delay transfer from normal power source to standby power source and from standby power source to normal source. Time delay is to allow load voltage to decay before reconnecting to another power source. Delay range: zero seconds to 30 minutes.
- b. Delay initiation of transfer sequence. Time delay is recommended to override momentary power outage or voltage fluctuation. Delay range: zero seconds to 120 seconds.
- c. Delay transfer from standby power source to normal power source. Delay range: zero seconds to 30 minutes.
- d. A relay with contact that changes state when power is available on normal source and relay with contact that changes state when power is available on standby source.

5. Controls and Indicators: Besides delay setting controls, provide the following:

- a. Interlocks or relay control to prevent transfer when either of two controlled circuit breakers are tripped due to overcurrent or ground fault.
- b. Three-position selector switch to select normal source: Source 1, Source 2, or none.
- c. Transfer-control automatic and manual selector.
 - 1) Interlock must prevent paralleling of two power sources in manual mode.
- d. Open-close control switch for manual electrical operation of controlled circuit breakers.
- e. Selector to place control into programming mode.
- f. Circuit-breaker control switch for normal and standby source breakers, providing open and close operation.
- g. Push-button to initiate manual retransfer to normal source when transfer controller is in automatic mode.
- h. Meters and display to show the following:
 - 1) Voltage and frequency of both sources.
 - 2) A multiline display showing the following:
 - a) Set points of timers, and voltage pickup and dropout set points.
 - b) Date, time, and reason for at least last 10 transfers. Display may show information for one transfer at time using scrolling control, with others held in memory.
 - c) When control system is in transferring process, display must show delay countdown in seconds.
- i. LED indicator lights to show the following:
 - 1) Normal source available.
 - 2) Standby source available.
 - 3) Normal source connected.
 - 4) Standby source connected.
 - 5) Load bus energized.

6. Voltage Transformers: Primary and secondary protection and disconnecting means for sensing functions and control power.

7. Voltage Sensing Relays: Microprocessor-based ANSI No. 27/47 voltage detection relays for three-phase undervoltage protection and negative sequence voltage protection.

E. Three-Breaker Transfer Control:

1. Switchgear assembly, with two normally energized, medium-voltage power sources designated "Main 1" and "Main 2" connected to load bus. N.O. bus tie circuit breaker can tie two load buses. Three circuit breakers must be controlled by microprocessor-based automatic-transfer control. Power for transfer control must be from voltage sensing transformers.
2. In automatic mode, on loss of voltage to line side of source, that main breaker must open and then bus tie must close. On restoration of power to previously failed main breaker, bus tie must open and open main must close.
3. Sequence of Operation:
 - a. Default operation must be with main breakers closed and bus tie breaker open. On detection of undervoltage to line side of main breaker and after field-adjustable time delay, that main breaker must open and after additional field-adjustable time delay, bus tie breaker must close, restoring power to failed bus.
 - b. On restoration of voltage to line side of previously failed main breaker and after field-adjustable time delay, tie breaker must open and after field-adjustable time delay, previously failed main breaker must close.
4. Field-Adjustable Transfer Parameters:
 - a. Delay opening of failed main and closing of bus tie. Time delay is to allow load voltage to decay before reconnecting to another power source. Delay range: zero seconds to 30 minutes.
 - b. Delay initiation of transfer sequence. Time delay is recommended to override momentary power outage or voltage fluctuation. Delay range: zero to 120 seconds.
 - c. Delay opening of bus tie and closing of previously failed main. Time delay is to allow bus voltage to decay before reconnecting to another power source. Delay range: zero seconds to 30 minutes.
5. Controls and indicators must include the following in addition to delay setting controls:
 - a. Interlocks or relay control to prevent transfer when any of three controlled circuit breakers trip due to overcurrent or ground fault.
 - b. Transfer control automatic and manual selector.
 - 1) Interlock that prevents paralleling of two mains in manual or automatic mode.
 - c. Open-close control switch for manual electrical operation of controlled circuit breakers.
 - d. Selector must place control into programming mode.
 - e. A relay with contact that changes state when power is available on both mains and relay with contact that changes state to indicate open main and when bus tie is closed.
 - f. Push-button to initiate manual retransfer to previously failed source when transfer controller is in automatic mode.
 - g. Meters and display must show the following:
 - 1) Voltage and frequency at line side of both mains.
 - 2) A multiline display must show following:
 - a) Set points of timers, and voltage pickup and dropout set points.
 - b) Date, time, and reason for at least last 10 transfers. Display may show information for one transfer at time using scrolling control, with others held in memory.
 - c) When control system is in transferring process, display must show delay countdown in seconds.
 - h. LED indicator lights must show the following:

- 1) Main source available.
 - 2) Main source unavailable.
 - 3) Main closed.
 - 4) Main open.
 - 5) Bus tie open or closed.
6. Voltage transformers must have primary and secondary protection and disconnecting means for sensing functions and control power.
 7. Voltage Sensing Relays: Microprocessor-based ANSI No. 27/47 voltage detection relays for three-phase undervoltage protection and negative-sequence voltage protection.

2.19 DIFFERENTIAL GROUND-FAULT PROTECTION

- A. Description: Ground-fault protection system for three-phase, four-wire switchgear having multiple sources must be devised by manufacturer to insure that proper main or tie breaker(s) operate properly in normal and emergency conditions. Switchgear must include additional current transformers, ground-fault relays, interlocks, wiring, and accessories to avoid nuisance tripping of circuit breakers connected to main bus of switchgear. Ensure that the following occurs on main bus:
 1. A ground fault at location in switchgear must trip system.
 2. Combination of normal current flow and ground-fault current flow must trip system.
 3. Circulating currents through neutral due to multiple grounds and sources external to immediate low-voltage power sources may not trip system.
 4. System may not trip if there is no ground fault, during normal current flow.
 5. System may not trip due to large single-phase currents.
- B. Relays: Comply with IEEE C37.90, with test blocks and plugs.
- C. Control Wiring:
 1. Factory installed, complete with bundling, lacing, and protection.
 2. Provide flexible conductors for 8 AWG and smaller, for conductors across hinges and for conductors for interconnections between shipping units.
 3. Install plugs in control wiring at shipping splits.

2.20 SOURCE QUALITY CONTROL

- A. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
- B. Testing Administrator: **[Owner will engage][Engage]** qualified testing agency to evaluate low-voltage switchgear.
- C. Factory Tests and Inspections: Test and inspect low-voltage switchgear, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with IEEE C37.20.1 before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance on control units. Drawout circuit breakers need not be tested in assembly if they are tested separately.
 1. Dielectric Tests: Perform power-frequency withstand tests to demonstrate ability of insulation system to withstand voltages listed in IEEE C37.20.1. Voltage must be increased gradually from zero to required test value within 5 to 10 seconds and must be held at that value for one minute.
 2. Perform mechanical operation tests to ensure proper functioning of operating mechanism,

- mechanical interlocks, and interchangeability of removable elements that are designed to be interchangeable.
- 3. Test effectiveness of grounding of metal-case instrument transformer frame or case.
- 4. Verify that control wiring is correct by verifying continuity. Perform electrical operation of component devices to ensure that they function properly and in intended sequence.
- 5. Perform control wiring insulation tests.
- 6. Verify correct polarity of connections between instrument transformers and meters and relays.
- D. Serial communications devices within equipment must be addressed at factory and tested to verify reliable communications to equipment's Ethernet gateway.
- E. Nonconforming Work:
 - 1. Low-voltage switchgear assembly will be considered defective if it does not pass tests and inspections.
- F. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and space conditions for compliance with requirements for secondary unit substations and other conditions affecting performance of the Work.
- B. Examine roughing-in of conduits and grounding systems to verify the following:
 - 1. Wiring entries comply with layout requirements.
 - 2. Entries are within conduit-entry tolerances specified by manufacturer, and no feeders will have to cross section barriers to reach load or line lugs.
- C. Examine walls, floors, roofs, and concrete bases for suitable conditions where switchgear will be installed.
- D. Verify that ground connections are in place and that requirements in Section 260526 "Grounding and Bonding for Electrical Systems" have been met. Maximum ground resistance must be **[5 Ω]<Insert Ω>** at switchgear location.
- E. On delivery of switchgear and prior to unloading, inspect equipment for damage.
 - 1. Verify that tie rods and chains are undamaged and tight, and that blocking and bracing are tight.
 - 2. Verify that there is no evidence of load shifting in transit, and that readings from transportation shock recorders, if equipped, are within manufacturer's published instructions.
 - 3. Examine switchgear for external damage, including dents or scratches in doors and sill, and termination provisions.
 - 4. Compare switchgear and accessories received with bill of materials to verify that shipment is complete. Verify that switchgear and accessories comply with manufacturer's published instructions and Shop Drawings. If shipment is incomplete or does not comply with Project requirements, notify manufacturer in writing immediately.
 - 5. Unload switchgear, observing packing label warnings and handling instructions.
 - 6. Open compartment doors and inspect components for damage or displaced parts, loose or broken connections, cracked or chipped insulators, bent mounting flanges, dirt or foreign material, and water or moisture.

- F. Handling:
1. Handle switchgear, in accordance with manufacturer's published instructions; avoid damage to enclosure, termination compartments, base, frame, tank, and internal components. Do not subject switchgear to impact, jolting, jarring, or rough handling.
 2. Protect switchgear compartments against entrance of dust, rain, and snow.
 3. Transport switchgear upright, to avoid internal stresses on equipment mounting assemblies. Do not tilt or tip switchgear.
 4. Use spreaders or lifting beam to obtain vertical lift and to protect switchgear from straps bearing against enclosure. Lifting cable pull angles may not be greater than 15 degrees from vertical.
 5. Do not damage structure when handling switchgear.
- G. Proceed with installation only after examinations are complete and unsatisfactory conditions have been corrected.

3.2 INSTALLATION

- A. Install switchgear on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 260529 "Hangers and Supports for Electrical Systems."
- B. Comply with requirements for vibration isolation and seismic-control devices specified in Section 260529 "Hangers and Supports for Electrical Systems" and **[Section 260548 "Vibration and Seismic Controls for Electrical Systems."][Section 260548.16 "Seismic Controls for Electrical Systems."]**
- C. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's published instructions and NFPA 70.

3.3 CONNECTIONS

- A. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."
- B. Grounding Connections at Exterior Locations:
1. Install tinned bare copper conductors not smaller than 4/0 AWG, for ground conductors buried not less than **30 inch (765 mm)** below grade interconnecting grounding electrodes.
 2. Bond surge arrester and neutrals directly to switchgear enclosure and then to grounding electrode system with bare copper conductors, sized as indicated.
 3. Keep lead lengths as short as practicable with no kinks or sharp bends.
 4. Make joints in grounding conductors and loops by exothermic weld or compression connector.
 5. Fence and equipment connections may not be smaller than 4 AWG.
 6. Ground fence at gate posts and corner posts and at intervals not exceeding **10 ft (3 m)**.
 7. Bond gate sections to fence posts using **1/8 by 1 inch (3 by 25 mm) [tinned,]flexible braided copper strap and clamps.**
- C. Terminate grounding and bonding conductors on common equipment grounding terminal on switchgear enclosure. Install supplemental terminal bars, lugs, and bonding jumpers as required to accommodate number of conductors for termination.
- D. Complete switchgear grounding and surge-protector connections prior to making other electrical connections.

3.4 IDENTIFICATION

- A. Comply with installation requirements for labels and signs specified in Section 260553 "Identification for Electrical Systems."
- B. Install warning signs as required to comply with OSHA 29 CFR 1910.269.
- C. Compartment Nameplates: **[Engraved, laminated-acrylic][Engraved, melamine plastic][Preprinted aluminum signs]**, as described in Section 260553 "Identification for Electrical Systems," for compartments, mounted with corrosion-resistant screws.
- D. Mimic Bus: Continuous mimic bus, arranged in single-line diagram format, using symbols and lettered designations consistent with approved mimic-bus diagram.
 - 1. Mimic-bus segments coordinated with devices in switchgear sections to which applied, to produce concise visual presentation of principal switchgear components and connections.
 - 2. Medium: Painted graphics, as selected by Architect.
 - 3. Color: Contrasting with factory-finish background; as selected by Architect from manufacturer's full range.
- E. Arc-Flash Warning Labels:
 - 1. Comply with requirements in Section 260573.19 "Arc-Flash Hazard Analysis." Produce **3.5 by 5 inch (76 by 127 mm)** self-adhesive equipment label for work locations included in analysis.
 - 2. Comply with requirements in Section 260553 "Identification for Electrical Systems." Produce **3.5 by 5 inch (76 by 127 mm)** self-adhesive equipment label for work locations included in analysis. Labels must be machine printed, with no field-applied markings.
 - a. Label must have orange header with wording, "WARNING, ARC-FLASH HAZARD," and must include the following information taken directly from arc-flash hazard analysis:
 - 1) Location designation.
 - 2) Nominal voltage.
 - 3) Flash protection boundary.
 - 4) Hazard risk category.
 - 5) Incident energy.
 - 6) Working distance.
 - 7) Engineering report number, revision number, and issue date.
 - b. Labels must be machine printed, with no field-applied markings.

3.5 FIELD QUALITY CONTROL

- A. Acceptance Testing Preparation:
 - 1. **<Insert requirements>**.
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- C. Tests and Inspections:
 - 1. Comply with provisions of "Testing and Test Methods" Chapter in NFPA 70B and NETA ATS.
 - 2. After installing switchgear and after electrical circuitry has been energized, test for compliance

- with requirements.
3. Perform visual and mechanical inspections and electrical tests stated in NETA ATS. Certify compliance with test parameters.
 4. Visual and Mechanical Inspection:
 - a. Verify that fuse and circuit-breaker sizes and types correspond to Drawings and coordination study[, **as well as to circuit breaker's address in control network**].
 - b. Verify that current and voltage transformer ratios correspond to Drawings.
 - c. Inspect bolted electrical connections for high resistance using one of the following two methods:
 - 1) Use low-resistance ohmmeter to compare bolted-connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.
 - d. Confirm correct operation and sequencing of electrical and mechanical interlock systems.
 - 1) Attempt closure on locked-open devices. Attempt to open locked-closed devices.
 - 2) Make key exchange with devices operated in off-normal positions.
 - e. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
 - f. Inspect insulators for evidence of physical damage or contaminated surfaces.
 - g. Verify correct barrier and shutter installation and operation.
 - h. Exercise active components.
 - i. Inspect mechanical indicating devices for correct operation.
 - j. Verify that filters are in place and that vents are clear.
 - k. Perform visual and mechanical inspection of instrument transformers in accordance with "Instrument Transformer Field Tests" Paragraph.
 - l. Inspect control power transformers.
 - 1) Inspect for physical damage, cracked insulation, broken leads, tightness of connections, defective wiring, and overall general condition.
 - 2) Verify that primary and secondary fuse or circuit-breaker ratings match Drawings.
 - 3) Verify correct functioning of drawout disconnecting and grounding contacts and interlocks.
 5. Electrical Tests:
 - a. Perform DC voltage insulation-resistance tests on bus sections, phase-to-phase and phase-to-ground, for one minute. If bus temperature is other than plus or minus 20 deg C, adjust resulting resistance as provided in NETA ATS, Table 100.11.
 - 1) Insulation-resistance values of bus insulation must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than manufacturer's published instructions or NETA ATS, Table 100.1.
 - 2) Do not proceed to dielectric withstand voltage tests until insulation-resistance levels are raised above minimum values.

- b. Perform dielectric withstand voltage test on bus sections, phase-to-ground with phases not under test grounded, in accordance with manufacturer's published data. If manufacturer has no recommendation for this test, it must be conducted in accordance with NETA ATS, Table 100.2. Apply test voltage for one minute.
 - 1) If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric withstand test, test specimen is considered to have passed test.
 - c. Perform insulation-resistance tests on control wiring for ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid-state components or control devices that cannot tolerate applied voltage, follow manufacturer's published instruction.
 - 1) Minimum insulation-resistance values of control wiring may not be less than 2 MΩ.
 - d. Control Power Transformers:
 - 1) Perform insulation-resistance tests. Perform measurements from winding-to-winding and windings-to-ground. Insulation-resistance values of winding insulation must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than manufacturer's published instructions or NETA ATS, Table 100.1.
 - 2) Perform secondary wiring integrity test. Disconnect transformer at secondary terminals and connect secondary wiring to rated secondary voltage source. Verify correct potential at devices.
 - 3) Verify correct secondary voltage by energizing primary winding with system voltage. Measure secondary voltage with secondary wiring disconnected.
 - 4) Verify correct function of control transfer relays located in switchgear with multiple control power sources.
 - e. Voltage Transformers:
 - 1) Perform secondary wiring integrity test. Verify correct potential at devices.
 - 2) Verify secondary voltages by energizing primary winding with system voltage.
 - f. Perform current-injection tests on entire current circuit in switchgear sections.
 - 1) Perform current tests by secondary injection with magnitudes such that minimum 1.0 A current flows in secondary circuit. Verify correct magnitude of current at devices in circuit.
 - 2) Perform current tests by primary injection with magnitudes such that minimum 1.0 A current flows in secondary circuit. Verify correct magnitude of current at devices in circuit.
 - g. Perform system function tests in accordance with "System Function Tests" Paragraph.
 - h. Verify operation of space heaters.
 - i. Perform phasing checks on double-ended or dual-source switchgear to ensure correct bus phasing from sources.
- D. Circuit-Breaker Field Tests:
- 1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.

- b. Inspect anchorage, alignment, and grounding.
- c. Verify that maintenance devices are available for servicing and operating breaker.
- d. Verify unit is clean.
- e. Verify that arc chutes are intact.
- f. Inspect moving and stationary contacts for condition and alignment.
- g. Verify that primary and secondary contact wipe and other dimensions vital to satisfactory operation of breaker are correct.
- h. Perform mechanical operator and contact alignment tests on both breaker and its operating mechanism in accordance with manufacturer's published data.
- i. Verify cell fit and element alignment.
- j. Verify racking mechanism operation.
- k. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
- l. Perform adjustments for final protective-device settings in accordance with coordination study provided by Owner.
- m. Record as-found and as-left operation counter readings.

2. Electrical Tests:

- a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to ground with switch closed, and across open poles. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.1. Insulation-resistance values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Values of insulation resistance less than Table 100.1 or manufacturer's published instructions must be investigated.
- b. Measure contact resistance across power contacts of circuit breakers. Drop values for $\mu\Omega$ or mV(dc) may not exceed high levels of normal range as indicated in manufacturer's published data. In absence of manufacturer's published data, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
- c. Determine long-time pickup and delay by primary current injection. Long-time pickup values must be as specified, and trip characteristic may not exceed manufacturer's published time-current characteristic tolerance band, including adjustment factors. If manufacturer's curves are unavailable, trip times may not exceed value shown in NETA ATS, Table 100.7.
- d. Determine short-time pickup and delay by primary current injection. Short-time pickup values must be as specified, and trip characteristic may not exceed manufacturer's published time-current tolerance band.
- e. Determine ground-fault pickup and delay by primary current injection. Ground-fault pickup values must be as specified, and trip characteristic may not exceed manufacturer's published time-current tolerance band.
- f. Determine instantaneous pickup value by primary current injection. Instantaneous pickup values must be as specified and within manufacturer's published tolerances. In absence of manufacturer's published data, comply with NETA ATS, Table 100.8.
- g. Test functions of trip unit by means of secondary injection. Pickup values and trip characteristic must be as specified and within manufacturer's published tolerances.
- h. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of shunt trip and close coils must comply with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.20.
- i. Measure fuse resistance. Investigate fuse-resistance values that deviate from each other by more than 15 percent.
- j. Verify correct operation of auxiliary features, such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free operation, antipump function, and trip-unit battery condition. Reset trip logs and indicators. Auxiliary features must operate in

- accordance with manufacturer's published data.
- k. Verify operation of charging mechanism. Charging mechanism must operate in accordance with manufacturer's published data.

E. Instrument Transformer Field Tests:

1. Visual and Mechanical Inspection:

- a. Verify that equipment nameplate data complies with Contract Documents.
- b. Inspect physical and mechanical condition.
- c. Verify correct connection of transformers with system requirements.
- d. Verify that adequate clearances exist between primary and secondary circuit wiring.
- e. Verify that unit is clean.
- f. Inspect bolted electrical connections for high resistance using one of the following two methods:
 - 1) Use low-resistance ohmmeter to compare bolted-connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.
- g. Verify that required grounding and shorting connections provide contact.
- h. Verify correct operation of transformer withdrawal mechanism and grounding operation.
- i. Verify correct primary and secondary fuse sizes for voltage transformers.
- j. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.

2. Electrical Tests of Current Transformers:

- a. Perform insulation-resistance test of current transformers and secondary wiring for ground at 1000 V(dc) for one minute. For units with solid-state components that cannot tolerate applied voltage, follow manufacturer's published instructions. Investigate and correct values of insulation resistance less than manufacturer's published instructions or NETA ATS, Table 100.5.
- b. Perform polarity test on current transformers in accordance with IEEE C57.13.1. Polarity results must agree with transformer markings.
- c. Perform ratio-verification test using voltage or current method in accordance with IEEE C57.13.1. Ratio errors must be in accordance with IEEE C57.13.
- d. Perform excitation test on transformers used for relaying applications in accordance with IEEE C57.13.1. Excitation results must match curve supplied by manufacturer or be in accordance with IEEE C57.13.1.
- e. Measure current circuit burdens at transformer terminals in accordance with IEEE C57.13.1. Measured burdens must be compared to, and must match, instrument transformer ratings.
- f. Perform insulation-resistance tests on primary winding with secondary grounded. Test voltages must be in accordance with NETA ATS, Table 100.5.
- g. Perform dielectric withstand tests on primary winding with secondary grounded. Test voltages must be in accordance with NETA ATS, Table 100.9.
- h. Perform power-factor or dissipation-factor tests in accordance with test equipment manufacturer's published data.
- i. Verify that current transformer secondary circuits are grounded and have only one grounding point in accordance with IEEE C57.13.3. That grounding point should be located

as specified by Engineer in Project Drawings.

3. Electrical Tests of Voltage Transformers:

- a. Perform insulation-resistance tests, winding-to-winding and windings-to-ground. Test voltages must be applied for one minute in accordance with NETA ATS Table 100.5. For units with solid-state components that cannot tolerate applied voltage, follow manufacturer's published instructions. Investigate and correct values of insulation resistance less than manufacturer's published instructions or NETA ATS, Table 100.5.
- b. Perform polarity test on transformers to verify polarity marks or H1-X1 relationship as applicable. Polarity results must agree with transformer markings.
- c. Perform turns-ratio test on tap positions. Ratio errors must be in accordance with IEEE C57.13.
- d. Measure voltage circuit burdens at transformer terminals. Measured burdens must be compared to, and must match, instrument transformer ratings.
- e. Perform dielectric withstand test on primary windings with secondary windings connected to ground. Dielectric voltage must be in accordance with NETA ATS, Table 100.9. Test voltage must be applied for one minute. If no evidence of distress or insulation failure is observed by end of total time of voltage application during dielectric withstand test, primary windings are considered to have passed test.
- f. Perform power-factor or dissipation-factor tests in accordance with test equipment manufacturer's published data. Power-factor or dissipation-factor values must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use test equipment manufacturer's published data.
- g. Verify that voltage transformer secondary circuits are grounded and have only one grounding point in accordance with IEEE C57.13.3. Test results must indicate that circuits are grounded at only one point.

F. Ground-Resistance Test:

1. Visual and Mechanical Inspection:

- a. Verify that ground system complies with Contract Documents and with Article 250, "Grounding and Bonding," in NFPA 70.
- b. Inspect physical and mechanical condition. Grounding system electrical and mechanical connections must be free of corrosion.
- c. Inspect bolted electrical connections for high resistance using one of the following two methods:
 - 1) Use low-resistance ohmmeter to compare bolted-connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.
- d. Inspect anchorage.

2. Electrical Tests:

- a. Perform fall-of-potential or alternative test in accordance with IEEE 81 on main grounding electrode or system. Resistance between main grounding electrode and ground must be no more than **[5 Ω][maximum ground-resistance value specified in "Examination"**

**Article].**

- b. Perform point-to-point tests to determine resistance between main grounding system and major electrical equipment frames, system neutral, and derived neutral points. Investigate point-to-point resistance values that exceed 0.5 Ω . Compare equipment nameplate data with the Contract Documents.
- c. Inspect physical and mechanical condition.
- d. Inspect bolted electrical connections for high resistance using one of the following two methods:
 - 1) Use low-resistance ohmmeter to compare bolted-connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.

G. Metering Devices Field Tests:**1. Visual and Mechanical Inspection:**

- a. Inspect physical and mechanical condition.
- b. Inspect bolted electrical connections for high resistance using one of the following two methods:
 - 1) Use low-resistance ohmmeter to compare bolted-connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS, Table 100.12.
- c. Inspect cover gasket, cover glass, condition of spiral spring, disk clearance, contacts, and case shorting contacts, as applicable.
- d. Verify that unit is clean.
- e. Verify freedom of movement, end play, and alignment of rotating disk(s).

2. Electrical Tests:

- a. Verify accuracy of meters at cardinal points. Meter accuracy must be in accordance with manufacturer's published data.
- b. Calibrate meters in accordance with manufacturer's published data. Calibration results must be within manufacturer's published tolerances.
- c. Verify instrument multipliers. Instrument multipliers must be in accordance with system design specifications.
- d. Verify that current transformer and voltage transformer secondary circuits are intact. Test results must confirm integrity of secondary circuits of current and voltage transformers.

H. Microprocessor-Based Protective Relay Field Tests:**1. Visual and Mechanical Inspection:**

- a. Record model number, style number, serial number, firmware revision, software revision,

- and rated control voltage.
- b. Verify operation of LEDs, display, and targets.
- c. Record passwords for each access level.
- d. Clean front panel and remove foreign material from case.
- e. Check tightness of connections.
- f. Verify that frame is grounded in accordance with manufacturer's published instructions.
- g. Set relay in accordance with results in Section 260573.16 "Coordination Studies" and in Section 260573.19 "Arc-Flash Hazard Analysis."
- h. Download settings from relay. Print copy of settings for report and compare settings to those specified in coordination study.

2. Electrical Tests:

- a. Perform insulation-resistance tests from circuits to grounded frame in accordance with manufacturer's published data.
- b. Apply voltage or current to analog inputs, and verify correct registration of relay meter functions.
- c. Check functional operation of elements used in protection scheme as follows:
 - 1) ANSI No. 2/62, Timing Relay:
 - a) Determine time delay.
 - b) Verify operation of instantaneous contacts.
 - 2) ANSI No. 24, Volts/Hertz Relay:
 - a) Determine pickup frequency at rated voltage.
 - b) Determine pickup frequency at second voltage level.
 - c) Determine time delay.
 - 3) ANSI No. 25, Sync Check Relay:
 - a) Determine closing zone at rated voltage.
 - b) Determine maximum voltage differential that permits closing at zero degrees.
 - c) Determine set points of live line, live bus, dead line, and dead bus.
 - d) Determine time delay.
 - e) Verify control functions of dead bus/live line, dead line/live bus, and dead bus/dead line.
 - 4) ANSI No. 27, Undervoltage Relay:
 - a) Determine dropout voltage.
 - b) Determine time delay.
 - c) Determine time delay at second point on timing curve for inverse time relays.
 - 5) ANSI No. 32, Directional Power Relay:
 - a) Determine minimum pickup at maximum torque angle.
 - b) Determine closing zone.
 - c) Determine maximum torque angle.
 - d) Determine time delay.
 - e) Verify time delay at second point on timing curve for inverse time relays.
 - f) Plot operating characteristic.
 - 6) ANSI No. 46, Current Balance Relay:

- a) Determine pickup of unit.
 - b) Determine percent slope.
 - c) Determine time delay.
- 7) ANSI No. 46N, Negative Sequence Current Relay:
- a) Determine negative sequence alarm level.
 - b) Determine negative sequence minimum trip level.
 - c) Determine maximum time delay.
 - d) Verify two points on I²T curve.
- 8) ANSI No. 47, Phase Sequence or Phase Balance Voltage Relay:
- a) Determine positive sequence voltage to close N.O. contact.
 - b) Determine positive sequence voltage to open N.C. contact (undervoltage trip).
 - c) Verify negative sequence trip.
 - d) Determine time delay to close N.O. contact with sudden application of 120 percent of pickup.
 - e) Determine time delay to close N.C. contact on removal of voltage when previously set to rated system voltage.
- 9) ANSI No. 50, Instantaneous Overcurrent Relay:
- a) Determine pickup.
 - b) Determine dropout.
 - c) Determine time delay.
- 10) ANSI No. 51, Time Overcurrent:
- a) Determine minimum pickup.
 - b) Determine time delay at two points on time current curve.
- 11) ANSI No. 64, Ground Detector Relay:
- a) Determine maximum impedance to ground causing relay pickup.
- 12) ANSI No. 67, Directional Overcurrent Relay:
- a) Determine directional unit minimum pickup at maximum torque angle.
 - b) Determine closing zone.
 - c) Determine maximum torque angle.
 - d) Plot operating characteristics.
 - e) Determine overcurrent unit pickup.
 - f) Determine overcurrent unit time delay at two points on time current curve.
- 13) ANSI No. 87, Differential Relay:
- a) Determine operating unit pickup.
 - b) Determine operation of restraint unit.
 - c) Determine slope.
 - d) Determine harmonic restraint.
 - e) Determine instantaneous pickup.
 - f) Plot operating characteristics for restraint.

d. Control Verification:

- 1) Functional Tests:
 - a) Check operation of active digital inputs.
 - b) Check output contacts or SCRs, preferably by operating controlled device, such as circuit breaker, auxiliary relay, or alarm.
 - c) Check internal logic functions used in protection scheme.
 - d) On completion of testing, reset minimum/maximum recorders, communications statistics, fault counters, sequence-of-events recorder, and event records.
 - 2) In-Service Monitoring: After equipment is initially energized, measure magnitude and phase angle of inputs and verify expected values.
- I. Ground-Fault Protection Field Tests: Evaluate interconnected system in accordance with switchgear manufacturer's published instructions.
1. Determine proper location of sensors around bus of circuit to be protected. This determination may be done visually, with knowledge of which bus is involved.
 2. Verify grounding points of system to determine that ground paths do not exist that would bypass sensors. Use high-voltage testers and resistance bridges.
 3. Test installed system for correct response by application of full-scale current into equipment to duplicate ground-fault condition, or by equivalent means such as by simulated fault current generated by the following:
 - a. A coil around sensors.
 - b. A separate test winding in sensors.
 4. Record test results on test form provided with instructions provided by manufacturer.
- J. DC System VRLA Batteries Field Test:
1. Visual and Mechanical Inspection:
 - a. Verify that batteries are adequately located.
 - b. Verify that battery area ventilation system is operable.
 - c. Verify existence of suitable eyewash equipment.
 - d. Verify that equipment nameplate data complies with the Contract Documents.
 - e. Inspect physical and mechanical condition.
 - f. Verify adequacy of battery support racks, mounting, anchorage, alignment, grounding, and clearances.
 - g. Verify that units are clean.
 - h. Inspect spill containment installation.
 - i. Verify application of oxide inhibitor on battery terminal connections.
 2. Electrical Tests:
 - a. Measure charger float and equalizing voltage levels. Adjust to battery manufacturer's recommended levels.
 - b. Verify charger functions and verify that alarms comply with system manufacturer's published instructions.
 - c. Measure negative post temperature. This temperature must comply with manufacturer's published data or IEEE 1188.
 - d. Measure charger float and equalizing voltage levels. These levels must be in accordance with battery manufacturer's published data.
 - e. Measure monoblock/cell voltage and total battery voltage with charger energized and in

float mode of operation. Monoblock/cell voltages must be in accordance with manufacturer's published data.

- f. Measure intercell connection resistances.
- g. Perform internal ohmic measurement tests. Cell internal ohmic values (resistance, impedance, or conductance) may not vary by more than 25 percent between identical cells that are in fully charged state. Monoblock/cell internal ohmic values (resistance, impedance, or conductance) may not vary by more than 25 percent between identical monoblocks/cells in fully charged state.
- h. Perform load test in accordance with manufacturer's published data or IEEE 1188. Replace units that fail to pass test.
- i. Measure battery system voltage from positive-to-ground and negative-to-ground. Voltage measured from positive-to-ground must be equal in magnitude to voltage measured from negative-to-ground.

K. DC System Vented NiCd Batteries Field Test:

1. Visual and Mechanical Inspection:

- a. Verify that batteries are adequately located.
- b. Verify that battery area ventilation system is operable.
- c. Verify existence of suitable eyewash equipment.
- d. Verify that equipment nameplate data complies with the Contract Documents.
- e. Inspect physical and mechanical condition.
- f. Verify adequacy of battery support racks, mounting, anchorage, alignment, grounding, and clearances.
- g. Verify electrolyte level. Measure pilot-cell electrolyte temperature, and correct as recommended by manufacturer's maintenance procedures to bring temperature and electrolyte level to within normal limits.
- h. Verify that units are clean.
- i. Inspect spill containment installation.
- j. Verify application of oxide inhibitor on battery terminal connections.

2. Electrical Tests:

- a. Measure charger float and equalizing voltage levels. Adjust to battery manufacturer's recommended levels.
- b. Verify charger functions and verify that alarms comply with system manufacturer's published instructions.
- c. Measure cell voltage and total battery voltage with charger energized and in float mode of operation. Cell voltages must be within 0.05 V of each other or in accordance with manufacturer's published data.
- d. Measure intercell connection resistances.
- e. Perform internal ohmic measurement tests. Cell internal ohmic values (resistance, impedance, or conductance) may not vary by more than 25 percent between identical cells that are in fully charged state.
- f. Perform load test in accordance with manufacturer's published data or IEEE 1106. Replace units that fail to pass test.
- g. Measure battery system voltage from positive-to-ground and negative-to-ground. Voltage measured from positive-to-ground must be equal in magnitude to voltage measured from negative-to-ground.

L. System Function Tests: Perform system function tests after other field quality-control tests have been completed and components have passed specified tests. Verify correct interaction of sensing, processing, and action devices.

- 1. Develop test parameters and perform tests for purpose of evaluating performance of integral

components and their functioning as complete unit within design requirements and manufacturer's published data.

2. Verify correct operation of interlock safety devices for fail-safe functions in addition to design function.
3. Verify correct operation of sensing devices, alarms, and indicating devices.

M. Nonconforming Work:

1. Switchgear components will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

N. Collect, assemble, and submit test and inspection reports. Record as-left set points of adjustable devices.

O. Manufacturer Services:

1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

3.6 MAINTENANCE

A. Voltage Monitoring and Adjusting: After Substantial Completion, but not more than six months after Final Acceptance, and if requested by Owner, perform the following voltage monitoring:

1. During period of normal load cycles as evaluated by Owner, perform seven days of three-phase voltage recording at switchgear outgoing sections. Use voltmeters with calibration traceable to NIST standards and with chart speed of not less than **1 inch (25 mm)** per hour. Voltage unbalance greater than 1 percent between phases, or deviation of phase voltage from nominal value by more than plus or minus 5 percent during test period, is unacceptable.
2. Corrective Action: If test results are unacceptable, perform the following corrective action, as appropriate:
 - a. Adjust switchgear taps.
 - b. Prepare published request for voltage adjustment by electric utility.
3. Retests: Repeat monitoring, after corrective action has been performed, until specified results are obtained.
4. Report:
 - a. Prepare published report covering monitoring performed and corrective action taken.

B. Infrared Inspection: Perform survey during periods of maximum possible loading. Remove covers prior to inspection.

1. After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of electrical power connections of switchgear.
2. Instrument: Inspect distribution systems with imaging equipment capable of detecting minimum temperature difference of 1 deg C at 30 deg C.
3. Record of Infrared Inspection: Prepare certified report that identifies testing technician and equipment used and that lists results as follows:
 - a. Description of equipment to be tested.
 - b. Discrepancies.
 - c. Temperature difference between area of concern and reference area.

- d. Probable cause of temperature difference.
 - e. Areas inspected. Identify inaccessible and unobservable areas and equipment.
 - f. Identify load conditions at time of inspection.
 - g. Provide photographs and thermograms of deficient area.
4. Act on inspection results in accordance with recommendations in NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.
 5. **[Follow-up Infrared Scanning: Perform additional follow-up infrared scan of switches 11 months after date of Substantial Completion.]**

C. Software and Firmware Service Agreement:

1. Technical Support: Beginning at Substantial Completion, verify that software and firmware service agreement includes software support for **[two]<Insert number>** years.
2. Upgrade Service: At Substantial Completion, update software and firmware to latest version. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. Verify that upgrading software includes operating system and new or revised licenses for using software.
 - a. Upgrade Notice: No fewer than **[30]<Insert number>** days to allow Owner to schedule and access the system and to upgrade computer equipment if necessary.
3. Upgrade Reports: Prepare report after each update, documenting upgrades installed.

END OF SECTION 26 12 19 00A

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 12 19 00	26 12 13 00	Liquid-Filled, Medium-Voltage Transformers
26 12 19 00	26 22 13 00	Low-Voltage Distribution Transformers

THIS PAGE INTENTIONALLY LEFT BLANK

**SECTION 26 13 29 00 - MEDIUM-VOLTAGE COMPARTMENTALIZED SWITCHGEAR****PART 1 - GENERAL****1.1 SUMMARY**

- A. Section includes dead-front, remotely controlled insulated vacuum load and fault interrupting switchgear.
- B. Related Requirements:
 - 1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
 - 2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 DEFINITIONS

- A. Bushing: An insulating structure including a central conductor, or providing a central passage for a conductor, with provision for mounting on a barrier, conducting or otherwise, for insulating the conductor from the barrier and conducting current from one side of the barrier to the other.
- B. Bushing Elbow: An insulated device used to connect insulated conductors to separable insulated connectors on dead-front, pad-mounted switchgear and to provide a fully insulated connection. Also called an "elbow connector."
- C. Bushing Insert: That component of a separable insulated connector that is inserted into a bushing well to complete a dead-front, load break or non-load break, separable insulated connector (bushing).
- D. Bushing Well: A component of a separable insulated connector, either permanently welded or clamped to an enclosure wall or barrier, having a cavity that receives a replaceable component (bushing insert) to complete the separable insulated connector (bushing).
- E. Fault Interrupter: A self-controlled mechanical switching device capable of making, carrying, and automatically interrupting an alternating current. It includes an assembly of control elements to detect overcurrents and control the fault interrupter. A fault interrupter always consists of a switching device, a control unit, and sensors for current and/or voltage sensing.
- F. Hotstick: An insulated stick, usually made of fiberglass, that is used to work energized overhead conductors and operate electrical equipment that is overhead, underground, and compartmentalized.
- G. NETA ATS: InterNational Electrical Testing Association, Acceptance Testing Specification.
- H. Way: A three-phase or single-phase circuit connection to the bus that may contain combinations of switches and protective devices or may be a solid bus.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.

1. Include rated capacities, operating characteristics, and furnished specialties and accessories.
2. Time-current characteristic curves for overcurrent protective devices.

B. Shop Drawings: For pad-mounted switchgear.

1. Include a tabulation of installed devices with features and ratings.
2. Include dimensioned plans and elevations, showing dimensions, shipping sections, and weights of each assembled section. Elevations must show major components and features, and they will mimic bus diagram.
3. Include a plan view and cross section of equipment base showing clearances, manufacturer's recommended work space, and locations of penetrations for grounding and conduits. Show location of anchor bolts[**and leveling channels**].
4. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, and location and size of each field connection.
5. Include list of materials.
6. Locate accessory and spare equipment storage.
7. Include single-line diagram.
8. Include control power wiring diagrams.
9. Include battery, charger, and transfer switch ratings.
10. Include copy of nameplate.
11. Switchgear Ratings:
 - a. Voltage.
 - b. Continuous current.
 - c. Short-circuit rating.
 - d. BIL.
12. Design Calculations: Signed and sealed by a qualified professional structural engineer. Calculate requirements for selecting seismic restraints.
13. Relay settings.
14. Interface data with monitoring or control network.
15. Wiring Diagrams: For each switchgear assembly, include the following:
 - a. Power, signal, and control wiring.
 - b. Three-line diagrams of current and future secondary circuits, showing device terminal numbers and internal diagrams.
 - c. Schematic control diagrams.
 - d. Diagrams showing connections of component devices and equipment.
 - e. Schematic diagrams showing connections to remote devices[**including SCADA remote terminal unit**].

1.4 INFORMATIONAL SUBMITTALS

A. Product Certificates: For pad-mounted switchgear.

1. Switch ratings as listed in IEEE C37.74.
2. Interrupter ratings as listed in IEEE C37.60.
3. Coating system compliance with the IEEE standard listed in "Switchgear Enclosure" Article.

B. Source quality-control reports.

C. Field quality-control reports.

**1.5 WARRANTY**

- A. Special Battery Warranties: Manufacturer and Installer agree to repair or replace the switchgear control system storage batteries that fail in materials or workmanship within specified warranty period.
1. Warranted Cycle Life for VRLA Batteries: Equal to or greater than that represented in manufacturer's published table, including figures corresponding to the following, based on annual average battery temperature of **77 deg F (25 deg C)**:
 - a. For discharge rate not faster than eight hours, discharge duration not longer than eight hours, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than six discharge cycles.
 - b. For discharge rate not faster than 30 minutes, discharge duration not longer than 30 minutes, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 20 discharge cycles.
 - c. For discharge rate not faster than 15 minutes, discharge duration not longer than 45 seconds, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 120 discharge cycles.
 2. Warranted Cycle Life for Premium VRLA Batteries: Equal to or greater than that represented in manufacturer's published table, including figures corresponding to the following, based on annual average battery temperature of **77 deg F (25 deg C)**:
 - a. For discharge rate not faster than eight hours, discharge duration not longer than eight hours, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 40 discharge cycles.
 - b. For discharge rate not faster than 30 minutes, discharge duration not longer than 30 minutes, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 20 discharge cycles.
 - c. For discharge rate not faster than 15 minutes, discharge duration not longer than 1.5 minutes, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 750 discharge cycles.

PART 2 - PRODUCTS**2.1 MEDIUM-VOLTAGE COMPARTMENTALIZED SWITCHGEAR**

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[ABB, Electrification Business]**
 2. **[Eaton]**
 3. **[S&C Electric Company]**
 4. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[ABB, Electrification Business]**
 2. **[Eaton]**
 3. **[S&C Electric Company]**
 4. **<Insert manufacturer's name>**

2.2 SYSTEM DESCRIPTION

- A. Manufactured Unit: Pad-mounted switchgear, designed for application in **[solidly grounded neutral][ungrounded][impedance-grounded]** underground distribution systems.
- B. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory, and marked for intended location and application.
- C. Comply with IEEE C2.
- D. Comply with IEEE C37.74.

2.3 RATINGS

- A. Switchgear is applied to a nominal **[4.16][13.2][13.8][23][24.94][34.5]<Insert voltage>** kV (L-L) medium-voltage electrical power system. Minimum ratings of the switchgear must be as follows:
 - 1. Rated Maximum Voltage and Rated BIL: **[15.5 kV and 95 kV BIL][27 kV and 125 kV BIL][38 kV and 150 kV BIL]<Insert voltage>**.
 - 2. Continuous and Load Interrupting Current: 600 A.
 - 3. Short-Time and Short-Circuit Interrupting Current: **[12.5 kA SYM RMS][16 kA SYM RMS][20 kA SYM RMS][25 kA SYM RMS]**.

2.4 SWITCHGEAR ENCLOSURE

- A. Weatherproof enclosure with an integral skid mounting frame, designed for mounting on a concrete pad, suitable to allow skidding or rolling of the switchgear in any direction, and with provision for anchoring the frame to the pad.
- B. Enclosure Integrity: Comply with IEEE C57.12.28 for compartmentalized enclosures that contain energized electrical equipment in excess of 600 V that may be exposed to the public.
 - 1. Each vertical section must have the following features:
 - a. Structural design and anchorage adequate to resist loads imposed by **[125 mph (200 km/h)]<Insert wind speed>** wind.
 - b. Space heater operating at one-half or less of rated voltage, sized to prevent condensation, controlled by thermostats to maintain temperature of each section above expected dew point.
 - c. Louvers equipped with insect and rodent screens and filters, and arranged to permit air circulation while excluding rodents and exterior dust.
 - d. Weatherproof ground-fault circuit interrupter duplex receptacles.
 - e. Power for heaters and receptacles must be provided **[by control power transformer][as indicated]**.
 - f. Skid Mounted: Mount each shipping group on an integral base frame as a complete weatherproof unit.
- C. Corrosion Protection:
 - 1. Enclosure coating system must be factory applied, meeting the requirements of **[IEEE C57.12.28][IEEE C57.12.29]**, in manufacturer's standard color **[green]<Insert color>**.
 - 2. Fabricate the support frame, enclosure base, and the enclosure from stainless steel, ASTM A167,

Type 304 or 304L. Enclosure coating system must be factory applied, meeting the requirements of [IEEE C57.12.28][IEEE C57.12.29], standard color [green]<Insert color>.

2.5 SWITCHGEAR CONSTRUCTION

- A. Dead-front, front and rear access switchgear.
- B. Each disconnect switch in switched ways must be in a sealed, dielectric filled [stainless]steel tank, factory-filled with [SF6 gas][mineral oil][or][less-flammable, high-firepoint fluid].
 - 1. SF6 Gas: Comply with ASTM D2472. Provide enclosure with pressure gauge and self-sealing fill valve.
 - 2. Mineral Oil: Comply with ASTM D3487, Type II, and tested for compliance with ASTM D117. Provide enclosure with level gauge to monitor the dielectric level; automatic pressure relief valve; and fill, drain, and sampling valves.
 - 3. Less-flammable, high-firepoint fluid must comply with ASTM D6871 and IEC 61099. The temperature rating of the fluid must be satisfactory for ambient air temperatures of **minus 22 and plus 104 deg F (minus 30 and plus 40 deg C)**. Provide enclosure with level gage to monitor the dielectric level; automatic pressure relief valve; and fill, drain, and sampling valves.
- C. Construct switchgear assembly with switched ways that have front-accessible terminations for cables entering from below and with manual operating provisions with a lineman's hotstick.
- D. Trapped Key Interlocks: Kirk key interlock system using a dowel pin design having no openings. Brass housing and 316 stainless steel key and lock bolts.
- E. Viewing Windows: For each switch, located adjacent to manual operating devices, and positioned to show switch contact position.
- F. Grounding: Provision to make grounding cable and wire connections at each way.

2.6 SWITCHED WAYS

- A. Source Switch Ways: Non-fused, hotstick operated, ganged vacuum load interrupter switches[, **in series with a visible-break disconnect switch**].
 - 1. Rated Continuous Current and Load Switching Current: 600 A.
 - 2. Vacuum Load Interrupter:
 - a. With 24 V(dc) motor operators to open or close the load interrupter.
 - b. Trip-free switch mechanism. Closing the switch must be independent of the speed of the operating handle.
 - 3. Visible-Break Disconnect Switch: [**Three positions, with open, closed, and ground positions**][**Two positions, with open and closed positions**]. The switch must be mechanically interlocked so that the vacuum interrupter opens and closes first.
 - a. Switch position indicator, clearly labeled.
 - b. Padlocking and tagging provisions.
- B. Fault Interrupting Switched Ways: Non-fused, hotstick-operated, ganged vacuum fault interrupter switches[, **in series with a visible-break disconnect**]. With internally mounted current transformers and electronic overcurrent sensing for [**single-phase or**]three-phase ganged tripping of the interrupter.

Comply with IEEE C37.60.

1. Rated Continuous Current and Load Switching Current: 600 A.
2. Vacuum Fault Interrupter:
 - a. Operated by a motor-charged stored energy mechanism, with provision to manually charge the mechanism. Charging motors must operate at 24 V(ac).
 - b. Auxiliary Switches: Provide two auxiliary switches, each with field-selectable NC or NO switch position, for connection of remote indication of the position of the switched way. The switches must be rated at 15 A, 120 V(ac), and 1 A, 120 V(dc).
 - c. Trip-free switch mechanism when manually operated. Closing the switch must be independent of the speed of the operating handle.
 - d. Single operating handle and a clearly labeled switch position indicator; open, closed, tripped.
 - e. Operations Counters: Mechanical type, linked to the operating handle of each switched way.
 - f. Padlocking and tagging provisions.
3. Visible-Break Disconnect Switch: **[Three positions, with open, closed, and ground positions][Two positions, with open and closed positions]**. The switch must be mechanically interlocked so that the switch cannot be operated unless the vacuum fault interrupter is open.
 - a. Switch position indicator, clearly labeled.
 - b. Padlocking and tagging provisions.

C. Controls:

1. Motor Actuators: "Open," "close," and "stop" push buttons.
2. Switch Status LEDs: "Open" and "closed" lights. Show status of disconnect switch using its auxiliary contact.
3. Motor Actuator Process LEDs: "Opening" and "closing" lights indicating that the selected motor is operating the switch.
4. Power Switch: "On" and "off" toggle switch and circuit protector, to disconnect the dc supply to its motor and provide overload and short-circuit protection.
5. 120 V(ac) LED to display battery system power level.
6. Battery voltage meter to show battery condition.
7. Local and Remote Selector: In the "local" position remote operation of the switches is disabled and is possible only under the control of switchgear-mounted push buttons.

D. Overcurrent[**and Control**] Relays: Field-adjustable microprocessor electronic relays in each phase at indicated locations. Provide for current adjustment from 0 to 600 A.

1. Device Functions: **[51/50, 51N/50N, or 51G/50G in accordance with IEEE C37.2]<Insert values>**.

2.7 POWER SUPPLY

- A. The power supply for instrumentation, communications, and switch operations must be for connection to two 120 V(ac) power sources, controlled by an automatic transfer switch to connect to the alternate supply when the primary supply has failed.
- B. The power supply for instrumentation, communications, and switch operations must be from a potential transformer installed as part of the switchgear.

- C. Control Power Supply: Dedicated **[48 V(dc)][120 V(dc)][240 V(dc)]** battery system.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[C&D Technologies, Inc.]**
 - b. **[EnerSys]**
 - c. **[Trojan Battery Company]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[C&D Technologies, Inc.]**
 - b. **[EnerSys]**
 - c. **[Trojan Battery Company]**
 - d. **<Insert manufacturer's name>**
 3. System Requirements: Battery must have number of cells and ampere-hour capacity based on an initial specific gravity of 1.210 at **77 deg F (25 deg C)** with electrolyte at normal level and minimum ambient temperature of **55 deg F (13 deg C)**. Cycle battery before shipment to guarantee rated capacity on installation. Arrange to operate ungrounded. Battery system capacity must be as recommended by switchgear manufacturer to operate the circuit breakers for intended duty.
 4. Battery:
 - a. **[Standard VRLA][Premium VRLA]<Insert type>** batteries, with system disconnect and overcurrent protective device.
 - b. Rack: **[Two]<Insert number>**-step rack with electrical connections between battery cells and between rows of cells; include two flexible connectors with bolted-type terminals for output leads. **[Rate battery rack, cell supports, and anchorage for seismic requirements.]**
 - c. Accessories:
 - 1) Set of cell numerals.
 - 2) Monitoring system.
 - d. Charger: Static-type silicon rectifier equipped with automatic regulation and provision for manual and automatic adjustment of charging rate. Unit must automatically maintain output voltage within 0.5 percent from no load to rated charger output current, with ac input-voltage variation of plus or minus 10 percent and input-frequency variation of plus or minus 3 Hz.
 - 1) DC ammeter.
 - 2) DC Voltmeter: Maximum error of 5 percent at full-charge voltage, with toggle switch to select between battery and charger voltages.
 - 3) Ground Indication: Two appropriately labeled lights to indicate circuit ground, connected in series between negative and positive terminals, with midpoint junction connected to ground by NO push-button contact.
 - 4) Capacity: Sufficient to supply steady load, float-charge battery between 2.20 and 2.25 V per cell and equalizing charge at 2.33 V per cell.
 - 5) Charging-Rate Switch: Manually operated switch to transfer to higher charging rate. Charger operation must be automatic until manually reset.

- 6) AC Power Supply: 120 V, 60 Hz, subject to plus or minus 10 percent variation in voltage and plus or minus 3 Hz variation in frequency. Automatic charger operation must resume after loss of ac power supply for any interval.
 - 7) Charging Regulator: Protect charger from damage due to overload, including short circuit on output terminals. The device must regulate charging current but must not disconnect charger from either battery or ac supply.
 - 8) Charger's Audible Noise: Less than 26 dB.
5. Battery Ground-Fault Detector: Initiates alarm when resistance to ground of positive or negative bus of battery is less than 5000 ohms.
 6. Control Wiring: Factory installed, complete with bundling, lacing, and protection.
 - a. Conductors across Hinges and for Interconnections between Shipping Units: Flexible conductors for No. 8 AWG and smaller.
 - b. Conductors: Sized in accordance with NFPA 70 for duty required.
 7. An automatic transfer switch to connect the alternate power supply when the primary power supply has failed.

2.8 AUTOMATIC SOURCE TRANSFER CONTROLS

- A. An automatic switch control system must execute manual, automatic source-transfer, and SCADA operation of the source and fault interrupting switch ways. The source-transfer controls must open an incoming switch way where voltage is lost and close the other incoming switch way if voltage is present. The controls must include an overcurrent lockout that prevents the closing of a switch way into a system fault.
- B. The automatic switch control system must execute remote commands received from a SCADA master station and transmit switchgear operation information to a SCADA master station using DNP3 communications protocol. Execution of remote commands must include enabling of the source-transfer controls and transfer of switch ways to "close," "open," and "ground" positions. Transmission of switchgear information must include switch way positions and DC supply system status. Additional switchgear information that must be transmitted follows:
 1. Voltage.
 2. Current in load ways.
 3. <Insert text>.
- C. The control must have communication port provisions for connection to a multi-mode serial fiber link.

2.9 CONTROL NETWORK

- A. Compliance with ASHRAE 135: Controllers must support serial MS/TP and Ethernet IP communications and must be able to communicate directly via TIA-485 serial networks and Ethernet 10Base-T networks as a native device.
- B. Support DNP3 protocol remote control commands received from the SCADA master stations that control switch operations. Comply with the requirements of IEEE 1815.

**2.10 BUSHINGS**

- A. Separable insulated connectors must be used to connect primary cable. Comply with requirements in Section 260513 "Medium-Voltage Cables."
 - 1. Bushings: One-piece, 600 A, BIL ratings the same as the connectors. Comply with IEEE 386.
 - 2. Supply a standoff bracket or parking stand for each bushing, mounted horizontally adjacent to each bushing.

2.11 SURGE ARRESTERS

- A. Distribution class; metal-oxide-varistor type, fully shielded, separable elbow type, suitable for plugging into the inserts. Comply with IEEE C62.11 and IEEE 386.
 - 1. Nominal System Line-to-Line Voltage: **<Insert number> kV RMS.**
 - 2. Maximum Continuous Operating Voltage: **<Insert number> kV RMS.**
 - 3. Duty-Cycle Voltage: **<Insert number> kV RMS.**

2.12 WARNING LABELS AND SIGNS

- A. Comply with requirements in Section 260553 "Identification for Electrical Systems" for labels and signs.
 - 1. High-Voltage Warning Label: Self-adhesive labels on the outside of the high-voltage compartment door(s). Legend must be "DANGER HIGH VOLTAGE" printed in two lines of minimum **2 inch (50 mm)** high letters. The word "DANGER" must be in white letters on a red background and the words "HIGH VOLTAGE" must be in black letters on a white background.
 - 2. Arc-Flash Warning Label: Self-adhesive labels on the outside of the high-voltage compartment door(s), warning of potential electrical arc-flash hazards and appropriate personal protective equipment required.

2.13 SOURCE QUALITY CONTROL

- A. Factory Tests: Comply with requirements in IEEE C37.60 and IEEE C37.74 for testing procedures.
 - 1. Circuit Resistance Test: Verify that switchgear contacts have been properly aligned and current transfer points have been properly assembled.
 - 2. Power-frequency dry withstand voltage test.
 - 3. Dielectric withstand test; one-minute dry power-frequency.
 - 4. Calibrate overcurrent devices for conformance to published time-current characteristic curves.
 - 5. Sealed Tank Leak Test:
 - a. Comply with IEC 62271-1 for test procedure for switchgear using SF6.
 - b. The test procedure for vacuum switchgear must be as follows:
 - 1) Each vacuum tube must be identified by its serial number. Its vacuum pressure level must be tested by the manufacturer of the vacuum interrupter. Document the test results.
 - 2) After assembly of the switchgear way, test the vacuum pressure level of the vacuum tubes by the routine dielectric test across the open contacts. The test voltage must be stated by the manufacturer. The dielectric test must be carried out after the mechanical routine test.

6. Operating tests must verify the following:
 - a. Switch position indicators and contacts are in the correct position for both the open and closed positions.
 - b. Insulating medium quantity indicator (if provided) is functioning properly.
 - c. Circuit configuration is shown correctly.
 - d. Mechanical interlocks are in place and operative.
 - e. Position and polarity of current transformers meets requirements.
 - f. Control, secondary wiring, and accessory devices are connected correctly.
 - g. Devices and relays actually operate as intended. Circuits for which operation is not feasible must be checked for continuity.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Upon delivery of switchgear and prior to unloading, inspect equipment for damage.
 1. Examine tie rods and chains to verify they are undamaged and tight and that blocking and bracing are tight.
 2. Verify that there is no evidence of load shifting in transit and that readings from transportation shock recorders, if equipped, are within manufacturer's recommendations.
 3. Examine switchgear for external damage, including dents or scratches in doors and sill, and termination provisions.
 4. Compare switchgear and accessories received with the bill of materials to verify that the shipment is complete. Verify that switchgear and accessories conform to the manufacturer's quotation and Shop Drawings. If the shipment is not complete or does not comply with project requirements, notify the manufacturer in writing immediately.
 5. Unload switchgear, observing packing label warnings and handling instructions.
 6. Open compartment doors and inspect components for damage or displaced parts, loose or broken connections, cracked or chipped insulators, bent mounting flanges, dirt or foreign material, and water or moisture.
- B. Handling:
 1. Handle switchgear, in accordance with manufacturer's recommendations; avoid damage to the enclosure, termination compartments, base, frame, and internal components. Do not subject switchgear to impact, jolting, jarring, or rough handling.
 2. Transport switchgear upright to avoid internal stresses on equipment mounting assemblies. Do not tilt or tip switchgear.
 3. Use spreaders or a lifting beam to obtain a vertical lift and to protect switchgear from straps bearing against the enclosure. Lifting cable pull angles may not be greater than 15 degrees from vertical.
 4. Do not damage structure when handling switchgear.
- C. Storage:
 1. Switchgear may be stored outdoors. If possible, store switchgear at final installation locations on concrete pads. If dry concrete surfaces are not available, use pallets of adequate strength to protect switchgear from direct contact with the ground. Ensure switchgear is level.
 2. Protect switchgear from physical damage. Do not store switchgear in the presence of corrosive or explosive gases.
 3. Store switchgear with compartment doors closed.

- D. Examine roughing-in of conduits and grounding systems to verify the following:
 - 1. Wiring entries comply with layout requirements.
 - 2. Entries are within conduit-entry tolerances specified by manufacturer and no feeders have to cross section barriers to reach load or line lugs.
- E. Pre-Installation Checks:
 - 1. Verify removal of shipping bracing after placement.
- F. Verify that ground connections are in place and that requirements in Section 260526 "Grounding and Bonding for Electrical Systems" have been met. Maximum ground resistance must be **[5 ohms]<Insert value>** at switchgear location.
- G. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 SWITCHGEAR INSTALLATION

- A. Equipment Mounting:
 - 1. Install switchgear on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
 - 2. Comply with requirements for vibration isolation and seismic control devices specified in Section 260548.16 "Seismic Controls for Electrical Systems."
- B. Install level and plumb, tilting less than 1.5 degrees when energized.
- C. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's instructions and NFPA 70.
- D. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's instructions and IEEE C2.

3.3 CONNECTIONS

- A. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."
 - 1. For counterpoise, use tinned bare copper cable not smaller than No. 4/0 AWG, buried not less than **30 inch (765 mm)** below grade interconnecting the grounding electrodes. Bond surge arrester and neutrals directly to the switchgear enclosure and then to the grounding electrode system with bare copper conductors, sized as shown. Keep lead lengths as short as practicable with no kinks or sharp bends.
 - 2. Fence and equipment connections must not be smaller than No. 4 AWG. Ground fence at each gate post and corner post and at intervals not exceeding **10 ft. (3 m)**. Bond each gate section to the fence post using **1/8 by 1 inch (3 by 25 mm) [tinned]** flexible braided copper strap and clamps.
 - 3. Make joints in grounding conductors and loops by exothermic weld or compression connector.
 - 4. Terminate grounding and bonding conductors on a common equipment grounding terminal on the switchgear enclosure.
 - 5. Complete the switchgear grounding and surge protector connections prior to making other electrical connections.
- B. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and

Cables."

1. Maintain air clearances between energized live parts and between live parts and ground for exposed connections in accordance with manufacturer recommendations.
2. Bundle associated phase, neutral, and equipment grounding conductors together within the switchgear enclosure. Arrange conductors such that there is not excessive strain on the connections that could cause loose connections. Allow adequate slack for expansion and contraction of conductors.

- C. Terminate medium-voltage cables in incoming section of switchgear in accordance with Section 260513 "Medium-Voltage Cables."

3.4 SIGNS AND LABELS

- A. Comply with the installation requirements for labels and signs specified in Section 260553 "Identification for Electrical Systems."
- B. Install warning signs as required to comply with OSHA 29 CFR 1910.269.

3.5 FIELD QUALITY CONTROL

- A. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- B. General Field Testing Requirements:
1. Comply with the provisions of NFPA 70B, "Testing and Test Methods" chapter.
 2. Perform each visual and mechanical inspection and electrical test. Certify compliance with test parameters.
 3. After installing switchgear but before primary is energized, verify that grounding system at the switchgear is tested at the specified value or less.
 4. After installing switchgear and after electrical circuitry has been energized, test for compliance with requirements.
- C. Medium-Voltage Switchgear Field Tests:
1. Visual and Mechanical Inspection:
 - a. Verify that current and voltage transformer ratios correspond to Drawings.
 - b. Inspect bolted electrical connections using calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, use NETA ATS, Table 100.12. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value.
 - c. Confirm correct operation and sequencing of electrical and mechanical interlock systems.
 - 1) Attempt closure on locked-open devices. Attempt to open locked-closed devices.
 - 2) Make key exchange with devices operated in off-normal positions.
 - d. Inspect control power transformers.
 - 1) Inspect for physical damage, cracked insulation, broken leads, tightness of

- connections, defective wiring, and overall general condition.
- 2) Verify that primary and secondary fuse or circuit breaker ratings match Drawings.

2. Electrical Tests:

- a. Inspect bolted electrical connections using a low-resistance ohmmeter to compare bolted resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value.
- b. Perform dc voltage insulation-resistance tests on each bus section, phase-to-phase and phase-to-ground, for one minute. If the temperature of the bus is other than plus or minus 20 deg C, adjust the resulting resistance as provided in NETA ATS, Table 100.11.
 - 1) Insulation-resistance values of bus insulation must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than manufacturer's recommendations or NETA ATS, Table 100.1.
 - 2) Do not proceed to the dielectric withstand voltage tests until insulation-resistance levels are raised above minimum values.
- c. Perform a dielectric withstand voltage test on each bus section, each phase-to-ground with phases not under test grounded, in accordance with manufacturer's published data. If manufacturer has no recommendation for this test, it must be conducted in accordance with NETA ATS, Table 100.2. Apply the test voltage for one minute.
 - 1) If no evidence of distress or insulation failure is observed by the end of the total time of voltage application during the dielectric withstand test, the test specimen is considered to have passed the test.
- d. Perform insulation-resistance tests on control wiring with respect to ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid-state components or control devices that cannot tolerate the applied voltage, follow the manufacturer's recommendation.
 - 1) Minimum insulation-resistance values of control wiring must not be less than 2 megohms.
- e. Voltage Transformers:
 - 1) Perform secondary wiring integrity test. Verify correct potential at devices.
 - 2) Verify secondary voltages by energizing the primary winding with system voltage.
- f. Perform current-injection tests on the entire current circuit in each section of switchgear.
 - 1) Perform current tests by secondary injection with magnitudes such that a minimum current of 1.0 A flows in the secondary circuit. Verify correct magnitude of current at each device in the circuit.
 - 2) Perform current tests by primary injection with magnitudes such that a minimum of 1.0 A flows in the secondary circuit. Verify correct magnitude of current at each device in the circuit.
- g. Perform system function tests in accordance with "System Function Tests" Article.
- h. Verify operation of space heaters.
- i. Perform phasing checks on double-ended or dual-source switchgear to ensure correct bus phasing from each source.

D. Medium-Voltage Vacuum Interrupter Field Tests:

1. Visual and Mechanical Inspection:
 - a. Inspect physical and mechanical condition.
 - b. Inspect anchorage, alignment, grounding, and required clearances.
 - c. Verify that maintenance devices such as special tools and gages specified by the manufacturer are available for servicing and operating the breaker.
 - d. Verify the unit is clean.
 - e. Perform mechanical operation tests on operating mechanism in accordance with manufacturer's published data.
 - f. Measure critical distances on operating mechanism as recommended by the manufacturer. Critical distances of the operating mechanism must be in accordance with manufacturer's published data.
 - g. Verify cell fit and element alignment.
 - h. Verify racking mechanism operation.
 - i. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
 - j. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
 - k. Perform time-travel analysis. Travel and velocity values must be in accordance with manufacturer's published data.
 - l. Record as-found and as-left operation counter reading. Operation counter must advance one digit per close-open cycle.
2. Electrical Tests:
 - a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with switch closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Insulation-resistance values must be in accordance with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.1. Investigate and correct values of insulation resistance less than this table or manufacturer's recommendations. Dielectric-withstand-voltage tests must not proceed until insulation-resistance levels are raised above minimum values.
 - b. Perform a contact/pole-resistance test. Compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value. Microhm or dc millivolt drop values must not exceed the high levels of the normal range in accordance with manufacturer's published data. If manufacturer's published data is not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of the lowest value.
 - c. Perform minimum pickup voltage tests on trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of the trip and close coils must comply with manufacturer's published data. In the absence of manufacturer's published data, comply with NETA ATS, Table 100.20.
 - d. Verify correct operation of auxiliary features, such as electrical close and trip operation, trip-free operation, and anti-pump function. Auxiliary features must operate in accordance with manufacturer's published data.
 - e. Trip circuit breaker by operation of each protective device. Reset trip logs and indicators.
 - f. Perform power-factor or dissipation-factor tests on each pole with the breaker open and each phase with the breaker closed. Power-factor or dissipation-factor values must comply with manufacturer's published data.
 - g. Perform vacuum bottle integrity (dielectric-withstand-voltage) test across each vacuum bottle, with the contacts in the "open" position in accordance with manufacturer's published data. If no evidence of distress or insulation failure is observed by the end of the total time

of voltage application during the vacuum bottle integrity test, the specimen is considered to have passed the test.

- h. Perform a dielectric-withstand-voltage test in accordance with manufacturer's published data. If no evidence of distress or insulation failure is observed by the end of the total time of voltage application during the dielectric-withstand-voltage test, the specimen is considered to have passed the test.

E. Microprocessor-Based Protective Relay Field Tests:

1. Visual and Mechanical Inspection:

- a. Record model number, style number, serial number, firmware revision, software revision, and rated control voltage.
- b. Verify operation of light-emitting diodes, display, and targets.
- c. Record passwords for each access level.
- d. Clean the front panel and remove foreign material from the case.
- e. Check tightness of connections.
- f. Verify that the frame is grounded in accordance with manufacturer's instructions.
- g. Set the relay in accordance with results in Section 260573.16 "Coordination Studies" and in Section 260573.19 "Arc-Flash Hazard Analysis."
- h. Download settings from the relay. Print a copy of the settings for the report and compare the settings to those specified in the coordination study.

2. Electrical Tests:

- a. Perform insulation-resistance tests from each circuit to the grounded frame in accordance with manufacturer's published data.
- b. Apply voltage or current to analog inputs, and verify correct registration of the relay meter functions.
- c. Functional Operation: Check functional operation of each element used in the protection scheme.
- d. Control Verification:
 - 1) Functional Tests:
 - a) Check operation of active digital inputs.
 - b) Check output contacts or silicone-controlled rectifiers, preferably by operating the controlled device, such as circuit breaker, auxiliary relay, or alarm.
 - c) Check internal logic functions used in protection scheme.
 - d) Upon completion of testing, reset min/max recorders, communications statistics, fault counters, sequence-of-events recorder, and event records.
 - 2) In-Service Monitoring: After the equipment is initially energized, measure magnitude and phase angle of inputs and verify expected values.

F. Ground Resistance Test:

1. Visual and Mechanical Inspection:

- a. Verify ground system complies with the Contract Documents and NFPA 70 "Grounding and Bonding" Article.
- b. Inspect physical and mechanical condition. Grounding system electrical and mechanical connections must be free of corrosion.
- c. Inspect bolted electrical connections using a calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12. Bolt-torque levels must be in accordance with manufacturer's published data. In the absence of

manufacturer's published data, use NETA ATS, Table 100.12. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value.

- d. Inspect anchorage.

2. Electrical Tests:

- a. Perform fall-of-potential or alternative test in accordance with IEEE 81 on the main grounding electrode or system. The resistance between the main grounding electrode and ground must be no more than **[5 ohms][maximum ground resistance value specified in the "Examination" Article]**.
- b. Perform point-to-point tests to determine the resistance between the main grounding system and major electrical equipment frames, system neutral, and derived neutral points. Investigate point-to-point resistance values that exceed 0.5 ohms. Compare equipment nameplate data with Contract Documents.
- c. Inspect bolted electrical connections for high resistance using a low-resistance ohmmeter to compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value.
- d. Inspect physical and mechanical condition.
- e. Inspect anchorage.

G. Nonconforming Work:

- 1. Switchgear will be considered defective if it does not pass tests and inspections.
- 2. Remove and replace defective units and retest.

H. Prepare test and inspection reports.

3.6 SYSTEM FUNCTION TESTS

- A. System function tests must prove the correct interaction of sensing, processing, and action devices. Perform system function tests after "Field Quality Control" tests have been completed and components have passed specified tests.
 - 1. Develop test parameters and perform tests for evaluating performance of integral components and their functioning as a complete unit within design requirements and manufacturer's published data.
 - 2. Verify the correct operation of interlock safety devices for fail-safe functions in addition to design function.
 - 3. Verify the correct operation of sensing devices, alarms, and indicating devices.

3.7 MAINTENANCE

- A. Infrared Inspection: Perform the survey during periods of maximum possible loading. Remove necessary covers prior to the inspection.
 - 1. After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of the electrical power connections of the switchgear.
 - 2. Instrument: Inspect distribution systems with imaging equipment capable of detecting a minimum temperature difference of 1 deg C at **86 deg F (30 deg C)**.
 - 3. Record of Infrared Inspection: Prepare a certified report that identifies the testing technician and equipment used, and lists the results as follows:

- a. Description of equipment to be tested.
 - b. Discrepancies.
 - c. Temperature difference between the area of concern and the reference area.
 - d. Probable cause of temperature difference.
 - e. Areas inspected. Identify inaccessible and unobservable areas and equipment.
 - f. Identify load conditions at time of inspection.
 - g. Provide photographs and thermograms of the deficient area.
4. Act on inspection results in accordance with the recommendations of NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 21 16 00 - PARALLELING LOW-VOLTAGE SWITCHGEAR

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Multiple-generator paralleling monitoring and control system.
2. Single-generator paralleling monitoring and control system.
3. Metal-enclosed, circuit-breaker switchgear (600 V and less).

B. Products Furnished, but Not Installed, under This Section:

1. **<Insert products furnished, but not installed>.**

C. Products Installed, but Not Furnished, under This Section:

1. **<Insert products installed, but not furnished>.**

D. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
3. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** for preinstallation conference procedures.
4. Section 260913 "Electrical Power Monitoring" for interfacing communication and metering requirements.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>**.

B. Preinstallation Coordination Meeting(s): For {Insert system or product}. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location>** before **<Insert construction activity>**.

1. Attendees: Installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**][, and **Owner's Commissioning Authority**] of scheduled meeting dates.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of paralleling low-voltage switchgear.
 - a. Include technical data on features, performance, electrical characteristics, ratings, and

finishes for programmable logic controllers, instrumentation, control devices, monitoring devices, **[SCADA interface devices,][Ethernet interface,]** and display components.

- b. Include rated capacities, operating characteristics, furnished specialties, factory settings, and accessories for individual circuit breakers.
- c. Include time-current characteristic curves for overcurrent protective devices.

B. Shop Drawings:

1. For each type of paralleling low-voltage switchgear.

- a. Include dimensioned plans, elevations, sections, details, shipping sections, weights of assembled sections, and required clearances and service space around equipment.
- b. Include tabulation of installed devices with features and ratings.
- c. Include enclosure types and details.
- d. Detail locations for anchor bolts **[and leveling channels]**.
- e. Show bus configuration with current rating, size, and number of conductors in bus run, including phase, neutral, and ground conductors of main and branch buses.
- f. Indicate short-time and short-circuit current rating of switchgear assembly.
- g. Include features, characteristics, ratings, and factory settings of individual overcurrent protective devices and auxiliary components.
- h. Detail nameplate legends.
- i. Include mimic-bus diagram.
- j. Include three-line power wiring diagrams for paralleling low-voltage switchgear, generators, and related equipment showing device terminal numbers.
- k. Include point-to-point schematic control, monitoring, and alarm wiring diagrams showing internal component terminal numbers.
- l. Include point-to-point schematic control, monitoring, and alarm wiring diagrams for external components indicating terminal numbers for the following:
 - 1) Engine generators.
 - 2) Transfer switches.
 - 3) Other load-control devices.
 - 4) Elevator controller in elevator bank.
 - 5) DDC system for HVAC controller.
 - 6) SCADA remote terminal unit.

2. Sequence of Operation: Description of sequence of operation for paralleling controls in automatic, manual, system test, and peak-shaving modes.

- a. Include the following in description of automatic-mode sequence of operation:
 - 1) Programmed sequence of initial generator starting and connection of generators to isolated paralleling bus, including description of how proposed design complies with requirements for redundancy.
 - 2) Programmed sequence of transferring loads to isolated paralleling bus based on operator-adjustable preset priorities and preset loads. Include initial load settings.
 - 3) Programmed sequence of starting and stopping generators based on actual real-time measured loads.
 - 4) Programmed sequence of sending load-shed signal to transfer switches **[, and to other devices]** when generator frequency does not return to normal frequency within adjustable time period.
 - 5) Programmed sequence of stopping generators based on no transfer switch or other device sending start signal.
- b. Include the following in description of system testing mode sequence of operation:

- 1) Load.
- 2) No load.

- c. Include in description, peak-shaving-mode sequence of operation.
- d. Include in description, manual-mode sequence of operation showing that manual mode fulfills requirement to permit operator at paralleling low-voltage switchgear to accomplish automatic, system test, and peak-shaving functions.
- e. Paralleling Low-Voltage Switchgear Redundancy: Identify single points of failure.

C. Samples:

1. Representative portion of mimic bus with specified finish. Manufacturer's color charts showing colors available for mimic bus.

D. Delegated Design Submittal: For seismic restraints for switchgear and wind-loading for outdoor enclosures, include analysis data signed and sealed by qualified structural professional engineer responsible for their preparation.

E. Field Quality-Control Submittals:

1. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Source quality-control reports.
- B. Sample Warranty: For manufacturer's special warranty.

1.5 CLOSEOUT SUBMITTALS

- A. Record Documentation: Include updated mimic bus diagram reflecting field changes after final switchgear load connections have been made, for record.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare Parts: Furnish to Owner the following spare parts for repairing paralleling switchgear that are packaged with protective covering for storage on-site and identified with labels describing contents:
 1. Control Power Fuses: **[Six]<Insert number>** of each type and rating used. Include spares for the following:
 - a. Potential transformers.
 - b. Control power circuits.
 2. Indicating Lights: **[Six]<Insert number>** of each type installed.
 3. Draw-out Circuit Breakers: One of each type and rating used for circuit breaker in paralleling low-voltage switchgear.
- B. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to switchgear, packaged with protective covering for storage on-site and identified with labels describing contents. Include the following:

1. Racking handle to move circuit breaker manually between connected and disconnected positions.
2. Tools for circuit-breaker and switchgear tests, inspections, maintenance, and operation.
3. Portable test set for testing functions of circuit-breaker, solid-state trip devices without removal from switchgear.
4. Relay and meter test plugs suitable for testing switchgear meters and switchgear class relays.
5. Portable, floor-supported, roller-base, elevating carriage arranged for moving circuit breakers in and out of compartments.
6. Overhead-circuit-breaker lifting device, track mounted at top front of switchgear and complete with hoist and lifting yokes matching each size of draw-out circuit breaker installed.
7. Spare-Fuse Cabinet: Identified and compartmented steel box or cabinet with lockable door.
8. Storage for Manual: Rack or holder, near operating instructions, for copy of maintenance manual.

C. Consumable Items:

1. After completion of field quality control, startup, commissioning, adjusting, and closeout activities, replace air filters and refill fluid reservoirs.

1.7 DELIVERY, STORAGE, AND HANDLING

- A. Deliver paralleling low-voltage switchgear in sections of lengths that can be moved past obstructions in delivery path.
- B. Store paralleling low-voltage switchgear indoors in clean dry space with uniform temperature to prevent condensation.

1.8 WARRANTY

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed paralleling switchgear perform in accordance with specified requirements and agrees to repair or replace components that fail to perform as specified within extended-warranty period.
 1. Extended-Warranty Period: **[Two][Three][Four]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that components of paralleling switchgear perform in accordance with specified requirements and agrees to provide repair or replacement of components that fail to perform as specified within extended-warranty period.
 1. **[Initial]**Extended-Warranty Period: **[Three][Four][Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
 2. Follow-On Extended-Warranty Period: **[Eight]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for materials **[that failed because of transient voltage surges]** only, free on board **[origin][destination]**, freight prepaid.

PART 2 - PRODUCTS

2.1 OWNER-FURNISHED PRODUCTS

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for product that Owner intends to furnish to Contractor>**.

- B. Description: **<Insert description of product, including special features, options, and finishes for Owner-furnished product that may impact Contractor's installation>.**
- C. Accessories: **<Insert accessories that will be provided with product>.**

2.2 EXISTING PRODUCTS[**TO BE MODIFIED**][**TO BE REMOVED AND RE-INSTALLED**]

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact Work>.**
- C. Accessories: **<Insert accessories included with existing product>.**

2.3 SYSTEM DESCRIPTION

- A. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Multiple-generator paralleling monitoring and control panel in paralleling low-voltage switchgear must monitor and control the following standby power system components:
 - 1. Paralleling low-voltage switchgear.
 - 2. Single-generator monitoring and control system.
 - 3. Single-generator paralleling monitoring and control systems that are **[part of paralleling low-voltage switchgear][located at individual engine generator]**.
 - 4. Engine generators.
 - 5. Transfer switches.
 - 6. Circuit breakers downstream of transfer switches.
 - 7. Other load-control devices.
 - 8. Distribution circuit breakers in paralleling low-voltage switchgear.
- C. Redundant Standby Power System:
 - 1. Single generator with associated single-generator paralleling monitoring and control system.
 - 2. Black-start controller with no single point of failure.
 - 3. Black-start controller with backup control in multiple-generator paralleling monitoring and control system.
 - 4. Multiple-generator paralleling monitoring and control system must automatically be performed by backup system without degradation in the event that primary system fails to function (such as component failure or off-line maintenance).
 - 5. Multiple-generator paralleling monitoring and control system must automatically be performed by backup system without degradation in the event that primary system fails to function (such as component failure or off-line maintenance), except for the following manually operated functions:
 - a. Load management.
 - b. Peak shaving.
 - c. **<Insert exceptions>.**
- D. Sequence of Operation for Normal Conditions:
 - 1. Paralleling low-voltage switchgear, including controlled generators[, **controlled circuit breakers,**][, **other controlled devices,**] and transfer switches, must be in automatic position and

- ready to operate on loss of power or other designated initiation conditions.
2. Single-generator monitoring and control system has not received "start" signal from the following:
 - a. Transfer switch.
 - b. Multiple-generator paralleling monitoring and control system.
 - c. **<Insert device>**.

E. Sequence of Operation for Loss of Normal Power Conditions:

1. Single-generator monitoring and control system must receive start signal from redundant system.
 - a. Start signal may come from transfer switch[**or other device**] directly wired to start engine generator.
 - b. Start signal may come from multiple-generator paralleling monitoring and control system that monitors loss of normal source availability from one or more transfer switches[**or other device**].
2. On receiving start signal, single-generator monitoring and control system must start engine generators and achieve rated voltage and frequency.
3. If engine generator fails to start, after expiration of overcrank time delay, engine generator shuts down and alarm is initiated.
4. Transfer Inhibit Control: Multiple-generator paralleling monitoring and control system receives loss of normal source availability signal from transfer switch(es)[**or other device**] and sends transfer inhibit signals.
 - a. Transfer switch(es) serving emergency loads may not be sent transfer-inhibit signal.
 - b. Transfer switch(es) serving other than emergency loads that must transfer within required time must have transfer-inhibit signal end at such time as will permit transfer switch to operate within required time.
 - c. Transfer switch(es) serving other than emergency loads that are not required to transfer within required time must be sent transfer-inhibit signal.
 - d. Transfer switch(es) serving loads that are to be disconnected after detecting loss of normal source availability must signal associated circuit breakers and other load devices to de-energize these predetermined loads.
 - e. Transfer switch(es) serving HVAC loads that need to operate at lower load by modifying HVAC sequence of operation after detecting loss of normal source availability must signal DDC system for HVAC to change to HVAC load-shed sequence of operation for associated equipment.
 - f. Transfer switch(es) serving elevator loads after detecting loss of normal source availability must signal associated elevator controllers that elevators are connected to generator power and must initiate sequence of operation in elevator control system to protect elevators and to reduce elevator load demand.
 - g. Distribution circuit breakers in paralleling low-voltage switchgear, which are indicated in priority-load schedule to transfer load by opening and closing circuit breaker, receive inhibit closing signal.
5. Black-Start Control: Prevent out-of-phase paralleling. After selecting first generator to achieve 90 percent rated voltage and frequency, inhibit connection of generator-controlled circuit breakers to isolated paralleling bus, then close circuit breaker connecting first generator to isolated paralleling bus.
 - a. Comply with requirements in applicable engine generator Section for selection of first engine generator to connect to isolated paralleling bus.
 - b. Redundant System: Multiple-generator paralleling monitoring and control system selects first engine generator to connect to isolated paralleling bus.

6. Single-generator paralleling monitoring and control system synchronizes its associated engine generator and allows closure of respective generator paralleling low-voltage circuit breakers to isolated paralleling bus. On closure to isolated paralleling bus, engine generator assumes its proportional share of total load.
7. Failure of Engine Generator to Synchronize: If engine generator fails to synchronize, sound alarm after preset time delay, but continue to attempt to synchronize engine generator until signaled to stop by manual operation.

F. Priority Controller Sequence of Operation:

1. Programming from Human-Machine Interface for Priority Controller:
 - a. Set priority blocks of load that indicate priority number and scheduled size of load from Priority-Load Schedule. Set generator blocks of capacity that indicate individual engine generators and their capacity.
 - b. Signal to transfer loads to engine generator source may be accomplished by one of the following:
 - 1) Signaling to transfer-inhibit enable transfer switch associated with priority load to transfer load.
 - 2) Signaling load-add relay at transfer switch to transfer priority load.
 - 3) Closing distribution-feeder circuit breaker associated with priority load.
 - 4) Enabling another device.
2. When generator has transferred Priority 1 emergency load, send signal to transfer loads that must be transferred within specific time in accordance with Priority-Load Schedule.
3. When generator capacity is adequate to support next priority load, send signal to transfer next priority load to generator source until priority loads have been transferred.

G. Overload Sequence of Operation:

1. Signal to shed loads from generator source may be accomplished by one of the following:
 - a. Signaling load-shed relay in transfer switch associated with priority load.
 - b. Opening distribution-feeder circuit breaker associated with priority load.
 - c. Disabling another device.
2. Overload sequence of operation sends signal to shed lowest connected load priority when isolated paralleling bus frequency does not return to normal frequency within its adjustable time period.
3. If isolated paralleling bus does not return to normal frequency after shedding lowest connected priority load within adjustable time period, additional load continues to be shed by signaling to load shed in reverse priority until isolated paralleling bus returns to normal frequency.
4. Loads shed can be reconnected to isolated paralleling bus only by manual reset at human-machine interface.

H. Load-Demand Sequence of Operation:

1. With load-demand sequence of operation activated, controller continuously monitors total isolated paralleling bus load.
2. If isolated paralleling bus load is below preset limits and after preset time delay, demand controller shuts down engine generators in predetermined order until minimum number of sets are operating. Set preset limits, predetermined order, and preset time delay, as well as choose manual operation, from human-machine interface.
3. On sensing available isolated paralleling bus capacity diminished to set point, controller starts and closes engine generators to isolated paralleling bus to accommodate load.

- I. Individual Transfer Switch Return to Normal Condition Sequence of Operation: Enable individual transfer switches to return to normal power when normal power is available at transfer switch.
- J. Feeder Circuit Breakers in Paralleling Low-Voltage Switchgear Return to Normal Condition Sequence of Operation: When normal power is available at transfer switches served by feeder circuit breaker, open circuit breaker.
- K. Individual Circuit Breaker or Other Load Device for Loads Controlled Downstream from Transfer Switch Sequence of Operation: Return circuit breaker or other load device to closed position when transfer switch serving circuit breaker has returned to normal power.
- L. Return to Normal Condition Sequence of Operation:
 1. Process starts on removal of start signals from system.
 2. When no load remains on isolated paralleling bus, generator breakers open, go through cool-down period, and shut down.
 3. If start signal is received during cool-down period, one engine generator is reconnected to isolated paralleling bus, and system operation follows that of "loss of normal power."
- M. System Test Sequence of Operation:
 1. Configure tests to comply with NFPA 110, Level 1 testing requirements for generator. Automatically generate NFPA 110, Level 1 reports.
 2. Single-generator test.
 3. Multiple-generator test.
 4. Start generators manually, by generator exerciser on user-defined schedule, or by remote contact from **[DDC system for HVAC][SCADA system]**.
 5. Engine generator(s) start and achieve rated voltage and frequency.
 6. Failure of Engine Generator to Start: After expiration of overcrank time delay, engine generator shuts down and alarm is initiated.
 7. Black-Start Control: Prevent out-of-phase paralleling. After selecting first generator to achieve 90 percent rated voltage and frequency, inhibit connection of generator-controlled circuit breakers to isolated paralleling bus, then close circuit breaker connecting first generator to isolated paralleling bus. Single-generator paralleling monitoring and control system synchronizes its associated engine generator and allows closure of respective generator paralleling low-voltage circuit breakers to isolated paralleling bus. On closure to isolated paralleling bus, engine generator assumes its proportional share of total load.
 8. Failure of Engine Generator to Synchronize: If engine generator fails to synchronize, sound alarm after preset time delay, but continue to attempt to synchronize engine generator until signaled to stop by manual operation.
 9. Manually select or automatically preselect whether test is load or no-load test. If test is load test, manually select or automatically preselect loads to be transferred in accordance with schedule or by adjustable time delays at transfer switches. After generators are connected to isolated paralleling bus, transfer loads by sending signal to load-add relay that is connected to input for "remote transfer to generator source" of transfer switch controller or to other devices. **[If test is load-bank test, automatically operate load-bank breaker to connect load bank for testing generators based on number and configuration of generators.]**
 10. After adjustable period of time system, allow engine generators to optimize down to only required number to be online to avoid wet stacking. Set stopping and starting sequences through human-machine interface panel device and allow settings based on manual priorities or by engine run time.
 11. On sensing available bus capacity diminished to set point, controller starts and closes engine generators to isolated paralleling bus to accommodate load.
 12. After system test is completed, transfer loads back to normal power with transfer switches. Shut down system using sequence in automatic mode.

13. If there is outage during this mode of operation, automatically change to requirements specified in "Sequence of Operation for Loss of Normal Power Conditions" Paragraph, send load-shed signals to lower-priority loads until load is below generator capacity, signal engine generator that is not currently operating to start, and cancel system test.
- N. Peak-Shaving Sequence of Operation:
1. Start engine generators manually through human-machine interface or by remote contact initiated from peak-shaving command from **[DDC system for HVAC][SCADA system]**.
 2. Engine generator(s) start and achieve rated voltage and frequency.
 3. Failure of Engine Generator to Start: After expiration of overcrank time delay, engine generator shuts down and alarm is initiated.
 4. Black-Start Control: Prevent out-of-phase paralleling. After selecting first generator to achieve 90 percent rated voltage and frequency, inhibit connection of generator-controlled circuit breakers to isolated paralleling bus, then close circuit breaker connecting first generator to isolated paralleling bus.
 5. Single-generator paralleling monitoring and control system synchronizes its associated engine generator and allows closure of respective generator paralleling low-voltage circuit breakers to isolated paralleling bus. On closure to isolated paralleling bus, engine generator assumes its proportional share of total load.
 6. Failure of Engine Generator to Synchronize: If generator set fails to synchronize, sound alarm after preset time delay, but continue to attempt to synchronize engine generator until signaled to stop by manual operation.
 7. Through human-machine interface manually select or on closure of contact from peak-shaving command preselected loads to be automatically transferred to isolated paralleling bus. After engine generators are connected to isolated paralleling bus, transfer loads by sending signal to corresponding load-add relays that are connected to remote transfer to generator source control input at transfer switch or similar control devices. Add loads until contact closure from **[DDC system for HVAC][SCADA system]** opens.
 8. After adjustable period of time, allow engine generators to optimize down to only required number to be online to avoid wet stacking. Set stopping and starting sequences through human-machine interface panel device and allow settings based on manual priorities or by engine run time.
 9. If isolated paralleling bus load is below preset limits and after preset time delay, demand controller shuts down engine generators in predetermined order until minimum number of sets are operating. Set preset limits, predetermined order, and preset time delay, as well as choose manual operation, from human-machine interface.
 10. On sensing available isolated paralleling bus capacity diminished to set point, controller starts and closes engine generators to isolated paralleling bus to accommodate load.
 11. After peak shaving is completed, transfer loads back to normal power. Shut down system using sequence in automatic mode.
 12. If there is outage during this mode of operation, automatically change to requirements specified in "Sequence of Operation for Loss of Normal Power Conditions" Paragraph, send, send load-shed signals to lower-priority loads until load is below engine generator capacity, signal generators that are not currently operating to start, and cancel system peak-shaving operation.
 13. Manual Sequence of Operation: Include functions indicated for automatic mode, except that operator must be able to monitor parameters and manually perform operations.
- O. Comply with NFPA 110 for the following:
1. Legally Required Standby Systems: EPSS Level 1, Type 10.
 2. Optional Standby Systems: EPSS **[Level 1][Level 2]**, **[Type 10][Type 60][Type 120][Manual]**.
- P. Comply with NFPA 99 for healthcare applications.

2.4 MULTIPLE-GENERATOR PARALLELING MONITORING AND CONTROL SYSTEM

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[ABB, Electrification Business]**
 2. **[ASCO Power Technologies]**
 3. **[Caterpillar, Inc.; Electric Power Division]**
 4. **[Cummins Power Generation]**
 5. **[Russelectric, Inc]**
 6. **[SAI Advanced Power Solutions/Switchboard Apparatus Inc.]**
 7. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[ABB, Electrification Business]**
 2. **[ASCO Power Technologies]**
 3. **[Caterpillar, Inc.; Electric Power Division]**
 4. **[Cummins Power Generation]**
 5. **[Russelectric, Inc]**
 6. **[SAI Advanced Power Solutions/Switchboard Apparatus Inc.]**
 7. **<Insert manufacturer's name>**
- C. Source Limitations: Obtain paralleling low-voltage switchgear from same manufacturer as required for **[engine generator][transfer switches][transfer switches and engine generators]**.
- D. Components and Devices: Factory mounted in **[metal-enclosed, paralleling low-voltage switchgear][separate switchboard]**.
1. Paralleling Low-Voltage Switchgear Door-Mounted Control Devices: Industrial, oil-type devices.
 2. Indicator Lamps: High-intensity digital display.
- E. Control Power for Multiple-Generator Monitoring and Control System: Supplied from 24 V(dc) starting batteries of engine generators.
1. Isolate battery bank to prevent failure of one battery from disabling entire system.
 2. Include, if necessary, separate control power battery system rated 24 V(dc) for equipment unable to accept voltage drop that occurs during engine cranking.
- F. Redundant Multiple-Generator Monitoring and Control System Controller:
1. Fully equip with hot swappable programmable logic controller, power supplies, and I/O points.
 2. Black-start control equipment specified in applicable engine generator Section.
- G. Multiple-generator monitoring and control system auto/manual selector switch.
- H. Control switch for circuit breaker that serves load bank.
- I. Full-Color, Touch-Screen, Human-Machine Interface Device:
1. Minimum viewing area of **[60 sq. inch (387 sq. cm)][100 sq. inch (645 sq. cm)]** must be configurable in either U.S. Standard or SI (metric) units.
 2. Main Menu: Include date, time, and system status messages. Configure screens so that no

screen is more than three touches from other screen.

- a. Individual engine generator data must be accessed at paralleling low-voltage switchgear from **[main menu][main menu and single-generator paralleling monitoring and control system]**.
3. One-Line Diagram: Depicting system configuration and system status by screen animation, screen colors, text messages, or pop-up indicators.
 - a. Conditions for Engine Generators, Buses, and Paralleling Circuit Breakers: Energized or de-energized.
 - b. Engine Generator Modes:
 - 1) Auto.
 - 2) Lockout.
 - 3) Reset.
 - 4) Off.
 - 5) Cool down.
 - 6) Test off line.
 - 7) Test on load.
 - c. Engine Generator Status: Normal, warning, shutdown, or load-demand stop.
 - d. Paralleling Circuit-Breaker Status: Open, closed, or tripped.
 - e. Bus Conditions: Energized or de-energized.
 - f. Percent load.
4. AC metering screen for isolated paralleling bus must display the following:
 - a. Phase, volts, and amperes.
 - b. Kilowatts.
 - c. Kilovolt amperes.
 - d. Kilovolt-ampere rating.
 - e. Power factor.
 - f. Frequency.
 - g. Kilowatt hour.
 - h. Kilowatt demand.
 - i. Real-time trend chart for system kilowatts and volts updated on not less than one-second intervals.
 - j. A minimum of one historical trend chart for total system loads with intervals no shorter than five minutes and minimum duration of four hours.
 - k. Percent of available capacity of engine generators that are operating in parallel on bus.
5. Engine Generator Monitoring and Control Screen:
 - a. Control:
 - 1) Engine generator manual start/stop control (functional only when paralleling low-voltage switchgear mounted control switch is in "Auto" position).
 - 2) Engine generator alarm reset.
 - 3) Manual paralleling and circuit-breaker enable/inhibit controls.
 - 4) Engine function and timer settings.
 - 5) System function, testing, and timer settings.
 - 6) Engine generator optimization settings: automatically determine priority of engine generators based on engine run time and number of engine starts or manually assign engine priorities.

- b. Status and Alarms:
 - 1) Power Metering: Watts, volt-ampere reactive, power factor, frequency, amperes, and voltage.
 - 2) Engine run hours.
 - 3) Engine status.
 - 4) Number of generator circuit-breaker operations.
 - 5) Replicate status and alarms from single-generator paralleling monitoring and control panel.
6. Dual, Three-Phase, Metering Screen: Graphical analog (270 electrical degree) metering representation with digital display. Display two generators at same time or one generator and isolated paralleling bus at same time. Display graphical synchroscope when one generator and isolated paralleling bus are selected.
 - a. True RMS, three-phase voltage, amperes, kilowatts, kilovolt amperes, kilovolt-ampere reactive, power factor, and frequency parameters.
 - b. Engine battery voltage display.
7. Password-Protected System Control Screen:
 - a. System Test Modes: Test with load/test without load/normal/retransfer time-delay override.
 - b. Test with Load: Starts and synchronizes engine generators on isolated paralleling bus; loads are transferred to isolated paralleling bus.
 - c. Test without Load: Starts and synchronizes engine generators on isolated paralleling bus but does not transfer loads to isolated paralleling bus.
 - d. Time adjustments for retransfer time delay, transfer time delay, system time delay on stopping, and system time delay on starting.
8. Password-Protected, Peak-Shaving Control Screen:
 - a. Peak-Shaving Modes: Manual start and transfer of loads; automatic start and transfer of loads by DDC system for HVAC peak-shaving relay closure.
 - b. For automatic mode, set load priorities for peak-shaving function.
 - c. Time adjustments for retransfer time delay, transfer time delay, system time delay on stopping, and system time delay on starting.
9. Load-Demand Control Screen: Monitors total load on isolated paralleling bus and controls number of engine generators running so that capacity tracks load demand.
 - a. Load-Demand Control: Enable/disable.
 - b. Set engine generator shutdown sequence.
 - c. Load-Demand Pickup Set Point: Adjustable from 90 to 40 percent in 5 percent increments.
 - d. Load-Demand Dropout Set Point: Adjustable from 20 to 70 percent in 5 percent increments.
10. Manual Load Control Screen: Allows operator to manually add or delete engine generators from paralleled system in response to system load parameters.
 - a. Indication of system available in kilowatts and amperes.
 - b. Control functions allow manual addition/removal of engine generators on system, and activation of load-shed/load-restore functions.
11. Load-Add/Load-Shed Sequence Screen: Password protected and with the following minimum functions:

- a. Display sequence.
 - b. Assigns "load-add sequence priority" to load-control relay with designation for relay operation after set number of engine generators are online.
 - c. Assigns "load-shed sequence priority" to load-control relay with designation for relay operation depending on number of engine generators online.
12. Alarm Summary and Run Report Screen:
- a. Lists most recent alarm conditions and status changes.
 - b. Lists minimum of most recent 32 alarm conditions by name and time/date; acknowledges alarm conditions with time/date.
 - c. For start signal, lists start time and date, stop time and date, maximum kilowatt and ampere load on system during run time, and start and stop times of individual engine generators.
 - d. Lists generator circuit position and status.
 - e. Access to trend monitored automatic transfer switches.
 - f. **[16-gigabyte]<Insert value>** hard-disk space for storing database file for multiple-generator paralleling monitoring and control panel trending and event logging. Trend and log data at resolution of one second. If hard drive is full, overwrite in first-in-first-out procedure.
 - 1) Trend up to eight monitored points simultaneously.
13. Load Status and Control Screen: Displays status of automatic transfer switches connected to system for **[32][64]** transfer switches, and other controlled devices.
- a. Automatic transfer switch connected to normal.
 - b. Automatic transfer switch connected to emergency.
 - c. Controlled circuit breakers downstream from automatic transfer switch device enabled or disabled.
 - d. Engine start indication.
 - e. Load-shed indication.
 - f. Load-add indication.
 - g. Inhibit to emergency source.
 - h. Inhibit to normal source.
 - i. Transfer Switch Power Metering Function: Total kilowatt, three-phase current, and three-phase voltage.
 - j. Automatic Transfer Switch Load Priority: Ability to change priorities of automatic transfer switches (password protected).
 - k. Display name, status, and priority of load block (whether on or off) and total load of that block.
 - l. Allow for manually adding or shedding loads.
14. Automated email messages must be transmitted when shutdowns occur and must include time and date of alarm.
15. Based on either number operations or time since last maintenance, suggest maintenance period for generator (run hours), controlled circuit breaker (number of operations), and transfer switches (number of transfers).
16. Status and Alarm Screen:
- a. Visual alarm status indicator and alarm horn with silence and acknowledge push-button.
 - b. Status, Light Only:
 - 1) "SYSTEM NOT IN AUTO" (red).
 - 2) Running Status: Display engine generator number and running-status light (green).
 - 3) Load-demand mode (green).

- 4) Priority Load Status: Display load number with "LOAD ADD" (green) and "LOAD SHED" (red).
- 5) System test (green).
- 6) Remote system start (red).
- 7) Monitoring of Transfer Switch:
 - a) Normal source available (green).
 - b) Connected to normal (green).
 - c) Generator source available (green).
 - d) Connected to generator source (green).

c. Status Light and Alarm:

- 1) Isolated paralleling bus under frequency (red).
- 2) Isolated paralleling bus over frequency (red).
- 3) Auxiliary power failure (red).
- 4) Emergency start signal power failure (red).
- 5) Load-Shed Level Status: Displays load number and red load-shed, status light.
- 6) Generator Alarm Status: Displays generator number and red "Check Generator" status light.
- 7) Controller malfunction (red).
- 8) Check station battery (red).
- 9) Isolated paralleling bus overload (red).
- 10) System not in auto (red).
- 11) Main tank, low fuel (amber)
- 12) Main tank, high fuel (amber).
- 13) Main tank, fuel leak (red).

J. Remote Monitoring: Replicate human-machine interface monitoring functions **[at SCADA][at remote computer terminal][via communication bus]**.

K. Remote Monitoring of Status and Alarms: Replicate human-machine interface status and alarms at DDC system for HVAC via isolated contacts.

2.5 SINGLE-GENERATOR PARALLELING MONITORING AND CONTROL SYSTEM

A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. **[ABB, Electrification Business]**
2. **[ASCO Power Technologies]**
3. **[Caterpillar, Inc.; Electric Power Division]**
4. **[Cummins Power Generation]**
5. **[Russelectric, Inc]**
6. **<Insert manufacturer's name>**

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[ABB, Electrification Business]**
2. **[ASCO Power Technologies]**
3. **[Caterpillar, Inc.; Electric Power Division]**
4. **[Cummins Power Generation]**

5. **[Russelectric, Inc]**
6. **<Insert manufacturer's name>**
- C. Source Limitations: Obtain paralleling low-voltage switchgear from same manufacturer as required for **[engine generator][transfer switches][transfer switches and engine generators]**.
- D. Components and Devices: Factory mount in single-generator section of metal-enclosed, paralleling low-voltage switchgear.
 1. Paralleling low-voltage switchgear door-mounted control devices must be industrial oil-type devices. Indicator lamps must be high-intensity digital display.
- E. Control Power: Supply control power from 24 V(dc) starting batteries from controlled generator. Include separate control power battery system rated 24 V(dc) for equipment unable to accept voltage drop that occurs during engine cranking.
- F. Programmable Logic Controller: Factory-mounted controller, separate from multiple-generator paralleling monitoring and control system in single-generator paralleling monitoring and control module of metal-enclosed, paralleling low-voltage switchgear.
- G. Single-Generator Paralleling Low-Voltage Switchgear Circuit Breaker:
 1. Factory mount circuit-breaker control switch.
 2. Paralleling Circuit-Breaker Monitor and Control:
 - a. Monitors circuit-breaker auxiliary contacts.
 - b. Initiates fault signal if circuit breaker fails to close within adjustable time-delay period (0.5 to 15 seconds).
 - c. Trips open and locks out paralleling circuit breaker on paralleling circuit breaker failure to close, until manually reset.
- H. Generator Mode Selector Switch: Factory mounted in single-generator paralleling monitoring and control system module of metal-enclosed, paralleling low-voltage switchgear.
 1. "Lockout/Reset" mode prevents generator from starting or immediately shuts down generator if running.
 2. "Off/Cool-Down" mode stops engine after cool-down period.
 3. "Auto" mode allows generator to start on receipt of remote start signal. If generator is already running and there is not start signal, then "Auto" mode allows engine to run for predetermined cool-down period before stopping.
 4. "Test Off-Line" allows engine to start and run as if start signal were received, except it does not allow generator to connect to isolated paralleling bus unless start signal is received.
 5. "Test Online" allows engine to start, run, and connect to isolated paralleling bus as if start signal were received.
- I. Engine Generator Controller: Woodward compatible.
 1. Factory mount governor (speed control and load sharing) supplied in applicable engine generator Section in single-generator monitoring and control module.
 2. Loading control interface to governor system.
 3. Automatic synchronizer.
- J. Automatic Synchronizer:
 1. Include sync mode selector switch with RUN-OFF-CHECK-PERMISSIVE positions. In RUN mode, enable active synchronization and sync-check function. In CHECK mode, perform sync-

check function. In PERMISSIVE mode, annunciate when generator and bus are synchronized but do not allow breaker closure.

- a. Include discrete inputs in synchronizer to switch to each mode.
 2. Bias generator speed and voltage to match paralleling isolated bus.
 3. If automatic synchronizer receives permissive signal to allow closure to paralleling isolated bus and generator is within synchronizing limits, send close signal to single-generator paralleling circuit breaker.
- K. Sync-switch, removable, keyed T-handle.
- L. "Engine Generator Synchronized" Indication: Indicator lamp or digital-display indication of synchronization.
- M. Voltage and Frequency Raise and Lower Switches: Allow plus or minus 5 percent adjustment when engine generator is operating but is not connected to isolated paralleling bus.
- N. Control and Reset Push-Button: Have flashing lamp to indicate generator is locked out due to fault condition.
- O. Lamp Test Push-Button: Simultaneously tests lamps on panel.
- P. Control Panel Illumination: DC lamps illuminate panel when lighting from surrounding environment is unavailable.
- Q. Emergency Stop Push-Button: Red mushroom-head switch maintains its position until manually reset.
- R. Alarm and Status Indicating Display:
1. Status and Alarm Indications:
 - a. Status, Light Only (Nonlatching):
 - 1) Generator mode selector switch not in auto (red).
 - 2) Generator mode selector switch in auto (green).
 - 3) Start signal received (green).
 - 4) Emergency stop activated (red).
 - 5) Demand mode standby (green).
 - 6) Timing for start (green).
 - 7) Timing for shutdown (green).
 - 8) Generator circuit breaker closed (red).
 - 9) Generator circuit breaker open (green).
 - a) Generator circuit breaker locked out (white).
 - b) Generator circuit breaker racked out (white)
 - 10) Remote generator breaker is open (red).
 - 11) Engine stopped (green).
 - 12) Time-delay start (green).
 - 13) Engine running (red).
 - 14) Engine cool-down (green).
 - b. Pre-Alarm, Light and Horn (Nonlatching):

- 1) Pre-high coolant temperature (amber).
- 2) Pre-low oil pressure (amber).
- 3) Low coolant temperature (amber).
- 4) Engine low battery (amber).
- 5) Battery charger failure (amber).
- 6) Auxiliary power failure (amber).
- 7) Low fuel-day tank (amber).
- 8) Paralleling low-voltage switchgear generator breaker failed to close (amber).
- 9) Paralleling low-voltage switchgear generator breaker failed to open (amber).
- 10) Overcurrent alarm (amber).
- 11) Day tank low-fuel alarm (amber).
- 12) Ground-fault alarm (amber).

c. Shutdown Alarm, Light and Horn (Latching):

- 1) Engine overcrank (red).
- 2) Engine overspeed (red).
- 3) Engine low oil pressure (red).
- 4) Engine high coolant temperature (red).
- 5) Engine low coolant level (red).
- 6) Engine remote emergency shutdown (red).
- 7) Generator fail to synchronize shutdown (red).
- 8) Generator circuit breaker tripped (red).
- 9) Generator circuit breaker failure (red).
- 10) Generator not in auto (red).
- 11) Generator loss of field (red).
- 12) Generator reverse power (red).
- 13) Generator undervoltage (red).
- 14) Generator overvoltage (red).
- 15) Generator underfrequency (red).
- 16) Generator overfrequency (red).
- 17) Phase rotation (red).
- 18) Generator short circuit (red).
- 19) Day tank low-fuel shutdown (red).
- 20) Air damper activated, shutdown (red).

S. Paralleling Controls and Protection:

1. Engine Generator Governor (Speed Control and Load Sharing): Comply with requirements in applicable engine generator Section. Components must be Woodward compatible.
2. Kilowatt Load Sharing Control and Interface:
 - a. Operates engine generator governors during synchronizing and provides isochronous load sharing when paralleled.
 - b. Allows engine generator to ramp up to kilowatt load level[**signaled by multiple-generator monitoring and control controller**].
3. Load-Demand Governing Control:
 - a. Causes engine generator to ramp down at operator-adjustable rate to zero load when signaled to shut down in load-demand mode.
 - b. Causes engine generator to ramp up at operator-adjustable rate to proportional share of total isolated paralleling bus load when signaled to restart.
4. Kilovolt-Ampere-Reactive Load Sharing Control:

- a. Operates alternator excitation system while engine generator is paralleled.
 - b. Causes sharing of reactive load among engine generators to within 1 percent of equal levels without voltage drop.
- 5. Paralleling Monitor and Control:
 - a. Monitors and verifies that engine generator has reached 90 percent of nominal voltage and frequency before closing to isolated paralleling bus.
 - b. Prevents accidental closure of breaker with engine generator out of phase with bus.
 - c. Prevents out-of-phase closure to isolated paralleling bus due to errant manual or automatic operation of synchronizer.
 - d. System of diagnostic digital displays to assist in analyzing synchronization.
- 6. Synchronizer Control:
 - a. Adjusts engine governor to match voltage, frequency, and phase angle of isolated paralleling bus.
 - b. Maintains engine generator voltage within 1 percent of isolated paralleling bus voltage, and phase angle within 20 electrical degrees of isolated paralleling bus for 0.5 seconds before circuit-breaker closing.
 - c. Provides "fail-to-synchronize time delay" adjustable from 10 to 120 seconds; with field selectivity to either initiate alarm or shut down engine generator on failure condition.
- 7. Reverse Power Monitor and Control:
 - a. Prevents sustained reverse power flow in engine generator.
 - b. Trips generator paralleling circuit breaker and initiates engine generator shutdown when reverse power condition exceeds 10 percent of engine generator kilowatt for three seconds.
 - c. Trips generator paralleling circuit breaker and initiates engine generator shutdown when reverse kilovolt-ampere conditions exceeds 20 percent of generator kilovolt-ampere rating.
- 8. Phase Rotation Monitor and Control: Verifies engine generator and isolated paralleling bus phase rotation match prior to closing paralleling circuit breaker.
- 9. Electronic Alternator Overcurrent Alarm and Shutdown Control:
 - a. Monitors current flow at engine generator output terminals.
 - b. Initiates alarm when load current on engine generator is more than 110 percent of rated current for more than 60 seconds.
 - c. Overcurrent shutdown function matched to thermal damage curve of alternator.
- 10. Electronic Alternator Short-Circuit Protection: Shuts down generator, without instantaneous-trip function, when load current is more than 175 percent of rated current and combined time/current approaches thermal damage curve of alternator.
- 11. Loss of Excitation Monitor: Displays alarm on single-generator paralleling monitoring and control panel when generator controls sense loss of excitation to alternator while paralleled to isolated paralleling bus.
- 12. Cool-Down, Time-Delay Control: Adjustable, zero to 600 seconds.
- 13. Start Time-Delay Control: Adjustable, zero to 300 seconds.
- 14. Frequency Control: Initiate alarm condition when engine generator is below 90 percent of rated frequency for more than 20 seconds or is over frequency.
- 15. Under- and Overvoltage Control: Initiate alarm condition when engine generator is at 90 percent voltage for more than 20 seconds or is over voltage.

**2.6 METAL-ENCLOSED, CIRCUIT-BREAKER SWITCHGEAR (600 V AND LESS)**

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[ABB, Electrification Business]**
 2. **[Eaton]**
 3. **[Siemens Industry, Inc., Energy Management Division]**
 4. **[Square D; Schneider Electric USA]**
 5. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[ABB, Electrification Business]**
 2. **[Eaton]**
 3. **[Siemens Industry, Inc., Energy Management Division]**
 4. **[Square D; Schneider Electric USA]**
 5. **<Insert manufacturer's name>**
- C. Source Limitations: Obtain paralleling low-voltage switchgear from same manufacturer as required for **[engine generator][transfer switches][transfer switches and engine generators]**.
- D. Description: Factory assembled and tested, and complying with IEEE C37.20.1 and UL 1558.
- E. Ratings: Suitable for application in three-phase, 60 Hz, solidly grounded neutral system.
- F. Nominal System Voltage: **[480 V, three][480/277 V, four][240 V, three][208/120 V, four]** wire, 60 Hz.
- G. Isolated Paralleling Bus: **[5000 A][4000 A][3200 A][2000 A][1600 A]<Insert amperes>**.
1. Phase-, Neutral-, and Ground-Bus Materials:
 - a. Phase**[and Neutral]** Bus: **[Copper, silver plated at connection points][Copper, tin plated][Aluminum, tin plated]**.
 - b. Ground Bus: Copper**[, silver][, tin]** plated; minimum size **1/4 by 2 inch (6 by 50 mm)**.
 2. Bus bars connect between vertical sections and between compartments. Cable connections are not permitted.
 - a. Uniform capacity for horizontal and vertical bus.
 - b. Neutral Bus: **[50][100]** percent of phase-bus ampacity, except as indicated. **[Equip bus with pressure-connector terminations for outgoing neutral conductors][Include braces for neutral-bus extensions for busway feeders]**.
 - c. Supports and Bracing for Buses: Adequate strength for indicated short-circuit currents.
- H. Short-Circuit Current: Match rating of highest-rated circuit breaker in switchgear assembly.
- I. Switchgear Fabrication:
1. Bus isolation barriers must be arranged to isolate line bus from load bus at main and tie circuit breaker.
 2. Circuit-breaker compartments must be equipped to house drawout-type circuit breakers and must be fitted with hinged outer doors.
 3. Auxiliary Compartments: Match and align with basic switchgear assembly.

- a. Bus transition sections.
 - b. Pull sections.
 - c. Hinged front panels for access to accessory and blank compartments.
 - d. Pull box on top of switchgear for extra room for pulling cable, with removable top, front, and side covers; and ventilation provisions adequate to maintain air temperature in pull box within same limits as switchgear.
 - 1) Set pull box back from front to clear circuit-breaker lifting mechanism.
 - 2) Bottom: Insulating, fire-resistive material with separate holes for cable drops into switchgear.
 - 3) Cable Supports: Arranged to ease cabling and adequate to support cables indicated, including those for future installation.
 - e. Neutral Disconnect Link: Bolted, uninsulated, **1/4 by 2 inch (6 by 50 mm)** copper bus, arranged to connect neutral bus to ground bus.
 - f. Provide for future extensions from either end of main phase, neutral, and ground bus by means of predrilled bolt-holes and connecting links.
 - g. Bus-Bar Insulation: Individual bus bars wrapped with factory-applied, flame-retardant tape or spray-applied, flame-retardant insulation.
 - 1) Sprayed Insulation Thickness: **3 mil (0.08 mm)**, minimum.
 - 2) Bolted Bus Joints: Insulate with secure joint covers that can easily be removed and reinstalled.
4. Circuit-Breaker Terminals for Cable Connections: Silver-plated copper bus extensions equipped with pressure connectors for conductors.
- J. Circuit Breakers: Comply with IEEE C37.13, IEEE C37.16, and IEEE C37.17.
1. Ratings: As indicated for continuous, interrupting, and short-time current ratings for circuit breaker; voltage and frequency ratings same as switchgear.
 2. Operating Mechanism: Mechanically and electrically trip-free, stored-energy operating mechanism with the following features:
 - a. Normal Closing Speed: Independent of both control and operator.
 - b. Slow Closing Speed: Optional with operator for inspection and adjustment.
 3. Stored-Energy Mechanism: Electrically charged, with optional manual charging[**and operation counter**].
 4. Trip Devices:
 - a. Solid-state, overcurrent trip-device system consisting of one or two current transformers or sensors per phase, and release mechanism.
 - b. Functions: Long-time-delay, short-time-delay, and instantaneous-trip functions, independent of each other in both action and adjustment.
 - c. Temperature Compensation: Ensures accuracy and calibration stability from minus 5 to plus 40 deg C.
 - d. Time-Current Characteristics: Field adjustable.
 - e. Current Adjustability: Dial settings and rating plugs on trip units or sensors on circuit breakers, or combination of these methods.
 - f. Long-Time- and Short-Time-Delay Functions: Three bands, minimum; marked "minimum," "intermediate," and "maximum."
 - g. Pickup Points:
 - 1) Five minimum, for long-time- and short-time-trip functions. Equip short-time-trip

- function for switchable I-squared-t operation.
 - 2) Five minimum, for instantaneous-trip functions.
 - h. Ground-fault protection[**alarm**] with at least three short-time-delay settings and three trip-time-delay bands; adjustable current pickup. Arrange to provide protection for the following:
 - 1) Three-wire circuit or system.
 - 2) Four-wire circuit or system.
 - 3) Four-wire, double-ended substation.
 - i. Trip Indication: Labeled, battery-powered lights or mechanical targets on trip device to indicate type of fault.
5. Auxiliary Contacts: For interlocking or remote indication of circuit-breaker position, with spare auxiliary switches and other auxiliary switches required for normal circuit-breaker operation, quantity as indicated, consisting of two Type "a" and two Type "b" stages (contacts) wired through secondary disconnect devices to terminal block in stationary housing.
6. Drawout Features: Circuit-breaker mounting assembly equipped with racking mechanism to position circuit breaker and hold it rigidly in connected, test, and disconnected positions.
- a. Interlocks: Prevent movement of circuit breaker to or from connected position when it is closed.
 - b. Circuit-Breaker Positioning:
 - 1) An open circuit breaker may be racked to or from connected, test, and disconnected positions only with associated compartment door closed, unless live parts are covered by full dead-front shield.
 - 2) An open circuit breaker may be manually withdrawn to position for removal from structure with door open.
 - 3) Status for connection devices for different positions includes the following:
 - a) Test Position: Primary disconnect devices disengaged, and secondary disconnect devices and ground contact engaged.
 - b) Disconnected Position: Primary and secondary devices and ground contact disengaged.
7. Arc Chutes: Readily removable from associated circuit breaker when it is in disconnected position; arranged to permit inspection of contacts without removing circuit breaker from switchgear.
8. Padlocking Provisions: For installing at least three padlocks on circuit breaker to secure its enclosure and prevent movement of drawout mechanism.
9. Operating Handle: One for each circuit breaker capable of manual operation.
- a. Generator Paralleling Circuit Breakers: Interlocked with system control so that circuit breaker does not close unless mode selector switch is in "Auto" position and engine generator is synchronized with isolated paralleling bus.
10. Electric Close Button: One for each electrically operated circuit breaker.
- a. Generator Paralleling Circuit Breakers: Interlocked with system control so that circuit breaker does not close unless mode selector switch is in "Auto" position and engine generator is synchronized with isolated paralleling bus.
11. Mechanical Interlocking of Circuit Breakers: Uses mechanical tripping lever or equivalent design and electrical interlocks.
12. Key Interlocks: Arranged so keys are attached at devices indicated. Mountings and hardware are

- included where future installation of key-interlock devices is indicated.
13. Undervoltage Trip Devices:
 - a. Instantaneous, with adjustable pickup voltage.
 - b. Adjustable time-delay and pickup voltage.
 14. Shunt-Trip Devices:
 - a. 24 V(dc) for generator paralleling circuit breakers and for distribution paralleling switchgear circuit breakers.
 - b. Where indicated.
 15. Indicating Lights: To indicate circuit breaker is open or closed, for main and bus tie circuit breakers interlocked either with each other or with external devices.

K. Metering:

1. Type and Locations:
 - a. Isolated Paralleling Bus: **[Multifunction digital-metering monitor;][Analog metering for voltage, amperage, frequency, watt-hour, and recording demand;]** on door of separate metering compartment.
 - b. Generator Circuit Breakers: **[Multifunction digital-metering monitor;][Analog metering for voltage, amperage, frequency, watt-hour, and recording demand;]** on circuit-breaker door.
 - c. Distribution Circuit Breakers: **[Multifunction digital-metering monitor;][Analog metering for voltage, amperage, frequency, watt-hour, and recording demand;]** on circuit-breaker door.
2. Instrument Transformers:
 - a. Comply with IEEE C57.13.
 - b. Potential Transformers: Secondary-voltage rating of 120 V and NEMA accuracy class of 0.3 with burdens of W, X, and Y.
 - c. Current Transformers:
 - 1) Burden and accuracy class suitable for connected relays, meters, and instruments.
 - 2) Size for maximum momentary current amperage based on calculation or momentary rating of circuit breaker protecting conductor.
 - 3) Include shorting-type terminal blocks.
3. Multifunction Digital-Metering Monitor:
 - a. Microprocessor-based unit suitable for three- or four-wire systems.
 - b. Inputs from sensors or 5 A current-transformer secondaries, and potential terminals rated to 600 V.
 - c. Switch-selectable digital display with the following features:
 - 1) Phase Currents, Each Phase: Plus or minus 1 percent.
 - 2) Phase-to-Phase Voltages, Three Phase: Plus or minus 1 percent.
 - 3) Phase-to-Neutral Voltages, Three Phase: Plus or minus 1 percent.
 - 4) Three-Phase Real Power: Plus or minus 2 percent.
 - 5) Three-Phase Reactive Power: Plus or minus 2 percent.
 - 6) Power Factor: Plus or minus 2 percent.
 - 7) Frequency: Plus or minus 0.5 percent.

- 8) Integrated Demand, with Demand Interval Selectable from 5 to 60 Minutes: Plus or minus 2 percent.
- 9) Accumulated energy, in **MWh (MJ)**, plus or minus 2 percent; stored values unaffected by power outages for up to 72 hours.
- d. Communications module suitable for remote monitoring of meter quantities and functions. Interface communication and metering requirements in accordance with Section 260913 "Electrical Power Monitoring."
- e. Mounting: Display and control unit that is flush or semirecessed mounted in instrument compartment door.
- 4. Analog Instruments: Rectangular, **4-1/2 inch (115 mm)** square, accurate within 1 percent of full scale range; semirecessed mounting, with antiparallax 250-degree scale and external adjustment.
 - a. Voltmeters: Cover expanded scale range of normal voltage plus 10 percent.
 - b. Voltmeter Selector Switch: Rotary type with off position; provides readings of phase-to-phase[**and phase-to-neutral**] voltages.
 - c. Ammeters: Cover expanded scale range of bus rating plus 10 percent.
 - d. Ammeter Selector Switch: Permits current reading in each phase and keeps current-transformer secondary circuits closed in off position.
 - e. Watt-Hour Meters: Flush- or semirecessed-mounting type, **[5 A, 120 V, three phase, three wire; with three elements]<Insert characteristics>, [15-minute]<Insert value>** indicating demand register, and provision for testing and adding pulse initiation.
 - f. Recording Demand Meter: Usable as totalizing relay or indicating and recording maximum demand meter with **[15-minute]<Insert value>** interval.
 - 1) Operation: Counts and records succession of pulses entering two channels.
 - 2) Housing: Drawout type, back-connected case arranged for semirecessed mounting.
- L. Relays: Comply with IEEE C37.90, integrated digital type; with test blocks and plugs.
 - 1. Functions: **<Insert functions>**.
 - 2. Characteristics: **<Insert characteristics>**.
- M. Door-Mounted Control Components: Industrial-type oiltight devices and digital-display indicator lamps.
- N. Control Power Supply:
 - 1. Control power transformer must supply 120 V(ac) control circuits from generator source through secondary disconnect devices.
 - 2. Include control power transformer for generator paralleling switchgear circuit breaker connected to generator side of circuit breaker.
 - 3. Include control power transformer for distribution paralleling switchgear circuit breaker.
 - 4. Dry-type transformers must be in separate compartments for units larger than 3 kVA, including primary and secondary fuses.
 - 5. Two control power transformers in separate compartments with necessary interlocking relays; transformer must be connected to line side of associated main circuit breaker.
 - a. Secondary windings must be connected through relay(s) to control bus to effect automatic transfer scheme.
 - b. Secondary windings must be connected through internal automatic transfer switch to paralleling switchgear control power bus.
 - 6. Control Power Fuses: Primary and secondary fuses must provide current-limiting and overload protection.

- O. Control Wiring:
 1. Factory installed, complete with bundling, lacing, and protection.
 2. Provide flexible conductors for 8 AWG and smaller, for conductors across hinges and for conductors for interconnections between shipping units.
 3. Conductors must be sized in accordance with NFPA 70 for duty required.
- P. Provision for Future Devices: Equip compartments with rails, mounting brackets, supports, necessary appurtenances, and bus connections.
- Q. Identification: Comply with requirements in Section 260553 "Identification for Electrical Systems" for electrical identification devices and installation.
 1. Identify units, devices, controls, and wiring.
 2. Mimic Bus: Continuous mimic bus, applied to front of paralleling low-voltage switchgear, arranged in one-line diagram format, using symbols and lettered designations consistent with approved mimic-bus diagram.
 - a. Mimic-bus segments coordinated with devices in paralleling low-voltage switchgear sections to which applied, to produce concise visual presentation of principal paralleling switchgear components and connections.
 - b. Medium: Painted graphics, as selected by Architect.
 - c. Color: Contrasting with factory-finish background; as selected by Architect from manufacturer's full range.
- R. Indoor Enclosure Material: Steel.
- S. Outdoor Enclosure Fabrication Requirements: Galvanized steel, weatherproof; integral structural-steel base frame with factory-applied asphaltic undercoating.
 1. Features for Compartment or Group of Compartments:
 - a. Thermostatically controlled air-conditioning units sized to prevent temperatures exceeding **[80 deg F (27 deg C)]<Insert temperature>**.
 - b. Space heater operating at one-half or less of rated voltage, sized to prevent condensation.
 - c. Louvers equipped with insect and rodent screen and filter; arranged to permit air circulation while excluding insects, rodents, and exterior dust.
 - d. Hinged front door with locking provisions.
 - e. Interior light with switch.
 - f. Weatherproof ground-fault circuit-interrupter duplex receptacle.
 - g. Power for air conditioning, heaters, lights, and receptacles to be provided from control power transformer.
 2. Features for Weatherproof Internal Aisle Construction:
 - a. Common internal aisle of sufficient width to permit protective-device withdrawal, disassembly, and servicing in aisle.
 - b. Aisle access doors with exterior padlocking provisions and interior panic latches.
 - c. Thermostatically controlled aisle space heaters operating at one-half or less of rated voltage.
 - d. Thermostatically controlled, aisle air-conditioning units sized to prevent temperatures exceeding **104 deg F (40 deg C)**.
 - e. Vaporproof, fluorescent aisle lights with low-temperature ballasts, controlled by wall switch at entrance.
 - f. At least two duplex, ground-fault circuit-interrupter receptacles, located in aisle.

- g. Aisle ventilation louvers arranged with makeup air near floor level and exhaust air near roof level.
 - 1) Louvers must have insect and rodent screen and filter, arranged to permit air circulation while excluding insects, rodents, and exterior dust.
 - 2) Exhaust fans.
- T. Access: Fabricate enclosure with hinged, rear cover panels to allow access to rear interior of paralleling low-voltage switchgear.
- U. Finish: Manufacturer's standard gray finish over rust-inhibiting primer on phosphatizing-treated metal surfaces.

2.7 SOURCE QUALITY CONTROL

- A. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
 - 1. Perform successfully tests prior to witness test.
- B. Testing Administrant: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate paralleling switchgear.
- C. **[Factory]** Tests and Inspections: Test and inspect paralleling low-voltage switchgear, with **[generators][generators and transfer switches]**, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with {Insert standards} before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance on control units.
 - 1. Paralleling Low-Voltage Switchgear:
 - a. NETA ATS, 7.6.1.2, "Circuit Breaker, Air, Low-Voltage Power Switchgear."
 - b. Factory test with simulated inputs. Test control and relay functions for proper operation.
 - 2. Engine Generator:
 - a. NETA ATS, 7.22.1, "Emergency Systems, Engine Generator."
 - b. NETA ATS, 7.15.1, "Rotating Machinery, AC Motors & Generator."
 - 3. Automatic Transfer Switches:
 - a. NETA ATS, 7.22.3, "Emergency System, Automatic Transfer Switches."
- D. Verification of Performance: Rate paralleling low-voltage switchgear, with **[generators][generators and transfer switches]**, in accordance with operation of functions and features specified.
- E. Nonconforming Work:
 - 1. Paralleling low-voltage switchgear, with **[generators][generators and transfer switches]**, will be considered defective if it does not pass tests and inspections.
- F. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and conditions, with Installer present, where paralleling low-voltage switchgear will be installed for compliance with installation tolerances, required clearances, and other conditions affecting performance of the Work.
- B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 SELECTION OF SWITCHGEAR COMPONENTS

- A. Product Selection for Restricted Space: Drawings indicate maximum dimensions for paralleling low-voltage switchgear, including clearances between paralleling switchgear and adjacent surfaces and other items. Comply with indicated maximum dimensions.

3.3 INSTALLATION

- A. Comply with applicable portions in NECA 400.
- B. Equipment Mounting:
 - 1. Install paralleling low-voltage switchgear on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 260529 "Hangers and Supports for Electrical Systems."
 - 2. Comply with requirements for seismic control devices specified in **[Section 260548 "Vibration and Seismic Controls for Electrical Systems."][Section 260548.16 "Seismic Controls for Electrical Systems."]**
- C. Temporary Lifting Provisions: Remove temporary lifting eyes, channels, brackets, and temporary blocking of moving parts from paralleling low-voltage switchgear units and components.

3.4 IDENTIFICATION

- A. Identify field-installed conductors, interconnecting wiring, and components; provide warning signs as specified in Section 260553 "Identification for Electrical Systems."
- B. Diagrams and Instructions:
 - 1. Frame and mount under clear acrylic plastic on front of paralleling low-voltage switchgear.
 - a. Operating Instructions: Printed basic instructions for paralleling low-voltage switchgear, including control and key-interlock sequences and emergency procedures.
 - b. System Power Riser Diagrams: Depict power sources, feeders, distribution components, and major loads.
 - 2. Storage for Maintenance: Include rack or holder, near operating instructions, for copy of maintenance manual.
- C. Compartment Nameplates: **[Engraved, laminated acrylic][Engraved, melamine plastic][Preprinted**

aluminum], as described in Section 260553 "Identification for Electrical Systems," for compartment, mounted with corrosion-resistant screws.

- D. Mimic Bus: Continuous mimic bus, arranged in single-line diagram format, using symbols and lettered designations consistent with approved mimic-bus diagram.
 - 1. Mimic-bus segments coordinated with devices in switchgear sections to which applied, to produce concise visual presentation of principal switchgear components and connections.
 - 2. Medium: Painted graphics, as selected by Architect.
 - 3. Color: Contrasting with factory-finish background; as selected by Architect from manufacturer's full range.
- E. Arc-Flash Warning Labels:
 - 1. Comply with requirements in Section 260573.19 "Arc-Flash Hazard Analysis." Produce **3.5-by-5-inch (76-by-127-mm)** self-adhesive equipment label for each work location included in analysis.
 - 2. Comply with requirements in Section 260553 "Identification for Electrical Systems." Produce **3.5-by-5-inch (76-by-127-mm)** self-adhesive equipment label for each work location included in analysis. Labels must be machine printed, with no field-applied markings.
 - a. Label must have orange header with wording, "WARNING, ARC-FLASH HAZARD," and must include the following information taken directly from arc-flash hazard analysis:
 - 1) Location designation.
 - 2) Nominal voltage.
 - 3) Flash protection boundary.
 - 4) Hazard risk category.
 - 5) Incident energy.
 - 6) Working distance.
 - 7) Engineering report number, revision number, and issue date.
 - b. Labels must be machine printed, with no field-applied markings.

3.5 CONNECTIONS

- A. Comply with grounding and bonding requirements in Section 260526 "Grounding and Bonding for Electrical Systems."
- B. Comply with wire and cable requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

3.6 FIELD QUALITY CONTROL

- A. **[Acceptance]**Testing Preparation: Prepare for acceptance tests as follows:
 - 1. Test insulation resistance for switchgear bus, component, connecting supply, feeder, and control circuit.
 - 2. Test continuity of circuit.
 - 3. Inspect paralleling switchgear installation, including wiring, components, connections, and equipment. **[Test and adjust components and equipment.]**
 - 4. Verify that electrical control wiring installation complies with manufacturer's submittal by means of point-to-point continuity testing.
 - 5. Complete installation and startup checks in accordance with manufacturer's written instructions.

B. Field tests must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

C. Tests and Inspections:

1. Perform visual and mechanical inspections and electrical tests stated in NETA ATS. Certify compliance with test parameters. Perform NETA tests and inspections for the following NETA categories:
 - a. AC generators and emergency systems.
 - b. Switchgear.
 - c. Circuit breakers.
 - d. Instrument transformers.
 - e. Metering and instrumentation.
 - f. Ground-fault systems.
 - g. Battery systems.
 - h. Surge arresters.
 - i. Capacitors.
2. Perform NFPA 110 tests for Type 1 essential power systems.
3. Test sequence of operation step by step for each mode.

D. Nonconforming Work:

1. Paralleling low-voltage switchgear will be considered defective if it does not pass tests and inspections.

E. Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services:

1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

3.7 ADJUSTING

- A. Set field-adjustable, electronic circuit-breaker trip characteristics in accordance with results specified in Section 260573.16 "Coordination Studies."
- B. Set field-adjustable, electronic circuit-breaker trip characteristics.

3.8 CLEANING

- A. On completion of installation, inspect interior and exterior of paralleling low-voltage switchgear. Vacuum dirt and debris; do not use compressed air to assist in cleaning. Repair damaged finishes.

3.9 PROTECTION

- A. Temporary Heating: Apply temporary heat to paralleling low-voltage switchgear, in accordance with manufacturer's written instructions, throughout periods when paralleling switchgear environment is not controlled for temperature and humidity within manufacturer's stipulated service conditions.

3.10 MAINTENANCE

- A. Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared scan of switchgear. Remove front and rear panels so joints and connections are accessible to portable scanner.
1. Follow-up Infrared Scanning: Perform additional follow-up infrared scan of switchgear 11 months after date of Substantial Completion.
 2. Instrument: Use infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.
 3. Record of Infrared Scanning: Prepare certified report that identifies switchgear checked and that describes scanning results. Include notation of deficiencies detected, remedial action taken, and observations after remedial action.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 22 13 00 - LOW-VOLTAGE DISTRIBUTION TRANSFORMERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Distribution, dry-type transformers with nominal primary and secondary rating of 600 V and less, with capacities up to 1500 kVA.

B. Products Furnished, but Not Installed, under This Section:

1. **<Insert products furnished, but not installed>.**

C. Products Installed, but Not Furnished, under This Section:

1. **<Insert products installed, but not furnished>.**

D. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.
 - a. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for each type and size of transformer.
 - b. Include rated nameplate data, capacities, weights, dimensions, minimum clearances, installed devices and features, and performance for each type and size of transformer.

B. Shop Drawings:

1. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of field connections.
2. Vibration Isolation Base Details: Detail fabrication including anchorages and attachments to structure and to supported equipment.
3. Include diagrams for power, signal, and control wiring.

C. Field Quality-Control Submittals:

1. Field quality-control reports.

1.3 INFORMATIONAL SUBMITTALS

- A. Manufacturers' Published Instructions: Record copy of official installation[**and testing**] instructions issued to Installer by manufacturer for the following:
 - 1. Transformer temporary heating, working clearances, anchoring, torque values, and insulation-resistance testing.
- B. Source quality-control reports.

1.4 DELIVERY, STORAGE, AND HANDLING

- A. Inspection: On receipt, inspect for and note shipping damage to packaging and transformer.
 - 1. If manufacturer packaging is removed for inspection, and transformer will be stored after inspection, re-package transformer using original or new packaging materials that provide protection equivalent to manufacturer's packaging.
- B. Storage: Store in warm, dry, and temperature-stable location in original shipping packaging.
- C. Temporary Heating: Apply temporary heat in accordance with manufacturer's published instructions within enclosure of ventilated-type units, throughout periods during which equipment is not energized and when transformer is not in space that is continuously under normal control of temperature and humidity.
- D. Handling: Follow manufacturer's instructions for lifting and transporting transformers.

PART 2 - PRODUCTS

2.1 OWNER-FURNISHED PRODUCTS

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for product that Owner intends to furnish to Contractor>.**
- B. Description: **<Insert description of product, including special features, options, and finishes for Owner-furnished product that may impact Contractor's installation>.**
- C. Accessories: **<Insert accessories that will be provided with product>.**

2.2 EXISTING PRODUCTS[**TO BE MODIFIED**][**TO BE REMOVED AND RE-INSTALLED**]

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact Work>.**
- C. Accessories: **<Insert accessories included with existing product>.**

**2.3 LOW-VOLTAGE DISTRIBUTION TRANSFORMERS**

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

1. **[ABB, Electrification Business]**
2. **[Acme Electric; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
3. **[Dongan Electric Manufacturing Company]**
4. **[Eaton]**
5. **[Federal Pacific]**
6. **[Hammond Power Solutions Inc.]**
7. **[Jefferson Electric, Inc.]**
8. **[Lincoln Electric Products Co., Inc.]**
9. **[Mag-Tran; a division of Quality Transformer & Electronics]**
10. **[Marcus Transformer LTD]**
11. **[MGM Transformer Company]**
12. **[Micron Industries Corporation]**
13. **[Mirus International Inc.]**
14. **[Powersmiths International Corp.; Socomec Group]**
15. **[Prolec GE; A Xignux and General Electric Company Joint Venture]**
16. **[Rex Power Magnetics]**
17. **[Siemens Industry, Inc., Energy Management Division]**
18. **[SolaHD; Emerson Electric Co., Automation Solutions]**
19. **[Square D; Schneider Electric USA]**
20. **[TEMCo Transformers]**
21. **<Insert manufacturer's name>**

- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[ABB, Electrification Business]**
2. **[Acme Electric; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
3. **[Dongan Electric Manufacturing Company]**
4. **[Eaton]**
5. **[Federal Pacific]**
6. **[Hammond Power Solutions Inc.]**
7. **[Jefferson Electric, Inc.]**
8. **[Lincoln Electric Products Co., Inc.]**
9. **[Mag-Tran; a division of Quality Transformer & Electronics]**
10. **[Marcus Transformer LTD]**
11. **[MGM Transformer Company]**
12. **[Micron Industries Corporation]**
13. **[Mirus International Inc.]**
14. **[Powersmiths International Corp.; Socomec Group]**
15. **[Prolec GE; A Xignux and General Electric Company Joint Venture]**
16. **[Rex Power Magnetics]**
17. **[Siemens Industry, Inc., Energy Management Division]**
18. **[SolaHD; Emerson Electric Co., Automation Solutions]**
19. **[Square D; Schneider Electric USA]**
20. **[TEMCo Transformers]**
21. **<Insert manufacturer's name>**

- C. Source Limitations: Obtain each type of transformer from single source from single manufacturer.

2.4 GENERAL TRANSFORMER REQUIREMENTS

- A. Description: Factory-assembled and -tested, air-cooled units for 60 Hz service.
- B. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- C. Transformers Rated 15 kVA and Larger:
 - 1. Comply with 10 CFR 431 (DOE 2016) efficiency levels.
 - 2. Marked as compliant with DOE 2016 efficiency levels by qualified electrical testing laboratory recognized by authorities having jurisdiction.
- D. Shipping Restraints: Paint or otherwise color-code bolts, wedges, blocks, and other restraints that are to be removed after installation and before energizing. Use fluorescent colors that are easily identifiable inside transformer enclosure.

2.5 DISTRIBUTION TRANSFORMERS

- A. Comply with NFPA 70[, and list and label as complying with UL 1561].
- B. Cores: Electrical grade, non-aging silicon steel with high permeability and low hysteresis losses.
 - 1. One leg per phase.
 - 2. Core volume must allow efficient transformer operation at 10 percent above nominal tap voltage.
 - 3. Grounded to enclosure.
- C. Coils: Continuous windings[**without splices**] except for taps.
 - 1. Coil Material: **[Aluminum][Copper]**.
 - 2. Internal Coil Connections: Brazed or pressure type.
 - 3. Terminal Connections: **[Welded][Bolted]**.
- D. Encapsulation: Transformers smaller than 30 kVA must have core and coils completely resin encapsulated.
- E. Enclosure: **[Ventilated][Totally enclosed, nonventilated]**.
 - 1. Core and coil must be encapsulated within resin compound[**using vacuum-pressure impregnation process**] to seal out moisture and air.
 - 2. KVA Ratings: Based on convection cooling only and not relying on auxiliary fans.
 - 3. Wiring Compartment: Sized for conduit entry and wiring installation.
 - 4. Environmental Protection:
 - a. Indoor: UL 50E, **[Type 2][Type 3R][Type 4X, Stainless Steel]**.
 - b. Outdoor: UL 50E, **[Type 3R][Type 4X][Type 4X, Stainless Steel]**.
 - 5. Finish Color: **[Gray][ANSI 49 gray][ANSI 61 gray]** weather-resistant enamel.
- F. Taps for Transformers 3 kVA and Smaller: **[None][One 5 percent tap above normal full capacity]**.
- G. Taps for Transformers 7.5 to 24 kVA: **[One 5 percent tap above and one 5 percent tap below normal**

full capacity][Two 5 percent taps below rated voltage].

- H. Taps for Transformers 25 kVA and Larger: **[Two 2.5 percent taps above and two 2.5 percent taps below normal full capacity][Two 2.5 percent taps above and four 2.5 percent taps below normal full capacity].**
- I. Insulation Class, Smaller Than 30 kVA: 180 deg C, UL-component-recognized insulation system with maximum of 115 deg C rise above 40 deg C ambient temperature.
- J. Insulation Class, 30 kVA and Larger: 220 deg C, UL-component-recognized insulation system with maximum of **[150 deg C][115 deg C][80 deg C]** rise above 40 deg C ambient temperature.
- K. Grounding: Provide ground-bar kit or ground bar installed on inside of transformer enclosure.
- L. K-Factor Rating: Transformers indicated to be K-factor rated must comply with UL 1561 requirements for nonsinusoidal load current-handling capability to degree defined by designated K-factor.
 - 1. Unit may not overheat when carrying full-load current with harmonic distortion corresponding to designated K-factor, without exceeding indicated insulation class in 40 deg C maximum ambient and 24-hour average ambient of 30 deg C.
 - 2. Indicate value of K-factor on transformer nameplate.
 - 3. Unit must comply with requirements of DOE 2016 efficiency levels when tested in accordance with NEMA TP 2 with K-factor equal to one.
- M. Electrostatic Shielding: Windings must have independent, single, full-width copper electrostatic shield arranged to minimize interwinding capacitance.
 - 1. Arrange coil leads and terminal strips to minimize capacitive coupling between input and output terminals.
 - 2. Include special terminal for grounding shield.
- N. Neutral: Rated 200 percent of full load current for K-factor-rated transformers.
- O. Wall Brackets: **[Manufacturer's standard brackets][Wall brackets fabricated from design drawings signed and sealed by qualified structural professional engineer].**
- P. Low-Sound-Level Requirements: Maximum sound levels when factory tested in accordance with IEEE C57.12.91, as follows:
 - 1. 9.00 kVA and Less: **[40 dB(A-weighted)]<Insert dB(A-weighted)>.**
 - 2. 9.01 to 30.00 kVA: **[45 dB(A-weighted)]<Insert dB(A-weighted)>.**
 - 3. 30.01 to 50.00 kVA: **[45 dB(A-weighted) for K-factors of 1, 4, and 9][48 dB(A-weighted) for K-factors of 13 and 20]<Insert dB(A-weighted)>.**
 - 4. 50.01 to 150.00 kVA: **[50 dB(A-weighted) for K-factors of 1, 4, and 9][53 dB(A-weighted) for K-factors of 13 and 20]<Insert dB(A-weighted)>.**
 - 5. 150.01 to 300.00 kVA: **[55 dB(A-weighted) for K-factors of 1, 4, and 9][58 dB(A-weighted) for K-factors of 13 and 20]<Insert dB(A-weighted)>.**
 - 6. 300.01 to 500.00 kVA: **[60 dB(A-weighted) for K-factors of 1, 4, and 9][63 dB(A-weighted) for K-factors of 13 and 20]<Insert dB(A-weighted)>.**
 - 7. 500.01 to 700.00 kVA: **[62 dB(A-weighted) for K-factors of 1, 4, and 9][65 dB(A-weighted) for K-factors of 13 and 20]<Insert dB(A-weighted)>.**
 - 8. 700.01 to 1000.00 kVA: **[64 dB(A-weighted) for K-factors of 1, 4, and 9][67 dB(A-weighted) for K-factors of 13 and 20]<Insert dB(A-weighted)>.**
 - 9. 1000.01 to 1500.00 kVA: **<Insert dB(A-weighted)>.**

2.6 IDENTIFICATION

A. Nameplates:

1. Engraved, laminated-acrylic or melamine plastic signs for distribution transformers, mounted with corrosion-resistant screws. Nameplates and label products are specified in Section 260553 "Identification for Electrical Systems."
2. Self-adhesive label for distribution transformers. Self-adhesive labels are specified in Section 260553 "Identification for Electrical Systems."

2.7 SOURCE QUALITY CONTROL

A. Testing Administrator: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate transformer.

B. Factory Tests and Inspections: Test and inspect assembled system, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with IEEE C57.12.01 and IEEE C57.12.91 before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance on control units.

1. Resistance measurements of windings at rated voltage connections and at tap connections.
2. Ratio tests at rated voltage connections and at tap connections.
3. Phase relation and polarity tests at rated voltage connections.
4. No load losses, and excitation current and rated voltage at rated voltage connections.
5. Impedance and load losses at rated current and rated frequency at rated voltage connections.
6. Applied and induced tensile tests.
7. Regulation and efficiency at rated load and voltage.
8. Insulation-Resistance Tests:
 - a. Line-side to ground.
 - b. Load-side to ground.
 - c. Line-side to load-side.
9. Temperature tests.
10. Factory Sound-Level Tests: **[Conduct sound-level tests on equipment for this Project][Conduct prototype sound-level tests on production-line products]**.

C. Nonconforming Work:

1. System equipment that does not pass tests and inspections will be considered defective.

D. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine conditions for compliance with enclosure- and ambient-temperature requirements for transformers.

- B. Verify that field measurements are as needed to maintain working clearances required by NFPA 70 and manufacturer's published instructions.
- C. Examine walls, floors, roofs, and concrete bases for suitable mounting conditions where transformers will be installed.
- D. Verify that ground connections are in place and requirements in Section 260526 "Grounding and Bonding for Electrical Systems" have been met. Maximum ground resistance must be 5 Ω at location of transformer.
- E. Environment: Enclosures must be rated for environment in which they are located. Covers for UL 50E, Type 4X enclosures may not cause accessibility problems.
- F. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

- A. Install wall-mounted transformers level and plumb with wall brackets fabricated **[by transformer manufacturer][from design drawings signed and sealed by qualified structural professional engineer]**.
 - 1. Coordinate installation of wall-mounted and structure-hanging supports with actual transformer provided.
 - 2. Brace wall-mounted transformers as specified in **[Section 260548 "Vibration and Seismic Controls for Electrical Systems."][Section 260548.16 "Seismic Controls for Electrical Systems."]**
- B. Install transformers level and plumb on concrete base with vibration-dampening supports. Locate transformers away from corners and not parallel to adjacent wall surface.
- C. Construct concrete bases and anchor floor-mounted transformers in accordance with manufacturer's published instructions[, **seismic requirements applicable to Project,**] and requirements in Section 260529 "Hangers and Supports for Electrical Systems."
 - 1. Coordinate size and location of concrete bases with actual transformer provided. Cast anchor-bolt inserts into bases. Concrete, reinforcement, and formwork requirements are specified with concrete.
- D. Secure transformer to concrete base in accordance with manufacturer's published instructions.
- E. Secure covers to enclosure and tighten bolts to manufacturer-recommended torques to reduce noise generation.
- F. Remove shipping bolts, blocking, and wedges.

3.3 CONNECTIONS

- A. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."
- B. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- C. Tighten electrical connectors and terminals in accordance with manufacturer's published torque-

tightening values. If manufacturer's torque values are not indicated, use those specified in UL 486A-486B.

- D. Provide flexible connections at conduit and conductor terminations and supports to eliminate sound and vibration transmission to building structure.

3.4 FIELD QUALITY CONTROL

- A. **[Acceptance]**Testing Preparation:

- 1. **<Insert requirements>**.

- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

- C. Tests and Inspections:

- 1. Small (Up to 167 kVA Single-Phase or 500 kVA Three-Phase) Dry-Type Transformer Field Tests:

- a. Visual and Mechanical Inspection.

- 1) Inspect physical and mechanical condition.
- 2) Inspect anchorage, alignment, and grounding.
- 3) Verify that resilient mounts are free and that shipping brackets have been removed.
- 4) Verify that unit is clean.
- 5) Perform specific inspections and mechanical tests recommended by manufacturer.
- 6) Verify that as-left tap connections are as specified.
- 7) Verify presence of surge arresters and that their ratings are as specified.

- b. Electrical Tests:

- 1) Measure resistance at windings, taps, and bolted connections.
- 2) Perform insulation-resistance tests winding-to-winding and windings-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index: value of index may not be less than 1.0.
- 3) Perform turns-ratio tests at tap positions. Test results may not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- 4) Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

- 2. Large (Larger Than 167 kVA Single Phase or 500 kVA Three Phase) Dry-Type Transformer Field Tests:

- a. Visual and Mechanical Inspection:

- 1) Inspect physical and mechanical condition.
- 2) Inspect anchorage, alignment, and grounding.
- 3) Verify that resilient mounts are free and that shipping brackets have been removed.
- 4) Verify that unit is clean.
- 5) Perform specific inspections and mechanical tests recommended by manufacturer.
- 6) Verify that as-left tap connections are as specified.
- 7) Verify presence of surge arresters and that their ratings are as specified.

b. Electrical Tests:

- 1) Measure resistance at windings, taps, and bolted connections.
- 2) Perform insulation-resistance tests winding-to-winding and windings-to-ground. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, comply with NETA ATS, Table 100.5. Calculate polarization index: value of index may not be less than 1.0.
- 3) Perform power-factor or dissipation-factor tests on windings.
- 4) Perform turns-ratio tests at tap positions. Test results may not deviate by more than one-half percent from either adjacent coils or calculated ratio. If test fails, replace transformer.
- 5) Perform excitation-current test on each phase.
- 6) Perform applied voltage test on line- and load-side windings to ground. See IEEE C57.12.91, Sections 10.2 and 10.9.
- 7) Verify correct secondary voltage, phase-to-phase and phase-to-neutral, after energization and prior to loading.

D. Test Labeling: On completion of satisfactory testing of units, attach dated and signed "Satisfactory Test" label to tested components.

E. Nonconforming Work:

1. Transformer will be considered defective if it does not pass tests and inspections.
2. Remove and replace units that do not pass tests or inspections and retest as specified above.

F. Assemble and submit test and inspection reports.

G. Manufacturer Services:

1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

3.5 ADJUSTING

A. Record transformer secondary voltage at unit for at least 48 hours of typical occupancy period. Adjust transformer taps to provide optimum voltage conditions at secondary terminals. Optimum is defined as not exceeding nameplate voltage plus 5 percent and not being lower than nameplate voltage minus 3 percent at maximum load conditions. Submit recording and tap settings as test results.

B. Output Settings Report: Prepare written report recording output voltages and tap settings.

3.6 CLEANING

A. Vacuum dirt and debris; do not use compressed air to assist in cleaning.

3.7 MAINTENANCE

A. Infrared Scanning: Two months after Substantial Completion, perform infrared scan of transformer connections.

1. Use infrared-scanning device designed to measure temperature or detect significant deviations from normal values. Provide documentation of device calibration.

26 - Electrical

2. Perform two follow-up infrared scans of transformers, one at four months and another at 11 months after Substantial Completion.
3. Prepare certified report identifying transformer checked and describing results of scanning. Include notation of deficiencies detected, remedial actions taken, and scanning observations after remedial action.

END OF SECTION 26 22 13 00

Task	Specification	Specification Description
26 22 13 00	26 12 19 00a	Low-Voltage Switchgear

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 24 13 00 - SWITCHBOARDS**PART 1 - GENERAL****1.1 SUMMARY****A. Section Includes:**

1. Switchboards.
2. Surge protection devices.
3. Disconnecting and overcurrent protective devices.
4. Instrumentation.
5. Control power.
6. Accessory components and features.

B. Related Requirements

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
3. Section 260573.19 "Arc-Flash Hazard Analysis" for arc-flash analysis and arc-flash label requirements.

1.2 COORDINATION

- A. Coordinate layout and installation of switchboards and components with other construction that penetrates walls or is supported by them, including electrical and other types of equipment, raceways, piping, encumbrances to workspace clearance requirements, and adjacent surfaces. Maintain required workspace clearances and required clearances for equipment access doors and panels.
- B. Coordinate sizes and locations of concrete bases with actual equipment provided.

1.3 ACTION SUBMITTALS**A. Product Data:**

1. Switchboards.
2. Overcurrent protective devices.
3. Surge protection devices.
4. Ground-fault protection devices.
5. Accessories.
6. Other components.
7. Include dimensions and manufacturers' technical data on features, performance, electrical characteristics, ratings, accessories, and finishes.

B. Shop Drawings: For each switchboard and related equipment.

1. Include dimensioned plans, elevations, sections, and details, including required clearances and

service space around equipment. Show tabulations of installed devices, equipment features, and ratings.

2. Detail enclosure types for types other than UL 50E, Type 1.
3. Detail bus configuration, current, and voltage ratings.
4. Detail short-circuit current rating of switchboards and overcurrent protective devices.
5. Include descriptive documentation of optional barriers specified for electrical insulation and isolation.
6. Detail utility company's metering provisions with indication of approval by utility company.
7. Include evidence of listing, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for series rating of installed devices.
8. Detail features, characteristics, ratings, and factory settings of individual overcurrent protective devices and auxiliary components.
9. Include time-current coordination curves for each type and rating of overcurrent protective device included in switchboards. Submit on translucent log-log graph paper; include selectable ranges for each type of overcurrent protective device.
10. Include diagram and details of proposed mimic bus.
11. Include schematic and wiring diagrams for power, signal, and control wiring.

C. Samples: Representative portion of mimic bus with specified material and finish, for color selection.

D. Field Quality-Control Submittals:

1. Field Quality-Control Reports:
 - a. Test procedures used.
 - b. Test results that comply with requirements.
 - c. Results of failed tests and corrective action taken to achieve test results that comply with requirements.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturers' Published Instructions: Record copy of official installation[**and testing**] instructions issued to Installer by manufacturer for the following:

1. Handling, storing, and providing temporary heat.
2. Mounting accessories and anchoring devices.
3. Testing and adjusting overcurrent protective devices.

B. Sample warranties.

1.5 CLOSEOUT SUBMITTALS

A. Warranty documentation.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Spare Parts: Furnish to Owner spare parts, for repairing switchboards, that are packaged with protective covering for storage on-site and identified with labels describing contents.[**Include the following:**]

1. Potential Transformer Fuses: Equal to 10 percent of quantity installed for each size and type but no fewer than two of each size and type.

2. Control-Power Fuses: Equal to 10 percent of quantity installed for each size and type, but no fewer than two of each size and type.
3. Fuses and Fusible Devices for Fused Circuit Breakers: Equal to 10 percent of quantity installed for each size and type but no fewer than three of each size and type.
4. Fuses for Fused Switches: Equal to 10 percent of quantity installed for each size and type but no fewer than three of each size and type.
5. Fuses for Fused Power-Circuit Devices: Equal to 10 percent of quantity installed for each size and type but no fewer than three of each size and type.
6. Indicating Lights: Equal to 10 percent of quantity installed for each size and type but no less than one of each size and type.

- B. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to switchboards, that are packaged with protective covering for storage on-site and identified with labels describing contents. **[Include the following:]**

1. Accessory Set: Include tools and miscellaneous items required for overcurrent protective device test, inspection, maintenance, and operation.
2. Portable Test Set: For testing functions of solid-state trip devices without removing from switchboard. Include relay and meter test plugs suitable for testing switchboard meters and switchboard class relays.
3. Portable Circuit-Breaker Lifting Device: Floor-supported, roller-based, elevating carriage arranged for movement of circuit breakers in and out of compartments for present and future circuit breakers.
4. Overhead Circuit-Breaker Lifting Device: Mounted at top front of switchboard, with hoist and lifting yokes matching each drawout circuit breaker.
5. Spare-Fuse Cabinet: Suitably identified, wall-mounted, lockable, compartmented steel box or cabinet. Arrange for wall mounting.

1.7 DELIVERY, STORAGE, AND HANDLING

- A. Deliver switchboards in sections or lengths that can be moved past obstructions in delivery path.
- B. Remove loose packing and flammable materials from inside switchboards and **[install temporary electric heating (250 W per section)][connect factory-installed space heaters to temporary electrical service]** to prevent condensation.
- C. Handle and prepare switchboards for installation in accordance with **[NECA 400][NEMA PB 2.1]**.

1.8 WARRANTY

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed switchboard perform in accordance with specified requirements and agrees to repair or replace components that fail to perform as specified within extended-warranty period.
 1. Extended-Warranty Period: **[Two]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that switchboard performs in accordance with specified requirements and agrees to provide repair or replacement of components that fail to perform as specified within extended-warranty period.
 1. **[Initial]**Extended-Warranty Period: **[Three]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
 2. Follow-On Extended-Warranty Period: **[Five]<Insert number>** years from date of Substantial

Completion; [full][prorated] coverage for materials[that failed because of transient voltage surges] only, free on board [origin][destination], freight prepaid.

PART 2 - PRODUCTS

2.1 SWITCHBOARDS

- A. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - 1. [ABB, Electrification Business]
 - 2. [Eaton]
 - 3. [Siemens Industry, Inc., Energy Management Division]
 - 4. [Square D; Schneider Electric USA]
 - 5. <Insert manufacturer's name>
- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - 1. [ABB, Electrification Business]
 - 2. [Eaton]
 - 3. [Siemens Industry, Inc., Energy Management Division]
 - 4. [Square D; Schneider Electric USA]
 - 5. <Insert manufacturer's name>
- C. Source Limitations: Obtain switchboards, overcurrent protective devices, components, and accessories from single source from single manufacturer.
- D. Product Selection for Restricted Space: Drawings indicate maximum dimensions for switchboards including clearances between switchboards and adjacent surfaces and other items. Comply with indicated maximum dimensions.
- E. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- F. Comply with NEMA PB 2.
- G. Comply with NFPA 70.
- H. Comply with UL 891.
- I. Front-Connected, Front-Accessible Switchboards:
 - 1. Main Devices: [Panel][Fixed, individually] mounted.
 - 2. Branch Devices: Panel mounted.
 - 3. Sections front and rear aligned.
- J. Front- and Side-Accessible Switchboards:
 - 1. Main Devices: Fixed, individually mounted.

2. Branch Devices: Panel mounted.
 3. Section Alignment: **[Front][and][Rear]** aligned.
- K. Front- and Rear-Accessible Switchboards:
1. Main Devices: **[Fixed, individually][Drawout]** mounted.
 2. Branch Devices: **[Panel][Fixed, individually][Panel and fixed, individually][Fixed and individually compartmented][Individually compartmented and drawout]** mounted.
 3. Sections **[front and rear][rear]** aligned.
- L. Nominal System Voltage: **[480Y/277 V][208Y/120 V]<Insert system voltage>**.
- M. Main-Bus Continuous: **[5000][4000][3000][2500][2000][1600][1200]<Insert ampere rating>** A.
- N. Indoor Enclosures: Steel, UL 50E, **[Type 1][Type 2]**.
- O. Enclosure Finish for Indoor Units: Factory-applied finish in manufacturer's **[standard gray][custom color]** finish over rust-inhibiting primer on treated metal surface.
- P. Outdoor Enclosures: **[Type 3R][Type 3R, with interior-lighted walk-in aisle]**.
1. Finish: Factory-applied finish in manufacturer's **[standard][custom]** color; undersurfaces treated with corrosion-resistant undercoating.
 2. Enclosure: **[Flat][Downward, rearward sloping]** roof; **[bolt-on rear covers][rear hinged doors]** for each section, with provisions for padlocking.
 3. Doors: Personnel door at each end of aisle, minimum width of **[30 inch (762 mm)]<Insert value>**; opening outwards; with panic hardware and provisions for **[padlocking][cylinder lock]**. At least one door must be sized to permit largest single switchboard section to pass through without disassembling doors, hinges, or switchboard section.
 4. Accessories: LED luminaires, ceiling mounted; wired to three-way light switch at each end of aisle; ground-fault circuit interrupter (GFCI) duplex receptacle; emergency battery pack luminaire installed on wall of aisle midway between personnel doors.
 5. Walk-in Aisle Heating and Ventilating:
 - a. Factory-installed electric unit heater(s), wall or ceiling mounted, with integral thermostat and disconnect and with capacities to maintain switchboard interior temperature of **[40 deg F (5 deg C)]<Insert temperature>** with outside design temperature of **[0 deg F (minus 18 deg C)]<Insert temperature>**.
 - b. Factory-installed exhaust fan with capacities to maintain switchboard interior temperature of **[100 deg F (38 deg C)]<Insert temperature>** with outside design temperature of **[90 deg F (32 deg C)]<Insert temperature>**.
 - c. Ventilating openings **[complete with replaceable fiberglass air filters]**.
 - d. Thermostat: Single stage; wired to control heat and exhaust fan.
 6. Power for Space Heaters, Ventilation, Lighting, and Receptacle: Include control-power transformer, with spare capacity of 25 percent, within switchboard. Supply voltage must be **[120 V(ac)][120/240 V(ac)][120/208 V(ac)]**.
 7. Power for space heaters, ventilation, lighting, and receptacle provided by remote source.
- Q. Barriers: Between adjacent switchboard sections.
- R. Insulation and isolation for **[main bus of main section and]** main and vertical buses of feeder sections.
- S. Space Heaters: Factory-installed electric space heaters of sufficient wattage in each vertical section to maintain enclosure temperature above expected dew point.

1. Space-Heater Control: **[Thermostats to maintain temperature of each section above expected dew point][Manual switching of branch-circuit protective device].**
 2. Space-Heater Power Source: **[Transformer, factory installed in switchboard][120 V external branch circuit].**
- T. Service Entrance Rating: Switchboards intended for use as service entrance equipment may contain from one to six service disconnecting means with overcurrent protection, neutral bus with disconnecting link, grounding electrode conductor terminal, and main bonding jumper.
- U. Utility Metering Compartment: Barrier compartment and section complying with utility company's requirements; hinged sealable door; buses provisioned for mounting utility company's current transformers and potential transformers or potential taps as required by utility company. If separate vertical section is required for utility metering, match and align with basic switchboard. Provide service entrance label and necessary applicable service entrance features.
- V. Customer Metering Compartment: Separate customer metering compartment **[and section with front hinged door,]** and section with front hinged door, for indicated metering, and current transformers for each meter. Current transformer secondary wiring must be terminated on shorting-type terminal blocks. **[Include potential transformers having primary and secondary fuses with disconnecting means and secondary wiring terminated on terminal blocks.]**
- W. Bus Transition and Incoming Pull Sections: Matched and aligned with basic switchboard.
- X. Removable, Hinged Rear Doors and Compartment Covers: Secured by **[captive thumb screws][standard bolts]**, for access to rear interior of switchboard.
- Y. Hinged Front Panels: Allow access to circuit breaker, metering, accessory, and blank compartments.
- Z. Pull Box on Top of Switchboard:
1. Adequate ventilation to maintain temperature in pull box within same limits as switchboard.
 2. Set back from front to clear circuit-breaker removal mechanism.
 3. Removable covers may form top, front, and sides. Top covers at rear must be easily removable for drilling and cutting.
 4. Bottom must be insulating, fire-resistive material with separate holes for cable drops into switchboard.
 5. Cable supports must be arranged to facilitate cabling and adequate to support cables indicated, including those for future installation.
- AA. Buses and Connections: Three phase, four wire unless otherwise indicated.
1. Provide phase bus arrangement A, B, C from front to back, top to bottom, and left to right when viewed from front of switchboard.
 2. Phase- and Neutral-Bus Material:
 - a. Hard-drawn copper of 98 percent conductivity[, **silver-plated**].
 - b. Tin-plated, high-strength, electrical-grade aluminum alloy with tin-plated aluminum circuit-breaker line connections.
 3. Copper feeder circuit-breaker line connections.
 4. Tin-plated aluminum feeder circuit-breaker line connections.
 5. Load Terminals: Insulated, rigidly braced, runback bus extensions, of same material as through buses, equipped with **[mechanical][compression]** connectors for outgoing circuit conductors. Provide load terminals for future circuit-breaker positions at full-ampere rating of circuit-breaker position.

6. Ground Bus: **[1/4 by 2 inch (6 by 50 mm-)]****[1/4 by 1 inch (6 by 25 mm-)]****[Minimum-size required by UL 891,]** hard-drawn copper of 98 percent conductivity, equipped with **[mechanical]****[compression]** connectors for feeder and branch-circuit ground conductors.
 7. Main-Phase Buses and Equipment-Ground Buses: Uniform capacity for entire length of switchboard's main and distribution sections. Provide for future extensions from both ends.
 8. Disconnect Links:
 - a. Isolate neutral bus from incoming neutral conductors.
 - b. Bond neutral bus to equipment-ground bus for switchboards utilized as service equipment or separately derived systems.
 9. Neutral Buses: **[50]****[100]** percent of ampacity of phase buses unless otherwise indicated, equipped with **[mechanical]****[compression]** connectors for outgoing circuit neutral cables. Brace bus extensions for busway feeder neutral bus.
 10. Isolation Barrier Access Provisions: Permit checking of bus-bolt tightness.
- BB. Future Devices: Equip compartments with mounting brackets, supports, bus connections, and appurtenances at full rating of circuit-breaker compartment.
- CC. Bus-Bar Insulation: Factory-applied, flame-retardant, tape wrapping of individual bus bars or flame-retardant, spray-applied insulation. Minimum insulation temperature rating of 105 deg C.
- DD. Fungus Proofing: Permanent fungicidal treatment for overcurrent protective devices and other components including instruments and instrument transformers.

2.2 SURGE PROTECTION DEVICES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following]****[provide products by one of the following]****[available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[ABB, Electrification Business]**
 2. **[Advanced Protection Technologies Inc. (APT)]**
 3. **[Eaton]**
 4. **[Siemens Industry, Inc., Energy Management Division]**
 5. **[Square D; Schneider Electric USA]**
 6. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[ABB, Electrification Business]**
 2. **[Advanced Protection Technologies Inc. (APT)]**
 3. **[Eaton]**
 4. **[Siemens Industry, Inc., Energy Management Division]**
 5. **[Square D; Schneider Electric USA]**
 6. **<Insert manufacturer's name>**
- C. SPDs: Listed and labeled in accordance with UL 1449, **[Type 1]****[Type 2]**.
- D. Features and Accessories:
1. Integral disconnect switch.
 2. Internal thermal protection that disconnects SPD before damaging internal suppressor components.

3. Indicator light display for protection status.
 4. Form-C contacts rated at **[5 A and 250 V(ac)][2 A and 24 V(ac)]<Insert values>**, one normally open and one normally closed, for remote monitoring of protection status. **[Contacts must reverse on failure of surge diversion module or on opening of current-limiting device. Coordinate with building power monitoring and control system.]**
 5. Surge counter.
- E. Peak Surge Current Rating: Minimum single-pulse surge current withstand rating per phase may not be less than **[200 kA][250 kA][300 kA]<Insert amperes>**. Peak surge current rating must be arithmetic sum of ratings of individual MOVs in each mode.
- F. Protection modes and UL 1449 VPR for grounded wye circuits with **[480Y/277 V][208Y/120 V]**, three-phase, four-wire circuits may not exceed the following:
1. Line to Neutral: **[1200 V for 480Y/277 V][700 V for 208Y/120 V]**.
 2. Line to Ground: **[1200 V for 480Y/277 V][1200 V for 208Y/120 V]**.
 3. Line to Line: **[2000 V for 480Y/277 V][1000 V for 208Y/120 V]**.
- G. Protection modes and UL 1449 VPR for 240/120 V, single-phase, three-wire circuits may not exceed the following:
1. Line to Neutral: 700 V.
 2. Line to Ground: **[700 V][1000 V]**.
 3. Line to Line: 1000 V.
- H. SCCR: Equal or exceed **[100 kA][200 kA]<Insert amperes>**.
- I. Nominal Rating: 20 kA.

2.3 DISCONNECTING AND OVERCURRENT PROTECTIVE DEVICES

- A. Molded-Case Circuit Breaker (MCCB): Comply with UL 489, with **[series-connected rating][interrupting capacity]** to meet available fault currents.
1. Thermal-Magnetic Circuit Breakers: Inverse time-current element for low-level overloads and instantaneous magnetic trip element for short circuits. Adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
 2. Adjustable Instantaneous-Trip Circuit Breakers: Magnetic trip element with front-mounted, field-adjustable trip setting.
 3. Electronic trip circuit breakers with RMS sensing; field-replaceable rating plug or field-replicable electronic trip; and the following field-adjustable settings:
 - a. Instantaneous trip.
 - b. Long- and short-time pickup levels.
 - c. Long and short time adjustments.
 - d. Ground-fault pickup level, time delay, and I squared t response.
 4. Current-Limiting Circuit Breakers: Frame sizes 400 A and smaller; let-through ratings less than NEMA FU 1, RK-5.
 5. Integrally Fused Circuit Breakers: Thermal-magnetic trip element with integral limiter-style fuse listed for use with circuit breaker; trip activation on fuse opening or on opening of fuse compartment door.
 6. GFCI Circuit Breakers: Single- and double-pole configurations with Class A ground-fault protection (6 mA trip).

7. Ground-Fault Equipment Protection (GFEP) Circuit Breakers: Class B ground-fault protection (30 mA trip).
8. MCCB Features and Accessories:
 - a. Standard frame sizes, trip ratings, and number of poles.
 - b. Lugs: **[Mechanical][Compression]** style, suitable for number, size, trip ratings, and conductor material.
 - c. Application Listing: Appropriate for application; Type SWD for switching fluorescent lighting loads; Type HID for feeding fluorescent and high-intensity discharge (HID) lighting circuits.
 - d. Ground-Fault Protection: **[Integrally mounted][Remote-mounted]** relay and trip unit with adjustable pickup and time-delay settings, push-to-test feature, and ground-fault indicator.
 - e. Zone-Selective Interlocking: Integral with electronic trip unit; for interlocking ground-fault protection function.
 - f. Communication Capability: **[Circuit-breaker-mounted][Universal-mounted][Integral][Din-rail-mounted]** communication module with functions and features compatible with power monitoring and control system specified in Section 260913 "Electrical Power Monitoring and Control."
 - g. Shunt Trip: 120 V trip coil energized from separate circuit, set to trip at **[55][75]** percent of rated voltage.
 - h. Undervoltage Trip: Set to operate at 35 to 75 percent of rated voltage without intentional time delay.
 - i. Auxiliary Contacts: **[One SPDT switch][Two SPDT switches]** with "a" and "b" contacts; "a" contacts mimic circuit-breaker contacts, "b" contacts operate in reverse of circuit-breaker contacts.
 - j. Key Interlock Kit: Externally mounted to prohibit circuit-breaker operation; key must be removable only when circuit breaker is in off position.
- B. Insulated-Case Circuit Breaker (ICCB): **[80][100]** percent rated, sealed, insulated-case power circuit breaker with interrupting capacity rating to meet available fault current.
 1. **[Fixed][Drawout]** circuit-breaker mounting.
 2. Two-step, stored-energy closing.
 3. **[Standard][Full]**-function, microprocessor-based trip units with interchangeable rating plug, trip indicators, and the following field-adjustable settings:
 - a. Instantaneous trip.
 - b. Time adjustments for long- and short-time pickup.
 - c. Ground-fault pickup level, time delay, and I squared t response.
 - d. **<Insert settings>**.
 4. Zone-Selective Interlocking: Integral with electronic trip unit; for interlocking ground-fault protection function.
 5. Remote trip indication and control.
 6. Communication Capability: Web enabled integral Ethernet communication module and embedded Web server with factory-configured Web pages (HTML file format). Provide functions and features compatible with power monitoring and control system specified in Section 260913 "Electrical Power Monitoring and Control."
 7. Key Interlock Kit: Externally mounted to prohibit circuit-breaker operation; key must be removable only when circuit breaker is in off position.
 8. Control Voltage: **[40 V(dc)][125 V(dc)][250 V(dc)][120 V(ac)]**.
- C. Bolted-Pressure Contact Switch: Operating mechanism uses rotary-mechanical-bolting action to produce and maintain high clamping pressure on switch blade after it engages stationary contacts.
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Boltswitch, Inc.]
- b. [Eaton]
- c. [Siemens Industry, Inc., Energy Management Division]
- d. [Square D; Schneider Electric USA]
- e. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Boltswitch, Inc.]
- b. [Eaton]
- c. [Siemens Industry, Inc., Energy Management Division]
- d. [Square D; Schneider Electric USA]
- e. <Insert manufacturer's name>

3. Main-Contact Interrupting Capability: Minimum of 12 times switch current rating.

4. Operating Mechanism: Manual handle operation to close switch; stores energy in mechanism for opening and closing.

- a. Electrical Trip: Operation of lever or push-button trip switch, or trip signal from ground-fault relay or remote-control device, causes switch to open.
- b. Mechanical Trip: Operation of mechanical lever, push button, or other device causes switch to open.

5. Auxiliary Switches: Factory installed, SPDT, with leads connected to terminal block, and including one set more than quantity required for functional performance indicated.

6. Service-Rated Switches: Labeled for use as service equipment.

7. Ground-Fault Relay: Comply with UL 1053; self-powered type with mechanical ground-fault indicator, test function, tripping relay with internal memory, and three-phase current transformer/sensor.

- a. Configuration: [Integrally mounted][Remote-mounted] relay and trip unit with adjustable pickup and time-delay settings, push-to-test feature, and ground-fault indicator.
- b. Internal Memory: Integrates cumulative value of intermittent arcing ground-fault currents and uses effect to initiate tripping.
- c. No-Trip Relay Test: Permits ground-fault simulation test without tripping switch.
- d. Test Control: Simulates ground fault to test relay and switch (or relay only if "no-trip" mode is selected).

8. Open-Fuse Trip Device: Arranged to trip switch open if phase fuse opens.

- D. High-Pressure, Butt-Type Contact Switch: Operating mechanism uses butt-type contacts and spring-charged mechanism to produce and maintain high-pressure contact when switch is closed.

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [ABB, Electrification Business]
- b. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **<Insert manufacturer's name>**
 3. Main-Contact Interrupting Capability: Minimum of 12 times switch current rating.
 4. Operating Mechanism: Manual handle operation to close switch; stores energy in mechanism for opening and closing.
 - a. Electrical Trip: Operation of lever or push-button trip switch, or trip signal from ground-fault relay or remote-control device, causes switch to open.
 - b. Mechanical Trip: Operation of mechanical lever, push button, or other device causes switch to open.
 5. Auxiliary Switches: Factory installed, SPDT, with leads connected to terminal block, and including one set more than quantity required for functional performance indicated.
 6. Service-Rated Switches: Labeled for use as service equipment.
 7. Ground-Fault Relay: Comply with UL 1053; self-powered type with mechanical ground-fault indicator, test function, tripping relay with internal memory, and three-phase current transformer/sensor.
 - a. Configuration: **[Integrally mounted][Remote-mounted]** relay and trip unit with adjustable pickup and time-delay settings, push-to-test feature, and ground-fault indicator.
 - b. Internal Memory: Integrates cumulative value of intermittent arcing ground-fault currents and uses effect to initiate tripping.
 - c. No-Trip Relay Test: Permits ground-fault simulation test without tripping switch.
 - d. Test Control: Simulates ground fault to test relay and switch (or relay only if "no-trip" mode is selected).
 8. Open-Fuse Trip Device: Arranged to trip switch open if phase fuse opens.
- E. Fused Switch: NEMA KS 1, Type HD; clips to accommodate specified fuses; lockable handle.
- F. Fuses are specified in Section 262813 "Fuses."

2.4 INSTRUMENTATION

- A. Instrument Transformers: NEMA EI 21.1, and the following:
1. Potential Transformers: NEMA EI 21.1; 120 V, 60 Hz, **[single][tapped][double]** secondary; disconnecting type with integral fuse mountings. Burden and accuracy must be consistent with connected metering and relay devices.
 2. Current Transformers: NEMA EI 21.1; 5 A, 60 Hz, secondary; **[wound][bushing][bar or window]** type; **[single][double]** secondary winding and secondary shorting device. Burden and accuracy must be consistent with connected metering and relay devices.
 3. Control-Power Transformers: Dry type, mounted in separate compartments for units larger than 3 kVA.
 4. Current Transformers for Neutral and Ground-Fault Current Sensing: Connect secondary wiring to ground overcurrent relays, via shorting terminals, to provide selective tripping of main and tie circuit breaker. Coordinate with feeder circuit-breaker, ground-fault protection.
- B. Multifunction Digital-Metering Monitor: Microprocessor-based unit suitable for three- or four-wire systems and with the following features:

1. Switch-selectable digital display of the following values with maximum accuracy tolerances as indicated:
 - a. Phase Currents, Each Phase: Plus or minus 0.5 percent.
 - b. Phase-to-Phase Voltages, Three Phase: Plus or minus 0.5 percent.
 - c. Phase-to-Neutral Voltages, Three Phase: Plus or minus 0.5 percent.
 - d. Megawatts: Plus or minus 1 percent.
 - e. Megavars: Plus or minus 1 percent.
 - f. Power Factor: Plus or minus 1 percent.
 - g. Frequency: Plus or minus 0.1 percent.
 - h. Accumulated Energy, Megawatt Hours: Plus or minus 1 percent; accumulated values unaffected by power outages up to 72 hours.
 - i. Megawatt Demand: Plus or minus 1 percent; demand interval programmable from five to 60 minutes.
 - j. Contact devices to operate remote impulse-totalizing demand meter.
 2. Mounting: Display and control unit flush or semiflush mounted in instrument compartment door.
- C. Analog Meters:
1. Meters: **4 inch (100 mm)** diameter or **6 inch (150 mm)** square, flush or semiflush, with anti-parallax 250-degree scales and external zero adjustment.
- D. Voltmeters: Cover expanded-scale range of nominal voltage plus 10 percent.
- E. Instrument Switches: Rotary type with off position.
1. Voltmeter Switches: Permit reading of phase-to-phase voltages and, where neutral is indicated, phase-to-neutral voltages.
 2. Ammeter Switches: Permit reading of current in each phase and maintain current-transformer secondaries in closed-circuit condition at all times.
- F. Ammeters: **2-1/2 inch (64 mm)** minimum size with 90- or 120-degree scale. Meter and transfer device with off position, located on overcurrent device door for indicated feeder circuits only.
- G. Watt-Hour Meters and Wattmeters:
1. Comply with ANSI C12.1.
 2. Three-phase induction type with two stators, each with current and potential coil, rated 5 A, 120 V, 60 Hz.
 3. Suitable for connection to three- and four-wire circuits.
 4. Potential indicating lamps.
 5. Adjustments for light and full load, phase balance, and power factor.
 6. Four-dial clock register.
 7. Integral demand indicator.
 8. Contact devices to operate remote impulse-totalizing demand meter.
 9. Ratchets to prevent reverse rotation.
 10. Removable meter with drawout test plug.
 11. Semiflush mounted case with matching cover.
 12. Appropriate multiplier tag.
- H. Impulse-Totalizing Demand Meter:
1. Comply with ANSI C12.1.
 2. Suitable for use with switchboard watt-hour meter, including two-circuit totalizing relay.

3. Cyclometer.
4. Four-dial, totalizing kilowatt-hour register.
5. Positive chart drive mechanism.
6. Capillary pen holding minimum of one month's ink supply.
7. Roll chart with minimum 31-day capacity; appropriate multiplier tag.
8. Capable of indicating and recording **[five][15][30]<Insert time period>**-minute integrated demand of totalized system.

2.5 CONTROL POWER

A. Control Circuits:

1. 120 V(ac), supplied through secondary disconnecting devices from control-power transformer.
2. 120 V(ac), supplied from remote branch circuit.
3. **<Insert control voltage>** V(dc).

B. Electrically Interlocked Main and Tie Circuit Breakers: Two control-power transformers in separate compartments, with interlocking relays, connected to primary side of each control-power transformer at line side of associated main circuit breaker. 120 V secondaries connected through automatic transfer relays to ensure fail-safe automatic transfer scheme.

C. Control-Power Fuses: Primary and secondary fuses for current-limiting and overload protection of transformer and fuses for protection of control circuits.

D. Control Wiring: Factory installed, with bundling, lacing, and protection included. Provide flexible conductors for 8 AWG and smaller, for conductors across hinges, and for conductors for interconnections between shipping units.

2.6 ACCESSORY COMPONENTS AND FEATURES

A. Mounting Accessories: For anchors, mounting channels, bolts, washers, and other mounting accessories, comply with requirements in Section 260548.16 "Seismic Controls for Electrical Systems" or manufacturer's instructions.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Receive, inspect, handle, and store switchboards in accordance with **[NECA 400][NEMA PB 2.1]**.

1. Lift or move panelboards with spreader bars and manufacturer-supplied lifting straps following manufacturer's published instructions.
2. Use rollers, slings, or other manufacturer-approved methods if lifting straps are not furnished.
3. Protect from moisture, dust, dirt, and debris during storage and installation.
4. Install temporary heating during storage in accordance with manufacturer's published instructions.

B. Examine switchboards before installation. Reject switchboards that are moisture damaged or physically damaged.

C. Examine elements and surfaces to receive switchboards for compliance with installation tolerances and

other conditions affecting performance of the Work or that affect performance of equipment.

- D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

- A. Installation Pathway: Remove and replace access fencing, doors, lift-out panels, and structures to provide pathway for moving switchboards into place.

3.3 INSTALLATION

- A. Comply with manufacturer's published instructions.
- B. Reference Standards:
 - 1. Switchboards and Accessories: Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with **[NECA 400][NEMA PB 2.1]**.
 - 2. Consult Architect for resolution of conflicting requirements.
- C. Special Techniques:
 - 1. Equipment Mounting: Install switchboards on concrete base, **4 inch (100 mm)** nominal thickness. Comply with requirements for concrete base specified in Section 260529 "Hangers and Supports for Electrical Systems."
 - a. Install conduits entering underneath switchboard, entering under vertical section where conductors will terminate. Install with couplings flush with concrete base. Extend **2 inch (50 mm)** above concrete base after switchboard is anchored in place.
 - b. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on **18 inch (450 mm)** centers around full perimeter of concrete base.
 - c. For supported equipment, install epoxy-coated anchor bolts that extend through concrete base and anchor into structural concrete floor.
 - d. Place and secure anchorage devices. Use setting drawings, templates, diagrams, published instructions, and directions furnished with items to be embedded.
 - e. Install anchor bolts to elevations required for proper attachment to switchboards.
 - f. Anchor switchboard to building structure at top of switchboard if required or recommended by manufacturer.
 - 2. Temporary Lifting Provisions: Remove temporary lifting eyes, channels, straps and brackets, and temporary blocking of moving parts from switchboard units and components.
 - 3. Comply with mounting and anchoring requirements specified in Section 260548.16 "Seismic Controls for Electrical Systems."
 - 4. Operating Instructions: Frame and mount printed basic operating instructions for switchboards, including control and key interlocking sequences and emergency procedures. Fabricate frame of finished wood or metal and cover instructions with clear acrylic plastic. Mount on front of switchboards.
 - 5. Install filler plates in unused spaces of panel-mounted sections.
 - 6. Install overcurrent protective devices, surge protection devices, and instrumentation.
 - a. Set field-adjustable switches and circuit-breaker trip ranges.
 - 7. Install spare-fuse cabinet.

3.4 CONNECTIONS

- A. Comply with requirements for terminating feeder bus specified in Section 262500 "Enclosed Bus Assemblies." Drawings indicate general arrangement of bus, fittings, and specialties.
- B. Comply with requirements for terminating cable trays specified in Section 260536 "Cable Trays for Electrical Systems." Drawings indicate general arrangement of cable trays, fittings, and specialties.
- C. Bond conduits entering underneath switchboard to equipment ground bus with bonding conductor sized in accordance with NFPA 70.
- D. Support and secure conductors within switchboard in accordance with NFPA 70.
- E. Extend insulated equipment grounding cable to busway ground connection and support cable at intervals in vertical run.

3.5 IDENTIFICATION

- A. Identify field-installed conductors, interconnecting wiring, and components; provide warning signs complying with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
- B. Switchboard Nameplates: Label each switchboard compartment with nameplate complying with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
- C. Device Nameplates: Label each disconnecting and overcurrent protective device and each meter and control device mounted in compartment doors with nameplate complying with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
- D. Mimic Bus:
 - 1. Entire single-line switchboard bus work, as depicted on factory record drawing, on minimum **0.032 inch (0.813 mm)** thick anodized aluminum photoengraved nameplate, located at eye level on front cover of switchboard incoming service section.
 - 2. Entire single-line switchboard bus work, as depicted on factory record drawing, on engraved minimum **0.0625 inch (1.588 mm)** thick laminated-plastic (Gravoply) nameplate, located at eye level on front cover of switchboard incoming service section.
 - 3. Continuously integrated mimic bus factory applied to front of switchboard. Arrange in single-line diagram format, using symbols and letter designations consistent with final mimic-bus diagram.
 - 4. Coordinate mimic-bus segments with devices in switchboard sections to which they are applied. Produce concise visual presentation of principal switchboard components and connections.
 - 5. Presentation Media: Painted graphics in color contrasting with background color to represent bus and components, complete with lettered designations.
- E. Service Equipment Label: Labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for use as service equipment for switchboards with one or more service disconnecting and overcurrent protective devices.

3.6 FIELD QUALITY CONTROL

- A. **[Acceptance]**Testing Preparation:
 - 1. **<Insert requirements>**.

- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
 - C. Tests and Inspections:
 1. Acceptance Testing:
 - a. Test insulation resistance for each switchboard bus, component, connecting supply, feeder, and control circuit. Open control and metering circuits within switchboard, and remove neutral connection to surge protection and other electronic devices prior to insulation test. Reconnect after test.
 - b. Test continuity of each circuit.
 2. Test ground-fault protection of equipment for service equipment in accordance with NFPA 70.
 3. Perform each visual and mechanical inspection and electrical test stated in NETA Acceptance Testing Specification. Certify compliance with test parameters.
 4. Correct malfunctioning units on-site where possible, and retest to demonstrate compliance; otherwise, replace with new units and retest.
 5. Perform the following infrared scan tests and inspections, and prepare reports:
 - a. Initial Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared scan of each switchboard. Remove **[front][front and rear]** panels so joints and connections are accessible to portable scanner.
 - b. Follow-up Infrared Scanning: Perform additional follow-up infrared scan of each switchboard 11 months after date of Substantial Completion.
 - c. Instruments and Equipment:
 - 1) Use infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.
 6. Test and adjust controls, remote monitoring, and safeties. Replace damaged and malfunctioning controls and equipment.
 - D. Nonconforming Work:
 1. Switchboard will be considered defective if it does not pass tests and inspections.
 2. Remove and replace defective units and retest.
 - E. Collect, assemble, and submit test and inspection reports, including certified report that identifies switchboards included and that describes scanning results. Include notation of deficiencies detected, remedial action taken, and observations after remedial action.
 - F. Manufacturer Services:
 1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.
- 3.7 ADJUSTING
- A. Adjust moving parts and operable components to function smoothly, and lubricate as recommended by manufacturer.
 - B. Set field-adjustable circuit-breaker trip ranges **[as indicated.][as specified in Section 260573.16]**

"Coordination Studies."]

3.8 PROTECTION

- A. Temporary Heating: Apply temporary heat, to maintain temperature in accordance with manufacturer's published instructions, until switchboard is ready to be energized and placed into service.

SECTION 26 24 16 00 - PANELBOARDS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Panelboards.
2. Disconnecting and overcurrent protective devices.

B. Products Installed, but Not Furnished, under This Section:

1. **<Insert products identified in "Existing Products to be Modified" Article or "Existing Products to be Removed and Reinstalled" Article> .**

C. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, and other structural design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional abbreviations, definitions, submittals, qualifications, testing agencies, and other requirements applicable to the Work for electrical, communications, and electronic safety and security systems on Project, including wiring methods.
4. Section 260529 "Hangers and Supports for Electrical Systems" specifies concrete bases and supports for panelboards installed by this Section.
5. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies seismic control devices, mounting devices, and anchoring devices installed by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs installed by this Section.
7. Section 260573 "Power System Studies" specifies short-circuit current studies, overcurrent protective device coordination studies, and arc-flash hazard analysis studies.
8. Section 260913 "Electrical Power Monitoring" specifies power monitoring and control systems installed by this Section.
9. Section 262813 "Fuses" specifies fuses and spare-fuse cabinets installed by this Section.
10. Section 264313 "Surge Protective Devices for Low-Voltage Electrical Power Circuits" specifies Type 1 and Type 2 surge protective devices installed by this Section.

1.2 DEFINITIONS

- A. MCCB: Molded-case circuit breaker.
- B. SPD: Surge protective device.
- C. VPR: Voltage protection rating.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of specified product.
 - 1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
 - 2. Include operating characteristics, electrical characteristics, and furnished accessories.
 - 3. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing laboratory, certifying that model number corresponding to specified product complies with specified listing criteria.
 - 4. Include manufacturer's sample extended warranty language.
- B. Shop Drawings: For each panelboard and related equipment.
 - 1. Include plans, elevations, sections, details, and attachments to other Work.
 - 2. Show tabulations of installed devices with nameplates, conductor termination sizes, equipment features, and ratings.
 - 3. Detail enclosure types including mounting and anchorage, environmental protection, knockouts, corner treatments, covers and doors, gaskets, hinges, and locks.
 - 4. Detail bus configuration, current, and voltage ratings.
 - 5. Short-circuit current rating of panelboards and overcurrent protective devices.
 - 6. Include evidence of listing, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for series rating of installed devices.
 - 7. Include evidence of listing, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for SPD as installed in panelboard.
 - 8. Detail features, characteristics, ratings, and factory settings of individual overcurrent protective devices and auxiliary components.
 - 9. Include wiring diagrams for power, signal, and control wiring.
 - 10. Key interlock scheme drawing and sequence of operations.
 - 11. Include time-current coordination curves for each type and rating of overcurrent protective device included in panelboards. Submit on translucent log-log graft paper; include selectable ranges for each type of overcurrent protective device. Include Internet link for electronic access to downloadable PDF of coordination curves.
- C. Field Quality Control Reports: For specified tests and inspections.

1.4 INFORMATIONAL SUBMITTALS

- A. Panelboard Schedules: For installation in panelboards. [**Submit final versions after load balancing.**]
- B. Manufacturer's published instructions.
- C. Field Reports:
 - 1. Manufacturer's field reports for field quality-control support.
 - 2. Field reports for voltage monitoring and adjusting.
 - 3. Field reports for infrared scanning.

1.5 CLOSEOUT SUBMITTALS

- A. Warranty documentation.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare parts.
- B. Special tools.

1.7 QUALIFICATIONS

- A. Low-Voltage Electrical Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must have documented certification and experience with testing electrical equipment in accordance with NETA testing standards.

1.8 DELIVERY, STORAGE, AND HANDLING

- A. Remove loose packing and flammable materials from inside panelboards; install temporary electric heating (250 W per panelboard) to prevent condensation.
- B. Handle and prepare panelboards for installation in accordance with **[NECA 407][NEMA PB 1]** .

1.9 WARRANTY

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed panelboards perform in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period.
 - 1. Extended-Warranty Period: **[Two]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that panelboards perform in accordance with specified requirements and agrees to provide repair or replacement of components or products that fail to perform as specified within extended-warranty period.
 - 1. Initial Extended-Warranty Period: **[Three][Four]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
 - 2. Follow-On Extended-Warranty Period: **[Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for materials **[that failed because of transient voltage surges]** only, free on board **[origin][destination]** , freight prepaid.

PART 2 - PRODUCTS

2.1 EXISTING PRODUCTS TO BE MODIFIED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>** .
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>** .
 - 1. Sustainable Design Features:

- a. Material Reuse: Product is salvaged, refurbished, or reused.

C. Accessories: **<Insert accessories included with existing product>** .

2.2 EXISTING PRODUCTS TO BE REMOVED AND REINSTALLED

A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>** .

B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>** .

1. Sustainable Design Features:

- a. Material Reuse: Product is salvaged, refurbished, or reused.

C. Accessories: **<Insert accessories included with existing product>** .

2.3 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

B. Fabricate and test panelboards in accordance with IEEE 344 to withstand seismic forces specified in Section 018123 "Facility Seismic and Wind Criteria."

C. Product Selection for Restricted Space: Drawings indicate maximum dimensions for panelboards including clearances between panelboards and adjacent surfaces and other items. Comply with indicated maximum dimensions.

D. Comply with NEMA PB 1.

E. Enclosures: **[Flush][and][Surface]** -mounted, dead-front cabinets.

1. Rated for environmental conditions at installed location.

- a. Indoor Dry and Clean Locations: UL 50E, **[Type 1]<Insert type>** .
- b. Outdoor Locations: UL 50E, **[Type 3R]<Insert type>** .
- c. Kitchen and Wash-Down Areas: UL 50E, **[Type 4X]<Insert type>** , **[stainless steel]<Insert material>** .
- d. Other Wet or Damp Indoor Locations: UL 50E, **[Type 4]<Insert type>** .
- e. Indoor Locations Subject to Dust, Falling Dirt, and Dripping Noncorrosive Liquids: UL 50E, **[Type 5][Type 12]** .

2. Height: **7 ft (2.13 m)** maximum.

3. Front: Secured to box with concealed trim clamps. For surface-mounted fronts, match box dimensions; for flush-mounted fronts, overlap box. Trims must cover live parts and may have no exposed hardware.

4. Hinged Front Cover: Entire front trim hinged to box and with standard door within hinged trim cover. Trims must cover live parts and may have no exposed hardware.

5. Skirt for Surface-Mounted Panelboards: Same gage and finish as panelboard front with flanges for attachment to panelboard, wall, and ceiling or floor.

6. Gutter Extension and Barrier: Same gage and finish as panelboard enclosure; integral with enclosure body. Arrange to isolate individual panel sections.
7. Finishes:
 - a. Panels and Trim: **[Steel][and][galvanized steel]** , factory finished immediately after cleaning and pretreating with manufacturer's standard two-coat, baked-on finish consisting of prime coat and thermosetting topcoat.
 - b. Back Boxes: **[Galvanized steel][Same finish as panels and trim]** .
 - c. Fungus Proofing: Permanent fungicidal treatment for overcurrent protective devices and other components.
- F. Phase, Neutral, and Ground Buses:
 1. Material: **[Tin-plated aluminum][Hard-drawn copper, 98 percent conductivity]** .
 - a. Plating must run entire length of bus.
 - b. Bus must be fully rated for entire length.
 2. Interiors must be factory assembled into unit. Replacing switching and protective devices may not disturb adjacent units or require removing main bus connectors.
 3. Equipment Ground Bus: Adequate for feeder and branch-circuit equipment grounding conductors; bonded to box.
- G. Conductor Connectors: Suitable for use with conductor material and sizes.
 1. Material: **[Tin-plated aluminum][Hard-drawn copper, 98 percent conductivity]** .
 2. Terminations must allow use of 75 deg C rated conductors without derating.
 3. Size: Lugs suitable for indicated conductor sizes, with additional gutter space, if required, for larger conductors.
 4. Main and Neutral Lugs: **[Compression][Mechanical]** type, with lug on neutral bar for each pole in panelboard.
 5. Ground Lugs and Bus-Configured Terminators: **[Compression][Mechanical]** type, with lug on bar for each pole in panelboard.
- H. Quality-Control Label: Panelboards or load centers must be labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for use as service equipment with one or more main service disconnecting and overcurrent protective devices. Panelboards or load centers must have meter enclosures, wiring, connections, and other provisions for utility metering. Coordinate with utility company for exact requirements.
- I. Future Devices: Panelboards or load centers must have mounting brackets, bus connections, filler plates, and necessary appurtenances required for future installation of devices.
 1. Percentage of Future Space Capacity: **[5][10][20]<Insert number>** percent.
- J. Panelboard Short-Circuit Current Rating:
 1. Rated for series-connected system with integral or remote upstream overcurrent protective devices and labeled by qualified electrical testing laboratory recognized by authorities having jurisdiction. Include label or manual with size and type of allowable upstream and branch devices listed and labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for series-connected short-circuit rating.
 - a. Panelboards rated 240 V or less must have short-circuit ratings as shown on Drawings, but not less than 10 000 A(rms) symmetrical.
 - b. Panelboards rated above 240 V and less than 600 V must have short-circuit ratings as

shown on Drawings, but not less than 14 000 A(rms) symmetrical.

2. Fully rated to interrupt symmetrical short-circuit current available at terminals. Assembly listed, by qualified electrical testing laboratory recognized by authorities having jurisdiction, for 100 percent interrupting capacity.
 - a. Panelboards and overcurrent protective devices rated 240 V or less must have short-circuit ratings as shown on Drawings, but not less than 10 000 A(rms) symmetrical.
 - b. Panelboards and overcurrent protective devices rated above 240 V and less than 600 V must have short-circuit ratings as shown on Drawings, but not less than 14 000 A(rms) symmetrical.

2.4 PANELBOARDS

A. UL QEUY - Distribution Panelboard :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB Electrification Installations Products]**
 - b. **[Eaton]**
 - c. **[ESL Power Systems, Inc.]**
 - d. **[Mersen USA]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[Eaton]**
 - c. **[ESL Power Systems, Inc.]**
 - d. **[Mersen USA]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Distribution Type Panelboards: UL CCN QEUY; including UL 67 and NEMA PB 1.
5. Standard Features:
 - a. Doors: Secured with vault-type latch with tumbler lock; keyed alike.
 - 1) For doors more than **[36 inch (914 mm)]<Insert dimension>** high, provide two latches, keyed alike.

- b. Mains: **[Circuit breaker][Fused switch][Lugs only]** .
 - 1) Location: **[Top][Bottom][Convertible between top and bottom]** .
 - 2) Main Breaker: Main lug interiors up to 400 A must be field convertible to main breaker.
 - c. Branch Overcurrent Protective Devices for Circuit-Breaker Frame Sizes 125 A and Smaller: **[Plug-in circuit breakers][Bolt-on circuit breakers][Plug-in circuit breakers where individual positive-locking device requires mechanical release for removal]** .
 - d. Branch Overcurrent Protective Devices for Circuit-Breaker Frame Sizes Larger Than 125 A: **[Bolt-on circuit breakers][Plug-in circuit breakers where individual positive-locking device requires mechanical release for removal]** .
 - e. Branch Overcurrent Protective Devices: Fused switches.
6. Other Available Features Required by Project:
- a. Surge Suppression: Factory installed as integral part of indicated panelboards, complying with UL 1449 SPD **[Type 1][Type 2]** .
 - b. Isolated Ground Bus: Adequate for branch-circuit isolated ground conductors; insulated from box.
 - c. Full-Sized Neutral: Equipped with full-capacity bonding strap for service entrance applications. Mount electrically isolated from enclosure.
 - d. Extra-Capacity Neutral Bus: Neutral bus rated 200 percent of phase bus and listed and labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, as suitable for nonlinear loads in electronic-grade panelboards and others designated on Drawings. Connectors must be sized for double-sized or parallel conductors as indicated on Drawings.
 - e. Do not mount neutral bus in gutter.
 - f. Feed-Through Lugs: **[Compression][Mechanical]** type, suitable for use with conductor material. Locate at opposite end of bus from incoming lugs or main device.
 - g. Subfeed (Double) Lugs: **[Compression][Mechanical]** type suitable for use with conductor material. Locate at same end of bus as incoming lugs or main device.
 - h. Gutter-Tap Lugs: **[Compression][Mechanical]** type suitable for use with conductor material and with matching insulating covers. Locate at same end of bus as incoming lugs or main device.
 - i. Extra-Capacity Neutral Lugs: Rated 200 percent of phase lugs mounted on extra-capacity neutral bus.
 - j. Split Bus: Vertical buses divided into individual vertical sections.
 - 1) Contactors in Main Bus: NEMA ICS 2, Class A, **[electrically][mechanically]** held, general-purpose controller, with same short-circuit interrupting rating as panelboard.
 - a) Internal Control-Power Source: Control-power transformer, with fused primary and secondary terminals, connected to main bus ahead of contactor connection.
 - b) External Control-Power Source: **[120 V branch circuit][24 V control circuit]<Insert requirement>** .
- B. UL QEUY - Lighting and Appliance Branch-Circuit Panelboard :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB Electrification Installations Products]**

- b. **[Bender Inc.; Bender GmbH & Co. KG]**
 - c. **[Eaton]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[Bender Inc.; Bender GmbH & Co. KG]**
 - c. **[Eaton]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Lighting and Appliance Branch-Circuit Type Panelboards: UL CCN QEUY; including UL 67 and NEMA PB 1.
- 5. Standard Features:
 - a. Mains: **[Circuit breaker][or][lugs only]** .
 - 1) Location: **[Top][Bottom][Convertible between top and bottom]** .
 - 2) Main Breaker: Main lug interiors up to 400 A must be field convertible to main breaker.
 - b. Branch Overcurrent Protective Devices: **[Plug-in][Bolt-on]** circuit breakers, replaceable without disturbing adjacent units.
- 6. Other Available Features Required by Project:
 - a. Surge Suppression: Factory installed as integral part of indicated panelboards, complying with UL 1449 SPD **[Type 1][Type 2]** .
 - b. Isolated Ground Bus: Adequate for branch-circuit isolated ground conductors; insulated from box.
 - c. Full-Sized Neutral: Equipped with full-capacity bonding strap for service entrance applications. Mount electrically isolated from enclosure.
 - d. Extra-Capacity Neutral Bus: Neutral bus rated 200 percent of phase bus and listed and labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, as suitable for nonlinear loads in electronic-grade panelboards and others designated on Drawings. Connectors must be sized for double-sized or parallel conductors as indicated on Drawings.
 - e. Do not mount neutral bus in gutter.
 - f. Feed-Through Lugs: **[Compression][Mechanical]** type, suitable for use with conductor material. Locate at opposite end of bus from incoming lugs or main device.
 - g. Subfeed (Double) Lugs: **[Compression][Mechanical]** type suitable for use with conductor material. Locate at same end of bus as incoming lugs or main device.
 - h. Gutter-Tap Lugs: **[Compression][Mechanical]** type suitable for use with conductor

material and with matching insulating covers. Locate at same end of bus as incoming lugs or main device.

- i. Extra-Capacity Neutral Lugs: Rated 200 percent of phase lugs mounted on extra-capacity neutral bus.
- j. Split Bus: Vertical buses divided into individual vertical sections.
 - 1) Contactors in Main Bus: NEMA ICS 2, Class A, **[electrically][mechanically]** held, general-purpose controller, with same short-circuit interrupting rating as panelboard.
 - a) Internal Control-Power Source: Control-power transformer, with fused primary and secondary terminals, connected to main bus ahead of contactor connection.
 - b) External Control-Power Source: **[120 V branch circuit][24 V control circuit]<Insert requirement>** .
- k. Doors: Door-in-door construction with concealed hinges; secured with **[flush][or][multipoint]** latch with tumbler lock; keyed alike. **[Outer door must permit full access to panel interior. Inner door must permit access to breaker operating handles and labeling, but current carrying terminals and bus must remain concealed.]**
- l. Column-Type Panelboards: Single row of overcurrent devices **[with narrow gutter extension][and][overhead junction box equipped with ground and neutral terminal buses]** .
 - 1) Column-Type Panelboard Doors: Concealed hinges secured with multipoint latch with tumbler lock; keyed alike.

C. UL QEUY - Electronic-Grade Panelboard :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB Electrification Installations Products]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Electronic-Grade Type Panelboards: UL CEN QEUY; including UL 67 and NEMA PB 1.

5. Standard Features:

- a. Main Overcurrent Protective Devices: Bolt-on thermal-magnetic circuit breakers.
- b. Branch Overcurrent Protective Devices: Bolt-on thermal-magnetic circuit breakers.
- c. Factory-Installed, Integral SPD:
 - 1) Peak Surge Current Rating: Minimum single-pulse surge current withstand rating per phase may not be less than **[100 kA]<Insert value>** . Peak surge current rating must be arithmetic sum of ratings of individual MOVs in given mode.
 - 2) Protection modes and UL 1449 VPR for grounded wye circuits with 480Y/277 V or 208Y/120 V, three-phase, four-wire circuits may not exceed the following:
 - a) Line to Neutral: **[1200 V for 480Y/277 V][700 V for 208Y/120 V]** .
 - b) Line to Ground: **[1200 V for 480Y/277 V][700 V for 208Y/120 V]** .
 - c) Neutral to Ground: **[1200 V for 480Y/277 V][700 V for 208Y/120 V]** .
 - d) Line to Line: **[2000 V for 480Y/277 V][1200 V for 208Y/120 V]** .
 - 3) Protection modes and UL 1449 VPR for 240/120 V, single-phase, three-wire circuits may not exceed the following:
 - a) Line to Neutral: 700 V.
 - b) Line to Ground: 700 V.
 - c) Neutral to Ground: 700 V.
 - d) Line to Line: 1200 V.
 - 4) SCCR: Equal to **[SCCR of panelboard in which installed][or exceed 100 kA][or exceed 200 kA][or exceed]<Insert value>** .
 - 5) Inominal Rating: **[20 kA][10 kA]** .
- d. Buses:
 - 1) Copper phase and neutral buses; 200 percent capacity neutral bus and lugs.
 - 2) Copper equipment and isolated ground buses.
- e. Doors: Secured with vault-type latch with tumbler lock; keyed alike.

D. UL QEUY - Load Center :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB Electrification Installations Products]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[Eaton]**

- c. **[Siemens Industry, Inc., Energy Management Division]**
- d. **[Square D; Schneider Electric USA]**
- e. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Electronic-Grade Type Panelboards: UL CCN QEUY; including UL 67.
- 5. Standard Features:
 - a. Mains: **[Circuit breaker][or][lugs only]** .
 - b. Branch Overcurrent Protective Devices: Plug-in circuit breakers, replaceable without disturbing adjacent units.
 - c. Doors: Concealed hinges secured with flush latch with tumbler lock; keyed alike.
 - d. Conductor Connectors: Mechanical type for main, neutral, and ground lugs and buses.

2.5 DISCONNECTING AND OVERCURRENT PROTECTIVE DEVICES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - 1. **[ABB Electrification Installations Products]**
 - 2. **[Eaton]**
 - 3. **[Siemens Industry, Inc., Energy Management Division]**
 - 4. **[Square D; Schneider Electric USA]**
 - 5. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[ABB Electrification Installations Products]**
 - 2. **[Eaton]**
 - 3. **[Siemens Industry, Inc., Energy Management Division]**
 - 4. **[Square D; Schneider Electric USA]**
 - 5. **<Insert manufacturer's name>**
- C. MCCB: Comply with UL 489, with **[series-connected rating][interrupting capacity]** to meet available fault currents.
 - 1. Thermal-Magnetic Circuit Breakers:
 - a. Inverse time-current element for low-level overloads.
 - b. Instantaneous magnetic trip element for short circuits.
 - c. Adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
 - 2. Adjustable Instantaneous-Trip Circuit Breakers: Magnetic trip element with front-mounted, field-adjustable trip setting.
 - 3. Electronic Trip Circuit Breakers:
 - a. RMS sensing.
 - b. Field-replaceable rating plug or electronic trip.

- c. Digital display of settings, trip targets, and indicated metering displays.
 - d. Multi-button keypad to access programmable functions and monitored data.
 - e. Ten-event, trip-history log. Each trip event must be recorded with type, phase, and magnitude of fault that caused trip.
 - f. Integral test jack for connection to portable test set or laptop computer.
 - g. Field-Adjustable Settings:
 - 1) Instantaneous trip.
 - 2) Long- and short-time pickup levels.
 - 3) Long- and short-time adjustments.
 - 4) Ground-fault pickup level, time delay, and I squared T response.
4. Current-Limiting Circuit Breakers: Frame sizes 400 A and smaller; let-through ratings less than NEMA FU 1, RK-5.
 5. GFCI Circuit Breakers: Single- and double-pole configurations with Class A ground-fault protection (6 mA trip).
 6. GFPE Circuit Breakers: Class B ground-fault protection (30 mA trip).
 7. Arc-Fault Circuit Interrupter Circuit Breakers: Comply with UL 1699; 120/240 V, single-pole configuration.
 8. Subfeed Circuit Breakers: Vertically mounted.
 9. MCCB Features and Accessories:
 - a. Standard frame sizes, trip ratings, and number of poles.
 - b. Breaker handle indicates tripped status.
 - c. UL listed for reverse connection without restrictive line or load ratings.
 - d. Lugs: **[Compression][Mechanical]** style, suitable for number, size, trip ratings, and conductor materials.
 - e. Application Listing: Appropriate for application; Type SWD for switching fluorescent lighting loads; Type HID for feeding fluorescent and HID lighting circuits.
 - f. Ground-Fault Protection: **[Integrally mounted][Remote-mounted]** relay and trip unit with adjustable pickup and time-delay settings, push-to-test feature, and ground-fault indicator.
 - g. Communication Capability: **[Circuit-breaker-mounted][Universal-mounted][Integral][Din-rail-mounted]** communication module with functions and features compatible with power monitoring and control system.
 - h. Shunt Trip: **[120 V][24 V]<Insert voltage>** trip coil energized from separate circuit, set to trip at **[55][75]** percent of rated voltage.
 - i. Handle Padlocking Device: Fixed attachment, for locking circuit-breaker handle in **[on][off][on or off]** position.
 - j. Handle Clamp: Loose attachment, for holding circuit-breaker handle in on position.
 - k. Undervoltage Trip: Set to operate at 35 to 75 percent of rated voltage **[without intentional][with field-adjustable 0.1- to 0.6-second]** time delay.
 - l. Rating Plugs: Three-pole breakers with ampere ratings greater than **[150]<Insert value>** A must have interchangeable rating plugs or electronic adjustable trip units.
 - m. Auxiliary Contacts: **[One, SPDT switch][Two, SPDT switches]** with "a" and "b" contacts; "a" contacts mimic circuit-breaker contacts and "b" contacts operate in reverse of circuit-breaker contacts.
 - n. Alarm Switch: Single-pole, normally open contact that actuates only when circuit breaker trips.
 - o. Key Interlock Kit: Externally mounted to prohibit circuit-breaker operation; key must be removable only when circuit breaker is in off position.
 - p. Zone-Selective Interlocking: Integral with electronic trip unit; for interlocking ground-fault protection function with other upstream or downstream devices.
 - q. Multipole units enclosed in **[single housing with single handle][or][factory assembled to operate as single unit]**.

- D. Fused Switch: NEMA KS 1, Type HD; clips to accommodate specified fuses; lockable handle.
 - 1. Provide fuses and spare fuse cabinet.
 - 2. Fused Switch Features and Accessories:
 - a. Standard ampere ratings and number of poles.
 - b. Mechanical cover interlock with manual interlock override, to prevent opening of cover when switch is in on position. Interlock must prevent switch from being turned on with cover open. Operating handle must have lock-off means with provisions for three padlocks.
 - c. Auxiliary Contacts: **[One][Two]** normally open and normally closed contact(s) that operate with switch handle operation.

2.6 MAINTENANCE MATERIAL ITEMS

- A. Spare Parts: Furnish to Owner spare parts, for repairing panelboards and related equipment, that are packaged with protective covering for storage on-site and identified with labels describing contents. [**Include the following:**]
 - 1. Keys: **[Two]<Insert number>** spares for each type of panelboard cabinet lock.
 - 2. Circuit Breakers Including GFCI and GFPE Types: **[Two]<Insert number>** spares for each panelboard.
 - 3. Fuses for Fused Switches: Equal to 10 percent of quantity installed for each size and type, but no fewer than three of each size and type.
 - 4. Fuses for Fused Power-Circuit Devices: Equal to 10 percent of quantity installed for each size and type, but no fewer than three of each size and type.
- B. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to panelboards and related equipment, that are packaged with protective covering for storage on-site and identified with labels describing contents. [**Include the following:**]
 - 1. Accessory Set: Include tools and miscellaneous items required for overcurrent protective device test, inspection, maintenance, and operation.
 - 2. Portable Test Set: For testing functions of solid-state trip devices without removing from panelboard. Include relay and meter test plugs suitable for testing panelboard meters and switchboard class relays.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Verify actual conditions with field measurements prior to ordering panelboards to verify that equipment fits in allocated space in, and comply with, minimum required clearances specified in NFPA 70.
- B. Receive, inspect, handle, and store panelboards in accordance with **[NECA 407][NEMA PB 1.1]** .
- C. Examine panelboards before installation. Reject panelboards that are damaged, rusted, or have been subjected to water saturation.
- D. Examine elements and surfaces to receive panelboards for compliance with installation tolerances and other conditions affecting performance of the Work.

- E. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF PANELBOARDS

- A. Comply with manufacturer's published instructions.
- B. Reference Standards:
 - 1. Panelboards: Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with **[NECA 407][NEMA PB 1.1]** .
 - 2. Consult Architect for resolution of conflicting requirements.
- C. Special Techniques:
 - 1. Equipment Mounting:
 - a. Install floor-mounted panelboards on cast-in-place concrete equipment base(s).
 - b. Attach panelboard to vertical finished or structural surface behind panelboard.
 - c. Mount surface-mounted panelboards to steel slotted supports **[5/8 inch (16 mm)][1-1/4 inch (32 mm)]** in depth. Orient steel slotted supports vertically.
 - d. Provide seismic control devices.
 - 2. Temporary Lifting Provisions: Remove temporary lifting eyes, channels, and brackets and temporary blocking of moving parts from panelboards.
 - 3. Provide mounting and anchoring devices.
 - 4. Mount top of trim **[7.5 ft (2.3 m)]<Insert height>** above finished floor unless otherwise indicated.
 - 5. Mount panelboard cabinet plumb and rigid without distortion of box.
 - 6. Mount recessed panelboards with fronts uniformly flush with wall finish and mating with back box.
 - 7. Install overcurrent protective devices and controllers not already factory installed.
 - a. Set field-adjustable, circuit-breaker trip ranges.
 - b. Tighten bolted connections and circuit breaker connections using calibrated torque wrench or torque screwdriver in accordance with manufacturer's published instructions.
 - 8. Make grounding connections and bond neutral for services and separately derived systems to ground. Make connections to grounding electrodes, separate grounds for isolated ground bars, and connections to separate ground bars.
 - 9. Install filler plates in unused spaces.
 - 10. Stub four **1 inch (25 mm)** empty conduits from panelboard into accessible ceiling space or space designated to be ceiling space in future. Stub four **1 inch (25 mm)** empty conduits into raised floor space or below slab not on grade.
 - 11. Arrange conductors in gutters into groups and bundle and wrap with wire ties [**after completing load balancing**] .
 - 12. Mount spare fuse cabinet in accessible location.
- D. Interfaces with Other Work:
 - 1. Coordinate layout and installation of panelboards and components with other construction that penetrates walls or is supported by them, including electrical and other types of equipment, raceways, piping, encumbrances to workspace clearance requirements, and adjacent surfaces. Maintain required workspace clearances and required clearances for equipment access doors and panels.

3.3 IDENTIFICATION

- A. Identify field-installed conductors, interconnecting wiring, and components.
- B. Install warning signs.
- C. Panelboard Nameplates: Label each panelboard with nameplate.
- D. Device Nameplates: Label each branch circuit device in power panelboards with nameplate.
- E. Panelboard Label: Manufacturer's name and trademark, voltage, amperage, number of phases, and number of poles must be located on interior of panelboard door.
- F. Breaker Labels: Faceplate must list current rating, UL and IEC certification standards, and AIC rating.
- G. Circuit Directory:
 - 1. Provide directory card inside panelboard door, mounted in **[transparent card holder][metal frame with transparent protective cover]** .
 - a. Circuit directory must identify specific purpose with detail sufficient to distinguish it from other circuits.
 - 2. Provide computer-generated circuit directory mounted inside panelboard door with transparent plastic protective cover.
 - a. Circuit directory must identify specific purpose with detail sufficient to distinguish it from other circuits.
 - 3. Create directory to indicate installed circuit loads **[after balancing panelboard loads]** ; incorporate Owner's final room designations. Obtain approval before installing. Handwritten directories are not acceptable. Install directory inside panelboard door.

3.4 FIELD QUALITY CONTROL

- A. Adminstrant for Low-Voltage Electrical Tests and Inspections:
 - 1. **[Owner][Tenant]** will engage qualified low-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
 - 2. Engage qualified low-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
 - 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 - 4. Administer and perform tests and inspections **[with assistance of factory-authorized service representative]** .
- B. Acceptance Testing Preparation:
 - 1. Test insulation resistance for each panelboard bus, component, connecting supply, feeder, and control circuit.
 - 2. Test continuity of each circuit.
- C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>** .

D. Tests and Inspections:

1. Perform each visual and mechanical inspection and electrical test for low-voltage air circuit breakers [**and low-voltage surge arrestors**] stated in NETA ATS, Paragraph 7.6 Circuit Breakers [**and Paragraph 7.19.1 Surge Arrestors, Low-Voltage**] . [Do not perform][Perform] optional tests. Certify compliance with test parameters.
2. Correct malfunctioning units on-site, where possible, and retest to demonstrate compliance; otherwise, replace with new units and retest.
3. Perform the following infrared scan tests and inspections and prepare reports:
 - a. Initial Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared scan of each panelboard. Remove front panels so joints and connections are accessible to portable scanner.
 - b. Follow-up Infrared Scanning: Perform additional follow-up infrared scan of each panelboard 11 months after date of Substantial Completion.
 - c. Instruments and Equipment:
 - 1) Use infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.

E. Nonconforming Work:

1. Panelboards will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Field Quality Control Reports: Collect, assemble, and submit test and inspection reports.

1. Include certified report that identifies panelboards included and that describes scanning results, with comparisons of two scans. Include notation of deficiencies detected, remedial action taken, and observations after remedial action.

G. Manufacturer Services: Engage factory-authorized service representative to [support][supervise] field tests and inspections.

3.5 ADJUSTING

- A. Adjust moving parts and operable components to function smoothly, and lubricate as recommended in writing by manufacturer.
- B. Set field-adjustable circuit-breaker trip ranges.
- C. Load Balancing: After Substantial Completion, but not more than 60 days after Final Acceptance, measure load balancing and make circuit changes. Prior to making circuit changes to achieve load balancing, inform Architect of effect on phase color coding.
 1. Measure loads during period of normal facility operations.
 2. Perform circuit changes to achieve load balancing outside normal facility operation schedule or at times directed by Architect. Avoid disrupting services such as fax machines and on-line data processing, computing, transmitting, and receiving equipment.
 3. After changing circuits to achieve load balancing, recheck loads during normal facility operations. Record load readings before and after changing circuits to achieve load balancing.
 4. Tolerance: Maximum difference between phase loads, within panelboard, may not exceed 20 percent.

3.6 PROTECTION

- A. Temporary Heating: Prior to energizing panelboards, apply temporary heat to maintain temperature in accordance with manufacturer's published instructions.

END OF SECTION 26 24 16 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 24 16 00A - ELECTRONICALLY OPERATED CIRCUIT-BREAKER PANELBOARDS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Panelboards.
2. Circuit breakers.
3. Main controllers.
4. Slave panel controllers.
5. Control network.
6. Manual switches and cover plates.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 DEFINITIONS

- A. Monitoring:** Acquisition, processing, communication, and display of equipment status data, metered electrical parameter values, power quality evaluation data, event and alarm signals, tabulated reports, and event logs.

1.3 ACTION SUBMITTALS

A. Product Data:

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for control modules, power distribution components, manual switches and cover plates, and conductors and cables.
2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.

B. Shop Drawings: For each electronically operated, circuit-breaker panelboard and related equipment.

1. Include dimensioned plans, elevations, sections, and details. Show tabulations of installed devices, equipment features, and ratings.
2. Detail enclosure types and details for types other than Type 1.
3. Detail bus configuration, current, and voltage ratings.
4. Short-circuit current rating of panelboards and overcurrent protective devices.
5. Detail features, characteristics, ratings, and factory settings of individual overcurrent protective devices and auxiliary components.
6. Include time-current coordination curves for each type and rating of overcurrent protective device included in panelboards. Submit on translucent log-log graph paper; include selectable ranges for

- each type of overcurrent protective device.
- 7. Include diagrams for power, signal, and control wiring.
- 8. Block Diagram: Show interconnections between components specified in this Section and devices furnished with power distribution system components. Indicate data communication paths and identify networks, data buses, data gateways, concentrators, and other devices to be used. Describe characteristics of network and other data communication lines.
- 9. Submit evidence that electronic controls are compatible with connected monitoring and control devices and systems specified in other Sections.
 - a. Show interconnecting signal and control wiring and interfacing devices that prove compatibility of inputs and outputs.
 - b. For networked controls, list network protocols and provide statements from manufacturers that input and output devices comply with interoperability requirements of network protocol.
- C. Field quality-control reports.
- D. Sample Warranty: For manufacturer's special warranty.

1.4 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Electrically Operated, Molded-Case Circuit Breakers: Equal to **<Insert number>** percent of amount installed[**for each size indicated**], but no fewer than **<Insert number>**.

1.5 DELIVERY, STORAGE, AND HANDLING

- A. Handle and prepare panelboards for installation according to **[NECA 407][NEMA PB 1.1]**.

1.6 WARRANTY

- A. Special Manufacturer Extended Warranty: Manufacturer warrants that components of panelboards perform in accordance with specified requirements and agrees to provide repair or replacement of components that fail to perform as specified within extended warranty period.
 - 1. Initial Extended Warranty Period: **[Two]<Insert number>** year(s) from date of Substantial Completion, for labor, materials, and equipment.
 - 2. Follow-on Extended Warranty Period: **[Five]<Insert number>** year(s) from date of Substantial Completion, for materials that failed because of transient voltage surges only, f.o.b. the nearest shipping point to Project site.

PART 2 - PRODUCTS

2.1 ELECTRICALLY OPERATED CIRCUIT-BREAKER PANELBOARDS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. [ABB, Electrification Business]
2. [Eaton]
3. [Siemens Industry, Inc., Energy Management Division]
4. [Square D; Schneider Electric USA]
5. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [ABB, Electrification Business]
2. [Eaton]
3. [Siemens Industry, Inc., Energy Management Division]
4. [Square D; Schneider Electric USA]
5. <Insert manufacturer's name>

C. Source Limitations: Obtain electrically operated circuit breakers and power distribution components from single manufacturer.

2.2 SYSTEM DESCRIPTION

- A. Input signal from field-mounted or on-board signal source must open or close one or more electrically operated circuit breakers in electronically operated, circuit-breaker panelboards. Any combination of inputs must be programmable to any combination outputs.
- B. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory recognized by the authorities having jurisdiction, and marked for intended location and application.
- C. Comply with 47 CFR Part 15, Subpart A and Subpart B, for Class A digital devices.

2.3 PERFORMANCE REQUIREMENTS

- A. Expansion Requirements: Capacity for future expansion of number of control functions by 25 percent of current capacity; to include equipment ratings, housing capacities, spare spaces for circuit breakers, terminals, number of conductors in control cables, and control software.
- B. Interface with DDC System for HVAC: Provide hardware and software to enable DDC system for HVAC to monitor, control, display, and record data for use in processing reports.
 1. Hardwired Points:
 - a. Monitoring: On-off status, <Insert monitoring point>.
 - b. Control: On-off operation, <Insert control point>.
 2. Communication Interface: Comply with [ASHRAE 135][ISO/IEC 14908-1][MODBUS Application Protocol Specification]<Insert type of interface> communication interface with DDC system for HVAC must enable DDC system for HVAC operator to remotely control and monitor electronically operated circuit breakers from a DDC system for HVAC operator workstation. Control features and monitoring points displayed locally at panelboard controller must be available through DDC system for HVAC.

2.4 PANELBOARDS

- A. Electronically operated, circuit-breaker panelboards may contain remotely operated circuit breakers and standard branch circuit breakers specified in Section 262416 "Panelboards."
- B. Assemblies: Comply with UL 67 and NEMA PB 1.
- C. Surge Protective Device:
 - 1. Field mounted, complying with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."
 - 2. Integrally mounted, complying with UL 1449 Type 1.
 - a. Comply with IEEE C62.41, Category C, 200 kA short-circuit current rating.
 - b. Non-modular type with the following features and accessories:
 - 1) Digital-display indicator lights for power and protection status.
 - 2) **<Insert features and accessories>**.
- D. Enclosures: Comply with UL 50.
- E. Future Devices: Mounting brackets, bus connections, filler plates, and necessary appurtenances required for future installation of devices.
- F. Panelboard Short-Circuit Current Rating:
 - 1. Rated for series-connected system with integral or remote upstream overcurrent protective devices and labeled by a qualified electrical testing laboratory. Include size and type of allowable upstream and branch devices, listed and labeled for series-connected, short-circuit rating by a qualified electrical testing laboratory.
 - 2. Fully rated to interrupt **[10 kA]** symmetrical short-circuit current available at terminals.

2.5 CIRCUIT BREAKERS

- A. Remotely operated branch circuit breakers must provide branch circuit overcurrent protection.
- B. Labeled with SWD and HID Ratings: Comply with UL 489 for 15 and 20 A, single-pole branch devices. **[15 and 20 A circuit breakers, if scheduled, must be a product of same manufacturer, and be of same class as rated circuit breakers.]**
- C. Switching Endurance Rating: Not less than **[50,000][200,000]<Insert number>** full-load open/close/open remote operations.
- D. Remotely Operated Circuit Breakers: Manual override switch or handle position must enable or disable remote operation of device and allow breaker handle to manually control breaker's on-off status.

2.6 MAIN CONTROLLERS

- A. Description: Controllers must contain power supply and electronic control for operating and monitoring remotely operated branch circuit breakers.
 - 1. Comply with UL 916 (CSA C22.2, No. 205); with a microprocessor-based, solid-state, 365-day

- timing and control unit.
2. Power Supply: Powered from panelboard, sized to provide control power for operation of remotely operated circuit breakers, controller, bus system, control-voltage inputs, and field-installed sensors.
 3. Integral keypad and digital-display front panel for local setup, including the following:
 - a. Log and display remotely operated breaker on-time.
 - b. Provision to accept downloadable firmware so that latest features may be added in future without replacing module.
 4. Nonvolatile memory must retain all setup configurations. After a power failure, controller must automatically reboot and return to normal system operation.
 5. Ethernet Communications: Comply with **[ASHRAE 135][ISO/IEC 14908-1][MODBUS Application Protocol Specification]**<Insert network protocol> protocols.
 - a. Each input connected to controller must control any remotely operated breaker in any other networked electronically operated, circuit-breaker panelboard.
 - b. A schedule programmed at one controller must be able to control any remotely operated breaker in any other networked panelboard.
 6. Time Synchronization: Timing unit must be updated not less than every <Insert number> hour(s) with network time server.
 7. Web Server: Display information listed below over a standard Web-enabled server for displaying information over a standard Web browser.
 - a. A secure, password-protected login screen for modifying operational parameters, accessible to authorized users via Web page interface.
 - b. Separate Web page, showing status of each main and slave electronically operated, circuit-breaker panelboards with arrangement of breakers on page matching physical appearance of panel. Status must include breaker nametags, pole configuration, location in panel, actual contact state (on-off/tripped/manual), and breaker on-time.
 - c. Panel summary showing master and slave panels connected to controller.
 - d. Controller diagnostic information.
 - e. Show front panel mimic screens for setting up controller parameters, input types, zones, and operating schedules. These mimic screens must also allow direct breaker control and zone overrides.
 8. Alarm and E-mail Notification: Automatically initiate alarms based on preconfigured conditions listed below and routing alarm alerts as set at control panel.
 - a. General Alarms: Power loss, non-responding breakers, loss and restoration of sub-net communications, loss and restoration of serial port communications, loss and restoration of DDC system for HVAC commands.
 - b. Specific Alarms: Input status, zone status, breaker status on-time (zero to 99999 hours).
 - c. E-mail Notification: Automatically route e-mail messages to five individual e-mail addresses. Within body text of e-mail, include a link that will automatically redirect user to associated panels' status Web page.

B. Timing Unit:

1. 365-day calendar, astronomical clock, and automatic adjustments for daylight savings and leap year.
2. Clock configurable for 12-hour (A.M./P.M.) or 24-hour format.
3. **[16]**<Insert number> independent schedules, each having **[24]**<Insert number> time periods.
4. Schedule periods settable to the minute.
5. Day of week, day of month, day of year with one-time or repeating capability.

6. [32]<Insert number> special date periods.

C. With [eight][16]<Insert number> inputs, each configurable to the following parameters:

1. Normally open, normally closed, two-wire maintained toggle, two-wire momentary toggle, two-wire momentary on, two-wire momentary off, or three-wire momentary operation.
2. On and off-delay timers for local override operation, adjustable from five minutes to 12 hours. Local override must be by field-installed, two-wire momentary toggle switch.

2.7 SLAVE PANEL CONTROLLERS

- A. Slave panels must contain necessary busses and network hardware to allow connection of sub-net wiring between panels, with programming at main panel controller. Programmable timing unit, Web server, alarm and e-mail notification, and Ethernet connection to control network is not required provided all of these functions are available for slave panel from main panel controller.
- B. Sub-net wiring connections must allow connection of wiring to a terminal that can be removed from panel without interrupting communications to other panels.
- C. Slave panels must contain a nameplate label attached to deadfront trim indicating panel designation, panel network address, and panel designation of associated master panel.

2.8 CONTROL NETWORK

- A. Panel Controllers: Networked with other [electronically operated, circuit-breaker panel controllers][DDC system for HVAC controllers] in a peer-to-peer configuration using Ethernet [10Base-T][100Base-T] network.
- B. Protocol: Controllers must support serial MS/TP and Ethernet IP communications, and must be able to communicate directly via DDC system for HVAC TIA-485 serial networks and Ethernet 10Base-T networks as a native device.

2.9 MANUAL SWITCHES AND COVER PLATES

- A. Keypads: Programmable, designed to control functions associated with equipment of this Section. Units must be able to control any system output device.
- B. Push-Button Switches: Modular, momentary-contact, control-voltage type.
 1. Match color specified in Section 262726 "Wiring Devices."
 2. Integral green [digital-display][neon] pilot light to indicate when circuit is on.
 3. Internal white [digital-display][neon] locator light to illuminate when circuit is off.
- C. Manual, Maintained Contact, Line-Voltage or Control-Voltage Switch: Comply with Section 262726 "Wiring Devices."
- D. Cover Plates: Single and multigang cover plates as specified in Section 260533.16 "Boxes and Covers for Electrical Systems."
- E. Legend: Engraved or permanently silk-screened on cover plate where indicated. Use designations indicated on Drawings.

**2.10 CONDUCTORS AND CABLES**

- A. Power Wiring to Supply Side of Class 2 Power Source: Not smaller than No. 12 AWG. Comply with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- B. Class 2 and Class 3 Control Cables: Multiconductor cable with copper conductors not smaller than **[No. 18][No. 22][No. 24]** AWG. Comply with Section 260523 "Control-Voltage Electrical Power Cables."
- C. Class 1 Control Cables: Multiconductor cable with copper conductors not smaller than **[No. 14][No. 16][No. 18]** AWG. Comply with Section 260523 "Control-Voltage Electrical Power Cables."
- D. Twisted-Pair Data Cable:
 - 1. **[Category 5e][Category 6][Category 6a]**. Comply with requirements for twisted pair cabling in Section 260523 "Control-Voltage Electrical Power Cables."
 - 2. **[Category 5e][Category 6][Category 6a]**. Comply with requirements in Section 271513 "Communications Copper Horizontal Cabling."

PART 3 - EXECUTION**3.1 EXAMINATION**

- A. Receive, inspect, handle, and store panelboards according to **[NECA 407][NEMA PB 1.1]**.
- B. Examine panelboards before installation. Reject panelboards that are damaged or rusted or have been subjected to water saturation.
- C. Examine elements and surfaces to receive panelboards for compliance with installation tolerances and other conditions affecting performance of the Work.
- D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF WIRING

- A. Wiring Method:
 - 1. Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
 - 2. Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters **and except in accessible ceiling spaces and in gypsum board partitions where unenclosed wiring method may be used**. Conceal raceway and cables except in unfinished spaces.
 - a. Install plenum cable in environmental air spaces, including plenum ceilings.
 - b. Comply with requirements for cable trays specified in Section 260536 "Cable Trays for Electrical Systems."
 - c. Comply with requirements for raceways specified in Section 260533.13 "Conduits for Electrical Systems."
- B. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.

3.3 INSTALLATION OF PANELBOARDS

- A. Install panelboards and accessories according to **[NECA 407][NEMA PB 1.1]**.
- B. Comply with mounting and anchoring requirements specified in Section 260548.16 "Seismic Controls for Electrical Systems."
- C. Mounting Height: **[90 inch (2286 mm)]<Insert dimension>** to top of trim above finished floor unless otherwise indicated.
- D. Mount panelboard cabinet plumb and rigid without distortion of box. Mount recessed panelboards with fronts uniformly flush with wall finish and mating with back box.
- E. Install filler plates in unused spaces.

3.4 IDENTIFICATION

- A. Identify system components, wiring, cabling, and terminals. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
- B. Identify field-installed conductors, interconnecting wiring, and components; provide warning signs complying with Section 260553 "Identification for Electrical Systems."
- C. Create a directory to indicate loads served by each circuit; incorporate Owner's final room designations. Obtain approval before installing. Use a computer or typewriter to create directory; handwritten directories are unacceptable.
- D. Panelboard Nameplates: Label each panelboard with a nameplate complying with requirements for identification specified in Section 260553 "Identification for Electrical Systems."

3.5 FIELD QUALITY CONTROL

- A. Acceptance Testing Preparation:
 - 1. Test insulation resistance for each panelboard bus, component, connecting supply, feeder, and control circuit.
 - 2. Test continuity of each circuit.
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- C. Tests and Inspections:
- D. Perform the following tests and inspections **[with the assistance of a factory-authorized service representative]**:
 - 1. Perform each visual and mechanical inspection and electrical test stated in NETA ATS. Certify compliance with test parameters.
 - 2. Correct malfunctioning units on-site, where possible, and retest to demonstrate compliance; otherwise, replace with new units and retest.
 - 3. Perform the following infrared scan tests and inspections and prepare reports:

- a. Initial Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform an infrared scan of each panelboard. Remove front panels so joints and connections are accessible to portable scanner.
- b. Follow-up Infrared Scanning: Perform an additional follow-up infrared scan of each panelboard 11 months after date of Substantial Completion.
- c. Instruments and Equipment:
 - 1) Use an infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.

E. Nonconforming Work:

1. Panelboard will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Prepare test and inspection reports, including a certified report that identifies panelboards included and describes scanning results. Include notation of deficiencies detected, remedial action taken, and observations made after remedial action.

G. Manufacturer Services:

1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

3.6 STARTUP SERVICE

A. **[Engage a factory-authorized service representative to perform][Perform]** startup service.

1. Complete installation and startup checks according to manufacturer's instructions.
2. Confirm correct communication wiring, initiate communications between panels, and program control system according to approved time-of-day schedules and input override assignments.
3. **<Insert startup steps if any>.**

3.7 ADJUSTING

A. Occupancy Adjustments: When requested within **[12]<Insert number>** months from date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions. Provide up to **[two]<Insert number>** visits to Project during other-than-normal occupancy hours for this purpose.

3.8 MAINTENANCE

A. Software and Firmware Service Agreement:

1. Technical Support: Beginning at Substantial Completion, verify that software and firmware service agreement includes software support for **[two]<Insert number>** years.
2. Upgrade Service: At Substantial Completion, update software and firmware to latest version. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. Verify upgrading software includes operating system and new or revised licenses for using software.

- a. Upgrade Notice: No fewer than **[30]<Insert number>** days to allow Owner to schedule and

access the system and to upgrade computer equipment if necessary.

3. Upgrade Reports: Prepare written report after each update, documenting upgrades installed.

END OF SECTION 26 24 16 00A

SECTION 26 24 19 00 - MOTOR-CONTROL CENTERS

PART 1 - GENERAL

1.1 SUMMARY

- A. Section includes MCCs for use with ac circuits rated 600 V and less, with combination controllers and having the following factory-installed components:
 - 1. Automatic power transfer.
 - 2. Feeder-tap units.
 - 3. Measurement and control.
 - 4. Auxiliary devices.
 - 5. Panelboards.
 - 6. Transformers.

1.2 DEFINITIONS

- A. CPT: Control power transformer.
- B. MCC: Motor-control center.
- C. MCCB: Molded-case circuit breaker.
- D. MCP: Motor-circuit protector.
- E. OCPD: Overcurrent protective device.
- F. PID: Control action; proportional plus integral plus derivative.
- G. PT: Potential transformer.
- H. SPD: Surge protective device.
- I. SCR: Silicon-controlled rectifier.
- J. VFC: Variable-frequency controller.
- K. Low Voltage: As defined in NFPA 70 for circuits and equipment operating at less than 50 V or for remote-control, signaling power-limited circuits.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for MCCs.
 - 2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories for each cell of the MCC.

B. Sustainable Design Submittals:

1. Product Data: For continuous metering equipment for energy consumption.
2. Product Data: For continuous metering equipment for energy consumption.
3. Product Data: For continuous metering equipment for energy consumption.
4. Product Data: For continuous metering equipment for energy consumption.
5. Product Data: For continuous metering equipment for energy consumption.

C. Shop Drawings: For each MCC, manufacturer's **[approval][custom][and][production]** drawings as defined in UL 845. In addition to requirements specified in UL 845, include dimensioned plans, elevations, and sections; and conduit entry locations and sizes, mounting arrangements, and details, including required clearances and service space around equipment.

1. Show tabulations of installed devices, equipment features, and ratings. Include the following:
 - a. Each installed unit's type and details.
 - b. Factory-installed devices.
 - c. Enclosure types and details.
 - d. Nameplate legends.
 - e. Short-circuit current (withstand) rating of complete MCC, and for bus structure and each unit.
 - f. Features, characteristics, ratings, and factory settings of each installed controller and feeder device, and installed devices.
 - g. Specified optional features and accessories.
 - h. **<Insert required information>**.
2. Schematic **[and Connection]** Wiring Diagrams: For power, signal, and control wiring for each installed controller.
3. Nameplate legends.
4. Vertical and horizontal bus capacities.
5. Features, characteristics, ratings, and factory settings of each installed unit.
6. **<Insert required information>**.

1.4 INFORMATIONAL SUBMITTALS

- A. Standard Drawings: For each MCC, as defined in UL 845.
- B. Production Drawings: For each MCC, as defined in UL 845.
- C. Coordination Drawings: Floor plans, drawn to scale, showing dimensioned layout, required working clearances, and required area above and around MCCs where pipe and ducts are prohibited. Show MCC layout and relationships between electrical components and adjacent structural and mechanical elements. Show support locations, type of support, and weight on each support. Indicate field measurements.
- D. Qualification Data: For testing agency.
- E. Seismic Qualification Data: Certificates, for MCCs, accessories, and components, from manufacturer.
 1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
 2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
 3. Detailed description of equipment anchorage devices on which the certification is based and their

installation requirements.

- F. Product Certificates: For each MCC.
- G. Source quality-control reports.
- H. Field quality-control reports.
- I. Load-Current and Overload Relay Heater List: Compile after motors have been installed, and arrange to demonstrate that selection of heaters suits actual motor nameplate full-load currents.
- J. Load-Current and List of Settings of Adjustable Overload Relays: Compile after motors have been installed, and arrange to demonstrate that switch settings for motor running overload protection suit actual motors to be protected.
- K. Sample Warranty: For special warranty.

1.5 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For MCCs, all installed devices, and components to include in emergency, operation, and maintenance manuals.
 - 1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:
 - 2. Manufacturer's Record Drawings: As defined in UL 845. In addition to requirements specified in UL 845, include field modifications **[and field-assigned wiring identification]** incorporated during construction by manufacturer, Contractor, or both.
 - 3. Manufacturer's written instructions for testing and adjusting circuit breaker and MCP trip settings.
 - 4. Manufacturer's written instructions for setting field-adjustable overload relays.
 - 5. Manufacturer's written instructions for testing, adjusting, and reprogramming reduced-voltage, solid-state controllers.
 - 6. Manufacturer's written instructions for testing, adjusting, and reprogramming microprocessor control modules.
 - 7. Manufacturer's written instructions for setting field-adjustable timers, controls, and status and alarm points.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Power Fuses: Equal to **[10]<Insert number>** percent of quantity installed for each size and type, but no fewer than **[three]<Insert number>** of each size and type.
 - 2. Control Power Fuses: Equal to **[10]<Insert number>** percent of quantity installed for each size and type, but no fewer than **[two]<Insert number>** of each size and type.
 - 3. Indicating Lights: **[Two]<Insert number>** of each type and color installed.
 - 4. Auxiliary Contacts: Furnish **[one]<Insert number>** spare(s) for each size and type of magnetic controller installed.
 - 5. Power Contacts: Furnish **[three]<Insert number>** spares for each size and type of magnetic contactor installed.
 - 6. **<Insert extra materials>**.

1.7 QUALITY ASSURANCE

- A. Testing Agency Qualifications: Member company of NETA.
 - 1. Testing Agency's Field Supervisor: Certified by NETA to supervise on-site testing.
- B. Source Limitations: Obtain MCCs and controllers of a single type from single source from single manufacturer.
- C. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, and marked for intended use.
- D. UL Compliance: MCCs shall comply with UL 845 and shall be listed and labeled by a qualified testing agency.

1.8 DELIVERY, STORAGE, AND HANDLING

- A. Deliver MCCs in shipping splits of lengths that can be moved past obstructions in delivery paths.
- B. Handle MCCs according to the following:
 - 1. NECA 402, "Recommended Practice for Installing and Maintaining Motor Control Centers."
 - 2. NEMA ICS 2.3, "Instructions for the Handling, Installation, Operation, and Maintenance of Motor Control Centers Rated Not More Than 600 Volts."
- C. If stored in space that is not permanently enclosed and air conditioned, remove loose packing and flammable materials from inside MCCs; **[install temporary electric heating, with at least 250 W per vertical section][connect factory-installed space heaters to temporary electrical service]**.

1.9 WARRANTY

- A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace **[MCC][and][SPD]<Insert devices>** that fail in materials or workmanship within specified warranty period.
 - 1. Warranty Period: **[Five]<Insert number>** years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MOTOR-CONTROL CENTERS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[ABB, Electrification Business]**
 - 2. **[Eaton]**
 - 3. **[Rockwell Automation, Inc.]**
 - 4. **[Siemens Industry, Inc., Energy Management Division]**
 - 5. **[Square D; Schneider Electric USA]**

6. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [ABB, Electrification Business]
2. [Eaton]
3. [Rockwell Automation, Inc.]
4. [Siemens Industry, Inc., Energy Management Division]
5. [Square D; Schneider Electric USA]
6. <Insert manufacturer's name>

2.2 SYSTEM DESCRIPTION

A. NEMA Compliance: Fabricate and label MCCs to comply with NEMA ICS 18.

B. Ambient Environment Ratings:

1. Ambient Temperature Rating: Not less than **0 deg F (minus 18 deg C)** and not exceeding **104 deg F (40 deg C)**, with an average value not exceeding **95 deg F (35 deg C)** over a 24-hour period.
2. Ambient Storage Temperature Rating: Not less than **minus 4 deg F (minus 20 deg C)** and not exceeding **140 deg F (60 deg C)**
3. Humidity Rating: Less than 95 percent (noncondensing).
4. Altitude Rating: Not exceeding **6600 feet (2000 m)**, or **3300 feet (1000 m)** if MCC includes solid-state devices.
5. <Insert unusual service condition>.

C. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

2.3 PERFORMANCE REQUIREMENTS

A. Seismic Performance: MCCs shall withstand the effects of earthquake motions determined according to **[ASCE/SEI 7]<Insert requirement>**.

1. The term "withstand" means "the system will remain in place without separation of any parts when subjected to the seismic forces specified[**and the system will be fully operational after the seismic event**]."
2. Component Importance Factor: **[1.5][1.0]**.
3. Component Amplification Factor: 2.5.
4. Component Response Modification Factor: 6.0.

B. Capacities and Characteristics:

1. MCC Enclosure and Assembly:
 - a. Nominal System Voltage: **[277][277/480][600]<Insert number(s)>-V ac**.
 - b. Service Equipment Rated: **[Yes][No]**.
 - c. Enclosure: NEMA 250, Type **<Insert number or number and a letter>**.
2. Integrated Short-Circuit Rating for MCC:

- a. Combination series rated; **<Insert number> kA.**
 - b. Fully rated; **<Insert number> kA.**
3. Integrated Short-Circuit Rating for Each Unit:
 - a. Combination series rated; **<Insert number> kA.**
 - b. Fully rated; **<Insert number> kA.**
4. Wiring Class: **<Insert numbers and letters>.**
5. Bus:
 - a. Horizontal Bus: **<Insert number> kA.**
 - b. Neutral Bus: **[None][50 percent][Full size][150 percent]<Insert percentage>.**
6. Main Disconnect Device:
 - a. Main Disconnect: **[MCCB, UL 489,][Fusible switch, UL 98,] three pole, <Insert number> A.[Manually operated, electrically tripped.]**
 - b. SPD: UL 1449, **[Type 1][Type 2].**
 - c. Optional Features: **<Insert items>.**
7. Automatic Power Transfer: Electrically operated MCCBs, three pole, **<Insert number> A.**
8. Magnetic Controllers:
 - a. Tag Number: **<Insert numbers and letters>, <Insert description>, <Insert number> hp, <Insert number> full-load A.**
 - 1) Classification by Starting Method: **<Insert text>.**
 - 2) Controller Size: **<Insert number or numbers and letters> complying with NEMA ICS 2.**
 - 3) Optional Features: **<Insert items>.**
9. Reduced-Voltage Solid-State Controllers:
 - a. Tag Number: **<Insert numbers and letters>, <Insert description>, <Insert number> hp, <Insert number> full-load A.**
 - 1) Starting Configuration: **<Insert text>.**
 - 2) Starting Mode: **<Insert text>.**
 - 3) Stopping Mode: **<Insert text>.**
 - 4) Controller Size: **<Insert number or numbers and letters> complying with NEMA ICS 2.**
 - 5) Bypass Contactor: **Comply with NEMA ICS 2.**
 - 6) Acceleration Control: **<Insert number>.**
 - 7) Overload Relays: **[Melting alloy][Bimetallic][Solid state]. Class [10][20][30].**
 - 8) Isolated Overload Alarm Contact: **[NC][NO].**
 - 9) Optional Features: **<Insert items>.**
10. VFCs:
 - a. Tag Number: **<Insert numbers and letters>, <Insert description>, <Insert number> hp, <Insert number> full-load A.**
 - 1) Bypass Mode: **[Manual][Field selectable, manual or automatic].**
 - 2) Bypass Style: **[Two][Three] contactor style.**

- 3) Bypass Contactor Classification: **[Full-voltage (across-the-line)][Reduced-voltage autotransformer, open transition][Reduced-voltage autotransformer, closed transition]<Insert type>**.
 - 4) Overload Relays: **[Melting alloy][Bimetallic][Solid state]**. Class **[10][20][30]**.
 - 5) Isolated Overload Alarm Contact: **[NC][NO]**.
 - 6) Optional Features: **<Insert items>**.
11. Controller-Mounted Auxiliary Devices:
- a. Push Buttons and Selector Switches: **[Heavy][Standard]-duty, [oiltight]** type.
 - b. **<Insert devices>**.
 - c. Feeder Tap Units: Main Disconnect: **[MCCB, UL 489,][Fusible switch, UL 98,]** three pole, **<Insert number> A.[Manually operated, electrically tripped.]**
12. Panelboards: Tag Number **<Insert designation>**.
- a. Mains: **[MCCB][Main lugs only]**, **<Insert number>** phase, **<Insert number>** V, **<Insert number>** A.
 - b. **[Plug-in][Bolt-on]** circuit breakers.
13. Transformer(s): Tag Number **<Insert designation>**, **<Insert number>** kVA, **<Insert number>** V primary, **<Insert number>** V secondary.
- a. Primary Circuit Breaker: MCCB, **<Insert number>** A.
14. Transfer Switch: Tag Number **<Insert designation>**, **<Insert number>** pole, **<Insert number>** A.

2.4 MOTOR-CONTROL CENTER ENCLOSURES

- A. Indoor Enclosures: Freestanding steel cabinets unless otherwise indicated. NEMA 250, **[Type 1][Type 1A][Type 2][Type 12]** unless otherwise indicated to comply with environmental conditions at installed location.
- B. Space Heaters: Factory-installed electric space heaters of sufficient wattage in each vertical section to maintain enclosure temperature above expected dew point.
1. Space-Heater Control: **[Thermostats to maintain temperature of each section above expected dew point][Manual switching of branch-circuit protective device]**.
 2. Space-Heater Power Source: **[Transformer, factory installed in MCC][120-V external branch circuit]**.
- C. Enclosure Finish for Indoor Units: Factory-applied finish in manufacturer's **[standard gray][custom color]** finish over a rust-inhibiting primer on treated metal surface.
- D. Outdoor Enclosures: Type 3R, **[non-walk-in aisle][with interior-lighted walk-in aisle]**.
1. Finish: Factory-applied finish in manufacturer's **[standard][custom]** color; undersurfaces treated with corrosion-resistant undercoating.
 2. Enclosure: **[Flat][Downward, rearward sloping]** roof; **[bolt-on rear covers][rear hinged doors]** for each section, with provisions for padlocking.
 3. Doors: Personnel door at each end of aisle, minimum width of **[30 inches (762 mm)]<Insert dimension>**; opening outwards; with panic hardware and provisions for **[padlocking][cylinder lock]**.
 4. Accessories: Fluorescent luminaires, ceiling mounted; wired to a three-way light switch at each

end of aisle; GFCI duplex receptacle; emergency battery pack luminaire installed on wall of aisle midway between personnel doors.

5. Walk-in Aisle Heating and Ventilating:
 - a. Factory-installed electric unit heater(s), wall or ceiling mounted, with integral thermostat and disconnect and with capacities to maintain switchboard interior temperature of [40 deg F (5 deg C)]<Insert temperature> with outside design temperature of [plus 23 deg F (minus 5 deg C)]<Insert temperature>.
 - b. Factory-installed exhaust fan with capacities to maintain switchboard interior temperature of [100 deg F (38 deg C)]<Insert temperature> with outside design temperature of [104 deg F (40 deg C)]<Insert temperature>.
 - c. Ventilating openings[**complete with replaceable fiberglass air filters**].
 - d. Thermostat: Single stage; wired to control heat and exhaust fan.
6. Power for Space Heaters, Ventilation, Lighting, and Receptacle: Include a CPT within the switchboard. Supply voltage shall be [120][120/240][120/208]-V ac.
7. Power for space heaters, ventilation, lighting, and receptacle supplied from a remote source.

2.5 ASSEMBLY

- A. Structure:
 1. Comply with UL requirements for service entrance equipment.
 2. Units up to and including Size 3 shall have drawout mountings with connectors that automatically line up and connect with vertical-section buses while being racked into their normal, energized positions.
 3. Units in Type B and Type C MCCs shall have pull-apart terminal strips for external control connections.
 4. Pull Boxes:
 - a. Include provisions for ventilation to maintain temperature in pull box within same limits as the MCC.
 - b. Set the box back from front to clear circuit-breaker removal mechanism.
 - c. Covers: Removable covers forming top, front, and sides.
 - d. Insulated bottom of fire-resistive material with separate holes for cable drops into MCC.
 - e. Cable Supports: Arranged to facilitate cabling and adequate to support cables, including supports for future cables.
 - f. When equipped with barriers, supply with access to check bus bolt tightness.
- B. Compartments: Modular; individual [**lift-off**]doors with concealed hinges and quick-captive screw fasteners.
 1. Interlock compartment door to require that the disconnecting means is "off" before door can be opened or closed, except by operating a concealed release device.
 2. Compartment construction shall allow for removal of units without opening adjacent doors, disconnecting adjacent compartments, or disturbing operation of other units in MCC.
 3. The same-size compartments shall be interchangeable to allow rearrangement of units, such as replacing three single units with a unit requiring three spaces, without cutting or welding.
- C. Bus Transition and Incoming Pull Sections: Included and aligned with the structure of the MCC.
- D. Utility Metering Compartment: Fabricated, barrier compartment and section complying with utility company's requirements; hinged sealed door; buses provisioned for mounting utility company's current transformers and PTs or potential taps as required by utility company. If separate vertical section is

required for utility metering, match and align with basic MCC. Install service entrance label and applicable service entrance features. Comply with requirements in Section 262713 "Electricity Metering."

- E. Owner's Metering Compartment: A separate customer metering compartment and section with front hinged door, metering, and current transformers for each meter. Current transformer secondary wiring shall be terminated on shorting-type terminal blocks. **[Include PTs having primary and secondary fuses with disconnecting means and secondary wiring terminated on terminal blocks.]**
- F. Interchangeability: Compartments constructed to allow for removal of units without opening adjacent doors, disconnecting adjacent compartments, or disturbing operation of other units in MCC; same-size compartments to permit interchangeability and ready rearrangement of units, such as replacing three single units with a unit requiring three spaces, without cutting or welding.
- G. Wiring Spaces:
 - 1. Vertical wireways in each vertical section for vertical wiring to each unit compartment; supports to hold wiring in place.
 - 2. Horizontal wireways in **[bottom][and][top]** of each vertical section for horizontal wiring between vertical sections; supports to hold wiring in place.
- H. Provisions for Future:
 - 1. Compartments marked "future" shall be bused, wired and equipped with guide rails or equivalent, and ready for insertion of drawout units.
 - 2. Compartments marked "spare" shall include provisions for connection to the vertical bus.
- I. Integrated Short-Circuit Rating:
 - 1. Short-Circuit Current Rating for Each Unit: **[Combination series rated][Fully rated]; [22][42][65][100]<Insert number> kA.**
 - 2. Short-Circuit Current Rating of MCC: **[Combination series rated][Fully rated]** with its main overcurrent device; **[22][42][65][100]<Insert number> kA.**
- J. Control Power:
 - 1. 120-V ac, supplied centrally **[from a CPT][from a remote branch circuit]**.
 - 2. **[24][120]<Insert number>-V ac**; obtained from CPT integral with controller; with primary and secondary fuses. The CPT shall be of sufficient capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 3. Control Circuits: 24-V dc, supplied centrally from two redundant, automatically switched power supplies.
 - 4. CPT Spare Capacity: **[50][100][200]<Insert number> VA.**
- K. Factory-Installed Wiring: Factory installed, with bundling, lacing, and protection included. Use flexible conductors for No. 8 AWG and smaller, for conductors across hinges, and for conductors for interconnections between shipping units.
 - 1. Wiring Class:
 - a. NEMA ICS 18, **[Class I][Class I-S], [Type A][Type B, for starters larger than Size 3][Type B-D, for starters Size 3 and smaller][Type B-T, for starters Size 3 and smaller][Type C].**
 - b. NEMA ICS 18, **[Class II][Class II-S], [Type B, for starters larger than Size 3][Type B-D, for starters Size 3 and smaller][Type B-T, for starters Size 3 and smaller][Type C].**

2. Control and Load Wiring: Factory installed, with bundling, lacing, and protection included. Use flexible conductors for No. 8 AWG and smaller, for conductors across hinges, and for conductors for interconnections between shipping units.

L. Bus:

1. Main Horizontal and Equipment Ground Buses: Uniform capacity for entire length of MCC's main and vertical sections. Provide for future extensions[**from both ends**].
2. Vertical Phase and Equipment Ground Buses: Uniform capacity for entire usable height of vertical sections, except for sections incorporating single units.
3. Phase- and Neutral-Bus Material:
 - a. Hard-drawn copper of 98 percent minimum conductivity or **[silver][tin]**-plated alloy, with **[mechanical][compression]** connectors for outgoing conductors.
 - b. Hard-drawn copper of 98 percent minimum conductivity or tin-plated, high-strength, electrical-grade aluminum alloy, with **[mechanical][compression]** connectors for outgoing conductors.
4. Ground Bus: Hard-drawn copper of 98 percent minimum conductivity, with pressure connector for ground conductors, minimum size **1/4-by-2 inches (6 by 50 mm)**. Equip with **[mechanical][compression]** connectors for outgoing conductors.
5. Neutral Disconnect Link: Bolted, uninsulated, **1/4-by-2-inch (6-by-50-mm)** copper bus, arranged to connect neutral bus to ground bus.
6. Bus-Bar Insulation: Factory-applied, flame-retardant, tape wrapping of individual bus bars or flame-retardant, spray-applied insulation. Insulation temperature rating shall not be less than 105 deg C.

2.6 MAIN DISCONNECT AND OVERCURRENT PROTECTIVE DEVICE(S)

- A. MCCB (to 2500 A): Fixed mounted, manually operated air-circuit breaker. Comply with UL 489.

1. MCCB shall have quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, its position shall be shown by the position of the handle, and manual push-to-trip push button.
2. Solid-state monitoring and tripping system to show system status monitoring, adjustable time-current protection, and shunt trip.
 - a. Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - b. Trip-setting dials or interchangeable plugs to establish the continuous trip of the circuit breaker. Plugs shall not be interchangeable between frames, and the breaker may not be closed without the plug. With neutral ground-fault sensor.
 - c. Time-current adjustments to achieve protective-device coordination as follows:
 - 1) Adjustable long-time delay.
 - 2) Adjustable short-time setting and delay to shape the time-current curve.
 - 3) Adjustable instantaneous setting.
 - 4) Individually adjustable ground-fault setting and time delay.
 - d. Built-in connector to test the long-time delay, instantaneous, and ground-fault functions of the breaker.[**Provide one test set for testing the installed circuit breakers 225-A frame and higher.**]
 - e. Built-in digital ammeter display, showing load current and tripping cause.

3. Switch operator power shall be from control power specified in "Assembly" Article.
- B. MCCB (1600 to 2500 A): Fixed mounted, manually operated air-circuit breaker. Comply with UL 489.
 1. MCCB shall have quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, its position shall be indicated by the position of the handle, and manual push-to-trip push button.
 2. Solid-state monitoring and tripping system to show system status monitoring, adjustable time-current protection, and shunt trip.
 - a. Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - b. LED indicators or display, with manual reset, to show reasons of automatic trip.
 - c. Display panel to indicate the status of the system circuitry, or give fault location based on automatic diagnosis.
 - d. Trip the circuit breaker when closing on a fault.
 - e. Time-current adjustments to achieve protective-device coordination as follows:
 - 1) Adjustable long-delay pickup and time.
 - 2) Individual adjustments for short-delay pickup, time, and I-squared-t setting.
 - 3) Adjustable instantaneous pickup.
 - 4) Individually adjustable ground-fault pickup and time, with **[I-squared-t setting][ground alarm]**.
 - f. One test kit to test each trip function.
 - g. Battery backup for informational displays after automatic trip, with battery status indicator.
 3. Switch operator power shall be from control power specified in "Assembly" Article.
- C. MCC Main Disconnect Device: Fusible switch; fixed-mounted, manually operated, **[electrically tripped,]** quick-make, quick-break switch. Comply with UL 98.
 1. Indication whether the switch is open or closed, and provisions for padlocking the operating handle.
 2. Fuse clips and fuses.
 3. Electrically tripped switches shall include the following:
 - a. Shunt trip.
 - b. Ground-fault protection, with adjustable time delay and test panel.
 - c. Single-phase protection, tripping the switch on loss of a source phase.
 - d. Blown fuse protection, tripping the switch on a blown fuse, with blown fuse indication.
 - e. Switch operator power shall be from control power specified in "Assembly" Article.
- D. Surge Suppression: Factory installed as an integral part of the incoming feeder, complying with UL 1449, SPD **[Type 1][Type 2]**.

2.7 AUTOMATIC POWER TRANSFER

- A. Two-Breaker Transfer Control:
 1. Transfer control, using electrically operated MCCBs, for an MCC supplied from two normally energized low-voltage power sources, designated "normal" and "standby." The circuit breakers connecting the two power sources to the load bus shall be controlled by a microprocessor-based automatic transfer control. Power for the transfer control shall be from the voltage-sensing transformers.

2. MCCBs (to 2500 A): Fixed mounted, manually operated air-circuit breaker. Comply with UL 489.
 - a. MCCB shall have quick-make, quick-break, over-center switching mechanism that is mechanically trip-free, its position shall be indicated by the position of the handle, and manual push-to-trip push button.
 - b. Solid-state monitoring and tripping system to show system status monitoring, adjustable time-current protection, and shunt trip.
 - 1) Interchangeable current sensors and timing circuits for adjustable time-current protection settings and status signals.
 - 2) Trip-setting dials or interchangeable plugs to establish the continuous trip of the circuit breaker. Plugs shall not be interchangeable between frames, and the breaker may not be closed without the plug. With neutral ground-fault sensor.
 - 3) Time-current adjustments to achieve protective-device coordination as follows:
 - a) Adjustable long-time delay.
 - b) Adjustable short-time setting and delay to shape the time-current curve.
 - c) Adjustable instantaneous setting.
 - d) Individually adjustable ground-fault setting and time delay.
 - 4) Built-in connector to test the long-time delay, instantaneous, and ground-fault functions of the breaker. **[Provide one test set for testing the installed circuit breakers 225-A frame and higher.]**
 - 5) Built-in digital ammeter display, showing load current and tripping cause.
3. In the automatic mode, the load bus is connected to the normal power source. When the normal source fails, the control shall automatically open the normal power source and close the standby source circuit breaker.
4. Sequence of Operation:
 - a. The default operation shall be with the normal source main breaker closed and standby main breaker open. On detection of an undervoltage to the line side of the normal main breaker and after a field-adjustable time delay, the main breaker shall open and, after an additional field-adjustable time delay, the standby breaker shall close and restore power to the facility.
 - b. On restoration of voltage to the line side of the normal main breaker and after a field-adjustable time delay, the standby main breaker shall open and, after a field-adjustable time delay, the normal main breaker shall close.
5. Field-Adjustable Transfer Parameters:
 - a. Delay the transfer from the normal power source to the standby power source and from the standby power source to the normal source. The time delay is to allow the load voltage to decay before reconnecting to another power source. Delay range is zero seconds to 30 minutes.
 - b. Delay the initiation of the transfer sequence. The time delay is recommended to override a momentary power outage or voltage fluctuation. Delay range is zero to 120 seconds.
 - c. Delay the transfer from the standby power source to the normal power source. Delay range is zero seconds to 30 minutes.
 - d. A relay with contact that changes state when the power is available on the normal source, and a relay with contact that changes state when the power is available on the standby source.
6. Controls and Indicators: In addition to the delay setting controls, include the following:

- a. Interlocks or relay control to prevent transfer when either of the two controlled circuit breakers trip due to overcurrent or ground-fault.
 - b. Three-position selector switch to select the normal source: Source 1, Source 2, or none.
 - c. Transfer-control automatic and manual selector.
 - 1) Interlock shall prevent paralleling of the two power sources in manual mode.
 - d. Open-close control switch for manual electrical operation of each controlled circuit breaker.
 - e. Selector to place control into programming mode.
 - f. Circuit breaker control switch for each of the normal and standby source breakers, providing open and close operation.
 - g. Push button to initiate manual retransfer to the normal source when the transfer controller is in the automatic mode.
 - h. Meters and display to show the following:
 - 1) Voltage and frequency of both sources.
 - 2) A multiline display showing the following:
 - a) Set points of timers, and voltage pickup and dropout set points.
 - b) Date, time, and reason for minimum of the last 10 transfers. The display may show the information for one transfer at a time using a scrolling control, with the others held in memory.
 - c) When the control system is in the transferring process, the display shall show delay countdown in seconds.
 - i. LED indicators to show the following:
 - 1) Normal source available.
 - 2) Standby source available.
 - 3) Normal source connected.
 - 4) Standby source connected.
 - 5) Load bus energized.
7. Voltage Transformers: Primary and secondary protection and disconnecting means for sensing functions and control power.
8. Voltage Sensing Relays: Microprocessor-based, IEEE device number 27/47 voltage detection relays for three-phase undervoltage protection and negative sequence voltage protection.

2.8 MAGNETIC CONTROLLERS

A. Controller Units: Combination controllers.

B. Disconnects:

1. Fusible Switch:

- a. UL 98 and NEMA KS 1, heavy-duty, horsepower-rated fusible switch, with clips or bolt pads to accommodate **[UL 248-8 Class J][UL 248-10 Class L]<Insert class>** fuses.
- b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
- c. Auxiliary Contacts: **[NC][NO]**, arranged to activate before switch blades open.

2. MCP:

- a. UL 489, with interrupting capacity complying with available fault currents, instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with

- motor locked-rotor amperes.
- b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
- c. Auxiliary contacts "a" and "b" arranged to activate with MCP handle.
- d. **[NC][NO]** alarm contact that operates only when MCP has tripped.
- e. Current-limiting module to increase controller short-circuit current (withstand) rating to 100 kA.

3. MCCB:

- a. UL 489, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.
- b. Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
- c. Lockable Handle: For three padlocks and interlocks with cover in closed position.
- d. Auxiliary contacts "a" and "b" arranged to activate with MCCB handle.
- e. **[NC][NO]** alarm contact that operates only when MCCB has tripped.

4. Molded-Case Switch:

- a. UL 489, with in-line fuse block for **[UL 248-8 Class J][UL 248-10 Class L]** power fuses (depending on ampere rating), providing an interrupting capacity to comply with available fault currents; MCCB with fixed, high-set instantaneous trip only.
- b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
- c. Auxiliary contacts "a" and "b" arranged to activate with molded-case switch handle.
- d. **[NC][NO]** alarm contact that operates only when molded-case switch has tripped.

C. Controllers: Comply with UL 508.

1. Full-Voltage Magnetic Controllers: Electrically held, full voltage, NEMA ICS 2, general purpose, Class A.
 - a. Classification: **[Nonreversing][and][reversing]<Insert classification>**.
2. Reduced-Voltage Magnetic Controllers: Electrically held, NEMA ICS 2, general purpose, Class A; **[closed][open]** transition; adjustable time delay on transition. **[Electrically][Mechanically]** held.
 - a. Wye-Delta Controller: Four contactors, with a three-phase starting resistor/reactor bank.
 - b. Part-Winding Controller: Separate START and RUN contactors, with separate overload relays for starting and running sequences.
 - c. Autotransformer Reduced-Voltage Controller: Medium-duty service, with integral overtemperature protection; taps for starting at 50, 65, and 80 percent of line voltage; one RUN and two START contactors.
3. Multispeed Magnetic Controllers: Electrically held, full voltage, NEMA ICS 2, general purpose, Class A.
 - a. Classification, Nonreversing: **[Consequent pole][Two winding]**.
 - 1) Two speed, with compelling relays to ensure that motor will start only at low speed.
 - 2) Timer Relays:
 - a) Accelerating, for properly timed acceleration through speeds lower than that selected.
 - b) Decelerating, for automatically timed deceleration through each speed.

- b. Classification, Reversing: **[Consequent pole][Two winding]**.
 - 1) Two speed, with compelling relay to ensure that motor will start only at low speed.
 - 2) Timer Relays:
 - a) Accelerating, for properly timed acceleration through speeds lower than that selected.
 - b) Decelerating, for automatically timed deceleration through each speed.
 - c. Antiplugging Relays: Time delay when transferring from FORWARD to REVERSE and back.
 - D. Overload Relays:
 - 1. Melting-Alloy Overload Relays:
 - a. Inverse-time-current characteristic.
 - b. **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c. Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - 2. Bimetallic Overload Relays:
 - a. Inverse-time-current characteristic.
 - b. **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c. Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - d. Ambient compensated.
 - e. Automatic resetting.
 - 3. Solid-State Overload Relays:
 - a. Switch or dial selectable for motor-running overload protection.
 - b. Sensors in each phase.
 - c. **[Class 10][Class 20][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
 - d. UL 1053 Class II ground-fault protection, with start and run delays to prevent nuisance trip on starting.
 - e. Analog communication module.
 - 4. **[NC][NO]** isolated overload alarm contact.
 - 5. External overload reset push button.
- 2.9 REDUCED-VOLTAGE SOLID-STATE CONTROLLERS
- A. Controller Units: An integrated unit with disconnects, power SCRs, heat sink, microprocessor logic board, door-mounted digital display and keypad, bypass contactor, and overload relays. Comply with UL 508.
 - 1. Suitable for use with NEMA MG 1 Design B, polyphase induction motors.
 - 2. **<Insert special applications>**.
 - B. Disconnects:

1. Fusible Switch:
 - a. UL 98 and NEMA KS 1, heavy-duty, horsepower-rated fusible switch, with clips or bolt pads to accommodate **[UL 248-8 Class J][UL 248-10 Class L]<Insert class>** fuses.
 - b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c. Auxiliary Contacts: **[NC][NO]**, arranged to activate before switch blades open.
2. MCP:
 - a. UL 489, with interrupting capacity complying with available fault currents, instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
 - b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c. Auxiliary contacts "a" and "b" arranged to activate with MCP handle.
 - d. **[NC][NO]** alarm contact that operates only when MCP has tripped.
 - e. Current-limiting module to increase controller short-circuit current (withstand) rating to 100 kA.
3. MCCB:
 - a. UL 489, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.
 - b. Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
 - c. Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - d. Auxiliary contacts "a" and "b" arranged to activate with MCCB handle.
 - e. **[NC][NO]** alarm contact that operates only when MCCB has tripped.
4. Molded-Case Switch:
 - a. UL 489, with in-line fuse block for **[UL 248-8 Class J][UL 248-10 Class L]** power fuses (depending on ampere rating), providing an interrupting capacity to comply with available fault currents; MCCB with fixed, high-set instantaneous trip only.
 - b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c. Auxiliary contacts "a" and "b" arranged to activate with molded-case switch handle.
 - d. **[NC][NO]** alarm contact that operates only when molded-case switch has tripped.
- C. Configuration: **[Standard][Severe]** duty; **[nonreversible][reversible]**.
- D. Starting Mode: **[Voltage ramping][Current limit][Torque control][Torque control with voltage boost][; field selectable]**.
- E. Stopping Mode: **[Coast to stop][Adjustable torque deceleration][Adjustable braking][; field selectable]**.
- F. Bypass Controller: Operates automatically to bypass the SCRs when the motor has reached rated speed and full voltage is applied to motor. Solid-state controller protective features shall remain active when the bypass relay is in the bypass mode.
 1. Bypass Contactor: **[Manufacturer's standard product][or][NEMA ICS 2, general-purpose, Class A contactor, rated to start the load across the line][, as indicated on Drawings]**.
 2. Bypass Contactor Coils: Pressure-encapsulated type; manufacturer's standard operating voltage, matching control power or line voltage, depending on contactor size and line-voltage rating.

- G. Acceleration Control: Adjustable, using voltage or current ramp, and adjustable starting torque control with up to **[400]<Insert number>** percent current limitation for 20 seconds.
- H. SCR Bridge: At least two SCRs per phase, for stable and smooth acceleration **[with][without]** external feedback from the motor or driven equipment.
- I. Keypad: Front accessible; for programming the controller parameters, functions, and features; shall be manufacturer's standard and include not less than the following functions:
 - 1. Adjusting motor full-load amperes, as a percentage of the controller's rating.
 - 2. Adjusting current limitation on starting, as a percentage of the motor full-load current rating.
 - 3. Adjusting linear acceleration and deceleration ramps, in seconds.
 - 4. Setting initial torque, as a percentage of the nominal motor torque.
 - 5. Adjusting torque limit, as a percentage of the nominal motor torque.
 - 6. Adjusting maximum start time, in seconds.
 - 7. Adjusting voltage boost, as a percentage of the nominal supply voltage.
 - 8. Selecting stopping mode and adjusting parameters.
 - 9. Selecting motor thermal-overload protection class between 5 and 30.
 - 10. Activating and deactivating protection modes.
 - 11. Selecting or activating communications modes.
 - 12. **<Insert function>**.
- J. Digital Display: Front accessible; for showing motor, controller, and fault status; shall be manufacturer's standard and include not less than the following:
 - 1. Controller Condition: Ready, starting, running, stopping.
 - 2. Motor Condition: Amperes, voltage, power factor, power, and thermal state.
 - 3. Fault Conditions: Controller thermal fault, motor overload alarm and trip, motor underload, overcurrent, shorted SCRs, line or phase loss, phase reversal, and line frequency over or under normal.
 - 4. **<Insert items>**.
- K. Controller Diagnostics and Protection:
 - 1. Microprocessor-based thermal protection system for monitoring SCR and motor thermal characteristics, and providing controller overtemperature and motor overload alarm and trip; settings selectable via the keypad.
 - 2. Protection from line-side reverse phasing; line-side and motor-side phase loss; motor jam, stall, and underload conditions; and line frequency excursions to over- or under-normal. Accomplish protection by the following:
 - a. Input isolation contactor that opens when the controller diagnostics detect a faulted solid-state component, or when the motor is stopped.
 - b. Shunt trip that opens the disconnecting means when the controller diagnostics detect a faulted solid-state component.
 - c. **<Insert items>**.
- L. Remote Output Features:
 - 1. All outputs prewired to terminal blocks.
 - 2. Form C status contacts that change state when controller is running.
 - 3. Form C alarm contacts that change state when a fault condition occurs.
 - 4. **<Insert items>**.
- M. Overload Relays:

1. Melting-Alloy Overload Relays:
 - a. Inverse-time-current characteristic.
 - b. **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c. Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
2. Bimetallic Overload Relays:
 - a. Inverse-time-current characteristic.
 - b. **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c. Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - d. Ambient compensated.
 - e. Automatic resetting.
3. Solid-State Overload Relays:
 - a. Switch or dial selectable for motor-running overload protection.
 - b. Sensors in each phase.
 - c. **[Class 10][Class 20][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
 - d. UL 1053, Class II ground-fault protection, with start and run delays to prevent nuisance trip on starting.
 - e. Analog communication module.

N. Optional Features:

1. Analog output for field-selectable assignment of motor operating characteristics; **[0- to 10-V dc][4- to 20-mA dc]**.
2. **[Two]<Insert number>** additional field-assignable Form C contacts for alarm outputs.
3. Full-voltage/BYPASS selector switch. Power contacts shall be totally enclosed, double break, made of silver-cadmium oxide, and assembled to allow inspection and replacement without disturbing line or load wiring.

2.10 VFC

- A. Controller Units: Combination controllers, consisting of variable-frequency power converter that is factory packaged in an enclosure, with integral disconnecting means and overcurrent and overload protection; listed and labeled by an NRTL as a complete unit; arranged for self-protection, protection, and variable-speed control of one or more three-phase induction motors by adjusting output voltage and frequency. Comply with NEMA ICS 7, NEMA ICS 61800-2, UL 508C, and **[UL 508E]<Insert standard>**.

1. Units suitable for operation of NEMA MG 1, Design A and Design B motors as defined by NEMA MG 1, Section IV, Part 30, "Application Considerations for Constant Speed Motors Used on a Sinusoidal Bus with Harmonic Content and General Purpose Motors Used with Adjustable-Voltage or Adjustable-Frequency Controls or Both."
2. Units suitable for operation of inverter-duty motors as defined by NEMA MG 1, Section IV, Part 31, "Definite-Purpose Inverter-Fed Polyphase Motors."
3. Listed and labeled for integrated short-circuit current (withstand) rating by an NRTL acceptable to authorities having jurisdiction.
4. Listed and labeled for single-phase use by an NRTL acceptable to authorities having jurisdiction.

- B. Disconnects:

1. Fusible Switch:
 - a. UL 98 and NEMA KS 1, heavy-duty, horsepower-rated fusible switch, with clips or bolt pads to accommodate **[UL 248-8 Class J][UL 248-10 Class L]<Insert class>** fuses.
 - b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c. Auxiliary Contacts: **[NC][NO]**, arranged to activate before switch blades open.
2. MCP:
 - a. UL 489, with interrupting capacity complying with available fault currents, instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
 - b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c. Auxiliary contacts "a" and "b" arranged to activate with MCP handle.
 - d. **[NC][NO]** alarm contact that operates only when MCP has tripped.
 - e. Current-limiting module to increase controller short-circuit current (withstand) rating to 100 kA.
3. MCCB:
 - a. UL 489, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.
 - b. Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
 - c. Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - d. Auxiliary contacts "a" and "b" arranged to activate with MCCB handle.
 - e. **[NC][NO]** alarm contact that operates only when MCCB has tripped.
4. Molded-Case Switch:
 - a. UL 489, with in-line fuse block for **[UL 248-8 Class J][UL 248-10 Class L]** power fuses (depending on ampere rating), providing an interrupting capacity to comply with available fault currents; MCCB with fixed, high-set instantaneous trip only.
 - b. Lockable Handle: For three padlocks and interlocks with cover in closed position.
 - c. Auxiliary contacts "a" and "b" arranged to activate with molded-case switch handle.
 - d. **[NC][NO]** alarm contact that operates only when molded-case switch has tripped.
5. Disconnect Rating:
 - a. Not less than 115 percent of VFC input current rating.
 - b. Not less than 115 percent of NFPA 70 motor full-load current rating or VFC input current rating, whichever is larger.
6. Auxiliary Contacts: **[NC][NO]**, arranged to activate before switch blades open.
7. Auxiliary contacts "a" and "b" arranged to activate with circuit-breaker handle.
8. **[NC][NO]** alarm contact that operates only when circuit breaker has tripped.

C. Operating Requirements:

1. Input AC Voltage Tolerance: Plus 10 and minus **[10][15]** percent of VFC input voltage rating.
2. Input AC Voltage Unbalance: Not exceeding **[3][5]** percent.
3. Input Frequency Tolerance: Plus or minus 3 percent of VFC frequency rating.
4. Minimum Efficiency: **[96][97]<Insert number>** percent at 60 Hz, full load.
5. Minimum Displacement Primary-Side Power Factor: **[96][98]<Insert number>** percent under any load or speed condition.

6. Overload Capability:
 - a. For variable-torque controllers, 1.1 times the base load current for 60 seconds; minimum of 1.8 times the base load current for three seconds.
 - b. For constant-torque controllers, 1.5 times the base load current for 60 seconds; minimum of 1.8 times the base load current for three seconds.
7. Starting Torque: Minimum of 100 percent of rated torque from 3 to 60 Hz.
8. Speed Regulation: Plus or minus **[5][10]** percent.
9. Output Carrier Frequency: Field selectable.
10. Stop Modes: Programmable; includes fast, free-wheel, and dc injection braking.
11. Internal Adjustability Capabilities:
 - a. Minimum Speed: 5 to 25 percent of maximum rpm.
 - b. Maximum Speed: 80 to 100 percent of maximum rpm.
 - c. Acceleration: **[0.1 to 999.9]<Insert range>** seconds.
 - d. Deceleration: **[0.1 to 999.9]<Insert range>** seconds.
 - e. Current Limit: 30 to a minimum of 150 percent of maximum rating.
 - f. **<Insert adjustment and parameters>**.
12. Self-Protection and Reliability Features:
 - a. Input transient protection by means of SPDs for three-phase protection against damage from supply voltage surges 10 percent or more above nominal line voltage.
 - b. Loss of Input Signal Protection: Selectable response strategy including speed default to a percent of the most recent speed, a preset speed, or stop; with alarm.
 - c. Under- and overvoltage trips.
 - d. Inverter overcurrent trips.
 - e. VFC and Motor Overload/Overtemperature Protection: Microprocessor-based thermal protection system for monitoring VFCs and motor thermal characteristics, and for providing VFC overtemperature and motor overload alarm and trip; settings selectable via the keypad; NRTL approved and listed and labeled by an NRTL.
 - f. Critical frequency rejection, with **[three]<Insert number>** selectable, adjustable deadbands.
 - g. Instantaneous line-to-line and line-to-ground overcurrent trips.
 - h. Loss-of-phase protection.
 - i. Reverse-phase protection.
 - j. Short-circuit protection.
 - k. Motor overtemperature fault.
 - l. **<Insert additional protection or reliability feature>**.
13. Torque Boost: Automatically varies starting and continuous torque to at least 1.5 times the minimum torque to ensure high-starting torque and increased torque at slow speeds.
14. Motor Temperature Compensation at Slow Speeds: Adjustable current fall-back based on output frequency for temperature protection of self-cooled, fan-ventilated motors at slow speeds.

D. Operator Station:

1. Inverter Logic: Microprocessor based, **[16][32]** bit, isolated from all power circuits.
2. Isolated Control Interface: Allows VFCs to follow remote-control signal over a minimum 40:1 speed range.
3. Panel-mounted, manufacturer's standard front-accessible, sealed keypad and plain-English-language digital display; allows complete programming, program copying, operating, monitoring, and diagnostic capability.

- a. Keypad: In addition to required programming and control keys, include keys for HAND, OFF, and AUTO modes.
- b. Security Access: Electronic security access to controls through identification and password with at least three levels of access: View only; view and operate; and view, operate, and service.

E. Displays:

1. Historical Logging Information and Displays:
 - a. Real-time clock with current time and date.
 - b. Running log of total power versus time.
 - c. Total run time.
 - d. Fault log, maintaining last **[four]<Insert number>** faults with time and date stamp for each.
 - e. **<Insert information or display>**.
2. Indicating Devices: Digital display[**and additional readout devices as required,**] mounted flush in VFC door and connected to display VFC parameters including the following:
 - a. Output frequency (Hz).
 - b. Motor speed (rpm).
 - c. Motor status (running, stop, fault).
 - d. Motor current (amperes).
 - e. Motor torque (percentage).
 - f. Fault or alarming status (code).
 - g. PID feedback signal (percentage).
 - h. DC-link voltage (V dc).
 - i. Set-point frequency (Hz).
 - j. Motor output voltage (V ac).
 - k. **<Insert parameter>**.

F. Bypass Systems:

1. Bypass Operation: Safely transfers motor between power converter output and bypass circuit, manually, automatically, or both. Selector switches set modes, and indicator lights indicate mode selected. Unit is capable of stable operation (starting, stopping, and running) with motor completely disconnected from power converter.
2. Manual Bypass Mode: Manual operation only; requires local operator selection at VFC. Transfer between power converter and bypass contactor and retransfer shall only be allowed with the motor at zero speed.
3. Field-Selectable Bypass Mode: Field-selectable automatic or manual, allows local and remote transfer between power converter and bypass contactor and retransfer, either via manual operator interface or automatic control system feedback.
4. Two-Contactor Bypass Controller: Allows motor operation via the power converter or the bypass controller[; **with input isolating switch and barrier arranged to isolate the power converter and permit safe troubleshooting and testing, both energized and de-energized, while motor is operating in bypass mode**].
 - a. Bypass Contactor: Load-break, **[IEC][NEMA]**-rated contactor.
 - b. Output Isolating Contactor: Non-load-break, **[IEC][NEMA]**-rated contactor.
 - c. Isolating Switch: Non-load-break switch arranged to isolate power converter and permit safe troubleshooting and testing of the power converter, both energized and de-energized, while motor is operating in bypass mode; pad-lockable, door-mounted handle mechanism.
5. Three-Contactor Bypass Controller: Allows motor operation via the power converter or the bypass controller[; **with input isolating switch and barrier**] arranged to isolate the power converter

input and output and permit safe testing[**and troubleshooting**] of the power converter, both energized and de-energized, while motor is operating in bypass mode.

- a. Bypass Contactor: Load-break, **[IEC][NEMA]**-rated contactor.
 - b. Input and Output Isolating Contactors: Non-load-break, **[IEC][NEMA]**-rated contactors.
 - c. Isolating Switch: Non-load-break switch arranged to isolate power converter and permit safe troubleshooting and testing of the power converter, both energized and de-energized, while motor is operating in bypass mode; pad-lockable, door-mounted handle mechanism.
6. Bypass Contactor Classification: **[Full-voltage (across-the-line)][Reduced-voltage autotransformer, open transition][Reduced-voltage autotransformer, closed transition]<Insert type>** type.
 7. NORMAL/BYPASS selector switch.
 - a. HAND/OFF/AUTO selector switch.
 - b. NORMAL/TEST Selector Switch: Allows testing and adjusting of VFC while the motor is running in the bypass mode.
 - c. Contactor Coils: Pressure-encapsulated type[**with coil transient suppressors**].
 - 1) Operating Voltage: Depending on contactor NEMA size and line-voltage rating, manufacturer's standard matching control power or line voltage.
 - 2) Power Contacts: Totally enclosed, double break, and silver-cadmium oxide; assembled to allow inspection and replacement without disturbing line or load wiring.
 8. Overload Relays: NEMA ICS 2.
 - a. Melting-Alloy Overload Relays:
 - 1) Inverse-time-current characteristic.
 - 2) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - 3) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - b. Bimetallic Overload Relays:
 - 1) Inverse-time-current characteristic.
 - 2) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - 3) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - 4) Ambient compensated.
 - 5) Automatic resetting.
 - c. Solid-State Overload Relays:
 - 1) Switch or dial selectable for motor-running overload protection.
 - 2) Sensors in each phase.
 - 3) **[Class 10][Class 20][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
 - 4) Class II ground-fault protection, with start and run delays to prevent nuisance trip on starting.
 - 5) Analog communication module.
 - d. **[NC][NO]** isolated overload alarm contact.
 - e. External overload reset push button.

- G. Automatic Reset/Restart: Attempt three restarts after drive fault or on return of power after an interruption and before shutting down for manual reset or fault correction; adjustable delay time between restart attempts.
- H. Power-Interruption Protection: To prevent motor from re-energizing after a power interruption until motor has stopped, unless "Bidirectional Autospeed Search" feature is available and engaged.
- I. Bidirectional Autospeed Search: Capable of starting VFC into rotating loads spinning in either direction and returning motor to set speed in proper direction, without causing damage to drive, motor, or load.
- J. Firefighter's Override (Smoke Purge) Input: On a remote contact closure from **[the firefighter's control station][smoke-control fan controller]<Insert location>**, the following password-protected input:
 - 1. Overrides all other local and external inputs (analog/digital, serial communication, and all keypad commands).
 - 2. Forces VFC to operate motor, without any other run or speed command, at a field-adjustable, preset speed.
 - 3. Forces VFC to transfer to bypass mode and operate motor at full speed.
 - 4. Causes display of override mode on the VFC display.
 - 5. Reset VFC to normal operation on removal of override signal **[automatically][manually]**.
- K. Communication Port: **[Ethernet][RS-232 port][USB 2.0 port]** or equivalent connection Capable of connecting a printer **[and a notebook computer]**.
- L. **<Insert feature>**.

2.11 CONTROLLER-MOUNTED AUXILIARY DEVICES

- A. Control-Circuit and Pilot Devices: Factory installed in controller enclosure cover unless otherwise indicated. Comply with NEMA ICS 5.
 - 1. Push Buttons, Pilot Lights, and Selector Switches: **[Heavy][Standard]**-duty, **[oiltight]** type.
 - a. Push Buttons: **[Covered][Lockable][Recessed][Shielded][Shrouded][Unguarded]** types; **[maintained][momentary]** contact unless otherwise indicated.
 - b. Pilot Lights: **[LED][Resistor][Transformer]** types; **<Insert color(s)>; push to test**.
 - c. Selector Switches: **[Rotary]<Insert description>** type.
- B. Elapsed-Time Meters: Heavy duty with digital readout in hours; **nonresettable**; **resettable**.
- C. Meters: Panel type, **2-1/2-inch (64-mm)** minimum size with 90- or 120-degree scale and plus or minus 2 percent accuracy, with selector switches having an off position.
- D. Auxiliary Dry Contacts: **[NC][NO][Reversible NC/NO]**.
- E. Control Relays:
 - 1. Time Delay: Auxiliary and adjustable **[pneumatic][solid-state]** time-delay relays.
 - 2. Phase-Failure, Phase-Reversal, and Undervoltage and Overvoltage Relays: Solid-state sensing circuit with isolated output contacts for hard-wired connections and adjustable undervoltage, overvoltage, and time-delay settings.
 - 3. **<Insert control device>**.

2.12 MEASUREMENT AND CONTROL DEVICES

- A. Instrument Transformers: IEEE C57.13, NEMA EI 21.1, and the following:
1. PTs: IEEE C57.13; 120 V, 60 Hz, **[single][tapped][double]** secondary; disconnecting type with integral fuse mountings. Burden and accuracy shall be consistent with connected metering and relay devices.
 2. Current Transformers: IEEE C57.13; 5 A, 60 Hz, secondary; **[wound][bushing][bar or window]** type; **[single][double]** secondary winding and secondary shorting device. Burden and accuracy shall be consistent with connected metering and relay devices.
 3. CPTs: Dry type, mounted in separate compartments for units larger than 3 kVA.
 4. Current Transformers for Neutral and Ground-Fault Current Sensing: Connect secondary wiring to ground overcurrent relays, via shorting terminals, for selective tripping of main and tie circuit breaker. Coordinate with feeder circuit-breaker and ground-fault protection.
- B. Multifunction Digital-Metering Monitor: Microprocessor-based unit suitable for three- or four-wire systems and with the following features:
1. Listed or recognized by a nationally recognized testing laboratory.
 2. Inputs from sensors or 5-A current-transformer secondaries, and potential terminals rated to 600 V.
 3. Switch-selectable digital display of the following values with the indicated maximum accuracy tolerances:
 - a. Phase Currents, Each Phase: Plus or minus 1 percent.
 - b. Phase-to-Phase Voltages, Three Phase: Plus or minus 1 percent.
 - c. Phase-to-Neutral Voltages, Three Phase: Plus or minus 1 percent.
 - d. Three-Phase Real Power (Megawatts): Plus or minus 2 percent.
 - e. Three-Phase Reactive Power (Megavars): Plus or minus 2 percent.
 - f. Power Factor: Plus or minus 2 percent.
 - g. Frequency: Plus or minus 0.5 percent.
 - h. Accumulated Energy, Megawatt Hours: Plus or minus 2 percent; accumulated values unaffected by power outages up to 72 hours.
 - i. Megawatt Demand: Plus or minus 2 percent; demand interval programmable from 5 to 60 minutes.
 - j. Contact devices to operate remote impulse-totalizing demand meter.
 4. Mounting: Display and control unit flush or semiflush mounted in instrument compartment door.
- C. Ammeters, Voltmeters, and Power-Factor Meters: ANSI C39.1. **4-inch (100-mm)** diameter or **6 inches (150 mm)** square, flush or semiflush, with antiparallax 250-degree scale and external zero adjustment.
1. Voltmeters: Cover an expanded-scale range of nominal voltage plus 10 percent.
 2. Feeder Ammeters: **2-1/2-inch (64-mm)** minimum size with 90- or 120-degree scale. Meter and transfer device with off position, located on overcurrent device door for feeder circuits, unless otherwise indicated.
- D. Instrument Switches: Rotary type with off position.
1. Voltmeter Switches: Permit reading of all phase-to-phase voltages and phase-to-neutral voltages where a neutral is included.
 2. Ammeter Switches: Permit reading of current in each phase and maintain current-transformer secondaries in a closed-circuit condition at all times.
- E. Watt-Hour Meters and Wattmeters:

1. Comply with ANSI C12.1.
2. Three-phase induction type with two stators, each with current and potential coil, rated 5 A, 120 V, 60 Hz.
3. Suitable for connection to three- and four-wire circuits.
4. Potential indicating lamps.
5. Adjustments for light and full load, phase balance, and power factor.
6. Four-dial clock register.
7. Integral demand indicator.
8. Contact devices to operate remote impulse-totalizing demand meter.
9. Ratchets to prevent reverse rotation.
10. Removable meter with drawout test plug.
11. Semiflush mounted case with matching cover.
12. Appropriate multiplier tag.

F. Impulse-Totalizing Demand Meter:

1. Comply with ANSI C12.1.
2. Suitable for use with MCC watt-hour meter, including two-circuit totalizing relay.
3. Cyclometer.
4. Four-dial, totalizing kilowatt-hour register.
5. Positive chart drive mechanism.
6. Capillary pen holding a minimum of one month's ink supply.
7. Roll chart with minimum 31-day capacity; appropriate multiplier tag.
8. Capable of indicating and recording **[five][15][30]<Insert time>**-minute integrated demand of totalized system.

G. Control Power Fuses: Primary and secondary fuses for current-limiting and overload protection of transformer and fuses for protection of control circuits.

2.13 FEEDER TAP UNITS

A. MCCBs (to 1200 A): Fixed mounted, with inverse time-current element for low-level overloads and instantaneous magnetic trip element for short circuits. Adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger. Comply with UL 489, and NEMA AB 3, with interrupting capacity to comply with available fault currents.

1. Adjustable, Instantaneous-Trip Circuit Breakers: Magnetic trip element with front-mounted, field-adjustable trip setting.
2. Electronic Trip Circuit Breakers: Field-replaceable rating plug, rms sensing, with the following field-adjustable settings:
 - a. Instantaneous trip.
 - b. Long- and short-time pickup levels.
 - c. Long- and short-time time adjustments.
 - d. Ground-fault pickup level, time delay, and I₂t response.
3. Communication Capability: **[Circuit-breaker-mounted][Universal-mounted][Integral][Din-rail-mounted]** communication module with functions and features compatible with power monitoring and control system specified in Section 260913 "Electrical Power Monitoring and Control."
4. With built-in digital ammeter and a digital display, showing tripping cause.
5. Shunt Trip: Trip coil energized from separate circuit, with coil-clearing contact.
6. Undervoltage Trip: Set to operate at 35 to 75 percent of rated voltage without intentional time delay.
7. Auxiliary Contacts: **[One SPDT switch][Two SPDT switches]** with "a" and "b" contacts; "a" contacts mimic circuit-breaker contacts, "b" contacts operate in reverse of circuit-breaker

- contacts.
- 8. Alarm Switch: One **[NC][NO]** contact that operates only when circuit breaker has tripped.
- 9. Key Interlock Kit: Externally mounted to prohibit circuit-breaker operation; key shall be removable only when circuit breaker is in off position.
- 10. Zone-Selective Interlocking: Integral with **[electronic][ground-fault]** trip unit; for interlocking ground-fault protection function.
- 11. Electrical Operator: Remote control for on, off, and reset operations.

B. Fusible Switches (to 600 A): Fixed-mounted, manually operated, **[electrically tripped]**, fusible, quick-make, quick-break switch with 200-kA interrupting and short-circuit current rating when fitted with UL 248-8 Class J fuses. Comply with UL 98.

- 1. Indication whether the switch is open or closed, and provisions for padlocking the operating handle.
- 2. Include fuse clips and fuses.
- 3. Electrically tripped switches shall include the following:
 - a. Shunt trip.
 - b. Ground-fault protection, with adjustable time delay and test panel.
 - c. Single-phase protection, tripping the switch on loss of a source phase.
 - d. Blown fuse protection, tripping the switch on a blown fuse, with blown fuse indication.

2.14 PANELBOARDS

- A. Comply with NEMA PB 1.
- B. Branch OCPDs for Circuit-Breaker Frame Sizes 125 A and Smaller: **[Plug-in][Bolt-on]** circuit breakers.
- C. Branch OCPDs for Circuit-Breaker Frame Sizes Larger Than 125 A: Bolt-on circuit breakers; or plug-in circuit breakers where individual positive-locking device requires mechanical release for removal.
- D. Contactors in Main Bus: NEMA ICS 2, Class A, **[electrically][mechanically]** held, general-purpose controller, with same short-circuit interrupting rating as panelboard.
- E. Accessory Control Power Voltage: Integrally mounted, self-powered, **<Insert number> [Remote mounted and powered]**.

2.15 TRANSFORMERS

- A. Factory-assembled and -tested, air-cooled, two-winding, low-voltage dry-type transformers; with primary circuit breaker. Comply with NEMA ST 20.
- B. Taps for Transformers Smaller Than 3 kVA: **[None][One 5 percent tap above normal full capacity]**.
- C. Taps for Transformers 7.5 to 24 kVA: **[One 5 percent tap above and one 5 percent tap below normal full capacity][Two 5 percent taps below rated voltage]**.
- D. Taps for Transformers 25 kVA and Larger: **[Two 2.5 percent taps above and two 2.5 percent taps below normal full capacity][Two 2.5 percent taps above and four 2.5 percent taps below normal full capacity]**.
- E. Insulation Class: 220 deg C, UL-component-recognized insulation system with a maximum of

[150][115][80] deg C rise above 40 deg C ambient temperature.

F. Energy Efficiency for Transformers Rated 15 kVA and Larger:

1. Complying with NEMA TP 1, Class 1 efficiency levels.
2. Tested according to NEMA TP 2.

2.16 TRANSFER SWITCHES

- A. Factory-assembled and -tested, open-transition transfer switches. The transfer switch shall comply with UL 1008[**and be listed and labeled by a qualified testing agency**].
- B. Comply with NEMA ST 20.
- C. Indicated Current Ratings: Apply as defined in UL 1008 for continuous loading and total system transfer, including tungsten filament lamp loads not exceeding 30 percent of switch ampere rating, unless otherwise indicated.
- D. Tested Fault-Current Closing and Withstand Ratings: Adequate for duty imposed by protective devices at installation locations in Project under the fault conditions indicated, based on testing according to UL 1008.
1. Where transfer switch includes internal fault-current protection, rating of switch and trip unit combination shall exceed indicated fault-current value at installation location.
- E. Solid-State Controls: Repetitive accuracy of all settings shall be plus or minus 2 percent or better over an operating temperature range of minus 20 to plus 70 deg C.
- F. Resistance to Damage by Voltage Transients: Components shall meet or exceed voltage-surge withstand capability requirements when tested according to IEEE C62.41.1. Components shall meet or exceed voltage-impulse withstand test of NEMA ICS 1.
- G. Electrical Operation: Accomplish by a nonfused, momentarily energized solenoid or electric-motor-operated mechanism, mechanically and electrically interlocked in both directions.
- H. Switch Characteristics: Designed for continuous-duty repetitive transfer of full-rated current between active power sources.
1. Limitation: Switches using molded-case switches or circuit breakers or insulated-case circuit-breaker components are unacceptable.
 2. Switch Action: Double throw; mechanically held in both directions.
 3. Contacts: Silver composition or silver alloy for load-current switching. Conventional automatic transfer-switch units, rated 225 A and higher, shall have separate arcing contacts.
- I. Neutral Switching. Where four-pole switches are indicated, equip with **[neutral pole switched simultaneously with phase poles][overlapping neutral contacts]**.
- J. Neutral Terminal: Solid and rated the same as the neutral bus.
- K. Oversize Neutral: Ampacity and switch rating of neutral path through units indicated for oversize neutral shall be double the nominal rating of circuit in which switch is installed.
- L. Annunciation, Control, and Programming Interface Components: Devices at transfer switches for communicating with remote programming devices, annunciators, or annunciator and control panels shall

have communication capability matched with remote device.

2.17 SOURCE QUALITY CONTROL

- A. MCC Testing: Test and inspect MCCs according to requirements in **[NEMA ICS 18]<Insert standard>**.
- B. VFC Testing: Test and inspect VFCs according to requirements in **[NEMA ICS 61800-2]<Insert standard>**.
 - 1. Test each VFC while connected to **[its specified motor][a motor that is comparable to that for which the VFC is rated]**.
 - 2. Verification of Performance: Rate VFCs according to operation of functions and features specified.
- C. MCCs will be considered defective if they do not pass tests and inspections.
- D. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and surfaces to receive MCCs, with Installer present, for compliance with requirements for installation tolerances, **<Insert Project-specific conditions,>** and other conditions affecting performance of the Work.
- B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

- A. NEMA Industrial Control and Systems Standards: Comply with parts of NEMA ICS 2.3 for installation and startup of MCCs.
- B. Floor Mounting: Install MCCs on **4-inch (100-mm)** nominal-thickness concrete base. Comply with requirements for concrete base specified in Section 033000 "Cast-in-Place Concrete."
 - 1. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on **18-inch (450-mm)** centers around the full perimeter of concrete base.
 - 2. For supported equipment, install epoxy-coated anchor bolts that extend through concrete base and anchor into structural concrete floor.
 - 3. Place and secure anchorage devices. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
 - 4. Install anchor bolts to elevations required for proper attachment to supported equipment.
- C. Seismic Bracing: Comply with requirements specified in Section 260548.16 "Seismic Controls for Electrical Systems."
- D. Temporary Lifting Provisions: Remove temporary lifting eyes, channels, and brackets and temporary blocking of moving parts from enclosures and components.

- E. Install fuses in each fusible switch.
- F. Install fuses in control circuits if not factory installed. Comply with requirements in Section 262813 "Fuses."
- G. Install heaters in thermal-overload relays. Select heaters based on actual nameplate full-load amperes after motors have been installed.
- H. Install, connect, and fuse thermal-protector monitoring relays furnished with motor-driven equipment.
- I. Install power factor correction capacitors. Connect to the **[line][load]** side of overload relays. If connected to the load side of overload relays, adjust overload heater sizes to accommodate the reduced motor full-load currents.
- J. Comply with NECA 1.

3.3 IDENTIFICATION

- A. Comply with requirements in Section 260553 "Identification for Electrical Systems" for identification of MCC, MCC components, and control wiring.
 - 1. Identify field-installed conductors, interconnecting wiring, and components.
 - 2. Install required warning signs.
 - 3. Label MCC and each cubicle with engraved nameplate.
 - 4. Label each enclosure-mounted control and pilot device.
 - 5. Mark up a set of manufacturer's connection wiring diagrams with field-assigned wiring identifications and return to manufacturer for inclusion in Record Drawings.
- B. Operating Instructions: Frame printed operating instructions for MCCs, including control sequences and emergency procedures. Fabricate frame of finished metal, and cover instructions with clear acrylic plastic. Mount on front of MCCs.

3.4 INSTALLATION OF CONTROL WIRING

- A. Install wiring between **[enclosed controllers][master terminal boards]** and remote devices **[and facility's BAS][and facility's central-control system]**. Comply with requirements in Section 260523 "Control-Voltage Electrical Power Cables."
- B. Bundle, train, and support wiring in enclosures.
- C. Connect selector switches and other automatic-control selection devices where applicable.
 - 1. Connect selector switches to bypass only those manual- and automatic-control devices that have no safety functions when switch is in manual-control position.
 - 2. Connect selector switches within enclosed controller circuit in both manual and automatic positions for safety-type control devices such as low- and high-pressure cutouts, high-temperature cutouts, and motor overload protectors.

3.5 CONNECTIONS

- A. Comply with requirements for installation of conduit in Section 260533.13 "Conduits for Electrical Systems." Drawings indicate general arrangement of conduit, fittings, and specialties.

- B. Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."

3.6 FIELD QUALITY CONTROL

- A. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to perform tests and inspections.
- B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
- C. Perform tests and inspections **[with the assistance of a factory-authorized service representative]**.
- D. Acceptance Testing Preparation:
 - 1. Test insulation resistance for each enclosed controller, component, connecting supply, feeder, and control circuit.
 - 2. Test continuity of each circuit.
- E. Tests and Inspections:
 - 1. Perform each visual and mechanical inspection and electrical test stated in NETA Acceptance Testing Specification. Certify compliance with test parameters.
 - 2. Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation.
 - 3. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
 - 4. Perform the following infrared (thermographic) scan tests and inspections and prepare reports:
 - a. Initial Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform an infrared scan of each multipole enclosed controller. Remove front panels so joints and connections are accessible to portable scanner.
 - b. Follow-up Infrared Scanning: Perform an additional follow-up infrared scan of each multipole enclosed controller 11 months after date of Substantial Completion.
 - c. Instruments and Equipment: Use an infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Submit calibration record for device.
 - 5. Test and adjust controls, remote monitoring, and safeties. Replace damaged and malfunctioning controls and equipment.
 - 6. Mark up a set of manufacturer's drawings with all field modifications incorporated during construction and return to manufacturer for inclusion in Record Drawings.
- F. MCCs will be considered defective if they do not pass tests and inspections.
- G. Prepare test and inspection reports.

3.7 STARTUP SERVICE

- A. **[Engage a factory-authorized service representative to perform][Perform]** startup service.
 - 1. Complete installation and startup checks according to NETA Acceptance Testing Specification and manufacturer's written instructions.

2. <Insert startup steps if any>.

3.8 ADJUSTING

- A. Set field-adjustable switches, auxiliary relays, time-delay relays, timers, and overload relay pickup and trip ranges.
- B. Adjust overload relay heaters or settings if power factor correction capacitors are connected to the load side of the overload relays.
- C. Adjust the trip settings of MCPs and thermal-magnetic circuit breakers with adjustable, instantaneous trip elements. Initially adjust to six times the motor nameplate full-load amperes and attempt to start motors several times, allowing for motor cool-down between starts. If tripping occurs on motor inrush, adjust settings in increments until motors start without tripping. Do not exceed eight times the motor full-load amperes (or 11 times for NEMA Premium Efficient motors if required). Where these maximum settings do not allow starting of a motor, notify **[Architect][Construction Manager][Owner]** before increasing settings.
- D. Set the taps on reduced-voltage autotransformer controllers at **[50][65][80]** percent.
- E. Set field-adjustable switches and program microprocessors for required start and stop sequences in reduced-voltage, solid-state controllers.
- F. Program microprocessors in VFCs for required operational sequences, status indications, alarms, event recording, and display features. Clear events memory after final acceptance testing and prior to Substantial Completion.
- G. Set field-adjustable circuit-breaker trip ranges **[as specified in Section 260573.16 "Coordination Studies."]**

3.9 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain enclosed controllers **[, and to use and reprogram microprocessor-based, reduced-voltage, solid-state controllers].**

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 25 00 00 - LOW-VOLTAGE ENCLOSED BUS ASSEMBLIES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Enclosed bus assemblies.
2. Plug-in devices.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 ACTION SUBMITTALS

A. Shop Drawings: For each type of product.

1. Show fabrication and installation details for enclosed bus assemblies. Include plans, elevations, and sections of components. Designate components and accessories, including clamps, brackets, hanger rods, connectors, straight lengths, and fittings.
2. Show fittings, materials, fabrication, and installation methods for **[listed firestop barriers][and][weather barriers]**.
3. Indicate required clearances, method of field assembly, and location and size of each field connection.
4. Detail connections to switchgear, switchboards, transformers, and panelboards.
5. Cable and conductor terminal sizes for bus and plug-in device terminations.
6. Wiring Diagrams: Power[**and signal**][**and control**][, **signal, and control**] wiring.

B. Delegated Design Submittal: For seismic-restraint details, signed and sealed by a qualified structural professional engineer.

1. Include design calculations for selecting seismic restraints.
2. Detail fabrication, including anchorages and attachments to structure and to supported equipment.

1.3 INFORMATIONAL SUBMITTALS

A. Field quality-control reports.

1.4 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Plug-in Units: [10]<Insert number> percent of amount installed[**for each size indicated**], but no fewer than <Insert number> unit(s).

1.5 DELIVERY, STORAGE, AND HANDLING

- A. Deliver, store, and handle enclosed bus assemblies according to NEMA BU 1.1, "General Instructions for Handling, Installation, Operation, and Maintenance of Busway Rated 600 Volts or Less."

PART 2 - PRODUCTS

2.1 ASSEMBLY DESCRIPTIONS

- A. Source Limitations: Obtain enclosed bus assemblies[**and plug-in devices**] from single source from single manufacturer.
- B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
- C. Comply with UL 857.

2.2 PERFORMANCE REQUIREMENTS

- A. Delegated Design: Engage a qualified electrical professional engineer to design enclosed bus assemblies, plug-in devices, and components.

2.3 ENCLOSED BUS ASSEMBLIES

- A. Feeder-Bus Assemblies: Low-impedance bus assemblies in totally enclosed, nonventilated housing; single-bolt joints; ratings as indicated.

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [ABB, Electrification Business]
 - b. [EAE USA]
 - c. [Eaton]
 - d. [Siemens Industry, Inc., Energy Management Division]
 - e. [Square D; Schneider Electric USA]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [EAE USA]
 - c. [Eaton]

- d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
3. Seismic Fabrication Requirements: Fabricate mounting provisions and attachments for feeder-bus assemblies with reinforcement strong enough to withstand seismic forces defined in Section 260548.16 "Seismic Controls for Electrical Systems" when mounting provisions and attachments are anchored to building structure.
4. Electrical Characteristics:
- a. Voltage: **[120/208][240][480][277/480] V.**
 - b. Phase: Three; **[3 wire][4 wire]**.
 - c. Percent of Neutral Capacity: **[50][100][200]<Insert value>**.
5. Short-Circuit Interrupting Rating:
- a. For Bus Amperage of 800: 85 symmetrical kAIC.
 - b. For Bus Amperage of 1200: 100 symmetrical kAIC.
 - c. For Bus Amperage of 1600: 125 symmetrical kAIC.
 - d. For Bus Amperage of 2500: 150 symmetrical kAIC.
 - e. For Bus Amperage of 5000: 200 symmetrical kAIC.
6. Temperature Rise: 55 deg C above 40 deg C ambient maximum for continuous rated current.
7. Bus Materials: Current-carrying **[copper][aluminum]** conductors, fully insulated with Class 130C insulation except at joints; plated surface at joints.
8. Voltage Drop:
- a. Measure voltage drop at 30 deg C ambient with bus thermally stabilized at full rated load.
 - b. Three-phase, line-to-line voltage drop less than 3.1 V per **100 ft. (30.5 m)** at 40 percent power factor.
9. Ground: 50 percent capacity, **[integral with housing][internal bus bar of material matching bus material][isolated, internal bus bar of material matching bus material]**.
10. Enclosure: **[Steel][Aluminum]**, with manufacturer's standard finish.**[Weatherproof, sealed seams, drains, and removable closures.]**
11. Fittings and Accessories: Manufacturer's standard.
12. Firestop: Comply with UL 1479 firestop system, listed and labeled by an NRTL acceptable to authorities having jurisdiction for penetrations of fire-rated walls, ceilings, and floors.
13. Mounting: Arranged flat, edgewise, or vertically without derating. Rated for hanger spacing of up to **10 ft. (3 m)** for horizontally mounted runs and up to **16 ft. (5 m)** for vertically mounted runs.
14. Expansion Section: Manufacturer's standard expansion fitting for the provided busway with expansion capability to accommodate thermal expansion of bus and enclosure, and to accommodate movement across building expansion joints.
- B. Plug-in Bus Assemblies: Low-impedance bus assemblies in totally enclosed, nonventilated housing; single-bolt joints; ratings as indicated.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Siemens Industry, Inc., Energy Management Division]**
 - d. **[Square D; Schneider Electric USA]**

- e. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Eaton]
 - c. [Siemens Industry, Inc., Energy Management Division]
 - d. [Square D; Schneider Electric USA]
 - e. <Insert manufacturer's name>
 3. Electrical Characteristics:
 - a. Voltage: [120/208][240][480][277/480] V.
 - b. Phase: Three; [3 wire][4 wire].
 - c. Percent of Neutral Capacity: [100][200]<Insert value>.
 4. Short-Circuit Interrupting Rating:
 - a. For Bus Amperage of 800: 85 symmetrical kAIC.
 - b. For Bus Amperage of 1200: 100 symmetrical kAIC.
 - c. For Bus Amperage of 1600: 125 symmetrical kAIC.
 - d. For Bus Amperage of 2500: 150 symmetrical kAIC.
 - e. For Bus Amperage of 5000: 200 symmetrical kAIC.
 5. Temperature Rise: 55 deg C above 40 deg C ambient maximum for continuous rated current.
 6. Bus Materials: Current-carrying [copper][aluminum] conductors, fully insulated with Class 130C insulation except at stabs and joints; plated surface at stabs and joints.
 7. Ground: 50 percent capacity, [integral with housing][internal bus bar of material matching bus material][isolated, internal bus bar of material matching bus material].
 8. Enclosure: [Steel][Aluminum], with manufacturer's standard finish.
 9. Plug-in Openings: 24 inch (600 mm) on center on each side of bus, and hinged covers over unused openings. Plug-in openings must be finger-safe with covers open or closed.
 10. Fittings and Accessories: Manufacturer's standard.
 11. Firestop: Comply with UL 1479 firestop system, listed and labeled by an NRTL acceptable to authorities having jurisdiction for penetrations of fire-rated walls, ceilings, and floors.
 12. Mounting: Arranged flat, edgewise, or vertically without derating. Rated for hanger spacing of up to 10 ft. (3 m) for horizontally mounted runs and up to 16 ft. (5 m) for vertically mounted runs.
 13. Expansion Section: Manufacturer's standard expansion fitting for the provided busway with expansion capability to accommodate thermal expansion of bus and enclosure, and to accommodate movement across building expansion joints.
- C. Joints:
1. Busway joints must use one high-strength steel bolt with Belleville washers.
 2. Bolts must be torque indicating type and at ground potential.
 3. Bolts must be two-headed design to indicate when proper torque has been applied and require only a standard long handle wrench to be properly activated.
 4. Access must be required to only one side of the busway for tightening joint bolts.
 5. Joint connection assemblies must be removable without disturbing adjacent busway lengths.
 6. Joint connection assemblies that rely on the joint cover to provide ground continuity are unacceptable.

2.4 PLUG-IN DEVICES

- A. Fusible Switches: NEMA KS 1, heavy duty; with **[R-type rejection][J-type][L-type]** fuse clips to accommodate specified fuses; hookstick-operated handle, lockable with two padlocks, and interlocked with cover in closed position. Interlocked to prevent plug-in device insertion into or removal from bus with switch in closed position. See Section 262813 "Fuses" for fuses and fuse installation requirements.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Siemens Industry, Inc., Energy Management Division]**
 - c. **[Square D; Schneider Electric USA]**
 - d. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Siemens Industry, Inc., Energy Management Division]**
 - c. **[Square D; Schneider Electric USA]**
 - d. **<Insert manufacturer's name>**
- B. Molded-Case Circuit Breakers: UL 489; hookstick-operated handle, lockable with two padlocks, and interlocked with cover in closed position. Interlocked to prevent plug-in device insertion into or removal from bus with switch in closed position.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[NOARK Electric North America]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[NOARK Electric North America]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
- C. SPD: NEMA 250, Type 1 enclosure with NEMA KS 1, fusible, disconnect switch and external handle to isolate SPD from busway. SPD product and installation requirements are specified in Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Advanced Protection Technologies Inc. (APT)]**
 - c. **[ALLTEC LLC]**
 - d. **[Eaton]**
 - e. **[Emerson Electric Co., Automation Solutions]**
 - f. **[LEA International]**
 - g. **[Leviton Manufacturing Co., Inc.]**
 - h. **[Mersen USA]**
 - i. **[PowerLogics, Inc./PQ Protection]**
 - j. **[Schneider Electric USA, Inc.]**
 - k. **[Siemens Industry, Inc., Energy Management Division]**
 - l. **<Insert manufacturer's name>**

 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Advanced Protection Technologies Inc. (APT)]**
 - c. **[ALLTEC LLC]**
 - d. **[Eaton]**
 - e. **[Emerson Electric Co., Automation Solutions]**
 - f. **[LEA International]**
 - g. **[Leviton Manufacturing Co., Inc.]**
 - h. **[Mersen USA]**
 - i. **[PowerLogics, Inc./PQ Protection]**
 - j. **[Schneider Electric USA, Inc.]**
 - k. **[Siemens Industry, Inc., Energy Management Division]**
 - l. **<Insert manufacturer's name>**
- D. Motor Controllers: NEMA ICS 2, Class A, full voltage, nonreversing, across the line unless otherwise indicated.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[ABB, Motion Business]**
 - c. **[Cerus Industrial, Inc.]**
 - d. **[Eaton]**
 - e. **[Rockwell Automation, Inc.]**
 - f. **[Siemens Industry, Inc., Energy Management Division]**
 - g. **[Square D; Schneider Electric USA]**
 - h. **<Insert manufacturer's name>**

 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[ABB, Electrification Business]**
 - b. **[ABB, Motion Business]**
 - c. **[Cerus Industrial, Inc.]**
 - d. **[Eaton]**
 - e. **[Rockwell Automation, Inc.]**
 - f. **[Siemens Industry, Inc., Energy Management Division]**
 - g. **[Square D; Schneider Electric USA]**
 - h. **<Insert manufacturer's name>**
3. Control Circuit: 120 V; obtained from **[integral control power transformer]<Insert source of control power>** with a control power **[transformer][source]** of enough capacity to operate connected pilot, indicating and control devices, plus 100 percent spare capacity.
 4. Combination Controller: Factory-assembled combination controller and disconnect switch with or without overcurrent protection as indicated.
 - a. Fusible Disconnecting Means: NEMA KS 1, heavy-duty, fusible switch with **[R-type rejection][J-type]** fuse clips rated for fuses. Select and size fuses to provide Type 2 protection according to IEC 60947-4-1, as certified by an NRTL acceptable to authorities having jurisdiction. See Section 262813 "Fuses" for fuses and fuse installation requirements.
 - b. Circuit-Breaker Disconnecting Means: UL 489, motor-circuit protector with field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
 5. Overload Relay: Ambient-compensated type with inverse-time-current characteristic and NEMA ICS 2, **[Class 10][Class 20][Class 30]** tripping characteristic. Overload relays must have heaters or sensors in each phase matched to nameplate full-load current of specific motor to which they connect and with appropriate adjustment for duty cycle.
 6. Adjustable Overload Relay: Dipswitch selected for motor running overload protection with NEMA ICS 2, **[Class 10][Class 20][Class 30]** tripping characteristic, and selected to protect motor against voltage and current unbalance and single phasing. Adjustable overload relays must have Class II ground-fault protection with start and run delays to prevent nuisance trip on starting.
- E. Multispeed Magnetic Controllers: Match controller to motor type, application, and number of speeds.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**

- f. **[Square D; Schneider Electric USA]**
- g. **<Insert manufacturer's name>**

- 3. Compelling relay ensures motor starts only at low speed.
- 4. Accelerating relay ensures properly timed acceleration through speeds lower than that selected.
- 5. Decelerating relay ensures automatically timed deceleration through each speed.

- F. Accessories: Hookstick operator, adjustable to maximum extension of **[14 ft. (4.3 m)]<Insert dimension>**.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Coordinate layout and installation of enclosed bus assemblies and suspension system with other construction that penetrates ceilings or floors or is supported by them, including luminaires, HVAC equipment, fire-suppression system, and partition assemblies.
- B. Equipment Mounting:
 - 1. Install enclosed bus assemblies on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
 - 2. Coordinate size and location of concrete curbs around openings for vertical bus. Concrete, reinforcement, and formwork requirements are specified with concrete.
- C. Support bus assemblies independent of supports for other elements such as equipment enclosures at connections to panelboards and switchboards, pipes, conduits, ceilings, and ducts.
 - 1. Design each fastener and support to carry load indicated by seismic requirements and to comply with seismic-restraint details according to Section 260548.16 "Seismic Controls for Electrical Systems."
 - 2. Design each fastener and support to carry **200 lb (90 kg)** or 4 times the weight of bus assembly, whichever is greater.
 - 3. Support bus assembly to prevent twisting from eccentric loading.
 - 4. Support bus assembly with not less than **[3/8 inch (10 mm)]<Insert dimension>** steel rods. Install side bracing to prevent swaying or movement of bus assembly. Modify supports after completion to eliminate strains and stresses on bus bars and housings.
 - 5. Fasten supports securely to building structure according to Section 260529 "Hangers and Supports for Electrical Systems."
 - 6. Bolts and nuts that are loosened for any reason after tightening to manufacturer's recommended torque setting must be discarded and replaced with new bolts and nuts.
- D. Install expansion fittings at locations where bus assemblies cross building expansion joints. Install at other locations so distance between expansion fittings does not exceed manufacturer's recommended distance between fittings.
- E. Construct rated firestop assemblies where bus assemblies penetrate fire-rated elements such as walls, floors, and ceilings. Seal around penetrations according to Section 078413 "Penetration Firestopping."
- F. Install weatherseal fittings and flanges where bus assemblies penetrate exterior elements such as walls or roofs. Seal around openings to make weathertight. See Section 079200 "Joint Sealants" for materials and application.

- G. Coordinate bus-assembly terminations to equipment enclosures to ensure proper phasing, connection, and closure.
- H. Tighten bus-assembly joints with torque wrench or similar tool recommended by bus-assembly manufacturer. Tighten joints again after bus assemblies have been energized for 30 days.
- I. Install bus-assembly, plug-in units. Support connecting conduit independent of plug-in unit.

3.2 CONNECTIONS

- A. Ground equipment according to Section 260526 "Grounding and Bonding for Electrical Systems."
- B. Connect wiring according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- C. Terminate to transformer enclosures with matching bus assemblies according to Section 262200 "Low-Voltage Transformers."
- D. Terminate to switchgear enclosures with matching bus assemblies according to Section 262300 "Low-Voltage Switchgear."
- E. Terminate to switchboard enclosures with matching bus assemblies according to Section 262413 "Switchboards."
- F. Terminate to panelboard enclosures with matching bus assemblies according to Section 262416 "Panelboards."
- G. Terminate to motor-control centers enclosures with matching bus assemblies according to Section 262419 "Motor-Control Centers."

3.3 FIELD QUALITY CONTROL

- A. Field tests must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- B. Tests and Inspections:
 - 1. After installing equipment, test for compliance with requirements according to NETA ATS.
 - 2. Visual and Mechanical Inspection:
 - a. Compare equipment nameplate data with Drawings and Specifications.
 - b. Inspect physical and mechanical condition.
 - c. Inspect anchorage, alignment, and grounding.
 - d. Verify correct connection according to single-line diagram.
 - e. Inspect bolted electrical connections for high resistance using one or more of the following methods:
 - 1) Use of low-resistance ohmmeter.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method according to manufacturer's published data.
 - 3) Perform thermographic survey.
 - 3. Electrical Tests:

- a. Perform insulation resistance measurements through bolted connections and bus joints with low-resistance ohmmeter.
- b. Perform insulation resistance tests of each busway, phase to phase, and phase to ground.
- c. Perform a dielectric withstand voltage test on each busway, phase to ground with phases not under test grounded for one minute.
- d. Measure resistance of assembled busway sections on insulated busway and compare values with adjacent phases.
- e. Perform phasing test on each busway tie section energized by separate sources.
- f. Verify operation of busway space heaters.

- C. Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform an infrared scan of each switch. Remove all access panels so joints and connections are accessible to portable scanner.
 1. Instrument: Use an infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.
 2. Record of Infrared Scanning: Prepare a certified report that identifies switches checked and that describes scanning results. Include notation of deficiencies detected, remedial action taken, and observations after remedial action.
 3. Follow-up Infrared Scanning: Perform an additional follow-up infrared scan of each switch 11 months after date of Substantial Completion.
- D. Test Labeling: On completion of satisfactory testing of each unit, attach a dated and signed "Satisfactory Test" label to tested component.
- E. Nonconforming Work:
 1. Enclosed bus assemblies will be considered defective if they do not pass tests and inspections.
- F. Prepare test and inspection reports.

3.4 ADJUSTING

- A. Set field-adjustable, circuit-breaker trip ranges[**and overload relay trip settings**] as indicated.

3.5 CLEANING

- A. Vacuum dirt and debris; do not use compressed air to assist in cleaning.

3.6 PROTECTION

- A. Provide final protection to ensure that moisture does not enter bus assembly.

END OF SECTION 26 25 00 00

Task	Specification	Specification Description
26 25 13 00	26 25 00 00	Low-Voltage Enclosed Bus Assemblies
26 25 16 00	26 25 00 00	Low-Voltage Enclosed Bus Assemblies

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 27 13 00 - ELECTRICITY METERING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Electricity meters.
2. Work to accommodate utility company revenue meters, and Owner's electricity meters used to manage electrical power system.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 DEFINITIONS

- A. KY or KYZ Pulse:** Term used by metering industry to describe method of measuring consumption of electricity (kWh) that is based on relay opening and closing in response to rotation of disk in meter. Electronic meters generate pulses electronically.

1.3 COORDINATION

A. Electrical Service Connections:

1. Coordinate with utility companies and utility-furnished components.
 - a. Comply with requirements of utility providing electrical power services.
 - b. Coordinate installation and connection of utilities and services, including provision for electricity-metering components.

1.4 ACTION SUBMITTALS

A. Product Data:

1. For each type of meter.
2. For metering infrastructure components.
3. For metering software.

B. Shop Drawings: For electricity-metering equipment.

1. Include elevation views of front panels of control and indicating devices and control stations.
2. Include diagrams for power, signal, and control wiring.
3. Wire Termination Diagrams and Schedules: Include diagrams for power, signal, and control

wiring. Identify terminals and wiring designations and color-codes to facilitate installation, operation, and maintenance. Indicate recommended types, wire sizes, and circuiting arrangements for field-installed wiring, and show circuit protection features. Differentiate between manufacturer-installed and field-installed wiring.

4. Include series-combination rating data for modular meter centers with main disconnect device.
5. Block Diagram: Show interconnections between components specified in this Section and devices furnished with power distribution system components. Indicate data communication paths and identify networks, data buses, data gateways, concentrators, and other devices used. Describe characteristics of network and other data communication lines.
6. Submit evidence that meters are compatible with connected monitoring and control devices and systems specified in **[Section 260913 "Electrical Power Monitoring and Control."]<Insert Section number and title.>**
 - a. Show interconnecting signal and control wiring, and interface devices to show compatibility of meters.
 - b. For reporting and billing interfaces and adapters, list network protocols and provide statements from manufacturers that input and output devices comply with interoperability requirements of the protocol.

C. Field quality-control reports.

1.5 INFORMATIONAL SUBMITTALS

- A. Manufacturers' Published Instructions: Record copy of official installation **[and testing]** instructions issued to Installer by manufacturer for the following:
 1. Installation of metering equipment.
- B. Sample warranties.

1.6 CLOSEOUT SUBMITTALS

- A. Maintenance Contracts:
 1. Software and firmware service agreement.
- B. Warranty documentation.

1.7 WARRANTY

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed metering equipment performs in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period.
 1. Extended-Warranty Period: **[Two]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that metering equipment performs in accordance with specified requirements and agrees to provide repair or replacement of components or products that fail to perform as specified within extended-warranty period.

1. Initial Extended-Warranty Period: **[Three]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
2. Follow-On Extended-Warranty Period: **[Eight]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for materials **[that failed because of transient voltage surges]** only, free on board **[origin][destination]**, freight prepaid.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

- A. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Comply with UL 916.

2.2 UTILITY METERING INFRASTRUCTURE

- A. Install metering accessories furnished by utility company, complying with its requirements.
- B. Utility-Furnished Meters: Connect data transmission facility of metering equipment installed by Utility.
 1. Data Transmission: Transmit pulse data over control-circuit conductors, classified as Class 1 per NFPA 70, Article 725. Comply with Section 260523 "Control-Voltage Electrical Power Cables."
- C. Current-Transformer Cabinets: Comply with requirements of electrical-power utility company.
- D. Meter Sockets:
 1. Comply with requirements of electrical-power utility company.
 2. Steady-state and short-circuit current ratings must meet indicated circuit ratings.
- E. Modular Meter Center: Factory-coordinated assembly of main service **[terminal box with lugs only][disconnect device]**, wireways, meter socket modules, and feeder circuit breakers arranged in adjacent vertical sections complete with interconnecting buses.
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Eaton]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Siemens Industry, Inc., Energy Management Division]**
 - e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. [ABB, Electrification Business]
 - b. [Eaton]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Siemens Industry, Inc., Energy Management Division]
 - e. [Square D; Schneider Electric USA]
 - f. <Insert manufacturer's name>
3. Comply with requirements of utility company for meter center.
 - a. Comply with UL 67.
 4. Housing: UL 50E, [Type 1][Type 3R][Type 4X] enclosure.
 5. Meter Socket Rating: Coordinated with connected feeder circuit rating.
 6. Minimum Short-Circuit Rating: [22 000 A][42 000 A][65 000 A][100 000 A]<Insert amperes> symmetrical at rated voltage.
 7. Steady-state and short-circuit current ratings must have ratings that match connected circuit ratings.
 8. Main Disconnect Device:
 - a. Circuit breaker, series-combination rated for use with downstream feeder and branch circuit breakers and having adjustable magnetic trip setting for circuit-breaker frame sizes of 250 A and larger. Comply with requirements in Section 262816 "Enclosed Switches and Circuit Breakers." Circuit breakers must be operable from outside enclosure to disconnect unit. Configure cover so it can be opened only when disconnect switch is open.
 - b. Fusible switch, UL 98 Type GD, series-combination rated by fuse manufacturer to protect downstream feeder and branch circuit breakers. Comply with requirements in Section 262816 "Enclosed Switches and Circuit Breakers." Switch must be operable from outside enclosure to disconnect unit. Configure cover so that it can be opened only when disconnect switch is open.
 9. Feeder Circuit Breakers: Series-combination-rated molded-case units, rated to protect downstream circuit breakers and to house load centers and panelboards that have [10 000 A]<Insert amperes> interrupting capacity.
 - a. Identification: Complying with requirements in Section 260553 "Identification for Electrical Systems."
 - b. Physical Protection: Tamper resistant, with hasp for padlock.
 10. Surge Protection:
 - a. Factory-installed in main disconnect, integrally mounted, UL 1449 Type 1. Comply with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."
 - b. Field-mounted external to main disconnect, UL 1449 Type 2, with integral disconnect and overcurrent protective device. Comply with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."
 - c. Factory-installed in main terminal box, integrally mounted, UL 1449 Type 1. Comply with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."
 - d. Field-mounted external to main terminal box, UL 1449 Type 2, with integral disconnect and overcurrent protective device. Comply with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."
- F. Arc-Flash Warning Labels:
1. Comply with requirements for "Arc-Flash Warning Labels" in Section 260573.19 "Arc-Flash Studies." Apply 3-1/2-by-5 inch (76-by-127 mm) thermal transfer label of high-adhesion

- polyester for each work location included in the analysis.
2. Comply with requirements for "Self-Adhesive Equipment Labels" and "Signs" in Section 260553 "Identification for Electrical Systems." Apply **3-1/2-by-5 inch (76-by-127 mm)** thermal transfer label of high-adhesion polyester for each work location included in the analysis. Labels must be machine printed, with no field-applied markings.
 - a. Label must have orange header with wording, "WARNING, ARC-FLASH HAZARD," and must include the following information taken directly from arc-flash hazard analysis:
 - 1) Location designation.
 - 2) Nominal voltage.
 - 3) Flash protection boundary.
 - 4) Hazard risk category.
 - 5) Incident energy.
 - 6) Working distance.
 - 7) Engineering report number, revision number, and issue date.

2.3 ELECTRICITY METERS

- A. System Description: Able to meter designated activity loads, with or without external alarm, control, and communication capabilities, or other optional features.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 1. **[ABB, Electrification Business]**
 2. **[Davidge Controls]**
 3. **[E-Mon]**
 4. **[Eaton]**
 5. **[GE Power; General Electric Company]**
 6. **[Leviton Manufacturing Co., Inc.]**
 7. **[National Meter Industries]**
 8. **[Sensus Metering Systems]**
 9. **[Siemens Industry, Inc., Energy Management Division]**
 10. **[Square D; Schneider Electric USA]**
 11. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 1. **[ABB, Electrification Business]**
 2. **[Davidge Controls]**
 3. **[E-Mon]**
 4. **[Eaton]**
 5. **[GE Power; General Electric Company]**
 6. **[Leviton Manufacturing Co., Inc.]**
 7. **[National Meter Industries]**
 8. **[Sensus Metering Systems]**
 9. **[Siemens Industry, Inc., Energy Management Division]**
 10. **[Square D; Schneider Electric USA]**
 11. **<Insert manufacturer's name>**
- D. General Requirements for Meters:

1. Comply with NEMA ANSI C12.1 and NEMA ANSI C12.20, [0.1][0.2][0.5] accuracy class.
 2. Ambient Temperature: Minus 22 deg F to plus 158 deg F (Minus 30 deg C to plus 70 deg C).
 3. Humidity: Zero to 95 percent, noncondensing.
 4. Capacities and Characteristics:
 - a. Circuit: 120/240 V(ac), 100 A.
 - b. Measure: kWh, onboard LED display.
 - c. Remote-Reading Options: None.
 5. Billing Meters Accuracy: [0.2][0.5][1.0] percent of reading, complying with NEMA ANSI C12.20.
 6. Meter Certification: Certified by [California Type Evaluation Program]<Insert agency> as complying with [4 CCR 4027, Article 2.2]<Insert state or Federal regulatory requirement>.
 7. Certify that meters comply with NEMA ANSI C12.20 requirements by laboratory accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) of the National Institute of Standards and Technology (NIST). Laboratory must use test equipment that is certified annually and is traceable to NIST standards.
 8. Enclosure: Supplied by meter manufacturer, UL 50E, [Type 1][Type 3R][Type 4X] minimum, with provisions for locking or sealing.
 9. Identification: Comply with requirements in Section 260553 "Identification for Electrical Systems."
 10. Onboard Nonvolatile Data Storage: kWh, until reset.
 11. Sensors: Current-sensing type, supplied by electronic meter manufacturer, with current or voltage output, selected for optimum range and accuracy for meters indicated for this application.
 - a. Type: [Split][and][solid] core, complying with recommendation of meter manufacturer.
- E. kWh Meter: Electronic [single-phase][and][three-phase] meters, measuring electricity use.
1. Voltage and Phase Configuration: Meter must be designed for use on circuits with voltage rating and phase configuration indicated for its application.
 2. Display:
 - a. LCD with characters not less than 0.25 inch (6 mm) high, indicating accumulative kWh and current kilowatt load. Retain accumulated kWh in nonvolatile memory, until reset.
 - b. Digital electromechanical counter, indicating accumulative kWh.
- F. kWhd Meter: Electronic [single-phase][and][three-phase] meters, measuring electricity use and demand. Demand must be integrated over [15-minute]<Insert time> interval.
1. Voltage and Phase Configuration: Meter must be designed for use on circuits with voltage rating and phase configuration indicated for its application.
 2. Display: LCD with characters not less than 0.25 inch (6 mm) high, indicating the following:
 - a. Accumulative kWh.
 - b. Current time and date.
 - c. Current demand.
 - d. Historic peak demand.
 - e. Time and date of historic peak demand.
 3. Retain accumulated kWh and historic peak demand in nonvolatile memory, until reset.
- G. KY and KYZ Pulse Totalizer:
1. Pulse Totalizer: Instrument for demand and billing applications where one or more utility revenue meters stream KY or KYZ energy pulses. Instrument must totalize kWh accumulated over user-selected period and must log maximum and minimum kWhd for that period. Record each period

with date/time stamp. Time period must be user selected from one to 60 minutes.

- a. Pulse Input: **[One]<Insert number>**, individually programmable, KYZ Form C (three-wire) contact pulse channels. Pulse interval, pulse rate, and minimum pulse width must be field adjustable, set for pulse stream provided by utility revenue meter.
- b. Data Totalizing Capacity of Each Channel: Not less than 149 days at 15-minute intervals.
- c. Instrument Power: User selectable, 120 V(ac) and 277 V(ac).
- d. Clock: Line frequency.

H. Remote Reading Options:

1. Pulse Output: **[KY][KYZ]**, complete with optical sensor and interface devices.
2. TIA-232 serial interface.
3. TIA-485 serial interface, with **[Modbus RTU protocol]<Insert protocol name>**.
4. USB interface.
5. TCP/IP adapter.

I. Current-Transformer Cabinet: Size and configuration as recommended by metering equipment manufacturer for use with indicated connected feeder and sensors.

J. Uninterruptible Power Supply: Single phase, 120 V(ac), sized and rated to provide continuous power to meter for operations of **[48]<Insert number>** hours after interruption of normal power.

1. Output: Sine wave, total harmonic distortion less than 5 percent at full load.
2. Battery: Maintenance free, sealed, lead acid, and leakproof.
3. Control Panel: LED status display of "on-battery," "replace battery," and "overload."

K. Data Transmission Cable: Comply with requirements in Section 260523 "Control-Voltage Electrical Power Cables."

L. Software: PC-based product **[of][recommended by]** meter manufacturer, suitable for calculating utility cost allocation.

1. Utility Cost Allocation: Automatically import electricity-usage records to allocate electricity costs for the following:
 - a. At least **[15]<Insert number>** departments.
 - b. At least **[30]<Insert number>** tenants or activities.
 - c. At least **[five]<Insert number>** processes.
 - d. At least **[five]<Insert number>** buildings.
 - e. **<Insert entity>**.
2. Activity Billing Software: Automatically import electricity-usage records to automatically compute and prepare electricity-use statements[**and invoices**] based on electricity use[**and peak demand**]. Maintain separate directory for each allocation. Prepare summary reports in user-defined formats and time intervals.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Comply with manufacturer's published instructions.

B. Reference Standards:

1. Install modular meter center according to switchboard installation requirements in NECA 400.
2. Install arc-flash labels as required by NFPA 70.

C. Special Techniques:

1. Install meters furnished by utility company. Install raceways and equipment according to utility company's published instructions. Provide empty conduits for metering leads and extend grounding connections as required by utility company.
2. Wiring Methods:
 - a. Comply with requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables" and Section 260533.13 "Conduits for Electrical Systems."
 - b. Install unshielded, twisted-pair cable for control and signal transmission conductors, complying with Section 271513 "Communications Copper Horizontal Cabling."
 - c. Minimum conduit size is metric designator 16 (trade size 1/2).

3.2 IDENTIFICATION

A. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."

1. Series Combination Warning Label: Self-adhesive labels, with text as required by NFPA 70.
2. Equipment Identification Labels: Self-adhesive labels with clear protective overlay. For residential meters, provide additional card holder suitable for **[printed, weather-resistant card][typewritten card]** with occupant's name.

3.3 FIELD QUALITY CONTROL

A. Acceptance Testing Preparation:

1. **<Insert requirements>**.

B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

C. Tests and Inspections:

1. Equipment and Software Setup:
 - a. Set meter date and time clock.
 - b. Test, calibrate, and connect pulse metering system.
 - c. Set and verify billing demand interval for demand meters.
 - d. Report settings and calibration results.
 - e. Set up reporting and billing software, insert billing location names and initial constant values and variable needed for billing computations.
2. Connect load of known power rating, **[1.5 kW]<Insert kilowatts>** minimum, to circuit supplied by metered feeder.
3. Turn off circuits supplied by metered feeder and secure them in off condition.
4. Run test load continuously for eight hours minimum, or longer, to obtain measurable meter

- indication. Use test-load placement and setting that ensures continuous, safe operation.
5. Check and record meter reading at end of test period and compare with actual electricity used, based on test-load rating, duration of test, and sample measurements of supply voltage at test-load connection. Record test results.
 6. Generate test report and billing for each tenant or activity from meter reading tests.

D. Nonconforming Work:

1. Electricity metering will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services:

1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

3.4 PROTECTION

- A. After installation, protect metering equipment from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

3.5 MAINTENANCE

A. Software and Firmware Service Agreement:

1. Technical Support: Beginning at Substantial Completion, verify that software and firmware service agreement includes software and firmware support for **[two]<Insert number>** years.
2. Upgrade Service: At Substantial Completion, update software and firmware to latest version. Install and program software and firmware upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. **[Verify that upgrading software includes operating system and new or revised licenses for using software.]**
 - a. Upgrade Notice: No fewer than **[30]<Insert number>** days to allow Owner to schedule and access the system **[and to upgrade computer equipment if necessary.]**
3. Upgrade Reports: Prepare report after each update, documenting upgrades installed.

END OF SECTION 26 27 13 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 27 16 00 - ELECTRICAL CABINETS AND ENCLOSURES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Cabinets and cutout boxes.
2. Termination boxes.
3. Miscellaneous enclosures.
4. Rack or frame systems.
5. Enclosure-mounted power distribution.

B. Products Installed, but Not Furnished, under This Section:

1. **<Insert products identified in "Existing Products to be Modified" Article or "Existing Products to be Removed and Reinstalled" Article>.**

C. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, and other structural design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. Section 078413 "Penetration Firestopping" specifies materials and methods for sealing penetrations of rated walls and partitions referenced by this Section.
5. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
6. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding for RBBs referenced by this Section.
7. Section 260573 "Power System Studies" specifies arc-flash hazard analysis and warning labels referenced by this Section.
8. Section 270528 "Pathways for Communications Systems"[**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for raceway materials, routing, locations, and identification of communications equipment and cabling.

1.2 DEFINITIONS

- A. RBB: Rack bonding busbar, located in equipment cabinets and racks.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.
- B. Shop Drawings: Prepare and submit the following:

1. Shop Drawings for Custom Enclosures and Cabinets: Include plans, elevations, sections, and attachment details.
2. Shop Drawings for Racks or Frames:
 - a. Include plans, elevations, sections, details, and attachments to other work.
 - b. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
 - c. Include workspace requirements and access for cable connections.
 - d. Grounding: Indicate location of RBB and its mounting detail showing standoff insulators and wall-mounting brackets.

C. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

D. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturers' published instructions.

1.5 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures; conduct tests of complex equipment; analyze test and equipment data; plan a job; and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.
- D. Communications Testing and Inspecting Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
1. On-site communications testing supervisor must have **[BICSI Technician (TECH)]<Insert certification program>** certification and documented training, and be experienced with testing communications equipment in accordance with **[BICSI]<Insert code enforced by authorities having jurisdiction>** testing standards.

PART 2 - PRODUCTS

2.1 EXISTING PRODUCTS TO BE MODIFIED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>.**
 - 1. Sustainable Design Features:
 - a. Material Reuse: Product is salvaged, refurbished, or reused.
- C. Accessories: **<Insert accessories included with existing product>.**

2.2 EXISTING PRODUCTS TO BE REMOVED AND REINSTALLED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>.**
 - 1. Sustainable Design Features:
 - a. Material Reuse: Product is salvaged, refurbished, or reused.
- C. Accessories: **<Insert accessories included with existing product>.**

2.3 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.4 CABINETS AND CUTOFF BOXES

- A. UL CYIV - Indoor Sheet Metal Cabinets :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Adalet; division of Scott Fetzer Co.]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Erickson Electrical Equipment Company]**
 - f. **[FSR Inc.]**
 - g. **[Hoffman; brand of nVent Electrical plc]**
 - h. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**

- i. [Milbank Manufacturing Company]
 - j. [N J Sullivan Company]
 - k. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - l. [Robroy Enclosures; Robroy Industries]
 - m. [Siemens Industry, Inc., Building Technologies Division]
 - n. [Square D; Schneider Electric USA]
 - o. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Adalet; division of Scott Fetzer Co.]
 - c. [Cooper B-line; brand of Eaton, Electrical Sector]
 - d. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - e. [Erickson Electrical Equipment Company]
 - f. [FSR Inc.]
 - g. [Hoffman; brand of nVent Electrical plc]
 - h. [Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - i. [Milbank Manufacturing Company]
 - j. [N J Sullivan Company]
 - k. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - l. [Robroy Enclosures; Robroy Industries]
 - m. [Siemens Industry, Inc., Building Technologies Division]
 - n. [Square D; Schneider Electric USA]
 - o. <Insert manufacturer's name>
3. Listing Criteria:
 - a. UL CCN CYIV.
 - b. Non-Environmental Characteristics: UL 50.
 - c. Environmental Characteristics: UL 50E.
4. Standard Features:
 - a. Enclosure provided with frame, mat, or trim in which swinging door or doors are or can be hung.
 - b. Degree of Protection: [Type 1][Type 2][Type 5][Type 12][Type 12K][Type 13].
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified] corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

**B. UL CYIV - Indoor Sheet Metal Cutout Boxes :**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Adalet; division of Scott Fetzer Co.]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Erickson Electrical Equipment Company]**
 - f. **[FSR Inc.]**
 - g. **[Hoffman; brand of nVent Electrical plc]**
 - h. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **[Milbank Manufacturing Company]**
 - j. **[N J Sullivan Company]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Robroy Enclosures; Robroy Industries]**
 - m. **[Siemens Industry, Inc., Building Technologies Division]**
 - n. **[Square D; Schneider Electric USA]**
 - o. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Adalet; division of Scott Fetzer Co.]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Erickson Electrical Equipment Company]**
 - f. **[FSR Inc.]**
 - g. **[Hoffman; brand of nVent Electrical plc]**
 - h. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **[Milbank Manufacturing Company]**
 - j. **[N J Sullivan Company]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Robroy Enclosures; Robroy Industries]**
 - m. **[Siemens Industry, Inc., Building Technologies Division]**
 - n. **[Square D; Schneider Electric USA]**
 - o. **<Insert manufacturer's name>**
3. Listing Criteria:
 - a. UL CCN CYIV.
 - b. Non-Environmental Characteristics: UL 50.
 - c. Environmental Characteristics: UL 50E.
4. Standard Features:
 - a. Enclosure that has swinging doors or covers secured directly to and telescoping with walls of enclosure.
 - b. Degree of Protection: **[Type 1][Type 2][Type 5][Type 12][Type 12K][Type 13]**.
5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL CYIV - Outdoor Sheet Metal Cabinets :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Adalet; division of Scott Fetzer Co.]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Erickson Electrical Equipment Company]**
 - f. **[FSR Inc.]**
 - g. **[Hoffman; brand of nVent Electrical plc]**
 - h. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **[Milbank Manufacturing Company]**
 - j. **[N J Sullivan Company]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Robroy Enclosures; Robroy Industries]**
 - m. **[Siemens Industry, Inc., Building Technologies Division]**
 - n. **[Square D; Schneider Electric USA]**
 - o. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Adalet; division of Scott Fetzer Co.]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - e. **[Erickson Electrical Equipment Company]**
 - f. **[FSR Inc.]**
 - g. **[Hoffman; brand of nVent Electrical plc]**
 - h. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - i. **[Milbank Manufacturing Company]**
 - j. **[N J Sullivan Company]**
 - k. **[Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - l. **[Robroy Enclosures; Robroy Industries]**
 - m. **[Siemens Industry, Inc., Building Technologies Division]**
 - n. **[Square D; Schneider Electric USA]**

- a. <Insert manufacturer's name>
 3. Listing Criteria:
 - a. UL CCN CYIV.
 - b. Non-Environmental Characteristics: UL 50.
 - c. Environmental Characteristics: UL 50E.
 4. Standard Features:
 - a. Enclosure provided with frame, mat, or trim in which swinging door or doors are or can be hung.
 - b. Degree of Protection: [Type 3][Type 3X][Type 3R][Type 3RX][Type 3S][Type 3SX][Type 4][Type 4X][Type 6][Type 6P].
 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- D. UL CYIV - Outdoor Sheet Metal Cutout Boxes :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [ABB, Electrification Business]
 - b. [Adalet; division of Scott Fetzer Co.]
 - c. [Cooper B-line; brand of Eaton, Electrical Sector]
 - d. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - e. [Erickson Electrical Equipment Company]
 - f. [FSR Inc.]
 - g. [Hoffman; brand of nVent Electrical plc]
 - h. [Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - i. [Milbank Manufacturing Company]
 - j. [N J Sullivan Company]
 - k. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - l. [Robroy Enclosures; Robroy Industries]
 - m. [Siemens Industry, Inc., Building Technologies Division]
 - n. [Square D; Schneider Electric USA]
 - o. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the

following:

- a. [ABB, Electrification Business]
 - b. [Adalet; division of Scott Fetzer Co.]
 - c. [Cooper B-line; brand of Eaton, Electrical Sector]
 - d. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - e. [Erickson Electrical Equipment Company]
 - f. [FSR Inc.]
 - g. [Hoffman; brand of nVent Electrical plc]
 - h. [Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - i. [Milbank Manufacturing Company]
 - j. [N J Sullivan Company]
 - k. [Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - l. [Robroy Enclosures; Robroy Industries]
 - m. [Siemens Industry, Inc., Building Technologies Division]
 - n. [Square D; Schneider Electric USA]
 - o. <Insert manufacturer's name>
3. Listing Criteria:
- a. UL CCN CYIV.
 - b. Non-Environmental Characteristics: UL 50.
 - c. Environmental Characteristics: UL 50E.
4. Standard Features:
- a. Enclosure that has swinging doors or covers secured directly to and telescoping with walls of enclosure.
 - b. Degree of Protection: [Type 3][Type 3X][Type 3R][Type 3RX][Type 3S][Type 3SX][Type 4][Type 4X][Type 6][Type 6P].
5. Sustainable Design Features:
- a. Corporate Sustainability Report: Provide [third-party-verified] corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.5 TERMINATION BOXES

- A. Description: Enclosure for termination base consisting of lengths of bus bars, terminal strips, or terminal blocks with provision for wire connectors to accommodate incoming or outgoing conductors or both.
- B. UL XCKT - Termination Boxes and Termination Bases for Installation on Line Side of Service Equipment :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [ABB, Electrification Business]
 - b. [Appleton; Emerson Electric Co., Automation Solutions]
 - c. [Cooper B-line; brand of Eaton, Electrical Sector]
 - d. [Erickson Electrical Equipment Company]
 - e. [Hoffman; brand of nVent Electrical plc]
 - f. [Metron; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - g. [Milbank Manufacturing Company]
 - h. [N J Sullivan Company]
 - i. [Square D; Schneider Electric USA]
 - j. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Appleton; Emerson Electric Co., Automation Solutions]
 - c. [Cooper B-line; brand of Eaton, Electrical Sector]
 - d. [Erickson Electrical Equipment Company]
 - e. [Hoffman; brand of nVent Electrical plc]
 - f. [Metron; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - g. [Milbank Manufacturing Company]
 - h. [N J Sullivan Company]
 - i. [Square D; Schneider Electric USA]
 - j. <Insert manufacturer's name>
3. Listing Criteria:
 - a. UL CCN XCKT; including UL 1773.
 - b. Non-Environmental Characteristics: UL 50.
 - c. Environmental Characteristics: UL 50E.
4. Standard Features:
 - a. Listed and labeled for installation on line side of service equipment.
 - b. Indoor Degree of Protection: [Type 1][Type 2][Type 5][Type 12][Type 12K][Type 13].
 - c. Outdoor Degree of Protection: [Type 3][Type 3X][Type 3R][Type 3RX][Type 3S][Type 3SX][Type 4][Type 4X][Type 6][Type 6P].
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard

development organization, is publicly available for product.

- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL XCKT - Termination Boxes and Termination Bases for Installation on Load Side of Service Equipment :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Erickson Electrical Equipment Company]**
 - e. **[Hoffman; brand of nVent Electrical plc]**
 - f. **[Metron; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Milbank Manufacturing Company]**
 - h. **[N J Sullivan Company]**
 - i. **[Square D; Schneider Electric USA]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Erickson Electrical Equipment Company]**
 - e. **[Hoffman; brand of nVent Electrical plc]**
 - f. **[Metron; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Milbank Manufacturing Company]**
 - h. **[N J Sullivan Company]**
 - i. **[Square D; Schneider Electric USA]**
 - j. **<Insert manufacturer's name>**
3. Listing Criteria:
 - a. UL CCN XCKT; including UL 1773.
 - b. Non-Environmental Characteristics: UL 50.
 - c. Environmental Characteristics: UL 50E.
4. Standard Features:
 - a. Listed and labeled for installation on load side of service equipment.
 - b. Indoor Degree of Protection: **[Type 1][Type 2][Type 5][Type 12][Type 12K][Type 13]**.
 - c. Outdoor Degree of Protection: **[Type 3][Type 3X][Type 3R][Type 3RX][Type 3S][Type 3SX][Type 4][Type 4X][Type 6][Type 6P]**.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts

- of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.6 MISCELLANEOUS ENCLOSURES

A. UL XCKT or NWIN - Indoor Sheet Metal Miscellaneous Enclosures :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Erickson Electrical Equipment Company]**
 - e. **[Hoffman; brand of nVent Electrical plc]**
 - f. **[Metron; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Milbank Manufacturing Company]**
 - h. **[N J Sullivan Company]**
 - i. **[Square D; Schneider Electric USA]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Appleton; Emerson Electric Co., Automation Solutions]**
 - c. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - d. **[Erickson Electrical Equipment Company]**
 - e. **[Hoffman; brand of nVent Electrical plc]**
 - f. **[Metron; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - g. **[Milbank Manufacturing Company]**
 - h. **[N J Sullivan Company]**
 - i. **[Square D; Schneider Electric USA]**
 - j. **<Insert manufacturer's name>**
3. Listing Criteria:
 - a. UL CCN XCKT; including UL 1773; or UL CCN NWIN, including UL 2416.
 - b. Non-Environmental Characteristics: UL 50.
 - c. Environmental Characteristics: UL 50E.

4. Standard Features:

- a. Degree of Protection: [Type 1][Type 2][Type 5][Type 12][Type 12K][Type 13].

5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide [third-party-verified] corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL XCKT or NWIN - Outdoor Sheet Metal Miscellaneous Enclosures :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [ABB, Electrification Business]
 - b. [Appleton; Emerson Electric Co., Automation Solutions]
 - c. [Cooper B-line; brand of Eaton, Electrical Sector]
 - d. [Erickson Electrical Equipment Company]
 - e. [Hoffman; brand of nVent Electrical plc]
 - f. [Metron; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - g. [Milbank Manufacturing Company]
 - h. [N J Sullivan Company]
 - i. [Square D; Schneider Electric USA]
 - j. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Electrification Business]
 - b. [Appleton; Emerson Electric Co., Automation Solutions]
 - c. [Cooper B-line; brand of Eaton, Electrical Sector]
 - d. [Erickson Electrical Equipment Company]
 - e. [Hoffman; brand of nVent Electrical plc]
 - f. [Metron; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - g. [Milbank Manufacturing Company]
 - h. [N J Sullivan Company]
 - i. [Square D; Schneider Electric USA]
 - j. <Insert manufacturer's name>
3. Listing Criteria:
 - a. UL CCN XCKT; including UL 1773; or UL CCN NWIN, including UL 2416.
 - b. Non-Environmental Characteristics: UL 50.

- c. Environmental Characteristics: UL 50E.
- 4. Standard Features:
 - a. Degree of Protection: **[Type 3][Type 3X][Type 3R][Type 3RX][Type 3S][Type 3SX][Type 4][Type 4X][Type 6][Type 6P]**.
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.7 RACK OR FRAME SYSTEMS

- A. Description: This category covers rack or frame systems that are not complete but include components and assemblies that are intended to power, protect, heat, cool, or otherwise support electrical or electronic equipment that will be installed at a later time.
- B. UL NWIN - 19 Inch Open Equipment Rack :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Black Box Corporation]**
 - c. **[Bud Industries, Inc.]**
 - d. **[CommScope, Inc]**
 - e. **[Cooper B-line; brand of Eaton, Electrical Sector]**
 - f. **[Dell Technologies Inc.]**
 - g. **[Hammond Mfg. Co. Inc]**

 - o. **[Panduit Corp]**
 - p. **[Siemon Co. (The)]**
 - q. **[Tripp-Lite]**
 - r. **<Insert manufacturer's name>**

3. Listing Criteria:
 - a. UL CCN NWIN; including UL 2416.
 - b. Non-Environmental Characteristics: UL 50.
 - c. Environmental Characteristics: UL 50E or UL 2416.

4. Standard Features:
 - a. Threaded rails designed for mounting telecommunications equipment.
 - b. Width: Compatible with EIA/ECIA 310-E, **19 inch (482.6 mm)** equipment mounting with an opening of **17.72 inch (450 mm)** between rails.
 - c. Frames: Modular units designed for telecommunications terminal support and coordinated with dimensions of units to be supported.
 - d. Finish: Manufacturer's standard, baked-polyester powder coat.
 - e. Cable Management:
 - 1) Metal, with integral wire retaining fingers.
 - 2) Baked-polyester powder coat finish.
 - 3) Vertical cable management panels have front and rear channels with covers.
 - 4) Horizontal crossover cable manager at top of each relay rack, with minimum height of two rack units each.
 - f. Configuration: **[Two post][and][four post]**.
 - g. Material: **[Extruded steel][Extruded aluminum][Sheet steel][Sheet aluminum]**.

5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted,

- manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Color: **[Black]<Insert color>**.
 - b. Floor-Mounted Racks:
 - 1) Overall Height: **[72 inch (1828.8 mm)][84 inch (2133.6 mm)][As indicated on Drawings]<Insert value>**.
 - 2) Overall Depth: **[23 inch (584.2 mm)][29 inch (736.6 mm)]<Insert value>**.
 - 3) Rail Depth: **[3 inch (76.2 mm)][6 inch (152.4 mm)]<Insert value>**.
 - 4) Two-Post Load Rating: **[200 lb (91 kg)][400 lb (181 kg)]<Insert value>**.
 - 5) Four-Post Load Rating: **[1000 lb (454 kg)][2000 lb (907 kg)]<Insert value>**.
 - 6) Number of Rack Units per Rack: **[38][42][45][52][58][As indicated on Drawings]<Insert number>**.
 - a) Numbering: **[Every][Every five]** rack unit(s), on interior of rack.
 - 7) Threads: **[10-32][12-24][Universal square]**.
 - 8) Vertical and horizontal cable management channels, top and bottom cable troughs, grounding lug[, and a power strip].
 - 9) Base must have minimum four mounting holes for permanent attachment to floor.
 - 10) Top must have provisions for attaching to cable tray or ceiling.
 - 11) Self-leveling.
 - c. Wall-Mounted Racks:
 - 1) Height: **[18 inch (457.2 mm)][22 inch (558.8 mm)][As indicated on Drawings]<Insert value>**.
 - 2) Depth: **[23 inch (584.2 mm)][29 inch (736.6 mm)]<Insert value>**.
 - 3) Load Rating: **[150 lb (65 kg)][200 lb (91 kg)]<Insert value>**.
 - 4) Number of Rack Units per Rack: **[8][12][22][As indicated on Drawings]<Insert number>**.
 - 5) Threads: **[10-32][12-24][Universal square]**.
 - 6) Wall Attachment: Four pre-punched mounting holes.
 - 7) Equipment Access: Integral swing.
- C. UL NWIN - 19 Inch Enclosed Equipment Rack :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Black Box Corporation]**

 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
 - a. Color: **[Black]<Insert color>**.
 - b. Modular Freestanding Cabinets:
 - 1) Overall Height: **[72 inch (1828.8 mm)][84 inch (2133.6 mm)][As indicated on Drawings]<Insert value>**.
 - 2) Overall Depth: **[23 inch (584.2 mm)][29 inch (736.6 mm)]<Insert value>**.
 - 3) Load Rating: **[3000 lb (1362 kg)]<Insert value>**.
 - 4) Number of Rack Units: **[38][42][45][52][58][As indicated on Drawings]<Insert number>**.
 - a) Numbering: **[Every][Every five]** rack unit(s), on interior of rack.
 - 5) Threads: **[10-32][12-24][Universal square]**.
 - 6) Removable and lockable side and top panels.
 - 7) Hinged and lockable front and rear doors.
 - 8) Adjustable feet for leveling.
 - 9) Screened ventilation openings in roof and rear door.
 - 10) Cable access provisions in roof and base.
 - 11) RBB.
 - 12) **[Rack][Roof]**-mounted, **550 cfm (260 L/s)** fan with filter.
 - 13) Power strip.
 - 14) All cabinets keyed alike.
 - c. Modular Wall Cabinets:
 - 1) Height: **[18 inch (457.2 mm)][22 inch (558.8 mm)][As indicated on Drawings]<Insert value>**.
 - 2) Depth: **[23 inch (584.2 mm)][29 inch (736.6 mm)]<Insert value>**.
 - 3) Load Rating: **[150 lb (65 kg)][200 lb (91 kg)]<Insert value>**.
 - 4) Number of Rack Units: **[8][12][22][As indicated on Drawings]<Insert number>**.

- 5) Threads: **[10-32][12-24][Universal square]**.
- 6) Lockable front **[and rear]** doors.
- 7) Louvered side panels.
- 8) Cable access provisions top and bottom.
- 9) Grounding lug.
- 10) **[Rack][Roof]**-mounted, **250 cfm (118 L/s)** fan.
- 11) Power strip.
- 12) All cabinets keyed alike.

D. UL NWIN - 23 Inch Open Equipment Rack :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Black Box Corporation]**
 - c. **[CommScope, Inc]**
 - d. **[Cooper B-line; brand of Eaton, Electrical Sector]**

6. Other Available Features Required by the Project:
 - a. Color: **[Black]<Insert color>**.
 - b. Floor-Mounted Racks:
 - 1) Overall Height: **[72 inch (1828.8 mm)][84 inch (2133.6 mm)][As indicated on Drawings]<Insert value>**.
 - 2) Overall Depth: **[23 inch (584.2 mm)][29 inch (736.6 mm)]<Insert value>**.
 - 3) Rail Depth: **[3 inch (76.2 mm)][6 inch (152.4 mm)]<Insert value>**.
 - 4) Two-Post Load Rating: **[200 lb (91 kg)][400 lb (181 kg)]<Insert value>**.
 - 5) Four-Post Load Rating: **[1000 lb (454 kg)][2000 lb (907 kg)]<Insert value>**.
 - 6) Number of Rack Units per Rack: **[38][42][45][52][58][As indicated on Drawings]<Insert number>**.
 - a) Numbering: **[Every][Every five]** rack unit(s), on interior of rack.
 - 7) Threads: **[10-32][12-24][Universal square]**.
 - 8) Vertical and horizontal cable management channels, top and bottom cable troughs,

- grounding lug[, **and a power strip**].
- 9) Base must have minimum four mounting holes for permanent attachment to floor.
- 10) Top must have provisions for attaching to cable tray or ceiling.
- 11) Self-leveling.

c. Wall-Mounted Racks:

- 1) Height: [18 inch (457.2 mm)][22 inch (558.8 mm)][**As indicated on Drawings**]<Insert value>.
- 2) Depth: [23 inch (584.2 mm)][29 inch (736.6 mm)]<Insert value>.
- 3) Load Rating: [150 lb (65 kg)][200 lb (91 kg)]<Insert value>.
- 4) Number of Rack Units per Rack: [8][12][22][**As indicated on Drawings**]<Insert number>.
- 5) Threads: [10-32][12-24][**Universal square**].
- 6) Wall Attachment: Four pre-punched mounting holes.
- 7) Equipment Access: Integral swing.

E. UL NWIN - 23 Inch Enclosed Equipment Rack :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]
 - b. [Black Box Corporation]
 - c. [CommScope, Inc]
 - d. [Cooper B-line; brand of Eaton, Electrical Sector]
 - e. [Dell Technologies Inc.]
 - f. [Hoffman; brand of nVent Electrical plc]
 - g. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - h. [Kendall Howard]
 - i. [Leviton Manufacturing Co., Inc.]
 - j. [Liebert; Vertiv Holdings Co.]
 - k. [Middle Atlantic Products; Legrand North America, LLC]
 - l. [Ortronics, Inc.]
 - m. [Panduit Corp]
 - n. [Siemon Co. (The)]
 - o. [Tripp-Lite]
 - p. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [Black Box Corporation]
 - c. [CommScope, Inc]
 - d. [Cooper B-line; brand of Eaton, Electrical Sector]
 - e. [Dell Technologies Inc.]
 - f. [Hoffman; brand of nVent Electrical plc]
 - g. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - h. [Kendall Howard]

- i. [Leviton Manufacturing Co., Inc.]
 - j. [Liebert; Vertiv Holdings Co.]

 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
- a. Color: [**Black**]<Insert color>.
 - b. Modular Freestanding Cabinets:
 - 1) Overall Height: [**72 inch (1828.8 mm)**][**84 inch (2133.6 mm)**][**As indicated on**

**Drawings]<Insert value>.**

- 2) Overall Depth: [23 inch (584.2 mm)][29 inch (736.6 mm)]<Insert value>.
- 3) Load Rating: [3000 lb (1362 kg)]<Insert value>.
- 4) Number of Rack Units: [38][42][45][52][58][As indicated on Drawings]<Insert number>.

a) Numbering: [Every][Every five] rack unit(s), on interior of rack.

- 5) Threads: [10-32][12-24][Universal square].
- 6) Removable and lockable side and top panels.
- 7) Hinged and lockable front and rear doors.
- 8) Adjustable feet for leveling.
- 9) Screened ventilation openings in roof and rear door.
- 10) Cable access provisions in roof and base.
- 11) RBB.
- 12) [Rack][Roof]-mounted, 550 cfm (260 L/s) fan with filter.
- 13) Power strip.
- 14) All cabinets keyed alike.

c. Modular Wall Cabinets:

- 1) Height: [18 inch (457.2 mm)][22 inch (558.8 mm)][As indicated on Drawings]<Insert value>.
- 2) Depth: [23 inch (584.2 mm)][29 inch (736.6 mm)]<Insert value>.
- 3) Load Rating: [150 lb (65 kg)][200 lb (91 kg)]<Insert value>.
- 4) Number of Rack Units: [8][12][22][As indicated on Drawings]<Insert number>.
- 5) Threads: [10-32][12-24][Universal square].
- 6) Lockable front[and rear] doors.
- 7) Louvered side panels.
- 8) Cable access provisions top and bottom.
- 9) Grounding lug.
- 10) [Rack][Roof]-mounted, 250 cfm (118 L/s) fan.
- 11) Power strip.
- 12) All cabinets keyed alike.

2.8 ENCLOSURE-MOUNTED POWER DISTRIBUTION

A. Description: This category covers relocatable power taps and power distribution units.

B. UL XBYS - Enclosure-Mounted Relocatable Power Tap :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. <Insert manufacturer's name>

3. Listing Criteria: UL CCN XBY5; including UL 1363.
4. Standard Features:
 - a. Rocker-type on-off switch, illuminated when in on position.
 - b. LED indicator lights for power and protection status.
 - c. LED indicator lights for reverse polarity and open outlet ground.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
 - a. Wiring Devices: **[Six]<Insert quantity>[5-15R][5-20R]<Insert type>** receptacles.
 - b. Circuit Breaker and Thermal Fusing: **[When protection is lost, circuit opens and cannot be reset][Unit continues to supply power if protection is lost]**.
 - c. Cord Length: **[Close-coupled, direct plug-in][15 ft (4.5 m)]**.
 - d. Surge Protection: Type 3 SPDs.
 - 1) Peak Single-Impulse Surge Current Rating: **[33][26][13]** kA per phase.
 - 2) Protection modes must be line to neutral, line to ground, and neutral to ground. UL 1449 clamping voltage for all three modes may not be more than **[330 V]<Insert value>**.

C. UL QPQY - Rack-Mounted Power Distribution Center :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB, Electrification Business]**
 - b. **[Fujitsu Network Communications]**
 - c. **[Vertiv Co.]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB, Electrification Business]**
 - b. **[Fujitsu Network Communications]**
 - c. **[Vertiv Co.]**
 - d. **<Insert manufacturer's name>**

3. Listing Criteria: UL CCN QPQY; including UL 62368-1 or UL 60950-1, in addition to UL Subject 1801.
4. Standard Features:
 - a. Input Voltage: [120 V][208 V][120/208 V][208Y/120 V][208 V Delta].
 - b. Input Current: [15 A][20 A][30 A].
 - c. Output Receptacle Types and Quantities:
 - 1) 5-15R: [6][8][10][12][14][20].
 - 2) 5-20R: [6][10][12][20].
 - 3) L5-20R: [6][12][24].
 - 4) L5-30R: 6.
 - 5) L6-20R: [1][12][20][24].
 - 6) L6-30R: [1][6].
 - 7) L21-30R: 1.
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [third-party-verified] corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Other Available Features Required by the Project:
 - a. Rack transfer switch.
 - b. Switched receptacles.
 - c. Monitoring: [Unit level][Outlet level].
 - d. Sensors:
 - 1) Temperature: [1][3].
 - 2) Humidity.
 - 3) Dew point.
 - 4) Airflow.
 - 5) Plug-and-play dry contact.
 - 6) Door position.
 - 7) Water.
 - 8) Power failure.

PART 3 - EXECUTION

3.1 SELECTION OF ELECTRICAL CABINETS AND ENCLOSURES

- A. Unless more stringent requirements are specified in Contract Documents or manufacturers' written

instructions, comply with NFPA 70 for selection of electrical cabinets and enclosures. Consult Architect for resolution of conflicting requirements.

B. Degree of Protection:

1. Outdoors:

- a. **[Type 3R][Type 4][Type 3]** unless otherwise indicated.
- b. Locations Exposed to Hosedown: **[Type 4][Type 6][Type 6P]**.
- c. Locations Subject to Potential Flooding: Type 6P.
- d. Locations Aboveground Where Mechanism Must Operate When Ice Covered: Type 3S.
- e. Locations in-Ground or Exposed to Corrosive Agents: **[Type 4X][Type 6P][Type 3RX]**.
- f. Locations in-Ground or Exposed to Corrosive Agents Where Mechanism Must Operate When Ice Covered: Type 3SX.

2. Indoors:

- a. Type 1 unless otherwise indicated.
- b. Damp or Dusty Locations: **[Type 12][Type 2][Type 4][Type 5]**.
- c. Surface Mounted in Kitchens and Other Locations Exposed to Oil or Coolants: Type 12.
- d. Flush Mounted in Kitchens and Other Locations Exposed to Oil or Coolants: **[Type 12][Type 12K]**.
- e. Locations Exposed to Airborne Dust, Lint, Fibers, or Flyings: **[Type 4][Type 6]**.
- f. Locations Exposed to Hosedown: **[Type 4][Type 6][Type 6P]**.
- g. Locations Exposed to Brief Submersion: **[Type 6][Type 6P]**.
- h. Locations Exposed to Prolonged Submersion: Type 6P.
- i. Locations Exposed to Corrosive Agents: **[Type 4X][Type 6P]**.
- j. Locations Exposed to Spraying Oil or Coolants: Type 13.

3.2 INSTALLATION OF ELECTRICAL CABINETS AND ENCLOSURES

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:

- 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
- 2. Electrical Safety: NFPA 70E.
- 3. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
- 4. Communications Work: BICSI N1.
- 5. Work in ITE Rooms: NFPA 75.
- 6. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
- 7. Cabinets and Cutout Boxes: Article 312 of NFPA 70.
- 8. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

- 1. Mount cabinets and enclosures at heights indicated on Drawings. If mounting heights of boxes are not individually indicated, give priority to ADA requirements. Install boxes with height measured to **[center][top][bottom]** of box unless otherwise indicated.
- 2. Do not install cabinets, enclosures, or fittings in contact with concrete or earth.
- 3. Do not rely on locknuts to penetrate nonconductive coatings on enclosures. Remove coatings in the locknut area prior to assembling conduit to enclosure to ensure a continuous ground path.
- 4. Identification: Provide labels for cabinets, enclosures, racks and associated electrical equipment.

- a. Identify field-installed conductors, interconnecting wiring, and components.
- b. Provide warning signs.
- c. Label each cabinet, enclosure, and rack with engraved metal or laminated-plastic nameplate.

D. Interfaces with Other Work:

1. Firestop penetrations of rated walls and partitions.
2. Ground and bond RBBs in cabinets, enclosures, and racks.
3. Apply arc-flash hazard warning labels cabinets, enclosures, and racks.
4. Coordinate installation of new products for **<Insert system or product family/category>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>**.
5. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>**.
 - a. **<Insert requirements for transition between this Section and related Work>**.

3.3 FIELD QUALITY CONTROL OF ELECTRICAL CABINETS AND ENCLOSURES

A. Adminstrant for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Adminstrant for Communications Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

D. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.

E. Nonconforming Work:

1. Cabinet, enclosure, or rack will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

3.4 CLEANING

A. Remove construction dust and debris from cabinets, enclosures, and racks.

3.5 PROTECTION

A. Protect coatings and finishes of cabinets, enclosures, and racks from damage and deterioration.

1. Repair damage to galvanized finishes with zinc-rich paint recommended by manufacturer.
2. Repair damage to PVC coatings or paint finishes with matching touchup coating recommended by manufacturer.

END OF SECTION 26 27 16 00

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 27 16 00	26 09 23 00	Electrical Power Monitoring
26 27 16 00	26 24 19 00	Motor-Control Centers
26 27 23 00	26 27 26 00	Wiring Devices

THIS PAGE INTENTIONALLY LEFT BLANK

**SECTION 26 27 26 00 - WIRING DEVICES****PART 1 - GENERAL****1.1 SUMMARY****A. Section Includes:**

1. General-use switches, dimmer switches, and fan-speed controller switches.
2. General-grade single straight-blade receptacles.
3. General-grade duplex straight-blade receptacles.
4. Hospital-grade straight-blade receptacles.
5. Receptacles with arc-fault and ground-fault protective devices.
6. Locking receptacles.
7. Pin-and-sleeve receptacles.
8. Cord reels and fittings.
9. Connectors, cords, and plugs.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural load design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
5. Section 260533.16 "Boxes and Covers for Electrical Systems" specifies covers and cover plates referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
7. Section 260923 "Lighting Control Devices" for occupancy sensors, timers, control-voltage switches, and control-voltage dimmers.
8. Section 260936 "Modular Dimming Controls" for multiscene and multipreset dimming controls.
9. Section 260943.16 "Addressable Luminaire Lighting Controls" for network lighting control solid-state devices.
10. Section 260943.23 "Relay-Based Lighting Controls" for network lighting control relay devices.
11. Section 262726.11 "General-Use Switches, Dimmer Switches, and Fan-Speed Controller Switches" for additional wiring device products.
12. Section 262726.31 "General-Grade Single Straight-Blade Receptacles" for additional wiring device products.
13. Section 262726.33 "General-Grade Duplex Straight-Blade Receptacles" for additional wiring device products.
14. Section 262726.35 "Hospital-Grade Straight-Blade Receptacles" for additional wiring device products.
15. Section 262726.37 "Receptacles with Arc-Fault and Ground-Fault Protective Devices" for additional wiring device products.
16. Section 262726.39 "Locking Receptacles" for additional wiring device products.
17. Section 262726.41 "Pin-and-Sleeve Receptacles" for additional wiring device products.

18. Section 262726.43 "Special-Purpose Power Outlet Assemblies" for additional wiring device products.
19. Section 262726.51 "Connectors, Cords, and Plugs" for additional wiring device products.
20. Section 270528 "Pathways for Communications Systems" [**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for raceway materials, routing, locations, and identification of communications equipment and cabling.

1.2 DEFINITIONS

- A. AFCI: Arc-Fault Circuit Interrupter.
- B. Commercial/Industrial-Use Cord Reel: A cord reel subject to severe use in factories, commercial garages, construction sites, and similar locations requiring a harder service-type cord.
- C. GFCI: Ground-Fault Circuit Interrupter.
- D. SPD: Surge Protective Device.
- E. UL 1472 Type I Dimmer: Dimmer in which air-gap switch is used to energize preset lighting levels.

1.3 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference [at the Project site][by web conference].
- B. Preinstallation Coordination Meeting(s): For ceiling-mounted cable reels. Conduct meeting [as videoconference][at Project site].
 1. Attendees: Installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect [Construction Manager][and the Owner's Commissioning Authority] of scheduled meeting dates.

1.4 ACTION SUBMITTALS

- A. Product Data: For each type of specified product.
 1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 2. Include manufacturer's sample extended warranty language.
- B. Samples: One for each type of product specified, in each finish and color specified for [public spaces] .
- C. Shop Drawings: Prepare and submit wiring diagrams for duplex straight-blade receptacles with integral switching means.
- D. Sustainable Design Submittals:
 1. Product data for sustainable design features for each type of product.
 2. Lighting Control Documentation: Floor plans indicating the following information:

- a. As-installed locations of switches and dimmers.
 - b. Lighting zones and control strategy for each switch or dimmer, including unoccupied time-delay setting for shut-off and override time-delay setting for shut-off.
 - c. Multilevel or dimming range capability for each switch or dimmer.
 - d. Which switches or dimmers are operated by occupancy sensors, vacancy sensors, daylighting sensors, or time clocks.
3. Record floor plan Drawings indicating as-installed locations of switches and dimmers, indicating lighting zone's each device control, to verify extent of ability of the installed Work to provide occupant control for customizing environment.
 4. Record floor plan Drawings indicating as-installed locations of uncontrolled and marked controlled receptacles superimposed on office furniture layout, to verify extent of ability of the installed Work to provide each occupant ability to select at least one uncontrolled receptacle and at least one controlled receptacle for powering workspace equipment. Indicate locations of UL-approved relocatable power taps and power strips, indicating means of securing protection from damage and accessibility for inspection. Indicate locations of temporary extension cords, indicating plan for replacing them with permanent wiring within 90 days.
 5. Product Data for Automated Demand Response Controls: For automated demand response controls connected to **[HVAC systems,][lighting systems,][automatic receptacle controls,][service water heating,][and][electric vehicle supply equipment]** .
- E. Field QC Reports: For specified tests and inspections.

1.5 INFORMATIONAL SUBMITTALS

- A. Manufacturer's Published Instructions: For wiring devices.
- B. Field Reports: Manufacturer's field reports for field QC support.

1.6 CLOSEOUT SUBMITTALS

- A. Warranty Documentation:
 1. Special manufacturer extended warranty for devices and cord reels and fittings.
 2. Special installer extended warranty for devices and cord reels and fittings.

1.7 MAINTENANCE MATERIAL SUBMITTALS

- A. Extra Stock Material: Furnish straight-blade receptacles and connectors, cords, and plugs.
- B. Special Tools: Furnish straight-blade receptacles and connectors, cords, and plugs.

1.8 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, conduct tests of complex equipment, analyze test and equipment data, plan a job, and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able

to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.

- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

1.9 WARRANTY FOR DEVICES

- A. Special Installer Extended Warranty: Installer warrants that installed devices perform in accordance with specified requirements and agrees to repair or replace products that fail to perform as specified within extended-warranty period. Warranty must convey to the Owner upon acceptance of the Work.
 - 1. Extended-Warranty Period: **[Two][Three][Four]** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that devices perform in accordance with specified requirements and agrees to provide repair or replacement of devices that fail to perform as specified within extended warranty period.
 - 1. Initial Extended Warranty Period: **[Three][Four][Five]** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
 - 2. Follow-On Extended Warranty Period: **[Eight]** years from date of Substantial Completion; **[full][prorated]** coverage for materials only, free on board **[origin][destination]** , freight prepaid.

1.10 WARRANTY FOR CORD REELS AND FITTINGS

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed cord-reel power outlet assemblies perform in accordance with specified requirements and agrees to repair or replace assemblies that fail to perform as specified within extended warranty period.
 - 1. Extended Warranty Period: **[Two][Three][Four]** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that components of cord-reel power outlet assemblies perform in accordance with specified requirements and agrees to provide repair or replacement of components that fail to perform as specified within extended warranty period.
 - 1. Initial Extended Warranty Period: **[Three][Four][Five]** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
 - 2. Follow-On Extended Warranty Period: **[Eight]** years from date of Substantial Completion; **[full][prorated]** coverage for materials only, free on board **[origin][destination]** , freight prepaid.

PART 2 - PRODUCTS

2.1 EXISTING PRODUCTS TO BE MODIFIED

A. Description:

1. Sustainable Design Features:

- a. Material Reuse: Product is salvaged, refurbished, or reused.

2.2 EXISTING PRODUCTS TO BE REMOVED AND REINSTALLED

A. Description:

1. Sustainable Design Features:

- a. Material Reuse: Product is salvaged, refurbished, or reused.

2.3 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.4 GENERAL-USE SWITCHES, DIMMER SWITCHES, AND FAN-SPEED CONTROLLER SWITCHES

A. Toggle Switch :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :**
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
- 2. Source Limitations: Obtain products from single manufacturer.
- 3. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Flush Switches: UL CCN WMUZ and UL 20.
- 4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange]** in accordance

with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner .

b. Configuration:

- 1) General-duty, 120-277 V, 15 A, [single pole][double pole][three way][four way] .
- 2) General-duty, 120-277 V, 20 A, [single pole][double pole][three way][four way] .
- 3) Extra-heavy-duty, 120-277 V, 15 A, [single pole][double pole][three way][four way] .
- 4) Extra-heavy-duty, 120-277 V, 20 A, [single pole][double pole][three way][four way] .
- 5) Extra-heavy-duty, 120-277 V, 30 A, [single pole][double pole][three way] .

5. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide [**third-party-verified**] corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
- b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
- c. Regional Materials (IgCC): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
- d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
- e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Accessories:

- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
- b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

B. Toggle Switch with Forked Key Lock :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Eaton, Wiring Devices; Arrow Hart]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
2. Source Limitations: Obtain products from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical

testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:

- a. Flush Switches: UL CCN WMUZ and UL 20.
4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Black][As indicated on architectural Drawings]** as directed by the Owner .
 - b. Configuration:
 - 1) 120-277 V, 15 A, **[single pole][double pole][three way][four way]** .
 - 2) 120-277 V, 20 A, **[single pole][double pole][three way][four way]** .
 - 3) 120-277 V, 30 A, **[single pole][double pole]** .
 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- C. Rocker Switch :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 2. Source Limitations: Obtain products from single manufacturer.
 3. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Flush Switches: UL CCN WMUZ and UL 20.

4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner .
 - b. Configuration:
 - 1) 120-277 V, 15 A, [single pole][three way][four way] .
 - 2) 120-277 V, 20 A, [single pole][double pole][three way][four way] .
5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [**third-party-verified**] corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

D. Rocker Switch with Nightlight :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Eaton, Wiring Devices; Arrow Hart]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
2. Source Limitations: Obtain products from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:

- a. Flush Switches: UL CCN WMUZ and UL 20.
- 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner .
 - b. Configuration: 120-277 V, 20 A, [single pole][three way][four way] .
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [**third-party-verified**] corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- E. Type I Dimmer Switch :
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Eaton, Wiring Devices; Arrow Hart]
 - b. [GE Lighting; a Savant Company]
 - c. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Leviton Manufacturing Co., Inc.]
 - e. [Lutron Electronics Co., Inc]
 - f. [Pass & Seymour; Legrand North America, LLC]
 - 2. Source Limitations: Obtain products from single manufacturer.
 - 3. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:

- a. General-Use Switch Dimmers: UL CCN EOYX and UL 1472.
- 4. Standard Features:
 - a. UL 1472 Type I dimmer.
 - b. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner .
 - c. Switch Style: [Toggle][Rocker][Push button] .
 - d. Dimming Control Style: [Slide][Rotary] .
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide [**third-party-verified**] corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

F. Air-Gap Fan-Speed Controller Switch :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Eaton, Wiring Devices; Arrow Hart]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
- 2. Source Limitations: Obtain products from single manufacturer.
- 3. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical

testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:

- a. Fan-Speed Controls: UL CCN GQHG and UL 1917.
- 4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.
- 5. Sustainable Design Features:
 - a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

2.5 GENERAL-GRADE SINGLE STRAIGHT-BLADE RECEPTACLES

A. Single Straight-Blade Receptacle :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Leviton Manufacturing Co., Inc.]**
 - c. **[Pass & Seymour; Legrand North America, LLC]**
- 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or

more of the following guide information and corresponding standards:

- a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.

3. Standard Features:

- a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner .
- b. Configuration:
 - 1) General-duty, **[NEMA 5-15R][NEMA 5-20R][NEMA 5-30R][NEMA 5-50R]** .
 - 2) General-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 3) General-duty, **[NEMA 6-15R][NEMA 6-20R][NEMA 6-30R][NEMA 6-50R]** .
 - 4) General-duty, smooth face, NEMA 6-20R.
 - 5) General-duty, **[NEMA 14-30R (Dryer)][NEMA 14-50R (Range)]** .
 - 6) Heavy-duty, **[NEMA 5-30R][NEMA 5-50R]** .
 - 7) Heavy-duty, **[NEMA 6-30R][NEMA 6-50R]** .
 - 8) Heavy-duty, **[NEMA 7-20R][NEMA 7-30R][NEMA 7-50R]** .
 - 9) Heavy-duty, **[NEMA 14-20R][NEMA 14-30R (Dryer)][NEMA 14-50R (Range)][NEMA 14-60R]** .
 - 10) Heavy-duty, **[NEMA 15-20R][NEMA 15-30R][NEMA 15-50R][NEMA 15-60R]** .
 - 11) Heavy-duty, **[NEMA 18-20R][NEMA 18-30R][NEMA 18-50R][NEMA 18-60R]** .
 - 12) Extra-heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 13) Extra-heavy-duty, **[NEMA 6-15R][NEMA 6-20R]** .

4. Other Available Features Required by the Project:

- a. Has factory-terminated connectors on wiring device pigtails for quick installation.

5. Accessories:

- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
- b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

B. Tamper-Resistant, Clock Hanger Straight-Blade Receptacle :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Pass & Seymour; Legrand North America, LLC]**
- 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.

3. Standard Features:
 - a. Finish: **[White nylon][Ivory nylon][Brass][Stainless steel][Brushed brass][Nickel plated]** .
 - b. Configuration: Recessed, smooth wallplate; **[NEMA 5-15R][NEMA 5-20R]** .
4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.

C. Tamper-Resistant, Floor-Mounted Display Straight-Blade Receptacle :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Pass & Seymour; Legrand North America, LLC]**
2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
3. Standard Features:
 - a. Finish: **[Brushed brass][Nickel plated]** .
4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.

2.6 GENERAL-GRADE DUPLEX STRAIGHT-BLADE RECEPTACLES

A. Duplex Straight-Blade Receptacle :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Leviton Manufacturing Co., Inc.]**
 - c. **[Pass & Seymour; Legrand North America, LLC]**
2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or

more of the following guide information and corresponding standards:

- a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
- b. Surge Protective Devices: UL 1449, Type 3.

3. Standard Features:

- a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner .
- b. Configuration:
 - 1) General-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 2) General-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 3) General-duty, **[NEMA 6-15R][NEMA 6-20R]** .
 - 4) General-duty, smooth face, **[NEMA 6-15R][NEMA 6-20R]** .
 - 5) Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 6) Heavy-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 7) Heavy-duty, **[NEMA 6-15R][NEMA 6-20R]** .
 - 8) Heavy-duty, smooth face, NEMA 6-15R.
 - 9) Heavy-duty, NEMA 7-15R.
 - 10) Extra-heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 11) Extra-heavy-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 12) Extra-heavy-duty, **[NEMA 6-15R][NEMA 6-20R]** .
 - 13) Extra-heavy-duty, smooth face, **[NEMA 6-15R][NEMA 6-20R]** .

4. Other Available Features Required by the Project:

- a. Has factory-terminated connectors on wiring device pigtails for quick installation.

5. Accessories:

- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
- b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

B. Tamper-Resistant Duplex Straight-Blade Receptacle :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Leviton Manufacturing Co., Inc.]**
 - c. **[Pass & Seymour; Legrand North America, LLC]**
- 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.

3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner .
 - b. Configuration:
 - 1) General-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 2) General-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 3) Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 4) Heavy-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 5) Extra-heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

C. Isolated Ground Duplex Straight-Blade Receptacle :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Leviton Manufacturing Co., Inc.]**
 - b. **[Pass & Seymour; Legrand North America, LLC]**
2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.
3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner .
 - b. Configuration:
 - 1) General-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 2) General-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 3) Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 4) Heavy-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 5) Extra-heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 6) Extra heavy-duty, **[NEMA 6-15R][NEMA 6-20R]** .

4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- D. Isolated Ground Duplex Straight-Blade Receptacle with Type 3 Surge Protective Device :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.
 3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.
 - b. Configuration: Heavy-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- E. Tamper-Resistant Duplex Straight-Blade Receptacle with USB Outlet to Power Class 2 Equipment :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following] :

- a. [Eaton, Wiring Devices; Arrow Hart]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
2. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
- a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.
3. Standard Features:
- a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner .
 - b. Configuration:
 - 1) General-duty, [NEMA 5-15R][NEMA 5-20R] ; two USB-A ports.
 - 2) General-duty, [NEMA 5-15R][NEMA 5-20R] ; two USB-C ports.
 - 3) General-duty, [NEMA 5-15R][NEMA 5-20R] ; one USB-A port; one USB-C port.
 - 4) General-duty, smooth face, two USB-A ports.
 - 5) General-duty, smooth face, four USB-A ports.
4. Other Available Features Required by the Project:
- a. Has factory-terminated connectors on wiring device pigtails for quick installation.
5. Accessories:
- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- F. Wired Full-Controlled Duplex Straight-Blade Receptacle :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Pass & Seymour; Legrand North America, LLC]
 2. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or

more of the following guide information and corresponding standards:

- a. Receptacles with Integral Switching Means: UL CCN RTX1 and UL Subject 498B.
3. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner.
 - b. Configuration: [NEMA 5-15R][NEMA 5-20R] .
4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

G. Wired Half-Controlled Duplex Straight-Blade Receptacle :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Pass & Seymour; Legrand North America, LLC]
2. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles with Integral Switching Means: UL CCN RTX1 and UL Subject 498B.
3. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner.
 - b. Configuration: [NEMA 5-15R][NEMA 5-20R] .
4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
5. Accessories:

- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
- b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

2.7 HOSPITAL-GRADE STRAIGHT-BLADE RECEPTACLES

A. Hospital-Grade, Non-Ferrous Duplex Straight-Blade Receptacle :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
- 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.
- 3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.
 - b. Configuration: Extra-heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
- 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
- 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

B. Hospital-Grade, Tamper-Resistant Duplex Straight-Blade Receptacle :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Leviton Manufacturing Co., Inc.]**
 - c. **[Pass & Seymour; Legrand North America, LLC]**

2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.
 3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.
 - b. Configuration:
 - 1) Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 2) Heavy-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 - 3) Extra-heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 - 4) Extra-heavy-duty, smooth face, **[NEMA 5-15R][NEMA 5-20R]** .
 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- C. Hospital-Grade, Tamper-Resistant, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.
 3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance**

- with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner.
- b. Configuration:
- 1) Heavy-duty, [NEMA 5-15R][NEMA 5-20R] .
 - 2) Heavy-duty, smooth face, [NEMA 5-15R][NEMA 5-20R] .
4. Other Available Features Required by the Project:
- a. Has factory-terminated connectors on wiring device pigtails for quick installation.
5. Accessories:
- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
- b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- D. Hospital-Grade, Tamper-Resistant, Isolated Ground Duplex Straight-Blade Receptacle :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Leviton Manufacturing Co., Inc.]
 - b. [Pass & Seymour; Legrand North America, LLC]
 2. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.
 3. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner.
 - b. Configuration:
 - 1) Heavy-duty, [NEMA 5-15R][NEMA 5-20R] .
 - 2) Heavy-duty, smooth face, [NEMA 5-15R][NEMA 5-20R] .
 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

E. Hospital-Grade, Tamper-Resistant Duplex Straight-Blade Receptacle with USB Outlet to Power Class 2 Equipment :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Pass & Seymour; Legrand North America, LLC]**
 - d. >
2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
 - b. Surge Protective Devices: UL 1449, Type 3.
3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.
 - b. Configuration:
 - 1) Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** ; two USB-A ports.
 - 2) Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** ; two USB-C ports.
 - 3) Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** ; one USB-A port; one USB-C port.
4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

2.8 RECEPTACLES WITH ARC-FAULT AND GROUND-FAULT PROTECTIVE DEVICES

A. General-Grade, Tamper-Resistant Duplex Straight-Blade Receptacle with AFCI Device :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**

- b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
- 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Outlet Branch-Circuit Type AFCIs: UL CCN AWBZ, UL 498, UL 1699, and UL Subject 1699A.
- 3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
- 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
- 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- B. General-Grade, Tamper-Resistant Duplex Straight-Blade Receptacle with AFCI and GFCI Device :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Leviton Manufacturing Co., Inc.]**
 - c. **[Pass & Seymour; Legrand North America, LLC]**
 - 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Outlet Branch-Circuit Type GFCIs and AFCIs: UL CCN KCXX, UL 498, UL 943, UL 1699, and UL Subject 1699A.
 - 3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.

- b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- C. General-Grade, Weather-Resistant, Tamper-Resistant Duplex Straight-Blade Receptacle with GFCI Device :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- D. General-Grade, Weather-Resistant, Tamper-Resistant, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle with GFCI Device :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
3. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]** as directed by the Owner.
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]** .
4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- E. Hospital-Grade, Weather-Resistant, Tamper-Resistant, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle with GFCI Device :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:

- a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 3. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner.
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R] .
 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 5. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- F. Hospital-Grade, Isolated Ground, Weather-Resistant, Tamper-Resistant Duplex Straight-Blade Receptacle with GFCI Device :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Eaton, Wiring Devices; Arrow Hart]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 2. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 3. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings] as directed by the Owner.
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R] .
 4. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 5. Accessories:

- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
- b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

2.9 LOCKING RECEPTACLES

A. UL RTRT - NEMA, 125 V, Locking Receptacle :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB Electrification Installations Products]**
 - b. **[Eaton, Wiring Devices; Arrow Hart]**
 - c. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Pass & Seymour; Legrand North America, LLC]**
2. Source Limitations: Obtain products from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
4. Standard Features:
 - a. Device Color: Black with yellow voltage indication on face.
 - b. Configuration: 2 pole, 3 wire, grounding, **[NEMA L5-15R][NEMA L5-20R][NEMA L5-30R]** .

B. UL RTRT - NEMA, 125 V, Isolated Ground Locking Receptacle :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton, Wiring Devices; Arrow Hart]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
2. Source Limitations: Obtain products from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.

4. Standard Features:

- a. Device Color: Black with yellow voltage indication on face.
- b. Configuration: 2 pole, 3 wire, grounding, [NEMA L5-15R][NEMA L5-20R][NEMA L5-30R] .

C. UL RTRT - NEMA, 250 V, Locking Receptacle :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Eaton, Wiring Devices; Arrow Hart]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
2. Source Limitations: Obtain products from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
4. Standard Features:
 - a. Device Color: Black with blue voltage indication on face.
 - b. Configuration:
 - 1) 2 pole, 3 wire, grounding, [NEMA L6-15R][NEMA L6-20R][NEMA L6-30R] .
 - 2) 3 pole, 4 wire, grounding, [NEMA L15-20R][NEMA L15-30R] .
 - 3) 4 pole, 4 wire, non-grounding, [NEMA L18-20R][NEMA L18-30R] .
 - 4) 4 pole, 5 wire, grounding, [NEMA L21-20R][NEMA L21-30R] .

D. UL RTRT - NEMA, 250 V, Isolated Ground Locking Receptacle :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Eaton, Wiring Devices; Arrow Hart]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
2. Source Limitations: Obtain products from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or

more of the following guide information and corresponding standards:

- a. Receptacles for Plugs and Attachment Plugs: UL CCN RTRT and UL 498.
- 4. Standard Features:
 - a. Device Color: Black with blue voltage indication on face.
 - b. Configuration:
 - 1) 2 pole, 3 wire, grounding, **[NEMA L6-15R][NEMA L6-20R][NEMA L6-30R]** .
 - 2) 3 pole, 4 wire, grounding, **[NEMA L15-20R][NEMA L15-30R]** .
 - 3) 4 pole, 5 wire, grounding, **[NEMA L21-20R][NEMA L21-30R]** .

2.10 PIN-AND-SLEEVE RECEPTACLES

A. UL QLIW - C2 Series, 125/250 V, Pin-and-Sleeve Receptacles :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB Electrification Installations Products]**
 - b. **[Crouse-Hinds; brand of Eaton, Electrical Sector]**
 - c. **[Eaton, Wiring Devices; Arrow Hart]**
 - d. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - f. **[Leviton Manufacturing Co., Inc.]**
 - g. **[Pass & Seymour; Legrand North America, LLC]**
- 2. Source Limitations: Obtain products from single manufacturer.
- 3. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Pin-and-Sleeve Type Receptacles: UL CCN QLIW; including UL 1682.
- 4. Standard Features:
 - a. Series: UL 1686 Series C2 and IEC 60309-2 Series II.
 - b. Voltage Rating: 125/250 V.
 - c. Configuration:
 - 1) 2 pole, 3 wire, **[20 A][30 A, IP67][30 A, IP69k][60 A, IP67][60 A, IP69k][100 A]** .
 - 2) 3 pole, 4 wire, **[20 A][30 A, IP67][30 A, IP69k][60 A, IP67][60 A, IP69k][100 A, IP67][100 A, IP69k]** .
 - 3) 4 pole, 5 wire, **[20 A][30 A, IP67][30 A, IP69k][60 A, IP67][60 A, IP69k][100 A, IP67][100 A, IP69k]** .

B. UL QLIW - C2 Series, 480 V, Pin-and-Sleeve Receptacles :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

- a. [ABB Electrification Installations Products]
 - b. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - c. [Eaton, Wiring Devices; Arrow Hart]
 - d. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - e. [Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - f. [Leviton Manufacturing Co., Inc.]
 - g. [Pass & Seymour; Legrand North America, LLC]
2. Source Limitations: Obtain products from single manufacturer.
 3. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. Pin-and-Sleeve Type Receptacles: UL CCN QLIW; including UL 1682.
 4. Standard Features:
 - a. Series: UL 1686 Series C2 and IEC 60309-2 Series II.
 - b. Voltage Rating: 480 V.
 - c. Configuration:
 - 1) 2 pole, 3 wire, [20 A][30 A, IP67][30 A, IP69k][60 A, IP67][60 A, IP69k][100 A] .
 - 2) 3 pole, 4 wire, [20 A][30 A, IP67][30 A, IP69k][60 A, IP67][60 A, IP69k][100 A, IP67][100 A, IP69k] .
 - 3) 4 pole, 5 wire, [20 A][30 A, IP67][30 A, IP69k][60 A, IP67][60 A, IP69k][100 A, IP67][100 A, IP69k] .

2.11 CORD REELS AND FITTINGS

A. Power Outlet Cord Management Assembly :

1. Source Limitations: Obtain all components for each power outlet cord management assembly from single manufacturer.
2. General Characteristics: Provide the following specified products with fabricated power outlet cord management assembly:
 - a. Cord Management System:
 - 1) Spring-driven commercial/industrial-use cord reel .
 - 2) Cord reel for use in Class I Group D hazardous location .
 - b. Termination Fitting:
 - 1) the Owner-furnished fitting.
 - 2) Outdoor-use, watertight, sealed cord connector;

3. Accessories:
 - a. Mounting: **[Ceiling][Wall][Floor]** mounted.
4. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
 - a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events **[and unit must be fully operational after seismic events] ."**
 - b. Component Importance Factor (I_p): **[1.0][1.5]** .
 - c. Component Amplification Factor (a_p): **[1.0][2.5]**.
 - d. Component Response Modification Factor (R_p): **[1.5][2.0][2.5][6.0]**.
 - e. Component Overstrength Factor (Ω_o): **[1.5][2.5]** .

B. Spring-Driven Commercial/Industrial-Use Cord Reel, 14 AWG Conductors :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton]**
 - b. **[Ericson Manufacturing Company]**
 - c. **[Gleason Reel; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Cord and Cable Reels: UL CCN SBCV and UL 355.
3. Standard Features:
 - a. Spring take-up retraction mechanism.
 - b. Electrical Rating with Cable: 600 V, **[18 A][15 A][12 A][10.5 A][7.5 A]** .
 - c. Color: **[Yellow][Black][White]**.
 - d. Enclosure Degree of Protection: **[Type 4][Type 4X]** .
 - e. Ball stop.
 - f. Pivot base.
 - g. Spool Capacity:
 - 1) 14 AWG, two wires and equipment ground, **[20 ft (6 m)][30 ft (9.1 m)][40 ft (12.2 m)][50 ft (15.2 m)][60 ft (18.3 m)][70 ft (21.3 m)]** .

- 2) 14 AWG, three wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][35 ft (10.7 m)][40 ft (12.2 m)][50 ft (15.2 m)][60 ft (18.3 m)][70 ft (21.3 m)] .
 - 3) 14 AWG, five wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][40 ft (12.2 m)][50 ft (15.2 m)][60 ft (18.3 m)] .
 - 4) 14 AWG, seven wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][40 ft (12.2 m)][50 ft (15.2 m)] .
 - 5) 14 AWG, nine wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)] .
 - 6) 14 AWG, eleven wires and equipment ground, [20 ft (6 m)][60 ft (18.3 m)] .

 - 7) 14 AWG, two wires and equipment ground, [25 ft (7.6 m)][35 ft (10.7 m)][45 ft (13.7 m)][90 ft (27.4 m)][100 ft (30.5 m)][125 ft (38.1 m)][150 ft (45.7 m)] .
 - 8) 14 AWG, three wires and equipment ground, [25 ft (7.6 m)][45 ft (13.7 m)][65 ft (19.8 m)][80 ft (24.4 m)][90 ft (27.4 m)][100 ft (30.5 m)][125 ft (38.1 m)][150 ft (45.7 m)] .
 - 9) 14 AWG, five wires and equipment ground, [25 ft (7.6 m)][35 ft (10.7 m)][45 ft (13.7 m)] .
 - 10) 14 AWG, seven wires and equipment ground, [25 ft (7.6 m)][35 ft (10.7 m)][45 ft (13.7 m)] .
 - 11) 14 AWG, nine wires and equipment ground, [25 ft (7.6 m)][50 ft (15.2 m)] .
 - 12) 14 AWG, eleven wires and equipment ground, [25 ft (7.6 m)][30 ft (9.1 m)] .
4. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events [**and unit must be fully operational after seismic events**] .
 - b. Component Importance Factor (Ip): [1.0][1.5] .
 - c. Component Amplification Factor (ap): [1.0][2.5].
 - d. Component Response Modification Factor (Rp): [1.5][2.0][2.5][6.0].
 - e. Component Overstrength Factor (Ωo): [1.5][2.5].
- C. Spring-Driven Commercial/Industrial-Use Cord Reel, 12 AWG Conductors :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Appleton; Emerson Electric Co., Automation Solutions]
 - b. [Ericson Manufacturing Company]
 - c. [Gleason Reel; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Reelcraft Industries Inc]
 2. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. Cord and Cable Reels: UL CCN SBCV and UL 355.

3. Standard Features:
- a. Spring take-up retraction mechanism.
 - b. Electrical Rating with Cable: 600 V, [25 A][20 A][16 A][14 A] .
 - c. Color: [Yellow][Black][White].
 - d. Enclosure Degree of Protection: [Type 4][Type 4X] .
 - e. Ball stop.
 - f. Pivot base.
 - g. Spool Capacity:
 - 1) 12 AWG, two wires and equipment ground, [20 ft (6 m)][25 ft (7.6 m)][30 ft (9.1 m)][40 ft (12.2 m)][50 ft (15.2 m)][60 ft (18.3 m)] .
 - 2) 12 AWG, three wires and equipment ground, [20 ft (6 m)][25 ft (7.6 m)][30 ft (9.1 m)][40 ft (12.2 m)][45 ft (13.7 m)][50 ft (15.2 m)][60 ft (18.3 m)][100 ft (30.5 m)] .
 - 3) 12 AWG, five wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][40 ft (12.2 m)] .
 - 4) 12 AWG, seven wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)] .
 - 5) 12 AWG, two wires and equipment ground, [35 ft (10.7 m)][45 ft (13.7 m)][70 ft (21.3 m)][80 ft (24.4 m)][90 ft (27.4 m)][100 ft (30.5 m)][125 ft (38.1 m)][150 ft (45.7 m)] .
 - 6) 12 AWG, three wires and equipment ground, [35 ft (10.7 m)][70 ft (21.3 m)][80 ft (24.4 m)][90 ft (27.4 m)][125 ft (38.1 m)] .
 - 7) 12 AWG, four wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][40 ft (12.2 m)] .
 - 8) 12 AWG, five wires and equipment ground, [25 ft (7.6 m)][35 ft (10.7 m)][45 ft (13.7 m)] .
 - 9) 12 AWG, seven wires and equipment ground, [25 ft (7.6 m)][40 ft (12.2 m)] .
4. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events [**and unit must be fully operational after seismic events**] ."
 - b. Component Importance Factor (Ip): [1.0][1.5] .
 - c. Component Amplification Factor (ap): [1.0][2.5].
 - d. Component Response Modification Factor (Rp): [1.5][2.0][2.5][6.0].
 - e. Component Overstrength Factor (Ωo): [1.5][2.5].
- D. Spring-Driven Cord Reel for Use in Class I Group D Hazardous Locations :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
- a. [Appleton; Emerson Electric Co., Automation Solutions]
 - b. [Conductix-Wampfler USA; Delachaux Group]
 - c. [KH Industries, Inc.]

2. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. Cord Reels for Use in Hazardous Locations: UL CCN SAOX and UL 355.
3. Standard Features:
 - a. Spring take-up retraction mechanism.
 - b. Electrical Rating with Cable: 600 V, [35 A][25 A][20 A][18 A][15 A] .
 - c. Color: [Yellow][Black][White].
 - d. Enclosure Degree of Protection: [Type 4][Type 4X] .
 - e. Ball stop.
 - f. Pivot base.
 - g. Spool Capacity:
 - 1) 14 AWG, two wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][50 ft (15.2 m)] .
 - 2) 14 AWG, three wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][50 ft (15.2 m)] .
 - 3) 12 AWG, two wires and equipment ground, [30 ft (9.1 m)][50 ft (15.2 m)] .
 - 4) 14 AWG, two wires and equipment ground, [40 ft (12.2 m)][60 ft (18.3 m)][70 ft (21.3 m)] .
 - 5) 14 AWG, three wires and equipment ground, [40 ft (12.2 m)][60 ft (18.3 m)] .
 - 6) 12 AWG, two wires and equipment ground, [20 ft (6 m)][40 ft (12.2 m)][60 ft (18.3 m)] .
 - 7) 12 AWG, three wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][40 ft (12.2 m)][50 ft (15.2 m)] .
 - 8) No. 10 AWG, two wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][40 ft (12.2 m)] .
 - 9) No. 10 AWG, three wires and equipment ground, [20 ft (6 m)][30 ft (9.1 m)][40 ft (12.2 m)] .
4. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
 - a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events [and unit must be fully operational after seismic events] ."
 - b. Component Importance Factor (Ip): [1.0][1.5] .
 - c. Component Amplification Factor (ap): [1.0][2.5].
 - d. Component Response Modification Factor (Rp): [1.5][2.0][2.5][6.0].
 - e. Component Overstrength Factor (Ωo): [1.5][2.5].

**2.12 CONNECTORS, CORDS, AND PLUGS****A. Outdoor-Use, Watertight, Sealed Cord Connector :**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :**
 - a. **[Ericson Manufacturing Company]**
2. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][FM Approvals][CSA Group (with "US" marking)][Intertek ETL][TÜV Rheinland][or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Fuseless Attachment Plugs: UL CCN AXUT and UL 498.
3. Standard Features:
 - a. Configuration:
 - 1) NEMA 5-15 **[with diagnostic LED indicator]** .
 - 2) NEMA 5-20 **[with diagnostic LED indicator]** .
 - 3) NEMA 6-15.
 - 4) NEMA 6-20.
 - 5) NEMA L5-15.
 - 6) NEMA L5-20 **[with diagnostic LED indicator]** .
 - 7) NEMA L5-30.
 - 8) NEMA L6-15.
 - 9) NEMA L6-20.
 - 10) NEMA L6-30.
 - 11) NEMA L7-15.
 - 12) NEMA L7-20.
 - 13) NEMA L7-30.
 - 14) NEMA L14-20.
 - 15) NEMA L14-30.
 - 16) NEMA L15-20.
 - 17) NEMA L15-30.
 - 18) NEMA L16-20.
 - 19) NEMA L16-30.
 - 20) NEMA L17-30.
 - 21) NEMA L18-30.

2.13 MAINTENANCE MATERIAL ITEMS FOR STRAIGHT-BLADE RECEPTACLES

- A. Extra Stock Material: Furnish to the Owner extra materials **[from same production run,]** that match products installed and that are packaged with protective covering for storage and identified with labels describing contents. **[Include the following:]**
 1. SPD Receptacles: Equal to **[10]** percent of quantity installed for each kind specified, but no fewer than **[one]** units.
 2. Controlled Receptacles: Equal to **[10]** percent of quantity installed for each kind specified, but no fewer than **[one]** units.

- B. Special Tools: Furnish to the Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to controlled receptacles, that are packaged with protective covering for storage on-site and identified with labels describing contents.

2.14 MAINTENANCE MATERIAL ITEMS FOR CONNECTORS, CORDS, AND PLUGS

- A. Extra Stock Material: Furnish to the Owner extra materials **[from same production run,]** that match products installed and that are packaged with protective covering for storage and identified with labels describing contents. **[Include the following:]**
 - 1. Cord Connectors: **[One]** of each kind.
- B. Special Tools: Furnish to the Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to cord connectors, that are packaged with protective covering for storage on-site and identified with labels describing contents.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Receptacles:
 - 1. Verify that receptacles to be procured and installed for the Owner-furnished equipment are compatible with mating attachment plugs on equipment.
- B. Cord Reels and Fittings:
 - 1. Examine roughing-in for cord reel mounting and power connections to verify actual locations of mounts and power connections before cord reel installation.
 - 2. Examine walls, floors, and ceilings for suitable conditions where cord reel will be installed.
 - 3. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 SELECTION OF CONTROLLED AND UNCONTROLLED RECEPTACLES

- A. Private and Open Office Spaces:
 - 1. Uncontrolled Receptacles at Workstations: Coordinate final locations of receptacles with furniture plan such that at least one uncontrolled receptacle is selected for installation not greater than **6 ft. (1.8 m)** from each workstation.
 - 2. Controlled Receptacles at Workstations: Coordinate final locations of receptacles with furniture plan such that at least one controlled receptacle is selected for installation not greater than **6 ft. (1.8 m)** from each workstation.
 - 3. Contact Architect for resolution of discrepancies between these requirements and Drawings, as directed by the Owner.

3.3 SELECTION OF GFCI RECEPTACLES

- A. Healthcare Facilities: Unless protection of downstream branch-circuit wiring, cord sets, and power-supply cords is required by NFPA 70 or NFPA 99, provide non-feed-through GFCI receptacles.

3.4 INSTALLATION OF GENERAL-USE SWITCHES, DIMMER SWITCHES, AND FAN-SPEED CONTROLLER SWITCHES

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Safety: NFPA 70E.
 - 3. Life Safety and Means of Egress Work: NFPA 101.
 - 4. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 5. Wiring Devices: NECA NEIS 130.
 - 6. Mounting Heights: NECA NEIS 1.
 - 7. Consult Architect for resolution of conflicting requirements, as directed by the Owner.
- C. Interfaces with Other Work:
 - 1. Identification:
 - a. Identify cover or cover plate for device with panelboard identification and circuit number.
 - b. Mark cover or cover plate using hot, stamped, or engraved machine printing with **[black][white][red]** -filled lettering, and provide durable wire markers or tags inside device box or outlet box.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - d. Healthcare Facilities: Distinctively identify covers or cover plates of device boxes and outlet boxes that are supplied from life safety and critical branch power supplies following facility's standard practice.

3.5 INSTALLATION OF STRAIGHT-BLADE RECEPTACLES

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Safety: NFPA 70E.
 - 3. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 4. Work in ITE Rooms: NFPA 75.
 - 5. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 - 6. Work in Confined Spaces: NFPA 350.
 - 7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 8. Installing and Maintaining Wiring Devices: NECA NEIS 130.
 - 9. Mounting Heights: Unless otherwise indicated in the Contract Documents, comply with mounting heights recommended in NECA NEIS 1.
 - 10. Receptacle Orientation: Unless otherwise indicated in the Contract Documents, orient receptacle to match configuration diagram in NEMA WD 6.
 - a. Hospital-Grade Receptacle Orientation: Orient receptacle with ground pin or neutral pin at top.
 - 11. Consult Architect for resolution of conflicting requirements, as directed by the Owner.

C. Interfaces with Other Work:

1. Identification: Provide labels for receptacles and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - 1) Identify cover or cover plate for device with panelboard identification and circuit number.
 - 2) Mark cover or cover plate using hot, stamped, or engraved machine printing with **[black][white][red]** -filled lettering, and provide durable wire markers or tags inside device box or outlet box.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - d. Healthcare Facilities: Distinctively identify covers or cover plates of device boxes and outlet boxes that are supplied from life safety and critical branch power supplies following facility's standard practice.
2. Do not install Type 3 SPD, including surge-protected relocatable taps and power strips, on branch circuit downstream of GFCI device.

3.6 INSTALLATION OF LOCKING RECEPTACLES

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 2. Electrical Safety: NFPA 70E.
 3. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 4. Work in ITE Rooms: NFPA 75.
 5. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 6. Work in Confined Spaces: NFPA 350.
 7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 8. Installing and Maintaining Wiring Devices: NECA NEIS 130.
 9. Mounting Heights: Unless otherwise indicated in the Contract Documents, comply with mounting heights recommended in NECA NEIS 1.
 10. Receptacle Orientation: Unless otherwise indicated in the Contract Documents, orient receptacle to match configuration diagram in NEMA WD 6.
 11. Consult Architect for resolution of conflicting requirements, as directed by the Owner.
- C. Interfaces with Other Work:
 1. Identification: Provide labels for receptacles and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - 1) Identify cover or cover plate for device with panelboard identification and circuit number.

- 2) Mark cover or cover plate using hot, stamped, or engraved machine printing with **[black][white][red]**-filled lettering, and provide durable wire markers or tags inside device box or outlet box.
- c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
- d. Healthcare Facilities: Distinctively identify covers or cover plates of device boxes and outlet boxes that are supplied from life safety and critical branch power supplies following facility's standard practice.

3.7 INSTALLATION OF PIN-AND-SLEEVE RECEPTACLES

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Safety: NFPA 70E.
 - 3. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 4. Work in ITE Rooms: NFPA 75.
 - 5. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 - 6. Work in Confined Spaces: NFPA 350.
 - 7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 8. Installing and Maintaining Wiring Devices: NECA NEIS 130.
 - 9. Mounting Heights: Unless otherwise indicated in the Contract Documents, comply with mounting heights recommended in NECA NEIS 1.
 - 10. Receptacle Orientation: Unless otherwise indicated in the Contract Documents, orient receptacle to match configuration diagram in UL 1686.
 - 11. Consult Architect for resolution of conflicting requirements, as directed by the Owner.
- C. Interfaces with Other Work:
 - 1. Identification: Provide labels for receptacles and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - 1) Identify cover or cover plate for device with panelboard identification and circuit number.
 - 2) Mark cover or cover plate using hot, stamped, or engraved machine printing with **[black][white][red]**-filled lettering, and provide durable wire markers or tags inside device box or outlet box.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - d. Healthcare Facilities: Distinctively identify covers or cover plates of device boxes and outlet boxes that are supplied from life safety and critical branch power supplies following facility's standard practice.

3.8 INSTALLATION OF CORD REELS AND FITTINGS

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Hot Work: NFPA 51B.
 - 5. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 6. Work in Confined Spaces: NFPA 350.
 - 7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.

3.9 INSTALLATION OF CONNECTORS, CORDS, AND PLUGS

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 5. Work in ITE Rooms: NFPA 75.
 - 6. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 - 7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 8. Consult Architect for resolution of conflicting requirements, as directed by the Owner.

3.10 FIELD QUALITY CONTROL OF GENERAL-USE SWITCHES, DIMMER SWITCHES, AND FAN-SPEED CONTROLLER SWITCHES

- A. Adminstrant for Electrical Power Tests and Inspections:
 - 1. **[the Owner][Tenant]** will engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
 - 2. Engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
 - 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 - 4. Administer and perform tests and inspections [**with assistance of factory-authorized service representative**] .
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]** as directed by the Owner.
- C. Tests and Inspections: Perform tests and inspections in accordance with manufacturers' published instructions.
- D. Nonconforming Work:

1. Unit will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Field Quality Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.11 FIELD QUALITY CONTROL OF STRAIGHT-BLADE RECEPTACLES

A. Administrant for Electrical Power Tests and Inspections:

1. **[the Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections **[with assistance of factory-authorized service representative] .**

B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]** as directed by the Owner.

C. Tests and Inspections:

1. Insert and remove test plug to verify that device is securely mounted.
2. Verify polarity of hot and neutral pins.
3. Measure line voltage.
4. Measure percent voltage drop.
5. Measure grounding circuit continuity; impedance must be not greater than 2 ohms.
6. Healthcare Facilities: Test straight-blade receptacles in patient care spaces with receptacle pin tension test instrument in accordance with NFPA 99. Retention force of ground pin must be not less than 115 g (4 oz).
7. Perform additional installation and maintenance inspections and diagnostic tests in accordance with NECA NEIS 130 and manufacturers' published instructions.

D. Nonconforming Work:

1. Device will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Field Quality Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

**3.12 FIELD QUALITY CONTROL OF LOCKING RECEPTACLES**

- A. Administrant for Low-Voltage Electrical Tests and Inspections:
1. **[the Owner][Tenant]** will engage qualified low-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
 2. Engage qualified low-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 4. Administer and perform tests and inspections [**with assistance of factory-authorized service representative**] .
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]** as directed by the Owner.
- C. Tests and Inspections:
1. Insert and remove test plug to verify that device is securely mounted.
 2. Verify polarity of hot and neutral pins.
 3. Measure line voltage.
 4. Measure percent voltage drop.
 5. Measure grounding circuit continuity; impedance must be not greater than 2 ohms.
 6. Perform additional installation and maintenance inspections and diagnostic tests in accordance with NECA NEIS 130 and manufacturers' published instructions.
- D. Nonconforming Work:
1. Device will be considered defective if it does not pass tests and inspections.
 2. Remove and replace defective units and retest.
- E. Field Quality Control Reports: Collect, assemble, and submit test and inspection reports.
- F. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.
1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.13 FIELD QUALITY CONTROL OF PIN-AND-SLEEVE RECEPTACLES

- A. Administrant for Low-Voltage Electrical Tests and Inspections:
1. **[the Owner][Tenant]** will engage qualified low-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
 2. Engage qualified low-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 4. Administer and perform tests and inspections [**with assistance of factory-authorized service representative**] .
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]**

as directed by the Owner.

C. Tests and Inspections:

1. Insert and remove test plug to verify that device is securely mounted.
2. Measure line voltage.
3. Measure percent voltage drop.
4. Measure ground impedance, which must be not greater than 2 ohms.
5. Perform additional installation and maintenance inspections and diagnostic tests in accordance with NECA NEIS 130 and manufacturers' published instructions.

D. Nonconforming Work:

1. Device will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Field Quality Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to [support][supervise] field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.14 FIELD QUALITY CONTROL OF CORD REELS AND FITTINGS

A. Adminstrant for Electrical Power Tests and Inspections:

1. [the Owner][Tenant] will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections [with assistance of factory-authorized service representative] .

B. Field tests and inspections must be witnessed by [Architect][Tenant][authorities having jurisdiction] as directed by the Owner.

C. Tests and Inspections: Perform tests and inspections indicated in manufacturer's published instructions.

D. Nonconforming Work:

1. Components and assemblies will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Field Quality Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to [support][supervise] field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.15 FIELD QUALITY CONTROL OF CONNECTORS, CORDS, AND PLUGS

A. Administrant for Electrical Power Tests and Inspections:

1. **[the Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections [**with assistance of factory-authorized service representative**] .

B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]** as directed by the Owner.

C. Tests and Inspections: Perform tests and inspections indicated in manufacturer's published instructions.

D. Nonconforming Work:

1. Unit will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Field Quality Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.16 SYSTEM STARTUP FOR GENERAL-USE SWITCHES, DIMMER SWITCHES, AND FAN-SPEED CONTROLLER SWITCHES

A. Perform startup service.

1. Complete installation and startup checks in accordance with manufacturer's published instructions.

B. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.

1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

**3.17 ADJUSTING**

- A. Occupancy Adjustments for Controlled Receptacles: When requested within [12] months from date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions. Provide up to [two] visits to the Project during other-than-normal occupancy hours for this purpose.
- B. Cord Reels and Fittings: Adjust spring mechanisms and moving parts of cord reels and fittings to function smoothly, and lubricate as recommended in writing by manufacturer.

3.18 PROTECTION

- A. Devices:
 - 1. Schedule and sequence installation to minimize risk of contamination of wires and cables, devices, device boxes, outlet boxes, covers, and cover plates by plaster, drywall joint compound, mortar, cement, concrete, dust, paint, and other materials.
 - 2. After installation, protect wires and cables, devices, device boxes, outlet boxes, covers, and cover plates from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by the Owner.
- B. Cord Reels and Fittings: After installation, protect cord reels and fittings from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by the Owner.
- C. Connectors, Cords, and Plugs: After installation, protect connectors, cords, and plugs from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by the Owner.

END OF SECTION 26 27 26 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 27 26 00A - RECEPTACLES WITH ARC-FAULT AND GROUND-FAULT PROTECTIVE DEVICES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Receptacles with AFCI devices.
2. Receptacles with both AFCI and GFCI devices.
3. Receptacles with GFCI devices.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
5. Section 260533.16 "Boxes and Covers for Electrical Systems" specifies covers and cover plates referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
7. Section 262726.31 "General-Grade Single Straight-Blade Receptacles" for single receptacles.
8. Section 262726.33 "General-Grade Duplex Straight-Blade Receptacles" for duplex receptacles that are not hospital grade.
9. Section 262726.35 "Hospital-Grade Straight-Blade Receptacles" for hospital-grade receptacles.
10. Section 262726.39 "Locking Receptacles" for twist-locking receptacles.
11. Section 262726.41 "Pin-and-Sleeve Receptacles" for pin-and-sleeve receptacles.

1.2 DEFINITIONS

- A. AFCI: Arc-Fault Circuit Interrupter.
- B. GFCI: Ground-Fault Circuit Interrupter.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and

- fitness for purpose.
- b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
- c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.

2. Include manufacturer's sample extended warranty language.

B. Samples:

- 1. One for each kind of receptacles with AFCI devices[**and cover plate accessory**] specified, in each finish and color specified.
- 2. One for each kind of receptacles with AFCI and GFCI devices[**and cover plate accessory**] specified, in each finish and color specified.
- 3. One for each kind of receptacles with GFCI devices[**and cover plate accessory**] specified, in each finish and color specified.

C. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

B. Field Reports:

- 1. Manufacturer's field reports for field quality-control support.

1.5 WARRANTY

A. Special Manufacturer Extended Warranty: Manufacturer warrants that devices perform in accordance with specified requirements and agrees to provide repair or replacement of devices that fail to perform as specified within extended warranty period.

- 1. Initial Extended Warranty Period: [**Three**][**Four**][**Five**]**<Insert number>** years from date of Substantial Completion; [**full**][**prorated**] coverage for labor, materials, and equipment.
- 2. Follow-On Extended Warranty Period: [**Eight**]**<Insert number>** years from date of Substantial Completion; [**full**][**prorated**] coverage for materials only, free on board [**origin**][**destination**], freight prepaid.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

**2.2 RECEPTACLES WITH AFCI DEVICES****A. General-Grade, Tamper-Resistant Duplex Straight-Blade Receptacle with AFCI Device :**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Outlet Branch-Circuit Type AFCIs: UL CCN AWBZ, UL 498, UL 1699, and UL Subject 1699A.
4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].**
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R].**
5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

B. Hospital-Grade, Tamper-Resistant Duplex Straight-Blade Receptacle with AFCI Device :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Leviton Manufacturing Co., Inc.]
 - b. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Leviton Manufacturing Co., Inc.]
 - b. <Insert manufacturer's name>
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Outlet Branch-Circuit Type AFCIs: UL CCN AWBZ, UL 498, UL 1699, and UL Subject 1699A.
 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

2.3 RECEPTACLES WITH BOTH AFCI AND GFCI DEVICES

A. General-Grade, Tamper-Resistant Duplex Straight-Blade Receptacle with AFCI and GFCI Device :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]

- e. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Outlet Branch-Circuit Type GFCIs and AFCIs: UL CCN KCXX, UL 498, UL 943, UL 1699, and UL Subject 1699A.
- 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
- 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
- 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

2.4 RECEPTACLES WITH GFCI DEVICES

A. General-Grade Duplex Straight-Blade Receptacle with GFCI Device :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]**.
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]**.
5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

B. General-Grade, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle with GFCI Device :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**

- b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
- 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
- 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
- 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- C. General-Grade, Tamper-Resistant Duplex Straight-Blade Receptacle with GFCI Device :
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- D. General-Grade, Tamper-Resistant, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle with GFCI Device :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- E. General-Grade, Weather-Resistant Duplex Straight-Blade Receptacle with GFCI Device :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on

- architectural Drawings].**
- b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]**.
5. Other Available Features Required by the Project:
- a. Has factory-terminated connectors on wiring device pigtails for quick installation.
6. Accessories:
- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- F. General-Grade, Weather-Resistant, Tamper-Resistant Duplex Straight-Blade Receptacle with GFCI Device :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].**
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]**.
 5. Other Available Features Required by the Project:

- a. Has factory-terminated connectors on wiring device pigtails for quick installation.
- 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- G. General-Grade, Weather-Resistant, Tamper-Resistant, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle with GFCI Device :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 - 4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].**
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R].**
 - 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 - 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth

- finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- H. General-Grade, Isolated Ground, Tamper-Resistant Duplex Straight-Blade Receptacle with GFCI Device :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]**.
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]**.
 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- I. General-Grade, Isolated Ground, Weather-Resistant, Tamper-Resistant Duplex Straight-Blade

**Receptacle with GFCI Device :**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
4. Standard Features:
 - a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings]**.
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]**.
5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

J. Hospital-Grade Duplex Straight-Blade Receptacle with GFCI Device :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

**Receptacles with Arc-Fault and Ground-Fault Protective
Devices**

- a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- K. Hospital-Grade, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle with GFCI Device :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]

- e. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
- 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
- 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
- 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
- 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- L. Hospital-Grade, Tamper-Resistant, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle with GFCI Device :
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- M. Hospital-Grade, Weather-Resistant, Tamper-Resistant Duplex Straight-Blade Receptacle with GFCI Device :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]

- d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
4. Standard Features:
- a. Device Color: **[Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].**
 - b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R].**
5. Other Available Features Required by the Project:
- a. Has factory-terminated connectors on wiring device pigtails for quick installation.
6. Accessories:
- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- N. Hospital-Grade, Weather-Resistant, Tamper-Resistant, Nightlight-Type, Lighted Duplex Straight-Blade Receptacle with GFCI Device :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Arrow Hart, Wiring Devices; Eaton, Electrical Sector]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Pass & Seymour; Legrand North America, LLC]**
 - e. **<Insert manufacturer's name>**
 - 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product

categories:

- a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.

4. Standard Features:

- a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
- b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].

5. Other Available Features Required by the Project:

- a. Has factory-terminated connectors on wiring device pigtails for quick installation.

6. Accessories:

- a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
- b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

O. Hospital-Grade, Isolated Ground, Tamper-Resistant Duplex Straight-Blade Receptacle with GFCI Device :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.

4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].
 - b. Configuration: Heavy-duty, [NEMA 5-15R][NEMA 5-20R].
 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.
- P. Hospital-Grade, Isolated Ground, Weather-Resistant, Tamper-Resistant Duplex Straight-Blade Receptacle with GFCI Device :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Arrow Hart, Wiring Devices; Eaton, Electrical Sector]
 - b. [Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Pass & Seymour; Legrand North America, LLC]
 - e. <Insert manufacturer's name>
 3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Receptacle GFCIs: UL CCN KCXS, UL 498, and UL 943.
 4. Standard Features:
 - a. Device Color: [Ivory][White][Gray][Brown][Black][Red][Yellow][Orange][in accordance with NEMA WD 1][Blue][Green][Office White][Almond][Light Almond][As indicated on architectural Drawings].

- b. Configuration: Heavy-duty, **[NEMA 5-15R][NEMA 5-20R]**.
- 5. Other Available Features Required by the Project:
 - a. Has factory-terminated connectors on wiring device pigtails for quick installation.
- 6. Accessories:
 - a. Cover Plate: **0.060 inch (1.5 mm)** thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device; from same manufacturer as wiring device.
 - b. Securing Screws for Cover Plate: Metal with head color matching wallplate finish.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Verify that receptacles to be procured and installed for Owner-furnished equipment are compatible with mating attachment plugs on equipment.

3.2 SELECTION OF GFCI RECEPTACLES

- A. Healthcare Facilities: Unless protection of downstream branch-circuit wiring, cord sets, and power-supply cords is required by NFPA 70 or NFPA 99, provide non-feed-through GFCI receptacles.

3.3 INSTALLATION

- A. Comply with manufacturer's instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Safety: NFPA 70E.
 - 3. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 4. Work in ITE Rooms: NFPA 75.
 - 5. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 - 6. Work in Confined Spaces: NFPA 350.
 - 7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 8. Installing and Maintaining Wiring Devices: NECA NEIS 130.
 - 9. Mounting Heights: Unless otherwise indicated in the Contract Documents, comply with mounting heights recommended in NECA NEIS 1.
 - 10. Receptacle Orientation: Unless otherwise indicated in the Contract Documents, orient receptacle to match configuration diagram in NEMA WD 6.
 - a. Hospital-Grade Receptacle Orientation: Orient receptacle with ground pin or neutral pin at top.
 - 11. Consult Architect for resolution of conflicting requirements.

**C. Interfaces with Other Work:**

1. Identification: Provide labels for receptacles and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - 1) Identify cover or cover plate for device with panelboard identification and circuit number.
 - 2) Mark cover or cover plate using hot, stamped, or engraved machine printing with **[black][white][red]**-filled lettering, and provide durable wire markers or tags inside device box or outlet box.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - d. Healthcare Facilities: Distinctively identify covers or cover plates of device boxes and outlet boxes that are supplied from life safety and critical branch power supplies following facility's standard practice.
2. Do not install Type 3 SPD, including surge-protected relocatable taps and power strips, on branch circuit downstream of GFCI device.
3. Coordinate installation of new products for **<Insert system or product group>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>**.
4. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>**.
 - a. **<Insert requirements for transition between this Section and related Work>**.

3.4 FIELD QUALITY CONTROL**A. Administrant for Electrical Power Tests and Inspections:**

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections **[with assistance of factory-authorized service representative]**.

B. Acceptance Testing Preparation:

1. **<Insert requirements>**.

C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>.****D. Tests and Inspections:**

1. Insert and remove test plug to verify that device is securely mounted.

2. Verify polarity of hot and neutral pins.
3. Measure line voltage.
4. Measure percent voltage drop.
5. Measure grounding circuit continuity; impedance must be not greater than 2 ohms.
6. Healthcare Facilities: Test straight-blade receptacles in patient care spaces with receptacle pin tension test instrument in accordance with NFPA 99. Retention force of ground pin must be not less than 115 g (4 oz).
7. Perform additional installation and maintenance inspections and diagnostic tests in accordance with NECA NEIS 130 and manufacturers' instructions.
8. **<Insert tests and inspections>.**

E. Nonconforming Work:

1. Device will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

G. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.5 PROTECTION

- A. Schedule and sequence installation to minimize risk of contamination of wires and cables, devices, device boxes, outlet boxes, covers, and cover plates by plaster, drywall joint compound, mortar, cement, concrete, dust, paint, and other materials.
- B. After installation, protect wires and cables, devices, device boxes, outlet boxes, covers, and cover plates from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

END OF SECTION 26 27 26 00A

SECTION 26 27 26 00B - CONNECTORS, CORDS, AND PLUGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Fuseless attachment cord connectors.
2. Extra-hard-usage, jacketed, flexible cord.
3. Antimicrobial, extra-hard-usage, jacketed, flexible cord.
4. Hard-usage, jacketed, flexible cord.
5. Strain-relief cord grips.

B. Products Installed, but Not Furnished, under This Section:

1. **<Insert products identified in "Existing Products to be Modified" Article or "Existing Products to be Removed and Reinstalled" Article>.**

C. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
5. Section 262726.43 "Special-Purpose Power Outlet Assemblies" specifies fabricated power-outlet cord management assemblies containing connectors and cords specified by this Section.

1.2 ACTION SUBMITTALS

- A. Product Data: For each type of product.
- B. Samples: One for each kind of cord connector specified, in each finish and color specified.
- C. Field quality-control reports.

1.3 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Field Reports:
1. Manufacturer's field reports for field quality-control support.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.2 FUSELESS ATTACHMENT CORD CONNECTORS

- A. Description: Connectors for attachment to cord that do not incorporate switches or overcurrent protection.
- B. Indoor-Use, Dry Location Cord Connector:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Ericson Manufacturing Company]**
 - b. **<Insert manufacturer's name>**
 - 2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Reference Standards: UL CCN AXUT and UL 498.
 - 3. Standard Features:
 - a. Configuration: NEMA 5-15[**with lighted blade**].
- C. Indoor-Use, Sealed Cord Connector:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Ericson Manufacturing Company]**
 - b. **<Insert manufacturer's name>**
 - 2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Reference Standards: UL CCN AXUT and UL 498.
 - 3. Standard Features:
 - a. Configuration:

- 1) NEMA 5-15[with diagnostic LED indicator].
- 2) NEMA 5-20[with diagnostic LED indicator].
- 3) NEMA 6-15.
- 4) NEMA 6-20.
- 5) NEMA L5-15.
- 6) NEMA L5-20[with diagnostic LED indicator].
- 7) NEMA L5-30.
- 8) NEMA L6-15.
- 9) NEMA L6-20.
- 10) NEMA L6-30.
- 11) NEMA L7-15.
- 12) NEMA L7-20.
- 13) NEMA L7-30.
- 14) NEMA L14-20.
- 15) NEMA L14-30.
- 16) NEMA L15-20.
- 17) NEMA L15-30.
- 18) NEMA L16-20.
- 19) NEMA L16-30.
- 20) NEMA L17-30.
- 21) NEMA L18-30.

D. Hospital-Grade, Indoor-Use, Sealed Cord Connector:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ericson Manufacturing Company]
 - b. <Insert manufacturer's name>
2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Reference Standards: UL CCN AXUT and UL 498.
3. Standard Features:
 - a. Configuration: [NEMA 5-15][NEMA 5-20].

E. Indoor-Use, Compression-Grip, Sealed Cord Connector:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Ericson Manufacturing Company]
 - b. <Insert manufacturer's name>
2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Reference Standards: UL CCN AXUT and UL 498.

3. Standard Features:

- a. Configuration:

- 1) NEMA 5-15[**with diagnostic LED indicator**].
- 2) NEMA 5-20[**with diagnostic LED indicator**].
- 3) NEMA 6-15.
- 4) NEMA 6-20.
- 5) NEMA L5-15.
- 6) NEMA L5-20[**with diagnostic LED indicator**].
- 7) NEMA L5-30.
- 8) NEMA L6-15.
- 9) NEMA L6-20.
- 10) NEMA L6-30.
- 11) NEMA L7-15.

F. Outdoor-Use, Watertight, Sealed Cord Connector:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[Ericson Manufacturing Company]**
- b. **<Insert manufacturer's name>**

- 2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Reference Standards: UL CCN AXUT and UL 498.

3. Standard Features:

- a. Configuration:

- 1) NEMA 5-15[**with diagnostic LED indicator**].
- 2) NEMA 5-20[**with diagnostic LED indicator**].
- 3) NEMA 6-15.
- 4) NEMA 6-20.
- 5) NEMA L5-15.
- 6) NEMA L5-20[**with diagnostic LED indicator**].
- 7) NEMA L5-30.
- 8) NEMA L6-15.
- 9) NEMA L6-20.
- 10) NEMA L6-30.
- 11) NEMA L7-15.
- 12) NEMA L7-20.
- 13) NEMA L7-30.
- 14) NEMA L14-20.
- 15) NEMA L14-30.
- 16) NEMA L15-20.
- 17) NEMA L15-30.

- 18) NEMA L16-20.
- 19) NEMA L16-30.
- 20) NEMA L17-30.
- 21) NEMA L18-30.

G. Antimicrobial, Watertight, Sealed Cord Connector:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Ericson Manufacturing Company]**
 - b. **<Insert manufacturer's name>**
2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Reference Standards: UL CCN AXUT and UL 498.
3. Options:
 - a. Antimicrobial additive embedded in connector grip polymer.
 - b. Configuration:
 - 1) NEMA 5-15.
 - 2) NEMA 5-20.
 - 3) NEMA 6-15.
 - 4) NEMA 6-20.
 - 5) NEMA L5-15.
 - 6) NEMA L5-20.
 - 7) NEMA L5-30.
 - 8) NEMA L6-15.
 - 9) NEMA L6-20.
 - 10) NEMA L6-30.
 - 11) NEMA L7-15.
 - 12) NEMA L7-20.
 - 13) NEMA L7-30.
 - 14) NEMA L14-20.
 - 15) NEMA L14-30.
 - 16) NEMA L15-20.
 - 17) NEMA L15-30.
 - 18) NEMA L16-20.
 - 19) NEMA L16-30.
 - 20) NEMA L17-30.
 - 21) NEMA L18-30.

2.3 EXTRA-HARD-USAGE, JACKETED, FLEXIBLE CORD

A. Oil-Resistant, Extra-Hard-Usage, Jacketed, Flexible Cord for Indoor Damp Locations:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

- a. [Belden Inc.]
- b. [Ericson Manufacturing Company]
- c. [Southwire Company, LLC]
- d. [U.S. Wire & Cable Corp.]
- e. <Insert manufacturer's name>

2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Reference Standards: UL CCN ZJCZ and UL 62.

3. Standard Features:

- a. 600 V, 90 deg C, hard service cord with oil-resistant jacket[**and oil-resistant insulation**] for pendant or portable extra-hard usage in damp locations.
- b. Flexible Cord Type: [STO][STOO][SEO][SEOO][SO][SOO].

B. Oil-Resistant, Extra-Hard-Usage, Jacketed, Flexible Cord for Outdoor or Indoor Wet Locations:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Belden Inc.]
- b. [Ericson Manufacturing Company]
- c. [Southwire Company, LLC]
- d. [U.S. Wire & Cable Corp.]
- e. <Insert manufacturer's name>

2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

- a. Reference Standards: UL CCN ZJCZ and UL 62.

3. Standard Features:

- a. 600 V, 90 deg C, hard service cord with oil-resistant jacket[**and oil-resistant insulation**] for pendant or portable extra-hard usage in damp locations.
- b. Flexible Cord Type: [STOW][STOOW][SEOW][SEOOW][SOW][SOOW].

2.4 ANTIMICROBIAL, EXTRA-HARD-USAGE, JACKETED, FLEXIBLE CORD

A. Antimicrobial, Oil-Resistant, Extra-Hard-Usage, Jacketed, Flexible Cord for Outdoor or Indoor Wet Locations:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the

following]:

- a. [Ericson Manufacturing Company]
 - b. <Insert manufacturer's name>
2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Reference Standards: UL CCN ZJCZ and UL 62.
3. Standard Features:
- a. 600 V, 90 deg C, hard service cord with oil-resistant jacket for pendant or portable extra-hard usage in damp or wet locations.
 - b. Antimicrobial additive embedded in jacket polymer.
 - c. Flexible Cord Type: [STOW][SEOW].
 - d. Configuration:
 - 1) No. 14 AWG, two wires and equipment ground.
 - 2) No. 12 AWG, two wires and equipment ground.
 - 3) No. 12 AWG, three wires and equipment ground.
 - 4) No. 10 AWG, two wires and equipment ground.
 - 5) No. 10 AWG, three wires and equipment ground.

2.5 HARD-USAGE, JACKETED, FLEXIBLE CORD

A. Oil-Resistant, Hard-Usage, Jacketed, Flexible Cord for Indoor Damp Locations:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]
 - b. [Ericson Manufacturing Company]
 - c. [Southwire Company, LLC]
 - d. [U.S. Wire & Cable Corp.]
 - e. <Insert manufacturer's name>
2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Reference Standards: UL CCN ZJCZ and UL 62.
3. Standard Features:
 - a. 300 V, 90 deg C, hard service cord with oil-resistant jacket[and oil-resistant insulation] for pendant or portable extra-hard usage in damp locations.
 - b. Flexible Cord Type: [SJTO][SJTOO][SJEO][SJEOO][SJO][SJOO].

B. Oil-Resistant, Hard-Usage, Jacketed, Flexible Cord for Outdoor or Indoor Wet Locations:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Ericson Manufacturing Company]**
 - c. **[Southwire Company, LLC]**
 - d. **[U.S. Wire & Cable Corp.]**
 - e. **<Insert manufacturer's name>**
2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Reference Standards: UL CCN ZJCZ and UL 62.
3. Standard Features:
 - a. 300 V, 90 deg C, hard service cord with oil-resistant jacket **[and oil-resistant insulation]** for pendant or portable extra-hard usage in damp locations.
 - b. Flexible Cord Type: **[SJTOW][SJTOOW][SJEOW][SJEOW][SJOW][SJOOW]**.

2.6 STRAIN-RELIEF CORD GRIPS

A. Strain-Relief Cord Grip:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Ericson Manufacturing Company]**
 - b. **[Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Pass & Seymour; Legrand North America, LLC]**
 - d. **<Insert manufacturer's name>**
2. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Reference Standards: UL CCN QCRV and UL 514B.
3. Standard Features:
 - a. Strain-relief grip for bus drop cable.
 - b. Noninsulated strain-relief grip for flexible cord.
 - c. Insulated strain-relief grip for flexible cord.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Comply with manufacturer's instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 5. Work in ITE Rooms: NFPA 75.
 - 6. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 - 7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 8. Consult Architect for resolution of conflicting requirements.
- C. Special Techniques:
 - 1. **<Insert more stringent installation requirements that supplement or supersede listed standards and manufacturers' instructions>.**
- D. Interfaces with Other Work:
 - 1. Coordinate with Section 262726.43 "Special-Purpose Power Outlet Assemblies" for installation of connectors and cords on fabricated power-outlet cord management assemblies.
 - 2. Coordinate installation of new products for **<Insert system or product group>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>.**
 - 3. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>**.
 - a. **<Insert requirements for transition between this Section and related Work>.**

3.2 FIELD QUALITY CONTROL

- A. Adminstrant for Electrical Power Tests and Inspections:
 - 1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 - 2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
 - 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 - 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].
- B. Acceptance Testing Preparation:
 - 1. **<Insert requirements>.**

- C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- D. Tests and Inspections:
 - 1. Perform tests and inspections indicated in manufacturer's instructions.
 - 2. **<Insert Project-specific test or inspection>**.
- E. Nonconforming Work:
 - 1. Unit will be considered defective if it does not pass tests and inspections.
 - 2. Remove and replace defective units and retest.
- F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.
- G. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.
 - 1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 27 33 00 - POWER DISTRIBUTION UNITS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Manufactured power distribution units.

B. Products Installed, but Not Furnished, under This Section:

1. **<Insert products identified in "Existing Products to be Modified" Article or "Existing Products to be Removed and Reinstalled" Article>.**

C. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
6. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic control devices referenced by this Section.
7. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
8. Section 260573 "Power System Studies" specifies arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.

1.2 DEFINITIONS

- A. EPO: Emergency power-off.
- B. SPD: Surge protective device.

1.3 PREINSTALLATION MEETINGS

- A. Preinstallation Coordination Meeting(s): For power distribution units. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location> before <Insert construction activity>.**
1. Attendees: Installers, fabricators, representatives of manufacturers, representatives of Owner, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**][, and **Owner's Commissioning Authority**] of scheduled meeting dates.
 2. Coordinate layout and installation of power distribution units with Owner's equipment.

3. Record agreements reached in meetings and distribute record to other participants.
4. Adjust arrangements and locations of power distribution units to accommodate and optimize arrangement and space requirements of equipment.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.

B. Shop Drawings: Prepare and submit the following:

1. Include plans, elevations, sections, and **[mounting][attachment]** details.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Include diagrams for power, signal, and control wiring.

C. Factory test reports.

D. Field quality-control reports.

1.5 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Manufacturer's field reports for field quality-control support.
- C. Manufacturer's field reports for system startup support.
- D. Field reports for infrared scanning.

1.6 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, conduct tests of complex equipment, analyze test and equipment data, plan a job, and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able

to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.

- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

1.7 DELIVERY, STORAGE, AND HANDLING

- A. Deliver equipment in fully enclosed vehicles after specified environmental conditions have been permanently established in spaces where equipment is to be placed.
- B. Store equipment in spaces with environments controlled within manufacturer's ambient temperature and humidity tolerances for non-operating equipment.

1.8 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Modeling, analysis, product selection, installation, and quality control for all electrical Work on the Project must comply with service condition requirements specified in Section 018116 "Facility Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria."
- B. Usual Service Conditions: Unless unusual service conditions have been specified in "General Environmental Conditions," "Outdoor Conditions," and "Indoor Conditions" articles of Section 018116 "Facility Environmental Requirements," electrical service and distribution equipment must be suitable for operation under usual service conditions specified in applicable NEMA PB series, IEEE C37 series, and IEEE C57 series standards.

PART 2 - PRODUCTS

2.1 EXISTING PRODUCTS TO BE MODIFIED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>.**
- C. Accessories: **<Insert accessories included with existing product>.**

2.2 EXISTING PRODUCTS TO BE REMOVED AND REINSTALLED

- A. Basis for Pricing: **<Insert name of manufacturer; model number or series for existing product>.**
- B. Description: **<Insert description of existing product, including special features, options, and finishes that may impact the Work>.**
- C. Accessories: **<Insert accessories included with existing product>.**

**2.3 PERFORMANCE REQUIREMENTS**

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.4 MANUFACTURED POWER DISTRIBUTION UNITS

A. Source Quality Control:

1. Factory Tests:

- a. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
- b. Testing Administrant: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate power distribution units.
- c. Factory Tests and Inspections: Test and inspect power distribution units, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with referenced standards before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.

- 1) Conduct factory sound-level tests.

d. Nonconforming Work:

- 1) Equipment that does not pass tests and inspections will be considered defective.

- e. Factory Test Reports: Compile and submit factory test and inspection reports.

B. Power Distribution Units :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

- a. **[ABB, Electrification Business]**
- b. **[Eaton]**
- c. **[Liebert; Vertiv Holdings Co.]**
- d. **[Myers Power Products, Inc]**
- e. **[Power Distribution, Inc.; Eaton, Electrical Sector]**
- f. **[Powersmiths International Corp.; Socomec Group]**
- g. **[Square D; Schneider Electric USA]**
- h. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[ABB, Electrification Business]**
- b. **[Eaton]**
- c. **[Liebert; Vertiv Holdings Co.]**
- d. **[Myers Power Products, Inc]**

- e. **[Power Distribution, Inc.; Eaton, Electrical Sector]**
 - f. **[Powersmiths International Corp.; Socomec Group]**
 - g. **[Square D; Schneider Electric USA]**
 - h. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Standard Features:
- a. Integrated and coordinated assembly of power-line-conditioning and distribution components packaged in single cabinet or modular assembly of cabinets[**each with full-swivel casters mounted to bottom frame**]. Include the following components:
 - 1) Input-power, circuit-breaker section.
 - 2) Isolation transformer.
 - 3) SPD system.
 - 4) Output panelboard(s).
 - 5) Alarm, monitoring, and control system.
 - b. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - c. Wiring Access: **[Top][and][bottom]** wiring access.
 - d. Unit Capacity Rating: Carry indicated RMS kilovolt-ampere load continuously without affecting normal operation of circuit breakers, monitoring system, or unit controls and without exceeding rated insulation temperature for the following input voltage and load current:
 - 1) Input Voltage: Within rated input-voltage tolerance band of unit.
 - 2) Load Current: Minimum of 3.0 crest factor and 85 percent total harmonic distortion.
 - e. Input-Power, Circuit-Breaker Section: Three-pole, **[shunt-tripped,]**thermal-magnetic-type circuit breaker, rated for indicated interrupting capacity and 125 percent of input current of unit at 100 percent rated load at unit capacity rating.
 - 1) Dual-Input Units:
 - a) Two input circuit breakers arranged to provide transfer between two input-power sources.
 - b) Controls and interfaces to allow selecting either open- or closed-transition transfer between two input-power sources.
 - c) Use 120 V permissive signal from both upstream voltage sources to indicate acceptable conditions for closed-transition transfer.
 - d) Open second circuit breaker automatically after closed-transition transfer is completed.
 - 2) Static Transfer Switch: Three-pole, double-throw; solid-state, automatic transfer switch.
 - f. Isolation Transformer Section: Dry-type, electrostatically shielded, three-phase, common-core, convection-air-cooled isolation transformer.
 - 1) Comply with UL 1561[**including requirements for nonsinusoidal load-current-handling capability defined by designated K-factor**].
 - 2) Cores: Electrical grade, non-aging silicon steel with high permeability and low hysteresis losses, one leg per phase.
 - 3) Coil Material and Insulation: **[Aluminum][Copper]** windings, 220 deg C insulation

- class.
- 4) Temperature Rise: Designed for [80][115][150] deg C rise above 40 deg C ambient.
 - 5) Output Impedance: 3.5 plus or minus 0.5 percent.
 - 6) Regulation: 2 to 4 percent maximum, at full-resistive load; 5 percent maximum, at rated nonlinear load.
 - 7) Taps: Six full-capacity compensation taps at 2.5 percent increments; two above and four below nominal voltage.
 - 8) Full-Load Efficiency: Minimum 96 percent at rated [nonlinear] load.
 - 9) Magnetic-Field Strength External to Transformer Enclosure: Less than 0.1 G at 18 inch (450 mm).
 - 10) K-Factor Rating: Transformers indicated to be K-factor rated must comply with UL 1561 requirements for nonsinusoidal load current-handling capability to the degree defined by designated K-factor.
 - a) Unit may not overheat when carrying full-load current with harmonic distortion corresponding to designated K-factor.
 - b) Indicate value of K-factor on transformer nameplate.
 - 11) Electrostatic Shielding: Independently shield each winding with full-width, [single][double], copper, electrostatic shield arranged to minimize interwinding capacitance.
 - a) Coil leads and terminal trips must be arranged to minimize capacitive coupling between input and output connections.
 - b) Shield Terminal: Separate, and marked "Shield" for grounding connection. Shield must be connected to reference ground point for distribution panels.
 - c) Capacitance: Limit capacitance between primary and secondary windings to maximum of 33 pF over frequency range of 20 Hz to 1 MHz.
 - d) Common-Mode Noise Attenuation: 120 dB minimum, 0.5 to 1.5 kHz; minus 65 dB minimum, 1.5 to 100 kHz.
 - e) Normal-Mode Noise Attenuation: 52 dB minimum, 1.5 to 10 kHz.
 - 12) Neutral Rating: [1.732 times][200 percent of] system full-load ampere rating.
 - 13) Shipping Restraints: Paint or otherwise color code bolts, wedges, blocks, and other restraints that are to be removed after installation and before energizing. Use fluorescent colors that are easily identifiable inside transformer enclosure.
- g. SPD System: Integrated SPD system, complying with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits," to protect unit panelboard, and having the following features:
- 1) Disconnect Device: Manual, three-pole, fused disconnect switch to de-energize SPD system while permitting power distribution units to continue operation. Fuses must be rated for 200 kA interrupting capacity.
 - 2) Nonlinear Loading: System must accommodate rated-load current with minimum 3.0 crest factor and 85 percent total harmonic distortion.
- h. Output Panelboards: Panelboards complying with Section 262416 "Panelboards" except for mounting provisions. Mount [single][double] panelboards on power distribution unit behind flush doors. Include the following features:
- 1) Construction: [30][42] pole, [208 V][240 V], three phase; capable of accepting branch circuit breakers rated up to 100 A.
 - 2) Panelboard Rating: [225 A]<Insert value>, with main circuit breaker.
 - 3) Panelboard Phase, Neutral, and Ground Buses: Copper, with neutral bus at least

- 4) [1.732][two] times nominal phase bus rating.
 - 5) Isolated Ground Bus: Copper, adequate for branch-circuit equipment ground conductors; insulated from supports.
 - 6) Branch Circuit Breakers: **[Bolt][Plug]** on.
 - 7) Cable Racks: Removable and arranged for supporting and routing cables for panelboard entrance.
 - 8) Access Panels: Arranged so additional branch-circuit wiring can be installed and connected in future.
- i. Power Distribution Unit Controls: Include the following control features:
- 1) EPO switch integral with power distribution unit.
 - 2) Power-off input terminals for connection to remote EPO switch.
 - 3) Shutdown with automatic unit disconnection for the following alarm conditions:
 - a) High temperature in transformer coil.
 - b) High or low input or output voltage.
 - c) Phase loss.
 - d) Ground fault.
 - e) Reverse-phase rotation.
 - 4) Alarm Contacts: Electrically isolated, Form C (one normally open and one normally closed), summary alarm; contact set must change state if monitored function goes into alarm mode.
 - 5) Auxiliary Control Outputs: **<Insert control function outputs>**.
- j. Monitoring, Status, and Alarm Annunciation: Microprocessor-based monitoring, status, and alarm annunciation panel mounted flush in front of power distribution unit to provide status display and failure-indicating interface for the following:
- 1) Power Monitoring:
 - a) Input Voltage: Line-to-line, RMS.
 - b) Output Voltage: Line-to-line and line-to-neutral, RMS.
 - c) Output current.
 - 2) Status Indication: Unit on.
 - 3) Alarm Annunciation:
 - a) High temperature in transformer coil.
 - b) High and low input voltage.
 - c) High and low output voltage.
 - d) Phase loss.
 - e) Ground fault.
 - f) Frequency.
 - g) Phase rotation.
 - h) SPD module failure.
 - 4) Audible Alarm and Silencing Switch: Alarm sounds when alarm indication occurs. Silencing switch must silence audible alarm but leave visual indication active until alarm condition is corrected.
- k. Sound Level:
- 1) Fully assembled products must have average audible sound levels[**more than 3 dB**] below the following maximum sound levels, without fans running, when factory

tested in accordance with IEEE C57.12.91:

- a) 9 kVA and Smaller: [40]<Insert number> dB(A-weighted).
 - b) 9.01 to 30 kVA: [45]<Insert number> dB(A-weighted).
 - c) 30.01 to 50 kVA: [45][48]<Insert number> dB(A-weighted).
 - d) 50.01 to 150 kVA: [50][53]<Insert number> dB(A-weighted).
 - e) 150.01 to 300 kVA: [55][58]<Insert number> dB(A-weighted).
 - f) 300.01 to 500 kVA: [60][63]<Insert number> dB(A-weighted).
 - g) 500.01 to 700 kVA: [62][65]<Insert number> dB(A-weighted).
 - h) 700.01 to 1000 kVA: [64][67]<Insert number> dB(A-weighted).
- 2) Mount transformer on rubber isolation pads.
- l. Enclosure:
- 1) Single, freestanding, galvanized steel, UL 50E Type 1 enclosure. Opening of exterior door may not provide access to live parts. Panels and covers that expose hazardous voltages must require tools to remove.
 - 2) Access from front, top, and side only for installation, operations, and normal maintenance, including infrared scanning of bus and breakers. Normal operating controls and instrumentation must be located on front of enclosure.
 - 3) Arrange enclosure to allow lifting and moving via forklift.
- m. Finish: Manufacturer's standard finish over corrosion-resistant pretreatment and primer.
5. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational after seismic events**]."
 - b. Component Importance Factor (Ip): [1.0][1.5].
 - c. Component Amplification Factor (ap): [2.5]<Insert value>.
 - d. Component Response Modification Factor (Rp): [6.0]<Insert value>.
 - e. Component Overstrength Factor (Ωo): [2.5]<Insert value>.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
- 1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Commissioning of Electrical Systems: NECA NEIS 90.
 - 5. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 6. Work in ITE Rooms: NFPA 75.
 - 7. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 - 8. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.

9. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
10. Connections to Connectors and Terminals: Comply with torque-tightening values in UL 486A-486B.
11. Consult Architect for resolution of conflicting requirements.

C. Special Techniques:

1. Arrange power distribution units to provide adequate access to equipment and circulation of cooling air. Locate transformers away from corners and not parallel to adjacent wall surface.

D. Interfaces with Other Work:

1. Identification: Provide labels for power distribution units and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
2. Coordinate size and location of **[concrete bases][access flooring support]** with actual power distribution unit provided.
3. Equipment Mounting:
 - a. Provide cast-in-place concrete equipment base(s) for equipment.
 - b. Provide vibration isolation and seismic control devices for equipment.
 - c. Supports must penetrate and be independent of access flooring.
4. Ground and bond power distribution unit.
5. Install flexible connections at conduit and conductor terminations and supports to eliminate sound and vibration transmission to building structure.

3.2 FIELD QUALITY CONTROL

A. Administrant for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections **[with assistance of factory-authorized service representative]**.

B. Acceptance Testing Preparation:

1. **<Insert requirements>**.

C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

D. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. Perform each visual and mechanical inspection and electrical test stated in NETA ATS for circuit

breakers, molded case; and for transformers, dry type, air cooled, low voltage. Certify compliance with test parameters.

3. Perform functional tests of power distribution units throughout their operating ranges. Test each monitoring, status, and alarm function.
4. Test Labeling: On completion of satisfactory testing of each unit, attach dated and signed "Satisfactory Test" label to tested component.

E. Nonconforming Work:

1. Power distribution unit will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

G. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.3 SYSTEM STARTUP

A. Perform startup service.

1. Complete installation and startup checks in accordance with manufacturer's published instructions.
2. Verify that power distribution units are installed and connected in accordance with the Contract Documents.
3. Verify that electrical wiring installation complies with manufacturer's submittal and with published installation requirements in other electrical Sections.

B. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.

1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.4 ADJUSTING

A. Set field-adjustable switches and circuit-breaker trip ranges as indicated.

B. Adjust power distribution units to provide optimal voltage to equipment served throughout normal operating cycle of loads served. Record input and output voltages and adjustment settings, and incorporate into test results.

3.5 CLEANING

A. Vacuum dirt and debris; do not use compressed air to assist in cleaning.

3.6 CLOSEOUT ACTIVITIES

A. Training:

1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain power distribution units.
2. **[Provide video recordings of training sessions to Owner.][Allow Owner to record training sessions.]**

3.7 PROTECTION

- #### A.
- After installation, protect power distribution units from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

3.8 MAINTENANCE

- #### A.
- Infrared Scanning of Power Distribution Units: Two months after Substantial Completion, perform infrared scan of conductor and bus joints and connections. Remove covers so joints and connections are accessible to portable scanner. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison.
1. Use infrared-scanning device designed to measure temperature or to detect significant deviations from normal values. Provide documentation of device calibration.
 2. Follow-up Infrared Scanning: Perform two follow-up infrared scans of power distribution units, one at four months and another at 11 months after Substantial Completion.
 3. Instrument: Use infrared-scanning device designed to measure temperature or to detect significant deviations from normal values. Provide documentation of device calibration.
 4. Field Reports for Infrared Scanning: Prepare certified report that identifies joints and connections checked and that describes scanning results. Include notation of deficiencies detected, remedial actions taken, and scanning observations after remedial action.

SECTION 26 28 13 00 - FUSES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Nonrenewable cartridge fuses.
2. Spare-fuse cabinets.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
5. Section 260573 "Power System Studies" specifies coordination studies, arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product. Include the following for each fuse type indicated:

1. Ambient Temperature Adjustment Information: If ratings of fuses have been adjusted to accommodate ambient temperatures, provide list of fuses with adjusted ratings.
 - a. For each fuse having adjusted ratings, include location of fuse, original fuse rating, local ambient temperature, and adjusted fuse rating.
 - b. Provide manufacturer's technical data on which ambient temperature adjustment calculations are based.
2. Dimensions and manufacturer's technical data on features, performance, electrical characteristics, and ratings.
3. Current-limitation curves for fuses with current-limiting characteristics.
4. Time-current coordination curves (average melt) and current-limitation curves (instantaneous peak let-through current) for each type and rating of fuse. Submit **[in electronic format suitable for use in coordination software][and][in PDF format]**.
5. Coordination charts and tables and related data.
6. Fuse sizes for elevator feeders and elevator disconnect switches.

1.3 MAINTENANCE MATERIAL SUBMITTALS

A. Extra stock material.

1.4 FIELD CONDITIONS

- A. Where ambient temperature to which fuses are directly exposed is less than [40 deg F (5 deg C)]<Insert temperature> or more than [100 deg F (38 deg C)]<Insert temperature>, apply manufacturer's ambient temperature adjustment factors to fuse ratings.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.2 NONRENEWABLE CARTRIDGE FUSES

- A. Class CC Nonrenewable Cartridge Fuse :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Bussmann, an Eaton business]
 - b. [Edison; a brand of Bussmann by Eaton]
 - c. [Littelfuse, Inc.]
 - d. [Mersen USA]
 - e. [Optifuse; Vortex Technologies; division of Triad Partners, LLC]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Bussmann, an Eaton business]
 - b. [Edison; a brand of Bussmann by Eaton]
 - c. [Littelfuse, Inc.]
 - d. [Mersen USA]
 - e. [Optifuse; Vortex Technologies; division of Triad Partners, LLC]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by a qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Cartridge Fuses, Nonrenewable: UL CCN JDDZ, including UL 248-1 and UL 248-4 (Class CC).
5. Standard Features:

- a. NEMA FU 1, Class CC, 200 kA(sym) interrupt rating, current limiting, sizes up to 30 A, 600 V(ac), **[12 s minimum time-delay at 200 percent][non-time-delay]**, with rejection feature.

B. Class CD Nonrenewable Cartridge Fuse :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Littelfuse, Inc.]**
 - b. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Littelfuse, Inc.]**
 - b. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by a qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Cartridge Fuses, Nonrenewable: UL CCN JDDZ, including UL 248-1 and UL 248-18 (Class CD).
5. Standard Features:
 - a. UL 248-18, Class CD, 200 kA(sym) interrupt rating, current limiting, sizes 31 to 60 A, 600 V(ac), **[12 s minimum time-delay at 200 percent][non-time-delay]**, with rejection feature.

C. Class J Nonrenewable Cartridge Fuse :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bussmann, an Eaton business]**
 - b. **[Edison; a brand of Bussmann by Eaton]**
 - c. **[Littelfuse, Inc.]**
 - d. **[Mersen USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bussmann, an Eaton business]**
 - b. **[Edison; a brand of Bussmann by Eaton]**
 - c. **[Littelfuse, Inc.]**
 - d. **[Mersen USA]**
 - e. **<Insert manufacturer's name>**

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by a qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Cartridge Fuses, Nonrenewable: UL CCN JDDZ, including UL 248-1 and UL 248-8 (Class J).
5. Standard Features:
 - a. NEMA FU 1, Class J, **[200 kA(sym)][300 kA(sym)]** interrupt rating, current limiting, sizes up to 600 A, 600 V(ac), **[8 to 10 s minimum time-delay at 500 percent][non-time-delay]**, with rejection feature.

D. Class L Nonrenewable Cartridge Fuse :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bussmann, an Eaton business]**
 - b. **[Edison; a brand of Bussmann by Eaton]**
 - c. **[Littelfuse, Inc.]**
 - d. **[Mersen USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bussmann, an Eaton business]**
 - b. **[Edison; a brand of Bussmann by Eaton]**
 - c. **[Littelfuse, Inc.]**
 - d. **[Mersen USA]**
 - e. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by a qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Cartridge Fuses, Nonrenewable: UL CCN JDDZ, including UL 248-1 and UL 248-10 (Class L).
5. Standard Features:
 - a. NEMA FU 1, Class L, 300 kA(sym) interrupt rating, current limiting, sizes 100 to 6000 A, 600 V(ac), **[4 s minimum time-delay (nonstandard) at 500 percent][10 s minimum time-delay at 500 percent][non-time-delay]**, with rejection feature, with bolt-on terminals.

E. Class RK1 Nonrenewable Cartridge Fuse :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Bussmann, an Eaton business]
 - b. [Edison; a brand of Bussmann by Eaton]
 - c. [Littelfuse, Inc.]
 - d. [Mersen USA]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Bussmann, an Eaton business]
 - b. [Edison; a brand of Bussmann by Eaton]
 - c. [Littelfuse, Inc.]
 - d. [Mersen USA]
 - e. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by a qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
- a. Cartridge Fuses, Nonrenewable: UL CCN JDDZ, including UL 248-1 and UL 248-12 (Class R).
5. Standard Features:
- a. NEMA FU 1, Class RK1, 200 kA(sym) interrupt rating, current limiting, sizes up to 600 A, [250 V(ac)][600 V(ac)], [8 to 10 s minimum time-delay at 500 percent][non-time-delay], with rejection feature.
 - 1) Select ferrule terminals or knife blade terminals to match equipment where fuse is installed.

F. Class RK5 Nonrenewable Cartridge Fuse :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Bussmann, an Eaton business]
 - b. [Edison; a brand of Bussmann by Eaton]
 - c. [Littelfuse, Inc.]
 - d. [Mersen USA]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Bussmann, an Eaton business]
 - b. [Edison; a brand of Bussmann by Eaton]
 - c. [Littelfuse, Inc.]

- d. **[Mersen USA]**
- e. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by a qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Cartridge Fuses, Nonrenewable: UL CCN JDDZ, including UL 248-1 and UL 248-12 (Class R).
- 5. Standard Features:
 - a. NEMA FU 1, Class RK5, 200 kA(sym) interrupt rating, current limiting, sizes up to 600 A, **[250 V(ac)][600 V(ac)]**, **[8 to 10 s minimum time-delay at 500 percent][non-time-delay]**, with rejection feature.
 - 1) Select ferrule terminals or knife blade terminals to match equipment where fuse is installed.

G. Class T Nonrenewable Cartridge Fuse :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Bussmann, an Eaton business]**
 - b. **[Edison; a brand of Bussmann by Eaton]**
 - c. **[Littelfuse, Inc.]**
 - d. **[Mersen USA]**
 - e. **[Optifuse; Vortex Technologies; division of Triad Partners, LLC]**
 - f. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Bussmann, an Eaton business]**
 - b. **[Edison; a brand of Bussmann by Eaton]**
 - c. **[Littelfuse, Inc.]**
 - d. **[Mersen USA]**
 - e. **[Optifuse; Vortex Technologies; division of Triad Partners, LLC]**
 - f. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria: Investigated, labeled, and marked by a qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Cartridge Fuses, Nonrenewable: UL CCN JDDZ, including UL 248-1 and UL 248-15 (Class T).
- 5. Standard Features:

- a. NEMA FU 1, Class T, 200 kA(sym) interrupt rating, current limiting, sizes up to 1200 A, **[300 V(ac)][600 V(ac)], [8 to 10 s minimum time-delay at 500 percent][non-time-delay]**, with rejection feature.
 - 1) Select ferrule terminals or knife blade terminals to match equipment where fuse is installed.

2.3 SPARE-FUSE CABINET

- A. Characteristics: Wall-mounted steel unit with full-length, recessed piano-hinged door and key-coded cam lock and pull.
 1. Size: Adequate for storage of spare fuses specified with **[15]<Insert number>** percent spare capacity minimum.
 2. Finish: Gray, baked enamel.
 3. Fuse Pullers: For each size of fuse, where applicable and available, from fuse manufacturer.

2.4 MAINTENANCE MATERIAL ITEMS

- A. Extra Stock Material: Furnish to Owner extra materials[, **from same production run,**] that match products installed and that are packaged with protective covering for storage and identified with labels describing contents. **[Include the following:]**
 1. Fuses: Equal to **[10]<Insert number>** percent of quantity installed for each size and type, but no fewer than **[three]<Insert number>** of each size and type.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine fuses before installation. Reject fuses that are moisture damaged or physically damaged.
- B. Examine holders to receive fuses for compliance with installation tolerances and other conditions affecting performance, such as rejection features.
- C. Examine utilization equipment nameplates and installation instructions. Install fuses of sizes and with characteristics appropriate for each piece of equipment.
- D. Evaluate ambient temperatures to determine if fuse rating adjustment factors must be applied to fuse ratings.
- E. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF FUSES

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
 2. Electrical Maintenance: NFPA 70B.
 3. Electrical Safety: NFPA 70E.
 4. Work in Confined Spaces: NFPA 350.
 5. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 6. Fuse Applications: NECA NEIS 420.
 7. Work with Fuses in Motor Control Centers: NECA NEIS 402.
- C. Provide open-fuse indicator fuses or fuse covers with open fuse indication.
- D. Install fuses in fusible devices. Arrange fuses so rating information is readable without removing fuse.
- E. Install spare-fuse cabinet(s) in location indicated on the Drawings or as indicated in the field by **[Architect][Construction Manager][Owner]**.
- F. Interfaces with Other Work:
1. Identification: Provide labels for spare fuse cabinet.
 - a. Legend: "SPARE FUSES" in 1-1/2 inch (38 mm) high letters on exterior of door.
 2. Coordinate fuse ratings with utilization equipment nameplate limitations of maximum fuse size and with results of coordination study and arc-flash hazard analysis.

END OF SECTION 26 28 13 00

Task	Specification	Specification Description
26 28 13 00	26 11 16 11	Secondary Unit Substations with Switchgear Secondary

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 28 16 00 - ENCLOSED SWITCHES AND CIRCUIT BREAKERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Enclosed Switches:
 - a. UL WIAX or NITW - Single- or double-throw enclosed switch.
 - b. UL WIAX or NITW - Fused electrically-tripped enclosed switch.
 - c. UL WIAX or NITW - Electrically-tripped ground-fault protection enclosed switch.
2. Dead-Front Switches:
 - a. UL WHXS - Switch for mounting in separate dead-front enclosure.
3. Enclosed Switches for Use in Hazardous (Classified) Locations:
 - a. UL WRPR - Enclosed switch for use in hazardous location.
4. Fused Power-Circuit Devices:
 - a. UL IYSR - Enclosed fused bolted-pressure contact switch.
 - b. UL IYSR - Enclosed fused high-pressure butt-type contact switch.
5. Molded-Case Circuit Breakers and Enclosures:
 - a. UL DIVQ - Enclosed molded-case circuit breaker.
6. Molded-Case Switches and Enclosures:
 - a. UL WJAZ - Enclosed molded-case switch.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding electrical equipment including raceways, electrical power cabling, and communications cabling referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
6. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic- [**and wind**-] control devices referenced by this Section.
7. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and

- warning signs referenced by this Section.
8. Section 260573 "Power System Studies" specifies short-circuit current analysis, coordination study, arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.

1.2 DEFINITIONS

- A. AFCI: Arc-fault circuit interrupter.
- B. GFCI: Ground-fault circuit interrupter.
- C. MCCB: Molded-case circuit breaker.
- D. N.C.: Normally closed.
- E. NICET: National Institute for Certification in Engineering Technologies; a division of the National Society of Professional Engineers (NSPE).
- F. N.O.: Normally open.
- G. SPDT: Single pole, double throw.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of specified product.
 1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing laboratory, certifying that model number corresponding to specified product complies with specified listing criteria.
 2. Include manufacturer's sample extended warranty language.
 3. Include nameplate ratings, dimensioned elevations, sections, weights, and manufacturers' technical data on features, performance, electrical characteristics, ratings, accessories, and finishes.
 4. Enclosure types and details for types other than UL 50E, Type 1.
 5. Current and voltage ratings.
 6. Short-circuit current ratings (interrupting and withstand, as appropriate).
 7. Include evidence of qualified electrical testing laboratory listing for series rating of installed devices.
 8. Detail features, characteristics, ratings, and factory settings of individual overcurrent protective devices, accessories, and auxiliary components.
 9. Include time-current coordination curves (average melt) for each type and rating of overcurrent protective device; include selectable ranges for each type of overcurrent protective device. Provide in **[PDF][and]<Insert calculation program format>** electronic format.
- B. Shop Drawings: Prepare and submit the following:
 1. Drawings, Diagrams, and Supporting Documents for Enclosed Switches and Circuit Breakers:
 - a. Include plans, elevations, sections, details, and attachments to other work.
 - b. Include wiring diagrams for power, signal, and control wiring.
- C. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Field Reports:
 - 1. Manufacturer's field reports for field quality-control support.
 - 2. Field reports for infrared scanning.

1.5 CLOSEOUT SUBMITTALS

- A. Warranty documentation.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare parts.

1.7 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician I: Possessing active NICET EPT Level I certification. Able to work safely around electrical power equipment and cabling under supervision.
- B. Electrical Power Testing (EPT) Technician II: Possessing active NICET EPT Level II certification. Able to isolate and ground electrical power equipment, to connect test equipment, and to conduct and document standard tests of basic equipment.
- C. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- D. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.
- E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

1.8 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Modeling, analysis, product selection, installation, and quality control for electrical Work specified in this Section must comply with service condition requirements specified in Section 018116 "Facility Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria" unless otherwise specified in this Section or on the Drawings.

1.9 WARRANTY

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed enclosed switches and circuit breakers perform in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period.
 - 1. Extended-Warranty Period: **[Two]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that enclosed switches and circuit breakers perform in accordance with specified requirements and agrees to provide repair or replacement of components or products that fail to perform as specified within extended-warranty period.
 - 1. Extended-Warranty Period: **[Three]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Product Selection for Restricted Space: Drawings indicate maximum dimensions for enclosed switches and circuit breakers, including clearances between enclosures, and adjacent surfaces and other items. Comply with indicated maximum dimensions.
- B. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- C. Enclosures:
 - 1. Enclosed Switches and Circuit Breakers: UL 489, NEMA BS 31047, UL 50E, and UL 50, to comply with environmental conditions at installed location.
 - 2. Enclosure Finish: Enclosure must be **[finished with][gray baked enamel paint, electrodeposited on cleaned, phosphatized steel (UL 50E Type 1)][gray baked enamel paint, electrodeposited on cleaned, phosphatized galvanized steel (UL 50E Types 3R, 12)][a brush finish on Type 304 stainless steel (UL 50E Type 4-4X stainless steel)][copper-free cast aluminum alloy (UL 50E Types 7, 9)]**.
 - 3. Conduit Entry: UL 50E Types 4, 4X, and 12 enclosures may not contain knockouts. UL 50E Types 7 and 9 enclosures must be provided with threaded conduit openings in both endwalls.
 - 4. Operating Mechanism: Circuit-breaker operating handle must be **[externally operable with operating mechanism being integral part of box, not cover][directly operable through front cover of enclosure (UL 50E Type 1)][directly operable through dead front trim of enclosure (UL 50E Type 3R)][externally operable with operating mechanism being integral part of cover (UL 50E Types 7, 9)]**. Cover interlock mechanism must have externally operated override. Override may not permanently disable interlock mechanism, which must return to locked position once override is released. Tool used to override cover interlock mechanism must not be required to enter enclosure in order to override interlock.
 - 5. Enclosures designated as UL 50E Type 4, 4X stainless steel, 12, or 12K must have dual cover interlock mechanism to prevent unintentional opening of enclosure cover when circuit breaker is ON and to prevent turning circuit breaker ON when enclosure cover is open.
 - 6. UL 50E Type 7/9 enclosures must be furnished with breather and drain kit to allow their use in outdoor and wet location applications.

- D. Seismic and Wind Performance: Installed assembly must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
1. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events [, **and unit must be fully operational after seismic events**] .
 2. Component Importance Factor (Ip): [1.0][1.5] .
 3. Component Amplification Factor (ap): [1.0][2.5]<Insert value> .
 4. Component Response Modification Factor (Rp): [1.5][2.0][2.5][6.0]<Insert value> .
 5. Component Overstrength Factor (Qo): [1.5][2.5]<Insert value> .

2.2 ENCLOSED SWITCHES

- A. UL WIAx or NITW - Single- or Double-Throw Enclosed Switch :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [ABB Industrial Connections & Solutions LLC]
 - b. [ABB Industrial Connections and Solutions LLC (Tradename Midwest)]
 - c. [Appleton; Emerson Electric Co., Automation Solutions]
 - d. [Bussmann; Eaton, Electrical Sector]
 - e. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - f. [Eaton]
 - g. [Hubbell Inc Wiring Device Div]
 - h. [Leviton Manufacturing Co., Inc.]
 - i. [Siemens]
 - j. [Square D; Schneider Electric USA]
 - k. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB Industrial Connections & Solutions LLC]
 - b. [ABB Industrial Connections and Solutions LLC (Tradename Midwest)]
 - c. [Appleton; Emerson Electric Co., Automation Solutions]
 - d. [Bussmann; Eaton, Electrical Sector]
 - e. [Crouse-Hinds; brand of Eaton, Electrical Sector]
 - f. [Eaton]
 - g. [Hubbell Inc Wiring Device Div]
 - h. [Leviton Manufacturing Co., Inc.]
 - i. [Siemens]
 - j. [Square D; Schneider Electric USA]
 - k. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. Listed Enclosed Switches: UL CCN WIAx, including UL 98.

- b. Listed Industrial Control Panels: UL CCN NITW, including UL 508A for entire assembly and UL 98 component certification for switches.

5. Standard Features:

- a. Product Reference Standard: "Heavy Duty" switches meeting requirements of NEMA BS 31047.
- b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
- c. Motor Rating: Motor-circuit switches must be marked with horsepower ratings for starting characteristics of motor.
- d. Short-Circuit Current Rating: As determined by results of Power System Studies [**and selection of fuses**] .
- e. Fuseholders: Provide clips or bolt pads to accommodate selected fuses.
- f. Lockable Handle: Capability to accept three padlocks, and interlocked with cover in closed position.
- g. Voltage Rating: [120 V(ac)][120/240 V(ac)][125 V(dc)][125/250 V(dc)][240 V(ac)][240/480 V(ac)][250 V(dc)][480 V(ac)][600 V(ac)][600 V(dc)] .
- h. Poles: [Two][Three][Four] .
- i. Wires: [Two][Three][Four][Five] (including solid neutral) .
- j. Current Rating: [30 A][60 A][100 A][200 A][400 A][600 A][800 A][1200 A][1600 A][2000 A][2500 A][3000 A][4000 A] .
- k. Horsepower Rating: [1/2 hp][1-1/2 hp][2 hp][3 hp][5 hp][7-1/2 hp][10 hp][15 hp][25 hp][30 hp][50 hp][60 hp][75 hp][100 hp][200 hp][250 hp] .
- l. Fusing: [Fused][Nonfused] .
- m. Load Class: [General][Isolating] Use.
- n. Throw: [Single][Double] .

6. Accessories:

- a. Receptacle: Polarized, three-phase, four-wire receptacle (fourth wire connected to enclosure ground lug).
 - 1) Interlocking Linkage: Provide interlock between receptacle and switch mechanism to prevent inserting or removing plug while switch is in on position, while inserting plug other than specified, and while turning switch on if incorrect plug is inserted or correct plug has not been fully inserted into receptacle.
- b. Equipment Ground Kit: Internally mounted and labeled for copper and aluminum ground conductors.
- c. Neutral Kit: Internally mounted; insulated, capable of being grounded and bonded; labeled for copper and aluminum neutral conductors.
- d. Isolated Ground Kit: Internally mounted; insulated, labeled for copper and aluminum neutral conductors.
- e. Class R Fuse Kit: Provides rejection of other fuse types when Class R fuses are specified.
- f. Service-Rated Switches: Labeled for use as service equipment.
- g. Hookstick Handle: Allows use of hookstick to operate handle.
- h. Auxiliary Contact Kit: [One][Two] N.O./N.C. (Form "C") auxiliary contact(s), arranged to activate before switch blades open. Contact rating - [24 V(ac)][120 V(ac)][208 V(ac)][240 V(ac)][6 V(dc)][12 V(dc)][24 V(dc)] .
- i. Lugs: [Mechanical][Compression] type, suitable for number, size, and conductor material.

B. UL WIAx or NITW - Fused Electrically-Tripped Enclosed Switch :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering

products that may be incorporated into the Work include, but are not limited to, the following] :

- a. [Eaton]
 - b. [Mersen USA]
 - c. [Siemens]
 - d. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Eaton]
 - b. [Mersen USA]
 - c. [Siemens]
 - d. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
- a. Listed Enclosed Switches: UL CCN WIA, including UL 98.
 - b. Listed Industrial Control Panels: UL CCN NITW, including UL 508A for entire assembly and UL 98 component certification for switches.
5. Standard Features:
- a. Product Reference Standard: "Heavy Duty" switches meeting requirements of NEMA BS 31047.
 - b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
 - c. Motor Rating: Motor-circuit switches must be marked with horsepower ratings for starting characteristics of motor.
 - d. Short-Circuit Current Rating: As determined by results of Power System Studies [and selection of fuses] .
 - e. Fuseholders: Provide clips or bolt pads to accommodate selected fuses.
 - f. Lockable Handle: Capability to accept three padlocks, and interlocked with cover in closed position.
 - g. Shunt Trip: Comply with [ASME A17.1,] UL 50E, and UL 98, with Class J fuse block and 200 kA interrupting and short-circuit current rating.
 - h. Shunt Trip Control Circuit: 120 V(ac); obtained from [integral control power transformer, with primary and secondary fuses,]<Insert source of control power> with control power [transformer][source] of enough capacity to operate shunt trip, pilot, indicating and control devices.
 - i. Voltage Rating: [120 V(ac)][120/240 V(ac)][125 V(dc)][125/250 V(dc)][240 V(ac)][240/480 V(ac)][250 V(dc)][480 V(ac)][600 V(ac)][600 V(dc)] .
 - j. Poles: [Two][Three][Four] .
 - k. Wires: [Two][Three][Four][Five] (including solid neutral) .
 - l. Current Rating: [30 A][60 A][100 A][200 A][400 A][600 A][800 A][1200 A][1600 A][2000 A][2500 A][3000 A][4000 A] .
 - m. Horsepower Rating: [1/2 hp][1-1/2 hp][2 hp][3 hp][5 hp][7-1/2 hp][10 hp][15 hp][25 hp][30 hp][50 hp][60 hp][75 hp][100 hp][200 hp][250 hp] .
 - n. Fusing: [Fused][Nonfused] .
 - o. Load Class: [General][Isolating] Use.
 - p. Throw: [Single][Double] .

6. Accessories:

a. Elevator Disconnect Accessories:

- 1) Oiltight key switch for key-to-test function.
- 2) Oiltight Pilot Light: **[Red][Green][White][Yellow]** ON.
- 3) Isolated Neutral Lug: **[100][200]** percent rating.
- 4) Mechanically interlocked auxiliary contacts that change state when switch is opened and closed.
- 5) Three-pole, double-throw, fire-safety and alarm relay: **[120 V(ac)][24 V(dc)]** coil voltage.
- 6) Three-pole, double-throw, fire-alarm voltage monitoring relay complying with NFPA 72.

- b. Equipment Ground Kit: Internally mounted and labeled for copper and aluminum ground conductors.
- c. Neutral Kit: Internally mounted; insulated, capable of being grounded and bonded; labeled for copper and aluminum neutral conductors.
- d. Isolated Ground Kit: Internally mounted; insulated, labeled for copper and aluminum neutral conductors.
- e. Class R Fuse Kit: Provides rejection of other fuse types when Class R fuses are specified.
- f. Service-Rated Switches: Labeled for use as service equipment.
- g. Hookstick Handle: Allows use of hookstick to operate handle.
- h. Auxiliary Contact Kit: **[One][Two]** N.O./N.C. (Form "C") auxiliary contact(s), arranged to activate before switch blades open. Contact rating - **[24 V(ac)][120 V(ac)][208 V(ac)][240 V(ac)][6 V(dc)][12 V(dc)][24 V(dc)]**.
- i. Lugs: **[Mechanical][Compression]** type, suitable for number, size, and conductor material.

C. UL WIAx or NITW - Electrically-Tripped Ground-Fault Protection Enclosed Switch :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Eaton]**
 - b. **[Mersen USA]**
 - c. **[Siemens]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Mersen USA]**
 - c. **[Siemens]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:

- a. Listed Enclosed Switches: UL CCN WIAAX, including UL 98.
 - b. Listed Industrial Control Panels: UL CCN NITW, including UL 508A for entire assembly and UL 98 component certification for switches.
5. Standard Features:
- a. Product Reference Standard: "Heavy Duty" switches meeting requirements of NEMA BS 31047.
 - b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
 - c. Motor Rating: Motor-circuit switches must be marked with horsepower ratings for starting characteristics of motor.
 - d. Short-Circuit Current Rating: As determined by results of Power System Studies [**and selection of fuses**] .
 - e. Fuseholders: Provide clips or bolt pads to accommodate selected fuses.
 - f. Lockable Handle: Capability to accept three padlocks, and interlocked with cover in closed position.
 - g. Shunt Trip: Comply with UL 50E, and UL 98, with Class J fuse block and 200 kA interrupting and short-circuit current rating.
 - h. Shunt Trip Control Circuit: 120 V(ac); obtained from [**integral control power transformer, with primary and secondary fuses,**] <Insert source of control power> with control power [**transformer**] [**source**] of enough capacity to operate shunt trip, pilot, indicating and control devices.
 - i. Voltage Rating: [**120 V(ac)**] [**120/240 V(ac)**] [**125 V(dc)**] [**125/250 V(dc)**] [**240 V(ac)**] [**240/480 V(ac)**] [**250 V(dc)**] [**480 V(ac)**] [**600 V(ac)**] [**600 V(dc)**] .
 - j. Poles: [**Two**] [**Three**] [**Four**] .
 - k. Wires: [**Two**] [**Three**] [**Four**] [**Five**] [(including solid neutral)] .
 - l. Current Rating: [**30 A**] [**60 A**] [**100 A**] [**200 A**] [**400 A**] [**600 A**] [**800 A**] [**1200 A**] [**1600 A**] [**2000 A**] [**2500 A**] [**3000 A**] [**4000 A**] .
 - m. Horsepower Rating: [**1/2 hp**] [**1-1/2 hp**] [**2 hp**] [**3 hp**] [**5 hp**] [**7-1/2 hp**] [**10 hp**] [**15 hp**] [**25 hp**] [**30 hp**] [**50 hp**] [**60 hp**] [**75 hp**] [**100 hp**] [**200 hp**] [**250 hp**] .
 - n. Fusing: [**Fused**] [**Nonfused**] .
 - o. Load Class: [**General**] [**Isolating**] Use.
 - p. Throw: [**Single**] [**Double**] .
6. Accessories:
- a. Equipment Ground Kit: Internally mounted and labeled for copper and aluminum ground conductors.
 - b. Neutral Kit: Internally mounted; insulated, capable of being grounded and bonded; labeled for copper and aluminum neutral conductors.
 - c. Isolated Ground Kit: Internally mounted; insulated, labeled for copper and aluminum neutral conductors.
 - d. Class R Fuse Kit: Provides rejection of other fuse types when Class R fuses are specified.
 - e. Service-Rated Switches: Labeled for use as service equipment.
 - f. Hookstick Handle: Allows use of hookstick to operate handle.
 - g. Auxiliary Contact Kit: [**One**] [**Two**] N.O./N.C. (Form "C") auxiliary contact(s), arranged to activate before switch blades open. Contact rating - [**24 V(ac)**] [**120 V(ac)**] [**208 V(ac)**] [**240 V(ac)**] [**6 V(dc)**] [**12 V(dc)**] [**24 V(dc)**] .
 - h. Lugs: [**Mechanical**] [**Compression**] type, suitable for number, size, and conductor material.

2.3 DEAD-FRONT SWITCHES

A. UL WHXS - Switch for Mounting in Separate Dead-Front Enclosure :

- 1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

- a. **[Eaton]**
 - b. **[Erickson Electrical Equipment Company]**
 - c. **[Siemens]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Eaton]**
 - b. **[Erickson Electrical Equipment Company]**
 - c. **[Siemens]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with the following guide information and corresponding standards:
- a. Listed Dead-Front Switches: UL CCN WHXS, including UL 98.
5. Standard Features:
- a. Product Reference Standard: "Heavy Duty" switches meeting requirements of NEMA BS 31047.
 - b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
 - c. Motor Rating: Motor-circuit switches marked with horsepower ratings for starting characteristics of motor.
 - d. Short-Circuit Current Rating: As determined by results of Power System Studies [**and selection of fuses**] .
 - e. Fuseholders: Provide clips or bolt pads to accommodate selected fuses.
 - f. Lockable Handle: Capability to accept three padlocks, and interlocked with cover in closed position.
 - g. Voltage Rating: **[120 V(ac)][120/240 V(ac)][125 V(dc)][125/250 V(dc)][240 V(ac)][240/480 V(ac)][250 V(dc)][480 V(ac)][600 V(ac)][600 V(dc)]** .
 - h. Poles: **[Two][Three][Four]** .
 - i. Wires: **[Two][Three][Four][Five][(including solid neutral)]** .
 - j. Current Rating: **[30 A][60 A][100 A][200 A][400 A][600 A][800 A][1200 A][1600 A][2000 A][2500 A][3000 A][4000 A]** .
 - k. Horsepower Rating: **[1/2 hp][1-1/2 hp][2 hp][3 hp][5 hp][7-1/2 hp][10 hp][15 hp][25 hp][30 hp][50 hp][60 hp][75 hp][100 hp][200 hp][250 hp]** .
 - l. Fusing: **[Fused][Nonfused]** .
 - m. Load Class: **[General][Isolating]** Use.
 - n. Throw: **[Single][Double]** .
6. Accessories:
- a. Equipment Ground Kit: Internally mounted and labeled for copper and aluminum ground

- conductors.
- b. Neutral Kit: Internally mounted; insulated, capable of being grounded and bonded; labeled for copper and aluminum neutral conductors.
- c. Isolated Ground Kit: Internally mounted; insulated, labeled for copper and aluminum neutral conductors.
- d. Class R Fuse Kit: Provides rejection of other fuse types when Class R fuses are specified.
- e. Service-Rated Switches: Labeled for use as service equipment.
- f. Hookstick Handle: Allows use of hookstick to operate handle.
- g. Auxiliary Contact Kit: **[One][Two]** N.O./N.C. (Form "C") auxiliary contact(s), arranged to activate before switch blades open. Contact rating - **[24 V(ac)][120 V(ac)][208 V(ac)][240 V(ac)][6 V(dc)][12 V(dc)][24 V(dc)]**.
- h. Lugs: **[Mechanical][Compression]** type, suitable for number, size, and conductor material.

2.4 ENCLOSED SWITCHES FOR USE IN HAZARDOUS (CLASSIFIED) LOCATIONS

A. UL WRPR - Enclosed Switch for Use in Hazardous Location :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[Appleton Group (tradename NEER)]**
 - b. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Rockwell Automation, Inc.]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Appleton Group (tradename NEER)]**
 - b. **[Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Rockwell Automation, Inc.]**
 - d. **[Square D; Schneider Electric USA]**
 - e. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with the following guide information and corresponding standards:
 - a. Listed Enclosed Switches: UL CCN WRPR, including UL 98.
 - b. Listed Equipment for Use in and Relating to Classes I, II, and III, Divisions 1 and 2 Hazardous Locations: UL CCN AAIZ, including one or more of the following combinations of applicable standards:
 - 1) Class I, Division 1: UL 1203, UL 913, NFPA 496, UL 60079-28, and UL 60079-33.
 - 2) Class I, Division 2: UL 121201, NFPA 496, UL 60079-28, and UL 60079-33.
 - 3) Class II, Division 1: UL 1203, UL 913, NFPA 496, UL 60079-28, and UL 60079-33.
 - 4) Class II, Division 2: UL 121201, NFPA 496, UL 60079-28, and UL 60079-33.
 - 5) Class III, Divisions 1 and 2: UL 913, UL 121201, and UL 60079-33.

5. Standard Features:

- a. Product Reference Standard: "Heavy Duty" switches meeting requirements of NEMA BS 31047.
- b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
- c. Motor Rating: Motor-circuit switches marked with horsepower ratings for starting characteristics of motor.
- d. Short-Circuit Current Rating: As determined by results of Power System Studies [**and selection of fuses**] .
- e. Fuseholders: Provide clips or bolt pads to accommodate selected fuses.
- f. Lockable Handle: Capability to accept three padlocks, and interlocked with cover in closed position.
- g. Voltage Rating: [120 V(ac)][120/240 V(ac)][125 V(dc)][125/250 V(dc)][240 V(ac)][240/480 V(ac)][250 V(dc)][480 V(ac)][600 V(ac)][600 V(dc)] .
- h. Poles: [Two][Three][Four] .
- i. Wires: [Two][Three][Four][Five][(including solid neutral)] .
- j. Current Rating: [30 A][60 A][100 A][200 A][400 A][600 A][800 A][1200 A][1600 A][2000 A][2500 A][3000 A][4000 A] .
- k. Horsepower Rating: [1/2 hp][1-1/2 hp][2 hp][3 hp][5 hp][7-1/2 hp][10 hp][15 hp][25 hp][30 hp][50 hp][60 hp][75 hp][100 hp][200 hp][250 hp] .
- l. Fusing: [Fused][Nonfused] .
- m. Load Class: [General][Isolating] Use.
- n. Throw: [Single][Double] .

6. Accessories:

- a. Equipment Ground Kit: Internally mounted and labeled for copper and aluminum ground conductors.
- b. Neutral Kit: Internally mounted; insulated, capable of being grounded and bonded; labeled for copper and aluminum neutral conductors.
- c. Isolated Ground Kit: Internally mounted; insulated, labeled for copper and aluminum neutral conductors.
- d. Class R Fuse Kit: Provides rejection of other fuse types when Class R fuses are specified.
- e. Service-Rated Switches: Labeled for use as service equipment.
- f. Hookstick Handle: Allows use of hookstick to operate handle.
- g. Auxiliary Contact Kit: [One][Two] N.O./N.C. (Form "C") auxiliary contact(s), arranged to activate before switch blades open. Contact rating - [24 V(ac)][120 V(ac)][208 V(ac)][240 V(ac)][6 V(dc)][12 V(dc)][24 V(dc)] .
- h. Lugs: [Mechanical][Compression] type, suitable for number, size, and conductor material.

2.5 FUSED POWER-CIRCUIT DEVICES

A. UL IYSR - Enclosed Fused Bolted-Pressure Contact Switch :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :
 - a. [Eaton]
 - b. [Schneider Electric USA, Inc.]
 - c. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[Eaton]**
 - b. **[Schneider Electric USA, Inc.]**
 - c. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with the following guide information and corresponding standards:
- a. Listed Fused Power-Circuit Devices: UL CCN IYSR, including UL 977.
5. Standard Features:
- a. Product Reference Standard: "Heavy Duty" switches meeting requirements of NEMA BS 31047 providing additional pressure or clamping action at both ends of the switch blades when the blades are in a fully closed position.
 - b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
 - c. Motor Rating: Motor-circuit switches marked with horsepower ratings for starting characteristics of motor.
 - d. Short-Circuit Current Rating: As determined by results of Power System Studies [**and selection of fuses**] .
 - e. Fuseholders: Provide clips or bolt pads to accommodate selected fuses.
 - f. Lockable Handle: Capability to accept three padlocks, and interlocked with cover in closed position.
 - g. Voltage Rating: **[120 V(ac)][120/240 V(ac)][125 V(dc)][125/250 V(dc)][240 V(ac)][240/480 V(ac)][250 V(dc)][480 V(ac)][600 V(ac)][600 V(dc)]** .
 - h. Poles: **[Two][Three][Four]** .
 - i. Wires: **[Two][Three][Four][Five][(including solid neutral)]** .
 - j. Current Rating: **[30 A][60 A][100 A][200 A][400 A][600 A][800 A][1200 A][1600 A][2000 A][2500 A][3000 A][4000 A]** .
 - k. Horsepower Rating: **[1/2 hp][1-1/2 hp][2 hp][3 hp][5 hp][7-1/2 hp][10 hp][15 hp][25 hp][30 hp][50 hp][60 hp][75 hp][100 hp][200 hp][250 hp]** .
 - l. Fusing: **[Fused][Nonfused]** .
 - m. Load Class: **[General][Isolating]** Use.
 - n. Throw: **[Single][Double]** .
6. Accessories:
- a. Equipment Ground Kit: Internally mounted and labeled for copper and aluminum ground conductors.
 - b. Neutral Kit: Internally mounted; insulated, capable of being grounded and bonded; labeled for copper and aluminum neutral conductors.
 - c. Isolated Ground Kit: Internally mounted; insulated, labeled for copper and aluminum neutral conductors.
 - d. Class R Fuse Kit: Provides rejection of other fuse types when Class R fuses are specified.
 - e. Service-Rated Switches: Labeled for use as service equipment.
 - f. Hookstick Handle: Allows use of hookstick to operate handle.
 - g. Auxiliary Contact Kit: **[One][Two]** N.O./N.C. (Form "C") auxiliary contact(s), arranged to activate before switch blades open. Contact rating - **[24 V(ac)][120 V(ac)][208 V(ac)][240 V(ac)][6 V(dc)][12 V(dc)][24 V(dc)]** .
 - h. Lugs: **[Mechanical][Compression]** type, suitable for number, size, and conductor material.

B. UL IYSR - Enclosed Fused High-Pressure Butt-Type Contact Switch :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB]**
 - b. **[Eaton]**
 - c. **[Siemens]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB]**
 - b. **[Eaton]**
 - c. **[Siemens]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with the following guide information and corresponding standards:
 - a. Listed Fused Power-Circuit Devices: UL CCN IYSR, including UL 977.
5. Standard Features:
 - a. Product Reference Standard: "Heavy Duty" switches meeting requirements of NEMA BS 31047 and having butt-type contacts and a spring-charged mechanism.
 - b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
 - c. Motor Rating: Motor-circuit switches marked with horsepower ratings for starting characteristics of motor.
 - d. Short-Circuit Current Rating: As determined by results of Power System Studies **[and selection of fuses]** .
 - e. Fuseholders: Provide clips or bolt pads to accommodate selected fuses.
 - f. Lockable Handle: Capability to accept three padlocks, and interlocked with cover in closed position.
 - g. Voltage Rating: **[120 V(ac)][120/240 V(ac)][125 V(dc)][125/250 V(dc)][240 V(ac)][240/480 V(ac)][250 V(dc)][480 V(ac)][600 V(ac)][600 V(dc)]** .
 - h. Poles: **[Two][Three][Four]** .
 - i. Wires: **[Two][Three][Four][Five][(including solid neutral)]** .
 - j. Current Rating: **[30 A][60 A][100 A][200 A][400 A][600 A][800 A][1200 A][1600 A][2000 A][2500 A][3000 A][4000 A]** .
 - k. Horsepower Rating: **[1/2 hp][1-1/2 hp][2 hp][3 hp][5 hp][7-1/2 hp][10 hp][15 hp][25 hp][30 hp][50 hp][60 hp][75 hp][100 hp][200 hp][250 hp]** .
 - l. Fusing: **[Fused][Nonfused]** .
 - m. Load Class: **[General][Isolating]** Use.
 - n. Throw: **[Single][Double]** .
6. Accessories:

- a. Equipment Ground Kit: Internally mounted and labeled for copper and aluminum ground conductors.
- b. Neutral Kit: Internally mounted; insulated, capable of being grounded and bonded; labeled for copper and aluminum neutral conductors.
- c. Isolated Ground Kit: Internally mounted; insulated, labeled for copper and aluminum neutral conductors.
- d. Class R Fuse Kit: Provides rejection of other fuse types when Class R fuses are specified.
- e. Service-Rated Switches: Labeled for use as service equipment.
- f. Hookstick Handle: Allows use of hookstick to operate handle.
- g. Auxiliary Contact Kit: **[One][Two]** N.O./N.C. (Form "C") auxiliary contact(s), arranged to activate before switch blades open. Contact rating - **[24 V(ac)][120 V(ac)][208 V(ac)][240 V(ac)][6 V(dc)][12 V(dc)][24 V(dc)]** .
- h. Lugs: **[Mechanical][Compression]** type, suitable for number, size, and conductor material.

2.6 MOLDED-CASE CIRCUIT BREAKERS AND ENCLOSURES

A. UL DIVQ - Enclosed Molded-Case Circuit Breaker :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB]**
 - b. **[ABB Industrial Connections and Solutions LLC (GE ED&C)]**
 - c. **[Eaton]**
 - d. **[Hubbell Inc Wiring Device Div]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **[Littelfuse, Inc.]**
 - g. **[NOARK Electric North America]**
 - h. **[Siemens Industry, Inc.]**
 - i. **[Square D; Schneider Electric USA]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB]**
 - b. **[ABB Industrial Connections and Solutions LLC (GE ED&C)]**
 - c. **[Eaton]**
 - d. **[Hubbell Inc Wiring Device Div]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **[Littelfuse, Inc.]**
 - g. **[NOARK Electric North America]**
 - h. **[Siemens Industry, Inc.]**
 - i. **[Square D; Schneider Electric USA]**
 - j. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with the following guide information and corresponding standards:

- a. Listed Fused Power-Circuit Devices: UL CCN DIVQ, including UL 489.
5. Standard Features:
- a. Product Reference Standard: NEMA AB 3.
 - b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
 - c. Short-Circuit Current Rating: As determined by results of Power System Studies.
 - d. System Frequency: **[50/60 Hz][DC][400 Hz]<Insert frequency>** .
 - e. Voltage Rating: **[120 V(ac)][125 V(ac)][120/240 V(ac)][208 V(ac)][208Y/120 V(ac)][240 V(ac)][277 V(ac)][480Y/277 V(ac)][480 V(ac)][347 V(ac)][600Y/347 V(ac)][600 V(ac)][24 V(dc)][48 V(dc)][60 V(dc)][65 V(dc)][80 V(dc)][125 V(dc)][125/250 V(dc)][160 V(dc)][250 V(dc)][500 V(dc)][600 V(dc)]** .
 - f. Poles: **[One][Two][Three][corner-grounded delta]** .
 - g. Wires: **[Two][Three][Four][Five][including solid neutral]** .
 - h. Current Rating: **[15 A][20 A][25 A][30 A][34 A][40 A][45 A][50 A][60 A][70 A][80 A][90 A][100 A][110 A][125 A][150 A][175 A][200 A][225 A][250 A][300 A][350 A][400 A][450 A][500 A][600 A][700 A][800 A][1000 A][1200 A][1600 A][2000 A][2500 A][3000 A][4000 A][5000 A][6000 A]** .
 - i. Tripping Means: **[Thermal-Magnetic][Hydraulic-Magnetic][Electronic (Solid-State)]** .
 - j. Intended Use: **[Main][Feeder][Branch circuit]** protection.
 - k. Specific Purpose Categories:
 - 1) Remotely operated.
 - 2) Integrally-fused.
 - 3) Current-limiting.
 - 4) Switching Duty (SWD).
 - 5) Instantaneous trip only (motor circuit protector or circuit interrupter).
 - 6) Heating, air conditioning, and refrigeration (HACR).
 - 7) Marine.
 - 8) Naval.
 - 9) Mining.
 - 10) High intensity discharge lighting (HID).
 - 11) Ground-fault circuit interrupter (GFCI).
 - 12) Arc-fault circuit interrupter (AFCI).
 - 13) Equipment ground-fault protective device.
 - 14) Classified (alternates).
 - 15) Secondary surge arrester.
 - 16) Transient voltage surge suppressor (TVSS).
 - 17) For use with uninterruptible power supplies (UPS).
 - 18) 100 percent rated.
 - 19) Photovoltaic (PV).
 - l. Fusing: **[Fused][Nonfused]** .
 - m. Conductor Connections: **[Front-connected][Rear-connected]** .
 - n. Mounting Arrangement: **[Stationary][Plug-in][Drawout]** .
 - o. Lugs: **[Mechanical][Compression]** type, suitable for number, size, trip ratings, and conductor material. Suitable for **[60 deg C rated wire on 125 A circuit breakers and below][75 deg C rated wire][90 deg C rated wire, sized in accordance with 75 deg C temperature rating in NFPA 70]** .
 - p. Ground-Fault Protection: Comply with UL 1053; **[integrally mounted, self-powered][remote-mounted and powered]** type with mechanical ground-fault indicator; relay with adjustable pickup and time-delay settings, push-to-test feature, internal memory, and shunt trip unit; and three-phase, zero-sequence current transformer/sensor.
 - q. Communication Capability: **[Circuit-breaker-mounted][Universal-mounted][Integral][Din-rail-mounted]** communication module with functions and features

compatible with power monitoring and control system, specified in Section 260913 "Electrical Power Monitoring."

6. Accessories:

- a. Interchangeable Trip Unit: Field-installable assembly that controls tripping functions.
- b. Shunt Trip: Trip coil energized from separate circuit, with coil-clearing contact.
- c. Undervoltage Trip: Set to operate at 35 to 75 percent of rated voltage without intentional time delay.
- d. Auxiliary Switch: **[Rated for pilot duty][Not rated for pilot duty]** . **[One SPDT switch][Two SPDT switches]** with "a" and "b" contacts; "a" contacts mimic circuit-breaker contacts, "b" contacts operate in reverse of circuit-breaker contacts.
- e. Alarm Switch: **[Rated for pilot duty][Not rated for pilot duty]** . One **[N.O.][N.C.]** contact operates only when circuit breaker has tripped.
- f. Electrical Operator: Provide remote control for on, off, and reset operations.
- g. Key Interlock Kit: Externally mounted to prohibit circuit-breaker operation; key must be removable only when circuit breaker is in off position.
- h. Zone-Selective Interlocking: Integral with **[electronic][ground-fault]** trip unit; for interlocking ground-fault protection function.
- i. Handle Locking Device: Capable of locking circuit breaker in isolated position.
- j. Accessory Control Power: **[Integrally mounted, self-powered][Remote mounted and powered]** ; **[24 V(ac)][120 V(ac)][208 V(ac)][240 V(ac)][12 V(dc)][24 V(dc)][120 V(dc)]** .

2.7 MOLDED-CASE SWITCHES AND ENCLOSURES

A. UL WJAZ - Enclosed Molded-Case Switch :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :
 - a. **[ABB Industrial Connections & Solutions LLC]**
 - b. **[Bussmann; Eaton, Electrical Sector]**
 - c. **[Eaton]**
 - d. **[NOARK Electric North America]**
 - e. **[Schneider Electric USA, Inc.]**
 - f. **[Siemens Industry, Inc.]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Industrial Connections & Solutions LLC]**
 - b. **[Bussmann; Eaton, Electrical Sector]**
 - c. **[Eaton]**
 - d. **[NOARK Electric North America]**
 - e. **[Schneider Electric USA, Inc.]**
 - f. **[Siemens Industry, Inc.]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical**

testing laboratory recognized by authorities having jurisdiction] in accordance with the following guide information and corresponding standards:

- a. Listed Fused Power-Circuit Devices: UL CCN WJAZ, including UL 489.
5. Standard Features:
- a. Product Reference Standard: NEMA AB 3 and is designed to open and close a circuit by nonautomatic means.
 - b. Enclosure Rating: Marked for intended use and location in accordance with UL 50E.
 - c. Short-Circuit Current Rating: As determined by results of Power System Studies.
 - d. System Frequency: **[50/60 Hz][DC][400 Hz]<Insert frequency>** .
 - e. Voltage Rating: **[120 V(ac)][125 V(ac)][120/240 V(ac)][208 V(ac)][208Y/120 V(ac)][240 V(ac)][277 V(ac)][480Y/277 V(ac)][480 V(ac)][347 V(ac)][600Y/347 V(ac)][600 V(ac)][24 V(dc)][48 V(dc)][60 V(dc)][65 V(dc)][80 V(dc)][125 V(dc)][125/250 V(dc)][160 V(dc)][250 V(dc)][500 V(dc)][600 V(dc)]** .
 - f. Poles: **[One][Two][Three][corner-grounded delta]** .
 - g. Wires: **[Two][Three][Four][Five][(including solid neutral)]** .
 - h. Current Rating: **[15 A][20 A][25 A][30 A][34 A][40 A][45 A][50 A][60 A][70 A][80 A][90 A][100 A][110 A][125 A][150 A][175 A][200 A][225 A][250 A][300 A][350 A][400 A][450 A][500 A][600 A][700 A][800 A][1000 A][1200 A][1600 A][2000 A][2500 A][3000 A][4000 A][5000 A][6000 A]** .
 - i. Tripping Means: **[Thermal-Magnetic][Hydraulic-Magnetic][Electronic (Solid-State)]** .
 - j. Intended Use: **[Main][Feeder][Branch circuit]** protection.
 - k. Specific Purpose Categories:
 - 1) Remotely operated.
 - 2) Integrally-fused.
 - 3) Current-limiting.
 - 4) Switching Duty (SWD).
 - 5) Instantaneous trip only (motor circuit protector or circuit interrupter).
 - 6) Heating, air conditioning, and refrigeration (HACR).
 - 7) Marine.
 - 8) Naval.
 - 9) Mining.
 - 10) High intensity discharge lighting (HID).
 - 11) Ground fault circuit interrupter (GFCI).
 - 12) Arc fault circuit interrupter (AFCI).
 - 13) Equipment ground fault protection.
 - 14) Classified (alternates).
 - 15) Secondary surge arrester.
 - 16) Transient voltage surge suppressor (TVSS).
 - 17) For use with uninterruptible power supplies (UPS).
 - 18) 100 percent rated.
 - 19) Photovoltaic (PV).
 - l. Fusing: **[Fused][Nonfused]** .
 - m. Conductor Connections: **[Front-connected][Rear-connected]** .
 - n. Mounting Arrangement: **[Stationary][Plug-in][Drawout]** .
 - o. Lugs: **[Mechanical][Compression]** type, suitable for number, size, trip ratings, and conductor material. Suitable for **[60 deg C rated wire on 125 A switches and below][75 deg C rated wire][90 deg C rated wire, sized in accordance with 75 deg C temperature rating in NFPA 70]** .
 - p. Ground-Fault Protection: Comply with UL 1053; **[integrally mounted, self-powered][remote-mounted and powered]** type with mechanical ground-fault indicator;

relay with adjustable pickup and time-delay settings, push-to-test feature, internal memory, and shunt trip unit; and three-phase, zero-sequence current transformer/sensor.

- q. Communication Capability: **[Circuit-breaker-mounted][Universal-mounted][Integral][DIN-rail-mounted]** communication module with functions and features compatible with power monitoring and control system, specified in Section 260913 "Electrical Power Monitoring."

6. Accessories:

- a. Interchangeable Trip Unit: Field-installable assembly that controls tripping functions.
- b. Shunt Trip: Trip coil energized from separate circuit, with coil-clearing contact.
- c. Undervoltage Trip: Set to operate at 35 to 75 percent of rated voltage without intentional time delay.
- d. Auxiliary Switch: **[Rated for pilot duty][Not rated for pilot duty]** . **[One SPDT switch][Two SPDT switches]** with "a" and "b" contacts; "a" contacts mimic switch contacts, "b" contacts operate in reverse of switch contacts.
- e. Alarm Switch: **[Rated for pilot duty][Not rated for pilot duty]** . One **[N.O.][N.C.]** contact operates only when switch has tripped.
- f. Electrical Operator: Provide remote control for on, off, and reset operations.
- g. Key Interlock Kit: Externally mounted to prohibit switch operation; key must be removable only when switch is in off position.
- h. Zone-Selective Interlocking: Integral with **[electronic][ground-fault]** trip unit; for interlocking ground-fault protection function.
- i. Handle Locking Device: Capable of locking switch in isolated position.
- j. Accessory Control Power: **[Integrally mounted, self-powered][Remote mounted and powered]** ; **[24 V(ac)][120 V(ac)][208 V(ac)][240 V(ac)][12 V(dc)][24 V(dc)][120 V(dc)]** .

2.8 MAINTENANCE MATERIAL ITEMS

- A. Spare Parts: Furnish to Owner spare parts, for repairing enclosed switches and circuit breakers, that are packaged with protective covering for storage on-site and identified with labels describing contents. [**Include the following:**]
 - 1. Fuses: Equal to **[10]<Insert number>** percent of quantity installed for each size and type, but no fewer than **[three]<Insert number>** of each size and type.
 - 2. Fuse Pullers: **[Two]<Insert number>** for each size and type.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine elements and surfaces to receive enclosed switches and circuit breakers for compliance with installation tolerances and other conditions affecting performance of the Work.
- B. Proceed with installation only after unsatisfactory conditions have been corrected.
 - 1. Commencement of work will indicate Installer's acceptance of areas and conditions as satisfactory.

3.2 SELECTION OF ENCLOSURES

- A. Indoor, Dry and Clean Locations: UL 50E, **[Type 1]<Insert type>** .

- B. Outdoor Locations: UL 50E, [Type 3R][Type 4X]<Insert type> .
- C. Kitchen and Wash-Down Areas: UL 50E, [Type 4X]<Insert type> , [stainless steel]<Insert material> .
- D. Other Wet or Damp, Indoor Locations: UL 50E, [Type 4]<Insert type> .
- E. Indoor Locations Subject to Dust, Falling Dirt, and Dripping Noncorrosive Liquids: UL 50E, Type 12.
- F. Hazardous Areas Indicated on the Drawings: UL 50E, [Type 7][Type 9]<Insert type>[with cover attached by Type 316 stainless steel bolts] .

3.3 INSTALLATION, GENERAL

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Maintenance: NFPA 70B and NECA NEIS 91.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Commissioning of Electrical Systems: NECA NEIS 90.
 - 5. Commissioning of Active and Passive Fire Protection Features: NFPA 3 and NFPA 4.
 - 6. Hot Work: NFPA 51B.
 - 7. Fire-Alarm and Premises Security Work: NFPA 72, NFPA 731, NFPA 1225, and NECA NEIS 305.
 - 8. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 9. Communications Work: BICSI N1.
 - 10. Work in ITE Rooms: NFPA 75.
 - 11. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
 - 12. Life Safety and Means of Egress Work: NFPA 101.
 - 13. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
 - 14. Work in Confined Spaces: NFPA 350.
 - 15. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 16. Evaluation of Unlabeled Electrical Equipment: NFPA 791.
 - 17. Consult Architect for resolution of conflicting requirements.
- C. Interfaces with Other Work:
 - 1. Identification: Provide labels for enclosed switches, circuit breakers, and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure with engraved metal or laminated-plastic nameplate.
 - c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.
 - 2. Grounding and Bonding:
 - a. Equipment Grounding Conductors: Provide and route insulated equipment grounding conductors with other feeder or branch circuit conductors. Bond equipment grounding conductor to enclosure using provided hardware in accordance with manufacturer's published instructions.
 - b. Equipment Bonding Conductors: Provide equipment bonding straps or jumpers where additional bonding is indicated on the Drawings between enclosed switches or circuit breakers and adjacent metallic equipment, enclosures, piping, or building structure. Route

bonding conductors along shortest and straightest paths possible unless otherwise indicated or required by Code. Avoid obstructing access panels or placing conductors where they may be subjected to strain, impact, or damage.

3.4 INSTALLATION OF ENCLOSED SWITCHES AND CIRCUIT BREAKERS

A. Special Techniques:

1. Layout Coordination: Coordinate layout and installation of switches, circuit breakers, and components with equipment served and adjacent surfaces. Maintain required workspace clearances and required clearances for equipment access doors and panels.
2. Mounting Heights: Install individual wall-mounted switches and circuit breakers with tops at uniform height unless otherwise indicated.
3. Seismic Controls: Provide equipment mounts and anchors complying with seismic requirements for the Project.
4. Temporary Lifting Provisions: Remove temporary lifting of eyes, channels, and brackets and temporary blocking of moving parts from enclosures and components.
5. Fusing: Install fuses in fusible devices.

3.5 FIELD QUALITY CONTROL OF ENCLOSED SWITCHES AND CIRCUIT BREAKERS

A. Administrator for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections [**with assistance of factory-authorized service representative**] .

B. Acceptance Testing Preparation: **<Insert requirements>** .

C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>** .

D. Tests and Inspections for Enclosed Switches, Dead-Front Switches, Enclosed Switches for Use in Hazardous (Classified) Locations, and Fused Power-Circuit Devices:

1. Visual and Mechanical Inspection:

- a. Inspect physical and mechanical condition.
- b. Inspect anchorage, alignment, grounding, and clearances.
- c. Verify that unit is clean.
- d. Verify blade alignment, blade penetration, travel stops, and mechanical operation.
- e. Verify that fuse sizes and types match the Specifications and the Drawings.
- f. Verify that each fuse has adequate mechanical support and contact integrity.
- g. Inspect bolted electrical connections for high resistance using one of the methods as follows:

1) Use low-resistance ohmmeter.

- a) Compare bolted connection resistance values to values of similar

connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.

- 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS Table 100.12.
 - a) Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS Table 100.12.
 - h. Verify that operation and sequencing of interlocking systems is as described in the Specifications and shown on the Drawings.
 - i. Verify correct phase barrier installation.
 - j. Verify lubrication of moving current-carrying parts and moving and sliding surfaces.
2. Electrical Tests:
- a. Perform resistance measurements through bolted connections with low-resistance ohmmeter. Compare bolted connection resistance values to values of similar connections. Investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
 - b. Measure contact resistance across each switchblade fuseholder. Drop values may not exceed high level of manufacturer's published data. If manufacturer's published data are not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
 - c. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with switch closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, use Table 100.1 from NETA ATS. Investigate values of insulation resistance less than those published in Table 100.1 or as recommended in manufacturer's published data.
 - d. Measure fuse resistance. Investigate fuse-resistance values that deviate from each other by more than 15 percent.
 - e. Perform ground fault test in accordance with NETA ATS Section 7.14 "Ground Fault Protection Systems, Low-Voltage."
- E. Tests and Inspections for Molded-Case Circuit Breakers and Enclosures and for Molded-Case Switches and Enclosures:
1. Visual and Mechanical Inspection:
 - a. Verify that equipment nameplate data are as described in the Specifications and shown on the Drawings.
 - b. Inspect physical and mechanical condition.
 - c. Inspect anchorage, alignment, grounding, and clearances.
 - d. Verify that unit is clean.
 - e. Operate circuit breaker to ensure smooth operation.
 - f. Inspect bolted electrical connections for high resistance using one of the methods as follows:
 - 1) Use low-resistance ohmmeter.
 - a) Compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of lowest value.

- 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS Table 100.12.
 - a) Bolt-torque levels must be in accordance with manufacturer's published data. In absence of manufacturer's published data, use NETA ATS Table 100.12.
 - g. Inspect operating mechanism, contacts, and chutes in unsealed units.
 - h. Perform adjustments for final protective device settings in accordance with coordination study.
2. Electrical Tests:
- a. Perform resistance measurements through bolted connections with low-resistance ohmmeter. Compare bolted connection resistance values to values of similar connections. Investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
 - b. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with circuit breaker closed, and across each open pole. Apply voltage in accordance with manufacturer's published data. In absence of manufacturer's published data, use Table 100.1 from NETA ATS. Investigate values of insulation resistance less than those published in Table 100.1 or as recommended in manufacturer's published data.
 - c. Perform contact/pole resistance test. Drop values may not exceed high level of manufacturer's published data. If manufacturer's published data are not available, investigate values that deviate from adjacent poles or similar switches by more than 50 percent of lowest value.
 - d. Perform insulation resistance tests on control wiring with respect to ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid state components, follow manufacturer's recommendation. Insulation resistance values may be no less than 2 MΩ.
 - e. Determine the primary current injection by the following:
 - 1) Long-time pickup and delay. Pickup values must be as specified. Trip characteristics may not exceed manufacturer's published time-current characteristic tolerance band, including adjustment factors.
 - 2) Short-time pickup and delay. Short-time pickup values must be as specified. Trip characteristics may not exceed manufacturer's published time-current characteristic tolerance band, including adjustment factors.
 - 3) Ground-fault pickup and time delay. Ground-fault pickup values must be as specified. Trip characteristics may not exceed manufacturer's published time-current characteristic tolerance band, including adjustment factors.
 - 4) Instantaneous pickup. Instantaneous pickup values must be as specified and within manufacturer's published tolerances.
 - f. Test functionality of trip unit by means of primary current injection. Pickup values and trip characteristics must be as specified and within manufacturer's published tolerances.
 - g. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published data. Minimum pickup voltage of shunt trip and close coils must be as indicated by manufacturer.
 - h. Verify correct operation of auxiliary features such as trip and pickup indicators; zone interlocking; electrical close and trip operation; trip-free, anti-pump function; and trip unit battery condition. Reset trip logs and indicators. Investigate units that do not function as designed.
 - i. Verify operation of charging mechanism. Investigate units that do not function as designed.
3. Test and adjust controls, remote monitoring, and safeties.

- F. Nonconforming Work:
 - 1. Enclosed switches and circuit breakers will be considered defective if they do not pass tests and inspections.
 - 2. Remove and replace defective units and retest.
- G. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.
 - 1. Test procedures used.
 - 2. Include identification of each enclosed switch and circuit breaker tested and describe test results.
 - 3. List deficiencies detected, remedial action taken, and observations after remedial action.
- H. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.
 - 1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.6 ADJUSTING

- A. Adjust moving parts and operable components to function smoothly, and lubricate in accordance with manufacturer's published instructions.
- B. Set field-adjustable circuit-breaker trip ranges [**in accordance with results of power system studies.**][**to values indicated on the Drawings.**][**to values indicated in attached schedule.**]

3.7 PROTECTION

- A. After installation, protect enclosed switches and circuit breakers from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

3.8 MAINTENANCE

- A. Infrared Scanning of Enclosed Switches and Circuit Breakers: Two months after Substantial Completion, perform infrared scan of joints and connections. Remove covers so joints and connections are accessible to portable scanner. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison.
 - 1. Instruments and Equipment: Use infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.
 - 2. Follow-up Infrared Scanning: Perform two follow-up infrared scans of enclosed switches and breakers, one at four months and another at 11 months after Substantial Completion.
 - 3. Instrument: Use infrared-scanning device designed to measure temperature or to detect significant deviations from normal values. Provide documentation of device calibration.
 - 4. Field Reports for Infrared Scanning: Prepare certified report that identifies units checked and that describes scanning results. Include notation of deficiencies detected, remedial actions taken, and scanning observations after remedial action.

SECTION 26 29 13 00 - MANUAL AND MAGNETIC MOTOR CONTROLLERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Manual motor controllers.
2. Magnetic motor controllers.
3. Combination motor controllers.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
6. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic-[**and wind**]-control devices referenced by this Section.
7. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
8. Section 260573 "Power System Studies" specifies arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.

1.2 DEFINITIONS

- A. CPT: Control power transformer.
- B. MCCB: Molded-case circuit breaker.
- C. MCP: Motor circuit protector.
- D. N.C.: Normally closed.
- E. OCPD: Overcurrent protective device.
- F. SCCR: Short-circuit current rating.
- G. SCPD: Short-circuit protective device.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
 - 2. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing laboratory, certifying that model number corresponding to specified product complies with specified listing criteria.
- B. Shop Drawings: Prepare and submit the following:
 - 1. Include plans, elevations, sections, and mounting details.
 - 2. Indicate dimensions, weights, required clearances, and location and size of each field connection.
 - 3. Wire Termination Diagrams and Schedules: Include diagrams for signal, and control wiring. Identify terminals and wiring designations and color-codes to facilitate installation, operation, and maintenance. Indicate recommended types, wire sizes, and circuiting arrangements for field-installed wiring, and show circuit protection features. Differentiate between manufacturer-installed and field-installed wiring.
 - 4. Include features, characteristics, ratings, and factory settings of individual overcurrent protective devices and auxiliary components.
- C. Product Schedule: List the following for each enclosed controller:
 - 1. Each installed magnetic controller type.
 - 2. Laboratory and file number for listing by qualified electrical testing laboratory.
 - 3. Factory-installed accessories.
 - 4. Nameplate legends.
 - 5. SCCR of integrated unit.
 - 6. For each combination magnetic controller include features, characteristics, ratings, and factory setting of the SCPD and OCPD.
 - a. Listing document proving Type 2 coordination.
 - 7. For each series-rated combination state the listed integrated short-circuit current (withstand) rating of SCPD and OCPDs by qualified electrical testing laboratory recognized by authorities having jurisdiction.
- D. Field quality-control reports.
- E. System startup testing reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Field Reports:
 - 1. Manufacturer's field reports for field quality-control support.
 - 2. Manufacturer's field reports for system startup support.
 - 3. Field reports for infrared scanning.

**1.5 MAINTENANCE MATERIAL SUBMITTALS**

- A. Spare parts.

1.6 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician I: Possessing active NICET EPT Level I certification. Able to work safely around electrical power equipment and cabling under supervision.
- B. Electrical Power Testing (EPT) Technician II: Possessing active NICET EPT Level II certification. Able to isolate and ground electrical power equipment, to connect test equipment, and to conduct and document standard tests of basic equipment.
- C. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- D. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.
- E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

1.7 DELIVERY, STORAGE, AND HANDLING

- A. Store controllers indoors in clean, dry space with uniform temperature to prevent condensation. Protect controllers from exposure to dirt, fumes, water, corrosive substances, and physical damage.
- B. If stored in areas subject to weather, cover controllers to protect them from weather, dirt, dust, corrosive substances, and physical damage. Remove loose packing and flammable materials from inside controllers; **[install temporary electric heating, with at least][50 W]<Insert number>[per controller][connect factory-installed space heaters to temporary electrical service].**

1.8 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Modeling, analysis, product selection, installation, and quality control for all electrical Work on the Project must comply with service condition requirements specified in Section 018116 "Facility Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria."
- B. Ambient Environment Ratings: Rate equipment for continuous operation under the following conditions unless otherwise indicated:
 - 1. Ambient Temperature: Not less than **23 deg F (minus 5 deg C)** and not exceeding **104 deg F (40 deg C)**.
 - 2. Altitude: Not exceeding **6600 ft (2010 m)** for electromagnetic and manual devices.
 - 3. The effect of solar radiation is insignificant.

4. <Insert unusual service condition>.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Enclosures:
1. Environmental Ratings: Comply with UL 50E, type designations as indicated on the Drawings.
 2. Construction: Comply with NEMA IA 10030.
 3. Controllers in Hazardous (Classified) Locations: Comply with UL 1203.
- C. Seismic and Wind Performance: Installed assembly must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
1. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[, **and unit must be fully operational after seismic events**].
 2. Component Importance Factor (Ip): [1.0][1.5].
 3. Component Amplification Factor (ap): [1.0][2.5]<Insert value>.
 4. Component Response Modification Factor (Rp): [1.5][2.0][2.5][6.0]<Insert value>.
 5. Component Overstrength Factor (Ωo): [1.5][2.5]<Insert value>.

2.2 MANUAL MOTOR CONTROLLERS

- A. Motor-Starting Switches (MSS) :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [ABB, Motion Business]
 - b. [Eaton]
 - c. [Rockwell Automation, Inc.]
 - d. [Siemens Industry, Inc., Energy Management Division]
 - e. [Square D; Schneider Electric USA]
 - f. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [ABB, Motion Business]
 - b. [Eaton]
 - c. [Rockwell Automation, Inc.]
 - d. [Siemens Industry, Inc., Energy Management Division]

- e. **[Square D; Schneider Electric USA]**
 - f. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
 - 4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Motor Controllers, Manual: UL CCN NLRV, including UL 60947-1 and UL 60947-4-1.
 - 5. Standard Features: "Quick-make, quick-break" toggle or push-button action; marked to show whether unit is off or on.
 - a. Referenced Standards: Comply with NEMA ICS 2, general purpose, Class A.
 - b. Configuration: **[Nonreversing][Reversing][Two speed]**.
 - c. Mounting: **[Flush][Surface]**.
 - d. Pilot Light Color: **[Red][Green]**.
 - e. Additional Nameplates: **[FORWARD and REVERSE for reversing switches][HIGH and LOW for two-speed switches]<Insert special markings>**.
- B. Fractional Horsepower Manual Controllers (FHPMC) :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
 - 3. Source Limitations: Obtain products from single manufacturer.
 - 4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Motor Controllers, Manual: UL CCN NLRV, including UL 60947-1 and UL 60947-4-1.

5. Standard Features: "Quick-make, quick-break" toggle or push-button action; marked to show whether unit is off, on, or tripped.
 - a. Referenced Standards: Comply with NEMA ICS 2.
 - 1) Overload Relays:
 - a) Inverse-time-current characteristics; **[Class 10]<Insert class>** tripping characteristics; heaters matched to nameplate full-load current of actual protected motor; external reset push button; **bimetallic type**; **melting alloy type**.
 - b) Bimetallic class as scheduled on the Drawings.
 - b. Configuration: **[Nonreversing][Two speed]**.
 - c. Pilot Light: **[Red]<Insert color>**.

C. Integral Horsepower Manual Controllers (IHPMC) :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Motor Controllers, Manual: UL CCN NLRV, including UL 60947-1 and UL 60947-4-1.
5. Standard Features: "Quick-make, quick-break" toggle or push-button action; marked to show whether unit is off, on, or tripped.
 - a. Referenced Standards: Comply with NEMA ICS 2.

- 1) Overload Relays:
 - a) Inverse-time-current characteristics; **[Class 10]<Insert class>** tripping characteristics; heaters matched to nameplate full-load current of actual protected motor; external reset push button[; **bimetallic type**][; **melting alloy type**].
 - b) Bimetallic class as scheduled on the Drawings.
- b. Configuration: **[Nonreversing][Two speed]**.

2.3 MAGNETIC MOTOR CONTROLLERS

A. Enclosed Full-Voltage Magnetic Motor Controllers :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Motor Controllers, Magnetic: UL CCN NLDX, including UL 60947-1 and UL 60947-4-1.
5. Standard Features: Across-the-line start, electrically held, for nominal system voltage of 600 V(ac) and less.
 - a. Referenced Standards: Comply with UL 508 and NEMA ICS 2, general purpose, Class A.
 - b. Configuration: **[Nonreversing]<Insert configuration>**.
 - c. Contactor Coils: Pressure-encapsulated type[**with coil transient suppressors when indicated**].

- 1) Operating Voltage: Manufacturer's standard unless otherwise indicated.
- d. Control Power: For on-board control power, obtain from line circuit or from integral CPT with capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 1) Spare CPT Capacity as Indicated on the Drawings: **[50][100][200]<Insert number> VA.**
- e. Overload Relays:
 - 1) Thermal Overload Relays:
 - a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters: In each phase; coordinate with nameplate full-load current of actual protected motor; include appropriate adjustment for duty cycle.
 - d) Ambient compensated.
 - e) Automatic resetting.
 - 2) Solid-State Overload Relay:
 - a) Switch or dial selectable for motor-running overload protection.
 - b) Sensors in each phase.
 - c) **[Class 10][Class 20][Class 30][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
- f. Class II Ground-Fault Protection: Comply with UL 1053 to interrupt low-level ground faults. The ground-fault detection system includes circuitry that will prevent the motor controller from tripping when the fault current exceeds the interrupting capacity of the controller. Equip with start and run delays to prevent nuisance trip on starting, and a trip indicator.
- g. Digital communication module, using **[TIA-485 Modbus, RTU protocol,][2][4]-wire connection to host devices with a compatible port]<Insert protocol>** to transmit the following to the LAN:
 - 1) Instantaneous rms current each phase, and 3-phase average.
 - 2) Voltage: L-L for each phase, L-L 3-phase average, L-N each phase and L-N 3-phase average - rms.
 - 3) Active Energy (kWh): 3-phase total.
 - 4) Power Factor:**[Each phase and]** 3-phase total.
 - 5) **<Insert value>.**

B. Enclosed Reduced-Voltage Magnetic Motor Controllers :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**

- f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
- a. Motor Controllers, Magnetic: UL CCN NLDX, including UL 60947-1 and UL 60947-4-1.
5. Standard Features: Electrically held; closed transition; adjustable time delay on transition, 600 V(ac) or less.
- a. Referenced Standards: Comply with UL 508 and NEMA ICS 2, general purpose, Class A.
 - b. Configuration:
 - 1) Wye-Delta Controller: Four contactors, with a three-phase starting resistor/reactor bank.
 - 2) Part-Winding Controller: Separate START and RUN contactors, field-selectable for one-half- or two-thirds-winding start mode, with either six- or nine-lead motors; with separate overload relays for starting and running sequences.
 - 3) Autotransformer Reduced-Voltage Controller: Medium-duty service, with integral overtemperature protection; taps for starting at 50, 65, and 80 percent of line voltage; two START and one RUN contactors.
 - c. Contactor Coils: Pressure-encapsulated type **[with coil transient suppressors when indicated]**.
 - 1) Operating Voltage: Manufacturer's standard unless otherwise indicated.
 - d. Control Power: **[24][120]** V ac; obtained from integral CPT, with primary and secondary fuses, with CPT of sufficient capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 1) Spare CPT Capacity: **[50][100][200]<Insert number>** VA.
 - e. Overload Relays:
 - 1) Thermal Overload Relays: **[Melting alloy type][Bimetallic type]**.
 - a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters in each phase matched to nameplate full-load current of actual

- protected motor and with appropriate adjustment for duty cycle.
 - d) Ambient compensated.
 - e) Automatic resetting.
- 2) Solid-State Overload Relay:
 - a) Switch or dial selectable for motor-running overload protection.
 - b) Sensors in each phase.
 - c) **[Class 10][Class 20][Class 30][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
- f. Class II Ground-Fault Protection: Comply with UL 1053 to interrupt low-level ground faults. The ground-fault detection system includes circuitry that will prevent the motor controller from tripping when the fault current exceeds the interrupting capacity of the controller. Equip with start and run delays to prevent nuisance trip on starting, and a trip indicator.
- g. Digital Communication Module: **[TIA-485 Modbus, RTU protocol,][2][4][wire connection to host devices with a compatible port]<Insert protocol>** to transmit the following to the LAN:
 - 1) Instantaneous rms current each phase, and 3-phase average.
 - 2) Voltage: L-L for each phase, L-L 3-phase average, L-N each phase and L-N 3-phase average - rms.
 - 3) Active Energy (kWh): 3-phase total.
 - 4) Power Factor: **[Each phase and]** 3-phase total.
 - 5) **<Insert value>**.

C. Multispeed Magnetic Controllers :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.

4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Motor Controllers, Magnetic: UL CCN NLDX, including UL 60947-1 and UL 60947-4-1.
5. Standard Features: Two speed, full voltage, across the line, electrically held.
 - a. Referenced Standards: Comply with NEMA ICS 2, general purpose, Class A.
 - b. Configuration: Nonreversing[, **multispeed**].
 - 1) Contactor Coils: Pressure-encapsulated type[**with coil transient suppressors**].
 - a) Operating Voltage: Manufacturer's standard unless otherwise indicated.
 - 2) Power Contacts: Totally enclosed, double break, silver-cadmium oxide; assembled to allow inspection and replacement without disturbing line or load wiring.
 - a) Control Power: **[24][120]** V(ac); obtained from integral CPT, with primary and secondary fuses, with CPT of sufficient capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - b) Spare CPT Capacity: **[50][100][200]<Insert number>** VA.
 - 3) Compelling Relays: Ensure that motor will start only at low speed.
 - 4) Accelerating Timer Relays: Ensure properly timed acceleration through speeds lower than that selected.
 - 5) Decelerating Timer Relays: Ensure automatically timed deceleration through each speed.
 - 6) Antiplugging Timer Relays: Ensure a time delay when transferring from FORWARD to REVERSE and back.
 - c. Overload Relays:
 - 1) Thermal Overload Relays: **[Melting alloy type][Bimetallic type]**.
 - a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - d) Ambient compensated.
 - e) Automatic resetting.
 - 2) Solid-State Overload Relay:
 - a) Switch or dial selectable for motor-running overload protection.
 - b) Sensors in each phase.
 - c) **[Class 10][Class 20][Class 30][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
 - d. Class II Ground-Fault Protection: Comply with UL 1053 to interrupt low-level ground faults. The ground-fault detection system includes circuitry that will prevent the motor controller from tripping when the fault current exceeds the interrupting capacity of the controller. Equip with start and run delays to prevent nuisance trip on starting, and a trip indicator.
 - e. Digital communication module, using **[TIA-485 Modbus, RTU protocol],[2][4]-wire**

connection to host devices with a compatible port]<Insert protocol> to transmit the following to the LAN:

- 1) Instantaneous rms current each phase, and 3-phase average.
- 2) Voltage: L-L for each phase, L-L 3-phase average, L-N each phase and L-N 3-phase average - rms.
- 3) Active Energy (kWh): 3-phase total.
- 4) Power Factor:[**Each phase and**] 3-phase total.
- 5) <Insert value>.

2.4 COMBINATION MAGNETIC MOTOR CONTROLLERS

A. Combination Full-Voltage Magnetic Motor Controller :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**or**][**FM Approvals**][, **CSA Group (with "US" marking)**][, **Intertek ETL**][, **TÜV Rheinland**][, **or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or more of the following guide information and corresponding standards:
 - a. Combination Motor Controllers: UL CCN NKJH (36 BPMs), including UL 60947-1 and UL 60947-4-1.
5. Standard Features: Factory-assembled, combination full-voltage magnetic motor controller consisting of the controller described in this article, indicated disconnecting means, SCPD and OCPD, in a single enclosure.
 - a. Referenced Standards: Comply with NEMA ICS 2, general purpose, Class A.
 - b. Configuration: [**Nonreversing**]**<Insert configuration>**.

- c. Contactor Coils: Pressure-encapsulated type[**with coil transient suppressors when indicated**].
 - 1) Operating Voltage: Manufacturer's standard unless otherwise indicated.
- d. Control Power: For on-board control power, obtain from line circuit or from integral CPT with capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 1) Spare CPT Capacity as Indicated on the Drawings: **[50][100][200]<Insert number> VA.**
- e. Overload Relays:
 - 1) Thermal Overload Relays:
 - a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters: In each phase coordinate with nameplate full-load current of actual protected motor; include appropriate adjustment for duty cycle.
 - d) Ambient compensated.
 - e) Automatic resetting.
 - 2) Solid-State Overload Relay:
 - a) Switch or dial selectable for motor-running overload protection.
 - b) Sensors in each phase.
 - c) **[Class 10][Class 20][Class 30][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
- f. Class II Ground-Fault Protection: Comply with UL 1053 to interrupt low-level ground faults. The ground-fault detection system includes circuitry that will prevent the motor controller from tripping when the fault current exceeds the interrupting capacity of the controller. Equip with start and run delays to prevent nuisance trip on starting, and a trip indicator.
- g. Digital communication module, using **[TIA-485 Modbus, RTU protocol,][2][4][-wire connection to host devices with a compatible port]<Insert protocol>** to transmit the following to the LAN:
 - 1) Instantaneous rms current each phase, and 3-phase average.
 - 2) Voltage: L-L for each phase, L-L 3-phase average, L-N each phase and L-N 3-phase average - rms.
 - 3) Active Energy (kWh): 3-phase total.
 - 4) Power Factor:[**Each phase and**] 3-phase total.
 - 5) **<Insert value>**.
- h. Fusible Disconnecting Means:
 - 1) NEMA KS 1, heavy-duty, horsepower-rated, fusible switch with clips or bolt pads to accommodate indicated fuses.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- i. Nonfusible Disconnecting Means:
 - 1) NEMA KS 1, heavy-duty, horsepower-rated, nonfusible switch.

- 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- j. MCP Disconnecting Means:
 - 1) UL 489 and NEMA AB 3, with interrupting capacity to comply with available fault currents, instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- k. MCCB Disconnecting Means:
 - 1) UL 489 and NEMA AB 3, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse-time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.
 - 2) Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
 - 3) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.

B. Combination Reduced-Voltage Motor Controllers :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Combination Motor Controllers: UL CCN NKJH (36 BPMs), including UL 60947-1 and UL

60947-4-1.

5. Standard Features: Factory-assembled, combination reduced-voltage magnetic motor controller consisting of the controller described in this article, indicated disconnecting means, and SCPD and OCPD, in a single enclosure.
 - a. Configuration:
 - 1) Wye-Delta Controller: Four contactors, with a three-phase starting resistor/reactor bank.
 - 2) Part-Winding Controller: Separate START and RUN contactors, field-selectable for one-half- or two-thirds-winding start mode, with either six- or nine-lead motors; with separate overload relays for starting and running sequences.
 - 3) Autotransformer Reduced-Voltage Controller: Medium-duty service, with integral overtemperature protection; taps for starting at 50, 65, and 80 percent of line voltage; two START and one RUN contactors.
 - b. Contactor Coils: Pressure-encapsulated type[**with coil transient suppressors when indicated**].
 - 1) Operating Voltage: Manufacturer's standard unless otherwise indicated.
 - c. Control Power: **[24][120]** V(ac); obtained from integral CPT, with primary and secondary fuses, with CPT of sufficient capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 1) Spare CPT Capacity: **[50][100][200]<Insert number> VA**.
 - d. Overload Relays:
 - 1) Thermal Overload Relays: **[Melting alloy type][Bimetallic type]**.
 - a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - d) Ambient compensated.
 - e) Automatic resetting.
 - 2) Solid-State Overload Relay:
 - a) Switch or dial selectable for motor-running overload protection.
 - b) Sensors in each phase.
 - c) **[Class 10][Class 20][Class 30][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
 - e. Class II Ground-Fault Protection: Comply with UL 1053 to interrupt low-level ground faults. The ground-fault detection system includes circuitry that will prevent the motor controller from tripping when the fault current exceeds the interrupting capacity of the controller. Equip with start and run delays to prevent nuisance trip on starting, and a trip indicator.
 - f. Digital Communication Module: **[TIA-485 Modbus, RTU protocol,][2][4][-wire connection to host devices with a compatible port]<Insert protocol>** to transmit the following to the LAN:
 - 1) Instantaneous rms current each phase, and 3-phase average.

- 2) Voltage: L-L for each phase, L-L 3-phase average, L-N each phase and L-N 3-phase average - rms.
- 3) Active Energy (kWh): 3-phase total.
- 4) Power Factor:[**Each phase and**] 3-phase total.
- 5) **<Insert value>**.

g. Fusible Disconnecting Means:

- 1) NEMA KS 1, heavy-duty, horsepower-rated, fusible switch with clips or bolt pads to accommodate indicated fuses.
- 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.

h. Nonfusible Disconnecting Means:

- 1) NEMA KS 1, heavy-duty, horsepower-rated, nonfusible switch.
- 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.

i. MCP Disconnecting Means:

- 1) UL 489 and NEMA AB 3, with interrupting capacity to comply with available fault currents, instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
- 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.

j. MCCB Disconnecting Means:

- 1) UL 489 and NEMA AB 3, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse-time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.
- 2) Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
- 3) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.

C. Combination Multispeed Magnetic Motor Controller :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Combination Motor Controllers: UL CCN NKJH (36 BPMs), including UL 60947-1 and UL 60947-4-1.
5. Standard Features: Factory-assembled, combination of multispeed magnetic motor controller, consisting of the controller, indicated disconnecting means, and SCPD and OCPD, in a single enclosure.
 - a. Referenced Standards: Comply with NEMA ICS 2, general purpose, Class A.
 - b. Configuration: **[Nonreversing][Reversing]; [consequent pole][two-winding]**.
 - 1) Contactor Coils: Pressure-encapsulated type **[with coil transient suppressors]**.
 - a) Operating Voltage: Manufacturer's standard unless otherwise indicated.
 - 2) Power Contacts: Totally enclosed, double break, silver-cadmium oxide; assembled to allow inspection and replacement without disturbing line or load wiring.
 - 3) Control Power: **[24][120]** V(ac); obtained from integral CPT, with primary and secondary fuses, with CPT of sufficient capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - a) Spare CPT Capacity: **[50][100][200]<Insert number> VA**.
 - 4) Compelling Relays: Ensure that motor will start only at low speed.
 - 5) Accelerating Timer Relays: Ensure properly timed acceleration through speeds lower than that selected.
 - 6) Decelerating Timer Relays: Ensure automatically timed deceleration through each speed.
 - 7) Antiplugging Timer Relays: Ensure a time delay when transferring from FORWARD to REVERSE and back.
 - c. Overload Relays:
 - 1) Thermal Overload Relays: **[Melting alloy type][Bimetallic type]**.
 - a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - d) Ambient compensated.
 - e) Automatic resetting.
 - 2) Solid-State Overload Relay:

- a) Switch or dial selectable for motor-running overload protection.
 - b) Sensors in each phase.
 - c) **[Class 10][Class 20][Class 30][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
- d. Class II Ground-Fault Protection: Comply with UL 1053 to interrupt low-level ground faults. The ground-fault detection system includes circuitry that will prevent the motor controller from tripping when the fault current exceeds the interrupting capacity of the controller. Equip with start and run delays to prevent nuisance trip on starting, and a trip indicator.
- e. Digital communication module, using **[TIA-485 Modbus, RTU protocol,][2][4][-wire connection to host devices with a compatible port]<Insert protocol>** to transmit the following to the LAN:
 - 1) Instantaneous rms current each phase, and 3-phase average.
 - 2) Voltage: L-L for each phase, L-L 3-phase average, L-N each phase and L-N 3-phase average - rms.
 - 3) Active Energy (kWh): 3-phase total.
 - 4) Power Factor:**[Each phase and]** 3-phase total.
 - 5) **<Insert value>**.
- f. Fusible Disconnecting Means:
 - 1) NEMA KS 1, heavy-duty, horsepower-rated, fusible switch with clips or bolt pads to accommodate indicated fuses.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- g. Nonfusible Disconnecting Means:
 - 1) NEMA KS 1, heavy-duty, horsepower-rated, nonfusible switch.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- h. MCP Disconnecting Means:
 - 1) UL 489 and NEMA AB 3, with interrupting capacity to comply with available fault currents, instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- i. MCCB Disconnecting Means:
 - 1) UL 489 and NEMA AB 3, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse-time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.
 - 2) Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
 - 3) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.

**2.5 ACCESSORIES**

- A. General Requirements for Control Circuit and Pilot Devices: NEMA ICS 5; factory installed in controller enclosure cover unless otherwise indicated.
1. Push-Buttons, Pilot Lights, and Selector Switches: Standard duty, except as needed to match enclosure type. Heavy duty or oiltight where indicated in the controller schedule.
 - a. Push-Buttons: As indicated in the controller schedule.
 - b. Pilot Lights: As indicated in the controller schedule.
 2. Elapsed Time Meters: Heavy duty with digital readout in hours[; **nonresettable**][; **resettable**].
 3. Meters: Panel type, **2-1/2-inch (64-mm)** minimum size with 90- or 120-degree scale and plus or minus two percent accuracy. Where indicated, provide selector switches with an off position.
- B. Motor Protection Relays: Provide solid-state sensing circuit and isolated output contacts for hardwired connections.
1. Phase-failure.
 2. Phase-reversal, with bicolor LED to indicate normal and fault conditions. Automatic reset when phase reversal is corrected.
 3. Under/overvoltage, operate when the circuit voltage reaches a preset value, and drop out when the operating voltage drops to a level below the preset value. Include adjustable time-delay setting.
 4. **<Insert description>**.
- C. Breather Assemblies: Maintain interior pressure and release condensation in **[Type 4][Type 4X][Type 7][Type 9]<Insert type>** enclosures installed outdoors or in unconditioned interior spaces subject to humidity and temperature swings.
- D. Space Heaters: Provide N.C. auxiliary contacts, to mitigate condensation in **[Type 3R][Type 4X][Type 12]<Insert type>** enclosures installed outdoors or in unconditioned interior spaces subject to humidity and temperature swings.
- E. Sun Shields: Install on fronts, sides, and tops of enclosures that are installed outdoors and subject to direct and extended sun exposure.
- F. **<Insert accessories>**.

2.6 MAINTENANCE MATERIAL ITEMS

- A. Spare Parts: Furnish to Owner spare parts, for repairing motor controllers, that are packaged with protective covering for storage on-site and identified with labels describing contents.[**Include the following:**]
1. Fuses for Fused Switches: Equal to **[10]<Insert number>** percent of quantity installed for each size and type, but no fewer than **[three]<Insert number>** of each size and type.
 2. Control Power Fuses: Equal to **[10]<Insert number>** percent of quantity installed for each size and type, but no fewer than **[two]<Insert number>** of each size and type.
 3. Indicating Lights: **[Two]<Insert number>** of each type and color installed.
 4. Auxiliary Contacts: Furnish **[one]<Insert number>** spare(s) for each size and type of magnetic controller installed.
 5. Power Contacts: Furnish **[three]<Insert number>** spares for each size and type of magnetic contactor installed.
 6. **<Insert extra materials>**.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and space conditions for compliance with requirements for motor controllers, their relationship with the motors, and other conditions affecting performance of the Work.

3.2 INSTALLATION OF MANUAL AND MAGNETIC MOTOR CONTROLLERS

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NECA NEIS 1, NFPA 1, and NFPA 70.
 - 2. Electrical Maintenance: NECA NEIS 91 and NFPA 70B.
 - 3. Electrical Safety: NFPA 70E.
 - 4. Commissioning of Electrical Systems: NECA NEIS 90.
 - 5. Hot Work: NFPA 51B.
 - 6. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 7. Work in Confined Spaces: NFPA 350.
 - 8. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 9. Evaluation of Unlabeled Electrical Equipment: NFPA 791.
 - 10. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
 - 1. Wall-Mounted Controllers: Install magnetic controllers on walls with tops at uniform height indicated, and by bolting units to wall or mounting on lightweight structural-steel channels bolted to wall. For controllers not at walls, provide freestanding racks for support unless otherwise indicated.
 - 2. Floor-Mounted Controllers: Install controllers on cast-in-place concrete equipment base(s).
 - 3. Provide seismic control devices.
 - 4. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.
 - 5. Setting of Overload Relays: Select and set overloads on the basis of full-load current rating as shown on motor nameplate. Adjust setting value for special motors as required by NFPA 70 for motors that are high-torque, high-efficiency, and so on.
- D. Interfaces with Other Work:
 - 1. Identification: Provide labels for motor controllers and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure and each compartment with **[baked-enamel signs][metal-backed butyrate signs][laminated acrylic or melamine plastic signs]**, mounted with corrosion-resistant screws.
 - c. Provide warning signs for electrical equipment.
 - 2. Arc-Flash Warning Labels:
 - a. Provide self-adhesive equipment label for each work location **[included in the arc-flash**

hazard analysis].

- b. Labels must be machine printed, with no field-applied markings.
- c. Labels must have orange header with wording, "WARNING, ARC-FLASH HAZARD," and must include the following information taken directly from the arc-flash hazard analysis:
 - 1) Location designation.
 - 2) Nominal voltage.
 - 3) Flash protection boundary.
 - 4) Hazard risk category.
 - 5) Incident energy.
 - 6) Working distance.
 - 7) Engineering report number, revision number, and issue date.

3.3 FIELD QUALITY CONTROL OF MANUAL AND MAGNETIC MOTOR CONTROLLERS

A. Administrant for Electrical Power Tests and Inspections:

- 1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
- 2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
- 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
- 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Acceptance Testing Preparation:

- 1. **<Insert requirements>**.

C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

D. Tests and Inspections:

- 1. Comply with NFPA 70B.
- 2. Visual and Mechanical Inspection:
 - a. Compare equipment nameplate data with drawings and specifications.
 - b. Inspect physical and mechanical condition.
 - c. Inspect anchorage, alignment, and grounding.
 - d. Verify the unit is clean.
 - e. Inspect contactors:
 - 1) Verify mechanical operation.
 - 2) Verify contact gap, wipe, alignment, and pressure are in accordance with manufacturer's published data.
 - f. Motor-Running Protection:
 - 1) Verify overload element rating is correct for its application.
 - 2) If motor-running protection is provided by fuses, verify correct fuse rating.
 - g. Inspect bolted electrical connections for high resistance using one of the two following methods:

- 1) Use a low-resistance ohmmeter. Compare bolted connection resistance values with values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS Table 100.12.
- h. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
3. Electrical Tests:
- a. **[For the contactor and circuit breaker, perform][Perform]** insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with switch closed, and across each open pole.
 - 1) Insulation Resistance: In accordance with manufacturer's published data or NETA ATS Table 100.1. In the absence of manufacturer's published data, use Table 100.5.
 - 2) Investigate and correct insulation resistance values less than those of this table or manufacturer's published instructions.
 - b. Measure fuse resistance. Investigate fuse-resistance values that deviate from each other by more than 15 percent.
 - c. Test motor protection devices in accordance with manufacturer's published data.
 - d. Test circuit breakers as follows:
 - 1) Operate the circuit breaker to ensure smooth operation.
 - 2) For adjustable circuit breakers, adjust protective device settings in accordance with the coordination study. Comply with coordination study recommendations.
 - e. Perform operational tests by initiating control devices.
- E. Nonconforming Work:
1. Motor controller will be considered defective if it does not pass tests and inspections.
 2. Remove and replace defective units and retest.
- F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.
- G. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.
1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.4 SYSTEM STARTUP

- A. Perform startup service in accordance with manufacturer's published instructions.
- B. System Startup Testing: Verify the correct interaction of sensing, processing, and action devices. Perform system startup testing after field quality control tests have been completed and all components have passed specified tests.

1. Develop test parameters and perform tests for the purpose of evaluating performance of integral components and their functioning as a complete unit within design requirements and manufacturer's published data.
2. Verify the correct operation of interlock safety devices for fail-safe functions in addition to design function.
3. Verify the correct operation of sensing devices, alarms, and indicating devices.

C. Nonconforming Work:

1. Motor controller will be considered defective if it does not pass system startup testing.

D. System Startup Testing Report: Compile, prepare, and submit system startup testing reports.

E. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.

1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.5 CLOSEOUT ACTIVITIES

A. Training:

1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain equipment specified in Section 262913.03 "Manual and Magnetic Motor Controllers."
2. **[Provide video recordings of training sessions to Owner][Allow Owner to record training sessions].**

3.6 MAINTENANCE

A. Infrared Scanning of Motor Controllers: Perform infrared scanning during periods of maximum possible loading. Comply with NFPA 70B requirements. Remove covers so joints and connections are accessible to portable scanner. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison.

1. Equipment: Inspect distribution systems with imaging equipment capable of detecting a minimum temperature difference of 1 deg C at 30 deg C. The equipment must detect emitted radiation and convert detected radiation to a visual signal.
2. Act on inspection results and recommended action, and considering the recommendations of NETA ATS Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.
3. Initial Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of the electrical power connections of each motor controller.
4. Follow-On Infrared Scanning: Perform follow-up infrared scans of motor controller at 11 months after Substantial Completion.
5. Field Reports for Infrared Scanning: Prepare a certified report including the following information:
 - a. Identities of personnel performing infrared scanning.

- b. Description of test equipment used and record of their calibration.
- c. Description of motor controllers and associated equipment tested.
- d. Deficiencies found, remedial actions taken, and observations found when scans were repeated after the remedial actions.
- e. Temperature difference between the area of concern and the reference area.
- f. Probable cause of temperature difference.
- g. Areas inspected. Identify inaccessible and unobservable areas and equipment.
- h. Load conditions at time of inspection.
- i. Photographs and thermograms of the deficient area.
- j. Recommended action.

END OF SECTION 26 29 13 00

SECTION 26 29 13 00A - SOFT-START MOTOR CONTROLLERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Soft-start motor controllers.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
6. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic-[**and wind**]-control devices referenced by this Section.
7. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
8. Section 260573 "Power System Studies" specifies arc-flash hazard analysis, warning labels, and circuit-breaker trip ranges referenced by this Section.
9. Section 264313 "Surge Protective Devices for Low-Voltage Electrical Power Circuits" specifies field-installed surge protection referenced by this Section.

1.2 DEFINITIONS

- A. CPT: Control power transformer.
- B. FLA: Full-load amperes.
- C. MCCB: Molded-case circuit breaker.
- D. MCP: Motor circuit protector.
- E. N.C.: Normally closed.
- F. N.O.: Normally open.
- G. OCPD: Overcurrent protective device.
- H. SCCR: Short-circuit current rating.
- I. SCPD: Short-circuit protective device.

- J. SCR: Silicon-controlled rectifier.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.

1. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
2. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing laboratory, certifying that model number corresponding to specified product complies with specified listing criteria.

- B. Shop Drawings: Prepare and submit the following:

1. Include plans, elevations, sections, and mounting details.
2. Indicate dimensions, weights, required clearances, and location and size of each field connection.
3. Wire Termination Diagrams and Schedules: Include diagrams for signal and control wiring. Identify terminals and wiring designations and color-codes to facilitate installation, operation, and maintenance. Indicate recommended types, wire sizes, and circuiting arrangements for field-installed wiring, and show circuit protection features. Differentiate between manufacturer-installed and field-installed wiring.
4. Include features, characteristics, ratings, and factory settings of individual OCPD and auxiliary components.

- C. Product Schedule: For each enclosed controller.

1. Each installed soft-start controller type.
2. Laboratory and file number for listing by qualified electrical testing laboratory..
3. Factory-installed accessories.
4. Nameplate legends.
5. SCCR of integrated unit.
 - a. For each combination soft-start controller, include features, characteristics, ratings, and factory setting of the SCPD and OCPD.
 - 1) Listing document proving Type 2 coordination.
 - b. For each series-rated combination, state the listed integrated SCCR (withstand) of SCPDs and OCPDs by qualified electrical testing laboratory acceptable to authorities having jurisdiction.

- D. Field quality-control reports.

- E. System startup testing reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.

- B. Field Reports:

1. Manufacturer's field reports for field quality-control support.

2. Manufacturer's field reports for system startup support.
3. Field reports for infrared scanning.

1.5 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare parts.

1.6 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician I: Possessing active NICET EPT Level I certification. Able to work safely around electrical power equipment and cabling under supervision.
- B. Electrical Power Testing (EPT) Technician II: Possessing active NICET EPT Level II certification. Able to isolate and ground electrical power equipment, to connect test equipment, and to conduct and document standard tests of basic equipment.
- C. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- D. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.
- E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

1.7 DELIVERY, STORAGE, AND HANDLING

- A. Store soft-start controllers indoors in clean, dry space with uniform temperature to prevent condensation. Protect soft-start controllers from exposure to dirt, fumes, water, corrosive substances, and physical damage.
- B. If stored in areas subject to weather, cover soft-start controllers to protect them from weather, dirt, dust, corrosive substances, and physical damage. Remove loose packing and flammable materials from inside controllers; **[install temporary electric heating, with at least][50 W]<Insert number>[per controller][connect factory-installed space heaters to temporary electrical service].**

1.8 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

- A. Modeling, analysis, product selection, installation, and quality control for all electrical Work on the Project must comply with service condition requirements specified in Section 018116 "Facility Environmental Requirements" and Section 018123 "Facility Seismic and Wind Criteria."
- B. Environmental Limitations: Rate equipment for continuous operation under the following conditions unless otherwise indicated:

1. Ambient Temperature: Not less than **32 deg F (0 deg C)** and not exceeding **104 deg F (40 deg C)**, humidity noncondensing.
2. Altitude: Not exceeding **3300 ft (1000 m)**.
3. The effect of solar radiation is insignificant.
4. **<Insert unusual service condition>**.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Enclosures:
 1. Environmental Ratings: Comply with UL 50E, type designations as indicated on Drawings.
 2. Construction: Comply with NEMA ICS IA 10030.
 3. Controllers in Hazardous (Classified) Locations: Comply with UL 1203.
- C. Seismic and Wind Performance: Installed assembly must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
 1. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[, **and unit must be fully operational after seismic events**].
 2. Component Importance Factor (Ip): **[1.0][1.5]**.
 3. Component Amplification Factor (ap): **[1.0][2.5]<Insert value>**.
 4. Component Response Modification Factor (Rp): **[1.5][2.0][2.5][6.0]<Insert value>**.
 5. Component Overstrength Factor (Ωo): **[1.5][2.5]<Insert value>**.

2.2 SOFT-START MOTOR CONTROLLERS

- A. Enclosed Soft-Start Motor Controllers :
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
- a. Motor Controllers, Mechanically Operated and Solid-State: UL CCN NMFT, including UL 508, UL 60947-1, and UL 60947-4-1.
5. Standard Features: Controllers designed for reduced-voltage start, full-voltage run, and optional soft stop.
- a. Construction: Integrated unit with power SCRs, heat sink, microprocessor logic board, door-mounted digital display and user interface module, run-bypass contactor, and overload relay(s); suitable for use with NEMA MG 1, Design B, polyphase, medium induction motors.
 - b. Run-Bypass Contactor: Magnetic contactor in parallel with the SCR of the soft-start controller, bypassing the SCR when full voltage is achieved.
 - c. Referenced Standards: NEMA ICS 2, general purpose, Class A.
 - d. Configuration: **[Standard duty]<Insert configurations>**.
 - 1) Motor Starting and Stopping: Provide at least two SCRs per phase.
 - 2) Microprocessor Control: Continuously monitor current and proper operation of the SCRs.
 - e. Bypass Contactor: Operates automatically when full voltage is applied to motor, and bypasses the SCRs. Soft-start controller protective features and deceleration controls must remain active when this contactor is in the bypass mode.
 - 1) Power Electronics Disconnect Contactor. Where indicated, installed ahead of the power electronics equipment, and opens automatically when the motor is stopped, or a controller fault is detected, or when an SCR shorts.
 - 2) Logic Board: Identical for all ampere ratings and voltage classes, with environmental protective coating.
 - 3) Surge Protection: Provide **[NEMA ICS 2 compliant factory-installed][field-installed]** surge suppression.
 - f. Control Power:
 - 1) For on-board control power, obtain from line circuit or from integral CPT with capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 2) Spare CPT Capacity: As indicated on Drawings, available in increments of 100 VA, from 100 to 500 VA.
 - g. Controller Diagnostics and Protection:
 - 1) Microprocessor-based thermal-protection system for monitoring SCR and motor

- thermal characteristics, and providing controller overtemperature and motor-overload alarm and trip; settings selectable via the keypad.
 - 2) Protection from line-side reverse phasing; line-side and motor-side phase loss; motor jam, stall, and under-load conditions; and line frequency over or under normal.
 - 3) Input isolation contactor that opens when the controller diagnostics detect a faulted soft-start component or when the motor is stopped.
 - 4) **<Insert items>**.
- h. Cover mounted-controller status panel with LED lights or alphanumeric display to show the following:
- 1) Starter Status: "Ready," "Starting," "Stopping," or "Run."
 - 2) Motor current in amperes.
 - 3) Faults:
 - a) Motor overcurrent trip.
 - b) Motor thermal overload.
 - c) Starter thermal fault.
 - d) Low line voltage.
 - e) Loss of a phase.
 - f) Phases reversed.
 - g) Maximum stator time exceeded.
 - h) Serial communications error.
- i. Interface Panel: **[Mounted on controller door][Mounted remotely within 50 ft (15 m)].[With plug-in connector and removable.]**
- 1) Guarded adjustable set points, not readily accessible.
 - a) Motor FLA, adjustable from **[40 to 110]<Insert numbers>** percent of the controller's rating.
 - b) Current limitation on starting, adjustable from 200 to 500 percent of FLA, typically set at 300 percent.
 - c) NEMA ICS 2 Overload Class: Include the following selections: Class 5, Class 10, Class 15, Class 20, and Class 30.
 - 2) Adjustable set points, readily accessible[, **password protected**].
 - a) Linear acceleration, adjustable from **[1 to 60 s]<Insert range in seconds>**.
 - b) Maximum start time, adjustable from **[1 to 250 s]<Insert range in seconds>**.
 - c) Selector switch; select coast to stop or soft stop.
 - d) Linear deceleration, adjustable from **[1 to 60 s]<Insert range in seconds>**.
- j. Remote Output Features. All outputs prewired to terminal blocks.
- 1) Analog output for field-selectable assignment of motor operating characteristics; **[0-to 10 V(dc)][4- to 20 mA(dc)]**.
 - 2) Form C status contacts that change state when controller is running.
 - 3) Form C alarm contacts that change state when a fault condition occurs.
 - 4) **<Insert items>**.
- k. Digital Communication Module: **[TIA-485 Modbus, RTU protocol, 2-wire connection to host devices with a compatible port][TIA-485 Modbus, RTU protocol, 4-wire connection to host devices with a compatible port]<Insert protocol>** to transmit the following to the LAN:

- 1) Instantaneous root mean square (RMS) current each phase, and three-phase average.
- 2) RMS Voltage: L-L for each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
- 3) Active Energy (kilowatt-hour): Three-phase total.
- 4) Power Factor: **[Each phase and]** three-phase total.
- 5) **<Insert value>**.

B. Combination Soft-Start Motor Controllers :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Motor Controllers, Mechanically Operated and Solid-State: UL CCN NMFT, including UL 508, UL 60947-1, and UL 60947-4-1.
5. Standard Features: Factory-assembled, combination, reduced-voltage soft-start controller with a disconnecting means, SCPD and OCPD, in a single enclosure.
 - a. Construction: Integrated unit with power SCRs, heat sink, microprocessor logic board, door-mounted digital display and user interface module, run-bypass contactor, and overload relay(s); suitable for use with NEMA MG 1, Design B, polyphase, medium induction motors.
 - b. Run-Bypass Contactor: Magnetic contactor in parallel with the SCR of the soft-start controller, bypassing the SCR when full voltage is achieved.
 - c. Referenced Standards: NEMA ICS 2, general purpose, Class A.
 - d. Configuration: **[Standard duty]<Insert configurations>**.

- 1) At least two SCRs per phase to control the starting and stopping of the motor.
 - 2) Continuously monitor current and proper operation of the SCRs.
 - 3) Bypass Contactor: Operates automatically when full voltage is applied to motor, and bypasses the SCRs. Soft-start controller protective features and deceleration controls remain active when this contactor is in the bypass mode.
 - 4) Power Electronics Disconnect Contactor. Where indicated, installed ahead of the power electronics equipment, and opens automatically when the motor is stopped, or a controller fault is detected, or when an SCR shorts.
 - 5) Logic Board: Identical for all ampere ratings and voltage classes, with environmental protective coating.
 - 6) Surge Protection: Provide **[NEMA ICS 2 compliant factory-installed][field-installed]** surge suppression.
- e. Control Power:
- 1) For on-board control power, obtain from line circuit or from integral CPT with capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 2) Spare CPT Capacity: As indicated on Drawings, available in increments of 100 VA, from 100 to 500 VA.
- f. Controller Diagnostics and Protection:
- 1) Microprocessor-based thermal-protection system for monitoring SCR and motor thermal characteristics, and providing controller overtemperature and motor-overload alarm and trip; settings selectable via the keypad.
 - 2) Protection from line-side reverse phasing; line-side and motor-side phase loss; motor jam, stall, and under-load conditions; and line frequency over or under normal.
 - 3) Input isolation contactor that opens when the controller diagnostics detect a faulted soft-start component or when the motor is stopped.
 - 4) **<Insert items>**.
- g. Cover mounted-controller status panel with LED lights or alphanumeric display to show the following:
- 1) Starter Status: "Ready," "Starting," "Stopping," or "Run."
 - 2) Motor current in amperes.
 - 3) Faults:
 - a) Motor overcurrent trip.
 - b) Motor thermal overload.
 - c) Starter thermal fault.
 - d) Low line voltage.
 - e) Loss of a phase.
 - f) Phases reversed.
 - g) Maximum stating time exceeded.
 - h) Serial communications error.
- h. Interface Panel: **[Mounted on controller door][Mounted remotely within 50 ft (15 m)].[With plug-in connector and removable.]**
- 1) Guarded adjustable set points, not readily accessible.
 - a) Motor FLA, adjustable from **[40 to 110]<Insert numbers>** percent of the controller's rating.

- b) Current limitation on starting, adjustable from 200 to 500 percent of FLA, typically set at 300 percent.
 - c) NEMA ICS 2 Overload Class: Include the following selections: Class 5, Class 10, Class 15, Class 20, and Class 30.
- 2) Adjustable set points, readily accessible[, **password protected**].
 - a) Linear acceleration, adjustable from **[1 to 60 s]<Insert range in seconds>**.
 - b) Maximum start time, adjustable from **[1 to 250 s]<Insert range in seconds>**.
 - c) Selector switch; select coast to stop or soft stop.
 - d) Linear deceleration, adjustable from **[1 to 60 s]<Insert range in seconds>**.
- i. Remote Output Features: All outputs prewired to terminal blocks.
 - 1) Analog output for field-selectable assignment of motor operating characteristics; **[0- to 10 V(dc)][4- to 20 mA(dc)]**.
 - 2) Form C status contacts that change state when controller is running.
 - 3) Form C alarm contacts that change state when a fault condition occurs.
 - 4) **<Insert items>**.
- j. Digital Communication Module: **[TIA-485 Modbus, RTU protocol, 2-wire connection to host devices with a compatible port][TIA-485 Modbus, RTU protocol, 4-wire connection to host devices with a compatible port]<Insert protocol>** to transmit the following to the LAN:
 - 1) Instantaneous RMS current each phase, and three-phase average.
 - 2) RMS Voltage: L-L for each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - 3) Active Energy (kilowatt-hour): Three-phase total.
 - 4) Power Factor: **[Each phase and]** three-phase total.
 - 5) **<Insert value>**.
- k. Fusible Disconnecting Means:
 - 1) NEMA KS 1, heavy-duty, horsepower-rated, fusible switch with clips or bolt pads to accommodate **[Class J][Class L][indicated]** fuses.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
 - 3) Auxiliary Contacts: N.O. or N.C., arranged to activate before switch blades open.
- l. MCP Disconnecting Means:
 - 1) UL 489 and NEMA AB 3 (with interrupting capacity to comply with available fault currents) instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
 - 3) Auxiliary contacts "a" and "b" arranged to activate with MCP handle.
 - 4) **[N.C.][N.O.]** alarm contact that operates only when MCP has tripped.
 - 5) Current-limiting module to increase controller SCCR (withstand) to 100 kA.
- m. MCCB Disconnecting Means:
 - 1) UL 489 and NEMA AB 3, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.

- 2) Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
- 3) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- 4) Auxiliary contacts "a" and "b" arranged to activate with MCCB handle.
- 5) **[N.C.][N.O.]** alarm contact that operates only when MCCB has tripped.

n. Molded-Case Switch Disconnecting Means:

- 1) UL 489 and NEMA AB 3, with in-line fuse block for Class J or Class L power fuses (depending on ampere rating), providing an interrupting capacity to comply with available fault currents; MCCB with fixed, high-set instantaneous trip only.
- 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- 3) Auxiliary contacts "a" and "b" arranged to activate with molded-case switch handle.
- 4) **[N.C.][N.O.]** alarm contact that operates only when molded-case switch has tripped.

C. Bypass Motor Controller :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ABB Electrification Installations Products]**
 - b. **[ABB, Motion Business]**
 - c. **[Eaton]**
 - d. **[Rockwell Automation, Inc.]**
 - e. **[Siemens Industry, Inc., Energy Management Division]**
 - f. **[Square D; Schneider Electric USA]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by **[UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction]** in accordance with one or more of the following guide information and corresponding standards:
 - a. Motor Controllers, Mechanically Operated and Solid-State: UL CCN NMFT, including UL 508, UL 60947-1, and UL 60947-4-1.
5. Standard Features: Factory-assembled, combination, full-voltage electromagnetic motor controller with a disconnecting means, SCPD and OCPD, in a single enclosure. Connected as a

bypass controller, operating manually, with NORMAL/BYPASS selector switch.

- a. Referenced Standards: NEMA ICS 2, general purpose, Class A.
- b. Configuration: Across-the-line start, electrically held.
- c. Contactor Coils: Pressure-encapsulated type[**with coil transient suppressors when indicated**].
 - 1) Operating Voltage: Manufacturer's standard unless otherwise indicated.
- d. Control Power: **[24][120]** V(ac); obtained from integral CPT, with primary and secondary fuses, and with CPT of sufficient capacity to operate integral devices and remotely located pilot, indicating, and control devices.
 - 1) Spare CPT Capacity: As indicated on Drawings, **[50][100][200]<Insert number>** VA.
- e. Overload Relays:
 - 1) Thermal-Overload Relays:
 - a) Inverse-time-current characteristic.
 - b) **[Class 10][Class 20][Class 30]** tripping characteristic.
 - c) Heaters: In each phase; coordinate with nameplate FLA of actual protected motor; include appropriate adjustment for duty cycle.
 - d) Ambient compensated.
 - e) Automatic resetting.
 - 2) Solid-State Overload Relays:
 - a) Switch or dial selectable for motor running overload protection.
 - b) Sensors in each phase.
 - c) **[Class 10][Class 20][Class 30][Class 10/20 selectable]** tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
- f. Class II Ground-Fault Protection: Comply with UL 1053 to interrupt low-level ground faults. The ground-fault detection system includes circuitry that will prevent the motor controller from tripping when the fault current exceeds the interrupting capacity of the controller. Equip with start and run delays to prevent nuisance trip on starting, and a trip indicator.
- g. Digital Communication Module: **[TIA-485 Modbus, RTU protocol, 2-wire connection to host devices with a compatible port][TIA-485 Modbus, RTU protocol, 4-wire connection to host devices with a compatible port]<Insert protocol>** to transmit the following to the LAN:
 - 1) Instantaneous RMS current each phase, and three-phase average.
 - 2) RMS Voltage: L-L for each phase, L-L three-phase average, L-N each phase, and L-N three-phase average.
 - 3) Active Energy (kilowatt-hour): Three-phase total.
 - 4) Power Factor: **[Each phase and]** three-phase total.
 - 5) **<Insert value>**.
- h. Fusible Disconnecting Means:
 - 1) NEMA KS 1, heavy-duty, horsepower-rated, fusible switch with clips or bolt pads to accommodate indicated fuses.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.

- i. Nonfusible Disconnecting Means:
 - 1) NEMA KS 1, heavy-duty, horsepower-rated, nonfusible switch.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- j. MCP Disconnecting Means:
 - 1) UL 489 and NEMA AB 3 (with interrupting capacity to comply with available fault currents) instantaneous-only circuit breaker with front-mounted, field-adjustable, short-circuit trip coordinated with motor locked-rotor amperes.
 - 2) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.
- k. MCCB Disconnecting Means:
 - 1) UL 489 and NEMA AB 3, with interrupting capacity to comply with available fault currents; thermal-magnetic MCCB, with inverse time-current element for low-level overloads and instantaneous magnetic trip element for short circuits.
 - 2) Front-mounted, adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
 - 3) Lockable Handle: Accepts three padlocks and interlocks with cover in closed position.

2.3 ACCESSORIES

- A. General Requirements for Control Circuit and Pilot Devices: NEMA ICS 5; factory installed in controller enclosure cover unless otherwise indicated.
 - 1. Push-Buttons, Pilot Lights, and Selector Switches: Standard duty, except as needed to match enclosure type. Heavy duty or oiltight where indicated in the controller schedule.
 - a. Push-Buttons: As indicated in the controller schedule.
 - b. Pilot Lights: As indicated in the controller schedule.
 - 2. Elapsed Time Meters: Heavy duty with digital readout in hours[; **nonresettable**][; **resettable**].
 - 3. Meters: Panel type, 2-1/2 inch (64 mm) minimum size with 90- or 120-degree scale and plus or minus 2 percent accuracy. Where indicated, provide selector switches with an off position.
- B. Breather Assemblies: Maintain interior pressure and release condensation in **[Type 4][Type 4X][Type 7][Type 9]<Insert type>** enclosures installed outdoors or in unconditioned interior spaces subject to humidity and temperature swings.
- C. Space Heaters: Provide N.C. auxiliary contacts, to mitigate condensation in **[Type 3R][Type 4X][Type 12]<Insert type>** enclosures installed outdoors or in unconditioned interior spaces subject to humidity and temperature swings.
- D. Sun Shields: Install on fronts, sides, and tops of enclosures that are installed outdoors and subject to direct and extended sun exposure.
- E. **<Insert accessories>**.

**2.4 MAINTENANCE MATERIAL ITEMS**

- A. Spare Parts: Furnish to Owner spare parts, for repairing motor controllers, that are packaged with protective covering for storage on-site and identified with labels describing contents. [**Include the following:**]
1. Fuses for Fused Switches: Equal to [10]<Insert number> percent of quantity installed for each size and type, but no fewer than [three]<Insert number> of each size and type.
 2. Control Power Fuses: Equal to [10]<Insert number> percent of quantity installed for each size and type, but no fewer than [two]<Insert number> of each size and type.
 3. Indicating Lights: [Two]<Insert number> of each type and color installed.
 4. Auxiliary Contacts: Furnish [one]<Insert number> spare(s) for each size and type of magnetic controller installed.
 5. Power Contacts: Furnish [three]<Insert number> spares for each size and type of magnetic contactor installed.
 6. <Insert extra materials>.

PART 3 - EXECUTION**3.1 EXAMINATION**

- A. Examine areas and space conditions for compliance with requirements for motor controllers, their relationship with the motors, and other conditions affecting performance of the Work.

3.2 INSTALLATION OF SOFT-START MOTOR CONTROLLERS

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 2. Electrical Maintenance: NFPA 70B and NECA NEIS 91.
 3. Electrical Safety: NFPA 70E.
 4. Commissioning of Electrical Systems: NECA NEIS 90.
 5. Hot Work: NFPA 51B.
 6. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 7. Work in Confined Spaces: NFPA 350.
 8. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 9. Evaluation of Unlabeled Electrical Equipment: NFPA 791.
 10. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
1. Wall-Mounted Controllers: Install controllers on walls with tops at uniform height indicated, and by bolting units to wall or mounting on slotted support systems and bolted to wall.
 2. Freestanding Controllers: Provide slotted support systems.
 3. Floor-Mounted Controllers: Install controllers on cast-in-place concrete equipment base(s).
 4. Provide seismic control devices.
 5. Control Wiring: Separate control wiring from power wiring. Where unavoidable, use twisted pair cabling or shielded cables for control wiring.
 6. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Install lacing bars and

distribution spools.

7. Setting of Overload Relays: Select and set overloads on the basis of FLA rating as shown on motor nameplate. Adjust setting value for special motors as required by NFPA 70 for high-torque, high-efficiency, and similar motors.

D. Interfaces with Other Work:

1. Identification: Provide labels for motor controllers and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Label each enclosure and each compartment with **[baked enamel signs][metal backed butyrate signs][laminated acrylic or melamine plastic signs]**, mounted with corrosion-resistant screws
 - c. Provide warning signs for electrical equipment.
2. Arc-Flash Warning Labels:
 - a. Provide self-adhesive equipment label for each work location **[included in the arc-flash hazard analysis]**.
 - b. Labels must be machine printed, with no field-applied markings.
 - c. Labels must have orange header with wording, "WARNING, ARC-FLASH HAZARD," and must include the following information taken directly from the arc-flash hazard analysis:
 - 1) Location designation.
 - 2) Nominal voltage.
 - 3) Flash protection boundary.
 - 4) Hazard risk category.
 - 5) Incident energy.
 - 6) Working distance.
 - 7) Engineering report number, revision number, and issue date.

3.3 FIELD QUALITY CONTROL OF SOFT-START MOTOR CONTROLLERS

A. Administrant for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections **[with assistance of factory-authorized service representative]**.

B. Acceptance Testing Preparation:

1. **<Insert requirements>**.

C. Tests and Inspections:

1. Comply with NFPA 70B.
2. Visual and Mechanical Inspection:
 - a. Compare equipment nameplate data with Drawings and the Specifications.

- b. Inspect physical and mechanical condition.
 - c. Inspect anchorage, alignment, and grounding.
 - d. Verify that the unit is clean.
 - e. Ensure that vent path openings are free from debris and that heat-transfer surfaces are clean.
 - f. Verify correct connections of circuit boards, wiring, disconnects, and ribbon cables.
 - g. Inspect Contactors:
 - 1) Verify mechanical operation.
 - 2) Verify that contact gap, wipe, alignment, and pressure are in accordance with manufacturer's published data.
 - h. Motor-Running Protection:
 - 1) Verify that motor FLA is at, or under, the controller current rating.
 - 2) Verify that overload element setting is correct for its application.
 - 3) Apply minimum- and maximum-speed set points. Verify that set points are within limitations of the load coupled to the motor.
 - 4) If motor-running protection is provided by fuses, verify correct fuse rating.
 - i. Inspect bolted electrical connections for high resistance using one of the following two methods:
 - 1) Use a low-resistance ohmmeter. Compare bolted-connection-resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or NETA ATS, Table 100.12.
 - j. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
3. Electrical Tests:
- a. **[For the contactor and circuit breaker, perform][Perform]** insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with switch closed, and across each open pole.
 - 1) Insulation Resistance: In accordance with manufacturer's published instructions or NETA ATS, Table 100.1. In the absence of manufacturer's published instructions, use Table 100.5.
 - 2) Investigate and correct insulation resistance values less than those of this table or manufacturer's published instructions.
 - b. Measure fuse resistance. Investigate fuse-resistance values that deviate from each other by more than 15 percent.
 - c. Test motor protection devices according to manufacturer's published instructions.
 - d. Test circuit breakers as follows:
 - 1) Operate the circuit breaker to ensure smooth operation.
 - 2) For adjustable circuit breakers, adjust protective device settings in accordance with the coordination study. Comply with coordination study recommendations.
 - e. Test the electronic motor overload relay elements by injecting primary current through the overload circuit and monitoring trip time of the overload element.

- f. Test the following parameters in accordance with NETA relay calibration procedures, or as recommended by manufacturer:
 - 1) ANSI No. 49R, Overtemperature Protection:
 - a) Determine time delay at 300 percent of setting.
 - b) Determine a second point on the operating curve.
 - c) Determine pickup.
 - 2) ANSI No. 47, Input Phase Loss and Reversed Phases Protection:
 - a) Determine positive sequence voltage to close the N.O. contact.
 - b) Determine positive sequence voltage to open the N.C. contact (undervoltage trip).
 - c) Verify negative sequence trip.
 - d) Determine time delay to close the N.O. contact with sudden application of 120 percent of pickup.
 - e) Determine time delay to close the N.C. contact on removal of voltage when previously set to rated system voltage.
 - 3) ANSI No. 81, Overfrequency Protection:
 - a) Verify frequency set points.
 - b) Determine time delay.
 - c) Determine undervoltage cutoff.
 - 4) Fault Alarm Outputs: Verify that each relay contact performs its intended function in the control scheme including breaker trip tests, close inhibit tests, lockout tests, and alarm functions.
- g. Perform operational tests by initiating control devices.

D. Nonconforming Work:

- 1. Motor controllers will be considered defective if they do not pass tests and inspections.
- 2. Remove and replace defective units and retest.

E. Field Quality Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

- 1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.4 SYSTEM STARTUP

A. Perform startup service in accordance with manufacturer's published instructions.

B. System Startup Testing: Verify the correct interaction of sensing, processing, and action devices. Perform system startup testing after field quality-control tests have been completed and all components have passed specified tests.

1. Develop test parameters and perform tests for the purpose of evaluating performance of integral components and their functioning as a complete unit within design requirements and manufacturer's published data.
 2. Verify the correct operation of interlock safety devices for fail-safe functions in addition to design function.
 3. Verify the correct operation of sensing devices, alarms, and indicating devices.
- C. Motor controllers will be considered defective if they do not pass system startup testing.
- D. System Startup Testing Report: Compile, prepare, and submit test and inspection reports.
- E. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.
1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.5 CLOSEOUT ACTIVITIES

- A. Training:
1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain equipment specified in Section 262913.03 "Manual and Magnetic Motor Controllers."
 2. **[Provide video recordings of training sessions to Owner][Allow Owner to record training sessions].**

3.6 MAINTENANCE

- A. Infrared Scanning of Motor Controllers: Perform infrared scanning during periods of maximum possible loading. Comply with NFPA 70B requirements. Remove covers so joints and connections are accessible to portable scanner. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison.
1. Equipment: Inspect distribution systems with imaging equipment capable of detecting a minimum temperature difference of 1 deg C at 30 deg C. The equipment detects emitted radiation and convert detected radiation to a visual signal.
 2. Act on inspection results and recommended action, and considering the recommendations of NETA ATS, Table 100.18. Correct possible and probable deficiencies as soon as Owner's operations permit. Retest until deficiencies are corrected.
 3. Initial Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform infrared inspection of the electrical power connections of each motor controller.
 4. Follow-On Infrared Scanning: Perform follow-up infrared scans of motor controller at 11 months after Substantial Completion.
 5. Field Reports for Infrared Scanning: Prepare a certified report including the following information:
 - a. Identities of personnel performing infrared scanning.
 - b. Description of test equipment used and record of their calibration.
 - c. Description of motor controllers and associated equipment tested.

- d. Deficiencies found, remedial actions taken, and observations found when scans were repeated after the remedial actions.
- e. Temperature difference between the area of concern and the reference area.
- f. Probable cause of temperature difference.
- g. Areas inspected. Identify inaccessible and unobservable areas and equipment.
- h. Load conditions at time of inspection.
- i. Photographs and thermograms of the deficient area.
- j. Recommended action.

END OF SECTION 26 29 13 00A

Task	Specification	Specification Description
26 29 13 13	26 29 13 00	Manual and Magnetic Motor Controllers
26 29 13 13	26 29 13 00a	Soft-Start Motor Controllers

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 29 23 00 - VARIABLE-FREQUENCY MOTOR CONTROLLERS

PART 1 - GENERAL

1.1 SUMMARY

- A. Section includes separately enclosed, preassembled, combination VFCs, rated 600 V and less, for speed control of three-phase, squirrel-cage induction motors.
- B. Related Requirements:
 - 1. Section 262419 "Motor-Control Centers" for VFCs installed in motor-control centers.

1.2 DEFINITIONS

- A. CE: Conformance Europeene (European Compliance).
- B. CPT: Control power transformer.
- C. DDC: Direct digital control.
- D. EMI: Electromagnetic interference.
- E. LED: Light-emitting diode.
- F. NC: Normally closed.
- G. NO: Normally open.
- H. OCPD: Overcurrent protective device.
- I. PID: Control action, proportional plus integral plus derivative.
- J. RFI: Radio-frequency interference.
- K. VFC: Variable-frequency motor controller.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type and rating of VFC indicated.
 - 1. Include dimensions and finishes for VFCs.
 - 2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
- B. Shop Drawings: For each VFC indicated.
 - 1. Include mounting and attachment details.
 - 2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field

connection.

3. Include diagrams for power, signal, and control wiring.

1.4 INFORMATIONAL SUBMITTALS

- A. Coordination Drawings: Floor plans, drawn to scale, showing dimensioned layout on which the following items are shown and coordinated with each other, using input from installers of the items involved:
 1. Required working clearances and required area above and around VFCs.
 2. Show VFC layout and relationships between electrical components and adjacent structural and mechanical elements.
 3. Show support locations, type of support, and weight on each support.
 4. Indicate field measurements.
- B. Qualification Data: For testing agency.
- C. Seismic Qualification Data: Certificates, for each VFC, accessories, and components, from manufacturer.
 1. Certificate of compliance.
 2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
 3. Detailed description of equipment anchorage devices on which the certification is based, and their installation requirements.
- D. Product Certificates: For each VFC from manufacturer.
- E. Harmonic Analysis Report: Provide Project-specific calculations and manufacturer's statement of compliance with IEEE 519.
- F. Source quality-control reports.
- G. Field quality-control reports.
- H. Sample Warranty: For special warranty.

1.5 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For VFCs to include in emergency, operation, and maintenance manuals.
 1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:
 - a. Manufacturer's written instructions for testing and adjusting thermal-magnetic circuit breaker and motor-circuit protector trip settings.
 - b. Manufacturer's written instructions for setting field-adjustable overload relays.
 - c. Manufacturer's written instructions for testing, adjusting, and reprogramming microprocessor control modules.
 - d. Manufacturer's written instructions for setting field-adjustable timers, controls, and status and alarm points.
 - e. Load-Current and Overload-Relay Heater List: Compile after motors have been installed,

- and arrange to demonstrate that selection of heaters suits actual motor nameplate, full-load currents.
- f. Load-Current and List of Settings of Adjustable Overload Relays: Compile after motors have been installed, and arrange to demonstrate that switch settings for motor-running overload protection suit actual motors to be protected.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
1. Power Fuses: Equal to **[10]<Insert number>** percent of quantity installed for each size and type, but no fewer than **[three]<Insert number>** of each size and type.
 2. Control Power Fuses: Equal to **[10]<Insert number>** percent of quantity installed for each size and type, but no fewer than **[two]<Insert number>** of each size and type.
 3. Indicating Lights: **[Two]<Insert number>** of each type and color installed.
 4. Auxiliary Contacts: Furnish **[one]<Insert number>** spare(s) for each size and type of magnetic controller installed.
 5. Power Contacts: Furnish **[three]<Insert number>** spares for each size and type of magnetic contactor installed.
 6. **<Insert extra materials>**.

1.7 QUALITY ASSURANCE

- A. Testing Agency Qualifications: Accredited by NETA.
1. Testing Agency's Field Supervisor: Currently certified by NETA to supervise on-site testing.

1.8 DELIVERY, STORAGE, AND HANDLING

- A. If stored in space that is not permanently enclosed and air conditioned, remove loose packing and flammable materials from inside controllers and **[install temporary electric heating, with at least 250 W per controller][connect factory-installed space heaters to temporary electrical service]**.
- B. Product Selection for Restricted Space: Drawings indicate maximum dimensions for VFCs, including clearances between VFCs, and adjacent surfaces and other items.

1.9 WARRANTY

- A. Special Warranty: Manufacturer agrees to repair or replace VFCs that fail in materials or workmanship within specified warranty period.
1. Warranty Period: **[Five]<Insert number>** years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 VARIABLE-FREQUENCY MOTOR CONTROLLERS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide**

products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [ABB, Electrification Business]
2. [ABB, Motion Business]
3. [Cerus Industrial, Inc.]
4. [Danfoss, Inc.]
5. [Eaton]
6. [Nidec Motor Corporation; Nidec Corporation]
7. [Rockwell Automation, Inc.]
8. [Schneider Electric USA, Inc.]
9. [Siemens Industry, Inc., Building Technologies Division]
10. [Yaskawa Electric America, Inc.]
11. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [ABB, Electrification Business]
2. [ABB, Motion Business]
3. [Cerus Industrial, Inc.]
4. [Danfoss, Inc.]
5. [Eaton]
6. [Nidec Motor Corporation; Nidec Corporation]
7. [Rockwell Automation, Inc.]
8. [Schneider Electric USA, Inc.]
9. [Siemens Industry, Inc., Building Technologies Division]
10. [Yaskawa Electric America, Inc.]
11. <Insert manufacturer's name>

2.2 SYSTEM DESCRIPTION

A. General Requirements for VFCs:

1. VFCs and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
2. Comply with NEMA ICS 7, NEMA ICS 61800-2, and [UL 508A][UL 508C]<Insert standard>.

B. Application: [Constant torque][and][variable torque]<Insert application>.

C. VFC Description: Variable-frequency motor controller, consisting of power converter that employs pulse-width-modulated inverter, factory built and tested in an enclosure, with integral disconnecting means and overcurrent and overload protection; listed and labeled by an NRTL as a complete unit; arranged to provide self-protection, protection, and variable-speed control of one or more three-phase induction motors by adjusting output voltage and frequency.

1. Units suitable for operation of NEMA MG 1, Design A and Design B motors, as defined by NEMA MG 1, Section IV, Part 30, "Application Considerations for Constant Speed Motors Used on a Sinusoidal Bus with Harmonic Content and General Purpose Motors Used with Adjustable-Voltage or Adjustable-Frequency Controls or Both."
2. Units suitable for operation of inverter-duty motors as defined by NEMA MG 1, Section IV, Part 31, "Definite-Purpose Inverter-Fed Polyphase Motors."
3. Listed and labeled for integrated short-circuit current (withstand) rating by an NRTL acceptable to authorities having jurisdiction.

- D. Design and Rating: Match load type, such as fans, blowers, and pumps; and type of connection used between motor and load such as direct or through a power-transmission connection.
- E. Output Rating: Three phase; 10 to **[60 Hz, with voltage proportional to frequency throughout voltage range][66 Hz, with torque constant as speed changes]**; maximum voltage equals input voltage.
- F. Unit Operating Requirements:
1. Input AC Voltage Tolerance: Plus 10 and minus **[10][15]** percent of VFC input voltage rating.
 2. Input AC Voltage Unbalance: Not exceeding **[3][5]** percent.
 3. Input Frequency Tolerance: Plus or minus 3 percent of VFC frequency rating.
 4. Minimum Efficiency: **[96][97]<Insert number>** percent at 60 Hz, full load.
 5. Minimum Displacement Primary-Side Power Factor: **[96][98]<Insert number>** percent under any load or speed condition.
 6. Minimum Short-Circuit Current (Withstand) Rating: **[10][22][65][100]<Insert value>** kA.
 7. Ambient Temperature Rating: Not less than **32 deg F (0 deg C)** and not exceeding **104 deg F (40 deg C)**.
 8. Humidity Rating: Less than 95 percent (noncondensing).
 9. Altitude Rating: Not exceeding **3300 feet (1000 m)**.
 10. Vibration Withstand: Comply with NEMA ICS 61800-2.
 11. Overload Capability: **[1.1][1.5]** times the base load current for 60 seconds; minimum of 1.8 times the base load current for three seconds.
 12. Starting Torque: Minimum 100 percent of rated torque from 3 to 60 Hz.
 13. Speed Regulation: Plus or minus **[5][10]** percent.
 14. Output Carrier Frequency: Selectable; 0.5 to **[15]<insert number>** kHz.
 15. Stop Modes: Programmable; includes fast, free-wheel, and dc injection braking.
- G. Inverter Logic: Microprocessor based, **[16][32]** bit, isolated from all power circuits.
- H. Isolated Control Interface: Allows VFCs to follow remote-control signal over a minimum 40:1 speed range.
1. Signal: **[Electrical][Pneumatic]**.
- I. Internal Adjustability Capabilities:
1. Minimum Speed: 5 to 25 percent of maximum rpm.
 2. Maximum Speed: 80 to 100 percent of maximum rpm.
 3. Acceleration: **[0.1 to 999.9]<Insert range>** seconds.
 4. Deceleration: **[0.1 to 999.9]<Insert range>** seconds.
 5. Current Limit: 30 to minimum of 150 percent of maximum rating.
 6. **<Insert adjustment and parameters>**.
- J. Self-Protection and Reliability Features:
1. Surge Suppression: **[Factory installed as an integral part of the VFC, complying with UL 1449 SPD, Type 1 or Type 2][Field-mounted surge suppressors complying with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits," UL 1449 SPD, Type 2]**.
 2. Loss of Input Signal Protection: Selectable response strategy, including speed default to a percent of the most recent speed, a preset speed, or stop; with alarm.
 3. Under- and overvoltage trips.
 4. Inverter overcurrent trips.
 5. VFC and Motor-Overload/Overtemperature Protection: Microprocessor-based thermal protection system for monitoring VFCs and motor thermal characteristics, and for providing VFC

- overtemperature and motor-overload alarm and trip; settings selectable via the keypad.
- 6. Critical frequency rejection, with **[three]<Insert number>** selectable, adjustable deadbands.
- 7. Instantaneous line-to-line and line-to-ground overcurrent trips.
- 8. Loss-of-phase protection.
- 9. Reverse-phase protection.
- 10. Short-circuit protection.
- 11. Motor-temperature fault.
- 12. **<Insert protection or reliability feature>**.

- K. Automatic Reset/Restart: Attempt three restarts after drive fault or on return of power after an interruption and before shutting down for manual reset or fault correction; adjustable delay time between restart attempts.
- L. Power-Interruption Protection: To prevent motor from re-energizing after a power interruption until motor has stopped, unless "Bidirectional Autospeed Search" feature is available and engaged.
- M. Bidirectional Autospeed Search: Capable of starting VFC into rotating loads spinning in either direction and returning motor to set speed in proper direction, without causing damage to drive, motor, or load.
- N. Torque Boost: Automatically varies starting and continuous torque to at least 1.5 times the minimum torque to ensure high-starting torque and increased torque at slow speeds.
- O. Motor Temperature Compensation at Slow Speeds: Adjustable current fall-back based on output frequency for temperature protection of self-cooled, fan-ventilated motors at slow speeds.
- P. Integral Input Disconnecting Means and OCPD: **[UL 489, instantaneous-trip circuit breaker][UL 489, molded-case switch, with power fuse block and current-limiting fuses][UL 489, thermal-magnetic circuit breaker][NEMA KS 1, nonfusible switch, with power fuse block and current-limiting fuses][NEMA KS 1, fusible switch]** with pad-lockable, door-mounted handle mechanism.
 - 1. Disconnect Rating: **[Not less than 115 percent of VFC input current rating][Not less than 115 percent of NFPA 70 motor full-load current rating or VFC input current rating, whichever is larger]**.
 - 2. Auxiliary Contacts: NO or NC, arranged to activate before switch blades open.
 - 3. Auxiliary contacts "a" and "b" arranged to activate with circuit-breaker handle.
 - 4. **[NC][NO]** alarm contact that operates only when circuit breaker has tripped.

2.3 PERFORMANCE REQUIREMENTS

- A. Seismic Performance: VFCs shall withstand the effects of earthquake motions determined according to ASCE/SEI 7. The designated VFCs shall be tested and certified by an NRTL as meeting the ICC-ES AC 156 test procedure requirements.
 - 1. The term "withstand" means "the unit will remain in place without separation of any parts when subjected to the seismic forces specified **[and the unit will be fully operational after the seismic event].**"

2.4 CONTROLS AND INDICATION

- A. Status Lights: Door-mounted LED indicators displaying the following conditions:
 - 1. Power on.
 - 2. Run.

3. Overvoltage.
 4. Line fault.
 5. Overcurrent.
 6. External fault.
 7. **<Insert condition>**.
- B. Panel-Mounted Operator Station: Manufacturer's standard front-accessible, sealed keypad and plain-English-language digital display; allows complete programming, program copying, operating, monitoring, and diagnostic capability.
1. Keypad: In addition to required programming and control keys, include keys for HAND, OFF, and AUTO modes.
 2. Security Access: Provide electronic security access to controls through identification and password with at least three levels of access: View only; view and operate; and view, operate, and service.
 - a. Control Authority: Supports at least four conditions: Off, local manual control at VFC, local automatic control at VFC, and automatic control through a remote source.
- C. Historical Logging Information and Displays:
1. Real-time clock with current time and date.
 2. Running log of total power versus time.
 3. Total run time.
 4. Fault log, maintaining last **[four]<Insert number>** faults with time and date stamp for each.
 5. **<Insert information or display>**.
- D. Indicating Devices: Digital display[**and additional readout devices as required,**] mounted flush in VFC door and connected to display VFC parameters including, but not limited to:
1. Output frequency (Hz).
 2. Motor speed (rpm).
 3. Motor status (running, stop, fault).
 4. Motor current (amperes).
 5. Motor torque (percent).
 6. Fault or alarming status (code).
 7. PID feedback signal (percent).
 8. DC-link voltage (V dc).
 9. Set point frequency (Hz).
 10. Motor output voltage (V ac).
 11. **<Insert parameter>**.
- E. Control Signal Interfaces:
1. Electric Input Signal Interface:
 - a. A minimum of **[two]<Insert number>** programmable analog inputs: **[0- to 10-V dc][4- to 20-mA dc][Operator-selectable "x"- to "y"-mA dc]<Insert signal parameters>**.
 - b. A minimum of **[six]<Insert number>** multifunction programmable digital inputs.
 2. Pneumatic Input Signal Interface: **3 to 15 psig (20 to 104 kPa)**.
 3. Remote Signal Inputs: Capability to accept any of the following speed-setting input signals from the DDC system for HVAC or other control systems:
 - a. 0- to 10-V dc.
 - b. 4- to 20-mA dc.

- c. Potentiometer using up/down digital inputs.
 - d. Fixed frequencies using digital inputs.
 - e. **<Insert signal input>**.
4. Output Signal Interface: A minimum of **[one]<Insert number>** programmable analog output signal(s) (**[0- to 10-V dc][4- to 20-mA dc][operator-selectable "x"- to "y"-mA dc]<Insert signal parameters>**), which can be configured for any of the following:
- a. Output frequency (Hz).
 - b. Output current (load).
 - c. DC-link voltage (V dc).
 - d. Motor torque (percent).
 - e. Motor speed (rpm).
 - f. Set point frequency (Hz).
 - g. **<Insert indication>**.
5. Remote Indication Interface: A minimum of **[two]<Insert number>** programmable dry-circuit relay outputs (120-V ac, 1 A) for remote indication of the following:
- a. Motor running.
 - b. Set point speed reached.
 - c. Fault and warning indication (overtemperature or overcurrent).
 - d. PID high- or low-speed limits reached.
 - e. **<Insert indication>**.
- F. PID Control Interface: Provides closed-loop set point, differential feedback control in response to dual feedback signals. Allows for closed-loop control of fans and pumps for pressure, flow, or temperature regulation.
1. Number of Loops: **[One][Two]<Insert number>**.
- G. Interface with DDC System for HVAC: Factory-installed hardware and software shall interface with DDC system for HVAC to monitor, control, display, and record data for use in processing reports. VFC settings shall be retained within VFC's nonvolatile memory.
1. Hardwired Points:
- a. Monitoring: On-off status, **<Insert monitoring point>**.
 - b. Control: On-off operation, **<Insert control point>**.
2. Communication Interface: Comply with **[ASHRAE 135]<Insert type of interface>**. Communication shall interface with DDC system for HVAC to remotely control and monitor lighting from a DDC system for HVAC operator workstation. Control features and monitoring points displayed locally at lighting panel shall be available through the DDC system for HVAC.

2.5 LINE CONDITIONING AND FILTERING

- A. Input Line Conditioning: Based on the manufacturer's harmonic analysis study and report, provide input filtering, as required, to limit total demand (harmonic current) distortion and total harmonic voltage demand at the defined point of common coupling to meet IEEE 519 recommendations.
- B. Output Filtering: **<Insert requirements>**.
- C. EMI/RFI Filtering:

1. CE marked; certify compliance with IEC 61800-3 for [Category C2]<Insert category>.
2. <Insert requirements>.

2.6 BYPASS SYSTEMS

- A. Bypass Operation: Safely transfers motor between power converter output and bypass circuit, manually, automatically, or both. Selector switches set modes and indicator lights indicate mode selected. Unit is capable of stable operation (starting, stopping, and running) with motor completely disconnected from power converter.
- B. Bypass Mode:
 1. Manual operation only; requires local operator selection at VFC. Transfer between power converter and bypass contactor, and retransfer shall only be allowed with the motor at zero speed.
 2. Field-selectable automatic or manual, allows local and remote transfer between power converter and bypass contactor and retransfer, either via manual operator interface or automatic-control system feedback.
- C. Bypass Controller:
 1. Two-Contactor-Style Bypass: Two-contactor-style bypass allows motor operation via the power converter or the bypass controller; **with input isolating switch and barrier arranged to isolate the power converter and permit safe troubleshooting and testing, both energized and de-energized, while motor is operating in bypass mode**.
 - a. Bypass Contactor: Load-break, [IEC][NEMA]-rated contactor.
 - b. Output Isolating Contactor: Non-load-break, [IEC][NEMA]-rated contactor.
 - c. Isolating Switch: Non-load-break switch arranged to isolate power converter and permit safe troubleshooting and testing of the power converter, both energized and de-energized, while motor is operating in bypass mode; pad-lockable, door-mounted handle mechanism.
 2. Three-Contactor-Style Bypass: Three-contactor-style bypass allows motor operation via the power converter or the bypass controller; **with input isolating switch and barrier** arranged to isolate the power converter input and output and permit safe testing **and troubleshooting** of the power converter, both energized and de-energized, while motor is operating in bypass mode.
 - a. Bypass Contactor: Load-break, [IEC][NEMA]-rated contactor.
 - b. Input and Output Isolating Contactors: Non-load-break, [IEC][NEMA]-rated contactors.
 - c. Isolating Switch: Non-load-break switch arranged to isolate power converter and permit safe troubleshooting and testing of the power converter, both energized and de-energized, while motor is operating in bypass mode; pad-lockable, door-mounted handle mechanism.
- D. Bypass Contactor Configuration: **[Full-voltage (across-the-line)][Reduced-voltage (autotransformer)]<Insert type>** type.
 1. NORMAL/BYPASS selector switch.
 2. HAND/OFF/AUTO selector switch.
 3. NORMAL/TEST Selector Switch: Allows testing and adjusting of VFC while the motor is running in the bypass mode.
 4. Contactor Coils: Pressure-encapsulated type **[with coil transient suppressors]**.
 - a. Operating Voltage: Depending on contactor NEMA size and line-voltage rating, manufacturer's standard matching control power or line voltage.
 - b. Power Contacts: Totally enclosed, double break, and silver-cadmium oxide; assembled to

allow inspection and replacement without disturbing line or load wiring.

5. Control Circuits: [120]<Insert number>-V ac; obtained from [integral CPT, with primary and secondary fuses]<Insert source of control power>, with [CPT][control power source] of sufficient capacity to operate all integral devices and remotely located pilot, indicating, and control devices.
 - a. CPT Spare Capacity: [50][100][200]<Insert number> VA.
6. Overload Relays: NEMA ICS 2.
 - a. Melting-Alloy Overload Relays:
 - 1) Inverse-time-current characteristic.
 - 2) [Class 10][Class 20][Class 30] tripping characteristic.
 - 3) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - b. Bimetallic Overload Relays:
 - 1) Inverse-time-current characteristic.
 - 2) [Class 10][Class 20][Class 30] tripping characteristic.
 - 3) Heaters in each phase matched to nameplate full-load current of actual protected motor and with appropriate adjustment for duty cycle.
 - 4) Ambient compensated.
 - 5) Automatic resetting.
 - c. Solid-State Overload Relays:
 - 1) Switch or dial selectable for motor-running overload protection.
 - 2) Sensors in each phase.
 - 3) [Class 10][Class 20][Class 10/20 selectable] tripping characteristic selected to protect motor against voltage and current unbalance and single phasing.
 - 4) Class II ground-fault protection, with start and run delays to prevent nuisance trip on starting.
 - 5) Analog communication module.
 - d. [NC][NO] isolated overload alarm contact.
 - e. External overload, reset push button.

2.7 OPTIONAL FEATURES

- A. Multiple-Motor Capability: VFC suitable for variable-speed service to multiple motors. Overload protection shuts down VFC and motors served by it, and generates fault indications when overload protection activates.
 1. Configure to allow two or more motors to operate simultaneously at the same speed; separate overload relay for each controlled motor.
 2. Configure to allow two motors to operate separately; operator selectable via local or remote switch or contact closures; single overload relay for both motors; separate output magnetic contactors for each motor.
 3. Configure to allow two motors to operate simultaneously and in a lead/lag mode, with one motor operated at variable speed via the power converter and the other at constant speed via the bypass controller; separate overload relay for each controlled motor.

- B. Damper control circuit with end-of-travel feedback capability.
- C. Sleep Function: Senses a minimal deviation of a feedback signal and stops the motor. On an increase in speed-command signal deviation, VFC resumes normal operation.
- D. Motor Preheat Function: Preheats motor when idle to prevent moisture accumulation in the motor.
- E. Firefighter's Override (Smoke Purge) Input: On a remote contact closure from **[the firefighter's control station][smoke-control fan controller]<Insert location>**, this password-protected input:
 - 1. Overrides all other local and external inputs (analog/digital, serial communication, and all keypad commands).
 - 2. Forces VFC to operate motor, without any other run or speed command, at a field-adjustable, preset speed.
 - 3. Forces VFC to transfer to bypass mode and operate motor at full speed.
 - 4. Causes display of override mode on the VFC display.
 - 5. Reset VFC to normal operation on removal of override signal **[automatically][manually]**.
- F. Remote Indicating Circuit Terminals: Mode selection, controller status, and controller fault.
- G. Remote digital operator kit.
- H. Communication Port: RS-232 port, USB 2.0 port, or equivalent connection capable of connecting a printer **[and a notebook computer]**.
- I. **<Insert feature>**.

2.8 ENCLOSURES

- A. VFC Enclosures: NEMA 250, to comply with environmental conditions at installed location.
 - 1. Dry and Clean Indoor Locations: **[Type 1]<Insert type>**.
 - 2. Outdoor Locations: **[Type 3R][Type 4X]<Insert type>**.
 - 3. **[Kitchen][Wash-Down]** Areas: **[Type 4X]<Insert type>**, **[stainless steel]<Insert material>**.
 - 4. Other Wet or Damp Indoor Locations: **[Type 4]<Insert type>**.
 - 5. Indoor Locations Subject to Dust, Falling Dirt, and Dripping Noncorrosive Liquids: Type 12.
 - 6. **<Insert enclosure requirements>**.
- B. Plenum Rating: UL 1995; NRTL certification label on enclosure, clearly identifying VFC as "Plenum Rated."

2.9 ACCESSORIES

- A. General Requirements for Control-Circuit and Pilot Devices: NEMA ICS 5; factory installed in VFC enclosure cover unless otherwise indicated.
 - 1. Push Buttons: **[Covered][Lockable][Shielded][Unguarded]**.
 - 2. Pilot Lights: Push to test.
 - 3. Selector Switches: **[Rotary]<Insert description>** type.
 - 4. Stop and Lockout Push-Button Station: Momentary-break, push-button station with a factory-applied hasp arranged so padlock can be used to lock push button in depressed position with control circuit open.

- B. [NC][NO][Reversible NC/NO] bypass contactor auxiliary contact(s).
- C. Control Relays: Auxiliary and adjustable [pneumatic][solid-state] time-delay relays.
- D. Phase-Failure, Phase-Reversal, and Undervoltage and Overvoltage Relays: Solid-state sensing circuit with isolated output contacts for hard-wired connections. Provide adjustable undervoltage, overvoltage, and time-delay settings.
 - 1. Current Transformers: Continuous current rating, basic impulse insulating level (BIL) rating, burden, and accuracy class suitable for connected circuitry. Comply with IEEE C57.13.
- E. Supplemental Digital Meters:
 - 1. Elapsed-time meter.
 - 2. Kilowatt meter.
 - 3. Kilowatt-hour meter.
- F. Breather and drain assemblies, to maintain interior pressure and release condensation in NEMA 250, [Type 4][Type 4X][Type 12]<Insert type> enclosures installed outdoors or in unconditioned interior spaces subject to humidity and temperature swings.
- G. Space heaters, with NC auxiliary contacts, to mitigate condensation in NEMA 250, [Type 3R][Type 4X][Type 12]<Insert type> enclosures installed outdoors or in unconditioned interior spaces subject to humidity and temperature swings.
- H. Cooling Fan and Exhaust System: For NEMA 250, [Type 1][Type 12]<Insert enclosure type>; UL 508 component recognized: Supply fan, with [composite][stainless steel]<Insert material> intake and exhaust grills [and filters]; [120]<Insert number>-V ac; obtained from [integral CPT]<Insert source of control power>.
- I. Sun shields installed on fronts, sides, and tops of enclosures installed outdoors and subject to direct and extended sun exposure.
- J. Spare control-wiring terminal blocks[; unwired][; wired].
- K. <Insert accessory>.

2.10 SOURCE QUALITY CONTROL

- A. Testing: Test and inspect VFCs according to requirements in [NEMA ICS 61800-2]<Insert standard>.
 - 1. Test each VFC while connected to [its specified motor][a motor that is comparable to that for which the VFC is rated].
 - 2. Verification of Performance: Rate VFCs according to operation of functions and features specified.
- B. VFCs will be considered defective if they do not pass tests and inspections.
- C. Prepare test and inspection reports.

PART 3 - EXECUTION**3.1 EXAMINATION**

- A. Examine areas, surfaces, and substrates to receive VFCs, with Installer present, for compliance with requirements for installation tolerances, **<insert Project-specific conditions,>** and other conditions affecting performance of the Work.
- B. Examine VFC before installation. Reject VFCs that are wet, moisture damaged, or mold damaged.
- C. Examine roughing-in for conduit systems to verify actual locations of conduit connections before VFC installation.
- D. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work
- E. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

- A. Wall-Mounting Controllers: Install with tops at uniform height and with disconnect operating handles not higher than **79 inches (2000 mm)** above finished floor, unless otherwise indicated, and by bolting units to wall or mounting on lightweight structural-steel channels bolted to wall. For controllers not on walls, provide freestanding racks complying with Section 260529 "Hangers and Supports for Electrical Systems."
- B. Floor-Mounting Controllers: Install VFCs on **4-inch (100-mm)** nominal thickness concrete base. Comply with requirements for concrete base specified in Section 033000 "Cast-in-Place Concrete."
 - 1. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on **18-inch (450-mm)** centers around the full perimeter of concrete base.
 - 2. For supported equipment, install epoxy-coated anchor bolts that extend through concrete base and anchor into structural concrete floor.
 - 3. Place and secure anchorage devices. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
 - 4. Install anchor bolts to elevations required for proper attachment to supported equipment.
- C. Roof-Mounting Controllers: Install VFC on roofs with tops at uniform height and with disconnect operating handles not higher than **79 inches (2000 mm)** above finished roof surface unless otherwise indicated, and by bolting units to curbs or mounting on freestanding, lightweight, structural-steel channels bolted to curbs. Seal roof penetrations after raceways are installed.
 - 1. Curbs and roof penetrations are specified in Section 077200 "Roof Accessories."
 - 2. Structural-steel channels are specified in Section 260529 "Hangers and Supports for Electrical Systems."
- D. Seismic Bracing: Comply with requirements specified in Section 260548.16 "Seismic Controls for Electrical Systems."
- E. Temporary Lifting Provisions: Remove temporary lifting eyes, channels, and brackets and temporary blocking of moving parts from enclosures and components.
- F. Install fuses in each fusible-switch VFC.

- G. Install fuses in control circuits if not factory installed. Comply with requirements in Section 262813 "Fuses."
- H. Install heaters in thermal-overload relays. Select heaters based on actual nameplate full-load amperes after motors are installed.
- I. Install, connect, and fuse thermal-protector monitoring relays furnished with motor-driven equipment.
- J. Comply with NECA 1.

3.3 CONTROL WIRING INSTALLATION

- A. Install wiring between VFCs and remote devices[**and facility's central-control system**]. Comply with requirements in Section 260523 "Control-Voltage Electrical Power Cables."
- B. Bundle, train, and support wiring in enclosures.
- C. Connect selector switches and other automatic-control devices where applicable.
 - 1. Connect selector switches to bypass only those manual- and automatic-control devices that have no safety functions when switches are in manual-control position.
 - 2. Connect selector switches with control circuit in both manual and automatic positions for safety-type control devices such as low- and high-pressure cutouts, high-temperature cutouts, and motor-overload protectors.

3.4 IDENTIFICATION

- A. Identify VFCs, components, and control wiring. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
 - 1. Identify field-installed conductors, interconnecting wiring, and components; provide warning signs.
 - 2. Label each VFC with engraved nameplate.
 - 3. Label each enclosure-mounted control and pilot device.
- B. Operating Instructions: Frame printed operating instructions for VFCs, including control sequences and emergency procedures. Fabricate frame of finished metal, and cover instructions with clear acrylic plastic. Mount on front of VFC units.

3.5 FIELD QUALITY CONTROL

- A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.
- B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
- C. Perform tests and inspections[**with the assistance of a factory-authorized service representative**].
- D. Acceptance Testing Preparation:
 - 1. Test insulation resistance for each VFC element, bus, component, connecting supply, feeder, and

- control circuit.
2. Test continuity of each circuit.

E. Tests and Inspections:

1. Inspect VFC, wiring, components, connections, and equipment installation. **[Test and adjust controllers, components, and equipment.]**
2. Test insulation resistance for each VFC element, component, connecting motor supply, feeder, and control circuits.
3. Test continuity of each circuit.
4. Verify that voltages at VFC locations are within 10 percent of motor nameplate rated voltages. If outside this range for any motor, notify **[Architect][Construction Manager][Owner]** before starting the motor(s).
5. Test each motor for proper phase rotation.
6. Perform tests according to the Inspection and Test Procedures for Adjustable Speed Drives stated in NETA Acceptance Testing Specification. Certify compliance with test parameters.
7. Correct malfunctioning units on-site, where possible, and retest to demonstrate compliance; otherwise, replace with new units and retest.
8. Perform the following infrared (thermographic) scan tests and inspections, and prepare reports:
 - a. Initial Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform an infrared scan of each VFC. Remove front panels so joints and connections are accessible to portable scanner.
 - b. Follow-up Infrared Scanning: Perform an additional follow-up infrared scan of each VFC 11 months after date of Substantial Completion.
 - c. Instruments and Equipment: Use an infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.
9. Test and adjust controls, remote monitoring, and safeties. Replace damaged and malfunctioning controls and equipment.

F. VFCs will be considered defective if they do not pass tests and inspections.

G. Prepare test and inspection reports, including a certified report that identifies the VFC and describes scanning results. Include notation of deficiencies detected, remedial action taken, and observations made after remedial action.

3.6 STARTUP SERVICE

- A. **[Engage a factory-authorized service representative to perform][Perform]** startup service.
1. Complete installation and startup checks according to manufacturer's written instructions.
 2. **<Insert startup steps if any>.**

3.7 ADJUSTING

- A. Program microprocessors for required operational sequences, status indications, alarms, event recording, and display features. Clear events memory after final acceptance testing and prior to Substantial Completion.
- B. Set field-adjustable switches, auxiliary relays, time-delay relays, timers, and overload-relay pickup and trip ranges.

- C. Adjust the trip settings of instantaneous-only circuit breakers and thermal-magnetic circuit breakers with adjustable, instantaneous trip elements. Initially adjust to 6 times the motor nameplate full-load amperes and attempt to start motors several times, allowing for motor cool-down between starts. If tripping occurs on motor inrush, adjust settings in increments until motors start without tripping. Do not exceed 8 times the motor full-load amperes (or 11 times for NEMA Premium Efficient motors if required). Where these maximum settings do not allow starting of a motor, notify **[Architect][Construction Manager][Owner]** before increasing settings.
- D. Set the taps on reduced-voltage autotransformer controllers.
- E. Set field-adjustable circuit-breaker trip ranges **[as specified in Section 260573.16 "Coordination Studies."]**
- F. Set field-adjustable pressure switches.

3.8 PROTECTION

- A. Temporary Heating: Apply temporary heat to maintain temperature according to manufacturer's written instructions until controllers are ready to be energized and placed into service.
- B. Replace VFCs whose interiors have been exposed to water or other liquids prior to Substantial Completion.

3.9 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, reprogram, and maintain VFCs.

END OF SECTION 26 29 23 00

SECTION 26 29 33 13 - DIESEL-DRIVE, CENTRIFUGAL FIRE PUMPS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Fire pumps - diesel drive, centrifugal.
2. Diesel engine driver.
3. Fire-pump controller - for diesel-drive fire pumps.
4. Fire-pump accessories and specialties.
5. Fire-pump controller remote alarm panel.
6. Fuel oil storage.
7. Grout.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on Project.
2. Section 260010 "Supplemental Requirements for Electrical" specifies requirements applicable to coordinating, scheduling, and sequencing of the electrical Work specified in this Section.

1.2 DEFINITIONS

- A. ECM:** Electronic control module.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for fire pump and fire-pump controller.
2. Include rated capacities, operating characteristics, factory-certified performance test curves, electrical characteristics, and furnished accessories and specialties.

B. Shop Drawings: For packaged fire pump and diesel driver, fire-pump controller, and fire-pump accessories and specialties.

1. Provide fabrication and installation details including plans, elevations, sections, and mounting and attachment details.
2. Provide details of equipment assemblies. Indicate dimensions; shipping, installed, and operating weights; loads; required clearances; method of field assembly; components; electrical characteristics; and location and size of each field connection.
3. Vibration Isolation Base Details: Detail fabrication, including anchorages and attachments to structure and to supported equipment. Include adjustable motor bases, rails, and frames for equipment mounting.
4. Provide wiring diagrams for power, signal, and control wiring.
5. For fire-pump controllers, show the following:

- a. Each installed unit's type and details.
- b. Enclosure types and details for types other than NEMA 250, Type 2.
- c. Factory-installed devices.
- d. Nameplate legends.
- e. Features, characteristics, ratings, and factory settings of individual overcurrent protective devices.
- f. Specified modifications.

C. Delegated Design Submittals: For fire pump and fire-pump controller.

1. Include design calculations for selecting vibration isolators[**and seismic restraints**] and for designing vibration isolation bases.

1.4 INFORMATIONAL SUBMITTALS

A. Seismic Qualification Certificates: For fire pumps, controllers, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

B. Product Certificates: For each type of fire pump and fire-pump controller, from manufacturer.

C. Source quality control reports.

D. Field acceptance testing and inspection reports for fire-pump controllers.

E. Field quality control reports.

F. Certified shop test curves showing head capacity and brake horsepower for each pump.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For fire pumps and fire-pump controllers to include in emergency, operation, and maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials that match fire-pump controllers installed and that are packaged with protective coverings for storage and identified with labels describing contents.

1. Auxiliary Contacts: **[One]<Insert number>** for each size and type of magnetic contactor installed.
2. Power Contacts: **[Three]<Insert number>** for each size and type of magnetic contactor installed.
3. Contactor Coils: **[One]<Insert number>** for each size and type of magnetic controller installed.
4. Relay Boards: **[One]<Insert number>** for each size and type of relay board installed.
5. Operator Interface: **[One]<Insert number>** microprocessor board(s), complete with display and membrane keypad.

6. <Insert extra materials>.

1.7 WARRANTY

- A. Manufacturer Warranty: **[Manufacturer agrees][Installer agrees][Manufacturer and Installer agree]** to repair or replace fire pumps and controllers that fail in materials or workmanship within specified warranty period.
- B. Special Warranty: **[Manufacturer agrees][Installer agrees][Manufacturer and Installer agree]** to repair or replace components of fire pumps and controllers, including **[auxiliary contacts for magnetic contactors][power contacts for magnetic contactors][contactor coils for magnetic contactors][relay boards][operator interface microprocessor boards]**<Insert components> that fail in materials or workmanship within specified warranty period.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Seismic Performance: Fire pumps are to withstand the effects of earthquake motions determined in accordance with **[ASCE/SEI 7]<Insert requirement>[, NFPA 13][, NFPA 14]**, and NFPA 20. See Section 210548 "Vibration and Seismic Controls for Fire-Suppression Piping and Equipment" and Section 018123 "Facility Seismic and Wind Criteria" for building seismic performance criteria.
 - 1. The term "withstand" means "the unit will remain in place without separation of any parts when subjected to the seismic forces specified**[and the unit will be fully operational after the seismic event].**"
 - 2. Component Importance Factor: 1.5.
 - 3. **<Insert requirements for Component Amplification Factor and Component Response Modification Factor>.**
- B. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70 by qualified electrical testing laboratory recognized by authorities having jurisdiction and marked for intended location and application.

2.2 FIRE PUMPS - DIESEL DRIVE, CENTRIFUGAL

- A. Fire Pump - Diesel Drive, End Suction Centrifugal:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[A C Fire Pump; a Xylem brand]**
 - b. **[Armstrong Fluid Technology]**
 - c. **[Patterson Pump Company; a Gorman-Rupp company]**
 - d. **[Pentair Aurora; Pentair Pump Group]**
 - e. **[Reddy-Buffaloes Pump Company]**
 - f. **[Ruhrpumpen, Inc]**
 - g. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[A C Fire Pump; a Xylem brand]**
 - b. **[Armstrong Fluid Technology]**
 - c. **[Patterson Pump Company; a Gorman-Rupp company]**
 - d. **[Pentair Aurora; Pentair Pump Group]**
 - e. **[Reddy-Buffaloes Pump Company]**
 - f. **[Ruhrpumpen, Inc]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations:
 - a. Obtain fire pump and diesel drive from single manufacturer.
 - b. Equipment provider is to provide services of a factory-authorized service representative and have a service facility located within a **60-mile (100-km)** radius of Project site.
4. Description: Factory-fabricated, -assembled, and -tested fire pump and diesel drive.
 - a. Pump Equipment, Accessory, and Specialty Pressure Rating: **[175 psig (1200 kPa)]<Insert minimum pressure>** minimum.
 - b. Finish: Red paint applied to factory-assembled and -tested unit before shipping.
5. Standards:
 - a. Comply with NFPA 20.
 - b. **<Insert standard>**.
6. Base: Fabricated and attached to fire-pump and driver unit, with reinforcement to resist movement of pump during seismic events when base is anchored to building substrate.
7. Pump:
 - a. Standard: **[UL 448]<Insert standard>**, for end-suction pumps for fire service.
 - b. Casing: Top centerline discharge self-venting cast iron with ASME B16.1 pipe-flange connections.
 - c. Impeller: Cast bronze, statically and dynamically balanced, and keyed to shaft.
 - d. Wear Rings: Replaceable bronze.
 - e. Shaft and Sleeve: Steel shaft with **[bronze][stainless steel]** sleeves.
 - 1) Shaft Bearings: Grease-lubricated, back-to-back thrust ball bearings and one radial roller bearing.
 - 2) Seals: Stuffing box with minimum of four rings of graphite-impregnated braided yarn and bronze packing gland.
 - f. Mounting: Back pullout design allowing complete rotating assembly removal without disturbing the casing piping connections. Pump and driver shafts are horizontal, with pump and driver on same base.
8. Coupling: Flexible and capable of absorbing torsional vibration and shaft misalignment. Include metal coupling guard.
9. Driver: Diesel engine.
10. Controller: Diesel engine drive.
11. Capacities and Characteristics:

- a. Rated Capacity: <Insert gpm (L/minute)>.
 - b. Total Rated Head: <Insert feet or psig (kPa)>.
 - c. Inlet Flange: [Class 125][Class 250]<Insert class>.
 - d. Outlet Flange: [Class 125][Class 250]<Insert class>.
 - e. Suction Head Available at Pump: <Insert feet (m)>.
 - f. Engine Horsepower: <Insert number> hp.
 - g. Engine Speed: <Insert number> rpm.
 - h. Fuel Tank Capacity: <Insert gal. (L)>.
 - i. Pump-Start, Pressure-Switch Setting: <Insert psig (kPa)>.
 - j. Pump-Stop, Pressure-Switch Setting: <Insert psig (kPa)>.
12. Source Quality Control:
- a. Manufacturer Testing: Test and inspect fire pumps in accordance with UL 448 requirements for "Operation Test" and "Manufacturing and Production Tests."
 - 1) Verification of Performance: Rate fire pumps in accordance with UL 448.
 - b. Prepare test and inspection reports.
- B. Fire Pump - Diesel Drive, Split Case, Horizontally Mounted, Single Stage, Centrifugal:
- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [A C Fire Pump; a Xylem brand]
 - b. [Armstrong Fluid Technology]
 - c. [Patterson Pump Company; a Gorman-Rupp company]
 - d. [Peerless Pump Company]
 - e. [Pentair Aurora; Pentair Pump Group]
 - f. [Plad Equipment, Ltd.]
 - g. [Reddy-Buffaloes Pump Company]
 - h. [Ruhrpumpen, Inc]
 - i. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [A C Fire Pump; a Xylem brand]
 - b. [Armstrong Fluid Technology]
 - c. [Patterson Pump Company; a Gorman-Rupp company]
 - d. [Peerless Pump Company]
 - e. [Pentair Aurora; Pentair Pump Group]
 - f. [Plad Equipment, Ltd.]
 - g. [Reddy-Buffaloes Pump Company]
 - h. [Ruhrpumpen, Inc]
 - i. <Insert manufacturer's name>
 - 3. Source Limitations:
 - a. Obtain fire pump and diesel drive from single manufacturer.
 - b. Equipment provider is to provide services of a factory authorized service representative and have a service facility located within a **60-mile (100-km)** radius of Project site.

4. Description: Factory-fabricated, -assembled, and -tested fire-pump and diesel drive.
 - a. Pump Equipment, Accessory, and Specialty Pressure Rating: **[175 psig (1200 kPa)]<Insert minimum pressure>** minimum.
 - b. Finish: Red paint applied to factory-assembled and -tested unit before shipping.
5. Standards:
 - a. Comply with NFPA 20.
 - b. **<Insert standard>**.
6. Base: Fabricated and attached to fire pump and driver unit, with reinforcement to resist movement of pump during seismic events when base is anchored to building substrate.
7. Pump:
 - a. Standard: **[UL 448]<Insert standard>**, for split-case pumps for fire service.
 - b. Casing: Axially split case, cast iron with ASME B16.1 pipe-flange connections.
 - c. Impeller: Double suction, cast bronze, statically and dynamically balanced, and keyed to shaft.
 - d. Wear Rings: Replaceable bronze.
 - e. Shaft and Sleeve: Alloy-steel shaft with bronze sleeve.
 - 1) Shaft Bearings: Grease-lubricated ball bearings in cast-iron housing.
 - 2) Seals: Stuffing box with minimum of four rings of graphite-impregnated braided yarn and bronze packing gland.
 - f. Mounting: Horizontal pump and driver shafts with pump and driver on same base.
8. Coupling: Flexible and capable of absorbing torsional vibration and shaft misalignment. Include metal coupling guard.
9. Driver: Diesel engine.
10. Controller: Diesel engine drive.
11. Capacities and Characteristics:
 - a. Rated Capacity: **<Insert gpm (L/minute)>**.
 - b. Total Rated Head: **<Insert feet or psig (kPa)>**.
 - c. Inlet Flange: **[Class 125][Class 250]<Insert class>**.
 - d. Outlet Flange: **[Class 125][Class 250]<Insert class>**.
 - e. Suction Head Available at Pump: **<Insert feet (m)>**.
 - f. Engine Horsepower: **<Insert number>** hp.
 - g. Engine Speed: **<Insert number>** rpm.
 - h. Fuel Tank Capacity: **<Insert gal. (L)>**.
 - i. Pump-Start, Pressure-Switch Setting: **<Insert psig (kPa)>**.
 - j. Pump-Stop, Pressure-Switch Setting: **<Insert psig (kPa)>**.
 - k. Rotation **[Clockwise][Counterclockwise]**.
12. Source Quality Control:
 - a. Manufacturer Testing: Test and inspect fire pumps in accordance with UL 448 requirements for "Operation Test" and "Manufacturing and Production Tests."
 - 1) Verification of Performance: Rate fire pumps in accordance with UL 448.
 - b. Prepare test and inspection reports.

C. Fire Pump - Diesel Drive, Split Case, Horizontally Mounted, Two Stage, Centrifugal:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[A C Fire Pump; a Xylem brand]**
 - b. **[Patterson Pump Company; a Gorman-Rupp company]**
 - c. **[Peerless Pump Company]**
 - d. **[Pentair Aurora; Pentair Pump Group]**
 - e. **[Ruhrpumpen, Inc]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[A C Fire Pump; a Xylem brand]**
 - b. **[Patterson Pump Company; a Gorman-Rupp company]**
 - c. **[Peerless Pump Company]**
 - d. **[Pentair Aurora; Pentair Pump Group]**
 - e. **[Ruhrpumpen, Inc]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations:
 - a. Obtain fire pump and diesel driver from single manufacturer.
 - b. Equipment provider is to provide services of a factory-authorized service representative and have a service facility located within a **60-mile (100-km)** radius of Project site.
4. Description: Factory-fabricated, -assembled, and -tested fire pump and diesel drive.
 - a. Pump Equipment, Accessory, and Specialty Pressure Rating: **[175 psig (1200 kPa)]<Insert minimum pressure>** minimum.
 - b. Finish: Red paint applied to factory-assembled and -tested unit before shipping.
5. Standards:
 - a. Comply with NFPA 20.
 - b. **<Insert standard>**.
6. Base: Fabricated and attached to fire-pump and driver unit, with reinforcement to resist movement of pump during seismic events when base is anchored to building substrate.
7. Pump:
 - a. Standard: **[UL 448]<Insert standard>**, for split-case pumps for fire service.
 - b. Number Stages: Two.
 - c. Casing: Axially split case, cast iron with ASME B16.1 pipe-flange connections.
 - d. Impeller: Double suction, cast bronze, statically and dynamically balanced, and keyed to shaft.
 - e. Wear Rings: Replaceable bronze.
 - f. Shaft and Sleeve: Alloy-steel shaft with bronze sleeve.
 - 1) Shaft Bearings: Grease-lubricated ball bearings in cast-iron housing.
 - 2) Seals: Stuffing box with minimum of four rings of graphite-impregnated braided yarn

and bronze packing gland.

- g. Mounting: Horizontal pump and driver shafts with pump and driver on same base.
- 8. Coupling: Flexible and capable of absorbing torsional vibration and shaft misalignment. Include metal coupling guard.
- 9. Driver: Diesel engine.
- 10. Controller: Diesel engine drive.
- 11. Capacities and Characteristics:
 - a. Rated Capacity: <Insert gpm (L/minute)>.
 - b. Total Rated Head: <Insert feet or psig (kPa)>.
 - c. Inlet Flange: [Class 125][Class 250]<Insert class>.
 - d. Outlet Flange: [Class 125][Class 250]<Insert class>.
 - e. Suction Head Available at Pump: <Insert feet (m)>.
 - f. Engine Horsepower: <Insert number> hp.
 - g. Engine Speed: <Insert number> rpm.
 - h. Fuel Tank Capacity: <Insert gal. (L)>.
 - i. Pump-Start, Pressure-Switch Setting: <Insert psig (kPa)>.
 - j. Pump-Stop, Pressure-Switch Setting: <Insert psig (kPa)>.
- 12. Source Quality Control:
 - a. Manufacturer Testing: Test and inspect fire pumps in accordance with UL 448 requirements for "Operation Test" and "Manufacturing and Production Tests."
 - 1) Verification of Performance: Rate fire pumps in accordance with UL 448.
 - b. Prepare test and inspection reports.

2.3 DIESEL ENGINE DRIVER

A. Diesel Engine Driver:

- 1. Fuel: Fuel oil, [Grade DF-2]<Insert grade>.
- 2. Horsepower Rating: Not less than 110 percent of maximum brake horsepower (after derating for temperature and elevation in accordance with NFPA 20).
- 3. Emergency Manual Operator: Factory wired for starting and operating standby engine in case of malfunction in main controller or wiring.
- 4. Controls:
 - a. Adjustable governor.
 - b. Over-speed shutdown.
 - c. Manual reset, speed switch.
 - d. Instrument panel with tachometer, oil pressure gauge, water temperature gauge, and hour meter.
- 5. Fuel System:
 - a. Comply with NFPA 20.
 - b. Main Fuel Pump: Mounted on engine. Pump ensures adequate primary fuel flow under starting and load conditions.
 - c. Relief-Bypass Valve: Automatically regulates pressure in fuel line and returns excess fuel to source.

- d. Flexible metallic fuel lines.
 - e. Inline fuel filter.
 - f. Oil pressure safety switch.
 - g. Air cleaner.
 - h. Engine-driven oil pump.
 - i. Enclosed control wiring electric starter with voltage regulator.
 - j. Storage Tank: [**Double wall**,] size indicated, but not less than required by NFPA 20; with floor legs, direct-reading level gauge[, and **secondary containment tank having capacity at least equal to storage tank**].
6. Exhaust System:
- a. Piping: ASTM A53/A53M, Type E or S, Schedule 40 black steel pipe; ASME B16.9 weld-type pipe fittings; ASME B16.5 steel flanges; and ASME B16.21 nonmetallic gaskets.
 - b. Fabricate double-wall, ventilated thimble from steel pipe.
 - c. Flexible exhaust connector.
 - d. [**Industrial**]-[**Residential**]-[**Critical**]-[**Super Critical**]-[**Hospital**]-[**Hospital Plus**]-[**Extreme**]-grade exhaust silencer with spark arrestor.
7. Rated Engine Speed: 1800 rpm.
8. Maximum Piston Speed for Four-Cycle Engines: **2250 fpm (11.4 m/s)**.
9. Engine- or Skid-Mounted Lubrication System:
- a. Filter and Strainer: Rated to remove 90 percent of particles 5 micrometers and smaller while passing full flow.
 - b. Thermostatic Control Valve: Controls flow in system to maintain optimum oil temperature. Unit is to be capable of full flow and is designed to be fail-safe.
 - c. Crankcase Drain: Arranged for complete gravity drainage to an easily removable container with no disassembly and without use of pumps, siphons, special tools, or appliances.
10. Coolant Jacket Heater: Electric-immersion type, factory installed in coolant jacket system.
11. Cooling System, Factory-Mounted Radiator:
- a. Factory installed, closed loop, liquid cooled, with radiator factory mounted on fire-pump mounting frame and integral engine-driven coolant pump.
 - b. Coolant: Solution of 50 percent ethylene-glycol-based antifreeze and 50 percent water, with anticorrosion additives as recommended by engine manufacturer.
 - c. Size of Radiator: Adequate to contain expansion of total system coolant from cold start to 110 percent load condition.
 - d. Expansion Tank: Constructed of welded-steel plate and rated to withstand maximum closed-loop coolant system pressure for engine used. Equip with gauge glass and petcock.
 - e. Temperature Control: Self-contained, thermostatic-control valve modulates coolant flow automatically to maintain optimum constant coolant temperature as recommended by engine manufacturer.
 - f. Coolant Hose: Flexible assembly with inside surface of nonporous rubber and outer covering of aging-, ultraviolet-, and abrasion-resistant fabric.
- 1) Rating: **50 psig (345 kPa)** maximum working pressure, with coolant at **180 deg F (82 deg C)**, and noncollapsible under vacuum.
 - 2) End Fittings: Flanges or steel pipe nipples with clamps to suit piping and equipment connections.
12. Cooling System, Remote Radiator:
- a. Closed loop, liquid cooled, with remote radiator and integral engine-driven coolant pump.
 - b. Configuration: [**Vertical**]-[**Horizontal**] air discharge.

- c. Radiator Core Tubes: **[Aluminum][Nonferrous-metal construction other than aluminum]**.
 - d. Size of Radiator: Adequate to contain expansion of total system coolant from cold start to 110 percent load condition.
 - e. Expansion Tank: Constructed of welded-steel plate and rated to withstand maximum closed-loop coolant system pressure for engine used. Equip with gauge glass and petcock.
 - f. Fan: Driven by **[multiple belts from engine shaft][totally enclosed electric motor with sealed bearings]**.
 - g. Coolant: Solution of 50 percent ethylene-glycol-based antifreeze and 50 percent water, with anticorrosion additives as recommended by engine manufacturer.
 - h. Temperature Control: Self-contained, thermostatic-control valve modulates coolant flow automatically to maintain optimum constant coolant temperature as recommended by engine manufacturer.
13. Muffler/Silencer, Industrial Grade: Sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
- a. Minimum sound attenuation of **[15 dBA]<Insert dBA>** at 500 Hz.
 - b. Sound level measured at a distance of **[25 ft. (8 m)]<Insert distance>** from exhaust discharge after installation is complete is to be **[85]<Insert number>** dBA or less.
14. Muffler/Silencer, Residential Grade: Sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
- a. Minimum sound attenuation of **[20 dBA]<Insert dBA>** at 500 Hz.
 - b. Sound level measured at a distance of **[10 ft. (3 m)]<Insert distance>** from exhaust discharge after installation is complete is to be **[85]<Insert number>** dBA or less.
15. Muffler/Silencer, Critical Grade: Sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
- a. Minimum sound attenuation of **[25 dBA]<Insert dBA>** at 500 Hz.
 - b. Sound level measured at a distance of **[10 ft. (3 m)]<Insert distance>** from exhaust discharge after installation is complete is to be **[85]<Insert number>** dBA or less.
16. Muffler/Silencer, Super Critical Grade: Sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
- a. Minimum sound attenuation of **[30 dBA]<Insert dbA>** at 500 Hz.
 - b. Sound level measured at a distance of **[10 ft. (3 m)]<Insert distance>** from exhaust discharge after installation is complete is to be **[85]<Insert number>** dBA or less.
17. Muffler/Silencer, Hospital Grade: Sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
- a. Minimum sound attenuation of **[35 dBA]<Insert dBA>** at 500 Hz.
 - b. Sound level measured at a distance of **[10 ft. (3 m)]<Insert distance>** from exhaust discharge after installation is complete is to be **[85]<Insert number>** dBA or less.
18. Muffler/Silencer, Hospital Plus Grade: Sized as recommended by engine manufacturer and

selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.

- a. Minimum sound attenuation of **[35 dBA]<Insert dBA>** at 500 Hz.
 - b. Sound level measured at a distance of **[10 ft. (3 m)]<Insert distance>** from exhaust discharge after installation is complete is to be **[85]<Insert number>** dBA or less.
19. Muffler/Silencer, Extreme Grade: Sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
- a. Minimum sound attenuation of **[40 dBA]<Insert dBA>** at 500 Hz.
 - b. Sound level measured at a distance of **[10 ft. (3 m)]<Insert distance>** from exhaust discharge after installation is complete is to be **[85]<Insert number>** dBA or less.
20. Muffler/Silencer, Super Extreme Grade: Sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
- a. Minimum sound attenuation of **[45 dBA]<Insert dBA>** at 500 Hz.
 - b. Sound level measured at a distance of **[10 ft. (3 m)]<Insert distance>** from exhaust discharge after installation is complete is to be **[85]<Insert number>** dBA or less.
21. Air-Intake Filter: **[Standard][Heavy]**-duty, engine-mounted air cleaner with replaceable dry-filter element and "blocked filter" indicator.
22. Starting System: **[12][24]**-V dc, with negative ground.
- a. Components: Sized so they will not be damaged during a full engine-cranking cycle with ambient temperature at maximum specified in "Performance Requirements" Article.
 - b. Cranking Motor: Heavy-duty unit that automatically engages and releases from engine flywheel without binding.
 - c. Cranking Cycle: **[60]<Insert number>** seconds.
 - d. Battery: Adequate capacity within ambient temperature range specified in "Performance Requirements" Article to provide specified cranking cycle at least **[twice][three times]** without recharging.
 - e. Battery Cable: Size as recommended by engine manufacturer for cable length indicated. Include required interconnecting conductors and connection accessories.
 - f. Battery Compartment: Factory fabricated of metal with acid-resistant finish and thermal insulation. Thermostatically controlled heater is to be arranged to maintain battery above 10 deg C regardless of external ambient temperature within range specified in "Performance Requirements" Article. Include accessories required to support and fasten batteries in place.
 - g. Battery-Charging Alternator: Factory mounted on engine with solid-state voltage regulation and 35-A minimum continuous rating.
 - h. Battery Charger: Current-limiting, automatic-equalizing and float-charging type. Unit is to comply with UL 1236 and include the following features:
 - 1) Operation: Equalizing-charging rate of 10 A is to be initiated automatically after battery has lost charge until an adjustable equalizing voltage is achieved at battery terminals. Unit is then to be automatically switched to a lower float-charging mode and is to continue to operate in that mode until battery is discharged again.
 - 2) Automatic Temperature Compensation: Adjust float and equalize voltages for variations in ambient temperature from minus 40 to plus 60 deg C to prevent overcharging at high temperatures and undercharging at low temperatures.
 - 3) Automatic Voltage Regulation: Maintain constant output voltage regardless of input voltage variations up to plus or minus 10 percent.

- 4) Ammeter and Voltmeter: Flush mounted in door. Meters are to indicate charging rates.
- 5) Safety Functions: Sense abnormally low battery voltage and close contacts providing low battery voltage indication on control and monitoring panel. Sense high battery voltage and loss of ac input or dc output of battery charger. Either condition is to close contacts that provide a battery-charger malfunction indication at system control and monitoring panel.
- 6) Enclosure and Mounting: NEMA 250, Type 1 wall-mounted cabinet.

2.4 FIRE-PUMP CONTROLLER - FOR DIESEL-DRIVE FIRE PUMPS

A. Fire-Pump Controllers - For Diesel-Drive Fire Pumps:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Firetrol]**
 - c. **[Master Control Systems, Inc]**
 - d. **[Metron Eledyne; a Hubbell Company]**
 - e. **[Tornatech]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Firetrol]**
 - c. **[Master Control Systems, Inc]**
 - d. **[Metron Eledyne; a Hubbell Company]**
 - e. **[Tornatech]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations:
 - a. Obtain diesel-drive controllers from single manufacturer.
 - b. Equipment provider is to provide services of a factory authorized service representative and have a service facility located within a **60-mile (100-km)** radius of Project site.
4. Description:
 - a. Factory fabricated, assembled, wired, and tested.
 - b. Operation: **[Combined automatic and nonautomatic][Nonautomatic]** operation.
5. Standards:
 - a. Comply with NFPA 20.
 - b. **<Insert standard>**.
6. Method of Starting:

- a. Actuation: **[Pressure][Nonpressure]**-switch actuated.
 - 1) Water-pressure-actuated switch and pressure transducer with independent high- and low-calibrated adjustments responsive to water pressure in fire-suppression piping.
 - 2) Programmable minimum-run-time relay to prevent short cycling.
 - 3) Programmable timer for weekly tests.
 - b. Dual, redundant dc-voltage battery units, with automatic changeover.
 - c. Emergency Control: Bypasses automatic control circuits during manual starting and running.
 - d. Automatic engine start on loss of ac power to the controller.
7. Method of Stopping: **[Automatic and nonautomatic shutdown after automatic starting][Nonautomatic]**.
8. Enclosure:
- a. NEMA 250, Type **[2][3R][4][4X][12]<Insert type>** minimum.
 - 1) Comply with environmental conditions at installed location and NFPA 20.
 - b. Enclosure Color: **[Manufacturer's standard "fire-pump-controller red"]<Insert color>**.
 - c. Nameplates: Comply with NFPA 20; complete with capacity, characteristics, approvals, listings, and other pertinent data.
 - d. Features:
 - 1) Floor stands, **12 inches (305 mm)** high, for floor-mounted controllers.
 - 2) Space heater, **[120 V(ac)][240 V(ac)][, with humidistat][, with thermostat]**.
 - 3) Tropicalization.
 - 4) **<Insert optional feature>**.
9. Door-Mounted Operator Interface and Controls:
- a. Monitor, display, and control devices, alarms, functions, and operations listed in NFPA 20 as required for drivers and controller types used.
 - 1) Pressure and Event Recorder capable of logging pressure data and operational events with time and date stamp for the life of the controller. Data to be retrievable and downloadable to a flash memory drive via a USB port accessible to the user without having to open the controller door.
 - b. Touch Screen Operator Interface:
 - 1) Provide minimum 7-inch LCD Color Touch Screen powered by an embedded microprocessor with software.
 - 2) Provide in addition to push-button operation for START/STOP/RUN TEST and graphic display of system operations, the control is to allow programming of Cut-In and Cut-Out pressures, Minimum Runtime and is to allow for on-screen viewing of corresponding Owner's Manual in chosen language.
 - c. Local and Remote Alarm and Status Indications:
 - 1) Status LEDs - green color for the following:
 - a) Low Pressure.
 - b) Engine Run.

- c) Remote Start.
- d) Interlock On.
- e) Deluge Valve (if applicable).
- f) One Programmable LED.

2) Alarm LEDs - red color for the following:

- a) Battery #1 Failure.
- b) Charger #1 Failure.
- c) Battery #2 Failure.
- d) Charger #2 Failure
- e) Low Pressure.
- f) System Over Pressure.
- g) Low Suction Pressure.
- h) Low Fuel.
- i) Fail to Start.
- j) High Engine Temp.
- k) Low Oil Pressure.
- l) Engine Over Speed.
- m) ECM Selector in Alt Position.
- n) Fuel Injection Malfunction.
- o) ECM Warning.
- p) ECM Failure.
- q) High Raw Water Temp.
- r) Low Engine Temperature
- s) Fuel Spill
- t) One Programmable LED.

- d. Audible alarm with Push to Silence button.
- e. Nonautomatic START and STOP push buttons or switches.
- f. Set pressure and system pressure.
- g. <Insert function>.

10. Features:

a. Extra Output Contacts:

- 1) [One]<Insert number> Form C contact(s) for low pump-room temperature.
- 2) [One]<Insert number> each, Form C contact(s) for high and low fuel levels.
- 3) [One]<Insert number> each, Form C contact(s) for high and low reservoir levels.
- 4) <Insert contact type>.

- b. Operator Interface Communications Ports: USB, Ethernet, and TIA-485-A.
- c. Communications Protocol Capability: Modbus with TCP/IP frame format and shielded female RJ45 connector.
- d. Powered louver contacts.
- e. Powered engine-oil heater contacts.
- f. <Insert optional feature>.

11. Battery Charger System:

- a. Built-in, independent, dual battery chargers with automatic changeover; [12 V(dc)][24 V(dc)] for [lead-acid][nickel-cadmium] batteries.
- b. Standard: [UL 1236]<Insert standard>.

12. Source Quality Control:

- a. Manufacturer Testing: Test and inspect fire-pump controllers in accordance with requirements in NFPA 20 and **[UL 218]<Insert standard>**.
 - 1) Verification of Performance: Rate controllers in accordance with operation of functions and features specified.
- b. Prepare test and inspection reports.

2.5 FIRE-PUMP ACCESSORIES AND SPECIALTIES

- A. Automatic Air-Release Valves: Comply with NFPA 20 for installation in fire-pump casing.
- B. Circulation Relief Valves: UL 1478, bronze or cast iron, spring loaded; for installation in pump-discharge piping.
- C. Inlet Fitting: Eccentric tapered reducer at pump suction inlet.
- D. Outlet Fitting: Concentric tapered reducer at pump-discharge outlet.
- E. Discharge Cone: **[Closed][Open][Closed or open]** type.
- F. Fire-Pump Relief Valve:
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[BERMAD Control Valves]**
 - b. **[CLA-VAL]**
 - c. **[Kunkle Valve]**
 - d. **[OCV Control Valves]**
 - e. **[WATTS; A Watts Water Technologies Company]**
 - f. **[Zurn Industries, LLC]**
 - g. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[BERMAD Control Valves]**
 - b. **[CLA-VAL]**
 - c. **[Kunkle Valve]**
 - d. **[OCV Control Valves]**
 - e. **[WATTS; A Watts Water Technologies Company]**
 - f. **[Zurn Industries, LLC]**
 - g. **<Insert manufacturer's name>**
 - 3. Description: UL 1478, bronze or cast iron, spring loaded; for installation in fire-suppression water-supply piping.
- G. Fire-Pump Test Connection:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[American Fire Supply]**
 - b. **[CLA-VAL]**
 - c. **[Croker; a Division of Morris Group International]**
 - d. **[Guardian Fire Equipment, Inc]**
 - e. **[Potter Roemer LLC; a Division of Morris Group International]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[American Fire Supply]**
 - b. **[CLA-VAL]**
 - c. **[Croker; a Division of Morris Group International]**
 - d. **[Guardian Fire Equipment, Inc]**
 - e. **[Potter Roemer LLC; a Division of Morris Group International]**
 - f. **<Insert manufacturer's name>**
3. Standards:
 - a. NFPA 20.
 - b. UL 405, except outlets without clappers instead of inlets.
4. Description: **[Exposed, projecting, for wall mounting][Flush, for wall mounting]<Insert type>**.
5. Pressure Rating: **175 psig (1200 kPa)** minimum.
6. Body Material: Corrosion-resistant metal with number of outlets required by NFPA 20.
7. Escutcheon Plate: Brass or bronze.
8. Hose Valves: UL 668, bronze, with outlet threaded in accordance with NFPA 1963 and matching local fire-department threads. Include caps and chains.
9. Exposed Parts Finish: **[Polished][Rough][brass][, chrome plated]**.
10. Escutcheon Plate Marking: **[FIRE-PUMP TEST CONNECTION]<Insert marking>**

H. Fire-Pump Flowmeter Systems:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Fire Research Corp]**
 - b. **[Gerand Engineering Co]**
 - c. **[Hyspan Precision Products, Inc]**
 - d. **[Victaulic Company]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Fire Research Corp]**

- b. **[Gerand Engineering Co]**
 - c. **[Hyspan Precision Products, Inc]**
 - d. **[Victaulic Company]**
 - e. **<Insert manufacturer's name>**
- 3. Description: UL-listed or FM-Approved, fire-pump flowmeter system with capability to indicate flow to not less than 175 percent of fire-pump rated capacity.
 - 4. Pressure Rating: **[175 psig (1200 kPa) minimum][250 psig (1725 kPa)][300 psig (2070 kPa)]<Insert pressure>**.
 - 5. Sensor: **[Venturi][Paddlewheel]<Insert type>**. Sensor size is to match pipe, tubing, flowmeter, and fittings.
 - 6. Permanently Mounted Flowmeter: Compatible with flow sensor, with dial not less than **4-1/2 inches (115 mm)** in diameter.**[Include bracket or device for wall mounting.]**
 - a. Tubing Package: **NPS 1/8 or NPS 1/4 (DN 6 or DN 10)** plastic tubing with copper or brass fittings and valves.
 - 7. Portable Flowmeter: Compatible with flow sensor, with dial not less than **4-1/2 inches (115 mm)** in diameter and with two **12-ft.- (3.7-m-)** long hoses in carrying case.

2.6 FUEL OIL STORAGE

- A. Comply with NFPA 30.
- B. Day Tank: UL 142, freestanding, factory-fabricated fuel tank assembly, with integral, float-controlled transfer pump and the following features:
 - 1. Containment: Integral rupture basin, with a capacity of 150 percent of nominal capacity of day tank.
 - a. Leak Detector: Locate in rupture basin and connect to provide audible and visual alarm in the event of day-tank leak.
 - 2. Tank Capacity: **[As recommended by engine manufacturer]<Insert gallons (liters)>**.
 - 3. Pump Capacity: Exceeds maximum flow of fuel drawn by engine-mounted fuel supply pump at 110 percent of rated capacity, including fuel returned from engine.
 - 4. Low-Level Alarm Sensor: Liquid-level device operates alarm contacts at 25 percent of normal fuel level.
 - 5. Piping Connections: Factory-installed fuel supply and return lines from tank to engine; local fuel fill, vent line, overflow line; and tank drain line with shutoff valve.
- C. Base-Mounted Fuel Oil Tank: Factory installed and piped, complying with UL 142 fuel oil tank. Features include the following:
 - 1. Tank level indicator.
 - 2. Capacity: Fuel for **[eight]<Insert number>** hours' continuous operation at 100 percent rated power output.
 - 3. Vandal-resistant fill cap.
 - 4. Containment Provisions: Comply with requirements of authorities having jurisdiction.

2.7 FIRE-PUMP CONTROLLER REMOTE ALARM PANEL

- A. Fire-Pump Controller Remote Alarm Panel:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Firetrol]**
 - c. **[Master Control Systems, Inc]**
 - d. **[Metron Eledyne; a Hubbell Company]**
 - e. **[Tornatech]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Eaton]**
 - b. **[Firetrol]**
 - c. **[Master Control Systems, Inc]**
 - d. **[Metron Eledyne; a Hubbell Company]**
 - e. **[Tornatech]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations: Obtain remote alarm panels from single manufacturer.
4. Standards:
 - a. Comply with NFPA 20.
 - b. **<Insert standard>**.
5. Description: Factory fabricated, assembled, wired, and tested.
6. Supervisory and Normal Control Voltage: **[120 V(ac)][240 V(ac)]<Insert voltage>; [single][dual]** source.
7. Audible and Visual Alarm and Status Indications for Diesel-Driven Pump Controllers:
 - a. Normal Power On.
 - b. Supervisory Power On.
 - c. Engine Running.
 - d. Not in Auto Mode.
 - e. Low Fuel.
 - f. Common Alarm.
 - g. **<Insert alarm>**.
 - h. **<Insert alarm>** with SPDT, 8 Amp relay Output.
8. Audible alarm, with silence push button.

2.8 GROUT

- A. Standard: ASTM C1107/C1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-cement grout.
- B. Characteristics: Nonshrink and recommended for interior and exterior applications.
- C. Design Mix: **5000 psi (34 MPa)**, 28-day compressive strength.

- D. Packaging: Premixed and factory packaged.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas, surfaces to receive equipment, equipment bases and anchorage provisions, with installing contractor(s)[, **Architect**,][, **Engineer**,][, **Construction Manager**,] and Manufacturer's Representative present, for compliance with requirements for installation tolerances, and other conditions affecting performance of the fire pump and fire-pump controller.
- B. Examine roughing-in for fire-suppression piping systems to verify actual locations of piping connections before fire-pump installation.
- C. Examine equipment before installation. Reject equipment that is wet or damaged by moisture or mold.
- D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PROTECTION OF FIRE-PUMP CONTROLLERS

- A. Temporary Heating: Apply temporary heat to maintain temperature in accordance with manufacturer's written instructions until enclosed fire-pump controllers are ready to be energized and placed into service.
- B. Replace fire-pump controllers whose interiors have been exposed to water or other liquids prior to Substantial Completion.

3.3 INSTALLATION OF FIRE PUMPS

- A. Comply with NFPA 20 for installation of fire pumps, relief valves, and related components.
- B. Equipment Mounting:
 - 1. Install fire pumps on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
 - 2. Comply with requirements for vibration isolation and seismic control devices specified in Section 210548 "Vibration and Seismic Controls for Fire-Suppression Piping and Equipment" and Section 018123 "Facility Seismic and Wind Criteria."
 - 3. Comply with requirements for vibration isolation devices specified in Section 210548.13 "Vibration Controls for Fire-Suppression Piping and Equipment."
- C. Install fire-pump suction and discharge piping equal to or larger than sizes required by NFPA 20.
- D. Support piping and pumps separately, so weight of piping does not rest on pumps.
- E. Install valves that are same size as connecting piping. Comply with requirements for fire-protection valves specified in Section 211000 "Water-Based Fire-Suppression Systems."
- F. Install pressure gauges on fire-pump suction and discharge flange pressure-gauge tapings. Comply with requirements for pressure gauges specified in Section 211000 "Water-Based Fire-Suppression Systems."

- G. Install piping hangers and supports, anchors, valves, gauges, and equipment supports in accordance with NFPA 20[, **NFPA 13**,][and][**NFPA 14**<Insert standard>.
- H. Install fuel system in accordance with NFPA 20.
- I. Install water supply and drain piping for diesel-engine heat exchangers. Extend drain piping from heat exchangers to point of disposal.
- J. Install exhaust-system piping for diesel engines. Extend to point of termination outside structure. Install pipe and fittings with welded joints; install components having flanged connections with gasketed joints.
- K. Install condensate-drain piping for diesel-engine exhaust system. Extend drain piping from low points of exhaust system to condensate traps and to point of disposal.
- L. Install flowmeters and sensors. Install flowmeter-system components and make connections in accordance with NFPA 20 and manufacturer's written instructions.
- M. Electrical Wiring: Install electrical devices furnished by equipment manufacturers that are not factory mounted. Furnish copies of manufacturers' wiring diagram submittals to electrical Installer.

3.4 ALIGNMENT OF FIRE PUMPS

- A. Align **[end-suction][and][split-case]** pump and driver shafts after complete unit has been leveled on concrete base, grout has set, and anchor bolts have been tightened.
- B. After alignment is correct, tighten anchor bolts evenly. Fill baseplate completely with grout, with metal blocks and shims or wedges in place. Tighten anchor bolts after grout has hardened. Check alignment and make required corrections.
- C. Align piping connections.
- D. Align pump and driver shafts for angular and parallel alignment in accordance with HI 1.4 and to tolerances specified by manufacturer.

3.5 PIPING CONNECTIONS

- A. Comply with requirements for piping and valves specified in Section 211000 "Water-Based Fire-Suppression Systems." Drawings indicate general arrangement of piping, fittings, and specialties.
- B. Install piping adjacent to pumps and equipment to allow service and maintenance.
- C. Connect relief-valve discharge to drainage piping or point of discharge.
- D. Connect flowmeter-system meters, sensors, and valves to tubing.
- E. Connect fire pumps to their controllers.

3.6 INSTALLATION OF FIRE-PUMP CONTROLLERS

- A. Coordinate installation of controllers with other construction including conduit, piping, fire-pump equipment, and adjacent surfaces. Maintain required clearances for workspace and equipment access

doors and panels. Ensure that controllers are within sight of fire-pump drivers.

- B. Coordinate sizes and locations of concrete bases with actual equipment provided.
- C. Install controllers within sight of their respective drivers.
- D. Connect controllers to their dedicated pressure-sensing lines.
- E. Wall-Mounting Controllers: Install controllers on walls with disconnect operating handles not higher than **79 inches (2 m)** above finished floor, and bottom of enclosure not less than **12 inches (305 mm)** above finished floor unless otherwise indicated. Bolt units to wall or mount on lightweight structural-steel channels bolted to wall. For controllers not on walls, provide freestanding racks complying with Section 260529 "Hangers and Supports for Electrical Systems."
- F. Floor-Mounting Controllers: Install controllers on concrete base(s), using floor stands high enough so that the bottom of enclosure cabinet is not less than **12 inches (305 mm)** above finished floor. Comply with requirements for concrete bases specified in Section 260529 "Hangers and Supports for Electrical Systems."
 - 1. For supported equipment, install epoxy-coated anchor bolts that extend through concrete base, and anchor into structural concrete floor.
 - 2. Place and secure anchorage devices. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
 - 3. Install anchor bolts to elevations required for proper attachment to supported equipment.
- G. Seismic Bracing: Comply with requirements specified in Section 260548 "Vibration and Seismic Controls for Electrical Systems" and Section 018123 "Facility Seismic and Wind Criteria."
- H. Temporary Lifting Provisions: Remove temporary lifting eyes, channels, and brackets and temporary blocking of moving parts from enclosures and components.
- I. Installation of Control and Alarm Wiring:
 - 1. Install wiring between fire-pump controllers and remote devices[**and facility's central monitoring system**]. Comply with requirements in NFPA 20, NFPA 70, and Section 260523 "Control-Voltage Electrical Power Cables."
 - 2. Install wiring between remote alarm panels and fire-pump controllers. Comply with requirements in NFPA 20, NFPA 70, and Section 260523 "Control-Voltage Electrical Power Cables."
 - 3. Install wiring between controllers and the building's fire-alarm system. Comply with requirements specified in Section 284600 "Fire Detection and Alarm."
 - 4. Bundle, train, and support wiring in enclosures.
 - 5. Connect remote manual and automatic activation devices where applicable.
- J. Field Acceptance Testing and Inspection.
 - 1. Acceptance Testing Preparation:
 - a. Inspect and Test Each Component:
 - 1) Inspect wiring, components, connections, and equipment installations. Test and adjust components and equipment.
 - 2) Test insulation resistance for each element, component, connecting supply, feeder, and control circuits.
 - 3) Test continuity of each circuit.
 - 2. Representatives from manufacturers of fire-pump controllers must be present during acceptance

tests and inspections in accordance with NFPA 20.

3. Acceptance tests and inspections must be witnessed by **[Architect][Construction Manager][Owner][authorities having jurisdiction]<Insert names or titles of witnesses>**.
4. Acceptance Tests and Inspections:
 - a. Do not begin field acceptance testing until suction piping has been flushed and hydrostatically tested and the certificate for flushing and testing has been submitted to **[Architect][Construction Manager][Owner]** and authorities having jurisdiction.
 - b. Prior to starting, notify authorities having jurisdiction of the time and place of the acceptance testing.
 - c. Engage manufacturer's factory-authorized service representative to be present during the testing.
 - d. Perform field acceptance tests as outlined in NFPA 20.
5. Nonconforming Work:
 - a. Controllers will be considered defective if they do not pass tests and inspections.
 - b. Remove and replace defective units with new units and retest.
6. Prepare and submit field acceptance testing and inspection reports.

3.7 INSTALLATION OF FIRE-PUMP CONTROLLER REMOTE ALARM PANEL

- A. Install panels on walls with tops not higher than **[72 inches (1829 mm)]<Insert height>** above finished floor unless otherwise indicated. Bolt units to wall or mount on lightweight structural-steel channels bolted to wall. For panels not on walls, provide freestanding racks complying with Section 260529 "Hangers and Supports for Electrical Systems."

3.8 IDENTIFICATION OF FIRE PUMPS AND FIRE-PUMP CONTROLLERS

- A. Comply with NFPA 20 requirements for marking of fire pumps and fire-pump controllers.
- B. Identify equipment, system components, piping, wiring, cabling, and terminals. Comply with requirements for identification in NFPA 20 and as specified in Section 210553 "Identification for Fire-Suppression Piping and Equipment and Section 260553 "Identification for Electrical Systems."

3.9 STARTUP SERVICE FOR FIRE PUMPS AND CONTROLLERS

- A. **[Engage a factory-authorized service representative to perform][Perform]** startup service.
 1. Complete installation and startup checks in accordance with manufacturer's written instructions.
 2. **<Insert startup steps>**.

3.10 ADJUSTING

- A. Adjust fire-pump controllers and battery charger systems to function smoothly and as recommended by manufacturer.
- B. Set field-adjustable switches, auxiliary relays, time-delay relays, and timers.

- C. Program microprocessors for required operational sequences, status indications, alarms, event recording, and display features. Clear events memory after final acceptance testing and prior to Substantial Completion.
- D. Set field-adjustable pressure switches.

3.11 FIELD QUALITY CONTROL

- A. Test each fire pump with its controller as a unit.
- B. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to perform tests and inspections.
- C. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
- D. Perform the following tests and inspections[**with the assistance of a factory-authorized service representative**]:
 - 1. After installing components, assemblies, and equipment, including controller, test for compliance with requirements.
 - 2. Test in accordance with NFPA 20 for acceptance and performance testing.
 - a. Prior to initial startup and acceptance testing, complete and check all electric wiring serving fire-pump controller and pressure-maintenance pump motor including control interwiring, normal power, and alternate power.
 - 3. Leak Test: After installation, fill system and test for leaks. Repair leaks and retest until no leaks exist.
 - 4. Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation.
 - 5. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
- E. Components, assemblies, and equipment will be considered defective if they do not pass tests and inspections.
- F. Prepare test and inspection reports.
- G. Furnish fire hoses in number, size, and length required to reach storm drain or other acceptable location to dispose of fire-pump test water. Hoses are for tests only and do not convey to Owner.

3.12 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain fire pumps, and fire-pump controllers.

END OF SECTION 26 29 33 13

THIS PAGE INTENTIONALLY LEFT BLANK

**SECTION 26 29 33 13A - PRESSURE-MAINTENANCE PUMPS****PART 1 - GENERAL****1.1 SUMMARY****A. Section Includes:**

1. Pressure-maintenance pumps - vertical, multistage.
2. Pressure-maintenance pumps - vertical turbine.
3. Pressure-maintenance pump controllers.
4. Grout.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on Project.
3. Section 210548 "Vibration and Seismic Controls for Fire-Suppression Piping and Equipment" specifies seismic restraint and vibration isolation of fire suppression equipment and piping.
4. Section 260010 "Supplemental Requirements for Electrical" specifies requirements applicable to coordinating, scheduling, and sequencing of the electrical Work specified in this Section.
5. Section 260573 "Power System Studies" specifies arc flash hazard analyses and arc flash hazard labeling.
6. Section 284600 "Fire Detection and Alarm" specifies supervisory connections to fire-alarm systems.

1.2 ACTION SUBMITTALS**A. Product Data:** For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for pressure-maintenance pump and pressure-maintenance pump controller.
2. Include rated capacities, operating characteristics, factory-certified performance test curves, electrical characteristics, and furnished accessories and specialties.

B. Shop Drawings: For pressure-maintenance pumps, pressure-maintenance pump controllers, and pressure-maintenance pump accessories and specialties.

1. Provide fabrication and installation details, including plans, elevations, sections, and mounting and attachment details.
2. Provide details of equipment assemblies. Indicate dimensions; shipping, installed, and operating weights; loads; required clearances; method of field assembly; components; electrical characteristics; and location and size of each field connection.
3. Vibration Isolation Base Details: Detail fabrication, including anchorages and attachments to structure and to supported equipment. Include adjustable motor bases, rails, and frames for equipment mounting.
4. Provide wiring diagrams for power, signal, and control wiring.
5. For pressure-maintenance pump controllers, show the following:

- a. Each installed unit's type and details.
- b. Enclosure types and details for types other than NEMA, Type 2.
- c. Factory-installed devices.
- d. Nameplate legends.
- e. Short-circuit current rating of integrated unit.
- f. Features, characteristics, ratings, and factory settings of individual overcurrent protective devices.
- g. Specified modifications.

C. Delegated Design Submittal: For pressure-maintenance pump and pressure-maintenance pump controller.

1. Include design calculations for selecting vibration isolators[**and seismic restraints**] and for designing vibration isolation bases.

1.3 INFORMATIONAL SUBMITTALS

A. Seismic Qualification Certificates: For pressure-maintenance pumps, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

B. Product Certificates: For each type of pressure-maintenance pump and pressure-maintenance pump controller, from manufacturer.

C. Source quality-control reports.

D. Field-acceptance testing and inspection reports for fire-pump controllers.

E. Field quality-control reports.

F. Certified shop test curves showing head capacity and brake horsepower for each pump.

1.4 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For pressure-maintenance pumps and pressure-maintenance pump controllers to include in operation and maintenance manuals.

1.5 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Auxiliary Contacts: **[One]<Insert number>** for each size and type of magnetic contactor installed.
2. Power Contacts: **[Three]<Insert number>** for each size and type of magnetic contactor installed.
3. Contactor Coils: **[One]<Insert number>** for each size and type of magnetic controller installed.

4. Relay Boards: **[One]<Insert number>** for each size and type of relay board installed.
5. Operator Interface: **[One]<Insert number>** microprocessor board(s), complete with display and membrane keypad.
6. **<Insert extra materials>**.

1.6 WARRANTY

- A. Manufacturer Warranty: **[Manufacturer agrees][Installer agrees][Manufacturer and Installer agree]** to repair or replace pressure-maintenance pumps and controllers that fail in materials or workmanship within specified warranty period.
- B. Special Warranty: **[Manufacturer agrees][Installer agrees][Manufacturer and Installer agree]** to repair or replace components of pressure-maintenance pumps and controllers, including **[auxiliary contacts for magnetic contactors][power contacts for magnetic contactors][contactor coils for magnetic contactors][relay boards][operator interface microprocessor boards]<Insert components>** that fail in materials or workmanship within specified warranty period.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Seismic Performance: Pressure-maintenance pumps are to withstand the effects of earthquake motions determined in accordance with NFPA 20 **[and][ASCE/SEI 7][NFPA 13][NFPA 14]<Insert requirement>**.
 1. The term "withstand" means "the unit will remain in place without separation of any parts when subjected to the seismic forces specified **[and the unit will be fully operational after the seismic event].**"
 2. Component Importance Factor: 1.5.
 3. **<Insert requirements for Component Amplification Factor and Component Response Modification Factor>**.
- B. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70 by a qualified electrical testing agency recognized by authorities having jurisdiction and marked for intended location and application.

2.2 PRESSURE-MAINTENANCE PUMPS

- A. Pressure-Maintenance Pumps - Vertical, Multistage:
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[A C Fire Pump; a Xylem brand]**
 - b. **[Armstrong Fluid Technology]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the

following:

- a. **[A C Fire Pump; a Xylem brand]**
 - b. **[Armstrong Fluid Technology]**
 - c. **<Insert manufacturer's name>**
3. Source Limitations:
 - a. Obtain vertical, multistage, pressure-maintenance pump and electric drive from single manufacturer.
 - b. Equipment provider is to provide services of a factory authorized service representative and have a service facility located within a **60-mile (100 km)** radius of Project site.
4. Description: Factory-fabricated, -assembled, and -tested, multistage, barrel-type vertical pressure-maintenance pump, as defined in HI 2.1-2.2 and HI 2.3; designed for surface installation with pump and motor direct coupled and mounted vertically.
5. Pump Construction:
 - a. Barrel: Stainless steel.
 - b. Suction and Discharge Chamber: Cast iron with flanged inlet and outlet.
 - c. Pump Head/Motor Mount: Cast iron.
 - d. Impellers: Stainless steel, balanced, and keyed to shaft.
 - e. Pump Shaft: Stainless steel.
 - f. Seal: Mechanical type with carbon rotating face and silicon-carbide stationary seat.
 - g. Wear Rings: Teflon.
 - h. Intermediate Chamber Bearings: Aluminum-oxide ceramic or bronze.
 - i. Chamber-Base Bearing: Tungsten carbide.
 - j. O-Rings: **[EPDM][NBR][Viton]**.
6. Motor: Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors specified in Section 210500 "Common Work Results for Fire Suppression."
 - a. Motor Sizes: Minimum size as indicated; if not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
 - b. Description: Single speed with permanently lubricated ball bearings and rigidly mounted to pump head.
7. Nameplate: Permanently attached to pump and indicating capacity and characteristics.
8. Capacities and Characteristics:
 - a. Rated Capacity: **<Insert gpm (L/minute)>**.
 - b. Total Dynamic Head: **<Insert feet (kPa)>**.
 - c. Working Pressure: **[175 psig (1200 kPa) minimum][230 psig (1586 kPa)][300 psig (2070 kPa)]<Insert value>**.
 - d. Inlet and Outlet Size: **[NPS 1-1/4 (DN 32)]<Insert size>**.
 - e. Discharge and Suction Flanges: **[Class 250]<Insert class>**.
 - f. Suction Head Available at Pump: **<Insert ft. (m)>**.
 - g. Motor Horsepower: **<Insert value>**.
 - h. Motor Speed: **<Insert rpm>**.
 - i. Electrical Characteristics:
 - 1) Volts: **[120][208]<Insert value>**.
 - 2) Phases: **[Single][Three]**.
 - 3) Hertz: **[60]<Insert value>**.

- 4) Full-Load Amperes: **<Insert value>**.
- 5) Minimum Circuit Ampacity: **<Insert value>**.
- 6) Maximum Overcurrent Protection: **<Insert amperage>**.

- j. Pump-Start, Pressure-Switch Setting: **<Insert psig (kPa)>**.
- k. Pump-Stop, Pressure-Switch Setting: **<Insert psig (kPa)>**.

B. Pressure-Maintenance Pumps - Vertical Turbine:

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Armstrong Fluid Technology]**
 - b. **[Aurora Pump; Pentair Ltd.]**
 - c. **[Patterson Pump Company; a Gorman-Rupp company]**
 - d. **[Peerless Pump Company]**
 - e. **[Ruhrpumpen, Inc]**
 - f. **[Sulzer Pumps Inc.]**
 - g. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Armstrong Fluid Technology]**
 - b. **[Aurora Pump; Pentair Ltd.]**
 - c. **[Patterson Pump Company; a Gorman-Rupp company]**
 - d. **[Peerless Pump Company]**
 - e. **[Ruhrpumpen, Inc]**
 - f. **[Sulzer Pumps Inc.]**
 - g. **<Insert manufacturer's name>**
- 3. Source Limitations:
 - a. Obtain vertical-turbine, pressure-maintenance pump and driver from single manufacturer.
 - b. Equipment provider is to provide services of a factory-authorized service representative and have a service facility located within a **60-mile (100 km)** radius of Project site.
- 4. Description: Factory-fabricated, -assembled, and -tested, vertical, multistate, open-line-shaft turbine pressure-maintenance pump, as defined in HI 2.1-2.2 and HI 2.3; with pump motor mounted above pump head.
- 5. Pump Construction:
 - a. Pump Head: Cast iron, for surface discharge, with flange, except connections may be threaded in sizes in which flanges are not available.
 - b. Pump Head Seal: Stuffing box and stuffing.
 - c. Line Shaft and Bearings for Water-Lubricated Bearings: Static water levels of **50 ft. (15 m)** or less.
 - 1) Line Shaft: Stainless steel or steel, with corrosion-resistant shaft sleeves.
 - 2) Line Shaft Bearings: Rubber sleeve, water lubricated.
 - d. Line Shaft and Bearings for Oil-Lubricated Bearings: Static water levels between **50 and 200 ft. (15 and 61 m)**.

- 1) Line Shaft: Steel.
- 2) Line Shaft Bearings: Corrosion resistant, oil lubricated.
- e. Impeller Shaft: Monel metal or stainless steel.
- f. Bowl Section: Multiple cast-iron bowls with closed-type bronze or stainless-steel impellers.
- g. Column Pipe: ASTM A53/A53M, Schedule 40, galvanized-steel pipe with threaded ends and cast-iron or steel fittings, in sections **10 ft. (3 m)** or less, with strainer of cast or fabricated bronze or stainless steel at bottom.
6. Motor: Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors specified in Section 210500 "Common Work Results for Fire Suppression."
 - a. Motor Sizes: Minimum size as indicated; if not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
 - b. Description: Single speed with permanently lubricated ball bearings.
7. Base: Cast iron or steel with hole for electrical cable.
8. Nameplate: Permanently attached to pump and indicating capacity and characteristics.
9. Capacities and Characteristics:
 - a. Rated Capacity: **<Insert gpm (L/minute)>**.
 - b. Total Dynamic Head: **<Insert feet (kPa)>**.
 - c. Working Pressure: **<Insert psig (kPa)>**.
 - d. Inlet Column Size: **<Insert NPS (DN)>**.
 - e. Pump Column Length: **<Insert feet (m)>**.
 - f. Outlet Size: **<Insert NPS (DN)>**.
 - g. Flange: **[Class 125]<Insert class>**.
 - h. Suction Head Available at Pump: **<Insert feet (m)>**.
 - i. Motor Horsepower: **<Insert value>**.
 - j. Motor Speed: **<Insert rpm>**.
 - k. Electrical Characteristics:
 - 1) Volts: **[120][208]<Insert value>**.
 - 2) Phases: **[Single][Three]**.
 - 3) Hertz: **[60]<Insert value>**.
 - 4) Full-Load Amperes: **<Insert value>**.
 - 5) Minimum Circuit Ampacity: **<Insert value>**.
 - 6) Maximum Overcurrent Protection: **<Insert amperage>**.
 - l. Pump-Start, Pressure-Switch Setting: **<Insert psig (kPa)>**.
 - m. Pump-Stop, Pressure-Switch Setting: **<Insert psig (kPa)>**.

2.3 PRESSURE-MAINTENANCE PUMP CONTROLLERS

A. Pressure-Maintenance Pump Controller:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Eaton]**
 - b. **[Firetrol]**

- c. [Master Control Systems, Inc]
 - d. [Metron Eledyne; a Hubbell Company]
 - e. [Tornatech]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [Eaton]
 - b. [Firetrol]
 - c. [Master Control Systems, Inc]
 - d. [Metron Eledyne; a Hubbell Company]
 - e. [Tornatech]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain pressure-maintenance pump controllers from a single manufacturer.
4. Description:
- a. Type: UL 508A, factory-assembled, -wired, and -tested, across-the-line controller; for combined automatic and manual operation.
 - b. Enclosure: NEMA, Type 2 for wall mounting.
 - c. Finish: Manufacturer's standard color paint.
5. Standards:
- a. Listed in accordance with UL 508A.
 - b. <Insert standard>.
6. Rate controller for scheduled horsepower and include the following:
- a. Fusible disconnect switch.
 - b. Pressure switch.
 - c. Hand-off-auto selector switch.
 - d. Pilot light.
 - e. Running period timer.

2.4 GROUT

- A. Standard: ASTM C1107/C1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-cement grout.
- B. Characteristics: Nonshrink and recommended for interior and exterior applications.
- C. Design Mix: **5000 psi (34 MPa)**, 28-day compressive strength.
- D. Packaging: Premixed and factory packaged.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas, surface to receive equipment, equipment bases and anchorage provisions, with Installing Contractor(s), **[Architect][engineer][Construction Manager][and]** Manufacturer's Representative present, for compliance with requirements for installation tolerances, and other conditions affecting performance of the pressure-maintenance pump and pressure-maintenance pump controller.
- B. Examine roughing-in for fire-suppression piping systems to verify actual locations of piping connections before pressure-maintenance pump installation.
- C. Examine equipment before installation. Reject equipment that is wet or damaged by moisture or mold.
- D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PROTECTION OF PRESSURE-MAINTENANCE PUMP CONTROLLERS

- A. Replace pressure-maintenance pump controllers whose interiors have been exposed to water or other liquids prior to Substantial Completion.

3.3 INSTALLATION OF PRESSURE-MAINTENANCE PUMPS

- A. Comply with NFPA 20 for installation of pressure-maintenance pumps.
- B. Equipment Mounting:
 - 1. Install multistage pressure-maintenance pumps in accordance with HI 1.4.
 - 2. Install vertical-turbine, pressure-maintenance pumps in accordance with HI 2.4.
 - 3. Install base-mounted pumps on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
 - 4. Comply with requirements for vibration isolation and seismic control devices specified in Section 210548 "Vibration and Seismic Controls for Fire-Suppression Piping and Equipment" and Section 018123 "Facility Seismic and Wind Criteria."
 - 5. Comply with requirements for vibration isolation devices specified in Section 210548.13 "Vibration Controls for Fire-Suppression Piping and Equipment."
- C. Support piping and pumps separately, so weight of piping does not rest on pumps.
- D. Install isolation valves in both inlet and outlet pipes near the pump. Comply with requirements for valves specified in Section 211000 "Water-Based Fire-Suppression Systems."
- E. Install piping hangers and supports, anchors, valves, gauges, and equipment supports in accordance with NFPA 20 **[NFPA 13][and][NFPA 14]<Insert standard>**.
- F. Electrical Wiring: Install electrical devices furnished by equipment manufacturers but not factory mounted. Furnish copies of manufacturers' wiring diagram submittals to electrical Installer.

**3.4 PIPING CONNECTIONS**

- A. Comply with requirements for piping and valves specified in Section 211000 "Water-Based Fire-Suppression Systems." Drawings indicate general arrangement of piping, fittings, and specialties.
- B. Install piping adjacent to pumps and equipment to allow service and maintenance.
- C. Connect pressure-maintenance pumps to their controllers

3.5 INSTALLATION OF PRESSURE-MAINTENANCE-PUMP CONTROLLERS

- A. Coordinate installation of controllers with other construction, including conduit, piping, fire-pump equipment, and adjacent surfaces. Maintain required clearances for workspace and equipment access doors and panels. Ensure that controllers are within sight of pressure-maintenance-pump drivers.
- B. Connect controllers to their dedicated pressure-sensing lines.
- C. Wall-Mounting Controllers: Install controllers on walls with disconnect operating handles not higher than **79 inches (2 m)** above finished floor, and bottom of enclosure not less than **12 inches (305 mm)** above finished floor unless otherwise indicated. Bolt units to wall or mount on lightweight structural-steel channels bolted to wall. For controllers not on walls, provide freestanding racks complying with Section 260529 "Hangers and Supports for Electrical Systems."
- D. Seismic Bracing: Comply with requirements specified in Section 210548 "Vibration and Seismic Controls for Fire-Suppression Piping and Equipment" and Section 018123 "Facility Seismic and Wind Criteria."
- E. Installation of Power Wiring:
 - 1. Install power wiring between pressure-maintenance-pump controllers and their services or sources, and between pressure-maintenance-pump controllers and their drivers. Comply with requirements in NFPA 20, NFPA 70 (including Article 695, "Fire Pumps"), and Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
 - 2. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."
- F. Field-Acceptance Testing and Inspection.
 - 1. Acceptance Testing Preparation:
 - a. Inspect and Test Each Component:
 - 1) Inspect wiring, components, connections, and equipment installations. Test and adjust components and equipment.
 - 2) Test insulation resistance for each element, component, connecting supply, feeder, and control circuits.
 - 3) Test continuity of each circuit.
 - b. Verify and Test Each Electric-Drive Controller:
 - 1) Verify that voltages at controller locations are within 1 percent of motor nameplate rated voltages, with motors off. If outside this range for motor, notify **[Architect][Construction Manager][Owner]** before starting the motor(s).
 - 2) Test each motor for proper phase rotation.

- 3) Verify short-circuit current rating.
- c. Operational Test: After electrical circuitry has been energized, start units to confirm proper unit operation.
- d. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
2. Acceptance tests and inspections must be witnessed by **[Architect][Construction Manager][Owner][authorities having jurisdiction]<Insert names or titles of witnesses>**.
3. Acceptance Tests and Inspections:
 - a. Do not begin field-acceptance testing until suction piping has been flushed and hydrostatically tested and the certificate for flushing and testing has been submitted to **[Architect][Construction Manager][Owner]** and authorities having jurisdiction.
 - b. Prior to starting, notify authorities having jurisdiction of the time and place of the acceptance testing.
 - c. Engage manufacturer's factory-authorized service representative to be present during the testing.
 - d. Perform field-acceptance tests as outlined in NFPA 20.
4. Nonconforming Work:
 - a. Controllers will be considered defective if they do not pass tests and inspections.
 - b. Remove and replace defective units with new units and retest.
5. Prepare and submit field-acceptance testing and inspection reports.

3.6 STARTUP SERVICE FOR PRESSURE-MAINTENANCE PUMPS AND CONTROLLERS

- A. **[Engage a factory-authorized service representative to perform][Perform]** startup service.
 1. Complete installation and startup checks in accordance with manufacturer's written instructions.
 2. **<Insert startup steps>**.

3.7 ADJUSTING

- A. Adjust pressure-maintenance-pump controllers to function smoothly and as recommended by manufacturer.
- B. Set field-adjustable pressure switches, auxiliary relays, time-delay relays, and timers.
- C. Program microprocessors for required operational sequences, status indications, alarms, event recordings, and display features. Clear events memory after final acceptance testing and prior to Substantial Completion.
- D. Lubricate pumps as recommended by manufacturer.

3.8 FIELD QUALITY CONTROL

- A. Test each pressure-maintenance pump with its controller as a unit.

- B. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to perform tests and inspections.
- C. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
- D. Perform the following tests and inspections[**with the assistance of a factory-authorized service representative**]:
 - 1. After installing components, assemblies, and equipment, including controller, test for compliance with requirements.
 - 2. Test in accordance with NFPA 20 for acceptance and performance testing.
 - a. Prior to initial startup and acceptance testing, complete and check all electric wiring serving pressure-maintenance pump motor and interwiring, normal power, and alternate power.
 - b. Perform arc flash risk assessment for all electric pressure-maintenance pump controllers in accordance with NFPA 70E or other code required by authorities having jurisdiction.
 - c. Field label electric pressure-maintenance pump controllers for arc flash risk in accordance with NFPA 70E or other code required by authorities having jurisdiction.
 - 3. Leak Test: After installation, fill system and test for leaks. Repair leaks and retest until no leaks exist.
 - 4. Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation.
 - 5. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
- E. Components, assemblies, and equipment will be considered defective if they do not pass tests and inspections.
- F. Prepare test and inspection reports.

END OF SECTION 26 29 33 13A

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 31 00 00 - PHOTOVOLTAIC COLLECTORS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Manufactured PV units.
2. PV module framing.
3. PV array construction.
4. Inverters.
5. System overcurrent protection.
6. Mounting structures.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 DEFINITIONS

- A. CEC: California Energy Commission.
- B. ETFE: Ethylene tetrafluoroethylene.
- C. FEP: Fluorinated ethylene propylene.
- D. IP Code: Required ingress protection to comply with IEC 60529.
- E. MPPT: Maximum power point tracking.
- F. PTC: PVUSA Test Condition. Commonly regarded as a "real-world" measure of PV output. See below for definition of "PVUSA."
- G. PV: Photovoltaic.
- H. PVUSA: Photovoltaics for Utility Systems Applications.
- I. STC: Standard Test Conditions defined in IEC 61215.

1.3 ACTION SUBMITTALS

A. Product Data:

1. Manufactured PV units.
2. PV module framing.

3. PV array construction.
4. Inverters.
5. System overcurrent protection.
6. Mounting structures.

B. Shop Drawings: For PV modules.

1. Include plans, elevations, sections, and mounting details.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Detail fabrication and assembly.
4. Include diagrams for power, signal, and control wiring.

C. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturers' published instructions.

B. Field Reports:

1. Manufacturer's field reports for field quality-control support.

1.5 CLOSEOUT SUBMITTALS

A. Warranty documentation.

1.6 WARRANTY

A. Manufacturer's Special Warranty: Manufacturer agrees to repair or replace components of PV modules that fail in materials or workmanship within specified warranty period.

1. Manufacturer's materials and workmanship warranties include, but are not limited to, the following:

- a. Faulty operation of PV modules.
- b. **<Insert failure modes>**.

2. Warranty Period: **[Two][Five]<Insert number>** years from date of Substantial Completion.

B. Manufacturer's Special Minimum Power Output Warranty: Manufacturer agrees to repair or replace components of PV modules that fail to exhibit the minimum power output within specified warranty period. Special warranty, applying to modules only, applies to materials only, on a prorated basis, for period specified.

1. Manufacturer's minimum power output warranties include, but are not limited to, the following warranty periods, from date of Substantial Completion:
 - a. Specified minimum power output to **[80]<Insert number>** percent or more, for a period of **[25]<Insert number>** years.

- b. <Insert additional minimum power output special warranty>.

PART 2 - PRODUCTS

2.1 MANUFACTURED UNITS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

1. **[Aleo Solar]**
2. **[BP Solar USA]**
3. **[Canadian Solar]**
4. **[ET Solar]**
5. **[Evergreen Solar, Inc.]**
6. **[GE Solar; General Electric Company]**
7. **[Kaneka Corporation]**
8. **[Kyocera International, Inc.]**
9. **[Lumos Solar, LLC]**
10. **[Mitsubishi Electric US, Inc.]**
11. **[REC Solar US LLC]**
12. **[SANYO North America Corporation]**
13. **[Schott Solar]**
14. **[Sharp Electronics Corp.]**
15. **[Suniva]**
16. **[SunPower Corporation]**
17. **[Suntech Power]**
18. **[Trina Solar Limited]**
19. **[United Solar Ovonic LLC]**
20. **[Yingli Green Energy Holding Co., Ltd.]**
21. **<Insert manufacturer's name>**

- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[Aleo Solar]**
2. **[BP Solar USA]**
3. **[Canadian Solar]**
4. **[ET Solar]**
5. **[Evergreen Solar, Inc.]**
6. **[GE Solar; General Electric Company]**
7. **[Kaneka Corporation]**
8. **[Kyocera International, Inc.]**
9. **[Lumos Solar, LLC]**
10. **[Mitsubishi Electric US, Inc.]**
11. **[REC Solar US LLC]**
12. **[SANYO North America Corporation]**
13. **[Schott Solar]**
14. **[Sharp Electronics Corp.]**
15. **[Suniva]**
16. **[SunPower Corporation]**
17. **[Suntech Power]**
18. **[Trina Solar Limited]**
19. **[United Solar Ovonic LLC]**

20. [Yingli Green Energy Holding Co., Ltd.]
21. <Insert manufacturer's name>

2.2 PERFORMANCE REQUIREMENTS

- A. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Hazardous Locations: FM Global approved for NFPA 70, Class 1, Division 2, Group C and Group D.

2.3 PV CAPACITIES AND CHARACTERISTICS

A. Minimum Electrical Characteristics:

1. Rated Open-Circuit Voltage: <Insert V(dc)>.
2. Maximum System Voltage: <Insert V(dc)>.
3. Maximum Power at Voltage (Vpm): <Insert V(dc)>.
4. Short-Circuit Temperature Coefficient: <Insert mA/deg C>.
5. Rated Short-Circuit Current (Isc): <Insert amperes>.
6. Maximum System: <Insert V(dc)>.
7. Rated Operation Current (Imp): <Insert amperes>.
8. Maximum Power at STC (Pmax): <Insert watts>.

B. Additional Electrical Characteristics:

1. PTC Rating: <Insert watts>.
2. Peak Power per Unit Area: <Insert watts>.
3. Tolerance of Pmax: <Insert number> percent.
4. Minimum Peak Power: <Insert watts>.
5. Series Fuse Rating: <Insert amperes>.
6. Module Efficiency: <Insert number> percent.
7. Temperature Cycling Range: <Insert deg C>.
8. Humidity, Freeze, Damp Heat Condition: <Insert number> percent RH.
9. Wind Loading or Surface Pressure: <Insert lb/ft² (N/m²)>.
10. Maximum Distortion Angle: <Insert degrees>.
11. Hailstone Impact Withstand: <Insert inch (mm)> diameter at <Insert mile/h (km/h)> wind velocity.

C. Normal Operating Temperature Characteristics (NOTC):

1. Temperature at Nominal Operating Cell Temperature: <Insert deg C>.
2. Temperature Coefficient (NOTC Nominal Power): <Insert deg C>.
3. Temperature Coefficient (NOTC Open-Circuit Voltage): <Insert deg C>.
4. Temperature Coefficient (NOTC Short Circuit Current): <Insert deg C>.
5. Temperature Coefficient (NOTC Maximum Power Voltage): <Insert deg C>.
6. Temperature Coefficient (NOTC Maximum Power Current): <Insert deg C>.

2.4 PV SYSTEMS DESCRIPTION

- A. Interactive PV System: Collectors connected in parallel to the electrical utility; and capable of providing power for Project and supplying power to a distributed network.

1. A [six]<Insert number>-module array to generate a total nominal rated output of [1000 W]<Insert watts>.
 2. System Components:
 - a. PV modules.
 - b. Array frame.
 - c. Utility-interactive inverter.
 - d. Overcurrent protection, disconnect, and rapid shutdown devices.
 - e. Mounting structure.
 - f. Utility meter.
 - g. <Insert component>.
- B. Hybrid PV System: Collectors connected to provide power to DC and AC loads, connected to utility through interactive inverters or meters, and connected to energy storage.
1. A [six]<Insert number>-module array to generate a total nominal rated output of [1000 W]<Insert watts>.
 2. System Components:
 - a. PV modules.
 - b. Array frame.
 - c. Charge controller.
 - d. Energy storage.
 - e. System control.
 - f. [Inverter][Utility-interactive inverter].
 - g. Overcurrent protection, disconnect, and rapid shutdown devices.
 - h. Mounting structure.
 - i. [Meter][Utility-interactive meter].
 - j. <Insert component>.
- C. Stand-Alone PV System: Collectors connected to provide power to Project DC and AC loads through an energy storage system.
1. A [six]<Insert number>-module array to generate a total nominal rated output of [1000 W]<Insert watts>.
 2. System Components:
 - a. PV modules.
 - b. Array frame.
 - c. Charge controller.
 - d. Energy storage.
 - e. Inverter.
 - f. Overcurrent protection, disconnect, and rapid shutdown devices.
 - g. Mounting structure.

2.5 MANUFACTURED PV UNITS

- A. Cell Materials, Thin Film:
1. Amorphous silicon (a-Si).
 2. Micromorphous silicon (a-Si+uc-Si).
 3. Copper indium (di)selenide (CIS).
 4. Copper indium gallium (di)selenide (CIGS).
 5. Cadmium telluride (CdTe).
 6. Cadmium sulfide.

- B. Cell Materials, Wafer: **[Polycrystalline][Monocrystalline]**.
 - 1. c-Si.
 - 2. Gallium arsenide (GaAs).
- C. Module Construction:
 - 1. Nominal Size: **32 inch (800 mm)** wide by **64 inch (1600 mm)** long.
 - 2. Weight: **42.8 lb (19.4 kg)**.
- D. Insulating Substrate Film: **[Flexible][Rigid]**, **[polyester][polyimide]**.
- E. Conducting Substrate Film: **[Flexible][Rigid][Fluoropolymer]**, **[ETFE][FEP]**.
- F. Encapsulant: Ethyl vinyl acetate.
- G. Front Panel: **[Fully tempered glass][0.125 inch (3.2 mm) thick glass][Low iron glass][Antireflective coating glass][Laminating film][Laminating material]**.
- H. Backing Material: **[Tempered glass][0.125 inch (3.2 mm) thick glass][Polyester film][PVC film]**.
 - 1. Layers: **<Insert number>**.
 - 2. Color: **[White]<Insert color>**.
- I. Bypass Diode Protection: Internal.
- J. Junction Box:
 - 1. Size: **1.56-by-3.96-by-0.52 inch (39.6-by-100.6-by-13.2 mm)**.
 - 2. Fully potted, vandal resistant.
 - 3. IP Code: **[IP65][IP66][IP67]<Insert IP code designation>**.
 - 4. Flammability Test: UL 1703.
- K. Output Cabling:
 - 1. **[0.158 inch (4 mm)]<Insert dimension>**.
 - 2. Quick, multiconnect, polarized connectors.
 - 3. Two-Conductor Harness: No traditional return wire is needed from the end of a row back to the source combiner.
- L. Series Fuse Rating: **<Insert amperes>**.

2.6 PV MODULE FRAMING

- A. PV laminates mounted in anodized extruded-aluminum frames.
 - 1. Entire assembly UL listed for electrical and fire safety, **[Class A][Class C]**, according to UL 1703, and complying with IEC 61215.
 - 2. Frame strength exceeding requirements of certifying agencies in subparagraph above.
 - 3. Anodized Aluminum Finish: Alloy and temper recommended by framing manufacturer for strength, corrosion resistance, and application of required finish.
 - 4. High-performance Organic Finish: Manufacturer's standard two-coat, thermocured system consisting of specially formulated inhibitive primer and fluoropolymer color topcoat containing not

- less than 70 percent PVC resin by weight.
- 5. Baked-enamel finish.
- 6. Color: As indicated by manufacturer's designations.

2.7 PV ARRAY CONSTRUCTION

A. Framing:

- 1. Material: **[Extruded aluminum][Galvanized steel][Coated steel]**.
- 2. Maximum System Weight: Less than **4 lb/ft² (19.53 kg/m²)**.
- 3. Minimum Distance to Connectors: **<Insert inch (mm)>**.
- 4. Raceway Cover Plates: **[Plastic][Aluminum][Galvanized steel]**.

B. Flat-Roof Mounting:

- 1. No roof penetrations.
- 2. Self-ballasting.
- 3. Wind-tunnel tested to **110 mile/h (160 km/h)** wind.
- 4. Service Life: **[25]<Insert number>** years.
- 5. Freestanding system.

2.8 INVERTER

A. Inverter Type: **[Central][Microgrid]**.

B. Control Type: **[Pulse-width-modulation control][Maximum power point tracker control]**.

C. Inverter Electrical Characteristics:

- 1. Maximum Recommended PV Input Power: **<Insert kilowatts>**.
- 2. Maximum Open-Circuit Voltage: **<Insert V(dc)>**.
- 3. PV Start Voltage: **<Insert V(dc)>**.
- 4. MPPT Voltage Range: **<Insert V(dc)>**.
- 5. Maximum Input Current: **<Insert amperes>**.
- 6. Number of String Inputs: **<Insert number>**.
- 7. Number of Independent MPPT Circuits: **<Insert value>**.
- 8. Nominal Output Voltage: **<Insert V(dc)>**.
- 9. CEC Rated Power: **<Insert kilowatts>**.
- 10. Maximum Output Current: **<Insert amperes>**.
- 11. Peak Efficiency: **<Insert number>** percent.
- 12. CEC Weighted Efficiency: **<Insert number>** percent.
- 13. CEC Night Tare Loss: **<Insert watts>**.
- 14. DC/AC Terminal Range (AWG): **<Insert range of AWG values>**.
- 15. Communications Interface: **[TIA-485][TIA-232][Ethernet][Zigbee]<Insert type>**.
- 16. Utility Interface: Utility-interactive inverter.

D. Operating Conditions:

- 1. Operating Ambient Temperatures: **Minus 4 to plus 122 deg F (20 to plus 50 deg C)**.
- 2. Storage Temperature: **Minus 40 to plus 122 deg F (minus 40 to plus 50 deg C)**.
- 3. Relative Humidity: Zero to 95 percent, noncondensing.

E. Charge controllers must have the following:

1. Overcurrent protection.
2. Generator input breaker box.
3. Automatic transfer relay.
4. Digital display.
5. Transformer.
6. Disconnect switch.
7. Shunt controller.
8. Shunt regulator.
9. Surge overload protection.

F. Enclosure:

1. UL 50E[, **Type 3R**][, **Type 4X**].
2. Enclosure Material: [**Galvanized steel**][**Steel**].
3. Cooling Methods:
 - a. Fan convection cooling.
 - b. Passive cooling.
4. Protective Functions:
 - a. AC over/undervoltage.
 - b. AC over/underfrequency.
 - c. Ground overcurrent.
 - d. Overtemperature.
 - e. AC and DC overcurrent.
 - f. DC overvoltage.
5. Standard LCD, four lines, 20 characters, with user display and on/off toggle switch.

G. Disconnects: Rated for system voltage and conductor.

H. Regulatory Approvals:

1. IEEE 1547.1.
2. IEEE 1547.3.
3. UL 1741.

I. Characteristics:

1. Inverter Dimensions: **<Insert inch (mm)>**.
2. Inverter Weight: **<Insert lb (kg)>**.

2.9 SYSTEM OVERCURRENT PROTECTION

- A. Fuses: **<Insert amperes>**.
- B. Circuit Breakers: **<Insert amperes>**.

2.10 MOUNTING STRUCTURES

- A. Roof Mount: Extruded aluminum, **[two][four]** rails, tilt legs, and roof standoffs.

- B. Pole Mount: **[Top][Panel tops][Side]**.
- C. Tracking Mounts: **[One][Two]** axis.

2.11 SOURCE QUALITY CONTROL

- A. Product Data: Prepare and submit catalog cuts, brochures, **[diagrams,][schedules,]** and performance data illustrating size, physical appearance, and other characteristics of product.
 - 1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for PV panels.
 - 2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
 - 3. Sample Warranty: For manufacturer's special materials and workmanship warranty and minimum power output warranty.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine substrate areas and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.
- B. Do not begin installation until mounting surfaces have been properly prepared.
- C. If preparation of mounting surfaces is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding.
- D. Examine modules and array frame before installation. Reject modules and arrays that are wet, moisture damaged, or mold damaged.
- E. Examine roofs, supports, and supporting structures for suitable conditions where PV system will be installed.
- F. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

- A. Coordinate layout and installation of PV panels with **[roof][support]** assembly and other construction.
- B. Support PV panel assemblies independent of supports for other elements such as roof and support assemblies, enclosures, vents, pipes, and conduits. Support assembly to prevent twisting from eccentric loading.
- C. Install PV **[inverters,][energy storage,][charge controller,][rapid shutdown,][and][system control]** in locations indicated on Drawings.
- D. Install weatherseal fittings and flanges where PV panel assemblies penetrate exterior elements such as walls or roofs. Seal around openings to make weathertight. See Section 079200 "Joint Sealants" for materials and application.

- E. Seismic Restraints: Comply with requirements for seismic-restraint devices specified in Section 260548.16 "Seismic Controls for Electric Systems."
- F. Wiring Method: Install cables in raceways.
- G. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.

3.3 CONNECTIONS

- A. Coordinate PV panel cabling to equipment enclosures to ensure proper connections.
- B. Coordinate installation of utility-interactive meter with utility.
- C. Tighten electrical connectors and terminals according to manufacturer's published torque-tightening values. If manufacturer's torque values are not indicated, use those specified in UL 486A-486B.
- D. Make splices, terminations, and taps that are compatible with conductor material[**and that possess equivalent or better mechanical strength and insulation ratings than unspliced conductors**].

END OF SECTION 26 31 00 00

Task	Specification	Specification Description
26 32 13 00	26 32 13 19	Bi-Fuel-Engine-Driven Generator Sets

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 32 13 13 - DIESEL-ENGINE-DRIVEN GENERATOR SETS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Diesel-engine-driven generator sets.
2. Diesel engine.
3. Diesel fuel-oil system.
4. Control and monitoring.
5. Generator overcurrent and fault protection.
6. Generator, exciter, and voltage regulator.
7. Load bank.
8. Outdoor engine generator enclosure.
9. Remote radiator motors.
10. Vibration isolation devices.

B. Related Requirements:

1. Section 262313 "Paralleling Low-Voltage Switchgear" for controls and paralleling equipment for large or multiple parallel engine generators.
2. Section 263343 "Battery Chargers" for remote engine battery chargers.
3. Section 263600 "Transfer Switches" for transfer switches including sensors and relays to initiate automatic-starting and -stopping signals for engine generators.

1.2 DEFINITIONS

- A. EPS: Emergency power supply.
- B. EPSS: Emergency power supply system.
- C. Operational Bandwidth: The total variation from the lowest to highest value of a parameter over the range of conditions indicated, expressed as a percentage of the nominal value of the parameter.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
2. Include thermal damage curve for generator.
3. Include time-current characteristic curves for generator protective device.
4. Include fuel consumption in **gallons per hour (liters per hour)** at 0.8 power factor at 0.5, 0.75, and 1.0 times generator capacity.
5. Include generator efficiency at 0.8 power factor at 0.5, 0.75, and 1.0 times generator capacity.
6. Include airflow requirements for cooling and combustion air in **cubic feet per minute (cubic meters per minute)** at 0.8 power factor, with air-supply temperature of **95, 80, 70, and 50 deg F (35, 27, 21, and 10 deg C)**. Provide Drawings indicating requirements and limitations for location

- of air intake and exhausts.
7. Include generator characteristics, including, but not limited to, kilowatt rating, efficiency, reactances, and short-circuit current capability.

B. Shop Drawings:

1. Include plans and elevations for engine generator and other components specified. Indicate access requirements affected by height of subbase fuel tank.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Identify fluid drain ports and clearance requirements for proper fluid drain.
4. Design calculations for selecting vibration isolators and seismic restraints and for designing vibration isolation bases.
5. Vibration Isolation Base Details: Detail fabrication including anchorages and attachments to structure and to supported equipment. Include base weights.
6. Include diagrams for power, signal, and control wiring. Complete schematic, wiring, and interconnection diagrams showing terminal markings for engine generators and functional relationship between all electrical components.

1.4 INFORMATIONAL SUBMITTALS

A. Qualification Data: For **[Installer][manufacturer][and][testing agency]**.

B. Seismic Qualification Data: Certificates, for engine generator, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: With engine and generator mounted on rails, identify center of gravity and total weight[, **including full fuel tank**], **[supplied enclosure,][external silencer,][subbase-mounted fuel tank,][skid-mounted load bank,]** and each piece of equipment not integral to the engine generator, and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

C. Source Quality-Control Reports: Including, but not limited to, the following:

1. Certified summary of prototype-unit test report.
2. Certified Test Reports: For components and accessories that are equivalent, but not identical, to those tested on prototype unit.
3. Certified Summary of Performance Tests: Certify compliance with specified requirement to meet performance criteria for sensitive loads.
4. Report of factory test on units to be shipped for this Project, showing evidence of compliance with specified requirements.
5. Report of sound generation.
6. Report of exhaust emissions showing compliance with applicable regulations.
7. Certified Torsional Vibration Compatibility: Comply with NFPA 110.

D. Field quality-control reports.

E. Warranty: For special warranty.

1.5 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For packaged engine generators to include in emergency, operation, and maintenance manuals.
 - 1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:
 - a. List of tools and replacement items recommended to be stored at Project for ready access. Include part and drawing numbers, current unit prices, and source of supply.
 - b. Operating instructions laminated and mounted adjacent to generator location.
 - c. Training plan.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Fuses: One for every 10 of each type and rating, but no fewer than one of each.
 - 2. Indicator Lamps: Two for every six of each type used, but no fewer than two of each.
 - 3. Filters: One set each of lubricating oil, fuel, and combustion-air filters.
 - 4. Tools: Each tool listed by part number in operations and maintenance manual.

1.7 QUALITY ASSURANCE

- A. Installer Qualifications: An authorized representative who is trained and approved by manufacturer.
- B. Testing Agency Qualifications: Accredited by NETA.
 - 1. Testing Agency's Field Supervisor: Certified by NETA to supervise on-site testing.

1.8 WARRANTY

- A. Manufacturer's Warranty: Manufacturer agrees to repair or replace components of packaged engine generators and associated auxiliary components that fail in materials or workmanship within specified warranty period.
 - 1. Warranty Period: <Insert number> years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 DIESEL-ENGINE-DRIVEN GENERATOR SETS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[Caterpillar, Inc.; Electric Power Division]**
 - 2. **[Cummins Power Generation]**
 - 3. **[Generac]**

4. [Hipower Systems]
5. [Kohler Power Systems]
6. [Rolls-Royce Solutions America Inc.]
7. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [Caterpillar, Inc.; Electric Power Division]
2. [Cummins Power Generation]
3. [Generac]
4. [Hipower Systems]
5. [Kohler Power Systems]
6. [Rolls-Royce Solutions America Inc.]
7. <Insert manufacturer's name>

C. Source Limitations: Obtain packaged engine generators and auxiliary components from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Seismic Performance: Engine generator housing, [subbase fuel tank,][day tank,] engine generator, batteries, battery racks, silencers, [load banks,] sound attenuating equipment, accessories, and components shall withstand the effects of earthquake motions determined according to [ASCE/SEI 7]<Insert requirement>.

1. The term "withstand" means "the unit will remain in place without separation of any parts when subjected to the seismic forces specified[and the unit will be fully operational after the seismic event]."
2. Shake-table testing shall comply with ICC-ES AC156. Testing shall be performed with all fluids at worst-case normal levels.[Water shall be substituted for diesel fuel in fuel tank during test.]
3. Component Importance Factor: [1.5][1.0].

B. B11 Compliance: Comply with B11.19.

C. NFPA Compliance:

1. Comply with NFPA 37.
2. Comply with NFPA 70.
3. Comply with NFPA 99.
4. Comply with NFPA 110 requirements for Level [1][2] EPSS.

D. UL Compliance: Comply with UL 2200.

E. Engine Exhaust Emissions: Comply with EPA Tier [2][3][4] requirements and applicable state and local government requirements.

F. Noise Emission: Comply with [applicable state and local government requirements]<Insert Project criteria> for maximum noise level at [adjacent property boundaries]<Insert critical locations> due to sound emitted by engine generator including engine, engine exhaust, engine cooling-air intake and discharge, and other components of installation.

G. Environmental Conditions: Engine generator system shall withstand the following environmental conditions without mechanical or electrical damage or degradation of performance capability:

1. Ambient Temperature: [41 to 104 deg F (5 to 40 deg C)][5 to 104 deg F (Minus 15 to plus 40 deg C)].
 2. Relative Humidity: Zero to 95 percent.
 3. Altitude: Sea level to [1000 feet (300 m)]<Insert altitude>.
- H. Unusual Service Conditions: Engine generator equipment and installation are required to operate under the following conditions:
1. [High salt-dust content in the air due to sea-spray evaporation]<Insert unusual condition>.

2.3 ENGINE GENERATOR ASSEMBLY DESCRIPTION

- A. Factory-assembled and -tested, water-cooled engine, with brushless generator and accessories.
- B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and use.
- C. Power Rating: [Prime][Industrial][Standby].
- D. Overload Capacity: 110 percent of service load for 1 hour in 12 consecutive hours.
- E. EPSS Class: Engine generator shall be classified as a [Class 2][Class 6][Class 48][Class 96]<Insert classification> according to NFPA 110.
- F. Service Load: <Insert number> kVA.
- G. Power Factor: [0.8]<Insert number>, lagging.
- H. Frequency: 60 Hz.
- I. Voltage: [208][240][480][600][4160]-V ac.
- J. Phase: Three-phase, [three][four] wire, [wye][delta].
- K. Induction Method: [Naturally aspirated][Turbocharged].
- L. Governor: Adjustable isochronous, with speed sensing.
- M. Mounting Frame: Structural steel framework to maintain alignment of mounted components without depending on concrete foundation. Provide lifting attachments sized and spaced to prevent deflection of base during lifting and moving.
 1. Rigging Diagram: Inscribed on metal plate permanently attached to mounting frame to indicate location and lifting capacity of each lifting attachment and engine generator center of gravity.
- N. Capacities and Characteristics:
 1. Power Output Ratings: Nominal ratings as indicated at 0.8 power factor excluding power required for the continued and repeated operation of the unit and auxiliaries[, with capacity as required to operate as a unit as evidenced by records of prototype testing].
 2. Nameplates: For each major system component to identify manufacturer's name and address, and model and serial number of component.
- O. Engine Generator Performance:

1. Steady-State Voltage Operational Bandwidth: 3 percent of rated output voltage from no load to full load.
2. Transient Voltage Performance: Not more than 20 percent variation for 50 percent step-load increase or decrease. Voltage shall recover and remain within the steady-state operating band within three seconds.
3. Steady-State Frequency Operational Bandwidth: 0.5 percent of rated frequency from no load to full load.
4. Steady-State Frequency Stability: When system is operating at any constant load within the rated load, there shall be no random speed variations outside the steady-state operational band and no hunting or surging of speed.
5. Transient Frequency Performance: Less than 5 percent variation for 50 percent step-load increase or decrease. Frequency shall recover and remain within the steady-state operating band within five seconds.
6. Output Waveform: At no load, harmonic content measured line to line or line to neutral shall not exceed 5 percent total and 3 percent for single harmonics. Telephone influence factor, determined according to NEMA MG 1, shall not exceed 50 percent.
7. Sustained Short-Circuit Current: For a three-phase, bolted short circuit at system output terminals, system shall supply a minimum of 250 percent of rated full-load current for not less than 10 seconds and then clear the fault automatically, without damage to generator system components.
8. Start Time:
 - a. Comply with NFPA 110, [Type U][Type 10] system requirements.
 - b. [10]<Insert number> seconds.

P. Engine Generator Performance for Sensitive Loads:

1. Oversizing generator compared with the rated power output of the engine is permissible to meet specified performance.
 - a. Nameplate Data for Oversized Generator: Show ratings required by the Contract Documents rather than ratings that would normally be applied to generator size installed.
2. Steady-State Voltage Operational Bandwidth: 1 percent of rated output voltage from no load to full load.
3. Transient Voltage Performance: Not more than 10 percent variation for 50 percent step-load increase or decrease. Voltage shall recover and remain within the steady-state operating band within 0.5 second.
4. Steady-State Frequency Operational Bandwidth: Plus or minus 0.25 percent of rated frequency from no load to full load.
5. Steady-State Frequency Stability: When system is operating at any constant load within the rated load, there shall be no random speed variations outside the steady-state operational band and no hunting or surging of speed.
6. Transient Frequency Performance: Less than 2-Hz variation for 50 percent step-load increase or decrease. Frequency shall recover and remain within the steady-state operating band within three seconds.
7. Output Waveform: At no load, harmonic content measured line to neutral shall not exceed 2 percent total with no slot ripple. Telephone influence factor, determined according to NEMA MG 1, shall not exceed 50 percent.
8. Sustained Short-Circuit Current: For a three-phase, bolted short circuit at system output terminals, system shall supply a minimum of 300 percent of rated full-load current for not less than 10 seconds and then clear the fault automatically, without damage to winding insulation or other generator system components.
9. Excitation System: Performance shall be unaffected by voltage distortion caused by nonlinear load.

- a. Provide permanent magnet excitation for power source to voltage regulator.
- 10. Start Time:
 - a. Comply with NFPA 110, [Type U][Type 10] system requirements.
 - b. [10]<Insert number> seconds.

Q. Parallel Engine Generators:

- 1. Automatic reactive output power control and load sharing between engine generators operated in parallel.
- 2. Automatic regulation, automatic connection to a common bus, and automatic synchronization, with manual controls and instruments to monitor and control paralleling functions.
- 3. Protective relays required for equipment and personnel safety.
- 4. Paralleling suppressors to protect excitation systems.
- 5. Reverse power protection.
- 6. Loss of field protection.

2.4 DIESEL ENGINE

A. Fuel: ASTM D975, diesel fuel oil, Grade 2-D S15.

- 1. <Insert specific fuel grade requirements>.

B. Rated Engine Speed: 1800 rpm.

C. Lubrication System: Engine or skid-mounted.

- 1. Filter and Strainer: Rated to remove 90 percent of particles 5 micrometers and smaller while passing full flow.
- 2. Thermostatic Control Valve: Control flow in system to maintain optimum oil temperature. Unit shall be capable of full flow and is designed to be fail-safe.
- 3. Crankcase Drain: Arranged for complete gravity drainage to an easily removable container with no disassembly and without use of pumps, siphons, special tools, or appliances.

D. Jacket Coolant Heater: Electric-immersion type, factory installed in coolant jacket system. Comply with UL 499[and with NFPA 110 requirements for Level 1 equipment for heater capacity].

E. Integral Cooling System: Closed loop, liquid cooled, with radiator factory mounted on engine generator set mounting frame and integral engine-driven coolant pump.

- 1. Coolant: Solution of 50 percent ethylene-glycol-based antifreeze and 50 percent water, with anticorrosion additives as recommended by engine manufacturer.
- 2. Size of Radiator: Adequate to contain expansion of total system coolant from cold start to 110 percent load condition.
- 3. Expansion Tank: Constructed of welded steel plate and rated to withstand maximum closed-loop coolant system pressure for engine used. Equip with gage glass and petcock.
- 4. Temperature Control: Self-contained, thermostatic-control valve modulates coolant flow automatically to maintain optimum constant coolant temperature as recommended by engine manufacturer.
- 5. Coolant Hose: Flexible assembly with inside surface of nonporous rubber and outer covering of aging-, UV-, and abrasion-resistant fabric.
 - a. Rating: 50-psig (345-kPa) maximum working pressure with coolant at 180 deg F (82 deg C), and noncollapsible under vacuum.

- b. End Fittings: Flanges or steel pipe nipples with clamps to suit piping and equipment connections.
- F. Remote Cooling System: Closed loop, liquid cooled, with remote radiator and **[integral engine driven][auxiliary]** coolant pump. Comply with requirements in Section 232113 "Hydronic Piping" for coolant piping.
1. Configuration: **[Vertical][Horizontal]** air discharge.
 2. Radiator Core Tubes: **[Aluminum][Nonferrous-metal construction other than aluminum]**.
 3. Size of Radiator: Adequate to contain expansion of total system coolant from cold start to 110 percent load condition.
 4. Expansion Tank: Constructed of welded steel plate and rated to withstand maximum closed-loop coolant system pressure for engine used. Equip with gage glass and petcock.
 5. Fan: Driven by **[multiple belts from engine shaft][totally enclosed electric motor with sealed bearings]**.
 6. Coolant: Solution of 50 percent ethylene-glycol-based antifreeze and 50 percent water, with anticorrosion additives as recommended by engine manufacturer.
 7. Temperature Control: Self-contained, thermostatic-control valve modulates coolant flow automatically to maintain optimum constant coolant temperature as recommended by engine manufacturer.
- G. Muffler/Silencer:
1. Critical type, sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
 - a. Minimum sound attenuation of 25 dB at 500 Hz.
 - b. Sound level measured at a distance of **25 feet (8 m)** from exhaust discharge after installation is complete shall be **[78]<Insert number>** dBA or less.
 2. Semicritical type, sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
 - a. Minimum sound attenuation of 18 dB at 500 Hz.
 - b. Sound level measured at a distance of **25 feet (8 m)** from exhaust discharge after installation is complete shall be **[85]<Insert number>** dBA or less.
 3. Commercial type, sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
 - a. Minimum sound attenuation of 12 dB at 500 Hz.
 - b. Sound level measured at a distance of **25 feet (8 m)** from exhaust discharge after installation is complete shall be **[90]<Insert number>** dBA or less.
- H. Air-Intake Filter: **[Standard][Heavy]**-duty, engine-mounted air cleaner with replaceable dry-filter element and "blocked filter" indicator.
- I. Starting System: **[12][24]**-V electric, with negative ground.
1. Components: Sized so they are not damaged during a full engine-cranking cycle with ambient temperature at maximum specified in "Performance Requirements" Article.
 2. Cranking Motor: Heavy-duty unit that automatically engages and releases from engine flywheel without binding.
 3. Cranking Cycle: **[As required by NFPA 110 for system level specified][60 seconds]**.
 4. Battery: **[Lead acid][Nickel cadmium]**, with capacity within ambient temperature range specified

- in "Performance Requirements" Article to provide specified cranking cycle at least **[twice][three times]** without recharging.
5. Battery Cable: Size as recommended by engine manufacturer for cable length indicated. Include required interconnecting conductors and connection accessories.
 6. Battery Compartment: Factory fabricated of metal with acid-resistant finish and thermal insulation. Thermostatically controlled heater shall be arranged to maintain battery above **50 deg F (10 deg C)** regardless of external ambient temperature within range specified in "Performance Requirements" Article. Include accessories required to support and fasten batteries in place. Provide ventilation to exhaust battery gases.
 7. Battery Stand: Factory-fabricated, two-tier metal with acid-resistant finish designed to hold the quantity of battery cells required and to maintain the arrangement to minimize lengths of battery interconnections.
 8. Battery-Charging Alternator: Factory mounted on engine with solid-state voltage regulation and 35-A minimum continuous rating.
 9. Battery Charger: Current-limiting, automatic-equalizing, and float-charging type designed for **[lead-acid][nickel-cadmium]** batteries. Unit shall comply with UL 1236 and include the following features:
 - a. Operation: Equalizing-charging rate of 10 A shall be initiated automatically after battery has lost charge until an adjustable equalizing voltage is achieved at battery terminals. Unit shall then be automatically switched to a lower float-charging mode and shall continue to operate in that mode until battery is discharged again.
 - b. Automatic Temperature Compensation: Adjust float and equalize voltages for variations in ambient temperature from **minus 40 to 140 deg F (minus 40 to plus 60 deg C)** to prevent overcharging at high temperatures and undercharging at low temperatures.
 - c. Automatic Voltage Regulation: Maintain constant output voltage regardless of input voltage variations up to plus or minus 10 percent.
 - d. Ammeter and Voltmeter: Flush mounted in door. Meters shall indicate charging rates.
 - e. Safety Functions: Sense abnormally low battery voltage and close contacts providing low battery voltage indication on control and monitoring panel. Sense high battery voltage and loss of ac input or dc output of battery charger. Either condition shall close contacts that provide a battery-charger malfunction indication at system control and monitoring panel.
 - f. Enclosure and Mounting: NEMA 250, Type 1, wall-mounted cabinet.

2.5 DIESEL FUEL-OIL SYSTEM

- A. Comply with NFPA 37.
- B. Piping: Fuel-oil piping shall be Schedule 40 black steel, complying with requirements in Section 231113 "Facility Fuel-Oil Piping." Cast iron, aluminum, copper, and galvanized steel shall not be used in the fuel-oil system.
- C. Main Fuel Pump: Mounted on engine to provide primary fuel flow under starting and load conditions.
- D. Fuel Filtering: Remove water and contaminants larger than 1 micron.
- E. Relief-Bypass Valve: Automatically regulates pressure in fuel line and returns excess fuel to source.
- F. Fuel-Oil Storage Tank: Comply with requirements in **[Section 231313 "Facility Underground Fuel-Oil Storage Tanks."]****[Section 231323 "Facility Aboveground Fuel-Oil Storage Tanks."]**
 1. Fuel Tank Capacity: **[Minimum 133 percent of total fuel required for periodic maintenance operations between fuel refills plus fuel for the hours of continuous operation required for the indicated EPSS Class.]****[As recommended by engine manufacturer for an uninterrupted period of 8 hours' operation at 100 percent of rated power output of engine generator**

system without being refilled]<Insert gallons (liters)>.

2. Duplex Fuel-Oil Transfer Pump: Comply with requirements in Section 231213 "Facility Fuel-Oil Pumps."

G. Day Tank: Comply with UL 142, freestanding, factory-fabricated fuel tank assembly, with integral, float-controlled transfer pump and the following features:

1. Containment: Integral rupture basin with a capacity of 150 percent of nominal capacity of day tank.
 - a. Leak Detector: Locate in rupture basin and connect to provide audible and visual alarm in the event of day-tank leak.
2. Tank Capacity: **[As recommended by engine manufacturer for an uninterrupted period of 4 hours' operation at 100 percent of rated power output of engine generator system without being refilled]<Insert gallons (liters)>.**
3. Pump Capacity: Exceeds maximum flow of fuel drawn by engine-mounted fuel supply pump at 110 percent of rated capacity, including fuel returned from engine.
4. Low-Level Alarm Sensor: Liquid-level device operates alarm contacts at 25 percent of normal fuel level.
5. High-Level Alarm Sensor: Liquid-level device operates alarm and redundant fuel shutoff contacts at midpoint between overflow level and 100 percent of normal fuel level.
6. Piping Connections: Factory-installed fuel supply and return lines from tank to engine; local fuel fill, vent line, overflow line; and tank drain line with shutoff valve.
7. Redundant High-Level Fuel Shutoff: Actuated by high-level alarm sensor in day tank to operate a separate motor-control device that disconnects day-tank pump motor. Sensor shall signal solenoid valve, located in fuel suction line between fuel storage tank and day tank, to close. Both actions shall remain in shutoff state until manually reset. Shutoff action shall initiate an alarm signal to control panel but shall not shut down engine generator.

H. Subbase-Mounted, Double-Wall, Fuel-Oil Tank: Factory installed and piped, complying with UL 142 fuel-oil tank. Features include the following:

1. Tank level indicator.
2. Fuel-Tank Capacity: Minimum 133 percent of total fuel required for planned operation plus fuel for periodic maintenance operations between fuel refills.
3. Leak detection in interstitial space.
4. Vandal-resistant fill cap.
5. Containment Provisions: Comply with requirements of authorities having jurisdiction.

2.6 CONTROL AND MONITORING

- A. Automatic Starting System Sequence of Operation: When mode-selector switch on the control and monitoring panel is in the automatic position, remote-control contacts in one or more separate automatic transfer switches initiate starting and stopping of engine generator. When mode-selector switch is switched to the on position, engine generator starts. The off position of same switch initiates engine generator shutdown. When engine generator is running, specified system or equipment failures or derangements automatically shut down engine generator and initiate alarms.
- B. Manual Starting System Sequence of Operation: Switching on-off switch on the generator control panel to the on position starts engine generator. The off position of same switch initiates engine generator shutdown. When engine generator is running, specified system or equipment failures or derangements automatically shut down engine generator and initiate alarms.

- C. Provide minimum run time control set for **[15][30]<Insert number>** minutes with override only by operation of a remote emergency-stop switch.
- D. Comply with UL 508A.
- E. Configuration:
 - 1. Operating and safety indications, protective devices, basic system controls, and engine gages shall be grouped in a common control and monitoring panel mounted on the engine generator. Mounting method shall isolate the control panel from engine generator vibration. Panel shall be powered from the engine generator battery.
 - 2. Operating and safety indications, protective devices, basic system controls, and engine gages shall be grouped in a common wall-mounted control and monitoring panel. Panel shall be powered from the engine generator battery.
 - 3. Operating and safety indications, protective devices, basic system controls, engine gages, instrument transformers, generator disconnect switch or circuit breaker, and other indicated components shall be grouped in a combination control and power panel. Control and monitoring section of panel shall be isolated from power sections by steel barriers. Panel shall be powered from the engine generator battery. Panel features shall include the following:
 - a. Wall-Mounting Cabinet Construction: Rigid, self-supporting steel unit complying with NEMA ICS 6.
 - b. Switchboard Construction: Freestanding unit complying with Section 262413 "Switchboards." Power bus shall be copper. Bus, bus supports, control wiring, and temperature rise shall comply with UL 891.
 - c. Switchgear Construction: Freestanding unit complying with Section 262300 "Low-Voltage Switchgear."
- F. Control and Monitoring Panel:
 - 1. Digital engine generator controller with integrated LCD display, controls, and microprocessor, capable of local and remote control, monitoring, and programming, with battery backup.
 - 2. Analog control panel with dedicated gages and indicator lights for the instruments and alarms indicated below.
 - 3. Instruments: Located on the control and monitoring panel and viewable during operation.
 - a. Engine lubricating-oil pressure gage.
 - b. Engine-coolant temperature gage.
 - c. DC voltmeter (alternator battery charging).
 - d. Running-time meter.
 - e. AC voltmeter, **[for each phase][connected to a phase selector switch]**.
 - f. AC ammeter, **[for each phase][connected to a phase selector switch]**.
 - g. AC frequency meter.
 - h. Generator-voltage adjusting rheostat.
 - 4. Controls and Protective Devices: Controls, shutdown devices, and common alarm indication, including the following:
 - a. Cranking control equipment.
 - b. Run-Off-Auto switch.
 - c. Control switch not in automatic position alarm.
 - d. Overcrank alarm.
 - e. Overcrank shutdown device.
 - f. Low-water temperature alarm.
 - g. High engine temperature prealarm.
 - h. High engine temperature.

- i. High engine temperature shutdown device.
 - j. Overspeed alarm.
 - k. Overspeed shutdown device.
 - l. Low fuel main tank.
- 1) Low-fuel-level alarm shall be initiated when the level falls below that required for operation for duration required **[for the indicated EPSS class][in "Fuel Tank Capacity" Subparagraph in "Diesel Fuel-Oil System" Article]**.
- m. Coolant low-level alarm.
 - n. Coolant low-level shutdown device.
 - o. Coolant high-temperature prealarm.
 - p. Coolant high-temperature alarm.
 - q. Coolant low-temperature alarm.
 - r. Coolant high-temperature shutdown device.
 - s. EPS load indicator.
 - t. Battery high-voltage alarm.
 - u. Low cranking voltage alarm.
 - v. Battery-charger malfunction alarm.
 - w. Battery low-voltage alarm.
 - x. Lamp test.
 - y. Contacts for local and remote common alarm.
 - z. Low-starting air pressure alarm.
 - aa. Low-starting hydraulic pressure alarm.
 - bb. Remote manual stop shutdown device.
 - cc. Air shutdown damper alarm when used.
 - dd. Air shutdown damper shutdown device when used.
 - ee. Generator overcurrent-protective-device not-closed alarm.
 - ff. Hours of operation.
 - gg. Engine generator metering, including voltage, current, hertz, kilowatt, kilovolt ampere, and power factor.
- G. Engine Generator Metering: Comply with **[Section 260913 "Electrical Power Monitoring and Control."][Section 262713 "Electricity Metering."][Section 260913 "Electrical Power Monitoring and Control" and Section 262713 "Electricity Metering."]**
- H. Connection to Datalink:
- 1. A separate terminal block, factory wired to Form C dry contacts, for each alarm and status indication.
 - 2. Provide connections for datalink transmission of indications to remote data terminals via **[ModBus][LonWorks][Ethernet]<Insert data protocol>**. Data system connections to terminals are covered in Section 260913 "Electrical Power Monitoring and Control."
- I. Common Remote Panel with Common Audible Alarm: Include necessary contacts and terminals in control and monitoring panel. Remote panel shall be powered from the engine generator battery.
- J. Remote Alarm Annunciator: An LED indicator light labeled with proper alarm conditions shall identify each alarm event, and a common audible signal shall sound for each alarm condition. Silencing switch in face of panel shall silence signal without altering visual indication. Connect so that after an alarm is silenced, clearing of initiating condition will reactivate alarm until silencing switch is reset. Cabinet and faceplate are surface- or flush-mounting type to suit mounting conditions indicated.
- 1. Overcrank alarm.
 - 2. Low water-temperature alarm.

3. High engine temperature prealarm.
 4. High engine temperature alarm.
 5. Low lube oil pressure alarm.
 6. Overspeed alarm.
 7. Low fuel main tank alarm.
 8. Low coolant level alarm.
 9. Low cranking voltage alarm.
 10. Contacts for local and remote common alarm.
 11. Audible-alarm silencing switch.
 12. Air shutdown damper when used.
 13. Run-Off-Auto switch.
 14. Control switch not in automatic position alarm.
 15. Fuel tank derangement alarm.
 16. Fuel tank high-level shutdown of fuel supply alarm.
 17. Lamp test.
 18. Low-cranking voltage alarm.
 19. Generator overcurrent-protective-device not-closed alarm.
- K. Supporting Items: Include sensors, transducers, terminals, relays, and other devices and include wiring required to support specified items. Locate sensors and other supporting items on engine or generator unless otherwise indicated.
- L. Remote Emergency-Stop Switch: Flush; wall mounted unless otherwise indicated; and labeled. Push button shall be protected from accidental operation.

2.7 GENERATOR OVERCURRENT AND FAULT PROTECTION

- A. Overcurrent protective devices shall be coordinated to optimize selective tripping when a short circuit occurs.
1. Overcurrent protective devices for the entire EPSS shall be coordinated to optimize selective tripping when a short circuit occurs. Coordination of protective devices shall consider both utility and EPSS as the voltage source.
 2. Overcurrent protective devices for the EPSS shall be accessible only to authorized personnel.
- B. Generator Overcurrent Protective Device:
1. Molded-case circuit breaker, thermal-magnetic type; 100 percent rated; complying with UL 489:
 - a. Tripping Characteristic: Designed specifically for generator protection.
 - b. Trip Rating: Matched to generator output rating.
 - c. Shunt Trip: Connected to trip breaker when engine generator is shut down by other protective devices.
 - d. Mounting: Adjacent to, or integrated with, control and monitoring panel.
 2. Molded-case circuit breaker, electronic-trip type; 100 percent rated; complying with UL 489:
 - a. Tripping Characteristics: Adjustable long-time and short-time delay and instantaneous.
 - b. Trip Settings: Selected to coordinate with generator thermal damage curve.
 - c. Shunt Trip: Connected to trip breaker when engine generator is shut down by other protective devices.
 - d. Mounting: Adjacent to, or integrated with, control and monitoring panel.
 3. Insulated-case circuit breaker, electronic-trip type; 100 percent rated; complying with UL 489:

- a. Tripping Characteristics: Adjustable long-time and short-time delay and instantaneous.
- b. Trip Settings: Selected to coordinate with generator thermal damage curve.
- c. Shunt Trip: Connected to trip breaker when engine generator is shut down by other protective devices.
- d. Mounting: Adjacent to, or integrated with, control and monitoring panel.

4. Molded-case type disconnect switch; 100 percent rated:

- a. Trip Rating: Matched to generator output rating.
- b. Shunt Trip: Connected to trip switch when signaled by generator protector or by other protective devices.

C. Generator Protector: Microprocessor-based unit shall continuously monitor current level in each phase of generator output, integrate generator heating effect over time, and predict when thermal damage of alternator will occur. When signaled by generator protector or other engine generator protective devices, a shunt-trip device in the generator disconnect switch shall open the switch to disconnect the generator from load circuits. Protector performs the following functions:

- 1. Initiates a generator overload alarm when generator has operated at an overload equivalent to 110 percent of full-rated load for 60 seconds. Indication for this alarm is integrated with other engine generator malfunction alarms. Contacts shall be available for load shed functions.
- 2. Under single- or three-phase fault conditions, regulates generator to 300 percent of rated full-load current for up to 10 seconds.
- 3. As overcurrent heating effect on the generator approaches the thermal damage point of the unit, protector switches the excitation system off, opens the generator disconnect device, and shuts down the engine generator.
- 4. Senses clearing of a fault by other overcurrent devices and controls recovery of rated voltage to avoid overshoot.

D. Ground-Fault Indication: Comply with NFPA 70, "Emergency System" signals for ground fault.

- 1. Indicate ground fault with other engine generator alarm indications.
- 2. Trip generator protective device on ground fault.

2.8 GENERATOR, EXCITER, AND VOLTAGE REGULATOR

- A. Comply with NEMA MG 1.
- B. Drive: Generator shaft shall be directly connected to engine shaft. Exciter shall be rotated integrally with generator rotor.
- C. Electrical Insulation: **[Class H][or][Class F]**.
- D. Stator-Winding Leads: Brought out to terminal box to permit future reconnection for other voltages if required. Provide **[six][12]**-lead alternator.
- E. Range: Provide **[limited][broad][extended]** range of output voltage by adjusting the excitation level.
- F. Construction shall prevent mechanical, electrical, and thermal damage due to vibration, overspeed up to 125 percent of rating, and heat during operation at 110 percent of rated capacity.
- G. Enclosure: Drip-proof.

- H. Instrument Transformers: Mounted within generator enclosure.
- I. Voltage Regulator: Solid-state type, separate from exciter, providing performance as specified[**and as required by NFPA 110**].
 - 1. Adjusting Rheostat on Control and Monitoring Panel: Provide plus or minus 5 percent adjustment of output-voltage operating band.
 - 2. Maintain voltage within **[15][20][30]** percent on one step, full load.
 - 3. Provide anti-hunt provision to stabilize voltage.
 - 4. Maintain frequency within **[5][10][15]** percent and stabilize at rated frequency within **[2][5]** seconds.
- J. Strip Heater: Thermostatically controlled unit arranged to maintain stator windings above dew point.
- K. Windings: Two-thirds pitch stator winding and fully linked amortisseur winding.
- L. Subtransient Reactance: **[12]<Insert number>** percent, maximum.

2.9 LOAD BANK

- A. Description:
 - 1. Permanent, outdoor, weatherproof, remote-controlled, forced-air-cooled, **[resistive][resistive and reactive]** unit capable of providing a balanced three-phase, delta-connected load to engine generator at **[100]<Insert number>** percent rated-system capacity, at **[80]<Insert number>** percent power factor, lagging. **[Unit may contain separate resistive and reactive load banks controlled by a common control panel.]** Unit shall be capable of selective control of load in 25 percent steps and with minimum step changes of approximately 5 and 10 percent available.
 - 2. Permanent, radiator-mounted[, **resistive**] unit capable of providing a balanced three-phase, delta-connected load to engine generator at **[50][70]<Insert number>** percent rated-system capacity. Unit shall be capable of selective control of load in 25 percent steps of load-bank rating and with minimum step changes of approximately 5 and 10 percent available.
- B. Resistive Load Elements: Corrosion-resistant chromium alloy with ceramic and stainless-steel supports. Elements shall be double insulated and designed for repetitive on-off cycling. Elements shall be mounted in removable aluminized-steel heater cases. Galvanized steel is prohibited. Element's maximum resistance shall be between 100 and 105 percent of rated resistance.
- C. Reactive Load Elements: Epoxy-encapsulated reactor coils.
- D. Load-Bank Heat Dissipation: Integral fan with totally enclosed motor shall provide uniform cooling airflow through load elements. Airflow and coil operating current shall be such that, at maximum load, with ambient temperature at the upper end of specified range, load-bank elements operate at not more than 50 percent of maximum continuous temperature rating of resistance elements.
- E. Load-Element Switching: Remote-controlled contactors switch groups of load elements. Contactor coils are rated 120 V. Contactors shall be located in a separate NEMA 250, Type 3R enclosure within load-bank enclosure, accessible from exterior through hinged doors with tumbler locks.
- F. Contactor Enclosures: Heated by thermostatically controlled strip heaters to prevent condensation.
- G. Load-Bank Enclosures: NEMA 250, Type 3R, aluminized steel complying with NEMA ICS 6. Louvers at cooling-air intake and discharge openings shall prevent entry of rain and snow. Openings for airflow shall be screened with **1/2-inch- (13-mm-)** square, galvanized-steel mesh. Reactive load bank shall include automatic shutters at air intake and discharge. Components other than resistive elements shall

receive exterior epoxy coating with compatible primer. Comply with requirements in Section 099600 "High-Performance Coatings."

- H. Protective Devices: Power input circuits to load banks shall be fused, and fuses shall be selected to coordinate with generator circuit breaker. Fuse blocks shall be located in contactor enclosure. Cooling airflow and overtemperature sensors shall automatically shut down and lock out load bank until manually reset. Safety interlocks on access panels and doors shall disconnect load power, control, and heater circuits. Fan motor shall be separately protected by overload and short-circuit devices. Short-circuit devices shall be noninterchangeable fuses with 200,000-A interrupting capacity.
- I. Load-Bank Remote-Control Panel: Separate from load bank in NEMA 250, Type 1 enclosure with a control power switch and pilot light, and switches controlling groups of load elements.
- J. Control Sequence: Control panel may be preset for adjustable single-step loading of generator during automatic exercising.

2.10 OUTDOOR ENGINE GENERATOR ENCLOSURE

- A. Description:
 - 1. Vandal-resistant, sound-attenuating, weatherproof steel housing; wind resistant up to **100 mph (160 km/h)**. Multiple panels shall be lockable and provide adequate access to components requiring maintenance. Panels shall be removable by one person without tools. Instruments and control shall be mounted within enclosure.
 - a. Sound Attenuation Level: **<Insert level>**.
 - 2. Prefabricated or pre-engineered, galvanized-steel-clad, integral structural-steel-framed, walk-in enclosure; erected on concrete foundation.
- B. Structural Design and Anchorage: Comply with ASCE/SEI 7 for wind loads up to **100 mph (160 km/h)**.
- C. Seismic Design: Comply with seismic requirements in Section 260548.16 "Seismic Controls for Electrical Systems."
- D. Fire Protection: Provide fire protection according to Section 211000 "Water-Based Fire-Suppression Systems." Provide smoke detector in enclosure; mounted according to NFPA 72.
- E. Hinged Doors: With padlocking provisions.
- F. Space Heater: Thermostatically controlled and sized to prevent condensation.
- G. Lighting: Provide weather-resistant **[fluorescent][LED]** lighting with **[30 fc (330 lx)][50 fc (550 lx)]** average maintained.
- H. Thermal Insulation: Manufacturer's standard materials and thickness selected in coordination with space heater to maintain winter interior temperature within operating limits required by engine generator components.
- I. Muffler Location: **[Within][External to]** enclosure.
- J. Engine-Cooling Airflow through Enclosure: Maintain temperature rise of system components within required limits when unit operates at 110 percent of rated load for two hours with ambient temperature

at top of range specified in system service conditions.

1. Louvers: Fixed-engine, cooling-air inlet and discharge. Stormproof and drainable louvers prevent entry of rain and snow.
 2. Automatic Dampers: At engine cooling-air inlet and discharge. Dampers shall be closed to reduce enclosure heat loss in cold weather when unit is not operating.
 3. Ventilation: Provide temperature-controlled exhaust fan interlocked to prevent operation when engine is running.
- K. Interior Lights with Switch: Factory-wired, vapor-proof luminaires within housing; arranged to illuminate controls and accessible interior. Arrange for external electrical connection.
1. AC lighting system and connection point for operation when remote source is available.
 2. DC lighting system for operation when remote source and generator are both unavailable.
- L. Convenience Outlets: Factory-wired, GFCI. Arrange for external electrical connection.

2.11 REMOTE RADIATOR MOTORS

- A. Description: NEMA MG 1, Design B, medium-induction, random-wound, squirrel-cage motor.
- B. Efficiency: Energy efficient, as defined in NEMA MG 1.
- C. Service Factor: 1.15.
- D. Bearings: Regreasable, shielded, antifriction ball bearings suitable for radial and thrust loading.
- E. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
- F. Temperature Rise: Match insulation rating.
- G. Code Letter Designation:
 1. Motors [15]<Insert number> HP and Larger: NEMA starting Code F or Code G.
 2. Motors Smaller Than [15]<Insert number> HP: Manufacturer's standard starting characteristic.
- H. Enclosure Material: Cast iron for motor frame sizes 324T and larger; rolled steel for motor frame sizes smaller than 324T.
- I. Controllers, Electrical Devices, and Wiring: Electrical devices and connections are specified in electrical Sections.

2.12 VIBRATION ISOLATION DEVICES

- A. Elastomeric Isolator Pads: Oil- and water-resistant elastomer or natural rubber, arranged in single or multiple layers, molded with a nonslip pattern and galvanized-steel baseplates of sufficient stiffness for uniform loading over pad area, and factory cut to sizes that match requirements of supported equipment.
 1. Material: [Standard neoprene][Natural rubber][Bridge-bearing neoprene, complying with AASHTO M 251] separated by steel shims.
 2. Shore A Scale Durometer Rating: [30][40][45][50][60][65][70]<Insert number>.

3. Number of Layers: **[One][Two][Three][Four]<Insert number>**.
4. Minimum Deflection: **[1 inch (25 mm)]<Insert value>**.

- B. Restrained Spring Isolators: Freestanding, steel, open-spring isolators with seismic restraint.
 1. Housing: Steel with resilient vertical-limit stops to prevent spring extension due to wind loads or if weight is removed; factory-drilled baseplate bonded to **1/4-inch- (6-mm-)** thick, elastomeric isolator pad attached to baseplate underside; and adjustable equipment-mounting and -leveling bolt that acts as blocking during installation.
 2. Outside Spring Diameter: Not less than 80 percent of compressed height of the spring at rated load.
 3. Minimum Additional Travel: 50 percent of required deflection at rated load.
 4. Lateral Stiffness: More than 80 percent of rated vertical stiffness.
 5. Overload Capacity: Support 200 percent of rated load, fully compressed, without deformation or failure.
 6. Minimum Deflection: **[1 inch (25 mm)]<Insert value>**.
- C. Comply with requirements in Section 232116 "Hydronic Piping Specialties" for vibration isolation and flexible connector materials for steel piping.
- D. Comply with requirements in Section 233113 "Metal Ducts" for vibration isolation and flexible connector materials for exhaust shroud and ductwork.
- E. Vibration isolation devices shall not be used to accommodate misalignments or to make bends.

2.13 FINISHES

- A. Indoor and Outdoor Enclosures and Components: Manufacturer's standard finish over corrosion-resistant pretreatment and compatible primer.

2.14 SOURCE QUALITY CONTROL

- A. Prototype Testing: Factory test engine generator using same engine model, constructed of identical or equivalent components and equipped with identical or equivalent accessories.
 1. Tests: Comply with IEEE 115[**and with NFPA 110, Level 1 Energy Converters**].
- B. Project-Specific Equipment Tests: Before shipment, factory test engine generator and other system components and accessories manufactured specifically for this Project. Perform tests at rated load and power factor. Include the following tests:
 1. Test components and accessories furnished with installed unit that are not identical to those on tested prototype to demonstrate compatibility and reliability.
 2. Test generator, exciter, and voltage regulator as a unit.
 3. Full load run.
 4. Maximum power.
 5. Voltage regulation.
 6. Transient and steady-state governing.
 7. Single-step load pickup.
 8. Safety shutdown.
 9. Provide 14 days' advance notice of tests and opportunity for observation of tests by Owner's representative.
 10. Report factory test results within 10 days of completion of test.

PART 3 - EXECUTION**3.1 EXAMINATION**

- A. Examine areas, equipment bases, and conditions, with Installer present, for compliance with requirements for installation and other conditions affecting packaged engine generator performance.
- B. Examine roughing-in for piping systems and electrical connections. Verify actual locations of connections before packaged engine generator installation.
- C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

- A. Interruption of Existing Electrical Service: Do not interrupt electrical service to facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary electrical service according to requirements indicated:
 - 1. Notify **[Architect][Construction Manager][Owner]** no fewer than **[two]<Insert number>** working days in advance of proposed interruption of electrical service.
 - 2. Do not proceed with interruption of electrical service without **[Architect's][Construction Manager's][Owner's]** written permission.

3.3 INSTALLATION

- A. Comply with NECA 1 and NECA 404.
- B. Comply with packaged engine generator manufacturers' written installation and alignment instructions **and with NFPA 110**.
- C. Equipment Mounting:
 - 1. Install packaged engine generators on cast-in-place concrete equipment bases. Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
 - 2. Coordinate size and location of concrete bases for packaged engine generators **and remote radiators mounted on grade**. Cast anchor-bolt inserts into bases. Concrete, reinforcement, and formwork requirements are specified with concrete.
 - 3. Install **[packaged engine generator][engine generator in a walk-in enclosure]** with **[elastomeric isolator pads][restrained spring isolators]** having a minimum deflection of **[1 inch (25 mm)]<Insert static deflection>** on **4-inch- (100-mm-)** high concrete base. Secure **[sets][enclosure]** to anchor bolts installed in concrete bases. Concrete base construction is specified in Section 260548.16 "Seismic Controls for Electrical Systems."
 - 4. Remote Radiators:
 - a. Install remote radiator with **[elastomeric isolator pads][restrained spring isolators]** on **[concrete base on grade][roof equipment supports on roof]**.
 - b. Coordinate size and location of roof curbs, equipment supports, and roof penetrations for remote radiators. These items are specified in Section 077200 "Roof Accessories."
- D. Install packaged engine generator to provide access, without removing connections or accessories, for periodic maintenance.

- E. Cooling System: Install Schedule 40 black steel piping with welded joints for cooling water piping between engine generator and **[heat exchanger][remote radiator]**. Piping materials and installation requirements are specified in Section 232113 "Hydronic Piping."
 - 1. Install isolating thimbles where exhaust piping penetrates combustible surfaces. Provide a minimum of **9 inches (225 mm)** of clearance from combustibles.
 - 2. Insulate cooling-system piping and components according to requirements in Section 230719 "HVAC Piping Insulation."
- F. Exhaust System: Install Schedule 40 black steel piping with welded joints and connect to engine muffler. Install thimble at wall. Piping shall be same diameter as muffler outlet.
 - 1. Piping materials and installation requirements are specified in Section 232113 "Hydronic Piping."
 - 2. Install flexible connectors and steel piping materials according to requirements in Section 232116 "Hydronic Piping Specialties."
 - 3. Insulate muffler/silencer and exhaust system components according to requirements in Section 230719 "HVAC Piping Insulation."
 - 4. Install isolating thimbles where exhaust piping penetrates combustible surfaces with a minimum of **9 inches (225 mm)** of clearance from combustibles.
- G. Drain Piping: Install condensate drain piping to muffler drain outlet full size of drain connection with a shutoff valve, stainless-steel flexible connector, and Schedule 40 black steel pipe with welded joints.
 - 1. Piping materials and installation requirements are specified in Section 232113 "Hydronic Piping."
 - 2. Drain piping valves, connectors, and installation requirements are specified in Section 232116 "Hydronic Piping Specialties."
- H. Fuel Piping:
 - 1. Diesel storage tanks, tank accessories, piping, valves, and specialties for fuel systems are specified in Section 231113 "Facility Fuel-Oil Piping."
 - 2. Copper and galvanized steel shall not be used in the fuel-oil piping system.
- I. Install electrical devices furnished by equipment manufacturers but not specified to be factory mounted.

3.4 CONNECTIONS

- A. Piping installation requirements are specified in other Sections. Drawings indicate general arrangement of piping and specialties.
- B. Connect fuel, cooling-system, and exhaust-system piping adjacent to packaged engine generator to allow space for service and maintenance.
- C. Connect cooling-system water piping to engine generator and **[remote radiator][heat exchanger]** with flexible connectors.
- D. Connect engine exhaust pipe to engine with flexible connector.
- E. Connect fuel piping to engines with a gate valve and union and flexible connector.
- F. Ground equipment according to Section 260526 "Grounding and Bonding for Electrical Systems."
- G. Connect wiring according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

Provide a minimum of one 90-degree bend in flexible conduit routed to the engine generator from a stationary element.

- H. Balance single-phase loads to obtain a maximum of 10 percent unbalance between any two phases.

3.5 IDENTIFICATION

- A. Identify system components according to Section 230553 "Identification for HVAC Piping and Equipment" and Section 260553 "Identification for Electrical Systems."
- B. Install a sign indicating the generator neutral is bonded to the main service neutral at the main service location.

3.6 FIELD QUALITY CONTROL

- A. Testing Agency:
 - 1. Owner will engage a qualified testing agency to perform tests and inspections.
 - 2. Engage a qualified testing agency to perform tests and inspections.
 - 3. Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
 - 4. Perform tests and inspections[**with the assistance of a factory-authorized service representative**].
- B. Tests and Inspections:
 - 1. Perform tests recommended by manufacturer and each visual and mechanical inspection and electrical and mechanical test listed in first two subparagraphs below, as specified in NETA ATS. Certify compliance with test parameters.
 - a. Visual and Mechanical Inspection:
 - 1) Compare equipment nameplate data with Drawings and the Specifications.
 - 2) Inspect physical and mechanical condition.
 - 3) Inspect anchorage, alignment, and grounding.
 - 4) Verify that the unit is clean.
 - b. Electrical and Mechanical Tests:
 - 1) Perform insulation-resistance tests according to IEEE 43.
 - a) Machines Larger Than **200 hp (150 kW)**: Test duration shall be 10 minutes. Calculate polarization index.
 - b) Machines **200 hp (150 kW)** or Less: Test duration shall be one minute. Calculate the dielectric-absorption ratio.
 - 2) Test protective relay devices.
 - 3) Verify phase rotation, phasing, and synchronized operation as required by the application.
 - 4) Functionally test engine shutdown for low oil pressure, overtemperature, overspeed, and other protection features as applicable.
 - 5) Perform vibration test for each main bearing cap.
 - 6) Verify correct functioning of the governor and regulator.

2. NFPA 110 Acceptance Tests: Perform tests required by NFPA 110 that are additional to those specified here, including, but not limited to, single-step full-load pickup test.
 3. Battery Tests: Equalize charging of battery cells according to manufacturer's written instructions. Record individual cell voltages.
 - a. Measure charging voltage and voltages between available battery terminals for full-charging and float-charging conditions. Check electrolyte level and specific gravity under both conditions.
 - b. Test for contact integrity of all connectors. Perform an integrity load test and a capacity load test for the battery.
 - c. Verify acceptance of charge for each element of the battery after discharge.
 - d. Verify that measurements are within manufacturer's specifications.
 4. Battery-Charger Tests: Verify specified rates of charge for both equalizing and float-charging conditions.
 5. System Integrity Tests: Methodically verify proper installation, connection, and integrity of each element of engine generator system before and during system operation. Check for air, exhaust, and fluid leaks.
 6. Exhaust-System Back-Pressure Test: Use a manometer with a scale exceeding **40-inch wg (120 kPa)**. Connect to exhaust line close to engine exhaust manifold. Verify that back pressure at full-rated load is within manufacturer's written allowable limits for the engine.
 7. Exhaust Emissions Test: Comply with applicable government test criteria.
 8. Voltage and Frequency Transient Stability Tests: Use recording oscilloscope to measure voltage and frequency transients for 50 and 100 percent step-load increases and decreases, and verify that performance is as specified.
 9. Harmonic-Content Tests: Measure harmonic content of output voltage at 25 and 100 percent of rated linear load. Verify that harmonic content is within specified limits.
 10. Noise Level Tests: Measure A-weighted level of noise emanating from engine generator installation, including engine exhaust and cooling-air intake and discharge, at **[four]<Insert number> locations [25 feet (8 m) from edge of the generator enclosure][on the property line]<Insert location for measurement>**, and compare measured levels with required values.
- C. Coordinate tests with tests for transfer switches and run them concurrently.
- D. Test instruments shall have been calibrated within the past 12 months, traceable to NIST Calibration Services, and adequate for making positive observation of test results. Make calibration records available for examination on request.
- E. Leak Test: After installation, charge exhaust, coolant, and fuel systems and test for leaks. Repair leaks and retest until no leaks exist.
- F. Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation for generator and associated equipment.
- G. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
- H. Remove and replace malfunctioning units and **[retest][reinspect]** as specified above.
- I. Retest: Correct deficiencies identified by tests and observations, and retest until specified requirements are met.
- J. Report results of tests and inspections in writing. Record adjustable relay settings and measured insulation resistances, time delays, and other values and observations. Attach a label or tag to each tested component indicating satisfactory completion of tests.

- K. Infrared Scanning: After Substantial Completion, but not more than 60 days after final acceptance, perform an infrared scan of each power wiring termination and each bus connection while running with maximum load. Remove all access panels so terminations and connections are accessible to portable scanner.
1. Follow-up Infrared Scanning: Perform an additional follow-up infrared scan 11 months after date of Substantial Completion.
 2. Instrument: Use an infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.
 3. Record of Infrared Scanning: Prepare a certified report that identifies terminations and connections checked and that describes scanning results. Include notation of deficiencies detected, remedial action taken, and observations after remedial action.

3.7 MAINTENANCE SERVICE

- A. Initial Maintenance Service: Beginning at Substantial Completion, maintenance service shall include [12]<Insert number> months' full maintenance by skilled employees of manufacturer's authorized service representative. Include quarterly preventive maintenance and exercising to check for proper starting, load transfer, and running under load. Include routine preventive maintenance as recommended by manufacturer and adjusting as required for proper operation. Parts shall be manufacturer's authorized replacement parts and supplies.

3.8 DEMONSTRATION

- A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust, operate, and maintain packaged engine generators.

Task	Specification	Specification Description
26 32 13 13	26 32 13 19	Bi-Fuel-Engine-Driven Generator Sets

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 32 13 19 - BI-FUEL-ENGINE-DRIVEN GENERATOR SETS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Bi-fuel-engine-driven generator sets.
2. Bi-fuel engine.
3. Diesel fuel-oil system.
4. Gas fuel system.
5. Control and monitoring.
6. Generator overcurrent and fault protection.
7. Generator, exciter, and voltage regulator.
8. Load bank.
9. Outdoor engine generator enclosure.
10. Remote radiator motors.
11. Vibration isolation devices.

B. Related Requirements:

1. Section 262313 "Paralleling Low-Voltage Switchgear" for controls and paralleling equipment for large or multiple parallel engine generators.
2. Section 263343 "Battery Chargers" for remote engine battery chargers.
3. Section 263600 "Transfer Switches" for transfer switches including sensors and relays to initiate automatic-starting and -stopping signals for engine generators.

1.2 DEFINITIONS

- A. Bi-Fuel: An engine generator that starts using diesel fuel, and upon assumption of the electrical load, transitions to a diesel fuel and natural gas mix.
- B. EPS: Emergency power supply.
- C. EPSS: Emergency power supply system.
- D. Operational Bandwidth: The total variation from the lowest to highest value of a parameter over the range of conditions indicated, expressed as a percentage of the nominal value of the parameter.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
2. Include thermal damage curve for generator.
3. Include time-current characteristic curves for generator protective device.
4. Include fuel consumption in **[gallons per hour (liters per hour)][and][cubic feet per hour (cubic meters per hour)]** at 0.8 power factor at 0.5, 0.75, and 1.0 times generator capacity.

- a. Include fuel consumption at power factor and loads above at 3:1, 2:1, and 1:1 natural gas to diesel ratio.
5. Include generator efficiency at 0.8 power factor at 0.5, 0.75, and 1.0 times generator capacity.
6. Include airflow requirements for cooling and combustion air in **cubic feet per minute (cubic meters per minute)** at 0.8 power factor, with air-supply temperature of **95, 80, 70, and 50 deg F (35, 27, 21, and 10 deg C)**. Provide Drawings indicating requirements and limitations for location of air intake and exhausts.
7. Include generator characteristics, including, but not limited to, kilowatt rating, efficiency, reactances, and short-circuit current capability.

B. Shop Drawings:

1. Include plans and elevations for engine generator and other components specified. Indicate access requirements affected by height of subbase fuel tank.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Identify fluid drain ports and clearance requirements for proper fluid drain.
4. Design calculations for selecting vibration isolators and seismic restraints and for designing vibration isolation bases.
5. Vibration Isolation Base Details: Detail fabrication including anchorages and attachments to structure and to supported equipment. Include base weights.
6. Include diagrams for power, signal, and control wiring. Complete schematic, wiring, and interconnection diagrams showing terminal markings for EPS equipment and functional relationship between all electrical components.

1.4 INFORMATIONAL SUBMITTALS

A. Qualification Data: For **[Installer][manufacturer][and][testing agency]**.

B. Seismic Qualification Data: Certificates, for engine generator, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: With engine and generator mounted on rails, identify center of gravity and total weight[**including full fuel tank**], **[supplied enclosure,][external silencer,][subbase-mounted fuel tank,][skid-mounted load bank,]** and each piece of equipment not integral to the engine generator, and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

C. Source Quality-Control Reports: Including, but not limited to, the following:

1. Certified summary of prototype-unit test report.
2. Certified Test Reports: For components and accessories that are equivalent, but not identical, to those tested on prototype unit.
3. Certified Summary of Performance Tests: Certify compliance with specified requirement to meet performance criteria for sensitive loads.
4. Report of factory test on units to be shipped for this Project, showing evidence of compliance with specified requirements.
5. Report of sound generation.

6. Report of exhaust emissions showing compliance with applicable regulations.
7. Certified Torsional Vibration Compatibility: Comply with NFPA 110.

- D. Field quality-control reports.
- E. Warranty: For special warranty.

1.5 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For packaged engine generators to include in emergency, operation, and maintenance manuals.
 1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:
 - a. List of tools and replacement items recommended to be stored at Project for ready access. Include part and drawing numbers, current unit prices, and source of supply.
 - b. Operating instructions laminated and mounted adjacent to generator location.
 - c. Training plan.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 1. Fuses: One for every 10 of each type and rating, but no fewer than one of each.
 2. Indicator Lamps: Two for every six of each type used, but no fewer than two of each.
 3. Filters: One set each of lubricating oil, fuel, and combustion-air filters.
 4. Tools: Each tool listed by part number in operations and maintenance manual.

1.7 QUALITY ASSURANCE

- A. Installer Qualifications: An authorized representative who is trained and approved by manufacturer.
- B. Testing Agency Qualifications: Accredited by NETA.
 1. Testing Agency's Field Supervisor: Certified by NETA to supervise on-site testing.

1.8 WARRANTY

- A. Manufacturer's Warranty: Manufacturer agrees to repair or replace components of packaged engine generators and associated auxiliary components that fail in materials or workmanship within specified warranty period.
 1. Warranty Period: <Insert number> years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 BI-FUEL-ENGINE-DRIVEN GENERATOR SETS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[Caterpillar, Inc.; Electric Power Division]**
 2. **[Cummins Power Generation]**
 3. **[Generac]**
 4. **[Rolls-Royce Solutions America Inc.]**
 5. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[Caterpillar, Inc.; Electric Power Division]**
 2. **[Cummins Power Generation]**
 3. **[Generac]**
 4. **[Rolls-Royce Solutions America Inc.]**
 5. **<Insert manufacturer's name>**
- C. Source Limitations: Obtain packaged engine generators and auxiliary components from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

- A. Seismic Performance: Engine generator housing, **[subbase fuel tank,][day tank,]** engine generator, batteries, battery racks, silencers, **[load banks,]**and sound-attenuating equipment, accessories, and components shall withstand the effects of earthquake motions determined according to **[ASCE/SEI 7]<Insert requirement>**.
1. The term "withstand" means "the unit will remain in place without separation of any parts when subjected to the seismic forces specified **[and the unit will be fully operational after the seismic event].**"
 2. Shake-table testing shall comply with ICC-ES AC156. Testing shall be performed with all fluids at worst case normal levels. **[Water shall be substituted for diesel fuel in fuel tank during test.]**
 3. Component Importance Factor: **[1.5][1.0]**.
- B. B11 Compliance: Comply with B11.19.
- C. NFPA Compliance:
1. Comply with NFPA 37.
 2. Comply with NFPA 70.
 3. Comply with NFPA 99.
 4. Comply with NFPA 110 requirements for Level **[1][2]** EPSS.
- D. UL Compliance: Comply with UL 2200.
- E. Engine Exhaust Emissions: Comply with EPA Tier **[2][3][4]** requirements and applicable state and local

government requirements.

- F. Noise Emission: Comply with **[applicable state and local government requirements]<Insert Project criteria>** for maximum noise level at **[adjacent property boundaries]<Insert critical locations>** due to sound emitted by engine generator including engine, engine exhaust, engine cooling-air intake and discharge, and other components of installation.
- G. Environmental Conditions: Engine generator system shall withstand the following environmental conditions without mechanical or electrical damage or degradation of performance capability:
 - 1. Ambient Temperature: **[41 to 104 deg F (5 to 40 deg C)][5 to 104 deg F (Minus 15 to plus 40 deg C)]**.
 - 2. Relative Humidity: Zero to 95 percent.
 - 3. Altitude: Sea level to **[1000 feet (300 m)]<Insert altitude>**.
- H. Unusual Service Conditions: Engine generator equipment and installation are required to operate under the following conditions:
 - 1. **[High salt-dust content in the air due to sea-spray evaporation]<Insert unusual condition>**.

2.3 ENGINE GENERATOR ASSEMBLY DESCRIPTION

- A. Factory-assembled and -tested, water-cooled engine, with brushless generator and accessories.
- B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a testing agency acceptable to authorities having jurisdiction, and marked for intended location and use.
- C. Power Rating: **[Prime][Industrial][Standby]**.
- D. Overload Capacity: 110 percent of service load for 1 hour in 12 consecutive hours.
- E. EPSS Class: Engine generator shall be classified as a **[Class 2][Class 6][Class 48][Class 96]<Insert classification>** according to NFPA 110.
- F. Service Load: **<Insert number>** kVA.
- G. Power Factor: **[0.8]<Insert number>**, lagging.
- H. Frequency: 60 Hz.
- I. Voltage: **[208][240][480][600][4160]-V ac**.
- J. Phase: Three-phase, **[three][four]-wire, [wye][delta]**.
- K. Induction Method: **[Naturally aspirated][Turbocharged]**.
- L. Governor: Adjustable isochronous, with speed sensing.
- M. Mounting Frame: Structural steel framework to maintain alignment of mounted components without depending on concrete foundation. Provide lifting attachments sized and spaced to prevent deflection of base during lifting and moving.
 - 1. Rigging Diagram: Inscribed on metal plate permanently attached to mounting frame to indicate location and lifting capacity of each lifting attachment and engine generator center of gravity.

N. Capacities and Characteristics:

1. Power Output Ratings: Nominal ratings as indicated at 0.8 power factor excluding power required for the continued and repeated operation of the unit and auxiliaries[, **with capacity as required to operate as a unit as evidenced by records of prototype testing**].
2. Nameplates: For each major system component to identify manufacturer's name and address, and model and serial number of component.

O. Engine Generator Performance:

1. Steady-State Voltage Operational Bandwidth: 3 percent of rated output voltage from no load to full load.
2. Transient Voltage Performance: Not more than 20 percent variation for 50 percent step-load increase or decrease. Voltage shall recover and remain within the steady-state operating band within three seconds.
3. Steady-State Frequency Operational Bandwidth: 0.5 percent of rated frequency from no load to full load.
4. Steady-State Frequency Stability: When system is operating at any constant load within the rated load, there shall be no random speed variations outside the steady-state operational band and no hunting or surging of speed.
5. Transient Frequency Performance: Less than 5 percent variation for 50 percent step-load increase or decrease. Frequency shall recover and remain within the steady-state operating band within five seconds.
6. Output Waveform: At no load, harmonic content measured line to line or line to neutral shall not exceed 5 percent total and 3 percent for single harmonics. Telephone influence factor, determined according to NEMA MG 1, shall not exceed 50 percent.
7. Sustained Short-Circuit Current: For a three-phase, bolted short circuit at system output terminals, system shall supply a minimum of 250 percent of rated full-load current for not less than 10 seconds and then clear the fault automatically, without damage to generator system components.
8. Start Time:
 - a. Comply with NFPA 110, **[Type U][Type 10]** system requirements.
 - b. **[10]<Insert number>** seconds.

P. Engine Generator Performance for Sensitive Loads:

1. Oversizing generator compared with the rated power output of the engine is permissible to meet specified performance.
 - a. Nameplate Data for Oversized Generator: Show ratings required by the Contract Documents rather than ratings that would normally be applied to generator size installed.
2. Steady-State Voltage Operational Bandwidth: 1 percent of rated output voltage from no load to full load.
3. Transient Voltage Performance: Not more than 10 percent variation for 50 percent step-load increase or decrease. Voltage shall recover and remain within the steady-state operating band within 0.5 second.
4. Steady-State Frequency Operational Bandwidth: Plus or minus 0.25 percent of rated frequency from no load to full load.
5. Steady-State Frequency Stability: When system is operating at any constant load within the rated load, there shall be no random speed variations outside the steady-state operational band and no hunting or surging of speed.
6. Transient Frequency Performance: Less than 2-Hz variation for 50 percent step-load increase or decrease. Frequency shall recover and remain within the steady-state operating band within three

- seconds.
7. Output Waveform: At no load, harmonic content measured line to neutral shall not exceed 2 percent total with no slot ripple. Telephone influence factor, determined according to NEMA MG 1, shall not exceed 50 percent.
 8. Sustained Short-Circuit Current: For a three-phase, bolted short circuit at system output terminals, system shall supply a minimum of 300 percent of rated full-load current for not less than 10 seconds and then clear the fault automatically, without damage to winding insulation or other generator system components.
 9. Excitation System: Performance shall be unaffected by voltage distortion caused by nonlinear load.
 - a. Provide permanent magnet excitation for power source to voltage regulator.
 10. Start Time:
 - a. Comply with NFPA 110, **[Type U][Type 10]** system requirements.
 - b. **[10]<Insert number>** seconds.

Q. Parallel Engine Generators:

1. Automatic reactive output power control and load sharing between engine generators operated in parallel.
2. Automatic regulation, automatic connection to a common bus, and automatic synchronization, with manual controls and instruments to monitor and control paralleling functions.
3. Protective relays required for equipment and personnel safety.
4. Paralleling suppressors to protect excitation systems.
5. Reverse power protection.
6. Loss of field protection.

2.4 BI-FUEL ENGINE

- A. Fuel: ASTM D975, diesel fuel oil, Grade 2-D S15 and natural gas.
1. **<Insert specific fuel grade requirements>**.
- B. Rated Engine Speed: 1800 rpm.
- C. Lubrication System: Engine or skidmounted.
1. Filter and Strainer: Rated to remove 90 percent of particles 5 micrometers and smaller while passing full flow.
 2. Thermostatic Control Valve: Control flow in system to maintain optimum oil temperature. Unit shall be capable of full flow and is designed to be fail-safe.
 3. Crankcase Drain: Arranged for complete gravity drainage to an easily removable container with no disassembly and without use of pumps, siphons, special tools, or appliances.
- D. Jacket Coolant Heater: Electric-immersion type, factory installed in coolant jacket system. Comply with UL 499[**and with NFPA 110 requirements for Level 1 equipment for heater capacity**].
- E. Integral Cooling System: Closed loop, liquid cooled, with radiator factory mounted on engine generator mounting frame and integral engine-driven coolant pump.
1. Coolant: Solution of 50 percent ethylene-glycol-based antifreeze and 50 percent water, with anticorrosion additives as recommended by engine manufacturer.
 2. Size of Radiator: Adequate to contain expansion of total system coolant from cold start to 110

- percent load condition.
 3. Expansion Tank: Constructed of welded steel plate and rated to withstand maximum closed-loop coolant system pressure for engine used. Equip with gage glass and petcock.
 4. Temperature Control: Self-contained, thermostatic-control valve modulates coolant flow automatically to maintain optimum constant coolant temperature as recommended by engine manufacturer.
 5. Coolant Hose: Flexible assembly with inside surface of nonporous rubber and outer covering of aging-, UV-, and abrasion-resistant fabric.
 - a. Rating: **50-psig (345-kPa)** maximum working pressure with coolant at **180 deg F (82 deg C)**, and noncollapsible under vacuum.
 - b. End Fittings: Flanges or steel pipe nipples with clamps to suit piping and equipment connections.
- F. Remote Cooling System: Closed loop, liquid cooled, with remote radiator and **[integral engine-driven][auxiliary]** coolant pump. Comply with requirements in Section 232113 "Hydronic Piping" for coolant piping.
1. Configuration: **[Vertical][Horizontal]** air discharge.
 2. Radiator Core Tubes: **[Aluminum][Nonferrous-metal construction other than aluminum]**.
 3. Size of Radiator: Adequate to contain expansion of total system coolant from cold start to 110 percent load condition.
 4. Expansion Tank: Constructed of welded steel plate and rated to withstand maximum closed-loop coolant system pressure for engine used. Equip with gage glass and petcock.
 5. Fan: Driven by **[multiple belts from engine shaft][totally enclosed electric motor with sealed bearings]**.
 6. Coolant: Solution of 50 percent ethylene-glycol-based antifreeze and 50 percent water, with anticorrosion additives as recommended by engine manufacturer.
 7. Temperature Control: Self-contained, thermostatic-control valve modulates coolant flow automatically to maintain optimum constant coolant temperature as recommended by engine manufacturer.
- G. Muffler/Silencer:
1. Critical type, sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
 - a. Minimum sound attenuation of 25 dB at 500 Hz.
 - b. Sound level measured at a distance of **25 feet (8 m)** from exhaust discharge after installation is complete shall be **[78]<Insert number>** dBA or less.
 2. Semicritical type, sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
 - a. Minimum sound attenuation of 18 dB at 500 Hz.
 - b. Sound level measured at a distance of **25 feet (8 m)** from exhaust discharge after installation is complete shall be **[85]<Insert number>** dBA or less.
 3. Commercial type, sized as recommended by engine manufacturer and selected with exhaust piping system to not exceed engine manufacturer's engine backpressure requirements.
 - a. Minimum sound attenuation of 12 dB at 500 Hz.
 - b. Sound level measured at a distance of **25 feet (8 m)** from exhaust discharge after installation is complete shall be **[90]<Insert number>** dBA or less.

- H. Air-Intake Filter: **[Standard][Heavy]**-duty, engine-mounted air cleaner with replaceable dry-filter element and "blocked filter" indicator.
- I. Starting System: **[12][24]**-V electric, with negative ground.
 - 1. Components: Sized so they are not damaged during a full engine-cranking cycle with ambient temperature at maximum specified in "Performance Requirements" Article.
 - 2. Cranking Motor: Heavy-duty unit that automatically engages and releases from engine flywheel without binding.
 - 3. Cranking Cycle: **[As required by NFPA 110 for system level specified][60 seconds]**.
 - 4. Battery: **[Lead acid][Nickel cadmium]**, with capacity within ambient temperature range specified in "Performance Requirements" Article to provide specified cranking cycle at least **[twice][three times]** without recharging.
 - 5. Battery Cable: Size as recommended by engine manufacturer for cable length indicated. Include required interconnecting conductors and connection accessories.
 - 6. Battery Compartment: Factory fabricated of metal with acid-resistant finish and thermal insulation. Thermostatically controlled heater shall be arranged to maintain battery above **50 deg F (10 deg C)** regardless of external ambient temperature within range specified in "Performance Requirements" Article. Include accessories required to support and fasten batteries in place. Provide ventilation to exhaust battery gases.
 - 7. Battery Stand: Factory-fabricated, two-tier metal with acid-resistant finish designed to hold the quantity of battery cells required and to maintain the arrangement to minimize lengths of battery interconnections.
 - 8. Battery-Charging Alternator: Factory mounted on engine with solid-state voltage regulation and 35-A minimum continuous rating.
 - 9. Battery Charger: Current-limiting, automatic-equalizing and float-charging type designed for **[lead-acid][nickel-cadmium]** batteries. Unit shall comply with UL 1236 and include the following features:
 - a. Operation: Equalizing-charging rate of 10 A shall be initiated automatically after battery has lost charge until an adjustable equalizing voltage is achieved at battery terminals. Unit shall then be automatically switched to a lower float-charging mode and shall continue to operate in that mode until battery is discharged again.
 - b. Automatic Temperature Compensation: Adjust float and equalize voltages for variations in ambient temperature from **minus 40 to 140 deg F (minus 40 to plus 60 deg C)** to prevent overcharging at high temperatures and undercharging at low temperatures.
 - c. Automatic Voltage Regulation: Maintain constant output voltage regardless of input voltage variations up to plus or minus 10 percent.
 - d. Ammeter and Voltmeter: Flush mounted in door. Meters shall indicate charging rates.
 - e. Safety Functions: Sense abnormally low battery voltage and close contacts providing low battery voltage indication on control and monitoring panel. Sense high battery voltage and loss of ac input or dc output of battery charger. Either condition shall close contacts that provide a battery-charger malfunction indication at system control and monitoring panel.
 - f. Enclosure and Mounting: NEMA 250, Type 1, wall-mounted cabinet.

2.5 DIESEL FUEL-OIL SYSTEM

- A. Comply with NFPA 37.
- B. Piping: Fuel-oil piping shall be Schedule 40 black steel complying with requirements in Section 231113 "Facility Fuel-Oil Piping." Cast iron, aluminum, copper, and galvanized steel shall not be used in the fuel-oil system.
- C. Main Fuel Pump: Mounted on engine to provide primary fuel flow under starting and load conditions.

- D. Fuel Filtering: Remove water and contaminants larger than 1 micron.
- E. Relief-Bypass Valve: Automatically regulates pressure in fuel line and returns excess fuel to source.
- F. Fuel-Oil Storage Tank: Comply with requirements in **[Section 231313 "Facility Underground Fuel-Oil Storage Tanks."][Section 231323 "Facility Aboveground Fuel-Oil Storage Tanks."]**
 - 1. Fuel Tank Capacity: **[Minimum 133 percent of total fuel required for periodic maintenance operations between fuel refills plus fuel for the hours of continuous operation required for the indicated EPSS Class.][As recommended by engine manufacturer for an uninterrupted period of 8 hours' operation at 100 percent of rated power output of engine generator system without being refilled]<Insert gallons (liters)>.**
 - 2. Duplex Fuel-Oil Transfer Pump: Comply with requirements in Section 231213 "Facility Fuel-Oil Pumps."
- G. Day Tank: Comply with UL 142, freestanding, factory-fabricated fuel tank assembly, with integral, float-controlled transfer pump and the following features:
 - 1. Containment: Integral rupture basin with a capacity of 150 percent of nominal capacity of day tank.
 - a. Leak Detector: Locate in rupture basin and connect to provide audible and visual alarm in the event of day-tank leak.
 - 2. Tank Capacity: **[As recommended by engine manufacturer for an uninterrupted period of 4 hours' operation at 100 percent of rated power output of engine generator system without being refilled]<Insert gallons (liters)>.**
 - 3. Pump Capacity: Exceeds maximum flow of fuel drawn by engine-mounted fuel supply pump at 110 percent of rated capacity, including fuel returned from engine.
 - 4. Low-Level Alarm Sensor: Liquid-level device operates alarm contacts at 25 percent of normal fuel level.
 - 5. High-Level Alarm Sensor: Liquid-level device operates alarm and redundant fuel shutoff contacts at midpoint between overflow level and 100 percent of normal fuel level.
 - 6. Piping Connections: Factory-installed fuel supply and return lines from tank to engine; local fuel fill, vent line, overflow line; and tank drain line with shutoff valve.
 - 7. Redundant High-Level Fuel Shutoff: Actuated by high-level alarm sensor in day tank to operate a separate motor-control device that disconnects day-tank pump motor. Sensor shall signal solenoid valve, located in fuel suction line between fuel storage tank and day tank, to close. Both actions shall remain in shutoff state until manually reset. Shutoff action shall initiate an alarm signal to control panel but shall not shut down engine generator.
- H. Subbase-Mounted, Double-Wall, Fuel-Oil Tank: Factory installed and piped, complying with UL 142 fuel-oil tank. Features include the following:
 - 1. Tank level indicator.
 - 2. Fuel-Tank Capacity: Minimum 133 percent of total fuel required for periodic maintenance operations between fuel refills, plus fuel for the hours of continuous operation for indicated EPSS class.
 - 3. Leak detection in interstitial space.
 - 4. Vandal-resistant fill cap.
 - 5. Containment Provisions: Comply with requirements of authorities having jurisdiction.

**2.6 GAS FUEL SYSTEM**

- A. Natural Gas Piping: Comply with requirements in Section 231123 "Facility Natural Gas Piping."
- B. Gas Train: Comply with NFPA 37.
- C. Engine Fuel System:
 - 1. Natural Gas, Vapor-Withdrawal System:
 - a. Carburetor.
 - b. Secondary Gas Regulators: One for each fuel type, with atmospheric vents piped to building exterior.
 - c. Fuel-Shutoff Solenoid Valves: NRTL-listed, normally closed, safety shutoff valves; one for each fuel source.
 - d. Fuel Filters: One for each fuel type.
 - e. Manual Fuel Shutoff Valves: One for each fuel type.
 - f. Flexible Fuel Connectors: Minimum one for each fuel connection.

2.7 CONTROL AND MONITORING

- A. Automatic Starting System Sequence of Operation: When mode-selector switch on the control and monitoring panel is in the automatic position, remote-control contacts in one or more separate automatic transfer switches initiate starting and stopping of engine generator. When mode-selector switch is switched to the on position, engine generator starts. The off position of same switch initiates engine generator shutdown. When engine generator is running, specified system or equipment failures or derangements automatically shut down engine generator and initiate alarms.
- B. Manual Starting System Sequence of Operation: Switching on-off switch on the generator control panel to the on position starts engine generator. The off position of same switch initiates engine generator shutdown. When engine generator is running, specified system or equipment failures or derangements automatically shut down engine generator and initiate alarms.
- C. Provide minimum run-time control set for **[15][30]<Insert number>** minutes with override only by operating a remote emergency-stop switch.
- D. Comply with UL 508A.
- E. Configuration:
 - 1. Operating and safety indications, protective devices, basic system controls, and engine gages shall be grouped in a common control and monitoring panel mounted on the engine generator. Mounting method shall isolate the control panel from engine generator vibration. Panel shall be powered from the engine generator battery.
 - 2. Operating and safety indications, protective devices, basic system controls, and engine gages shall be grouped in a common wall-mounted control and monitoring panel. Panel shall be powered from the engine generator battery.
 - 3. Operating and safety indications, protective devices, basic system controls, engine gages, instrument transformers, generator disconnect switch or circuit breaker, and other indicated components shall be grouped in a combination control and power panel. Control and monitoring section of panel shall be isolated from power sections by steel barriers. Panel shall be powered from the engine generator battery. Panel features shall include the following:
 - a. Wall-Mounting Cabinet Construction: Rigid, self-supporting steel unit complying with NEMA ICS 6.

- b. Switchboard Construction: Freestanding unit complying with Section 262413 "Switchboards." Power bus shall be copper. Bus, bus supports, control wiring, and temperature rise shall comply with UL 891.
- c. Switchgear Construction: Freestanding unit complying with Section 262300 "Low-Voltage Switchgear."

F. Control and Monitoring Panel:

1. Digital controller with integrated LCD display, controls, and microprocessor, capable of local and remote control, monitoring, and programming, with battery backup.
2. Analog control panel with dedicated gages and indicator lights for the instruments and alarms indicated below.
3. Instruments: Located on the control and monitoring panel and viewable during operation.
 - a. Engine lubricating-oil pressure gage.
 - b. Engine-coolant temperature gage.
 - c. DC voltmeter (alternator battery charging).
 - d. Running-time meter.
 - e. AC voltmeter, **[for each phase][connected to a phase selector switch]**.
 - f. AC ammeter, **[for each phase][connected to a phase selector switch]**.
 - g. AC frequency meter.
 - h. Generator-voltage adjusting rheostat.
4. Controls and Protective Devices: Controls, shutdown devices and common visual alarm indication including the following:
 - a. Cranking control equipment.
 - b. Run-Off-Auto switch.
 - c. Control switch not in automatic position alarm.
 - d. Overcrank alarm.
 - e. Overcrank shutdown device.
 - f. Low water temperature alarm.
 - g. High engine temperature pre-alarm.
 - h. High engine temperature.
 - i. High engine temperature shutdown device.
 - j. Overspeed alarm.
 - k. Overspeed shutdown device.
 - l. Low fuel main tank.
 - 1) Low-fuel-level alarm shall be initiated when the level falls below that required for operation for duration required **[for the indicated EPSS class][in "Fuel Tank Capacity" Subparagraph in "Diesel Fuel-Oil System" Article]**.
 - m. Coolant low-level alarm.
 - n. Coolant low-level shutdown device.
 - o. Coolant high-temperature prealarm.
 - p. Coolant high-temperature alarm.
 - q. Coolant low-temperature alarm.
 - r. Coolant high-temperature shutdown device.
 - s. EPS supplying load indicator.
 - t. Battery high-voltage alarm.
 - u. Low cranking voltage alarm.
 - v. Battery-charger malfunction alarm.
 - w. Battery low-voltage alarm.
 - x. Lamp test.

- y. Contacts for local and remote common alarm.
 - z. Low-starting air pressure alarm.
 - aa. Low-starting hydraulic pressure alarm.
 - bb. Remote manual stop shutdown device.
 - cc. Air shutdown damper alarm when used.
 - dd. Air shutdown damper shutdown device when used.
 - ee. Generator overcurrent-protective-device not-closed alarm.
 - ff. Hours of operation.
 - gg. Engine generator metering, including voltage, current, hertz, kilowatt, kilovolt ampere, and power factor.
- G. Engine Generator Metering: Comply with **[Section 260913 "Electrical Power Monitoring and Control."][Section 262713 "Electricity Metering."][Section 260913 "Electrical Power Monitoring and Control" and Section 262713 "Electricity Metering."]**
- H. Connection to Datalink:
- 1. A separate terminal block, factory wired to Form C dry contacts, for each alarm and status indication.
 - 2. Provide connections for datalink transmission of indications to remote data terminals via **[ModBus][LonWorks][Ethernet]<Insert data protocol>**. Data system connections to terminals are covered in Section 260913 "Electrical Power Monitoring and Control."
- I. Common Remote Panel with Common Audible Alarm: Include necessary contacts and terminals in control and monitoring panel. Remote panel shall be powered from the engine generator battery.
- J. Remote Alarm Annunciator: An LED indicator light labeled with proper alarm conditions shall identify each alarm event, and a common audible signal shall sound for each alarm condition. Silencing switch in face of panel shall silence signal without altering visual indication. Connect so that after an alarm is silenced, clearing of initiating condition will reactivate alarm until silencing switch is reset. Cabinet and faceplate are surface- or flush-mounting type to suit mounting conditions indicated.
- 1. Overcrank alarm.
 - 2. Coolant low-temperature alarm.
 - 3. High engine temperature pre-alarm.
 - 4. High engine temperature alarm.
 - 5. Low lube oil pressure alarm.
 - 6. Overspeed alarm.
 - 7. Low fuel main tank alarm.
 - 8. Low coolant level alarm.
 - 9. Low cranking voltage alarm.
 - 10. Contacts for local and remote common alarm.
 - 11. Audible-alarm silencing switch.
 - 12. Air shutdown damper when used.
 - 13. Run-Off-Auto switch.
 - 14. Control switch not in automatic position alarm.
 - 15. Fuel tank derangement alarm.
 - 16. Fuel tank high-level shutdown of fuel supply alarm.
 - 17. Lamp test.
 - 18. Low cranking voltage alarm.
 - 19. Generator overcurrent-protective-device not-closed alarm.
- K. Supporting Items: Include sensors, transducers, terminals, relays, and other devices and include wiring required to support specified items. Locate sensors and other supporting items on engine or generator, unless otherwise indicated.

- L. Remote Emergency-Stop Switch: Flush; wall mounted unless otherwise indicated; and labeled. Push button shall be protected from accidental operation.

2.8 GENERATOR OVERCURRENT AND FAULT PROTECTION

- A. Overcurrent protective devices shall be coordinated to optimize selective tripping when a short circuit occurs.
 - 1. Overcurrent protective devices for the entire EPSS shall be coordinated to optimize selective tripping when a short circuit occurs. Coordination of protective devices shall consider both utility and EPSS as the voltage source.
 - 2. Overcurrent protective devices for the EPSS shall be accessible only to authorized personnel.
- B. Generator Overcurrent Protective Device:
 - 1. Molded-case circuit breaker, thermal-magnetic type; 100 percent rated; complying with UL 489:
 - a. Tripping Characteristic: Designed specifically for generator protection.
 - b. Trip Rating: Matched to generator output rating.
 - c. Shunt Trip: Connected to trip breaker when engine generator is shut down by other protective devices.
 - d. Mounting: Adjacent to, or integrated with, control and monitoring panel.
 - 2. Molded-case circuit breaker, electronic-trip type; 100 percent rated; complying with UL 489:
 - a. Tripping Characteristics: Adjustable long-time and short-time delay and instantaneous.
 - b. Trip Settings: Selected to coordinate with generator thermal damage curve.
 - c. Shunt Trip: Connected to trip breaker when engine generator is shut down by other protective devices.
 - d. Mounting: Adjacent to or integrated with control and monitoring panel.
 - 3. Insulated-case circuit breaker, electronic-trip type; 100 percent rated; complying with UL 489:
 - a. Tripping Characteristics: Adjustable long-time and short-time delay and instantaneous.
 - b. Trip Settings: Selected to coordinate with generator thermal damage curve.
 - c. Shunt Trip: Connected to trip breaker when engine generator is shut down by other protective devices.
 - d. Mounting: Adjacent to, or integrated with, control and monitoring panel.
 - 4. Molded-case type disconnect switch; 100 percent rated:
 - a. Trip Rating: Matched to generator output rating.
 - b. Shunt Trip: Connected to trip switch when signaled by generator protector or by other protective devices.
- C. Generator Protector: Microprocessor-based unit shall continuously monitor current level in each phase of generator output, integrate generator heating effect over time, and predict when thermal damage of alternator will occur. When signaled by generator protector or other engine generator protective devices, a shunt-trip device in the generator disconnect switch shall open the switch to disconnect the generator from load circuits. Protector performs the following functions:
 - 1. Initiates a generator overload alarm when generator has operated at an overload equivalent to 110 percent of full-rated load for 60 seconds. Indication for this alarm is integrated with other engine generator malfunction alarms. Contacts shall be available for load shed functions.

2. Under single- or three-phase fault conditions, regulates generator to 300 percent of rated full-load current for up to 10 seconds.
 3. As overcurrent heating effect on the generator approaches the thermal damage point of the unit, protector switches the excitation system off, opens the generator disconnect device, and shuts down the engine generator.
 4. Senses clearing of a fault by other overcurrent devices and controls recovery of rated voltage to avoid overshoot.
- D. Ground-Fault Indication: Comply with NFPA 70, "Emergency System" signals for ground fault.
1. Indicate ground fault with other engine generator alarm indications.
 2. Trip generator protective device on ground fault.

2.9 GENERATOR, EXCITER, AND VOLTAGE REGULATOR

- A. Comply with NEMA MG 1.
- B. Drive: Generator shaft shall be directly connected to engine shaft. Exciter shall be rotated integrally with generator rotor.
- C. Electrical Insulation: **[Class H][or][Class F]**.
- D. Stator-Winding Leads: Brought out to terminal box to permit future reconnection for other voltages if required. Provide **[six][12]**-lead alternator.
- E. Range: Provide **[limited][broad][extended]** range of output voltage by adjusting the excitation level.
- F. Construction shall prevent mechanical, electrical, and thermal damage due to vibration, overspeed up to 125 percent of rating, and heat during operation at 110 percent of rated capacity.
- G. Enclosure: Dripproof.
- H. Instrument Transformers: Mounted within generator enclosure.
- I. Voltage Regulator: Solid-state type, separate from exciter, providing performance as specified **[and as required by NFPA 110]**.
1. Adjusting Rheostat on Control and Monitoring Panel: Provide plus or minus 5 percent adjustment of output-voltage operating band.
 2. Maintain voltage within **[15][20][30]** percent on one step, full load.
 3. Provide anti-hunt provision to stabilize voltage.
 4. Maintain frequency within **[5][10][15]** percent and stabilize at rated frequency within **[2][5]** seconds.
- J. Strip Heater: Thermostatically controlled unit arranged to maintain stator windings above dew point.
- K. Windings: Two-thirds pitch stator winding and fully linked amortisseur winding.
- L. Subtransient Reactance: **[12]<Insert number>** percent, maximum.

2.10 LOAD BANK

- A. Description:

1. Permanent, outdoor, weatherproof, remote-controlled, forced-air-cooled, [**resistive**][**resistive and reactive**] unit capable of providing a balanced three-phase, delta-connected load to engine generator at [100]<Insert number> percent rated-system capacity, at [80]<Insert number> percent power factor, lagging. [**Unit may contain separate resistive and reactive load banks controlled by a common control panel.**] Unit shall be capable of selective control of load in 25 percent steps and with minimum step changes of approximately 5 and 10 percent available.
 2. Permanent, radiator-mounted[, **resistive**] unit capable of providing a balanced three-phase, delta-connected load to engine generator at [50][70]<Insert number> percent rated-system capacity. Unit shall be capable of selective control of load in 25 percent steps of load-bank rating and with minimum step changes of approximately 5 and 10 percent available.
- B. Resistive Load Elements: Corrosion-resistant chromium alloy with ceramic and stainless-steel supports. Elements shall be double insulated and designed for repetitive on-off cycling. Elements shall be mounted in removable aluminized-steel heater cases. Galvanized steel is prohibited. Element's maximum resistance shall be between 100 and 105 percent of rated resistance.
 - C. Reactive Load Elements: Epoxy-encapsulated reactor coils.
 - D. Load-Bank Heat Dissipation: Integral fan with totally enclosed motor shall provide uniform cooling airflow through load elements. Airflow and coil operating current shall be such that, at maximum load, with ambient temperature at the upper end of specified range, load-bank elements operate at not more than 50 percent of maximum continuous temperature rating of resistance elements.
 - E. Load-Element Switching: Remote-controlled contactors switch groups of load elements. Contactor coils are rated 120 V. Contactors shall be located in a separate NEMA 250, Type 3R enclosure within load-bank enclosure, accessible from exterior through hinged doors with tumbler locks.
 - F. Contactor Enclosures: Heated by thermostatically controlled strip heaters to prevent condensation.
 - G. Load-Bank Enclosures: NEMA 250, Type 3R, aluminized steel complying with NEMA ICS 6. Louvers at cooling-air intake and discharge openings shall prevent entry of rain and snow. Openings for airflow shall be screened with 1/2-inch- (13-mm-) square, galvanized-steel mesh. Reactive load bank shall include automatic shutters at air intake and discharge. Components other than resistive elements shall receive exterior epoxy coating with compatible primer. Comply with requirements in Section 099600 "High-Performance Coatings."
 - H. Protective Devices: Power input circuits to load banks shall be fused, and fuses shall be selected to coordinate with generator circuit breaker. Fuse blocks shall be located in contactor enclosure. Cooling airflow and overtemperature sensors shall automatically shut down and lock out load bank until manually reset. Safety interlocks on access panels and doors shall disconnect load power, control, and heater circuits. Fan motor shall be separately protected by overload and short-circuit devices. Short-circuit devices shall be noninterchangeable fuses with 200,000-A interrupting capacity.
 - I. Load-Bank Remote-Control Panel: Separate from load bank in NEMA 250, Type 1 enclosure with a control power switch and pilot light, and switches controlling groups of load elements.
 - J. Control Sequence: Control panel may be preset for adjustable single-step loading of generator during automatic exercising.
- 2.11 OUTDOOR ENGINE GENERATOR ENCLOSURE
- A. Description:
 1. Vandal-resistant, sound-attenuating, weatherproof steel housing, wind resistant up to 100 mph

- (160 km/h). Multiple panels shall be lockable and provide adequate access to components requiring maintenance. Panels shall be removable by one person without tools. Instruments and control shall be mounted within enclosure.
2. Prefabricated or preengineered, galvanized-steel-clad, integral structural-steel-framed, walk-in enclosure; erected on concrete foundation.
- B. Structural Design and Anchorage: Comply with ASCE/SEI 7 for wind loads up to **100 mph (160 km/h)**.
- C. Seismic Design: Comply with seismic requirements in Section 260548.16 "Seismic Controls for Electrical Systems."
- D. Fire Protection: Provide fire protection according to Section 211000 "Water-Based Fire-Suppression Systems." Provide smoke detector in enclosure; mounted according to NFPA 72.
- E. Hinged Doors: With padlocking provisions.
- F. Space Heater: **[Gaseous][Electric]**. Thermostatically controlled and sized to prevent condensation.
- G. Lighting: Provide weather-resistant **[fluorescent][LED]** lighting with **[30 fc (330 lx)][50 fc (550 lx)]** average maintained.
- H. Thermal Insulation: Manufacturer's standard materials and thickness selected in coordination with space heater to maintain winter interior temperature within operating limits required by engine generator components.
- I. Muffler Location: **[Within][External to]** enclosure.
- J. Engine Cooling Airflow through Enclosure: Maintain temperature rise of system components within required limits when unit operates at 110 percent of rated load for two hours with ambient temperature at top of range specified in system service conditions.
1. Louvers: Fixed-engine, cooling-air inlet and discharge. Stormproof and drainable louvers prevent entry of rain and snow.
 2. Automatic Dampers: At engine cooling-air inlet and discharge. Dampers shall be closed to reduce enclosure heat loss in cold weather when unit is not operating.
 3. Ventilation: Provide temperature-controlled exhaust fan interlocked to prevent operation when engine is running.
- K. Interior Lights with Switch: Factory-wired, vaporproof fixtures within housing; arranged to illuminate controls and accessible interior. Arrange for external electrical connection.
1. AC lighting system and connection point for operation when remote source is available.
 2. DC lighting system for operation when remote source and generator are both unavailable.
- L. Convenience Outlets: Factory-wired, GFCI. Arrange for external electrical connection.
- 2.12 REMOTE RADIATOR MOTORS
- A. Description: NEMA MG 1, Design B, medium-induction, random-wound, squirrel-cage motor.
 - B. Efficiency: Energy efficient, as defined in NEMA MG 1.
 - C. Service Factor: 1.15.

- D. Bearings: Regreasable, shielded, antifriction ball bearings suitable for radial and thrust loading.
- E. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
- F. Temperature Rise: Match insulation rating.
- G. Code Letter Designation:
 - 1. Motors [15]<Insert number> HP and Larger: NEMA starting Code F or Code G.
 - 2. Motors Smaller Than [15]<Insert number> HP: Manufacturer's standard starting characteristic.
- H. Enclosure Material: Cast iron for motor frame sizes 324T and larger; rolled steel for motor frame sizes smaller than 324T.
- I. Controllers, Electrical Devices, and Wiring: Electrical devices and connections are specified in electrical Sections.

2.13 VIBRATION ISOLATION DEVICES

- A. Elastomeric Isolator Pads: Oil- and water-resistant elastomer or natural rubber, arranged in single or multiple layers, molded with a nonslip pattern and galvanized-steel baseplates of sufficient stiffness for uniform loading over pad area, and factory cut to sizes that match requirements of supported equipment.
 - 1. Material: [Standard neoprene][Natural rubber][Bridge-bearing neoprene, complying with AASHTO M 251] separated by steel shims.
 - 2. Shore A Scale Durometer Rating: [30][40][45][50][60][65][70]<Insert number>.
 - 3. Number of Layers: [One][Two][Three][Four]<Insert number>.
 - 4. Minimum Deflection: [1 inch (25 mm)]<Insert value>.
- B. Restrained Spring Isolators: Freestanding, steel, open-spring isolators with seismic restraint.
 - 1. Housing: Steel with resilient vertical-limit stops to prevent spring extension due to wind loads or if weight is removed; factory-drilled baseplate bonded to 1/4-inch- (6-mm-) thick, elastomeric isolator pad attached to baseplate underside; and adjustable equipment mounting and leveling bolt that acts as blocking during installation.
 - 2. Outside Spring Diameter: Not less than 80 percent of compressed height of the spring at rated load.
 - 3. Minimum Additional Travel: 50 percent of required deflection at rated load.
 - 4. Lateral Stiffness: More than 80 percent of rated vertical stiffness.
 - 5. Overload Capacity: Support 200 percent of rated load, fully compressed, without deformation or failure.
 - 6. Minimum Deflection: [1 inch (25 mm)]<Insert value>.
- C. Comply with requirements in Section 232116 "Hydronic Piping Specialties" for vibration isolation and flexible connectors materials for steel piping.
- D. Comply with requirements in Section 233113 "Metal Ducts" for vibration isolation and flexible connector materials for exhaust shroud and ductwork.
- E. Vibration isolation devices shall not be used to accommodate misalignments or to make bends.

2.14 FINISHES

- A. Indoor and Outdoor Enclosures and Components: Manufacturer's standard finish over corrosion-resistant pretreatment and compatible primer.

2.15 SOURCE QUALITY CONTROL

- A. Prototype Testing: Factory test engine generator using same engine model, constructed of identical or equivalent components and equipped with identical or equivalent accessories.
 - 1. Tests: Comply with IEEE 115[**and with NFPA 110, Level 1 Energy Converters**].
- B. Project-Specific Equipment Tests: Before shipment, factory test engine generator and other system components and accessories manufactured specifically for this Project. Perform tests at rated load and power factor. Include the following tests:
 - 1. Test components and accessories furnished with installed unit that are not identical to those on tested prototype to demonstrate compatibility and reliability.
 - 2. Test generator, exciter, and voltage regulator as a unit.
 - 3. Full load run.
 - 4. Maximum power.
 - 5. Voltage regulation.
 - 6. Transient and steady-state governing.
 - 7. Single-step load pickup.
 - 8. Safety shutdown.
 - 9. Provide 14 days' advance notice of tests and opportunity for observation of tests by Owner's representative.
 - 10. Report factory test results within 10 days of completion of test.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas, equipment bases, and conditions, with Installer present, for compliance with requirements for installation and other conditions affecting packaged engine generator performance.
- B. Examine roughing-in for piping systems and electrical connections to verify actual locations of connections before packaged engine generator installation.
- C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

- A. Interruption of Existing Electrical Service: Do not interrupt electrical service to facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary electrical service according to requirements indicated:
 - 1. Notify **[Architect][Construction Manager][Owner]** no fewer than **[two]<Insert number>** working days in advance of proposed interruption of electrical service.
 - 2. Do not proceed with interruption of electrical service without **[Architect's][Construction Manager's][Owner's]** written permission.

3.3 INSTALLATION

- A. Comply with NECA 1 and NECA 404.
- B. Comply with packaged engine generator manufacturers' written installation and alignment instructions **and with NFPA 110**.
- C. Equipment Mounting:
 - 1. Install packaged engine generators on cast-in-place concrete equipment bases. Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
 - 2. Coordinate size and location of concrete bases for packaged engine generators **and remote radiators mounted on grade**. Cast anchor-bolt inserts into bases. Concrete, reinforcement, and formwork requirements are specified with concrete.
 - 3. Install **[packaged engine generator][engine generator in a walk-in enclosure]** with **[elastomeric isolator pads][restrained spring isolators]** having a minimum deflection of **[1 inch (25 mm)]<Insert static deflection>** on **4-inch- (100-mm-)** high concrete base. Secure **[sets][enclosure]** to anchor bolts installed in concrete bases. Concrete base construction is specified in Section 260548.16 "Seismic Controls for Electrical Systems."
 - 4. Remote Radiators:
 - a. Install remote radiator with **[elastomeric isolator pads][restrained spring isolators]** on **[concrete base on grade][roof equipment supports on roof]**.
 - b. Coordinate size and location of roof curbs, equipment supports, and roof penetrations for remote radiators. These items are specified in Section 077200 "Roof Accessories."
- D. Install packaged engine generator to provide access, without removing connections or accessories, for periodic maintenance.
- E. Cooling System: Install Schedule 40 black steel piping with welded joints for cooling water piping between engine generator and **[heat exchanger][remote radiator]**. Piping materials and installation requirements are specified in Section 232113 "Hydronic Piping."
 - 1. Install isolating thimbles where exhaust piping penetrates combustible surfaces. Provide a minimum of **9 inches (225 mm)** of clearance from combustibles.
 - 2. Insulate cooling system piping and components according to requirements in Section 230719 "HVAC Piping Insulation."
- F. Exhaust System: Install Schedule 40 black steel piping with welded joints and connect to engine muffler. Install thimble at wall. Piping shall be same diameter as muffler outlet.
 - 1. Install flexible connectors and steel piping materials according to requirements in Section 232116 "Hydronic Piping Specialties."
 - 2. Insulate muffler/silencer and exhaust system components according to requirements in Section 230719 "HVAC Piping Insulation."
 - 3. Install isolating thimbles where exhaust piping penetrates combustible surfaces with a minimum of **9 inches (225 mm)** of clearance from combustibles.
- G. Drain Piping: Install condensate drain piping to muffler drain outlet with a shutoff valve, stainless-steel flexible connector, and Schedule 40 black steel pipe with welded joints.
- H. Fuel Piping:
 - 1. Diesel storage tanks, tank accessories, piping, valves, and specialties for fuel systems are

- specified in Section 231113 "Facility Fuel-Oil Piping."
 - 2. Natural gas piping, valves, and specialties for gas distribution are specified in Section 231123 "Facility Natural Gas Piping."
 - 3. Copper and galvanized steel shall not be used in the diesel fuel-oil piping system.
- I. Electrical Wiring: Install electrical devices furnished by equipment manufacturers but not specified to be factory mounted.

3.4 CONNECTIONS

- A. Piping installation requirements are specified in other Sections. Drawings indicate general arrangement of piping and specialties.
- B. Connect fuel, cooling-system, and exhaust-system piping adjacent to packaged engine generator to allow service and maintenance.
- C. Connect cooling-system water piping to engine generator and **[remote radiator][heat exchanger]** with flexible connectors.
- D. Connect engine exhaust pipe to engine with flexible connector.
- E. Fuel Connections:
 - 1. Connect fuel piping to engines with a gate valve and union and flexible connector.
 - 2. Install manual shutoff valve in a remote location to isolate gas supply to the generator.
 - 3. Vent gas pressure regulators outside building a minimum of **60 inches (1500 mm)** from building openings.
- F. Ground equipment according to Section 260526 "Grounding and Bonding for Electrical Systems."
- G. Connect wiring according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables." Provide a minimum of one 90-degree bend in flexible conduit routed to the generator set from a stationary element.
- H. Balance single-phase loads to obtain a maximum of 10 percent unbalance between any two phases.

3.5 IDENTIFICATION

- A. Identify system components according to Section 230553 "Identification for HVAC Piping and Equipment" and Section 260553 "Identification for Electrical Systems."
- B. Install a sign indicating the generator neutral is bonded to the main service neutral at the main service location.

3.6 FIELD QUALITY CONTROL

- A. Testing Agency:
 - 1. Owner will engage a qualified testing agency to perform tests and inspections.
 - 2. Engage a qualified testing agency to perform tests and inspections.
 - 3. Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

4. Perform tests and inspections[**with the assistance of a factory-authorized service representative**].

B. Tests and Inspections:

1. Perform tests recommended by manufacturer and each visual and mechanical inspection and electrical and mechanical test listed in first two subparagraphs, as specified in NETA ATS. Certify compliance with test parameters.
 - a. Visual and Mechanical Inspection:
 - 1) Compare equipment nameplate data with Drawings and the Specifications.
 - 2) Inspect physical and mechanical condition.
 - 3) Inspect anchorage, alignment, and grounding.
 - 4) Verify that the unit is clean.
 - b. Electrical and Mechanical Tests:
 - 1) Perform insulation-resistance tests according to IEEE 43.
 - a) Machines Larger Than **200 hp (150 kW)**: Test duration shall be 10 minutes. Calculate polarization index.
 - b) Machines **200 hp (150 kW)** or Less: Test duration shall be one minute. Calculate the dielectric-absorption ratio.
 - 2) Test protective relay devices.
 - 3) Verify phase rotation, phasing, and synchronized operation as required by the application.
 - 4) Functionally test engine shutdown for low oil pressure, overtemperature, overspeed, and other protection features as applicable.
 - 5) Perform vibration test for each main bearing cap.
 - 6) Verify correct functioning of the governor and regulator.
2. NFPA 110 Acceptance Tests: Perform tests required by NFPA 110 that are additional to those specified here, including, but not limited to, single-step full-load pickup test.
3. Battery Tests: Equalize charging of battery cells according to manufacturer's written instructions. Record individual cell voltages.
 - a. Measure charging voltage and voltages between available battery terminals for full-charging and float-charging conditions. Check electrolyte level and specific gravity under both conditions.
 - b. Test for contact integrity of all connectors. Perform an integrity load test and a capacity load test for the battery.
 - c. Verify acceptance of charge for each element of the battery after discharge.
 - d. Verify that measurements are within manufacturer's specifications.
4. Battery-Charger Tests: Verify specified rates of charge for both equalizing and float-charging conditions.
5. System Integrity Tests: Methodically verify proper installation, connection, and integrity of each element of engine generator system before and during system operation. Check for air, exhaust, and fluid leaks.
6. Exhaust-System Back-Pressure Test: Use a manometer with a scale exceeding **40-inch wg (120 kPa)**. Connect to exhaust line close to engine exhaust manifold. Verify that back pressure at full-rated load is within manufacturer's written allowable limits for the engine.
7. Exhaust Emissions Test: Comply with applicable government test criteria.

8. Voltage and Frequency Transient Stability Tests: Use recording oscilloscope to measure voltage and frequency transients for 50 and 100 percent step-load increases and decreases, and verify that performance is as specified.
 9. Harmonic-Content Tests: Measure harmonic content of output voltage at 25 and 100 percent of rated linear load. Verify that harmonic content is within specified limits.
 10. Noise Level Tests: Measure A-weighted level of noise emanating from engine generator installation, including engine exhaust and cooling-air intake and discharge, at **[four]<Insert number> locations [25 feet (8 m) from edge of the generator enclosure][on the property line]<Insert location for measurement>**, and compare measured levels with required values.
- C. Coordinate tests with tests for transfer switches and run them concurrently.
- D. Test instruments shall have been calibrated within the last 12 months, traceable to NIST Calibration Services, and adequate for making positive observation of test results. Make calibration records available for examination on request.
- E. Leak Test: After installation, charge exhaust, coolant, and fuel systems and test for leaks. Repair leaks and retest until no leaks exist.
- F. Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation for generator and associated equipment.
- G. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
- H. Remove and replace malfunctioning units and **[retest][reinspect]** as specified above.
- I. Retest: Correct deficiencies identified by tests and observations and retest until specified requirements are met.
- J. Report results of tests and inspections in writing. Record adjustable relay settings and measured insulation resistances, time delays, and other values and observations. Attach a label or tag to each tested component indicating satisfactory completion of tests.
- K. Infrared Scanning: After Substantial Completion, but not more than 60 days after final acceptance, perform an infrared scan of each power wiring termination and each bus connection while running with maximum load. Remove all access panels so terminations and connections are accessible to portable scanner.
1. Follow-up Infrared Scanning: Perform an additional follow-up infrared scan 11 months after date of Substantial Completion.
 2. Instrument: Use an infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.
 3. Record of Infrared Scanning: Prepare a certified report that identifies terminations and connections checked and that describes scanning results. Include notation of deficiencies detected, remedial action taken, and observations after remedial action.

3.7 MAINTENANCE SERVICE

- A. Initial Maintenance Service: Beginning at Substantial Completion, maintenance service shall include **[12]<Insert number> months'** full maintenance by skilled employees of manufacturer's authorized service representative. Include quarterly preventive maintenance and exercising to check for proper starting, load transfer, and running under load. Include routine preventive maintenance as recommended by manufacturer and adjusting as required for proper operation. Parts shall be manufacturer's authorized replacement parts and supplies.

3.8 DEMONSTRATION

- A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust, operate, and maintain packaged engine generators.

END OF SECTION 26 32 13 19

SECTION 26 33 43 00 - BATTERY CHARGERS

PART 1 - GENERAL

1.1 SUMMARY

- A. Section includes battery chargers for emergency engine generators.

1.2 ACTION SUBMITTALS

- A. Product Data: For each type of battery charger.
 - 1. Include system overview, construction details, material descriptions, and dimensions of battery charging and monitoring systems.
 - 2. Include rated capacities, operating characteristics, electrical characteristics, performance specifications, and furnished accessories.
- B. Shop Drawings: For battery chargers.
 - 1. Include plans, elevations, sections, and mounting details.
 - 2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field installation, components, and location and size of each field connection.
 - 3. Include diagrams for power, signal, and control wiring.
 - 4. Include instructions for Installer.

1.3 INFORMATIONAL SUBMITTALS

- A. Qualification Data: For manufacturer.
- B. Seismic Qualification Data: Certificates, for battery changers, accessories, and components, from manufacturer.
 - 1. Basis for Certification: Include Certificate of Compliance for nonstructural components and systems. Withstand certification is for below-grade, grade, and roof-level installations, installations in essential facilities, and for life-safety applications, based on actual shake-testing. Certified installation locations shall include mounting directly to structural wall and directly to nonstructural wall.

1.4 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For battery chargers to include in operation and maintenance manuals.
 - 1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:
 - a. Manufacturer's operating specifications and user's guides.
 - b. Data sheet for each battery charger with nameplate information and performance

specifications.

1.5 QUALITY ASSURANCE

- A. Manufacturer Qualifications: Provide certification that manufacturer complies with requirements of ISO 9001.

1.6 WARRANTY

- A. Manufacturer's Warranty: Manufacturer agrees to repair or replace components of battery chargers that fail in materials or workmanship within specified warranty period.
 - 1. Warranty Period: **<Insert number>** years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
- B. UL Compliance: Comply with UL 1236 for Category BBHH. OEM-supplied, open-frame chargers may be UL recognized to Category BBHH provided they are housed in a listed enclosure.
- C. NFPA Compliance: Comply with NFPA 110.
- D. Environmental Conditions: Battery charger shall withstand the following environmental conditions without mechanical or electrical damage or degradation of performance capability:
 - 1. Ambient Temperature: **Minus 40 to plus 158 deg F (minus 40 to plus 70 deg C)** with full charger output available up to **104 deg F (40 deg C)**.
 - 2. Relative Humidity: 5 to 95 percent.
 - 3. Altitude: Meets full performance from sea level to **5000 feet (1600 m)**. Chargers installed at higher altitudes may automatically derate output power to prevent overheating of internal components, but shall remain operable.
 - 4. Electromagnetic Immunity: Charger power terminals shall be immune to conducted and radiated electromagnetic energy to IEC 61000-4-12.
 - 5. Vibration Resistance: Charger enclosure rated to IEC 60068-2-6 vibration test; 4-g force from 18 to 500 Hz on 3 axes; and 0.01 power spectral density value from 20 to 500 Hz.
- E. Seismic Performance: Battery chargers shall withstand the effects of earthquake motions determined according to **[IBC 2006][IBC 2009][IBC 2012][IBC 2015][the latest edition of the IBC][ASCE/SEI 7]<Insert requirement>**.
 - 1. Shake-Table Testing: Comply with ICC-ES AC156.
 - 2. The term "withstand" means "the unit will remain in place without separation of any parts from the device when subjected to the seismic forces specified **and the unit will be fully operational after the seismic event**."
 - 3. Component Importance Factor: **[1.5][1.0]**.
 - 4. Equipment seismic application, spectral response acceleration, short period (Sds) for Project is

[indicated on Drawings]<Insert requirements>.

F. Battery-Charger Power Conversion Energy Efficiency:

1. Certified to California Code of Regulations, Title 20, "Appliance Efficiency Regulations"; <https://cacertappliances.energy.ca.gov/Pages/ApplianceSearch.aspx>.
2. Comply with Oregon Department of Energy standards for appliance energy efficiency.

2.2 BATTERY CHARGERS FOR EMERGENCY ENGINE GENERATORS

A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. **[Cummins Power Generation]**
2. **[GE Power; General Electric Company]**
3. **[Stored Energy Systems LLC]**
4. **<Insert manufacturer's name>**

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[Cummins Power Generation]**
2. **[GE Power; General Electric Company]**
3. **[Stored Energy Systems LLC]**
4. **<Insert manufacturer's name>**

C. Source Limitations: Obtain battery chargers from single source from single manufacturer.

D. Battery-Charger Operation: Current-limited, constant-voltage, automatic-boost type charger designed for **[lead-acid][nickel-cadmium]** batteries, with the following features:

1. Automatic Boost Mode: Operates in boost charging mode after battery discharge. Boost duration automatically adjusted depending on the following:
 - a. Differing depths of battery discharge.
 - b. Differing relationships of battery amp-hour capacity to charger ampere output.
 - c. Differing parasitic direct current loads.
2. Output Voltage Regulation: Charger regulates output to within plus or minus 0.5 percent of manufacturer-provided voltage settings despite variations of input voltage, input frequency, and output current.
3. Battery Thermal Compensation: Battery temperature compensation with adjustable slope, factory set at minus 0.18 percent per degree C, and equipped for sensing battery temperature. **[Include battery temperature sensor mounted on battery negative terminal.]**
4. Automatic Dead Battery Recharge: Charger automatically recharges a battery discharged to 0 V at full-rated output current, without the need for user intervention.
5. AC Input: Charger operates from any 47- to 63-Hz ac source with voltage ranging from 90- to 265-V rms.
6. Lead-Acid Battery Longevity and Safety Mode: Charger emulates vehicle duty for which starting batteries are designed to maximize battery life, minimize battery explosion risk, and minimize electrolyte loss in lead-acid batteries:
 - a. Boost Mode Recharge: After recharge is complete in boost mode, charger reverts to a voltage just above battery open-circuit voltage, for the majority of battery-charger operating

- hours, when fully charged. The charger remains in operation to prevent battery discharge.
- b. Float Mode: Charger periodically elevates output voltage to ensure a fully charged battery, charger then returns to just above battery nominal voltage. Charger repeats this cycle until the next battery discharge, when the battery shall be recharged in the boost mode.

- 7. Charger Enclosure: NEMA 250, **[Type 1 (IP20)][Type 3R (IP22)]**, wall mounted and rated for generator duty with charger enclosure vibration resistance. Housing materials: aluminum or stainless steel.

E. Battery-Charger Status Indication and Alarms:

- 1. Output Voltage and Current: Digital or analog meters on front panel, or by conveying performance data to generator control panel via J-1939 datalink. Accuracy: Plus 2 percent for voltage and plus 5 percent for current.
- 2. Alarm Outputs: **[Individual Form C contacts][Single summary Form C contact]**, or by conveying alarms to generator control panel via J-1939 datalink.
 - a. AC voltage failure.
 - b. Low dc voltage.
 - c. High dc voltage.
 - d. Low cranking voltage.

2.3 SOURCE QUALITY CONTROL

- A. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to evaluate battery-charger fabricator's quality-control and testing methods.
- B. Testing: Test and inspect battery chargers according to UL 1236 for Category BBHH recharge performance.
- C. Factory Tests: Test and inspect assembled battery chargers to manufacturer's written instructions. Verify NFPA 110 recharge performance by validating that battery charger is listed to UL 1236 Category BBHH on the UL certification database.
- D. Battery charger will be considered defective if it does not pass tests and inspections.
- E. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas, mounting locations, and conditions, with Installer present, for compliance with requirements for installation and other conditions affecting battery-charger performance.
- B. Examine roughing-in for conduit systems and electrical connections to verify actual locations of connections before battery-charger installation.
- C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 BATTERY-CHARGER INSTALLATION

- A. Follow manufacturer's written instructions to prevent damage from static electricity. Provide clearances for service and ventilation.
- B. Battery chargers are configured at the factory. If settings need to be field-configured, follow manufacturer's setup written instructions.
- C. Coordinate jumper datalinks with emergency generator control panel capabilities.

3.3 CONNECTIONS

- A. Ground equipment according to Section 260526 "Grounding and Bonding for Electrical Systems."
- B. Connect wiring according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables." Provide branch-circuit overcurrent protection.
- C. Comply with requirements for branch-circuit protection and service disconnects in Section 262816 "Enclosed Switches and Circuit Breakers."

3.4 IDENTIFICATION

- A. Identify system components according to Section 260553 "Identification for Electrical Systems."

3.5 FIELD QUALITY CONTROL

- A. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to perform tests and inspections.
- B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
- C. Perform the following tests and inspections[**with authorities having jurisdiction**][**with the assistance of a factory-authorized service representative**]:
 - 1. Verify that certification labels are properly installed. Verify NFPA 110 compliance by validating that battery charger is listed to UL 1236 Category BBHH on the UL certification database.
 - 2. Verify that connections are secure and in the proper locations. Ensure wiring is correctly connected between charger and battery.
 - 3. Operational Test: After electrical circuitry has been energized, apply input voltage to confirm proper unit operation.
 - 4. Test and adjust alarms, display indicators, controls, and safeties.
- D. Battery charger will be considered defective if it does not pass tests and inspections.
- E. Prepare test and inspection reports.

3.6 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain battery chargers and related equipment.

26 - Electrical

-
- B. Coordinate this training with that for emergency engine generator equipment.

END OF SECTION 26 33 43 00

SECTION 26 33 43 00A - PUBLIC ADDRESS SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Public address systems.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 078413 "Penetration Firestopping" specifies materials and methods for sealing penetrations of rated walls and partitions referenced by this Section.
5. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding equipment referenced by this Section.
6. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
7. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic-[**and wind**]-control devices referenced by this Section.
8. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
9. Section 262716 "Electrical Cabinets and Enclosures" specifies rack or frame system enclosures referenced by this Section.
10. Section 270528 "Pathways for Communications Systems"[**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for raceway materials, routing, locations, and identification of communications equipment and cabling.
11. Section 284600 "Fire Detection and Alarm" specifies fire-alarm system interfaces referenced by this Section.
12. Section 284700 "Mass Notification" specifies mass notification system interfaces referenced by this Section.

1.2 DEFINITIONS

- A. Channels: Separate parallel signal paths, from sources to loudspeakers or loudspeaker zones, with separate amplification and switching that permit selection between paths for speaker alternative program signals.
- B. FAS: Fire alarm system.
- C. I&TFAS: Inspection and testing of fire alarm system.
- D. NICET: National Institute for Certification in Engineering Technologies, a division of the National Society of Professional Engineers.

- E. SPDT: Single pole, double throw.
- F. VU: Volume unit.
- G. Zone: Separate group of loudspeakers and associated supply wiring that may be arranged for selective switching between different channels.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
 - c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for submitted product.
- B. Shop Drawings: For power, signal, and control wiring.
 - 1. Include plans, elevations, sections, and attachment details.
 - 2. Include details of equipment assemblies. Indicate dimensions, weights, required clearances, method of field assembly, components, and location and size of each field connection.
 - 3. Console layouts.
 - 4. Control panels.
 - 5. Rack arrangements.
 - 6. Calculations: For sizing backup battery.
 - 7. Wiring Diagrams: For power, signal, and control wiring.
 - a. Identify terminals to facilitate installation, operation, and maintenance.
 - b. Single-line diagram showing interconnection of components.
 - c. Cabling diagram showing cable routing.
- C. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturer's published instructions.
- B. Field Reports:
 - 1. Manufacturer's field reports for field quality-control support.
 - 2. Manufacturer's field reports for system startup support.

1.5 MAINTENANCE MATERIAL SUBMITTALS

- A. Extra stock material.

1.6 QUALIFICATIONS

- A. Fire-Alarm Systems (FAS) Technician Trainee: Having at least six months of experience and possessing active NICET FAS Level I certification. Able to perform limited tasks under direct supervision.
- B. Fire-Alarm Systems (FAS) Associate Engineering Technician: Having at least two years of experience and possessing active NICET FAS Level II certification. Able to review drawings, specifications, codes, and standards; to conduct basic installation activities; and to perform basic troubleshooting.
- C. Fire-Alarm Systems (FAS) Engineering Technician: Having at least five years of experience and possessing active NICET FAS Level III certification. Able to perform system layout activities, to supervise Level I and Level II technicians, to provide submittal packages, and to interact with authorities having jurisdiction.
- D. Fire-Alarm Systems (FAS) Senior Engineering Technician: Having at least 10 years of experience and possessing active NICET FAS Level IV certification. Able to manage multiple projects at once, to interpret codes and standards, to conduct training, and to serve as liaison between authorities having jurisdiction, owners, engineers, and contractors.
- E. Inspection and Testing of Fire-Alarm Systems (I&TFAS) Technician I: Possessing active NICET I&TFAS Level I certification. Able to perform periodic inspections and tests of basic fire-alarm systems and to prepare related records and reports.
- F. Inspection and Testing of Fire-Alarm Systems (I&TFAS) Technician II: Possessing active NICET I&TFAS Level II certification. Able to plan, perform, and coordinate periodic inspections and tests of complex fire-alarm systems (including one or more of suppression interfaces, networked control units, smoke-control interfaces, air-sampling systems, multi-zone voice evacuation systems, or high-rise applications) and to prepare related records and reports.
- G. Fire-Alarm Cable Installer: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with training and manufacturer certification to install, splice, and terminate fire-alarm cabling.
 - 1. On-site fire-alarm cable installation supervisor must possess active NICET FAS **[Senior]**Engineering Technician certification.
- H. Fire-Alarm Testing Agency: Entity possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site fire-alarm testing supervisor must possess active NICET I&TFAS Technician **[I][II]** certification.
- I. Communications Design Professional: Design professional possessing active qualifications specified in Section 014000 "Quality Requirements" and the following:
 - 1. Expertise in design of communications infrastructure and distribution equipment.
 - 2. BICSI Registered Communications Distribution Designer (RCDD)[**or Outside Plant Designer (OSP)**] certification.

- J. Communications Cable Installer: Entity possessing active qualifications specified in Section 014000

"Quality Requirements" and the following:

1. Training and manufacturer certification to install, splice, and terminate communications cabling.
 2. Installation Supervisor: BICSI Technician (TECH) certification.
 3. Copper Installers: **[30 percent]<Insert quantity>** of employees possess BICSI Copper Installer 2 (INSTC) certification. Remaining employees possess BICSI Installer 1 (INST1) certification.
- K. Communications Testing and Inspecting Agency: Entity possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
1. On-site communications testing supervisor must have **[BICSI Technician (TECH)]<Insert certification program>** certification and documented training, and be experienced with testing communications equipment in accordance with **[BICSI]<Insert code enforced by authorities having jurisdiction>** testing standards.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Functional Description:
1. Selectively connect any zone to any available signal channel.
 2. Selectively control sound from microphone outlets and other inputs.
 3. "All-call" feature must connect the all-call sound signal simultaneously to all zones regardless of zone or channel switch settings.
 4. Telephone paging adapter must allow paging by dialing an extension from any local telephone instrument and speaking into the telephone.
 5. Produce a program-signal tone that is amplified and sounded over all speakers, overriding signals currently being distributed.
 6. Reproduce high-quality sound that is free of noise and distortion at all loudspeakers at all times during equipment operation, including standby mode with inputs off, and output free of nonuniform coverage of amplified sound.
 7. Compatibility of Components: Coordinate component features to form an integrated system. Match components and interconnections for optimum performance of specified functions.
 8. Equipment must be modular, using solid-state components, and fully rated for continuous duty unless otherwise indicated. Select equipment for normal operation on input power usually supplied at 110 to 130 V, 60 Hz.
 9. Equipment Mounting: Where rack or cabinet mounting is indicated, equipment must be designed to mount in a **19 inch (483 mm)** housing complying with Section 262716 "Electrical Cabinets and Enclosures."
- C. Seismic and Wind Performance: Installed assembly must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
1. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[, **and unit must be fully operational after seismic events**].
 2. Component Importance Factor (Ip): **[1.0][1.5]**.
 3. Component Amplification Factor (ap): **[1.0][2.5]<Insert value>**.

4. Component Response Modification Factor (Rp): **[1.5][2.0][2.5][6.0]<Insert value>**.
5. Component Overstrength Factor (Ω_o): **[1.5][2.5]<Insert value>**.

2.2 PUBLIC ADDRESS SYSTEMS

A. UL AZOT - Public Address System :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Altec Lansing Technologies, Inc]**
 - b. **[Atlas Sound LP]**
 - c. **[Bogen Communications, Inc]**
 - d. **[Bosch Security Systems, Inc.]**
 - e. **[Edwards; Carrier Global Corporation]**
 - f. **[Federal Signal Corporation]**
 - g. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Altec Lansing Technologies, Inc]**
 - b. **[Atlas Sound LP]**
 - c. **[Bogen Communications, Inc]**
 - d. **[Bosch Security Systems, Inc.]**
 - e. **[Edwards; Carrier Global Corporation]**
 - f. **[Federal Signal Corporation]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain public address system from single source from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:
 - a. Audio Equipment: UL CCN AZOT, including UL 62368-1[; **or UL CCN AZJX, including UL 813**][; **or UL CCN AZSQ, including UL 60065**].
 - b. Weather-Resistant Equipment: Marked for use in wet or damp locations.

B. Preamplifiers:

1. Separately mounted.
2. Integral to power amplifier.
3. Output Power: Plus 4 dB above 1 mW at matched power-amplifier load.
4. Total Harmonic Distortion: Less than 1 percent.
5. Frequency Response: Within plus or minus 2 dB from 20 to 20 000 Hz.
6. Input Jacks: Minimum of three. One matched for low-impedance microphone; one USB port; and the other matchable to DVD or CD player, or radio tuner signals without external adapters.
7. Minimum Noise Level: Minus 55 dB below rated output.
8. Controls: On-off, input levels, and master gain.

C. Power Amplifiers:

1. Mounting: [Console][Rack].
2. Output Power: 70 V balanced line. [80 percent of the sum of wattage settings of connected]<Insert wattage> for each station and speaker connected in all-call mode of operation, plus a [10 percent][15 percent][25 percent] allowance for future stations.
3. Total Harmonic Distortion: Less than 3 percent at rated power output from 50 to 12 000 Hz.
4. Minimum Signal-to-Noise Ratio: 80 dB, at rated output.
5. Frequency Response: Within plus or minus 3 dB from 20 to 12 000 Hz.
6. Output Regulation: Less than 2 dB from full to no load.
7. Controls: On-off, input levels, and low-cut filter.
8. Input Sensitivity: Matched to preamplifier and to provide full-rated output with sound-pressure level of less than 10 dynes/sq. cm impinging on speaker microphone or handset transmitter.

D. Transfer to Standby Amplifier:

1. Monitoring Circuit and Sensing Relay: Detect reduction in output of power amplifier of 40 percent or more and, in such event, transfer load and signal automatically to standby amplifier.

E. Paging Microphone:

1. Type: Dynamic, with [cardioid][omnidirectional] polar characteristic.
2. Impedance: [500 Ω][250 Ω].
3. Frequency Response: Uniform, 50 to 15 000 Hz.
4. Sensitivity: Minus 70 dB.
5. Output Level: Minus 58 dB, minimum.
6. Cable: Braided shield cable with [Amphenol][Neutrik] XLR connectors. Coordinate impedance with microphone impedance.
7. Mounting: Desk stand with integral-locking, press-to-talk switch.

F. <Insert requirements for other microphone types>.

G. Volume Limiter/Compressor Minimum Performance Requirements:

1. Frequency Response: 45 to 15 000 Hz, plus or minus 1 dB minimum.
2. Reduction Ratio: Automatically vary compression ratio, and attack and release times for voice and music inputs.
 - a. Compression Ratio Range: 3:1 to 10:1 minimum.
 - b. Averaging Compressor Attack Time: Up to 500 ms.
 - c. Signal Fast Compression Attack Time: Less than 10 ms.
 - d. Release time: Up to 500 ms.
3. Distortion: 0.5 percent, maximum.
4. Rated Output: Minimum of plus 14 dB.
5. Inputs: Minimum of two inputs with variable front-panel gain controls and VU or decibel meter for input adjustment.
6. Rack mounted.

H. Control Console Enclosure:

1. Cabinet: Modular, [desktop][desk style]; complying with EIA/ECA-310-E.
2. Housing: Steel, 0.0478 inch (1.2 mm) minimum, with removable front and rear panels. Side panels are removable for interconnecting side-by-side mounting.
3. Panel for Equipment and Controls: Rack mounted.
4. Controls:

- a. Switching devices to select signal sources for distribution channels.
 - b. Program selector switch to select source for each program channel.
 - c. Switching devices to select zones for paging.
 - d. All-call selector switch.
5. Indicators: A visual annunciation for each distribution channel to indicate source being used.
 6. Self-Contained Power and Control Unit: A single assembly of basic control, electronics, and power supply necessary to accomplish specified functions.
 7. Spare Positions: 20 percent spare zone control and annunciation positions on console.
 8. Microphone jack.
- I. Equipment Cabinet Enclosure:
1. Comply with requirements in Section 262716 "Electrical Cabinets and Enclosures."
 2. House amplifiers and auxiliary equipment at each location.
 3. Cabinet Housing:
 - a. Front- and rear-locking doors.
 - b. Arranged for floor or wall mounting as indicated.
 - c. Sized to house all equipment indicated, plus spare capacity.
 - d. Include [20]<Insert number> percent minimum spare capacity for future equipment in addition to space required for[future] DVD or CD player.
 4. Power Provisions: A single switch in cabinet disconnects cabinet power distribution system and electrical outlets, which must be uniformly spaced to accommodate AC power cords for each item of equipment.
 5. Ventilation: A low-noise fan for forced-air cabinet ventilation. Fan must be equipped with a filtered input vent and must be connected to operate from 105 to 130 V(ac), 60 Hz; separately fused and switched; arranged to be powered when main cabinet power switch is on.
- J. Equipment Rack Enclosure:
1. Racks: **19 inch (483 mm)** standard, complying with requirements in Section 262716 "Electrical Cabinets and Enclosures."
 2. Power-Supply Connections: Compatible plugs and receptacles.
 3. Enclosure Panels: Ventilated rear and sides and solid top. Use louvers in panels to ensure adequate ventilation.
 4. Finish: Uniform, baked-enamel factory finish over rust-inhibiting primer.
 5. Power-Control Panel: On front of equipment housing, with master power on-off switch and pilot light; and with cartridge fuse protection for rack equipment power.
 6. Service Light: At top rear of rack with an adjacent control switch.
 7. Vertical Plug Strip: Grounded receptacles, **12 inch (300 mm)** on center; the full height of rack for public address system equipment use only.
 8. Maintenance Receptacles: Duplex convenience outlets supplied independent of vertical plug strip and located in front and bottom rear of rack.
 9. Spare Capacity: [20]<Insert number> percent in rack for future equipment.
- K. Telephone Paging Adapter:
1. Adapters must accept voice signals from telephone extension dialing access and automatically provide amplifier input and program override for preselected zones.
 - a. Minimum Frequency Response: Flat, 200 to 2500 Hz.
 - b. Impedance Matching: Adapter matches telephone line to public address equipment input.
 - c. [Rack][Cabinet] mounted.

L. Tone Generator:

1. Provide clock and program interface with public address system.
2. Signals: Minimum of seven distinct, audible signal types including wail, warble, high/low, alarm, repeating and single-stroke chimes, and tone.
3. Pitch Control: Chimes and tone.
4. Volume Control: All outputs.
5. Activation-Switch Network: Establishes priority and hierarchy of output signals produced by different activation setups.
6. Mounting: **[Rack][Cabinet]**.

M. Monitor Panel:

1. Monitor power amplifiers.
2. Components: VU or dB meter, speaker with volume control, and multiple-position rotary selector switch.
3. Selector Switch and Volume Control: Selective monitoring of output of each separate power amplifier via VU or dB meter and speaker.
4. Mounting: **[Rack][Cabinet]**.

N. Cone-Type Loudspeakers:

1. Minimum Axial Sensitivity: 91 dB at 1 m, with 1 W input.
2. Frequency Response: Within plus or minus 3 dB from 50 to 15 000 Hz.
3. Size: **[6 inch (150 mm)][8 inch (200 mm)]** with **1 inch (25 mm)** voice coil and minimum **5 oz (140 g)** ceramic magnet.
4. Rated Output Level: **[8][10]** W.
5. Minimum Dispersion Angle: 100 degrees.
6. Matching Transformer: Full-power rated with four taps. Maximum insertion loss of 0.5 dB.
7. Surface-Mounted Units: Ceiling, wall, or pendant mounted, as indicated, in steel back boxes, acoustically dampened. Front face of at least **0.0478 inch (1.2 mm)** steel and whole assembly rust proofed and shop primed for field painting.
8. Flush-Ceiling-Mounted Units: In steel back boxes, acoustically dampened. Metal ceiling grille with **[white]<Insert color>** baked enamel.

O. Horn-Type Loudspeakers:

1. Type: Single-horn units, double-reentrant design, with minimum full-range power rating of 15 W.
2. Matching Transformer: Full-power rated with four standard taps. Maximum insertion loss of 0.5 dB.
3. Frequency Response: Within plus or minus 3 dB from 250 to 12 000 Hz.
4. Dispersion Angle: 130 by 110 degrees.
5. Mounting: Integral bracket.
6. Units in Damp, Wet, or Outdoor Locations: Listed and labeled for environment in which they are located.
7. Units in Hazardous (Classified) Locations: Listed and labeled for environment in which they are located. Provide any accessories required to maintain listing.

P. Noise-Operated Gain Controller:

1. Gain controller must be designed to continuously sense space noise level and automatically adjust signal level to local speakers.
2. Frequency Response: 20 to 20 000 Hz, plus or minus 1 dB.
3. Level Adjustment Range: 30 dB minimum.
4. Maximum Distortion: 0.5 percent.

5. Control: Permits adjustment of sensing level of device.

Q. Outlets:

1. Volume Attenuator Station: Wall-plate-mounted autotransformer type with paging priority feature.
 - a. Wattage Rating: 10 W unless otherwise indicated.
 - b. Attenuation per Step: 3 dB, with positive off position.
 - c. Insertion Loss: 0.4 dB maximum.
 - d. Attenuation Bypass Relay: SPDT. Connected to operate and bypass attenuation when all-call, paging, program signal, or prerecorded message features are used. Relay returns to normal position at end of priority transmission.
 - e. Label: "PA Volume."
2. Microphone Outlet: Three-pole, polarized, locking-type, microphone receptacles in single-gang boxes. Equip wall outlets with brushed stainless-steel device plates. Equip floor outlets with gray tapered rubber or plastic cable nozzles and fixed outlet covers.
3. Headphone Outlet (for the Hearing Impaired): Microphone receptacles in single-gang boxes. Equip wall outlets with brushed stainless-steel device plates. Equip floor outlets with gray tapered rubber or plastic cable nozzles and fixed-outlet covers.

R. Battery Backup Power Unit:

1. Rack mounted, consisting of time-delay relay, sealed lead-calcium battery, battery charger, on-off switch, "normal" and "emergency" indicating lights, and adequate capacity to supply maximum equipment power requirements for one hour of continuous full operation.
2. Supplies public address equipment with 12 to 15 V(dc) power automatically during an outage of normal 120 V(ac) power.
3. Float charge batteries when not supplying system and able to transfer automatically to supply system after three to five seconds of continuous outage of normal power, as sensed by time-delay relay.
4. Automatically retransfer system to normal supply when normal power has been reestablished for three to five seconds continuously.

S. Conductors and Cables:

1. Jacketed, twisted pair and twisted multipair, untinned solid copper.
 - a. Insulation for Wire in Conduit: Thermoplastic, not less than **1/32 inch (0.8 mm)** thick.
 - b. Microphone Cables: Neoprene jacketed, not less than **2/64 inch (0.8 mm)** thick, over shield with filled interstices. Shield 34 AWG, tinned, soft-copper strands formed into a braid or approved equivalent foil. Shielding coverage on conductors is not less than 60 percent.
 - c. Plenum Cable: Listed and labeled for plenum installation.

T. Conduits and Boxes:

1. Flexible metal conduit is not permitted.
2. Outlet Boxes: Not less than **2 inch (50 mm)** wide, **3 inch (75 mm)** high, and **2-1/2 inch (64 mm)** deep.

2.3 MAINTENANCE MATERIAL ITEMS

- A. Extra Stock Material: Furnish to Owner extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.[**Include the following:**]

1. Microphone: [One]<Insert number>.
2. Microphone Desk Stand(s): [One]<Insert number>.

PART 3 - EXECUTION

3.1 INSTALLATION OF COMMUNICATIONS CABLE PATHWAYS

A. Comply with NECA NEIS 1.

B. Special Installation Techniques:

1. Install manufactured conduit sweeps and long-radius elbows whenever possible.
2. Wiring Method:
 - a. Install cables in pathways and cable trays except within consoles, cabinets, desks, and counters[, **and except in accessible ceiling spaces and in gypsum board partitions where unenclosed wiring method may be used**]. Conceal pathway and cables except in unfinished spaces.
 - 1) Install plenum cable in environmental air spaces, including plenum ceilings.
 - 2) Install pathways and boxes for communications cabling.
 - b. Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
3. Wiring within Enclosures: Bundle, lace, and train cables to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.
4. Terminate conductors; no cable may contain unterminated elements. Make terminations only at outlets and terminals.
5. Splices, Taps, and Terminations: Arrange on numbered terminal strips in junction, pull, and outlet boxes; terminal cabinets; and equipment enclosures. Cables may not be spliced.
6. Secure and support cables at intervals not exceeding **30 inch (760 mm)** and not more than **6 inch (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
7. Bundle, lace, and train conductors to terminal points without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.
8. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation and replace it with new cable.
9. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps may not be used.
10. Open-Cable Installation:
 - a. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
 - b. Suspend speaker cable not in a wireway or pathway a minimum of **8 inch (200 mm)** above ceiling by cable supports not more than [**60 inch (1524 mm)**]<Insert dimension> apart.
 - c. Do not run cables through structural members or in contact with pipes, ducts, or other potentially damaging items.
11. Separation of Wires: Separate speaker-microphone, line-level, speaker-level, and power wiring runs. Install in separate pathways or, where exposed or in same enclosure, separate conductors at least **12 inch (300 mm)** apart for speaker microphones and adjacent parallel power and telephone wiring. Separate other communication equipment conductors as recommended by

equipment manufacturer.

3.2 INSTALLATION OF PUBLIC ADDRESS SYSTEM

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Fire-Alarm and Premises Security Work: NFPA 72, NFPA 731, and NECA NEIS 305.
 - 3. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 4. Communications Work: BICSI N1.
 - 5. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
 - 1. Coordinate layout and installation of system components and suspension system with other construction that penetrates ceilings or is supported by them, including light fixtures, HVAC equipment, fire-suppression system, and partition assemblies.
 - 2. Match input and output impedances and signal levels at signal interfaces. Provide matching networks where required.
 - 3. Identification of Conductors and Cables: Color-code conductors and apply wire and cable marking tape to designate wires and cables so they identify media in coordination with system wiring diagrams.
 - 4. Equipment Cabinets and Racks:
 - a. Group items of same function together, either vertically or side by side, and arrange controls symmetrically. Mount monitor panel above the amplifiers.
 - b. Arrange all inputs, outputs, interconnections, and test points so they are accessible at rear of rack for maintenance and testing, with each item removable from rack without disturbing other items or connections.
 - c. Blank Panels: Cover empty space in equipment racks so entire front of rack is occupied by panels.
 - 5. Volume Limiter/Compressor: Equip each zone with a volume limiter/compressor. Install in central equipment cabinet. Arrange to provide a constant input to power amplifiers.
 - 6. Wall-Mounted Outlets: Flush mounted.
 - 7. Floor-Mounted Outlets: Conceal in floor and install cable nozzles through outlet covers. Secure outlet covers in place. Trim with carpet in carpeted areas.
 - 8. Conductor Sizing: Unless otherwise indicated, size speaker circuit conductors from racks to loudspeaker outlets not smaller than 18 AWG and conductors from microphone receptacles to amplifiers not smaller than 22 AWG.
 - 9. Weatherproof Equipment: For units that are mounted outdoors, in damp locations, or where exposed to weather, install consistent with requirements of weatherproof rating.
 - 10. Speaker-Line Matching Transformer Connections: Make initial connections using tap settings indicated on the Drawings.
- D. Interfaces with Other Work:
 - 1. Seal penetrations of rated walls and partitions.
 - 2. Identification: Provide labels for public address system equipment and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.

- b. Label each enclosure with engraved metal or laminated-plastic nameplate.
- c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.

3. Grounding and Bonding:

- a. Ground cable shields and equipment to eliminate shock hazard and to minimize ground loops, common-mode returns, noise pickup, cross talk, and other impairments.
- b. Signal Ground Terminal: Locate at main equipment cabinet. Isolate from power system and equipment grounding.
- c. Install grounding electrodes.

3.3 FIELD QUALITY CONTROL OF PUBLIC ADDRESS SYSTEM

A. Administrant for Communications Tests and Inspections:

- 1. **[Owner][Tenant]** will engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
- 2. Engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
- 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
- 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Administrant for Fire-Alarm Tests and Inspections:

- 1. **[Owner][Tenant]** will engage qualified fire-alarm testing and inspecting agency to administer and perform tests and inspections.
- 2. Engage qualified fire-alarm testing and inspecting agency to administer and perform tests and inspections.
- 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
- 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Acceptance Testing Preparation:

- 1. **<Insert requirements>**.

D. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

E. Tests and Inspections:

- 1. Schedule tests with at least seven days' advance notice of test performance.
- 2. After installing public address system and after electrical circuitry has been energized, test for compliance with requirements.
- 3. Operational Test: Perform tests that include originating program and page messages at microphone outlets, preamplifier program inputs, and other inputs. Verify proper routing and volume levels and that system is free of noise and distortion.
- 4. Signal-to-Noise Ratio Test: Measure signal-to-noise ratio of complete system at normal gain settings as follows:

- a. Disconnect microphone at connector or jack closest to it and replace it in the circuit with a

signal generator using a 1000 Hz signal. Replace all other microphones at corresponding connectors with dummy loads, each equal in impedance to microphone it replaces. Measure signal-to-noise ratio.

- b. Repeat test for each separately controlled zone of loudspeakers.
 - c. Minimum acceptance ratio is 50 dB.
5. Distortion Test: Measure distortion at normal gain settings and rated power. Feed signals at frequencies of 50, 200, 400, 1000, 3000, 8000, and 12 000 Hz into each preamplifier channel. For each frequency, measure distortion in the paging and all-call amplifier outputs. Maximum acceptable distortion at any frequency is 3 percent total harmonics.
 6. Acoustic Coverage Test: Feed pink noise into system using octaves centered at 500 and 4000 Hz. Use sound-level meter with octave-band filters to measure level at five locations in each zone. For spaces with seated audiences, maximum permissible variation in level is plus or minus 2 dB. In addition, the levels between locations in same zone and between locations in adjacent zones must not vary more than plus or minus 3 dB.
 7. Power Output Test: Measure electrical power output of each power amplifier at normal gain settings of 50, 1000, and 12 000 Hz. Maximum variation in power output at these frequencies must not exceed plus or minus 1 dB.
 8. Signal Ground Test: Measure and report ground resistance at public address equipment signal ground.
 9. Inspection: Verify that units and controls are properly labeled and interconnecting wires and terminals are identified. Prepare a list of final tap settings of paging speaker-line matching transformers.
- F. Nonconforming Work:
1. Public address system will be considered defective if it does not pass tests and inspections.
 2. Remove and replace defective units and retest.
- G. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.
1. Include a record of final speaker-line matching transformer-tap settings and signal ground-resistance measurement certified by Installer.
- H. Manufacturer Services: Engage factory-authorized service representative to [support][supervise] field tests and inspections.
1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.
- 3.4 STARTUP SERVICE
- A. Perform startup service.
1. Verify that electrical wiring installation complies with manufacturer's submittal and installation requirements.
 2. Complete installation and startup checks according to manufacturer's written instructions.
- B. Manufacturer Services: Engage factory-authorized service representative to [support][supervise] system startup.
1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project site.

3.5 ADJUSTING

- A. On-Site Assistance: Engage a factory-authorized service representative to provide on-site assistance in adjusting sound levels, resetting transformer taps, and adjusting controls to meet occupancy conditions.
- B. Occupancy Adjustments: When requested within [12]<Insert number> months of date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions. Provide up to [two]<Insert number> visits to the Project during other-than-normal occupancy hours for this purpose.

3.6 CLOSEOUT ACTIVITIES

- A. Training:
 - 1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel to adjust, operate, and maintain the public address system and equipment. Refer to Section 017900 "Demonstration and Training."

3.7 PROTECTION

- A. After installation, protect public address system equipment from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

END OF SECTION 26 33 43 00A

SECTION 26 33 43 00B - NURSE CALL CODE BLUE SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

- A. Section Includes:
 - 1. Visual/tone nurse-call system.
 - 2. Audiovisual/voice nurse-call system.

1.2 ACTION SUBMITTALS

- A. Product Data:
 - 1. Visual/tone nurse-call system.
 - 2. Audiovisual/voice nurse-call system.
- B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.
 - 1. Detail equipment cabinets and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
 - 2. Cabling Diagrams: Single-line block diagrams showing cabling interconnection of all components for this specific equipment. Include cable type for each interconnection.
 - 3. Station Installation Details: For built-in equipment, dimensioned and to scale.

1.3 INFORMATIONAL SUBMITTALS

- A. Qualification Data: For qualified Installer.
- B. Field quality-control reports.
- C. Warranty: Sample of special warranty.

1.4 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For nurse-call equipment to include in emergency, operation, and maintenance manuals.

1.5 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Lamps: All colors for corridor dome lights and zone lights equal to [20]<Insert number> percent of amount installed.
 - 2. Fuses: One for every 10 of each type and rating, but no fewer than <Insert quantity> of each.
 - 3. Printed Circuit Boards: Each kind, equal to [10]<Insert number> percent of amount installed, but

- no fewer than one unit.
- 4. Master-Station Privacy Handset: **[One]<Insert number>**.
- 5. System program backup software.

1.6 QUALITY ASSURANCE

- A. Installer Qualifications: Manufacturer's authorized representative who is trained and approved for installation of units required for this Project.
- B. Compatibility: System shall be capable of integration with any brand of phone system (wired or wireless), staff locating system, CCTV, and fire-alarm system.
- C. Electrical Components, Devices, and Accessories: Listed and labeled according to UL 1069 as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

1.7 WARRANTY

- A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace batteries that fail in materials or workmanship within specified warranty period. Special warranty for batteries applies to materials only, on a prorated basis for specified period.
 - 1. Warranty Period: Include the following warranty periods, from date of Substantial Completion:
 - a. Nickel-Cadmium Batteries, Lithium Batteries, and Wet-Cell Batteries:
 - 1) Full Warranty: **[Five]<Insert number>** years.
 - 2) Pro Rata: **[15]<Insert number>** years.

1.8 SOFTWARE SERVICE AGREEMENT

- A. Technical Support: Beginning with Substantial Completion, provide software support for **[two]<Insert number>** years.
- B. Upgrade Service: Update software to latest version at Project completion. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. Upgrading software shall include operating system. Upgrade shall include new or revised licenses for use of software.
 - 1. Provide **[30]<Insert number>** days' notice to Owner to allow scheduling and access to system and to allow Owner to upgrade computer equipment if necessary.

PART 2 - PRODUCTS

2.1 NURSE-CALL SYSTEM GENERAL REQUIREMENTS

- A. Station Zones: Able to program **[256]<Insert number>** station zones for each master station in the network with **[eight]<Insert number>** priority levels and addressable visual and audible annunciation of audible devices such as smoke detectors and door contacts.

- B. System shall provide integrated and centralized "Code Blue" and "Staff Emergency" calls.
- C. Expansion Capability: Equipment ratings, housing volume, spare keys, switches, relays, annunciator modules, terminals, and cable conductor quantities adequate to increase the number of stations in the future by **[25]<Insert number>** percent above those indicated without adding internal or external components or main trunk cable conductors.
- D. Existing System Compatibility: Functionally and electrically compatible with existing system so components and wiring operate as an extension or upgrade of the existing system and existing or upgraded functional performance of the existing system applies to the entire final system. Colors, tones, types, and durations of signal manifestation shall be common among new and existing systems.
- E. Resistance to Electrostatic Discharge: System, components, and cabling, and the selection, arrangement, and connection of materials and circuits, shall be protected against damage or diminished performance when subjected to electrostatic discharges of up to 25,000 V in an environment with a relative humidity of 20 percent or less.
- F. Equipment: Microprocessor, electronic, modular.
- G. Master Nurse-Call Station: Programmed via a PC.
- H. Wall-Mounted Component Connection Method: Components connect to system wiring in back boxes with factory-wired plug connectors.
- I. Telephone Interface: Permit use of wired and wireless telephones to execute nurse-call master station functions.
- J. Third-Party Pager Interface: Programmable to send tone, numeric, and alphanumeric message to pocket pagers or personal digital assistants and to use industry standard-protocol, RS-485 interface.

2.2 VISUAL/TONE NURSE-CALL SYSTEM

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[Aiphone Corporation]**
 - 2. **[Alpha Communications]**
 - 3. **[Ascom North America]**
 - 4. **[Cornell Communications, Inc]**
 - 5. **[Intego Systems, Inc.]**
 - 6. **[Intercall Systems, Inc]**
 - 7. **[Jeron Electronic Systems, Inc]**
 - 8. **[Rauland-Borg Corporation]**
 - 9. **[Simplex; brand of Johnson Controls International plc, Building Solutions North America]**
 - 10. **[TekTone Sound & Signal Mfg., Inc.]**
 - 11. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[Aiphone Corporation]**
 - 2. **[Alpha Communications]**
 - 3. **[Ascom North America]**
 - 4. **[Cornell Communications, Inc]**

5. [Intego Systems, Inc.]
6. [Intercall Systems, Inc]
7. [Jeron Electronic Systems, Inc]
8. [Rauland-Borg Corporation]
9. [Simplex; brand of Johnson Controls International plc, Building Solutions North America]
10. [TekTone Sound & Signal Mfg., Inc.]
11. <Insert manufacturer's name>

C. Operational Requirements:

1. Patient Station Call: Lights a steady call-placed lamp on the station, steady lamps in the zone light and corridor dome light associated with the patient's room, and steady lamps at the central annunciator and other system display devices and displays message on master and staff/duty stations. At the same time, it sounds a programmed tone at intervals, at the respective annunciator and master and staff/duty stations. Legends at the central annunciator and master station identify the calling station.
2. Pull-Cord-Call Station Call: Flashes a call-placed lamp on the station and distinctive-color lamps in the zone light and corridor dome light and at the central annunciator and staff/duty stations. At the same time, it sounds a programmed tone at intervals, at the central annunciator and master and staff/duty stations. A legend at the master station identifies the calling station, priority as programmed, and bed identification.
3. Emergency-Call Station Call: Produces the same responses as pull-cord-call station calls except rapidly flashing red emergency digital display and tone repetition rates are more frequent, tone frequency is higher, and lamps in the zone light and corridor dome light are a different color. Indicator lamps may be extinguished and the system reset only at the calling station. Displays message on pocket pagers, sounds programmed tone on phones, and displays message on display equipped phones.
4. System Reset: Operating reset button at the originating station cancels signals associated with the call. Illuminates a green digital display on the patient station and log presence on the master station.
5. Cord-Set Removal: Initiates a patient station call when the cord set is removed from the jack in the patient station faceplate. Displays location and "cord removed" message on master station, pocket pagers, and display equipped phones. Inserting a cord-set plug or a dummy plug into the jack and operating the station reset button resets the call.
6. Patient Control Unit: Controls entertainment volume and channel selection. Nurse button on the unit initiates a patient station call. Integral speaker reproduces entertainment sound.
7. Emergency Bath Station Call: Illuminates the digital display on the emergency bath station; rapidly flashes white dome lamp; displays location, priority, and bath on master station; and sounds programmed tone on master station display equipped phones and pocket pagers.
8. Staff/Duty Station Operation: Operation shall be identified to patient station except the message staff shall display on all devices when the staff call button is activated.
9. Privacy Key Activation: When privacy key is activated on patient station, the system shall disconnect the patient station microphone and slowly flash yellow privacy digital display on the patient station. Displays "privacy" on master station when selecting this room/bed.

D. Central Annunciator:

1. Lamp type.
2. Lamp Legends: Machine lettered and legible from a distance of at least **48 inches (1200 mm)** when a call is present. Legend shall identify initiating station and priority of call.
3. Power-on Indicator: Digital, or push-to-test switch.
4. Audible Signal: Electronic tone.

E. Central Equipment Cabinet:

1. Lockable metal.
 2. Houses power supplies, controls, terminal strips, and other components.
 3. Power-on indicator lamp.
 4. Battery Backup Unit: Sealed **[nickel-cadmium, wet-cell]**<Insert type> battery supplies power through an automatic switch when normal power fails, for a period of not less than **[six]**<Insert number> minutes at rated output. System shall lose no unanswered calls or calls in progress during the transfer operation.
 - a. Automatic retransfer to normal power, after a **[15]**<Insert number>-minute time delay.
 - b. Two-rate battery charger with an automatic trickle rate and a recharge rate.
- F. Single-Patient Station: Call-placed lamp, reset push button, and polarized receptacle matching cord-set plug; mounted in a single faceplate.
- G. Dual-Patient Station: Single call-placed lamp, single reset push button, and two polarized receptacles matching cord-set plug; mounted in a single faceplate.
- H. Ambulatory-Patient Station: Call push-button switch, call-placed lamp, and reset push button; mounted in a single faceplate.
- I. Staff/Duty Stations: A minimum of two call lamps, one for routine calls and one for emergency calls; and an audible tone signal device.

2.3 AUDIOVISUAL/VOICE NURSE-CALL SYSTEM

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[Aiphone Corporation]**
 2. **[Alpha Communications]**
 3. **[Ascom North America]**
 4. **[BEST HEALTHCARE COMMUNICATIONS]**
 5. **[Cornell Communications, Inc]**
 6. **[Intego Systems, Inc.]**
 7. **[Intercall Systems, Inc]**
 8. **[Jeron Electronic Systems, Inc]**
 9. **[Rauland-Borg Corporation]**
 10. **[Simplex; brand of Johnson Controls International plc, Building Solutions North America]**
 11. **[TekTone Sound & Signal Mfg., Inc.]**
 12. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[Aiphone Corporation]**
 2. **[Alpha Communications]**
 3. **[Ascom North America]**
 4. **[BEST HEALTHCARE COMMUNICATIONS]**
 5. **[Cornell Communications, Inc]**
 6. **[Intego Systems, Inc.]**
 7. **[Intercall Systems, Inc]**
 8. **[Jeron Electronic Systems, Inc]**
 9. **[Rauland-Borg Corporation]**
 10. **[Simplex; brand of Johnson Controls International plc, Building Solutions North America]**

11. [TekTone Sound & Signal Mfg., Inc.]
12. <Insert manufacturer's name>

C. Operational Requirements:

1. Station Selection from Master Station: Capable of selectively communicating with other stations or groups of stations on its system by touch screen, mouse click, or manual switch; and capable of programming up to [256]<Insert number> stations for each master station in the network.
2. Master Station Privacy: Capable of conversing with individual stations in complete privacy.
3. Called Station:
 - a. Capable of hands-free and two-way conversation.
 - b. Pressing "talk/listen" key shall cause the annunciation tone to cease.
 - c. Pressing "cancel" key terminates normal calls and conversations.
 - d. Terminating of high-priority level [1][2][3][or][4] shall not be allowed except at calling station location and shall send "remind" message if the call is not acknowledged at point of origin in programmed time frame.
4. Annunciation:
 - a. At the master station, a programmable tone announces an incoming call; an annunciator light or digital display identifies the calling station and indicates the priority of the call.
 - b. Call type indications include alarm assist, bath, bed, code, communication fault, cord out, door, emergency, and fire.
 - c. Memory lamps or lighted displays identify stations selected for outgoing calls.
5. System Reset at Master Station: A normal, incoming call can be canceled, associated lights and audible tones extinguished, and the system reset when the station switch is returned to the normal position.
6. Patient Station Calls:
 - a. Lights the call-placed lamp at patient station, zone, and corridor dome lights.
 - b. Sounds a tone and lights the call lights at staff/duty stations and actuates annunciation at the master station.
 - c. When the calling station is selected at the master station, the patient can converse with the master station without moving and without raising or directing the voice.
 - d. During voice communications, entertainment audio at the calling station is automatically muted.
7. Pull-Cord-Call Station Calls and Emergency-Call Station Calls:
 - a. Lights call-placed lamp and corridor dome light and flashes zone light.
 - b. Master station tone pulses and annunciator light for that room flashes.
 - c. When master station acknowledges the call by touch screen or switch, the tone stops but lights continue to flash until the call is canceled at the initiating point.
8. Code Blue and Staff/Duty Station Calls:
 - a. Lights the call-placed lamp at the station and actuates annunciation at the master station.
 - b. When the called station is selected at the master station, the caller and the master station operator can converse.
 - c. Code Blue: Unique sound and light pattern indicating the highest priority emergency.
 - d. Staff Station: Unique sound and light pattern indicating an emergency.
 - e. Duty Station: Sound and light pattern indicating a call to the nurse station.

9. Handset Operation: Lifting the handset on master station disconnects speaker/microphone and transfers conversation to the handset.
10. Station Privacy: No patient or staff/duty station can be remotely monitored without lighting a warning lamp at the monitored station.
11. Patient Station Cord-Set Removal:
 - a. A patient station call is initiated as described above when a patient station cord-set plug is removed from the jack in the station faceplate.
 - b. Tone stops but lights continue to flash until the call is canceled at the initiating point or the plug is reinserted or replaced with a dummy plug when the master station call button for the station is pressed.
12. Patient Control Unit:
 - a. Controls entertainment volume and channel selection.
 - b. Speaker is used for both nurse communication and entertainment sound.
 - c. Entertainment sound is automatically muted when station is communicating with master station.
 - d. Nurse button on the unit initiates a patient station call.
13. Selective Paging: Master station is capable of initiating a message to selected groups of stations or speakers simultaneously by using station group switches.
14. Staff Reminder:
 - a. Master station can initiate a staff reminder that a patient requires direct staff response by operating a reminder control while in contact with the patient station.
 - b. This reminder will light a distinctive-color lamp in the corridor dome light at the patient's room and in the appropriate zone lights.
 - c. Reminder calls are canceled by operating a staff reminder cancel switch in the patient's room.
15. Call Priority Indication:
 - a. Capable of **[eight]<Insert number>** call priority levels in addition to normal.
 - b. Call priority switch near each patient station, or integral with the master station, shall control priority status of the call transmitted by individual stations.
 - c. Switch selects one of the following status levels:
 - 1) Normal: No change to the normal call initiation and canceling sequence.
 - 2) Emergency: Call initiation produces signals and indications identical to those of emergency-call stations. Indicator lamps are extinguished and the system is reset only at the originating station.
 - 3) Priority: System response is the same for emergency status except voice communication between the master station and the calling station is locked in from the time of call initiation until the system is reset at the originating station.
16. Additional Call:
 - a. Waiting display window on the master station similar to current call window displays incoming calls.
 - b. Master station shall have a call-overflow indicator when incoming calls exceed **<Insert number>** calls.
 - c. System shall store unlimited number of incoming calls.
 - d. System shall be capable of automatically answering incoming calls in order of priority.
17. Calling Intercom Stations:

- a. Master station shall be capable of calling any intercom station using the handset or the hands-free speaker/microphone.
 - b. Receipt of a call at the intercom station shall be preceded by an optional pre-announce tone.
 - c. If there is a call in process, system shall place the active call on automatic hold while the new call is placed, then reestablish the previous call when the new call has ended.
18. Privacy Override:
- a. Temporarily deactivates the "Privacy" mode of a called station by calling the station and instructing the called party to press the call-cord button.
 - b. On completion of the conversation, the called station shall automatically return to the "Privacy" mode.
 - c. When in "Privacy" mode, a called station shall be capable of hearing the master station; however, the master station shall not be capable of hearing the called station; a privacy message shall be indicated on the master station display.
19. Master-Station-to-Master-Station Calls:
- a. Master stations shall be capable of calling other master stations using the handset.
 - b. Calls from master stations shall be answered using the handset only.
 - c. Busy master stations shall be indicated by a master station intercom busy tone.
20. Voice Paging:
- a. Capable of voice paging to all stations using a single "All Call" key. [**The page shall be preceded by an optional pre-announce tone.**]
 - b. Capable of voice paging to eight user-defined groups of stations by selecting the group and then the "All Call" key. [**The page shall be preceded by a pre-announce tone.**]
 - c. Capable of voice paging to all staff/duty stations and all patient stations where staff has registered presence using a single "Public Address (PA)/Staff" key. [**The page shall be preceded by a pre-announce tone.**]
 - d. Capable of voice paging through a third-party PA system.
 - e. Capable of including or excluding any station from the voice paging function(s).
 - f. Automatically places an active station call on hold during any page and reestablishes the connection at the end of the page.
 - g. Automatically cancels a page if the talk mode is inactive for more than 15 seconds.
21. Station Monitor:
- a. An audio monitor feature shall allow a user to sequentially or simultaneously listen to one or all stations that are included in the user-created list.
 - b. Master station display shall indicate which station is being monitored when in sequential mode.
 - c. The dwell time each station is monitored shall be user programmable.
 - d. The user shall be able to stop the monitoring sequence by activating a "pause" key.
 - e. The user shall be able to manually sequence through stations using a "next" key.
22. Night Service:
- a. Functions shall be adaptable for nighttime staffing levels, patient traffic, and day/night operations.
 - b. Staff Follow:
 - 1) Capable of locating roving staff; forwarding visual and audible annunciation of

- incoming calls to station(s) where personnel have registered presence.
- 2) Master station shall display locations where staff have registered presence.
- 3) Incorporates a programmable timer that automatically cancels a forgotten staff presence registration.

c. Tones:

- 1) Deactivates audio signals from a duty station and mini-master display telephones.
- 2) Capable of changing the tone volume at the master and duty stations.
- 3) Satellite function shall permit the user to deactivate audio signals from duty stations and other remote annunciator devices.

d. Day/Night Transfer:

- 1) Permits one nurse station to take control of all or individually selected bed call cords from another nurse station. It shall be possible to view transfer status of a nurse station.
- 2) Transfer Modes: As a minimum, include the following three transfer modes to allow one nurse station to take control or share calls and operations from another nurse station:
 - a) Parallel Transfer Mode: Permits both nurse stations to share all calls and operations.
 - b) Supervised Transfer Mode: Permits the transferred nurse station to share all calls and operations with the controlling nurse station; however, the controlling nurse station calls are not shared with the transferring station.
 - c) Capture Transfer Mode: Transfers all calls and operations from the transferred nurse station to the controlling nurse station.
 - d) Transferred station shall have no control over calls, and its display shall indicate calls have been transferred to another station.
- 3) Patient Swing Modes: As a minimum, include the following two patient swing modes to allow one nurse station to take control or share calls from one or many calls from another nurse station:
 - a) Supervised Transfer Mode: Permits the transferred calls to be shared with the controlling nurse station.
 - b) Capture Transfer Mode: Transfers all calls from the call cord from the transferred nurse station to the controlling nurse station.
 - c) Transferred station has no control over those transferred calls.

23. Service Request:

- a. Permits users to assign a service request to a substation, at programmable priority level.
- b. Displays service request on the nurse station display and light the green flashing corridor lamp at the respective substation and automatically generate a service reminder request.
- c. Cancels service requests only at the initiating point.
- d. Recall calls shall sound and be displayed at the master station if the service request has not been cancelled at the initiating point within the programmed period of time.

24. Call Reminder Function:

- a. Automatically generates a reminder call for a patient- or staff-initiated, high-priority [2][3][or][4] request that has had the call tones silenced, allowing time to physically attend to the request and cancel the call at the initiating point.
- b. Regenerated calls shall display the same tones and visual indications and priority as the

- original call and shall also display a "regenerated call" message.
 - c. Capable of manually adding low-priority calls to the reminder list.
 - d. "Call Reminder" function and reminder timer shall be programmable by call priority.
- 25. Hide Function: Prevents a selected station from displaying calls or generating tones on the nurse station.
- 26. Door Control Function: Capable of being programmed to enable the user to remotely activate electric door locks.
- 27. Test and Diagnostics Feature:
 - a. Able to automatically diagnose system faults and categorize them as warnings, communication errors, or fatal errors.
 - b. Warnings shall indicate possible system problems.
 - c. Communication errors shall indicate the inability of the master station to communicate with a substation or another nurse-call station.
 - d. Fatal errors shall indicate a major hardware or software failure.
- 28. User-Configured System Programming - Access Code Not Required:
 - a. Patient call-cord priority levels.
 - b. Monitor list.
 - c. "All Call" list.
 - d. Master station communication parameters (volume, filtering, talk/listen, sensitivity).
 - e. Master and duty station call annunciation tone volume.
 - f. Date/time.
 - g. Staff-follow operating mode.
 - h. Transfer type.
 - i. Pocket pager list assignment.
 - j. Presence mode.
- 29. User-Configured System Programming - Access Code Required:
 - a. Master station number.
 - b. Room device type.
 - c. Room number.
 - d. Bed number.
 - e. Bed alpha or numeric.
 - f. Reminder duration.
 - g. Staff presence registration cancel duration.
 - h. Display language.
 - i. Paging group assignment(s).
 - j. Zone group assignments.
 - k. Monitoring duration.
 - l. Pocket pager number.
 - m. Call tone assignment by priority.
 - n. Pretone activation.
 - o. Call tones minimum volume.
 - p. Clock mode (12 h/24 h).
- D. Master Station:
 - 1. Speaker/microphone unit with operating controls.
 - 2. Indicator lamps with legends or by digital display designate identification and priority of calling stations and called stations.
 - 3. Pulse rate of incoming-call lights denotes priority of calls awaiting response.

4. Station Selection Controls: Touchpad select stations for two-way voice communications.
5. Signal Tones: Programmable to announce incoming calls.
6. Pulse rate and frequency of tone identify the highest priority call awaiting response at one time.
7. Volume Control: Regulates incoming-call volume.
8. Privacy Handset with Hook Switch: Of the type that does not require push-to-talk switch attached to each station unless otherwise indicated.
9. Staff Reminder Control: Initiates flashing of corresponding corridor dome lights for patients requiring service. Permits scanning equipment to indicate which patients are currently in reminder status.
10. Call Priority Selection: Controls associated with patient-station selection switches determine the priority displayed when a call is initiated at a patient station.

E. Central Equipment Cabinet:

1. Lockable metal.
2. Houses amplifiers, tone generators, power supplies, controls, terminal strips, and other components.
3. Amplifier: With fidelity and overall gain necessary to achieve the sound-transmission and reproduction characteristics specified, considering interoperability with the installed speakers/microphones and wiring.
 - a. Power Output: Not less than 3 W at a total harmonic distortion not exceeding 5 percent.
 - b. Hum and Noise: 60 dB below full output with normal input open.
 - c. Volume Control: Concealed within the amplifier unit to control the volume of sound reproduced at all stations.
 - d. Protection: Circuit to prevent damage to the amplifier in case of shorted or open circuit.
4. Selective Paging Amplifiers: Plug-in card mounted in central equipment cabinet, rated 15 W.
5. System Power Supply:
 - a. 24-V dc for operation of the call system.
 - b. Equipment Rating: Suitable for continuous operation between **32 and 120 deg F (0 and 49 deg C)**, from a primary line voltage between 105- to 125-V ac, 60 Hz.
 - c. Output: Regulated 24-V dc with protection against overloads. Line-to-load regulation shall not exceed 2-1/2 percent with ripple and noise remaining below the 10-mV, rms level.
 - d. Overload Protection: Electronic fold-back circuit set to limit the volt-ampere output to less than 100 VA during overloaded or shorted output. Restore power output automatically on removal of overload without resetting circuit breakers or replacing fuses.
6. Power-on indicator lamp.
7. Surge Protector Device: Comply with Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits" for auxiliary panel suppressors, with **[digital indicator lights for power and protection status]<Insert accessories>**.
8. Battery Backup Unit: Sealed **[nickel-cadmium, wet-cell]<Insert type>** battery supplies power through an automatic switch when normal power fails, for a period of not less than **[six]<Insert number>** minutes at rated output.
 - a. Automatic retransfer to normal power, after a **[15]<Insert number>**-minute time delay.
 - b. Two-rate battery charger with an automatic trickle rate and a recharge rate.

F. Speaker/Microphones:

1. Type: Permanent-magnet, dynamic or ceramic, protected against dust and humidity.
2. Sound Reproduction: Sound level of 90 dB plus or minus 3 dB at a distance of **48 inches (1220 mm)** on the axis without overdriving or distorting any frequencies between 300 and 3000 Hz when installed in an enclosure or in the pillow speaker.

3. Power Handling Capacity: Not susceptible to damage from overdriving within the range of power available from the amplifier.
 4. Impedance Matching: Coordinated and matched to the input and output circuits of the amplifier, both for single connection and for group monitoring, to provide the sound reproduction specified. Subsystems or components shall not be combined, which could cause unacceptable distortion such as feedback between pillow speakers and unmuted room speaker/microphone combinations. This protection shall extend throughout the entire range of operation (volume control) of all components.
- G. Single-Patient Station: Speaker/microphone with **2-inch (50-mm)** dynamic cone, a polarized receptacle to match the cord-set plug, monitor lamp, reset switch, and call-placed lamp; assembled under a single faceplate.
- H. Dual-Patient Station:
1. Speaker/microphone with **2-inch (50-mm)** dynamic cone, two polarized receptacles to match cord-set plugs, monitor lamp, and reset switch; assembled under a single faceplate.
 2. Single call-placed lamp serves both beds.
 3. Dual call-placed lamps, one for each bed.
- I. Staff/Duty Stations: Audible call-tone signal device, speaker/microphone with **2-inch (50-mm)** dynamic cone, monitor lamp, reset switch, routine-call lamp, emergency-call lamp, and call push button; assembled under a single faceplate.
- J. Code Blue Station: Audible call-tone signal device, speaker/microphone with **2-inch (50-mm)** dynamic cone, monitor lamp, reset switch, Code Blue emergency-call lamp, and call push button; assembled under a single faceplate.
- K. Ambulatory-Patient Station: Speaker/microphone with **2-inch (50-mm)** dynamic cone, monitor lamp, reset switch, call-placed lamp, and call push button; assembled under a single faceplate.
- L. Selective Paging Speakers: **8-inch (200-mm)** cone type with **1-inch (25-mm)** voice coil and minimum **5-oz. (140-g)** ceramic magnet, multitap matching transformer, flush-mounted steel back-box, and white enamel-finished metal ceiling grille.
- M. Call Priority Switch Station: Three-position, tamper-resistant priority selection switch. Positions designated by labeling "Normal," "Emergency," and "Priority."
- N. Staff Reminder Cancel Switch Station: Momentary contact.

2.4 SYSTEM COMPONENTS

- A. Emergency-Call Station: Locking-type push button, labeled "Push to Call Help"; reset trigger to release push button and cancel call; and call-placed lamp, mounted in a single faceplate.
- B. Emergency-Bath Station:
1. Consists of a sliding, chemical-resistant, ABS red fascia marked with the word "URGENT" in bold letters.
 2. Capable of being activated with nylon pull cord or by sliding the face of the unit downwards.
 3. Activation of the station shall illuminate a reassurance digital display on the face of the unit in addition to notifying the master station.
 4. Water resistant and able to withstand routine cleaning and chemical disinfectants.
 5. Uses magnetic reed switch technology for reliability and corrosion resistance.

6. Mounts on a single-gang electrical box wire to the respective patient station or input controller.

C. Code Blue Station:

1. Consists of a sliding, chemical-resistant, ABS blue fascia marked with the word "CODE" in bold letters.
2. Capable of being activated with nylon pull cord or by sliding the face of the unit downwards.
3. Activation of the station shall illuminate a reassurance digital display on the face of the unit in addition to notifying the master station.
4. Water resistant and able to withstand routine cleaning and chemical disinfectants.
5. Uses magnetic reed switch technology for reliability and corrosion resistance.
6. Mounts on a single-gang electrical box wire to the respective patient station or input controller.

D. Staff, Emergency Station:

1. Consists of a sliding, chemical-resistant, ABS red fascia marked with the word "EMERGENCY" in bold letters.
2. Capable of being activated with nylon pull cord or by sliding the face of the unit downwards.
3. Activation of the station shall illuminate a reassurance digital display on the face of the unit in addition to notifying the master station.
4. Mounts on a single-gang electrical box wire to the input controller.

E. Pull-Cord-Call Station:

1. Pull-Down Switch: Lever-locking type, labeled "Pull Down to Call Help."
2. Reset trigger.
3. Call-placed lamp.
4. Water-resistant construction.

F. Patient Control Unit:

1. Equipped with plug and **96-inch- (2400-mm-)** long white cord.
2. Ethylene oxide, sterilizable.
3. Light-Control Switch: Arranged for independent on-off control of patient's up and down light.
4. Integral Speaker: **2 inches (50 mm)**, with **0.35-oz. (9.9-g)** magnet, rated 0.2 W.
5. Controls: Speaker volume, TV control, and nurse call.
6. Housing: High-impact white plastic.
7. Attachment: Stainless steel bed clamp with permanently attached polyester film strap.
8. Quantity: 12 units for every 10 patient beds.

G. Call-Button Cord Set:

1. Plug and **72-inch (1800-mm)** white cord; cord set shall be resistant to medical gas environment equipped with momentary-action, call-button switch.
2. Ethylene oxide, sterilizable.
3. Washable cord.
4. Palladium switch contacts in high-impact white housing with cord-set strain relief.
5. Attachment: Stainless steel bed clamp with permanently attached polyester film strap.
6. Quantity: Three cord sets for every 10 patient beds.

H. Geriatric Call-Button Cord Set:

1. Plug and **72-inch (1800-mm)** white cord.
2. Resistant to medical gas environment equipped with momentary-action, light-pressure switch in soft outer jacket.
3. Ethylene oxide, sterilizable.

4. Washable cord.
5. Palladium switch contacts in high-impact white housing with cord-set strain relief.
6. Attachment: Stainless steel bed clamp with permanently attached polyester film strap.
7. Quantity: Two cord sets for every 10 patient beds.

I. Squeeze-Bulb Switch Cord Set:

1. Plug and **72-inch (1800-mm)** washable tube with white cord set.
2. Resistant to medical gas environment; washable; equipped with neoprene squeeze-bulb activator, and plug-mounted, momentary contact switch.
3. Ethylene oxide, sterilizable.
4. Attachment: Stainless steel bed clamp with permanently attached polyester film strap.
5. Quantity: Two cord sets for every 10 patient beds.

J. Breath Call Cord:

1. Flexible PVC jacketed cable and a momentary contact air-pressure sensitive switch.
2. Cord: **108 inches (2700 mm)** long.
3. Include an adjustable arm for clamping and suitable for use in oxygen atmospheres.
4. Include 12 replacement straws.

K. Pillow Speakers:

1. Eight-conductor, DIN, flexible PVC jacketed cable.
2. Contain nurse-call button, volume control, speaker, and channel control in molded flame-retardant ABS housing.
3. Cord: **96 inches (2400 mm)** long with sheet clip.

L. Call-Button Plug:

1. Designed to plug into patient station cord-set receptacle.
2. Button switches call circuit.
3. Two plugs for every 10 patient beds.

M. Dummy Plugs:

1. Designed to plug into patient station cord-set receptacle when call-button plug or patient cord set is not used.
2. Three plugs for every 10 patient beds.

N. Indicator Lamps: Digital type with rated life of 20 years unless otherwise indicated.

O. Station Faceplates, Stainless Steel:

1. Minimum of **0.0375 inch (0.95 mm)** thick.
2. Finish: Brushed.
3. Machine-engraved labeling identifies indicator lamps and controls.

P. Station Faceplates, High-Impact Plastic:

1. Color: **[Beige]<Insert color>**.
2. Molded or machine-engraved labeling identifies indicator lamps and controls.

Q. Corridor Dome Lights and Zone Lights:

1. Three-lamp signal lights.
2. Lamps: [**LED.**]Front replaceable without tools, low voltage with rated life of 7500 hours. Barriers are such that only one color is displayed at a time.
3. Lenses: Heat-resistant, shatterproof, translucent polymer that will not deform, discolor, or craze when exposed to hospital cleaning agents.
4. Filters: Two per unit, amber and red.

R. Cable:

1. Conductors: Jacketed single and multiple, twisted-pair copper cables.
2. Sizes and Types: As recommended by equipment manufacturer.
3. Cable for Use in Plenums: Listed and labeled for plenum installation.

S. Grounding Components: Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."

2.5 SOFTWARE REQUIREMENTS

A. Telephone System Interface:

1. Permits use of wired and/or wireless telephones to execute nurse-call master station.
2. Two-way communication with patient and staff stations.
3. Two-way communication with the master nurse station.
4. "All Call," group call, and staff call paging.
5. Capable of being programmed to forward calls destined for a master nurse station to any connected telephone.
6. Telephones connected to the telephone interface shall have the same call tone ring patterns as those generated at the master nurse station.
7. Telephones having a display shall indicate the call type, priority code, and the calling station number of incoming calls.
8. Telephones shall be capable of initiating a service request for a particular patient station, logging calls on the master station's reminder list, and activating door lock mechanisms associated with a call station.
9. Capable of routine setup and configuration changes using the keypads on display telephone and/or the master station.

B. Display Telephones:

1. Digital telephones for use as mini-master nurse-call stations.
2. Digital display shall indicate the call type, priority code, and calling station number of incoming calls.
3. Ring patterns shall be identical to those generated at the master station.
4. Capable of two-way communication with patient and staff stations and the master station, and other telephones interfaced with the system.
5. Capable of placing or answering outside calls when interfaced with the facility telephone system.
6. Capable of "All Call," group call, and staff call paging and of initiating service requests, logging calls to the reminder list, and activating optional door controls.

C. Third-Party Pocket Pager Interface:

1. Equipped with a standalone pocket pager interface.
2. Connects with the facility paging system and transmit alphanumeric messages to the pocket pagers as preprogrammed in the system.

D. Statistical Software:

1. Includes a data statistical software package that stores, sorts, and analyzes activities occurring on the nurse-call system network.
2. Windows based and operated on a PC that is connected to the nurse-call system network.
3. Stores events on the PC's hard disk. Accumulation of these stored events shall make up the database that is used to generate reports and statistics.
4. Events stored by the software shall include date, day of week, time, ward, priority, and room number.
5. Capable of assigning a patient name to bed number.
6. Stored events shall include, but not be limited to, calls placed, call priority, calls cancelled at the nurse station, calls cancelled at the point of origin, regenerated calls, calls answered, calls sent to pager interface, staff presence registration, staff presence cancellation, service request, service cancellation, and system and network error messages.

E. Data Analysis Software:

1. Capable of analyzing the stored information and generating computed analysis.
2. Analysis of the database can be conducted by specifying one, many, or all of the following parameters of the database: date, day of week, time, wards, priority, and room number.
3. Analysis shall include, but not be limited to, total number of calls placed, average call response time (from call placed to call cancellation), total number of presence registrations, average presence time in a room, total number of service requests, average response time (from audio answer to call cancellation), and average ring time (from call placed to audio answer).

F. Statistical Software Package:

1. Capable of displaying multiple calls/events on a PC monitor or on a RS-485 data-bus-driven digital display panel.
2. Calls from patient or staff stations and associated devices shall be displayed by priority. Display shall be customizable as follows:
 - a. Choice of color by type of call.
 - b. Choice of display size (character size).
 - c. Choice of priority levels, type of events, points of origin.
 - d. Identification of facility.
 - e. Identification of ward.
 - f. Identification of patient with specific patient information.

2.6 CONDUCTORS AND CABLES

A. Audio Cables:

1. Conductors: Jacketed, twisted-pair and twisted-multipair, untinned solid copper. Sizes as recommended by system manufacturer, but no smaller than No. 22 AWG.
2. Insulation: Thermoplastic, not less than **1/32 inch (0.8 mm)** thick.
3. Shielding: For speaker/microphone leads and elsewhere where recommended by manufacturer; No. 34 AWG, tinned, soft-copper strands formed into a braid or equivalent foil.
4. Minimum Shielding Coverage on Conductors: 60 percent.
5. Plenum Cable: Listed and labeled for plenum installation.

B. Data Cable and Hardware: **[Category 5e][Category 6]** balanced twisted-pair cabling and hardware. Comply with requirements in Section 271513 "Communications Copper Horizontal Cabling."

C. Power Conductors and Cables: Copper, solid, No. 20 AWG. Comply with requirements in **[Section 260519 "Low-Voltage Electrical Power Conductors and Cables."]****[Section 260523 "Control**

Voltage Electrical Power Conductors and Cables."]

- D. Grounding Conductors and Cables: Copper, stranded, No. 16 AWG. Comply with requirements in **[Section 260519 "Low-Voltage Electrical Power Conductors and Cables."][Section 260523 "Control Voltage Electrical Power Conductors and Cables."]**

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Wiring Method:
1. Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters[**and except in accessible ceiling spaces and in gypsum board partitions where unenclosed wiring method may be used**].
 - a. Install plenum cable in environmental air spaces, including plenum ceilings.
 - b. Conceal raceway and cables except in unfinished spaces.
 2. Cable Trays: Comply with requirements in Section 260536 "Cable Trays for Electrical Systems."
 3. Conduit and Boxes: Comply with requirements in Section 270528 "Pathways for Communications Systems."[**Flexible metal conduit shall not be used.**]
 - a. Outlet boxes shall be no smaller than **2 inches (50 mm)** wide, **3 inches (75 mm)** high, and **2-1/2 inches (64 mm)** deep.
- B. Install cables without damaging conductors, shield, or jacket.
- C. Do not bend cables, while handling or installing, to radii smaller than as recommended by manufacturer.
- D. Pull cables without exceeding cable manufacturer's recommended pulling tensions.
 1. Pull cables simultaneously if more than one is being installed in same raceway.
 2. Use pulling compound or lubricant if necessary. Use compounds that will not damage conductor or insulation.
 3. Use pulling means, including fish tape, cable, rope, and basket-weave wire or cable grips, that will not damage media or raceway.
- E. Install exposed raceways and cables parallel and perpendicular to surfaces or exposed structural members, and follow surface contours. Secure and support cables by straps, staples, or similar fittings designed and installed so as not to damage cables. Secure cable at intervals not exceeding **30 inches (760 mm)** and not more than **6 inches (150 mm)** from cabinets, boxes, or fittings.
- F. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.
- G. Separation of Wires: Separate speaker/microphone, line-level, speaker-level, and power-wiring runs. Run in separate raceways or, if exposed or in same enclosure, provide **12-inch (300-mm)** minimum separation between conductors to speaker/microphones and adjacent parallel power and telephone wiring. Provide separation as recommended by equipment manufacturer for other conductors.
- H. Splices, Taps, and Terminations: Make splices, taps, and terminations on numbered terminal strips in

junction, pull, and outlet boxes; terminal cabinets; and equipment enclosures. Install terminal cabinets where there are splices, taps, or terminations for eight or more conductors.

- I. Impedance and Level Matching: Carefully match input and output impedances and signal levels at signal interfaces. Provide matching networks if required.
- J. Identification of Conductors and Cables: Comply with requirements in Section 260553 "Identification for Electrical Systems" for cable administration, cable schedule, and cable and wire identification.
- K. Equipment Identification:
 - 1. Comply with requirements in Section 260553 "Identification for Electrical Systems" for equipment labels and signs and labeling installation requirements.
 - 2. Label stations, controls, and indications using approved consistent nomenclature.

3.2 EXISTING SYSTEMS

- A. Examine existing systems for proper operation, compatibility with new equipment, and deficiencies. If discrepancies or impairments to successful connection and operation of interconnected equipment are found, report them and do not proceed with installation until directed. Schedule existing systems' examination so there is reasonable time to resolve problems without delaying construction.

3.3 GROUNDING

- A. Ground cable shields and equipment to eliminate shock hazard and to minimize ground loops, common-mode returns, noise pickup, cross talk, and other signal impairments.
- B. Signal Ground Terminal: Locate at main equipment cabinet. Isolate from power system and equipment grounding except at connection to main building ground bus.
- C. Grounding Provisions: Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."

3.4 FIELD QUALITY CONTROL

- A. Manufacturer's Field Service: Engage a factory-authorized service representative to inspect, test, and adjust components, assemblies, and equipment installations, including connections.
- B. Perform tests and inspections.
 - 1. Manufacturer's Field Service Assistance: Engage a factory-authorized service representative to inspect components, assemblies, and equipment installations, including connections, and to assist in testing.
- C. Tests and Inspections:
 - 1. Schedule tests a minimum of seven days in advance.
 - 2. Report: Submit a written record of test results.
 - 3. Operational Test: Perform an operational system test and demonstrate proper operations, adjustment, and sensitivity of each station. Perform tests that include originating station-to-station and "All Call" messages and pages at each nurse-call station. Verify proper routing, volume

levels, and freedom from noise and distortion. Test each available message path from each station on the system. Meet the following criteria:

- a. Speaker Output: 90 dB plus or minus 3 dB, 300 to 3000 Hz, reference level threshold of audibility 0 dB at 0.02 mPa of sound pressure.
 - b. Gain from patient's bedside station to nurse station, with distortion less than 65 dB (plus or minus 3 dB, 300 to 3000 Hz).
 - c. Signal-to-Noise Ratio: Hum and noise level at least 45 dB below full output.
4. Test Procedure:
- a. Frequency Response: Determine frequency response of two transmission paths by transmitting and recording audio tones.
 - b. Signal-to-Noise Ratio: Measure the ratio of signal to noise of the complete system at normal gain settings using the following procedure: Disconnect a speaker/microphone and replace it in the circuit with a signal generator using a 1000-Hz signal. Measure the ratio of signal to noise and repeat the test for four speaker microphones.
 - c. Distortion Test: Measure distortion at normal gain settings and rated power. Feed signals at frequencies of 300, 400, 1000, and 3000 Hz into each nurse-call equipment amplifier, and measure the distortion in the amplifier output.
- D. Retesting: Rectify deficiencies indicated by tests and completely retest work affected by such deficiencies at Contractor's expense. Verify, by the system test, that the total system meets these Specifications and complies with applicable standards. Report results in writing.
- E. Inspection: Verify that units and controls are properly labeled and interconnecting wires and terminals are identified.
- F. Prepare test and inspection reports.

3.5 ADJUSTING

- A. Occupancy Adjustments: When requested within [12]<Insert number> months of date of Substantial Completion, provide on-site assistance in adjusting sound levels and controls to suit actual occupied conditions. Provide up to [three]<Insert number> visits to Project during other-than-normal operating hours for this purpose.

3.6 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel and caregiver staff to adjust, operate, and maintain nurse-call equipment.

END OF SECTION 26 33 43 00B

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 33 53 00 - STATIC UNINTERRUPTIBLE POWER SUPPLY

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. UPS systems.
2. Surge suppression.
3. Rectifier-charger.
4. Inverter.
5. Controls and indications.
6. Static bypass transfer switch.
7. Maintenance bypass/isolation switch.
8. Output distribution section.
9. Output isolation transformer.
10. Remote status and alarm panel.
11. Remote monitoring.
12. Battery.
13. Basic battery monitoring.
14. Additional battery monitoring.
15. Battery-cycle warranty monitoring.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of UPS.

1. UPS systems.
2. Surge suppression.
3. Rectifier-charger.
4. Inverter.
5. Controls and indications.
6. Static bypass transfer switch.
7. Maintenance bypass/isolation switch.
8. Output distribution section.
9. Output isolation transformer.
10. Remote status and alarm panel.
11. Remote monitoring.
12. Battery.
13. Basic battery monitoring.
14. Additional battery monitoring.
15. Battery-cycle warranty monitoring.

- B. Shop Drawings: For UPS.
 - 1. Include plans, elevations, sections, and **[mounting][attachment]** details.
 - 2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
 - 3. Show access, workspace, and clearance requirements; details of control panels; and battery arrangement.
 - 4. Include diagrams for power, signal, and control wiring.
- C. Field quality-control reports.

1.3 INFORMATIONAL SUBMITTALS

- A. Manufacturers' published instructions.
- B. Field Reports:
 - 1. Factory test reports.
 - 2. Manufacturer's field reports for field quality-control support.

1.4 CLOSEOUT SUBMITTALS

- A. Performance Test Reports: Indicate test results compared with specified performance requirements, and provide justification and resolution of differences if values do not agree.

1.5 WARRANTY FOR UPS SYSTEM

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed UPS system performs in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period.
 - 1. Extended-Warranty Period: **[Two][Three][Four]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that UPS system performs in accordance with specified requirements and agrees to provide repair or replacement of components or products that fail to perform as specified within extended-warranty period.
 - 1. Extended-Warranty Period: **[Three][Four][Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.

1.6 WARRANTY FOR BATTERIES

- A. Special Manufacturer Extended Warranty for Batteries: Manufacturer warrants that batteries perform in accordance with specified requirements and agrees to provide repair or replacement of batteries that fail to perform as specified within extended-warranty period.
 - 1. Initial Extended-Warranty Period for Ni-Cd Batteries: **[Five]<Insert number>** years from date of Substantial Completion; full coverage for materials only, free on board **[origin][destination]**,

- freight prepaid.
2. Follow-On Extended-Warranty Period for Ni-Cd Batteries: **[15]<Insert number>** years from date of Substantial Completion; prorated coverage for materials only, free on board **[origin][destination]**, freight prepaid.
 3. Additional Warranted Cycle Life Criteria for Standard Valve Regulated (Sealed) Lead Acid Batteries: Equal to or greater than that represented in manufacturer's published table, but not less than the following, based on annual average battery temperature of **77 deg F**:
 - a. For discharge rate not faster than eight hours, discharge duration not longer than eight hours, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than six discharge cycles.
 - b. For discharge rate not faster than 30 minutes, discharge duration not longer than 30 minutes, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 20 discharge cycles.
 - c. For discharge rate not faster than 15 minutes, discharge duration not longer than 45 seconds, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 120 discharge cycles.
 4. Additional Warranted Cycle Life Criteria for Premium Valve Regulated (Sealed) Lead Acid Batteries: Equal to or greater than that represented in manufacturer's published table, but not less than the following, based on annual average battery temperature of **77 deg F**:
 - a. For discharge rate not faster than eight hours, discharge duration not longer than eight hours, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 40 discharge cycles.
 - b. For discharge rate not faster than 30 minutes, discharge duration not longer than 30 minutes, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 125 discharge cycles.
 - c. For discharge rate not faster than 15 minutes, discharge duration not longer than 90 seconds, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 750 discharge cycles.
 5. Additional Warranted Cycle Life Criteria for Flooded (Wet Cell or Open) Lead Acid Batteries: Equal to or greater than that represented in manufacturer's published table, but not less than the following, based on annual average battery temperature of **77 deg F** and preventive maintenance performed in accordance with manufacturer's published instructions:
 - a. For discharge rate not faster than eight hours, discharge duration not longer than eight hours, and voltage at end of discharge not less than 1.75 V, warranted life must be not fewer than 40 discharge cycles.
 - b. For discharge rate not faster than one hour, discharge duration not longer than one hour, and voltage at end of discharge not less than 1.75 V, warranted life must be not fewer than 80 discharge cycles.
 - c. For discharge rate not faster than 15 minutes, discharge duration not longer than 45 seconds, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 2700 discharge cycles.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. UL Compliance: Listed and labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with UL 1778.

- B. NFPA Compliance: UPS components must be listed and labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, as suitable for installation in computer rooms in accordance with NFPA 75.
- C. The UPS must perform as specified in this article while supplying rated full-load current, composed of any combination of linear and nonlinear load, up to 100 percent nonlinear load with a maximum load crest factor of 3.0, under the following conditions or combinations of the following conditions:
 - 1. Inverter is switched to battery source.
 - 2. Steady-state AC input voltage deviates up to plus or minus **[10][15]** percent from nominal voltage.
 - 3. Steady-state input frequency deviates up to plus or minus 5 percent from nominal frequency.
 - 4. THD of input voltage is 15 percent or more with a minimum crest factor of 3.0, and the largest single harmonic component is a minimum of 5 percent of the fundamental value.
 - 5. Load is **[30][50][100]** percent unbalanced continuously.
- D. Minimum Duration of Supply: If battery is sole energy source supplying rated full-load UPS current at 80 percent power factor, duration of supply is **[five][10][15]<Insert duration>** minutes.
- E. Input Voltage Tolerance: System steady-state and transient output performance remains within specified tolerances when steady-state AC input voltage varies plus 10 percent and minus **[15][20][30]** percent from nominal voltage.
- F. Overall UPS Efficiency: Equal to or greater than **[94][95]<Insert number>** percent at 100 percent load, **[94][95]<Insert number>** percent at 75 percent load, and **[93][94]<Insert number>** percent at 25 percent load.
- G. Maximum Acoustical Noise: **<Insert value>**, "A" weighting, emanating from any UPS component under any condition of normal operation, measured **<Insert distance>** from nearest surface of component enclosure.
- H. Maximum Energizing Inrush Current: **[Six times the full-load current][Eight times the full-load current][Soft start linear input current rise to 100 percent over a 1- to 40-second period, factory set at 10 seconds]**.
- I. AC Output-Voltage Regulation for Loads 100 Percent Unbalanced: Maximum of plus or minus 2 percent over the full range of battery voltage.
- J. AC Output-Voltage Regulation for Loads 100 Percent Balanced: Maximum of plus or minus 1 percent over the full range of battery voltage.
- K. Output Frequency: 60 Hz, plus or minus 0.1 percent over the full range of input voltage, load, and battery voltage.
- L. Limitation of harmonic distortion of input current to the UPS must be as follows:
 - 1. Rectifier-charger circuits must limit THD to 5 percent, maximum, at rated full-load UPS current, for power sources with X/R ratio between 2 and 30. Provide tuned harmonic filter if required to meet harmonic distortion limit.
 - 2. THD is limited to a maximum of 32 percent, at rated full-load UPS current, for power sources with X/R ratio between 2 and 30.
- M. Maximum Harmonic Content of Output-Voltage Waveform: 5 percent RMS total and 3 percent RMS for any single harmonic, for **[100 percent rated nonlinear load current][rated full load with THD up to 50 percent]**, with a load crest factor of 3.0.

- N. Minimum Overload Capacity of UPS at Rated Voltage: 125 percent of rated full load for 10 minutes, 200 percent for 60 seconds in normal operation, and 150 percent for 30 seconds in battery operating mode.
- O. Maximum Output-Voltage Transient Excursions from Rated Value: For the following instantaneous load changes, stated as percentages of rated full UPS load, voltage must remain within stated percentages of rated value and recover to, and remain within, plus or minus 2 percent of that value within 50 ms:
 - 1. 50 Percent: Plus or minus 3 percent.
 - 2. 100 Percent: Plus or minus 5 percent.
 - 3. Loss of AC Input Power: Plus or minus 1 percent.
 - 4. Restoration of AC Input Power: Plus or minus 1 percent.
- P. Input Power Factor: A minimum of **[0.90][0.95]** lagging when supply voltage and current are at nominal rated values and the UPS is supplying rated full-load current without additional filters.
- Q. Output Power Factor Rating: Loads with power factor of 0.9 leading to 0.8 lagging must not require derating of the UPS. For loads with power factors outside this range, derate the UPS output as follows:
 - 1. Derate the UPS a maximum of 5 percent for 0.7 PF lagging.
 - 2. Derate the UPS a maximum of 10 percent for 0.6 PF lagging.
 - 3. Derate the UPS a maximum of 15 percent for 0.5 PF lagging.
 - 4. Derate the UPS a maximum of 20 percent for a range of 0.4 to 0.1 PF lagging.
- R. EMI Emissions: Comply with FCC rules and regulations and with 47 CFR 15 for Class A equipment.

2.2 UPS SYSTEMS

- A. Description: Self-contained, battery backup device and accessories that provides three-phase electrical power in the event of failure or sag in the normal power system.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[ABB, Electrification Business]**
 - 2. **[APC by Schneider Electric]**
 - 3. **[Eaton]**
 - 4. **[Liebert; Vertiv Holdings Co.]**
 - 5. **[Mitsubishi Electric Automation, Inc]**
 - 6. **[Staco Energy Products Co.]**
 - 7. **[Toshiba International Corporation]**
 - 8. **<Insert manufacturer's name>**
- C. Electronic Equipment: Solid-state devices using hermetically sealed, semiconductor elements. Devices include rectifier-charger, inverter, static bypass transfer switch, and system controls.
- D. Enclosures: Comply with UL 50E, Type 1, unless otherwise indicated.
- E. Configuration: **[Single-cabinet][Multicabinet][Field-assembled, multicabinet]** modular style units.
- F. Control Assemblies: Mount on modular plug-ins, readily accessible for maintenance.
- G. Maintainability Features: Mount rectifier-charger and inverter sections and the static bypass transfer switch on modular plug-ins, readily accessible for maintenance.

- H. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- I. Capacity Upgrade Capability: Arrange wiring, controls, and modular component plug-in provisions to permit future **[25]<Insert number>** percent increase in UPS capacity.
- J. Seismic-Restraint Design: UPS assemblies, subassemblies, and components (and fastenings and supports, mounting, and anchorage devices for them) must be designed and fabricated to withstand static and seismic forces.
- K. UPS Cabinet Ventilation: Redundant fans or blowers draw in ambient air near the bottom of cabinet and discharge it near the top rear.
- L. Output Circuit Neutral Bus, Conductor, and Terminal Ampacity: Rated phase current times a multiple of 1.73, minimum.

2.3 OUTPUT ISOLATION TRANSFORMER

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[APC by Schneider Electric]**
 - 2. **[Eaton]**
 - 3. **<Insert manufacturer's name>**
- B. Description: **[Shielded unit][Unit]** with low forward transfer impedance up to 3 kHz, minimum. Include the following features:
 - 1. Comply with applicable portions of UL 1561, including requirements for nonlinear load current-handling capability for a K-factor of approximately **[4][9][13][20]**.
 - 2. Output Impedance at Fundamental Frequency: Between 3 and 4 percent.
 - 3. Regulation: 5 percent, maximum, at rated nonlinear load current.
 - 4. Full-Load Efficiency at Rated Nonlinear Load Current: 96 percent, minimum.
 - 5. Electrostatic Shielding of Windings: Independent for each winding.
 - 6. Coil Leads: Physically arranged for minimum interlead capacitance.
 - 7. Shield Grounding Terminal: Separately mounted; labeled "Shield Ground."
 - 8. Capacitive Coupling between Primary and Secondary: 33 pF, maximum, over a frequency range of 20 Hz to 1 MHz.

2.4 BATTERY

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[C&D Technologies, Inc.]**
 - 2. **[Eaton]**
 - 3. **[EnerSys]**
 - 4. **[Exide Technologies]**
 - 5. **[Panasonic Corporation of North America]**
 - 6. **<Insert manufacturer's name>**

**B. General Characteristics:**

1. Valve-regulated, recombinant, lead-calcium units, factory assembled in an isolated compartment of UPS cabinet, complete with battery disconnect switch.
 - a. Arrange for drawout removal of battery assembly from cabinet for testing and inspecting.
2. Valve-regulated, premium, heavy-duty, recombinant, lead-calcium units, complete with battery disconnect switch and intercell connectors.
 - a. Factory assembled in an isolated compartment of UPS cabinet.
 - b. Mount on **[two-tier],[three-tier,]** acid-resistant, painted steel racks.
 - c. Arrange for drawout removal of battery assembly from cabinet for testing and inspecting.
3. Flooded, lead-calcium, heavy-duty industrial units in styrene acrylonitrile containers. Mount on **[two-tier],[three-tier,]** acid-resistant, painted steel racks. Assembly includes battery disconnect switch, intercell connectors, hydrometer syringe, and thermometer with specific gravity-correction scales.
4. Flooded cell, heavy-duty, industrial, Ni-Cd units in polypropylene containers. Mount on **[two-tier],[three-tier,]** acid-resistant, painted steel racks, complete with battery disconnect switch and intercell connectors.
5. Valve-regulated, heavy-duty, industrial, recombinant, pocket plate design, Ni-Cd units in polypropylene containers, complete with battery disconnect switch and intercell connectors.
 - a. Factory assembled in an isolated compartment of UPS cabinet.
 - b. Mount on **[two-tier],[three-tier,]** acid-resistant, painted steel racks.
 - c. Arrange for drawout removal of battery assembly from cabinet for testing and inspecting.

- C. Seismic-Restraint Design: Battery racks, cabinets, assemblies, subassemblies, and components (and fastenings and supports, mounting, and anchorage devices for them) must be designed and fabricated to withstand static and seismic forces.

2.5 BASIC BATTERY MONITORING

- A. Basic Battery Monitoring: Continuous, real-time capture of battery performance data.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
1. **[Alber]**
 2. **[APC by Schneider Electric]**
 3. **[BTECH, Inc]**
 4. **[Canara]**
 5. **[Eaton]**
 6. **[Liebert; Vertiv Holdings Co.]**
 7. **[Midtronics, Inc]**
 8. **[Power Systems Specialists, Inc.]**
 9. **[Staco Energy Products Co.]**
 10. **<Insert manufacturer's name>**
- C. Battery Ground-Fault Detector: Initiates alarm when resistance to ground of positive or negative bus of battery is less than 5000 Ω .
- D. Battery compartment high-temperature detector initiates an alarm when smoke or a temperature greater

than **167 deg F** occurs within the compartment.

- E. Battery compartment smoke/high-temperature detector initiates an alarm when smoke or a temperature greater than **167 deg F** occurs within the compartment.
- F. Annunciation of Alarms: At UPS control panel and remotely.

2.6 SOURCE QUALITY CONTROL

- A. Product Data: Prepare and submit catalog cuts, brochures, **[diagrams,][schedules,]** and performance data illustrating size, physical appearance, and other characteristics of product.
 - 1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for UPS.
 - 2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
 - 3. Product Certificates: For each product, from manufacturer.
 - 4. Sample Warranties: For manufacturer's special warranties.
- B. Factory Tests:
 - 1. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
 - 2. Factory Tests and Inspections: Test and inspect UPS system, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with NETA ATS before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.
 - a. Factory test complete UPS system before shipment. Use **[actual batteries that are part of final installation][the same type of batteries that are part of final installation][simulated battery testing]**. Include the following:
 - 1) Test and demonstration of all functions, controls, indicators, sensors, and protective devices.
 - 2) Full-load test.
 - 3) Transient-load response test.
 - 4) Overload test.
 - 5) Power failure test.
 - 3. Nonconforming Work:
 - a. Equipment that does not pass tests and inspections will be considered defective.
 - 4. Factory Test Reports: Prepare and submit factory test and inspection reports. Include the following data:
 - a. Description of input source and output loads used. Describe actions required to simulate source load variation and various operating conditions and malfunctions.
 - b. List of indications, parameter values, and system responses considered satisfactory for each test action. Include tabulation of actual observations during test.
 - c. List of instruments and equipment used in factory tests.

PART 3 - EXECUTION**3.1 INSTALLATION**

- A. Wiring Method: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters **[and except in accessible ceiling spaces and in gypsum board partitions where unenclosed wiring method may be used]**. Conceal raceway and cables except in unfinished spaces.
 - 1. Install plenum cable in environmental air spaces, including plenum ceilings.
 - 2. Comply with requirements for cable trays specified in Section 260536 "Cable Trays for Electrical Systems."
 - 3. Comply with requirements for raceways and boxes specified in Section 260533.13 "Conduits for Electrical Systems."
 - 4. Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
- B. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.
- C. Equipment Mounting: Install UPS on concrete base. Comply with requirements for concrete base specified in Section 033000 "Cast-in-Place Concrete."
 - 1. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on **18 inch** centers around the full perimeter of concrete base **6 inch** from the outer edge of the base.
 - 2. For supported equipment, install epoxy-coated anchor bolts that extend through concrete base and anchor into structural concrete floor.
 - 3. Place and secure anchorage devices. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
 - 4. Install anchor bolts to elevations required for proper attachment to supported equipment.
- D. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's published instructions and NFPA 70.
- E. Connections: Interconnect system components. Make connections to supply and load circuits in accordance with manufacturer's wiring diagrams unless otherwise indicated. Apply oxide inhibitor on battery terminals.

3.2 FIELD QUALITY CONTROL

- A. Acceptance Testing Preparation:
 - 1. **<Insert requirements>**.
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- C. Tests and Inspections:
 - 1. Inspect interiors of enclosures, including the following:
 - a. Inspect anchorage, alignment, grounding, and required clearances.
 - b. Component type and labeling verification.
 - c. Ratings of installed components.

2. Test electrical and mechanical interlock systems for correct operation and sequencing.
3. Inspect bolted electrical connections for high resistance using one or more of the following methods:
 - a. Use of low-resistance ohmmeter in accordance with Section 7.22.2.2 of NETA ATS.
 - b. Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published instructions or Table 100.12 of NETA ATS.
 - c. Perform thermographic survey in accordance with Section 9 of NETA ATS.
4. Test static transfer from inverter to bypass and back. Use normal load, if possible.
5. Test DC undervoltage trip level on inverter input breaker. Set in accordance with manufacturer's published instructions.
6. Verify synchronizing indicators for static switch and bypass switches.
7. Test insulated-case and molded-case breakers.
 - a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with the circuit breaker closed, and across each open pole. Apply voltage in accordance with manufacturer's published instructions. In the absence of manufacturer's published instructions, use Table 100.1 of NETA ATS.
 - b. Perform insulation-resistance tests on all control wiring for ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid-state components, follow manufacturer's recommendation.
 - c. Use primary current injection to determine long time and short time, ground fault, and instantaneous pickup, Use secondary current injection to test trip functions.
 - d. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published instructions.
 - e. Verify operation of charging mechanism.
 - f. Verify correct operation of auxiliary features such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free, antipump function, and trip unit battery condition. Reset all trip logs and indicators.
8. Test automatic transfer switches.
 - a. Perform resistance measurements through bolted connections with a low-resistance ohmmeter, if applicable, in accordance with Section 7.22.3.1 of NETA ATS.
 - b. Perform insulation-resistance tests on all control wiring for ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid-state components or for control devices that cannot tolerate the applied voltage, follow manufacturer's recommendation.
 - c. Perform a contact/pole-resistance test.
 - d. Verify settings and operation of control devices.
 - e. Calibrate and set all relays and timers in accordance with Section 7.9 of NETA ATS.
 - f. Verify phase rotation, phasing, and synchronized operation as required by the application.
 - g. Perform automatic transfer tests.
 - 1) Simulate loss of normal power.
 - 2) Return to normal power.
 - 3) Simulate loss of emergency power.
 - 4) Simulate all forms of single-phase conditions.
 - h. Verify correct operation and timing of the following functions:
 - 1) Normal source voltage-sensing and frequency-sensing relays.

- 2) Time delay on transfer.
 - 3) Alternative source voltage-sensing and frequency-sensing relays.
 - 4) Automatic transfer operation.
 - 5) Interlocks and limit switch function.
 - 6) Time delay and retransfer on normal power restoration.
9. Test direct current system's batteries.
 - a. Verify adequacy of battery support racks, mounting, anchorage, alignment, grounding, and clearances.
 - b. **[Verify electrolyte level. Measure electrolyte level, specific gravity, and temperature.]**
 - c. Inspect spill containment installation. Measure charger float and equalizing voltage levels. Adjust to battery manufacturer's recommended settings.
 - d. Verify all charger functions and alarms.
 - e. Measure each cell voltage and total battery voltage with charger energized and in float mode of operation.
 - f. Perform a load test in accordance with manufacturer's published instructions or IEEE 450.
 - g. Measure charger float and equalizing voltage levels. Adjust to battery manufacturer's recommended settings.
 - h. Test values.
 - 1) Compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value.
 - 2) Charger float and equalize voltage levels must be in accordance with battery manufacturer's published instructions.
 - 3) The results of charger functions and alarms must be in accordance with manufacturer's published instructions.
 - 4) Cell voltages must be within 0.05 V of each other or in accordance with manufacturer's published instructions.
 - 5) Cell internal ohmic values (resistance, impedance, or conductance) must not vary by more than 25 percent between identical cells that are in a fully charged state.
 - 6) Results of load tests must be in accordance with manufacturer's published instructions or IEEE 450.
10. Test communication of status and alarms to remote monitoring equipment.
11. Load the system using a variable-load bank to simulate kilovolt amperes, kilowatts, and power factor of loads for unit's rating. Use instruments calibrated within the previous **[six months]<Insert time>** in accordance with NIST standards.
 - a. Simulate malfunctions to verify protective device operation.
 - b. Test duration of supply on emergency, low-battery voltage shutdown, and transfers and restoration due to normal source failure.
 - c. Test harmonic content of input and output current at 25, 50, and 100 percent of rated loads.
 - d. Test output voltage under specified transient-load conditions.
 - e. Test efficiency at 50, 75, and 100 percent of rated loads.
 - f. Test remote status and alarm panel functions.
 - g. Test battery-monitoring system functions.
- D. Seismic-restraint tests and inspections must include the following:
 1. Inspect type, size, quantity, arrangement, and proper installation of mounting or anchorage devices.
 2. Test mounting and anchorage devices in accordance with requirements in Section 260548.16 "Seismic Controls for Electrical Systems."

26 - Electrical

-
- E. Nonconforming Work:
1. The UPS system will be considered defective if it does not pass tests and inspections.
 2. Remove and replace defective units and retest.
- F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports. Include references to manufacturers' published instructions and other test and inspection criteria. Include results of tests, inspections, and retests.

END OF SECTION 26 33 53 00

SECTION 26 35 33 00 - POWER FACTOR CORRECTION EQUIPMENT

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. UPS systems.
2. Surge suppression.
3. Rectifier-charger.
4. Inverter.
5. Controls and indications.
6. Static bypass transfer switch.
7. Maintenance bypass/isolation switch.
8. Output distribution section.
9. Output isolation transformer.
10. Remote status and alarm panel.
11. Remote monitoring.
12. Battery.
13. Basic battery monitoring.
14. Additional battery monitoring.
15. Battery-cycle warranty monitoring.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 DEFINITIONS

- A. GTO: Gate turn-off thyristor.
- B. IGBT: Isolated gate bipolar transistor.
- C. PF: Power factor.
- D. pF: Picofarads.
- E. THD: Total harmonic distortion.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of UPS.

1. UPS systems.
2. Surge suppression.

3. Rectifier-charger.
4. Inverter.
5. Controls and indications.
6. Static bypass transfer switch.
7. Maintenance bypass/isolation switch.
8. Output distribution section.
9. Output isolation transformer.
10. Remote status and alarm panel.
11. Remote monitoring.
12. Battery.
13. Basic battery monitoring.
14. Additional battery monitoring.
15. Battery-cycle warranty monitoring.

B. Shop Drawings: For UPS.

1. Include plans, elevations, sections, and **[mounting][attachment]** details.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Show access, workspace, and clearance requirements; details of control panels; and battery arrangement.
4. Include diagrams for power, signal, and control wiring.

C. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturers' published instructions.

B. Field Reports:

1. Factory test reports.
2. Manufacturer's field reports for field quality-control support.

1.5 CLOSEOUT SUBMITTALS

- A. Performance Test Reports: Indicate test results compared with specified performance requirements, and provide justification and resolution of differences if values do not agree.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
- B. Spare Parts: Furnish to Owner spare parts, for repairing UPS system, that are packaged with protective covering for storage on-site and identified with labels describing contents. **[Include the following:]**
1. Fuses: **[One]<Insert number>** for every **[10]<Insert number>** of each type and rating, but no fewer than **[one][one set]<Insert number>** of each.

C. Consumable Items:

1. After completion of field quality control, startup, commissioning, adjusting, and closeout activities, replace air filters.
2. Furnish to Owner extra consumable items for storage on-site, identified with labels describing contents. [**Include the following:**]
 - a. Cabinet Ventilation Filters: [**One**] <Insert number> complete set(s).

1.7 WARRANTY FOR UPS SYSTEM

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed UPS system performs in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period.
1. Extended-Warranty Period: [**Two**] [**Three**] [**Four**] <Insert number> years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that UPS system performs in accordance with specified requirements and agrees to provide repair or replacement of components or products that fail to perform as specified within extended-warranty period.
1. Extended-Warranty Period: [**Three**] [**Four**] [**Five**] <Insert number> years from date of Substantial Completion; [**full**] [**prorated**] coverage for labor, materials, and equipment.

1.8 WARRANTY FOR BATTERIES

- A. Special Manufacturer Extended Warranty for Batteries: Manufacturer warrants that batteries perform in accordance with specified requirements and agrees to provide repair or replacement of batteries that fail to perform as specified within extended-warranty period.
1. Initial Extended-Warranty Period for Ni-Cd Batteries: [**Five**] <Insert number> years from date of Substantial Completion; full coverage for materials only, free on board [**origin**] [**destination**], freight prepaid.
 2. Follow-On Extended-Warranty Period for Ni-Cd Batteries: [**15**] <Insert number> years from date of Substantial Completion; prorated coverage for materials only, free on board [**origin**] [**destination**], freight prepaid.
 3. Additional Warranted Cycle Life Criteria for Standard Valve Regulated (Sealed) Lead Acid Batteries: Equal to or greater than that represented in manufacturer's published table, but not less than the following, based on annual average battery temperature of **77 deg F (25 deg C)**:
 - a. For discharge rate not faster than eight hours, discharge duration not longer than eight hours, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than six discharge cycles.
 - b. For discharge rate not faster than 30 minutes, discharge duration not longer than 30 minutes, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 20 discharge cycles.
 - c. For discharge rate not faster than 15 minutes, discharge duration not longer than 45 seconds, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 120 discharge cycles.
 4. Additional Warranted Cycle Life Criteria for Premium Valve Regulated (Sealed) Lead Acid Batteries: Equal to or greater than that represented in manufacturer's published table, but not less than the following, based on annual average battery temperature of **77 deg F (25 deg C)**:

- a. For discharge rate not faster than eight hours, discharge duration not longer than eight hours, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 40 discharge cycles.
 - b. For discharge rate not faster than 30 minutes, discharge duration not longer than 30 minutes, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 125 discharge cycles.
 - c. For discharge rate not faster than 15 minutes, discharge duration not longer than 90 seconds, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 750 discharge cycles.
5. Additional Warranted Cycle Life Criteria for Flooded (Wet Cell or Open) Lead Acid Batteries: Equal to or greater than that represented in manufacturer's published table, but not less than the following, based on annual average battery temperature of **77 deg F (25 deg C)** and preventive maintenance performed in accordance with manufacturer's published instructions:
 - a. For discharge rate not faster than eight hours, discharge duration not longer than eight hours, and voltage at end of discharge not less than 1.75 V, warranted life must be not fewer than 40 discharge cycles.
 - b. For discharge rate not faster than one hour, discharge duration not longer than one hour, and voltage at end of discharge not less than 1.75 V, warranted life must be not fewer than 80 discharge cycles.
 - c. For discharge rate not faster than 15 minutes, discharge duration not longer than 45 seconds, and voltage at end of discharge not less than 1.67 V, warranted life must be not fewer than 2700 discharge cycles.

PART 2 - PRODUCTS

2.1 OPERATIONAL REQUIREMENTS

- A. Automatic operation includes the following:
 1. Double Conversion, Standard Efficiency:
 - a. Normal Conditions: Load is supplied with power flowing from the normal power input terminals, through the rectifier-charger and inverter, with the battery connected in parallel with the rectifier-charger output.
 - b. Abnormal Supply Conditions: If normal supply deviates from specified and adjustable voltage, voltage waveform, or frequency limits, the battery supplies energy to maintain constant, regulated inverter power output to the load without switching or disturbance.
 - c. Power Failure: If normal power fails, energy supplied by the battery through the inverter continues supply-regulated power to the load without switching or disturbance.
 2. Double Conversion, Line Interactive:
 - a. Normal Conditions: Load is supplied with power flowing from the normal power input terminals, with the rectifier-charger and inverter turned off and the battery disconnected.
 - b. Abnormal Supply Conditions: If normal supply deviates from specified and adjustable voltage, voltage waveform, or frequency limits, the rectifier-charger and inverter turn on and the battery supplies energy to provide constant, regulated inverter power output to the load with minimum of 98 percent UPS system efficiency.
 - c. Power Failure: If normal power fails, there is a maximum 4 μ s delay while the rectifier-charger and inverter turn on and the battery supplies energy to re-establish constant, regulated power output to the load.

3. Double Conversion, IGBT:
 - a. Normal Conditions: Load is supplied with power flowing from the normal power input terminals, through the rectifier-charger and inverter, with the battery connected in parallel with the rectifier-charger output. High-efficiency carrier stored trench IGBT, in both rectifier-charger and inverter circuits, provides a minimum of 97 percent efficiency for the UPS system at full load and a minimum of 94 percent efficiency at 50 percent load.
 - b. Abnormal Supply Conditions: If normal supply deviates from specified and adjustable voltage, voltage waveform, or frequency limits, the battery supplies energy to provide constant, regulated inverter power output to the load.
 - c. Power Failure: If normal power fails, the rectifier-charger and inverter use energy from the battery to supply constant, regulated power output to the load without switching or disturbance.
 4. When power is restored at the normal supply terminals of the system, controls must automatically synchronize the inverter with the external source before transferring the load. The rectifier-charger must supply power to the load through the inverter and simultaneously recharge the battery.
 5. If the battery becomes discharged and normal supply is available, the rectifier-charger must charge the battery. The rectifier-charger must automatically shift to float-charge mode on reaching full charge.
 6. If any element of the UPS system fails and power is available at the normal supply terminals of the system, the static bypass transfer switch must switch the load to the normal AC supply circuit without disturbance or interruption.
 7. The output power converters must produce up to 300 percent of rated full-load current for short-circuit clearing. The inverter must sustain steady-state overload conditions of up to 200 percent of rated full-load current for 60 seconds in normal operation.
 8. The inverter must be capable of sustaining 150 percent of system capacity for 30 seconds while powered from the battery.
 9. Should overloads persist past the time limitations, the automatic static transfer switch must switch the load to the bypass output of the UPS. When the fault has cleared, the static bypass transfer switch must return the load to the UPS system.
 10. If the battery is disconnected, the UPS must supply power to the load from the normal supply with no degradation of its regulation of voltage and frequency of the output bus.
- B. Manual operation includes the following:
1. Turning the inverter off causes the static bypass transfer switch to transfer the load directly to the normal AC supply circuit without disturbance or interruption.
 2. Turning the inverter on causes the static bypass transfer switch to transfer the load to the inverter.
- C. Maintenance Bypass/Isolation Switch Operation: Switch is interlocked so it cannot be operated unless the static bypass transfer switch is in the bypass mode. Device provides manual selection among the three conditions described below without interrupting supply to the load during switching:
1. Full Isolation: Load is supplied, bypassing the UPS. Normal UPS AC input circuit, static bypass transfer switch, and UPS load terminals are completely disconnected from external circuits.
 2. Maintenance Bypass: Load is supplied, bypassing the UPS. UPS AC supply terminals are energized to permit operational checking, but system load terminals are isolated from the load.
 3. Normal: Normal UPS AC supply terminals are energized and the load is supplied through the static bypass transfer switch and the UPS rectifier-charger and inverter, or the battery and the inverter.

2.2 PERFORMANCE REQUIREMENTS

- A. UL Compliance: Listed and labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with UL 1778.
- B. NFPA Compliance: UPS components must be listed and labeled, by qualified electrical testing laboratory recognized by authorities having jurisdiction, as suitable for installation in computer rooms in accordance with NFPA 75.
- C. The UPS must perform as specified in this article while supplying rated full-load current, composed of any combination of linear and nonlinear load, up to 100 percent nonlinear load with a maximum load crest factor of 3.0, under the following conditions or combinations of the following conditions:
 - 1. Inverter is switched to battery source.
 - 2. Steady-state AC input voltage deviates up to plus or minus **[10][15]** percent from nominal voltage.
 - 3. Steady-state input frequency deviates up to plus or minus 5 percent from nominal frequency.
 - 4. THD of input voltage is 15 percent or more with a minimum crest factor of 3.0, and the largest single harmonic component is a minimum of 5 percent of the fundamental value.
 - 5. Load is **[30][50][100]** percent unbalanced continuously.
- D. Minimum Duration of Supply: If battery is sole energy source supplying rated full-load UPS current at 80 percent power factor, duration of supply is **[five][10][15]<Insert duration>** minutes.
- E. Input Voltage Tolerance: System steady-state and transient output performance remains within specified tolerances when steady-state AC input voltage varies plus 10 percent and minus **[15][20][30]** percent from nominal voltage.
- F. Overall UPS Efficiency: Equal to or greater than **[94][95]<Insert number>** percent at 100 percent load, **[94][95]<Insert number>** percent at 75 percent load, and **[93][94]<Insert number>** percent at 25 percent load.
- G. Maximum Acoustical Noise: **<Insert value>**, "A" weighting, emanating from any UPS component under any condition of normal operation, measured **<Insert distance>** from nearest surface of component enclosure.
- H. Maximum Energizing Inrush Current: **[Six times the full-load current][Eight times the full-load current][Soft start linear input current rise to 100 percent over a 1- to 40-second period, factory set at 10 seconds]**.
- I. AC Output-Voltage Regulation for Loads 100 Percent Unbalanced: Maximum of plus or minus 2 percent over the full range of battery voltage.
- J. AC Output-Voltage Regulation for Loads 100 Percent Balanced: Maximum of plus or minus 1 percent over the full range of battery voltage.
- K. Output Frequency: 60 Hz, plus or minus 0.1 percent over the full range of input voltage, load, and battery voltage.
- L. Limitation of harmonic distortion of input current to the UPS must be as follows:
 - 1. Rectifier-charger circuits must limit THD to 5 percent, maximum, at rated full-load UPS current, for power sources with X/R ratio between 2 and 30. Provide tuned harmonic filter if required to meet harmonic distortion limit.
 - 2. THD is limited to a maximum of 32 percent, at rated full-load UPS current, for power sources with X/R ratio between 2 and 30.

- M. Maximum Harmonic Content of Output-Voltage Waveform: 5 percent RMS total and 3 percent RMS for any single harmonic, for **[100 percent rated nonlinear load current][rated full load with THD up to 50 percent]**, with a load crest factor of 3.0.
- N. Minimum Overload Capacity of UPS at Rated Voltage: 125 percent of rated full load for 10 minutes, 200 percent for 60 seconds in normal operation, and 150 percent for 30 seconds in battery operating mode.
- O. Maximum Output-Voltage Transient Excursions from Rated Value: For the following instantaneous load changes, stated as percentages of rated full UPS load, voltage must remain within stated percentages of rated value and recover to, and remain within, plus or minus 2 percent of that value within 50 ms:
 - 1. 50 Percent: Plus or minus 3 percent.
 - 2. 100 Percent: Plus or minus 5 percent.
 - 3. Loss of AC Input Power: Plus or minus 1 percent.
 - 4. Restoration of AC Input Power: Plus or minus 1 percent.
- P. Input Power Factor: A minimum of **[0.90][0.95]** lagging when supply voltage and current are at nominal rated values and the UPS is supplying rated full-load current without additional filters.
- Q. Output Power Factor Rating: Loads with power factor of 0.9 leading to 0.8 lagging must not require derating of the UPS. For loads with power factors outside this range, derate the UPS output as follows:
 - 1. Derate the UPS a maximum of 5 percent for 0.7 PF lagging.
 - 2. Derate the UPS a maximum of 10 percent for 0.6 PF lagging.
 - 3. Derate the UPS a maximum of 15 percent for 0.5 PF lagging.
 - 4. Derate the UPS a maximum of 20 percent for a range of 0.4 to 0.1 PF lagging.
- R. EMI Emissions: Comply with FCC rules and regulations and with 47 CFR 15 for Class A equipment.

2.3 UPS SYSTEMS

- A. Description: Self-contained, battery backup device and accessories that provides three-phase electrical power in the event of failure or sag in the normal power system.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[ABB, Electrification Business]**
 - 2. **[APC by Schneider Electric]**
 - 3. **[Eaton]**
 - 4. **[Liebert; Vertiv Holdings Co.]**
 - 5. **[Mitsubishi Electric Automation, Inc]**
 - 6. **[Staco Energy Products Co.]**
 - 7. **[Toshiba International Corporation]**
 - 8. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[ABB, Electrification Business]**
 - 2. **[APC by Schneider Electric]**
 - 3. **[Eaton]**
 - 4. **[Liebert; Vertiv Holdings Co.]**
 - 5. **[Mitsubishi Electric Automation, Inc]**

6. [Staco Energy Products Co.]
7. [Toshiba International Corporation]
8. <Insert manufacturer's name>

- D. Electronic Equipment: Solid-state devices using hermetically sealed, semiconductor elements. Devices include rectifier-charger, inverter, static bypass transfer switch, and system controls.
- E. Enclosures: Comply with UL 50E, Type 1, unless otherwise indicated.
- F. Configuration: [Single-cabinet][Multicabinet][Field-assembled, multicabinet] modular style units.
- G. Control Assemblies: Mount on modular plug-ins, readily accessible for maintenance.
- H. Maintainability Features: Mount rectifier-charger and inverter sections and the static bypass transfer switch on modular plug-ins, readily accessible for maintenance.
- I. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- J. Capacity Upgrade Capability: Arrange wiring, controls, and modular component plug-in provisions to permit future [25]<Insert number> percent increase in UPS capacity.
- K. Seismic-Restraint Design: UPS assemblies, subassemblies, and components (and fastenings and supports, mounting, and anchorage devices for them) must be designed and fabricated to withstand static and seismic forces.
- L. UPS Cabinet Ventilation: Redundant fans or blowers draw in ambient air near the bottom of cabinet and discharge it near the top rear.
- M. Output Circuit Neutral Bus, Conductor, and Terminal Ampacity: Rated phase current times a multiple of 1.73, minimum.

2.4 SURGE SUPPRESSION

- A. Protect internal UPS components from surges that enter at each AC power input connection including main disconnect switch, static bypass transfer switch[, and maintenance bypass/isolation switch]. Protect rectifier-charger, inverter, controls, and output components.
 1. Use factory-installed surge suppressors tested in accordance with IEEE C62.41.1 and IEEE C62.41.2, [Category B][Category C].
 2. Additional Surge Protection: Protect internal UPS components from low-frequency, high-energy voltage surges described in IEEE C62.41.1 and IEEE C62.41.2. Design the circuits connecting with external power sources and select circuit elements, conductors, conventional surge suppressors, and rectifier components and controls so input assemblies will have adequate mechanical strength and thermal and current-carrying capacity to withstand stresses imposed by 400 Hz, 180 percent voltage surges described in IEEE C62.41.1 and IEEE C62.41.2.

2.5 RECTIFIER-CHARGER

- A. Description: Voltage source converter, [six][12]-pulse [IGBT][GTO] rectifier.

- B. Capacity: Adequate to supply the inverter during rated full output load conditions and simultaneously recharge the battery from fully discharged condition to 95 percent of full charge within 10 times the rated discharge time for duration of supply under battery power at full load.
- C. Output Ripple: Limited by output filtration to less than 0.5 percent of rated current, peak to peak.
- D. Control Circuits: Immune to frequency variations within rated frequency ranges of normal and emergency power sources.
 - 1. Response Time: Field adjustable for maximum compatibility with local generator-set power source.
- E. Battery Float-Charging Conditions: Comply with battery manufacturer's published instructions for battery terminal voltage and charging current required for maximum battery life. The battery charger must be matched to the battery type supplied.
- F. Ni-Cd Battery Charger: Sense full charge by measuring the rate of temperature increase. Battery charging must be terminated when the rate of temperature rise reaches **1.8 deg F (1 deg C)** per minute. If the battery reaches **140 deg F (60 deg C)** prior to reaching this rate of temperature rise, charging must terminate. Chargers that determine full charge by voltage measurement to sense a 10 mV drop per cell when reaching full charge are also acceptable.

2.6 INVERTER

- A. Description:
 - 1. Pulse-width modulated, **[carrier stored trench IGBT][IGBT]** with sinusoidal output.
 - 2. Include a bypass phase synchronization window adjustment to optimize compatibility with local engine-generator-set power source.

2.7 CONTROLS AND INDICATIONS

- A. Description: Group displays, indications, and basic system controls on a common control panel on front of UPS enclosure.
- B. Minimum displays, indicating devices, and controls include those in lists below. Provide sensors, transducers, terminals, relays, and wiring required to support listed items. Alarms include audible signals and visual displays.
- C. Indications: **[Labeled LED][Plain-language messages on a digital LCD]**.
 - 1. Quantitative indications must include the following:
 - a. Input voltage, each phase, line to line.
 - b. Input current, each phase, line to line.
 - c. Bypass input voltage, each phase, line to line.
 - d. Bypass input frequency.
 - e. System output voltage, each phase, line to line.
 - f. System output current, each phase.
 - g. System output frequency.
 - h. DC bus voltage.
 - i. Battery current and direction (charge/discharge).
 - j. Elapsed time discharging battery.

2. Basic status condition indications must include the following:

- a. Normal operation.
- b. Load-on bypass.
- c. Load-on battery.
- d. Inverter off.
- e. Alarm condition.

3. Alarm indications must include the following:

- a. Bypass AC input overvoltage or undervoltage.
- b. Bypass AC input overfrequency or underfrequency.
- c. Bypass AC input and inverter out of synchronization.
- d. Bypass AC input wrong-phase rotation.
- e. Bypass AC input single-phase condition.
- f. Bypass AC input filter fuse blown.
- g. Internal frequency standard in use.
- h. Battery system alarm.
- i. Control power failure.
- j. Fan failure.
- k. UPS overload.
- l. Battery-charging control faulty.
- m. Input overvoltage or undervoltage.
- n. Input transformer overtemperature.
- o. Input circuit breaker tripped.
- p. Input wrong-phase rotation.
- q. Input single-phase condition.
- r. Approaching end of battery operation.
- s. Battery undervoltage shutdown.
- t. Maximum battery voltage.
- u. Inverter fuse blown.
- v. Inverter transformer overtemperature.
- w. Inverter overtemperature.
- x. Static bypass transfer switch overtemperature.
- y. Inverter power supply fault.
- z. Inverter transistors out of saturation.
- aa. Identification of faulty inverter section/leg.
- bb. Inverter output overvoltage or undervoltage.
- cc. UPS overload shutdown.
- dd. Inverter current sensor fault.
- ee. Inverter output contactor open.
- ff. Inverter current limit.

4. Controls must include the following:

- a. Inverter on-off.
- b. UPS start.
- c. Battery test.
- d. Alarm silence/reset.
- e. Output-voltage adjustment.

D. Dry-form "C" contacts must be available for remote indication of the following conditions:

- 1. UPS on battery.
- 2. UPS on-line.

3. UPS load-on bypass.
4. UPS in alarm condition.
5. UPS off (maintenance bypass closed).

- E. Emergency Power off Switch: Capable of local operation and operation by means of activation by external dry contacts.

2.8 STATIC BYPASS TRANSFER SWITCH

- A. Description: Solid-state switching device providing uninterrupted transfer with a contactor or electrically operated circuit breaker to automatically provide electrical isolation for the switch.
- B. Switch Rating: Continuous duty at the rated full-load UPS current, minimum.
- C. Input SPD: **[80][160]** kA.

2.9 MAINTENANCE BYPASS/ISOLATION SWITCH

- A. Description: Manually operated switch or arrangement of switching devices with mechanically actuated contact mechanism arranged to route the flow of power to the load around the rectifier-charger, inverter, and static bypass transfer switch.
1. Switch must be electrically and mechanically interlocked to prevent interrupting power to the load when switching to bypass mode.
 2. Switch must electrically isolate other UPS components to permit safe servicing.
 3. Switch must electrically isolate the rectifier-charger, inverter, and static bypass transfer switch from the load, but must allow primary power to the UPS for testing.
- B. Comply with NEMA PB 2 and UL 891.
- C. Switch Rating: Continuous duty at rated full-load UPS current.
- D. Mounting Provisions: **[Internal to system cabinet][Separate wall- or floor-mounted unit]**.
- E. Key interlock with key that is released only when the rectifier-charger and inverter are bypassed by the static bypass transfer switch. Key must be required to unlock maintenance bypass/isolation switch before switching from open (normal) position to closed position. Lock must be designed specifically for mechanical and electrical component interlocking.

2.10 OUTPUT DISTRIBUTION SECTION

- A. Panelboards: Comply with Section 262416 "Panelboards," except provide assembly integral to UPS cabinet.

2.11 OUTPUT ISOLATION TRANSFORMER

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[APC by Schneider Electric]**

2. **[Eaton]**
3. **<Insert manufacturer's name>**

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[APC by Schneider Electric]**
2. **[Eaton]**
3. **<Insert manufacturer's name>**

C. Description: **[Shielded unit][Unit]** with low forward transfer impedance up to 3 kHz, minimum. Include the following features:

1. Comply with applicable portions of UL 1561, including requirements for nonlinear load current-handling capability for a K-factor of approximately **[4][9][13][20]**.
2. Output Impedance at Fundamental Frequency: Between 3 and 4 percent.
3. Regulation: 5 percent, maximum, at rated nonlinear load current.
4. Full-Load Efficiency at Rated Nonlinear Load Current: 96 percent, minimum.
5. Electrostatic Shielding of Windings: Independent for each winding.
6. Coil Leads: Physically arranged for minimum interlead capacitance.
7. Shield Grounding Terminal: Separately mounted; labeled "Shield Ground."
8. Capacitive Coupling between Primary and Secondary: 33 pF, maximum, over a frequency range of 20 Hz to 1 MHz.

2.12 REMOTE STATUS AND ALARM PANEL

A. Description: Labeled LEDs on panel faceplate indicating **[five]<Insert quantity>** basic status conditions. Audible signal indicates alarm conditions. Silencing switch in face of panel silences signal without altering visual indication.

1. Cabinet and Faceplate: Surface or flush mounted to suit mounting conditions indicated.

2.13 REMOTE MONITORING

A. Description: Communication module in unit control panel provides capability for remote monitoring of status, parameters, and alarms specified in "Controls and Indications" Article. The remote computer and the connecting signal wiring are not included in this Section. Include the following features:

1. Connectors and network interface units for data transmission via TIA-485, Ethernet, or web-based link.
2. Software designed for control and monitoring of UPS functions and to provide on-screen explanations, interpretations, diagnosis, action guidance, and instructions for use of monitoring indications and development of meaningful reports. Permit storage and analysis of power-line transient records. Designs for Windows applications, software, and computer are not included in this Section.
3. Software and Hardware: Compatible with that specified in Section 260913 "Electrical Power Monitoring and Control."

2.14 BATTERY

A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be**

incorporated into the Work include, but are not limited to, the following]:

1. [C&D Technologies, Inc.]
2. [Eaton]
3. [EnerSys]
4. [Exide Technologies]
5. [Panasonic Corporation of North America]
6. <Insert manufacturer's name>

- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [C&D Technologies, Inc.]
2. [Eaton]
3. [EnerSys]
4. [Exide Technologies]
5. [Panasonic Corporation of North America]
6. <Insert manufacturer's name>

- C. General Characteristics:

1. Valve-regulated, recombinant, lead-calcium units, factory assembled in an isolated compartment of UPS cabinet, complete with battery disconnect switch.
 - a. Arrange for drawout removal of battery assembly from cabinet for testing and inspecting.
2. Valve-regulated, premium, heavy-duty, recombinant, lead-calcium units, complete with battery disconnect switch and intercell connectors.
 - a. Factory assembled in an isolated compartment of UPS cabinet.
 - b. Mount on [two-tier],[three-tier,] acid-resistant, painted steel racks.
 - c. Arrange for drawout removal of battery assembly from cabinet for testing and inspecting.
3. Flooded, lead-calcium, heavy-duty industrial units in styrene acrylonitrile containers. Mount on [two-tier],[three-tier,] acid-resistant, painted steel racks. Assembly includes battery disconnect switch, intercell connectors, hydrometer syringe, and thermometer with specific gravity-correction scales.
4. Flooded cell, heavy-duty, industrial, Ni-Cd units in polypropylene containers. Mount on [two-tier],[three-tier,] acid-resistant, painted steel racks, complete with battery disconnect switch and intercell connectors.
5. Valve-regulated, heavy-duty, industrial, recombinant, pocket plate design, Ni-Cd units in polypropylene containers, complete with battery disconnect switch and intercell connectors.
 - a. Factory assembled in an isolated compartment of UPS cabinet.
 - b. Mount on [two-tier],[three-tier,] acid-resistant, painted steel racks.
 - c. Arrange for drawout removal of battery assembly from cabinet for testing and inspecting.

- D. Seismic-Restraint Design: Battery racks, cabinets, assemblies, subassemblies, and components (and fastenings and supports, mounting, and anchorage devices for them) must be designed and fabricated to withstand static and seismic forces.

2.15 BASIC BATTERY MONITORING

- A. Basic Battery Monitoring: Continuous, real-time capture of battery performance data.

- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. **[Alber]**
2. **[APC by Schneider Electric]**
3. **[BTECH, Inc]**
4. **[Canara]**
5. **[Eaton]**
6. **[Liebert; Vertiv Holdings Co.]**
7. **[Midtronics, Inc]**
8. **[Power Systems Specialists, Inc.]**
9. **[Staco Energy Products Co.]**
10. **<Insert manufacturer's name>**

- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[Alber]**
2. **[APC by Schneider Electric]**
3. **[BTECH, Inc]**
4. **[Canara]**
5. **[Eaton]**
6. **[Liebert; Vertiv Holdings Co.]**
7. **[Midtronics, Inc]**
8. **[Power Systems Specialists, Inc.]**
9. **[Staco Energy Products Co.]**
10. **<Insert manufacturer's name>**

- D. Battery Ground-Fault Detector: Initiates alarm when resistance to ground of positive or negative bus of battery is less than 5000 Ω .
- E. Battery compartment high-temperature detector initiates an alarm when smoke or a temperature greater than **167 deg F (75 deg C)** occurs within the compartment.
- F. Battery compartment smoke/high-temperature detector initiates an alarm when smoke or a temperature greater than **167 deg F (75 deg C)** occurs within the compartment.
- G. Annunciation of Alarms: At UPS control panel and remotely.

2.16 ADDITIONAL BATTERY MONITORING

- A. Monitoring features and components must include the following:
1. Factory-wired sensing leads to cell and battery terminals and cell temperature sensors.
 2. Connections for data transmission via TIA-485 link, **[and][network interface and]** external signal wiring to **[computer][electrical power monitoring and control equipment]**. External signal wiring and computer are not specified in this Section.
 3. USB ports for printer and accessories.
 4. PC-based software designed to store and analyze battery data, compile reports on individual-cell parameters and total battery performance trends, and provide data for scheduling and prioritizing battery maintenance.
- B. Operation: Automatically measure and electronically record the following parameters on a routine

schedule and during battery discharge events. During discharge events, record measurements timed to nearest second; including measurements of the following parameters:

1. Total battery voltage and ambient temperature.
2. Individual-cell voltage, impedance, and temperature, and string current. During battery-discharging events such as utility outages, measures battery and cell voltages, battery string current and records values versus time to nearest second.
3. Individual-cell electrolyte levels.

2.17 BATTERY-CYCLE WARRANTY MONITORING

- A. Description: Electronic device, acceptable to battery manufacturer as a basis for warranty action, for monitoring of charge-discharge cycle history of batteries covered by cycle-life warranties.
- B. Operation: Automatically measure and record each discharge event, classify it according to duration category and total discharges in accordance with warranty criteria, and display remaining warranted battery life on front panel display.
- C. Additional monitoring functions and features must include the following:
 1. Measuring and Recording: Total voltage at battery terminal. Initiate an alarm for excursions outside the proper float-voltage level.
 2. Monitoring: Ambient temperature at battery; initiate an alarm if temperature deviates from normally acceptable range.
 3. Keypad on Device Front Panel: Provide access to monitored data using front panel display.
 4. Alarm Contacts: Arrange to initiate **[local][remote]** alarm for **[battery discharge events][abnormal temperature][abnormal battery voltage or temperature]**.
 5. Memory: Store recorded data in nonvolatile electronic memory.
 6. Ethernet Port: Permits downloading of data to a PC.

2.18 SOURCE QUALITY CONTROL

- A. Product Data: Prepare and submit catalog cuts, brochures, **[diagrams,][schedules,]** and performance data illustrating size, physical appearance, and other characteristics of product.
 1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for UPS.
 2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.
 3. Product Certificates: For each product, from manufacturer.
 4. Sample Warranties: For manufacturer's special warranties.
- B. Factory Tests:
 1. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
 2. Factory Tests and Inspections: Test and inspect UPS system, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with NETA ATS before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.
 - a. Factory test complete UPS system before shipment. Use **[actual batteries that are part of final installation][the same type of batteries that are part of final installation][simulated battery testing]**. Include the following:

- 1) Test and demonstration of all functions, controls, indicators, sensors, and protective devices.
 - 2) Full-load test.
 - 3) Transient-load response test.
 - 4) Overload test.
 - 5) Power failure test.
3. Nonconforming Work:
- a. Equipment that does not pass tests and inspections will be considered defective.
4. Factory Test Reports: Prepare and submit factory test and inspection reports. Include the following data:
- a. Description of input source and output loads used. Describe actions required to simulate source load variation and various operating conditions and malfunctions.
 - b. List of indications, parameter values, and system responses considered satisfactory for each test action. Include tabulation of actual observations during test.
 - c. List of instruments and equipment used in factory tests.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine areas and conditions, with Installer present, for compliance with requirements for conditions affecting performance of the UPS.
- B. Proceed with installation only after unsatisfactory conditions have been corrected.
- C. Verify installation conditions are representative of the conditions used in the coordination studies for the electrical system. Provide fuse protection in accordance with Section 262813 "Fuses" if required for coordination with UPS overcurrent protective device requirements.

3.2 INSTALLATION

- A. Wiring Method: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters[**and except in accessible ceiling spaces and in gypsum board partitions where unenclosed wiring method may be used**]. Conceal raceway and cables except in unfinished spaces.
 1. Install plenum cable in environmental air spaces, including plenum ceilings.
 2. Comply with requirements for cable trays specified in Section 260536 "Cable Trays for Electrical Systems."
 3. Comply with requirements for raceways and boxes specified in Section 260533.13 "Conduits for Electrical Systems."
 4. Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
- B. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.
- C. Equipment Mounting: Install UPS on concrete base. Comply with requirements for concrete base specified in Section 033000 "Cast-in-Place Concrete."

1. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on **18 inch (450 mm)** centers around the full perimeter of concrete base **6 inch (150 mm)** from the outer edge of the base.
 2. For supported equipment, install epoxy-coated anchor bolts that extend through concrete base and anchor into structural concrete floor.
 3. Place and secure anchorage devices. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
 4. Install anchor bolts to elevations required for proper attachment to supported equipment.
- D. Maintain minimum clearances and workspace at equipment in accordance with manufacturer's published instructions and NFPA 70.
- E. Connections: Interconnect system components. Make connections to supply and load circuits in accordance with manufacturer's wiring diagrams unless otherwise indicated. Apply oxide inhibitor on battery terminals.

3.3 GROUNDING

A. Separately Derived Systems:

1. If not part of a listed power supply for a data-processing room, comply with NFPA 70 requirements for connecting to grounding electrodes and for bonding to metallic piping near isolation transformer. Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."
2. If part of a listed power supply for a data-processing room, comply with manufacturer's published instructions that include grounding requirements in excess of NFPA 70 requirements for connecting to grounding electrodes and for bonding to metallic piping near isolation transformer. Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."

3.4 IDENTIFICATION

- A. Identify system components, wiring, cabling, and terminals. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
1. Identify each battery cell individually.

3.5 BATTERY EQUALIZATION

- A. Equalize charging of battery cells in accordance with manufacturer's published instructions. Record individual-cell voltages.

3.6 FIELD QUALITY CONTROL

- A. Acceptance Testing Preparation:
1. **<Insert requirements>.**
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>.**
- C. Tests and Inspections:

1. Inspect interiors of enclosures, including the following:
 - a. Inspect anchorage, alignment, grounding, and required clearances.
 - b. Component type and labeling verification.
 - c. Ratings of installed components.
2. Test electrical and mechanical interlock systems for correct operation and sequencing.
3. Inspect bolted electrical connections for high resistance using one or more of the following methods:
 - a. Use of low-resistance ohmmeter in accordance with Section 7.22.2.2 of NETA ATS.
 - b. Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published instructions or Table 100.12 of NETA ATS.
 - c. Perform thermographic survey in accordance with Section 9 of NETA ATS.
4. Test static transfer from inverter to bypass and back. Use normal load, if possible.
5. Test DC undervoltage trip level on inverter input breaker. Set in accordance with manufacturer's published instructions.
6. Verify synchronizing indicators for static switch and bypass switches.
7. Test insulated-case and molded-case breakers.
 - a. Perform insulation-resistance tests for one minute on each pole, phase-to-phase and phase-to-ground with the circuit breaker closed, and across each open pole. Apply voltage in accordance with manufacturer's published instructions. In the absence of manufacturer's published instructions, use Table 100.1 of NETA ATS.
 - b. Perform insulation-resistance tests on all control wiring for ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid-state components, follow manufacturer's recommendation.
 - c. Use primary current injection to determine long time and short time, ground fault, and instantaneous pickup. Use secondary current injection to test trip functions.
 - d. Perform minimum pickup voltage tests on shunt trip and close coils in accordance with manufacturer's published instructions.
 - e. Verify operation of charging mechanism.
 - f. Verify correct operation of auxiliary features such as trip and pickup indicators, zone interlocking, electrical close and trip operation, trip-free, antipump function, and trip unit battery condition. Reset all trip logs and indicators.
8. Test automatic transfer switches.
 - a. Perform resistance measurements through bolted connections with a low-resistance ohmmeter, if applicable, in accordance with Section 7.22.3.1 of NETA ATS.
 - b. Perform insulation-resistance tests on all control wiring for ground. Applied potential must be 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable. Test duration must be one minute. For units with solid-state components or for control devices that cannot tolerate the applied voltage, follow manufacturer's recommendation.
 - c. Perform a contact/pole-resistance test.
 - d. Verify settings and operation of control devices.
 - e. Calibrate and set all relays and timers in accordance with Section 7.9 of NETA ATS.
 - f. Verify phase rotation, phasing, and synchronized operation as required by the application.
 - g. Perform automatic transfer tests.
 - 1) Simulate loss of normal power.
 - 2) Return to normal power.

- 3) Simulate loss of emergency power.
 - 4) Simulate all forms of single-phase conditions.
 - h. Verify correct operation and timing of the following functions:
 - 1) Normal source voltage-sensing and frequency-sensing relays.
 - 2) Time delay on transfer.
 - 3) Alternative source voltage-sensing and frequency-sensing relays.
 - 4) Automatic transfer operation.
 - 5) Interlocks and limit switch function.
 - 6) Time delay and retransfer on normal power restoration.
9. Test direct current system's batteries.
 - a. Verify adequacy of battery support racks, mounting, anchorage, alignment, grounding, and clearances.
 - b. **[Verify electrolyte level. Measure electrolyte level, specific gravity, and temperature.]**
 - c. Inspect spill containment installation. Measure charger float and equalizing voltage levels. Adjust to battery manufacturer's recommended settings.
 - d. Verify all charger functions and alarms.
 - e. Measure each cell voltage and total battery voltage with charger energized and in float mode of operation.
 - f. Perform a load test in accordance with manufacturer's published instructions or IEEE 450.
 - g. Measure charger float and equalizing voltage levels. Adjust to battery manufacturer's recommended settings.
 - h. Test values.
 - 1) Compare bolted connection resistance values to values of similar connections. Investigate values that deviate from those of similar bolted connections by more than 50 percent of the lowest value.
 - 2) Charger float and equalize voltage levels must be in accordance with battery manufacturer's published instructions.
 - 3) The results of charger functions and alarms must be in accordance with manufacturer's published instructions.
 - 4) Cell voltages must be within 0.05 V of each other or in accordance with manufacturer's published instructions.
 - 5) Cell internal ohmic values (resistance, impedance, or conductance) must not vary by more than 25 percent between identical cells that are in a fully charged state.
 - 6) Results of load tests must be in accordance with manufacturer's published instructions or IEEE 450.
10. Test communication of status and alarms to remote monitoring equipment.
11. Load the system using a variable-load bank to simulate kilovolt amperes, kilowatts, and power factor of loads for unit's rating. Use instruments calibrated within the previous **[six months]<Insert time>** in accordance with NIST standards.
 - a. Simulate malfunctions to verify protective device operation.
 - b. Test duration of supply on emergency, low-battery voltage shutdown, and transfers and restoration due to normal source failure.
 - c. Test harmonic content of input and output current at 25, 50, and 100 percent of rated loads.
 - d. Test output voltage under specified transient-load conditions.
 - e. Test efficiency at 50, 75, and 100 percent of rated loads.
 - f. Test remote status and alarm panel functions.
 - g. Test battery-monitoring system functions.

- D. Seismic-restraint tests and inspections must include the following:
 - 1. Inspect type, size, quantity, arrangement, and proper installation of mounting or anchorage devices.
 - 2. Test mounting and anchorage devices in accordance with requirements in Section 260548.16 "Seismic Controls for Electrical Systems."
- E. Nonconforming Work:
 - 1. The UPS system will be considered defective if it does not pass tests and inspections.
 - 2. Remove and replace defective units and retest.
- F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports. Include references to manufacturers' published instructions and other test and inspection criteria. Include results of tests, inspections, and retests.

3.7 PERFORMANCE TESTING

- A. Engage the services of a qualified power quality specialist to perform tests and activities indicated[**for each UPS system**].
- B. Monitoring and Testing Schedule: Perform monitoring and testing in [**a single 10-day period**][**four 10-day periods, each in a different season of the year**]<Insert period>.
 - 1. Schedule monitoring and testing activity with Owner, through Architect, with at least 14 days' advance notice.
 - 2. Schedule monitoring and testing after Substantial Completion, when the UPS is supplying power to its intended load.
- C. Monitoring and Testing Instruments: Three-phase, recording, power monitors. Instruments must provide continuous simultaneous monitoring of electrical parameters at UPS input terminals and at input terminals of loads served by the UPS. Instruments must monitor, measure, and graph voltage current and frequency simultaneously and provide full-graphic recordings of the values of those parameters before and during power-line disturbances that cause the values to deviate from normal beyond the adjustable threshold values. Instruments must be capable of recording either on paper or on magnetic media and have a minimum accuracy of plus or minus 2 percent for electrical parameters. Parameters to be monitored include the following:
 - 1. Current: Each phase and neutral and grounding conductors.
 - 2. Voltage: Phase to phase, phase to neutral, phase to ground, and neutral to ground.
 - 3. Frequency transients.
 - 4. Voltage swells and sags.
 - 5. Voltage Impulses: Phase to phase, phase to neutral, phase to ground, and neutral to ground.
 - 6. High-frequency noise.
 - 7. Radio-frequency interference.
 - 8. THD of the above currents and voltages.
 - 9. Harmonic content of currents and voltages above.
 - 10. Battery cell temperature during charging.
 - 11. Ambient temperature.
- D. Monitoring and Testing Procedures[**for Each Test Period**]:
 - 1. Exploratory Period: For the first [**two**]<Insert number> days[**of the first scheduled monitoring and testing period**], make recordings at various circuit locations and with various parameter-

- threshold and sampling-interval settings. Make these measurements with the objective of identifying optimum UPS, power system, load, and instrumentation setup conditions for subsequent test and monitoring operations.
2. Remainder of Test Period: Perform continuous monitoring of at least two circuit locations selected on the basis of data obtained during exploratory period.
 - a. Set thresholds and sampling intervals for recording data at values selected to optimize data on performance of the UPS for values indicated, and to highlight the need to adjust, repair, or modify the UPS, distribution system, or load component that may influence its performance or that may require better power quality.
 - b. Perform load and UPS power source switching and operate the UPS on generator power during portions of test period in accordance with directions of Owner's power quality specialist.
 - c. Operate the UPS and its loads in each mode of operation permitted by UPS controls and by the power distribution system design.
 - d. Using loads and devices available as part of the facility's installed systems and equipment[**and a temporarily connected portable generator set**], create and simulate unusual operating conditions, including outages, voltage swells and sags, and voltage, current, and frequency transients. Maintain normal operating loads in operation on system to maximum extent possible during tests.
 - e. Using temporarily connected resistive/inductive load banks[**and a temporarily connected portable generator set**], create and simulate unusual operating conditions, including outages, voltage swells and sags, and voltage, current, and frequency transients. Maintain normal operating loads in operation on system to maximum extent possible during tests.
 - f. Make adjustments and repairs to UPS, distribution, and load equipment to correct deficiencies disclosed by monitoring and testing; repeat appropriate monitoring and testing to verify success of corrective action.
- E. Coordination with Specified UPS Monitoring Functions: Obtain printouts of built-in monitoring functions specified for the UPS and its components in this Section that are simultaneously recorded with portable instruments in this article.
1. Provide the temporary use of an appropriate PC and printer equipped with required connections and software for recording and printing if such units are not available on-site.
 2. Coordinate printouts with recordings for monitoring performed in accordance with this article, and resolve and report any anomalies in and discrepancies between the two sets of records.
- F. Monitoring and Testing Assistance by Contractor:
1. Open UPS and electrical distribution and load equipment and wiring enclosures to make monitoring and testing points accessible for temporary monitoring probe and sensor placement and removal as requested.
 2. Observe monitoring and testing operations; ensure that UPS and distribution and load equipment warranties are not compromised.
 3. Perform switching and control of various UPS units, electrical distribution systems, and load components as directed by power quality specialist. Specialist must design this portion of monitoring and testing operations to expose the UPS to various operating environments, conditions, and events while response is observed, electrical parameters are monitored, and system and equipment deficiencies are identified.
 4. Make repairs and adjustments to the UPS and to electrical distribution system and load components, and retest and repeat monitoring as needed to verify validity of results and correction of deficiencies.
 5. Engage the services of the UPS manufacturer's factory-authorized service representative periodically during performance testing operations for repairs, adjustments, and consultations.
- G. Documentation: Record test point and sensor locations, instrument settings, and circuit and load

conditions for each monitoring summary and power disturbance recording. Coordinate simultaneous recordings made on UPS input and load circuits.

- H. Analysis of Recorded Data and Report: Review and analyze test observations and recorded data and submit a detailed written report. Include the following in **[each]** report:
1. Descriptions of corrective actions performed during monitoring and survey work and their results.
 2. Recommendations for further action to provide optimum performance by the UPS and appropriate power quality for non-UPS loads. Include a statement of priority ranking and a cost estimate for each recommendation that involves system or equipment revisions.
 3. Copies of monitoring summary graphics and graphics illustrating harmonic content of significant voltages and currents.
 4. Copies of graphics of power disturbance recordings that illustrate findings, conclusions, and recommendations.
 5. Recommendations for operating, adjusting, or revising UPS controls.
 6. Recommendations for alterations to the UPS installation.
 7. Recommendations for adjusting or revising generator-set or automatic transfer switch installations or their controls.
 8. Recommendations for power distribution system revisions.
 9. Recommendations for adjusting or revising electrical loads, their connections, or controls.
- I. Interim and Final Reports: Provide an interim report at the end of each test period and a final comprehensive report at the end of final test and analysis period.

END OF SECTION 26 35 33 00

Task	Specification	Specification Description
26 35 33 16	26 09 23 00	Electrical Power Monitoring
26 35 33 16	26 35 33 00	Power Factor Correction Equipment

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 36 00 00 - TRANSFER SWITCHES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Contactor-type automatic transfer switches.
2. Molded-case-type automatic transfer switches.
3. Nonautomatic transfer switches.
4. Transfer switch accessories.

1.2 ACTION SUBMITTALS

A. Product Data:

1. Contactor-type automatic transfer switches.
2. Molded-case-type automatic transfer switches.
3. Nonautomatic transfer switches.
4. Transfer switch accessories.

B. Product Data Submittals: For each product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for transfer switches.
2. Include rated capacities, operating characteristics, electrical characteristics, and accessories.

C. Shop Drawings:

1. Include plans, elevations, sections, details showing minimum clearances, conductor entry provisions, gutter space, and installed features and devices.
2. Include material lists for each switch specified.
3. Single-Line Diagram: Show connections between transfer switch, **[bypass/isolation switch,]**power sources, and load; and show interlocking provisions for each combined transfer switch and bypass/isolation switch.
4. Riser Diagram: Show interconnection wiring between transfer switches, bypass/isolation switches, annunciators, and control panels.

1.3 INFORMATIONAL SUBMITTALS

A. Qualification Data: For **[manufacturer-authorized service representative][testing agency]**.

B. Seismic Qualification Data: Certificates, for transfer switches, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.

3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

- C. Field quality-control reports.

1.4 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For each type of product to include in emergency, operation, and maintenance manuals.

1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:
 - a. Features and operating sequences, both automatic and manual.
 - b. List of all factory settings of relays; provide relay-setting and calibration instructions, including software, where applicable.

1.5 QUALITY ASSURANCE

- A. Testing Agency Qualifications:

1. Member company of NETA.
 - a. Testing Agency's Field Supervisor: Certified by NETA to supervise on-site testing.

1.6 FIELD CONDITIONS

- A. Interruption of Existing Electrical Service: Do not interrupt electrical service to facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary electrical service:
 1. Notify **[Architect][Construction Manager][Owner]** no fewer than **[two]<Insert number>** days in advance of proposed interruption of electrical service.
 2. Do not proceed with interruption of electrical service without **[Architect's][Construction Manager's][Owner's]** written permission.

1.7 WARRANTY

- A. Manufacturer's Warranty: Manufacturer agrees to repair or replace components of transfer switch or transfer switch components that fail in materials or workmanship within specified warranty period.
 1. Warranty Period: **[12 months][18 months][Two years]<Insert time>** from date of Substantial Completion.

PART 2 - PRODUCTS**2.1 PERFORMANCE REQUIREMENTS**

- A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
- B. Comply with NEMA ICS 1.
- C. Comply with NFPA 99.
- D. Comply with NFPA 110.
- E. Comply with UL 1008 unless requirements of these Specifications are stricter.
- F. Indicated Current Ratings: Apply as defined in UL 1008 for continuous loading and total system transfer, including tungsten filament lamp loads not exceeding 30 percent of switch ampere rating, unless otherwise indicated.
- G. Tested Fault-Current Closing and Short-Circuit Ratings: Adequate for duty imposed by protective devices at installation locations in Project under the fault conditions indicated, based on testing according to UL 1008.
 - 1. Where transfer switch includes internal fault-current protection, rating of switch and trip unit combination shall exceed indicated fault-current value at installation location.
 - 2. Short-time withstand capability for **[three][30]<Insert number>** cycles.
- H. Repetitive Accuracy of Solid-State Controls: All settings shall be plus or minus 2 percent or better over an operating temperature range of minus 20 to plus 70 deg C.
- I. Resistance to Damage by Voltage Transients: Components shall meet or exceed voltage-surge withstand capability requirements when tested according to IEEE C62.62. Components shall meet or exceed voltage-impulse withstand test of NEMA ICS 1.
- J. Electrical Operation: Accomplish by a nonfused, momentarily energized solenoid or electric-motor-operated mechanism. Switches for emergency or standby purposes shall be mechanically and electrically interlocked in both directions to prevent simultaneous connection to both power sources unless closed transition.
- K. Service-Rated Transfer Switch:
 - 1. Comply with UL 869A and UL 489.
 - 2. Provide terminals for bonding the grounding electrode conductor to the grounded service conductor.
 - 3. In systems with a neutral, the bonding connection shall be on the neutral bus.
 - 4. Provide removable link for temporary separation of the service and load grounded conductors.
 - 5. Surge Protective Device: Service rated.
 - 6. Ground-Fault Protection: Comply with UL 1008 for **[normal bus][normal and alternative buses]**.
 - 7. Service Disconnecting Means: Externally operated, manual **[mechanically][electrically]** actuated.
- L. Neutral Switching: Where four-pole switches are indicated, provide **[neutral pole switched simultaneously with phase poles][overlapping neutral contacts]**.

- M. Neutral Terminal: Solid and fully rated unless otherwise indicated.
- N. Oversize Neutral: Ampacity and switch rating of neutral path through units indicated for oversize neutral shall be double the nominal rating of circuit in which switch is installed.
- O. Heater: Equip switches exposed to outdoor temperatures and humidity, and other units indicated, with an internal heater. Provide thermostat within enclosure to control heater.
- P. Battery Charger: For generator starting batteries.
 - 1. Float type, rated **[2][10]** A.
 - 2. Ammeter to display charging current.
 - 3. Fused ac inputs and dc outputs.
- Q. Annunciation, Control, and Programming Interface Components: Devices at transfer switches for communicating with remote programming devices, annunciators, or annunciator and control panels shall have communication capability matched with remote device.
- R. Factory Wiring: Train and bundle factory wiring and label, consistent with Shop Drawings, by color-code or by numbered or lettered wire and cable **[with printed][tape][shrinkable sleeve]** markers at terminations. Color-coding and wire and cable markers are specified in Section 260553 "Identification for Electrical Systems."
 - 1. Designated Terminals: Pressure type, suitable for types and sizes of field wiring indicated.
 - 2. Power-Terminal Arrangement and Field-Wiring Space: Suitable for top, side, or bottom entrance of feeder conductors as indicated.
 - 3. Control Wiring: Equipped with lugs suitable for connection to terminal strips.
 - 4. Accessible via **[rear][front]** access.
- S. Enclosures: General-purpose NEMA 250, **[Type 1][Type 3R][Type 4X][Type 12]**, complying with NEMA ICS 6 and UL 508, unless otherwise indicated.

2.2 CONTACTOR-TYPE AUTOMATIC TRANSFER SWITCHES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[ABB, Electrification Business]**
 - 2. **[ASCO Power Technologies]**
 - 3. **[Caterpillar, Inc.; Electric Power Division]**
 - 4. **[Cummins Power Generation]**
 - 5. **[Eaton]**
 - 6. **[Generac]**
 - 7. **[Hubbell Utility Solutions; Hubbell Incorporated]**
 - 8. **[Kohler Power Systems]**
 - 9. **[Rolls-Royce Solutions America Inc.]**
 - 10. **[Russelectric, Inc]**
 - 11. **[Vertiv; Vertiv Holdings Co.]**
 - 12. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[ABB, Electrification Business]**
 2. **[ASCO Power Technologies]**
 3. **[Caterpillar, Inc.; Electric Power Division]**
 4. **[Cummins Power Generation]**
 5. **[Eaton]**
 6. **[Generac]**
 7. **[Hubbell Utility Solutions; Hubbell Incorporated]**
 8. **[Kohler Power Systems]**
 9. **[Rolls-Royce Solutions America Inc.]**
 10. **[Russelectric, Inc]**
 11. **[Vertiv; Vertiv Holdings Co.]**
 12. **<Insert manufacturer's name>**
- C. Comply with Level 1 equipment according to NFPA 110.
- D. Switch Characteristics: Designed for continuous-duty repetitive transfer of full-rated current between active power sources.
1. Limitation: Switches using molded-case switches or circuit breakers or insulated-case circuit-breaker components are unacceptable.
 2. Switch Action: Double throw; mechanically held in both directions.
 3. Contacts: Silver composition or silver alloy for load-current switching. Contactor-style automatic transfer-switch units, rated 600 A and higher, shall have separate arcing contacts.
 4. Conductor Connectors: Suitable for use with conductor material and sizes.
 5. Material: **[Tin-plated aluminum][Hard-drawn copper, 98 percent conductivity]**.
 6. Main and Neutral Lugs: **[Compression][Mechanical]** type.
 7. Ground Lugs and Bus-Configured Terminators: **[Compression][Mechanical]** type.
 8. Ground bar.
 9. Connectors shall be marked for conductor size and type according to UL 1008.
 10. **<Insert features>**.
- E. Automatic Open-Transition Transfer Switches: Interlocked to prevent the load from being closed on both sources at the same time.
1. Sources shall be mechanically and electrically interlocked to prevent closing both sources on the load at the same time.
- F. Automatic Delayed-Transition Transfer Switches: Pauses or stops in intermediate position to momentarily disconnect both sources, with transition controlled by programming in the automatic transfer-switch controller. Interlocked to prevent the load from being closed on both sources at the same time.
1. Adjustable Time Delay: For override of normal-source voltage sensing to delay transfer and engine start signals for alternative source. Adjustable from zero to six seconds, and factory set for one second.
 2. Sources shall be mechanically and electrically interlocked to prevent closing both sources on the load at the same time.
 3. Fully automatic break-before-make operation with center off position.
 4. Fully automatic break-before-make operation with transfer when two sources have near zero phase difference.
- G. Automatic Closed-Transition Transfer Switches: Connect both sources to load momentarily. Transition is controlled by programming in the automatic transfer-switch controller.
1. Fully automatic make-before-break operation when transferring between two available power sources.

2. Load transfer without interruption, through momentary interconnection of both power sources not exceeding 100 ms.
 3. Initiation of No-Interruption Transfer: Controlled by in-phase monitor and sensors confirming both sources are present and acceptable.
 - a. Initiation occurs without active control of generator.
 - b. Automatic transfer-switch controller takes active control of generator to match frequency, phase angle, and voltage.
 - c. Controls ensure that closed-transition load transfer closure occurs only when the two sources are within plus or minus 5 electrical degrees maximum, and plus or minus 5 percent maximum voltage difference.
 4. Failure of power source serving load initiates automatic break-before-make transfer.
- H. Manual Switch Operation, Load-Breaking: Under load, with door closed and with either or both sources energized. Transfer time is same as for electrical operation. Control circuit automatically disconnects from electrical operator during manual operation.
- I. Manual Switch Operation, Non-Load-Breaking: Unloaded. Control circuit automatically disconnects from electrical operator during manual operation.
- J. Electric Nonautomatic Switch Operation: Electrically actuated by push buttons designated "Normal Source" and "Alternative Source." Switch shall be capable of transferring load in either direction with either or both sources energized.
- K. Signal-Before-Transfer Contacts: A set of normally open/normally closed dry contacts operates in advance of retransfer to normal source. Interval shall be adjustable from 1 to 30 seconds.
- L. Digital Communication Interface: Matched to capability of remote annunciator or annunciator and control panel.
- M. Automatic Transfer-Switch Controller Features:
1. Controller operates through a period of loss of control power.
 2. Undervoltage Sensing for Each Phase of Normal **[and Alternate]**Source: Sense low phase-to-ground voltage on each phase. Pickup voltage shall be adjustable from 85 to 100 percent of nominal, and dropout voltage shall be adjustable from 75 to 98 percent of pickup value. Factory set for pickup at 90 percent and dropout at 85 percent.
 3. Voltage/Frequency Lockout Relay: Prevent premature transfer to generator. Pickup voltage shall be adjustable from 85 to 100 percent of nominal. Factory set for pickup at 90 percent. Pickup frequency shall be adjustable from 90 to 100 percent of nominal. Factory set for pickup at 95 percent.
 4. Time Delay for Retransfer to Normal Source: Adjustable from zero to 30 minutes, and factory set for 10 minutes. Override shall automatically defeat delay on loss of voltage or sustained undervoltage of emergency source, provided normal supply has been restored.
 5. Test Switch: Simulate normal-source failure.
 6. Switch-Position Pilot Lights: Indicate source to which load is connected.
 7. Source-Available Indicating Lights: Supervise sources via transfer-switch normal- and emergency-source sensing circuits.
 - a. Normal Power Supervision: Green light with nameplate engraved "Normal Source Available."
 - b. Emergency Power Supervision: Red light with nameplate engraved "Emergency Source Available."

8. Unassigned Auxiliary Contacts: Two normally open, single-pole, double-throw contacts for each switch position, rated 10 A at 240-V ac.
9. Transfer Override Switch: Overrides automatic retransfer control so transfer switch will remain connected to emergency power source regardless of condition of normal source. Pilot light indicates override status.
10. Engine Starting Contacts: One isolated and normally closed, and one isolated and normally open; rated 10 A at 32-V dc minimum.
11. Engine Shutdown Contacts:
 - a. Instantaneous; shall initiate shutdown sequence at remote engine-generator controls after retransfer of load to normal source.
 - b. Time delay adjustable from zero to five minutes, and factory set for five minutes. Contacts shall initiate shutdown at remote engine-generator controls after retransfer of load to normal source.
12. Engine-Generator Exerciser: Solid-state, programmable-time switch starts engine generator and transfers load to it from normal source for a preset time, then retransfers and shuts down engine after a preset cool-down period. Initiates exercise cycle at preset intervals adjustable from 7 to 30 days. Running periods shall be adjustable from 10 to 30 minutes. Factory settings shall be for 7-day exercise cycle, 20-minute running period, and 5-minute cool-down period. Exerciser features include the following:
 - a. Exerciser Transfer Selector Switch: Permits selection of exercise with and without load transfer.
 - b. Push-button programming control with digital display of settings.
 - c. Integral battery operation of time switch when normal control power is unavailable.

N. Large-Motor-Load Power Transfer:

1. In-Phase Monitor: Factory-wired, internal relay controls transfer so contacts close only when the two sources are synchronized in phase and frequency. Relay shall compare phase relationship and frequency difference between normal and emergency sources and initiate transfer when both sources are within 15 electrical degrees, and only if transfer can be completed within 60 electrical degrees. Transfer shall be initiated only if both sources are within 2 Hz of nominal frequency and 70 percent or more of nominal voltage.
2. Motor Disconnect and Timing Relay Controls: Designated starters in loss of power scenario shall disconnect motors before transfer and reconnect them selectively at an adjustable time interval after transfer. Control connection to motor starters shall be through wiring external to automatic transfer switch. Provide adjustable time delay between 1 and 60 seconds for reconnecting individual motor loads. Provide relay contacts rated for motor-control circuit inrush and for actual seal currents to be encountered.
3. Programmed Neutral Switch Position: Switch operator with programmed neutral position arranged to provide a midpoint between the two working switch positions, with an intentional, time-controlled pause at midpoint during transfer. Adjustable pause from 0.5 to 30 seconds minimum, and factory set for 0.5 second unless otherwise indicated. Time delay occurs for both transfer directions. Disable pause unless both sources are live.

2.3 MOLDED-CASE-TYPE AUTOMATIC TRANSFER SWITCHES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[ABB, Electrification Business]**
 2. **[Caterpillar, Inc.; Electric Power Division]**

3. [Cummins Power Generation]
 4. [Eaton]
 5. [Emerson Electric Co., Automation Solutions]
 6. [Generac]
 7. [Kohler Power Systems]
 8. [Lake Shore Electric Corporation]
 9. <Insert manufacturer's name>
- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
1. [ABB, Electrification Business]
 2. [Caterpillar, Inc.; Electric Power Division]
 3. [Cummins Power Generation]
 4. [Eaton]
 5. [Emerson Electric Co., Automation Solutions]
 6. [Generac]
 7. [Kohler Power Systems]
 8. [Lake Shore Electric Corporation]
 9. <Insert manufacturer's name>
- C. Comply with Level 1 equipment according to NFPA 110.
- D. Switch Characteristics: Designed for continuous-duty repetitive transfer of full-rated current between active power sources.
1. Limitation: Switches using contactor-based components are unacceptable.
 2. Switch Action: Double throw; mechanically held in both directions.
 3. Contacts: Silver composition or silver alloy for load-current switching.
 4. Conductor Connectors: Suitable for use with conductor material and sizes.
 5. Material: [Tin-plated aluminum][Hard-drawn copper, 98 percent conductivity].
 6. Main and Neutral Lugs: [Compression][Mechanical] type.
 7. Ground Lugs and Bus-Configured Terminators: [Compression][Mechanical] type.
 8. Ground bar.
 9. Connectors shall be marked for conductor size and type according to UL 1008.
 10. <Insert features>.
- E. Automatic Open-Transition Transfer Switches: Interlocked to prevent the load from being closed on both sources at the same time.
1. Sources shall be mechanically and electrically interlocked to prevent closing both sources on the load at the same time.
- F. Automatic Delayed-Transition Transfer Switches: Pauses or stops in intermediate position to momentarily disconnect both sources, with transition controlled by programming in the automatic transfer-switch controller. Interlocked to prevent the load from being closed on both sources at the same time.
1. Adjustable Time Delay: For override of normal-source voltage sensing to delay transfer and engine start signals for alternative source. Adjustable from zero to six seconds, and factory set for one second.
 2. Sources shall be mechanically and electrically interlocked to prevent closing both sources on the load at the same time.
 3. Fully automatic break-before-make operation with center off position.
 4. Fully automatic break-before-make operation with transfer when two sources have near zero

phase difference.

- G. Automatic Closed-Transition Transfer Switches: Connect both sources to load momentarily. Transition is controlled by programming in the automatic transfer-switch controller.
 - 1. Fully automatic make-before-break operation when transferring between two available power sources.
 - 2. Load transfer without interruption, through momentary interconnection of both power sources not exceeding 100 ms.
 - 3. Initiation of No-Interruption Transfer: Controlled by in-phase monitor and sensors confirming both sources are present and acceptable.
 - a. Initiation occurs without active control of generator.
 - b. Automatic transfer-switch controller takes active control of generator to match frequency, phase angle, and voltage.
 - c. Controls ensure that closed-transition load transfer closure occurs only when the two sources are within plus or minus 5 electrical degrees maximum, and plus or minus 5 percent maximum voltage difference.
 - 4. Failure of power source serving load initiates automatic break-before-make transfer.
- H. Manual Switch Operation, Load-Breaking: Under load, with door closed and with either or both sources energized. Transfer time is same as for electrical operation. Control circuit automatically disconnects from electrical operator during manual operation.
- I. Manual Switch Operation, Non-Load-Breaking: Unloaded. Control circuit automatically disconnects from electrical operator during manual operation.
- J. Electric Nonautomatic Switch Operation: Electrically actuated by push buttons designated "Normal Source" and "Alternative Source." Switch shall be capable of transferring load in either direction with either or both sources energized.
- K. Signal-Before-Transfer Contacts: A set of normally open/normally closed dry contacts operates in advance of retransfer to normal source. Interval shall be adjustable from 1 to 30 seconds.
- L. Digital Communication Interface: Matched to capability of remote annunciator or annunciator and control panel.
- M. Transfer Switches Based on Molded-Case-Switch Components: Comply with UL 489 and UL 869A.
- N. Automatic Transfer-Switch Controller Features:
 - 1. Controller operates through a period of loss of control power.
 - 2. Undervoltage Sensing for Each Phase of Normal **[and Alternative]**Source: Sense low phase-to-ground voltage on each phase. Pickup voltage shall be adjustable from 85 to 100 percent of nominal, and dropout voltage shall be adjustable from 75 to 98 percent of pickup value. Factory set for pickup at 90 percent and dropout at 85 percent.
 - 3. Voltage/Frequency Lockout Relay: Prevent premature transfer to generator. Pickup voltage shall be adjustable from 85 to 100 percent of nominal. Factory set for pickup at 90 percent. Pickup frequency shall be adjustable from 90 to 100 percent of nominal. Factory set for pickup at 95 percent.
 - 4. Time Delay for Retransfer to Normal Source: Adjustable from zero to 30 minutes, and factory set for 10 minutes. Override shall automatically defeat delay on loss of voltage or sustained undervoltage of emergency source, provided normal supply has been restored.
 - 5. Test Switch: Simulate normal-source failure.
 - 6. Switch-Position Pilot Lights: Indicate source to which load is connected.

7. Source-Available Indicating Lights: Supervise sources via transfer-switch normal- and emergency-source sensing circuits.
 - a. Normal Power Supervision: Green light with nameplate engraved "Normal Source Available."
 - b. Emergency Power Supervision: Red light with nameplate engraved "Emergency Source Available."
8. Unassigned Auxiliary Contacts: Two normally open, single-pole, double-throw contacts for each switch position, rated 10 A at 240-V ac.
9. Transfer Override Switch: Overrides automatic retransfer control so automatic transfer switch will remain connected to emergency power source regardless of condition of normal source. Pilot light indicates override status.
10. Engine Starting Contacts: One isolated and normally closed, and one isolated and normally open; rated 10 A at 32-V dc minimum.
11. Engine Shutdown Contacts:
 - a. Instantaneous; shall initiate shutdown sequence at remote engine-generator controls after retransfer of load to normal source.
 - b. Time delay adjustable from zero to five minutes, and factory set for five minutes. Contacts shall initiate shutdown at remote engine-generator controls after retransfer of load to normal source.
12. Engine-Generator Exerciser: Solid-state, programmable-time switch starts engine generator and transfers load to it from normal source for a preset time, then retransfers and shuts down engine after a preset cool-down period. Initiates exercise cycle at preset intervals adjustable from 7 to 30 days. Running periods shall be adjustable from 10 to 30 minutes. Factory settings shall be for 7-day exercise cycle, 20-minute running period, and 5-minute cool-down period. Exerciser features include the following:
 - a. Exerciser Transfer Selector Switch: Permits selection of exercise with and without load transfer.
 - b. Push-button programming control with digital display of settings.
 - c. Integral battery operation of time switch when normal control power is unavailable.

O. Large-Motor-Load Power Transfer:

1. In-Phase Monitor: Factory-wired, internal relay controls transfer so contacts close only when the two sources are synchronized in phase and frequency. Relay shall compare phase relationship and frequency difference between normal and emergency sources and initiate transfer when both sources are within 15 electrical degrees, and only if transfer can be completed within 60 electrical degrees. Transfer shall be initiated only if both sources are within 2 Hz of nominal frequency and 70 percent or more of nominal voltage.
2. Motor Disconnect and Timing Relay Controls: Designated starters in loss of power scenario shall disconnect motors before transfer and reconnect them selectively at an adjustable time interval after transfer. Control connection to motor starters shall be through wiring external to automatic transfer switch. Provide adjustable time delay between 1 and 60 seconds for reconnecting individual motor loads. Provide relay contacts rated for motor-control circuit inrush and for actual seal currents to be encountered.
3. Programmed Neutral Switch Position: Switch operator with programmed neutral position arranged to provide a midpoint between the two working switch positions, with an intentional, time-controlled pause at midpoint during transfer. Adjustable pause from 0.5 to 30 seconds minimum, and factory set for 0.5 second unless otherwise indicated. Time delay occurs for both transfer directions. Disable pause unless both sources are live.

**2.4 NONAUTOMATIC TRANSFER SWITCHES**

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[ASCO Power Technologies]**
 2. **[Caterpillar, Inc.; Electric Power Division]**
 3. **[Cummins Power Generation]**
 4. **[Eaton]**
 5. **[ESL Power Systems, Inc.]**
 6. **[Russelectric, Inc]**
 7. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[ASCO Power Technologies]**
 2. **[Caterpillar, Inc.; Electric Power Division]**
 3. **[Cummins Power Generation]**
 4. **[Eaton]**
 5. **[ESL Power Systems, Inc.]**
 6. **[Russelectric, Inc]**
 7. **<Insert manufacturer's name>**
- C. Electrically Operated: Electrically actuated by push buttons designated "Normal Source" and "Alternative Source." Switch shall be capable of transferring load in either direction with either or both sources energized.
- D. Manual and Electrically Operated: Electrically actuated by push buttons designated "Normal Source" and "Alternative Source." Manual handle provides quick-make, quick-break manual-switching action. Switch shall be capable of electrically or manually transferring load in either direction with either or both sources energized. Control circuit disconnects from electrical operator during manual operation.
- E. Double-Throw Switching Arrangement: Incapable of pauses or intermediate position stops during switching sequence.
- F. Pilot Lights: Indicate source to which load is connected.
- G. Source-Available Indicating Lights: Supervise sources via transfer-switch normal- and alternative-source sensing circuits.
1. Normal Power Supervision: Green light with nameplate engraved "Normal Source Available."
 2. Emergency Power Supervision: Red light with nameplate engraved "Alternative Source Available."
- H. Unassigned Auxiliary Contacts: Switch shall have one set of normally closed contacts for each switch position, rated 10 A at 240-V ac.
- I. Switch Characteristics: Designed for continuous-duty repetitive transfer of full-rated current between active power sources.
1. Switch Action: Double throw; mechanically held in both directions.
 2. Contacts: Silver composition or silver alloy for load-current switching.
 3. Conductor Connectors: Suitable for use with conductor material and sizes.
 4. Material: **[Tin-plated aluminum][Hard-drawn copper, 98 percent conductivity]**.

5. Main and Neutral Lugs: [**Compression**][**Mechanical**] type.
6. Ground Lugs and Bus-Configured Terminators: [**Compression**][**Mechanical**] type.
7. Ground bar.
8. Connectors shall be marked for conductor size and type according to UL 1008.
9. <Insert features>.

2.5 TRANSFER SWITCH ACCESSORIES

A. Bypass/Isolation Switches:

1. Source Limitations: Same manufacturer as transfer switch in which installed.
2. Comply with requirements for Level 1 equipment according to NFPA 110.
3. Description: Manual type, arranged to select and connect either source of power directly to load, isolating transfer switch from load and from both power sources. Include the following features for each combined automatic transfer switch and bypass/isolation switch:
 - a. Means to lock bypass/isolation switch in the position that isolates transfer switch with an arrangement that permits complete electrical testing of transfer switch while isolated. Interlocks shall prevent transfer-switch operation, except for testing or maintenance, while automatic transfer switch is isolated.
 - b. Provide means to make power available to transfer-switch control circuit for testing and maintenance purposes.
 - c. Drawout Arrangement for Transfer Switch: Provide physical separation from live parts and accessibility for testing and maintenance operations. Transfer switch and bypass/isolation switch shall be in isolated compartments.
 - d. Transition:
 - 1) Provide closed-transition operation when transferring from main transfer switch to bypass/isolation switch on the same power source.
 - 2) Provide [**open**][**closed**]-transition operation when transferring between power sources.
 - e. Bypass/Isolation Switch Current, Voltage, Closing, and Short-Circuit Withstand Ratings: Equal to or greater than those of associated automatic transfer switch, and with same phase arrangement and number of poles.
 - f. Contact temperatures of bypass/isolation switches shall not exceed those of automatic transfer-switch contacts when they are carrying rated load.
 - g. Manual Control: Constructed so load bypass and transfer-switch isolation can be performed by one person in no more than two operations in 15 seconds or less. Operating handles shall be externally operated.
 - h. Automatic and Nonautomatic Control: Automatic transfer-switch controller shall also control the bypass/isolation switch.
 - i. Legend: Manufacturer's standard legend for control labels and instruction signs shall describe operating instructions.
 - j. Maintainability: Fabricate to allow convenient removal of major components from front without removing other parts or main power conductors.
4. Interconnection of Bypass/Isolation Switches with Automatic Transfer Switches: Factory-installed copper bus bars; plated at connection points and braced for the indicated available short-circuit current.

B. Remote Annunciator System:

1. Source Limitations: Same manufacturer as transfer switch in which installed.

2. Functional Description: Remote annunciator panel shall annunciate conditions for indicated transfer switches.
3. Annunciation panel display shall include the following indicators:
 - a. Sources available, as defined by actual pickup and dropout settings of transfer-switch controls.
 - b. Switch position.
 - c. Switch in test mode.
 - d. Failure of communication link.
4. Annunciator Panel: LED-lamp type with audible signal and silencing switch.
 - a. Indicating Lights: Grouped for each transfer switch monitored.
 - b. Label each group, indicating transfer switch it monitors, location of switch, and identity of load it serves.
 - c. Mounting: Flush, modular, steel cabinet unless otherwise indicated.
 - d. Lamp Test: Push-to-test or lamp-test switch on front panel.

C. Remote Annunciator and Control System:

1. Source Limitations: Same manufacturer as transfer switch in which installed.
2. Include the following functions for indicated transfer switches:
 - a. Indication of sources available, as defined by actual pickup and dropout settings of transfer-switch controls.
 - b. Indication of switch position.
 - c. Indication of switch in test mode.
 - d. Indication of failure of digital communication link.
 - e. Key-switch or user-code access to control functions of panel.
 - f. Control of switch-test initiation.
 - g. Control of switch operation in either direction.
 - h. Control of time-delay bypass for transfer to normal source.
3. Malfunction of annunciator, annunciation and control panel, or communication link shall not affect functions of automatic transfer switch. In the event of failure of communication link, automatic transfer switch automatically shall revert to standalone, self-contained operation. Automatic transfer-switch sensing, controlling, or operating function shall not depend on remote panel for proper operation.
4. Remote Annunciation and Control Panel: Solid-state components. Include the following features:
 - a. Controls and indicating lights grouped together for each transfer switch.
 - b. Label each indicating light control group. Indicate transfer switch it controls, location of switch, and load it serves.
 - c. Digital Communication Capability: Matched to that of transfer switches supervised.
 - d. Mounting: Flush, modular, steel cabinet unless otherwise indicated.

2.6 SOURCE QUALITY CONTROL

- A. Factory Tests: Test and inspect components, assembled switches, and associated equipment according to UL 1008. Ensure proper operation. Check transfer time and voltage, frequency, and time-delay settings for compliance with specified requirements. Perform dielectric strength test complying with NEMA ICS 1.
- B. Prepare test and inspection reports.

1. For each of the tests required by UL 1008, performed on representative devices, for **[emergency][legally required]** systems. Include results of test for the following conditions:
 - a. Overvoltage.
 - b. Undervoltage.
 - c. Loss of supply voltage.
 - d. Reduction of supply voltage.
 - e. Alternative supply voltage or frequency is at minimum acceptable values.
 - f. Temperature rise.
 - g. Dielectric voltage-withstand; before and after short-circuit test.
 - h. Overload.
 - i. Contact opening.
 - j. Endurance.
 - k. Short circuit.
 - l. Short-time current capability.
 - m. Receptacle withstand capability.
 - n. Insulating base and supports damage.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Floor-Mounting Switch: Anchor to floor by bolting.
 1. Install transfer switches on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
 2. Comply with requirements for seismic control devices specified in Section 260548.16 "Seismic Controls for Electrical Systems."
 3. Coordinate size and location of concrete bases. Cast anchor-bolt inserts into bases.
 4. Provide workspace and clearances required by NFPA 70.
- B. Annunciator and Control Panel Mounting: Flush in wall unless otherwise indicated.
- C. Identify components according to Section 260553 "Identification for Electrical Systems."
- D. Set field-adjustable intervals and delays, relays, and engine exerciser clock.
- E. Comply with NECA 1.

3.2 CONNECTIONS

- A. Wiring to Remote Components: Match type and number of cables and conductors to generator sets, **[motor controls]**, control, and communication requirements of transfer switches as recommended by manufacturer. Increase raceway sizes at no additional cost to Owner if necessary to accommodate required wiring.
- B. Wiring Method: Install cables in raceways and cable trays except within electrical enclosures. Conceal raceway and cables except in unfinished spaces.
 1. Comply with requirements for raceways specified in Section 260533.13 "Conduits for Electrical Systems."

- C. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii.
- D. Ground equipment according to Section 260526 "Grounding and Bonding for Electrical Systems."
- E. Connect wiring according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- F. Connect twisted pair cable according to Section 260523 "Control-Voltage Electrical Power Cables."
- G. Connect twisted pair cable according to Section 271513 "Communications Copper Horizontal Cabling."
- H. Route and brace conductors according to manufacturer's written instructions[.] **and Section 260529 "Hangers and Supports for Electrical Systems."** Do not obscure manufacturer's markings and labels.
- I. Brace and support equipment according to Section 260548.16 "Seismic Controls for Electrical Systems."
- J. Final connections to equipment shall be made with liquidtight, flexible metallic conduit no more than **18 inches (457 mm)** in length.

3.3 FIELD QUALITY CONTROL

- A. Administrant for Tests and Inspections:
 - 1. Owner will engage qualified testing agency to administer and perform tests and inspections.
 - 2. Engage qualified testing agency to administer and perform tests and inspections.
 - 3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
 - 4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].
- B. Tests and Inspections:
 - 1. After installing equipment, test for compliance with requirements according to NETA ATS.
 - 2. Visual and Mechanical Inspection:
 - a. Compare equipment nameplate data with Drawings and Specifications.
 - b. Inspect physical and mechanical condition.
 - c. Inspect anchorage, alignment, grounding, and required clearances.
 - d. Verify that the unit is clean.
 - e. Verify appropriate lubrication on moving current-carrying parts and on moving and sliding surfaces.
 - f. Verify that manual transfer warnings are attached and visible.
 - g. Verify tightness of all control connections.
 - h. Inspect bolted electrical connections for high resistance using one of the following methods, or both:
 - 1) Use of low-resistance ohmmeter.
 - 2) Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method according to manufacturer's published data.
 - i. Perform manual transfer operation.
 - j. Verify positive mechanical interlocking between normal and alternate sources.
 - k. Perform visual and mechanical inspection of surge arresters.

- I. Inspect control power transformers.
 - 1) Inspect for physical damage, cracked insulation, broken leads, tightness of connections, defective wiring, and overall general condition.
 - 2) Verify that primary and secondary fuse or circuit-breaker ratings match Drawings.
 - 3) Verify correct functioning of drawout disconnecting contacts, grounding contacts, and interlocks.
3. Electrical Tests:
 - a. Perform insulation-resistance tests on all control wiring with respect to ground.
 - b. Perform a contact/pole-resistance test. Compare measured values with manufacturer's acceptable values.
 - c. Verify settings and operation of control devices.
 - d. Calibrate and set all relays and timers.
 - e. Verify phase rotation, phasing, and synchronized operation.
 - f. Perform automatic transfer tests.
 - g. Verify correct operation and timing of the following functions:
 - 1) Normal source voltage-sensing and frequency-sensing relays.
 - 2) Engine start sequence.
 - 3) Time delay on transfer.
 - 4) Alternative source voltage-sensing and frequency-sensing relays.
 - 5) Automatic transfer operation.
 - 6) Interlocks and limit switch function.
 - 7) Time delay and retransfer on normal power restoration.
 - 8) Engine cool-down and shutdown feature.
4. Measure insulation resistance phase-to-phase and phase-to-ground with insulation-resistance tester. Include external annunciation and control circuits. Use test voltages and procedure recommended by manufacturer. Comply with manufacturer's specified minimum resistance.
 - a. Check for electrical continuity of circuits and for short circuits.
 - b. Inspect for physical damage, proper installation and connection, and integrity of barriers, covers, and safety features.
 - c. Verify that manual transfer warnings are properly placed.
 - d. Perform manual transfer operation.
5. After energizing circuits, perform each electrical test for transfer switches stated in NETA ATS and demonstrate interlocking sequence and operational function for each switch at least three times.
 - a. Simulate power failures of normal source to automatic transfer switches and retransfer from emergency source with normal source available.
 - b. Simulate loss of phase-to-ground voltage for each phase of normal source.
 - c. Verify time-delay settings.
 - d. Verify pickup and dropout voltages by data readout or inspection of control settings.
 - e. Test bypass/isolation unit functional modes and related automatic transfer-switch operations.
 - f. Perform contact-resistance test across main contacts and correct values exceeding 500 microhms and values for one pole deviating by more than 50 percent from other poles.
 - g. Verify proper sequence and correct timing of automatic engine starting, transfer time delay, retransfer time delay on restoration of normal power, and engine cool-down and shutdown.
6. Ground-Fault Tests: Coordinate with testing of ground-fault protective devices for power delivery

from both sources.

- a. Verify grounding connections and locations and ratings of sensors.
- C. Coordinate tests with tests of generator and run them concurrently.
- D. Report results of tests and inspections in writing. Record adjustable relay settings and measured insulation and contact resistances and time delays. Attach a label or tag to each tested component indicating satisfactory completion of tests.
- E. Transfer switches will be considered defective if they do not pass tests and inspections.
- F. Remove and replace malfunctioning units and retest as specified above.
- G. Prepare test and inspection reports.
- H. Infrared Scanning: After Substantial Completion, but not more than 60 days after Final Acceptance, perform an infrared scan of each switch. Remove all access panels so joints and connections are accessible to portable scanner.
 1. Instrument: Use an infrared scanning device designed to measure temperature or to detect significant deviations from normal values. Provide calibration record for device.
 2. Record of Infrared Scanning: Prepare a certified report that identifies switches checked and that describes scanning results. Include notation of deficiencies detected, remedial action taken, and observations after remedial action.
 3. Follow-up Infrared Scanning: Perform an additional follow-up infrared scan of each switch 11 months after date of Substantial Completion.

3.4 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain transfer switches and related equipment.
- B. Training shall include testing ground-fault protective devices and instructions to determine when the ground-fault system shall be retested. Include instructions on where ground-fault sensors are located and how to avoid negating the ground-fault protection scheme during testing and circuit modifications.
- C. Coordinate this training with that for generator equipment.

SECTION 26 40 00 00 - LIGHTNING PROTECTION FOR STRUCTURES

PART 1 - GENERAL

1.1 SUMMARY

- A. Section Includes: Lightning protection system for ordinary structures.
- B. Section Includes: Lightning protection system for the following:
 - 1. Ordinary structures.
 - 2. **<Insert one or more miscellaneous structures or special occupancies>.**

1.2 ACTION SUBMITTALS

- A. Product Data: For each product.
- B. Shop Drawings:
 - 1. Include layouts of the lightning protection system, with details of the components to be used in the installation.
 - 2. Include raceway locations needed for the installation of conductors.
 - 3. Details of air terminals, ground rods, ground rings, conductor supports, splices, and terminations, including concealment requirements.
 - 4. Include roof attachment details, coordinated with roof installation.
 - 5. Calculations required by NFPA 780 for bonding of metal bodies.

1.3 INFORMATIONAL SUBMITTALS

- A. Coordination Drawings: Lightning protection system Shop Drawings, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:
 - 1. Lightning protection cabling attachments to roofing systems and accessories.
 - 2. Lightning protection strike termination device attachment to roofing systems, coordinated with the roofing system manufacturer.
 - 3. Lightning protection system components penetrating roofing and moisture protection systems and system components, coordinated with the roofing system manufacturer.
- B. Qualification Data: For Installer.
- C. Product Certificates: For each type of roof adhesive for attaching the roof-mounted air terminal assemblies, approved by the roofing-material manufacturer.
- D. Field quality-control reports.

1.4 CLOSEOUT SUBMITTALS

- A. Maintenance Data: For lightning protection system to include in maintenance manuals.

1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:
 - a. Dimensioned site plan showing dimensioned route of the ground loop conductor and the ground rod locations. Comply with requirements of Section 017839 "Project Record Documents."
 - b. A system testing and inspection record, listing the results of inspections and ground resistance tests, as recommended by NFPA 780, Annex D.

B. Completion Certificate:

1. **[UL Master Label Certificate][UL Letter of Findings Limited Scope Inspection Report][LPI Master Certificate][LPI Limited Scope Certification].**

1.5 QUALITY ASSURANCE

- A. Installer Qualifications: **[UL-listed installer, category OWAY][or][LPI Master Installer].**

PART 2 - PRODUCTS

2.1 LIGHTNING PROTECTION FOR STRUCTURES

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

1. **[allG Fabrication (formerly ALT)]**
2. **[East Coast Lightning Equipment Inc.]**
3. **[ERICO; brand of nVent Electrical plc]**
4. **[Harger Lightning & Grounding; business of Harger, Inc.]**
5. **[Heary Bros. Lightning Protection Co. Inc]**
6. **[Independent Protection Co]**
7. **[National Lightning Protection]**
8. **[Preferred Lightning Protection]**
9. **[Robbins Lightning, Inc]**
10. **[Thompson Lightning Protection, Inc]**
11. **[VFC Lightning Protection]**
12. **<Insert manufacturer's name>**

- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[allG Fabrication (formerly ALT)]**
2. **[East Coast Lightning Equipment Inc.]**
3. **[ERICO; brand of nVent Electrical plc]**
4. **[Harger Lightning & Grounding; business of Harger, Inc.]**
5. **[Heary Bros. Lightning Protection Co. Inc]**
6. **[Independent Protection Co]**
7. **[National Lightning Protection]**
8. **[Preferred Lightning Protection]**
9. **[Robbins Lightning, Inc]**
10. **[Thompson Lightning Protection, Inc]**

11. **[VFC Lightning Protection]**
12. **<Insert manufacturer's name>**

2.2 PERFORMANCE REQUIREMENTS

- A. NFPA Lightning Protection Standard: Comply with NFPA 780 requirements for **[Class I][Class II]** buildings.
- B. UL Lightning Protection Standard: Comply with UL 96A requirements for **[Class I][Class II]** buildings.
- C. Lightning Protection Components, Devices, and Accessories: Listed and labeled by a qualified testing agency as complying with UL 96, and marked for intended location and application.

2.3 MATERIALS

- A. Air Terminals:
 1. **[Copper][Stainless steel][or][Aluminum]** unless otherwise indicated.
 2. **[3/8-inch (10-mm)][1/2-inch (12.7-mm)][5/8-inch (16-mm)]** diameter by **[10 inches (254 mm)][12 inches (305 mm)][15 inches (380 mm)][18 inches (450 mm)][24 inches (610 mm)]<Insert length of air terminal>** long.
 3. **[Pointed][Rounded]** tip.
 4. **[Integral base support][Threaded base support]**.
- B. Air Terminal Bracing:
 1. **[Aluminum][Copper][Stainless steel][Galvanized steel]**.
 2. **[1/4-inch (6-mm)]<Insert size>** diameter rod.
- C. Class I Main Conductors:
 1. **[Stranded Copper: 57,400 circular mils in diameter][Aluminum: 98,600 circular mils in diameter]**.
- D. Class II Main Conductors:
 1. **[Stranded Copper: 115,000 circular mils in diameter][Aluminum: 192,000 circular mils in diameter]**.
- E. Secondary Conductors:
 1. **[Stranded Copper: 26,240 circular mils in diameter][Aluminum: 41,400 circular mils in diameter]**.
- F. Ground Loop Conductor: **[Stranded copper][Tinned copper]**.
- G. Ground Rods:
 1. Material: **[Solid copper][Copper-clad steel][Stainless steel]**.
 2. Diameter: **[5/8 inch (16 mm)][3/4 inch (19 mm)]**.
 3. Rods shall be not less than **120 inches (3050 mm)** long.
 4. **[Sectional type, with integral threads]**.

- H. Conductor Splices and Connectors: Compression fittings that are installed with hydraulically operated tools, or exothermic welds, approved for use with the class type.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Install lightning protection components and systems according to **[UL 96A][NFPA 780]**.
- B. Install conductors with direct paths from air terminals to ground connections. Avoid bends less than 90 degrees and **8 inches (203 mm)** in radius and narrow loops.
- C. Conceal conductors within normal view from exterior locations at grade within **200 feet (60 m)** of building. Comply with requirements for **[concealed installations in UL 96A][concealed systems in NFPA 780]**.
 - 1. Roof penetrations required for down conductors and connections to structural-steel framework shall be made using listed through-roof fitting and connector assemblies with solid rods and appropriate roof flashings. Use materials approved by the roofing manufacturer for the purpose. Conform to the methods and materials required at roofing penetrations of the lightning protection components to ensure compatibility with the roofing specifications and warranty.
 - 2. Install conduit where necessary to comply with conductor concealment requirements.
 - 3. Air Terminals on Single-Ply Membrane Roofing: Comply with adhesive manufacturer's written instructions.
- D. Ground Ring Electrode: The conductor shall be not less than the main-size lightning conductor.

3.2 CONNECTIONS

- A. Aboveground concealed connections, and connections in earth or concrete, shall be done by exothermic welds or by high-compression fittings listed for the purpose.
- B. Aboveground exposed connections shall be done using the following types of connectors, listed and labeled for the purpose: **[bolted connectors][exothermic weld][high compression][crimp]**.
- C. Bonding Straps and Jumpers: Install in locations accessible for inspection and maintenance, except where routed through short lengths of conduit.
 - 1. Bonding to Structure: Bond straps directly to basic structure, taking care not to penetrate any adjacent parts.
 - 2. Bonding to Equipment Mounted on Vibration Isolation Hangers and Supports: Install bonding so vibration is not transmitted to rigidly mounted equipment.

3.3 CORROSION PROTECTION

- A. Do not combine materials that can form an electrolytic couple that will accelerate corrosion in the presence of moisture unless moisture is permanently excluded from junction of such materials.
- B. Use conductors with protective coatings where conditions would cause deterioration or corrosion of conductors.

3.4 FIELD QUALITY CONTROL

- A. Special Inspections: **[Owner will engage][Engage]** a qualified special inspector to perform the following special inspections:
 - 1. Perform inspections as required to obtain a UL Master Label for system.
 - 2. Perform inspections to obtain an LPI certification.
- B. Prepare test and inspection reports and certificates.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 43 13 00 - SURGE PROTECTIVE DEVICES FOR LOW-VOLTAGE ELECTRICAL POWER CIRCUITS**PART 1 - GENERAL****1.1 SUMMARY****A. Section Includes:**

1. Type 1 surge protective devices (SPDs).
2. Type 2 surge protective devices (SPDs).
3. Type 3, Type 4, and Type 5 surge protective devices (SPDs).
4. Enclosures.
5. Conductors and cables.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
3. Section 262413 "Switchboards" for integral SPDs installed by switchboard manufacturer.
4. Section 262416 "Panelboards" for integral SPDs installed by panelboard manufacturer.
5. Section 262726 "Wiring Devices" for integral SPDs installed by receptacle manufacturer.

1.2 DEFINITIONS

- A. In: Nominal discharge current.
- B. Maximum Continuous Operating Voltage (MCOV): The maximum designated RMS value of the power frequency voltage that may be continuously applied to the mode of protection of an SPD.
- C. Metal-Oxide Varistor (MOV): An electronic component with a significant bidirectional, nonlinear current-voltage characteristic.
- D. Mode(s), Modes of Protection, or Protection Modes: Electrical paths where the SPD offers defense against transient overvoltages. Examples include: line to neutral (L-N), line to ground (L-G), line to line (L-L), and neutral to ground (N-G).
- E. SCCR: Short-circuit current rating.
- F. Type 1 SPDs: Permanently connected SPDs intended for installation between the secondary of the service transformer and the line side of the service disconnect overcurrent device.
- G. Type 2 SPDs: Permanently connected SPDs intended for installation on the load side of the service disconnect overcurrent device, including SPDs located at the branch panel.
- H. Type 3 SPDs: Point of utilization SPDs.

- I. Type 4 SPDs: Component SPDs, including discrete components, as well as assemblies.
- J. Type 5 SPDs: Discrete component surge suppressors, such as MOVs that may be mounted on a printed wiring board, connected by its leads or provided within an enclosure with mounting means and wiring terminations.
- K. Voltage Protection Rating (VPR): A rating selected from UL 1449 list of preferred values assigned to each mode of protection.

1.3 ACTION SUBMITTALS

A. Product Data:

- 1. For each type of product.
 - a. Include electrical characteristics, specialties, and accessories for SPDs.
 - b. Certification of compliance with UL 1449 by qualified electrical testing laboratory recognized by authorities having jurisdiction including the following information:
 - 1) Tested values for VPRs.
 - 2) In ratings.
 - 3) MCOV, type designations.
 - 4) OCPD requirements.
 - 5) Manufacturer's model number.
 - 6) System voltage.
 - 7) Modes of protection.

B. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Sample Warranty: For manufacturer's special warranty.

1.5 WARRANTY

- A. Special Manufacturer Extended Warranty: Manufacturer warrants that SPDs perform in accordance with specified requirements and agrees to provide repair or replacement of SPDs that fail to perform as specified within extended warranty period.
 - 1. Initial Extended Warranty Period: **[Five]<Insert number>** year(s) from date of Substantial Completion, for labor, materials, and equipment.
 - 2. Follow-On Extended Warranty Period: **[10]<Insert number>** year(s) from date of Substantial Completion, for materials only, f.o.b. the nearest shipping point to Project site.

PART 2 - PRODUCTS**2.1 TYPE 1 SURGE PROTECTIVE DEVICES (SPDs)**

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**

1. **[ABB, Electrification Business]**
2. **[Advanced Protection Technologies Inc. (APT)]**
3. **[ALLTEC LLC]**
4. **[Citel, Inc.]**
5. **[DITEK Surge Protection]**
6. **[Eaton]**
7. **[Intermatic, Inc]**
8. **[Leviton Manufacturing Co., Inc.]**
9. **[Liebert; Vertiv Holdings Co.]**
10. **[Mersen USA]**
11. **[Schneider Electric USA, Inc.]**
12. **[Siemens Industry, Inc., Energy Management Division]**
13. **[SSI, an ILSCO Company]**
14. **<Insert manufacturer's name>**

- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[ABB, Electrification Business]**
2. **[Advanced Protection Technologies Inc. (APT)]**
3. **[ALLTEC LLC]**
4. **[Citel, Inc.]**
5. **[DITEK Surge Protection]**
6. **[Eaton]**
7. **[Intermatic, Inc]**
8. **[Leviton Manufacturing Co., Inc.]**
9. **[Liebert; Vertiv Holdings Co.]**
10. **[Mersen USA]**
11. **[Schneider Electric USA, Inc.]**
12. **[Siemens Industry, Inc., Energy Management Division]**
13. **[SSI, an ILSCO Company]**
14. **<Insert manufacturer's name>**

- C. Source Limitations: Obtain devices from single source from single manufacturer.

- D. General Characteristics:

1. Reference Standards: UL 1449, Type 1.
2. MCOV: Not less than 125 percent of nominal system voltage for 208Y/120 V and 120/240 V power systems, and not less than 115 percent of nominal system voltage for 480Y/277 V power systems.
3. Peak Surge Current Rating: Minimum single-pulse surge current withstand rating per phase must not be less than **[160][200][240][320]<Insert value>** kA. Peak surge current rating must be arithmetic sum of the ratings of individual MOVs in a given mode.
4. Protection modes and UL 1449 VPR for grounded wye circuits with **[480Y/277 V][208Y/120 V]**, three-phase, four-wire circuits must not exceed the following:

Surge Protective Devices for Low-Voltage Electrical

- a. Line to Neutral: **[1200 V for 480Y/277 V][700 V for 208Y/120 V]**.
 - b. Line to Line: **[2000 V for 480Y/277 V][1200 V for 208Y/120 V]**.
5. Protection modes and UL 1449 VPR for 240/120 V, single-phase, three-wire circuits must not exceed the following:
- a. Line to Neutral: 700 V.
 - b. Line to Line: 1200 V.
6. SCCR: Not less than **[100][200]<Insert value>** kA.
7. In Rating: 20 kA.

E. Options:

- 1. Include integral disconnect switch.
- 2. Include internal thermal protection that disconnects the SPD before damaging internal suppressor components.
- 3. Include indicator light display for protection status.
- 4. Include audible alarm.
- 5. Include NEMA ICS 5, dry Form C contacts rated at **[2 A and 24 V(ac)]<Insert values>** for remote monitoring of protection status.
- 6. Include surge counter.

2.2 TYPE 2 SURGE PROTECTIVE DEVICES (SPDs)

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- 1. **[ABB, Electrification Business]**
- 2. **[Advanced Protection Technologies Inc. (APT)]**
- 3. **[ALLTEC LLC]**
- 4. **[Citel, Inc.]**
- 5. **[Eaton]**
- 6. **[Intermatic, Inc]**
- 7. **[Leviton Manufacturing Co., Inc.]**
- 8. **[Liebert; Vertiv Holdings Co.]**
- 9. **[Mersen USA]**
- 10. **[Schneider Electric USA, Inc.]**
- 11. **[Siemens Industry, Inc., Energy Management Division]**
- 12. **[SSI, an ILSCO Company]**
- 13. **<Insert manufacturer's name>**

- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- 1. **[ABB, Electrification Business]**
- 2. **[Advanced Protection Technologies Inc. (APT)]**
- 3. **[ALLTEC LLC]**
- 4. **[Citel, Inc.]**
- 5. **[Eaton]**
- 6. **[Intermatic, Inc]**
- 7. **[Leviton Manufacturing Co., Inc.]**

8. [Liebert; Vertiv Holdings Co.]
9. [Mersen USA]
10. [Schneider Electric USA, Inc.]
11. [Siemens Industry, Inc., Energy Management Division]
12. [SSI, an ILSCO Company]
13. <Insert manufacturer's name>

C. Source Limitations: Obtain devices from single source from single manufacturer.

D. General Characteristics:

1. Reference Standards: UL 1449, Type 2[; **UL 1283**].
2. MCOV: Not less than 125 percent of nominal system voltage for 208Y/120 V and 120/240 V power systems, and not less than 115 percent of nominal system voltage for 480Y/277 V power systems.
3. Peak Surge Current Rating: Minimum single-pulse surge current withstand rating per phase must not be less than [100][150]<Insert value> kA. Peak surge current rating must be arithmetic sum of the ratings of individual MOVs in a given mode.
4. Protection modes and UL 1449 VPR for grounded wye circuits with [480Y/277 V][208Y/120 V], three-phase, four-wire circuits must not exceed the following:
 - a. Line to Neutral: [1200 V for 480Y/277 V][700 V for 208Y/120 V].
 - b. Line to Ground: [1200 V for 480Y/277 V][700 V for 208Y/120 V].
 - c. Neutral to Ground: [1200 V for 480Y/277 V][700 V for 208Y/120 V].
 - d. Line to Line: [2000 V for 480Y/277 V][1200 V for 208Y/120 V].
5. Protection modes and UL 1449 VPR for 240/120 V, single-phase, three-wire circuits must not exceed the following:
 - a. Line to Neutral: 700 V.
 - b. Line to Ground: 700 V.
 - c. Neutral to Ground: 700 V.
 - d. Line to Line: 1200 V.
6. SCCR: Equal or exceed [100][200]<Insert value> kA.
7. In Rating: [20][10] kA.

E. Options:

1. Include LED indicator lights for power and protection status.
2. Include internal thermal protection that disconnects the SPD before damaging internal suppressor components.
3. Include NEMA ICS 5, dry Form C contacts rated at [2 A and 24 V(ac)]<Insert values> for remote monitoring of protection status.
4. Include surge counter.

2.3 TYPE 3, TYPE 4, AND TYPE 5 SURGE PROTECTIVE DEVICES (SPDs)

- A. Type 3, Type 4, and Type 5 SPDs are not approved for field installation.[See "Related Requirements" Paragraph in "Summary" Article for products with manufacturer-installed Type 3, Type 4, and Type 5 SPDs.]

2.4 ENCLOSURES

- A. Indoor Enclosures: Type 1.
- B. Outdoor Enclosures: **[Type 3R][Type 4X]**.

2.5 CONDUCTORS AND CABLES

- A. Power Wiring: Same size as SPD leads, complying with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Provide OCPD and disconnect for installation of SPD in accordance with UL 1449 and manufacturer's instructions.
- B. Install leads between disconnects and SPDs short, straight, twisted, and in accordance with manufacturer's instructions. Comply with wiring methods in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
 - 1. Do not splice and extend SPD leads unless specifically permitted by manufacturer.
 - 2. Do not exceed manufacturer's recommended lead length.
 - 3. Do not bond neutral and ground.
- C. Use crimped connectors and splices only. Wire nuts are unacceptable.

3.2 FIELD QUALITY CONTROL

- A. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- B. Tests and Inspections:
 - 1. Compare equipment nameplate data for compliance with Drawings and the Specifications.
 - 2. Inspect anchorage, alignment, grounding, and clearances.
 - 3. Verify that electrical wiring installation complies with manufacturer's installation requirements.
- C. Nonconforming Work:
 - 1. SPDs that do not pass tests and inspections will be considered defective.
 - 2. Remove and replace defective units and retest.
- D. Prepare test and inspection reports.
- E. Manufacturer Services:
 - 1. Engage factory-authorized service representative to **[support][supervise]** field tests and

inspections.

3.3 STARTUP SERVICE

- A. Complete startup checks in accordance with manufacturer's instructions.
- B. Do not perform insulation-resistance tests of the distribution wiring equipment with SPDs installed. Disconnect SPDs before conducting insulation-resistance tests; reconnect them immediately after the testing is over.
- C. Energize SPDs after power system has been energized, stabilized, and tested.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 50 00 00 - LIGHTING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Luminaires.
2. Luminaire fittings.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. **[Section 260519 "Low-Voltage Electrical Power Conductors and Cables"]****[and]****[Section 260523 "Control-Voltage Electrical Power Cables"]** specifies wiring connections installed by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies channel and angle supports installed by this Section.
6. Section 260546 "Poles for Electrical Systems" specifies lighting standards, utility poles, and accessories referenced by this Section.
7. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs installed by this Section.
8. Section 260923 "Lighting Control Devices" specifies automatic control of lighting, including time switches, photoelectric relays, occupancy sensors, and multipole lighting relays and contactors installed by this Section.
9. Section 260936 "Modular Dimming Controls" specifies architectural dimming systems with dimming installed by this Section.
10. Section 260943.16 "Addressable Luminaire Lighting Controls" and Section 260943.23 "Relay-Based Lighting Controls" specify manual or programmable control systems with low-voltage control wiring or data communication circuits installed by this Section.

1.2 DEFINITIONS

- A. BUG Rating: Backlight, uplight, and glare rating for light pollution from exterior luminaires.
- B. Correlated Color Temperature (CCT): The absolute temperature (in kelvins) of a blackbody whose chromaticity (color quality) most nearly resembles that of the light source.
- C. Color Rendering Index (CRI): The measure of the degree of color shift objects undergo when illuminated by the light source as compared with the color of those same objects when illuminated by a reference light source. The lower the CRI of a light source, the more difficult it is to identify colors and stripes on electronic components and wiring.
- D. IDA: International Dark-Sky Association.

- E. IES: Illuminating Engineering Society.
- F. LPD: Lighting power density.

1.3 ACTION SUBMITTALS

- A. Product Data: For each type of product.

1. Luminaires: Include the following additional information:

- a. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - 1) If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - 2) Listing criteria identified in approval letter must match specified listing criteria. Approval of only equipment's enclosure is not considered approval of equipment for intended application.
 - 3) Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for similar products are not acceptable.
- b. Product Certificates: Include product certificates stating compliance with standards listed below, signed by manufacturer or fabricator.
 - 1) Manufacturers' Certified Data: Photometric data certified by manufacturer's laboratory with current accreditation under National Voluntary Laboratory Accreditation Program (NVLAP) for Energy Efficient Lighting Products.
 - 2) Testing Agency Certified Data: For luminaires indicated on Lighting Fixture Schedule on the Drawings, photometric data certified by qualified independent testing laboratory. Photometric data for remaining luminaires must be certified by manufacturer.
 - 3) Air and Thermal Performance Data: For air-handling luminaires, include data required in **[Section 233713.13 "Air Diffusers."][Section 233713.23 "Registers and Grilles."][Section 233713.43 "Security Registers and Grilles."]**
 - 4) Sound Performance Data: For air-handling luminaires, indicate sound power level and sound transmission class in test reports certified in accordance with standards specified in **[Section 233713.13 "Air Diffusers."][Section 233713.23 "Registers and Grilles."][Section 233713.43 "Security Registers and Grilles."]**
- c. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
- d. Include operating characteristics, electrical characteristics, and furnished accessories.
- e. Include schedule of submitted lighting products. Arrange schedule and accompanying product data in order by luminaire and lamp designations indicated on the Drawings.
- f. Include battery and charger data for emergency lighting units.
- g. Include ballast factor.
- h. Include life, output (lumens, CCT, and CRI), and energy-efficiency data.
- i. Include photometric data and adjustment factors obtained from qualified laboratory tests.
- j. Include manufacturer's sample warranty language.
- k. **<Insert requirements>.**

2. Luminaire Fittings: Include the following additional information:

- a. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.
 - 1) If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
 - 2) Listing criteria identified in approval letter must match specified listing criteria. Approval of only equipment's enclosure is not considered approval of equipment for intended application.
 - 3) Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for similar products are not acceptable.
- b. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
- c. Include operating characteristics, electrical characteristics, and furnished accessories.
- d. Include schedule of submitted lighting products. Arrange schedule and accompanying product data in order by luminaire and lamp designations indicated on the Drawings.
- e. Include manufacturer's sample warranty language.
- f. **<Insert requirements>**.

B. Samples:

- 1. Luminaires: One for each kind of luminaire with specified rating, size, finish, color, and texture.
- 2. Luminaire Fittings: One for each kind of luminaire fitting with specified rating, size, finish, color, and texture.

C. Shop Drawings: Prepare and submit the following:

- 1. Drawings, Diagrams, and Supporting Documents for Custom Luminaires:
 - a. Include plans, elevations, sections, and mounting and attachment details.
 - b. Include details of luminaire assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
 - c. Include diagrams for power, signal, and control wiring.

D. Sustainable Design Submittals:

- 1. Product data for sustainable design features for each type of product.
- 2. ASHRAE/IES 90.1 LPD Compliance Documentation: Prepare plans and calculations demonstrating that as-constructed lighting power density complies with mandatory provisions of ASHRAE/IES 90.1 and that as-constructed lighting, including daylighting and controls, improves on baseline energy performance. If included with Project, indicate locations of energy meters for lighting loads.

E. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturers' published instructions.

B. Field Reports:

- 1. Manufacturer's field reports for field quality-control support.
- 2. Manufacturer's field reports for system startup support.

1.5 CLOSEOUT SUBMITTALS

- A. Warranty documentation.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare parts.
- B. Extra stock material.

1.7 MOCKUPS

- A. Provide mockups as indicated on the Drawings to verify selections made under Sample submittals and to set quality standards for materials and execution.
 - 1. Build mockup of luminaires in room or space, complete with power and control connections.
 - 2. Obtain Architect's approval of mockups before starting installation of related Work on the Project.
 - 3. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
 - 4. Maintain mockups during construction in undisturbed condition as standard for judging the completed Work.
 - 5. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.8 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures; conduct tests of complex equipment; analyze test and equipment data; plan a job; and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.
- D. Luminaire Photometric Testing Laboratory: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" accredited under NIST HB 150-1, and complying with applicable IES testing standards.
- E. Lighting Testing and Inspecting Agency: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with documented training and experience with testing and inspecting lighting installations in accordance with applicable IES standards.

**1.9 DELIVERY, STORAGE, AND HANDLING**

- A. Protect exposed surface finishes on lighting equipment by applying strippable, temporary protective covering before shipping.

1.10 WARRANTY FOR LUMINAIRES

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed luminaires perform in accordance with specified requirements and agrees to repair or replace products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Extended-Warranty Period: **[Two]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that luminaires perform in accordance with specified requirements and agrees to provide repair or replacement of products that fail to perform as specified within extended-warranty period.
 - 1. Extended-Warranty Period: **[Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.

1.11 WARRANTY FOR BATTERIES

- A. Special Manufacturer Extended Warranty for Batteries: Manufacturer warrants that batteries perform in accordance with specified requirements and agrees to provide repair or replacement of batteries that fail to perform as specified within extended-warranty period.
 - 1. Initial Extended-Warranty Period for Li-ion Batteries: **[Three][Four][Five]<Insert number>** years from date of Substantial Completion; full coverage for materials only, free on board **[origin][destination]**, freight prepaid.
 - 2. Follow-On Extended-Warranty Period for Li-ion Batteries: **[10]<Insert number>** years from date of Substantial Completion; prorated coverage for materials only, free on board **[origin][destination]**, freight prepaid.
 - 3. Initial Extended-Warranty Period for Ni-Cd Batteries: **[Five]<Insert number>** years from date of Substantial Completion; full coverage for materials only, free on board **[origin][destination]**, freight prepaid.
 - 4. Follow-On Extended-Warranty Period for Ni-Cd Batteries: **[15]<Insert number>** years from date of Substantial Completion; prorated coverage for materials only, free on board **[origin][destination]**, freight prepaid.

PART 2 - PRODUCTS**2.1 PERFORMANCE REQUIREMENTS**

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.2 LUMINAIRES

A. Surface-Mounted Luminaire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Albeo; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - b. **[Alera Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - c. **[Amerlux]**
 - d. **[Architectural Area Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - e. **[Atlas Lighting Products]**
 - f. **[Columbia Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - g. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - h. **[Deco Lighting]**
 - i. **[Digital Lumens]**
 - j. **[E-conolight]**
 - k. **[Edison Price Lighting]**
 - l. **[Elite Lighting Corporation]**
 - m. **[Focal Point; Legrand North America, LLC]**
 - n. **[GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - o. **[GE Lighting; a Savant Company]**
 - p. **[H.E. Williams]**
 - q. **[Howard Lighting Products]**
 - r. **[Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - s. **[Kim Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - t. **[Lighting Services, Inc.]**
 - u. **[Lightolier; brand of Signify North America Corp.]**
 - v. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - w. **[LMPG Inc.]**
 - x. **[Luraline Lighting]**
 - y. **[OSRAM SYLVANIA]**
 - z. **[Philips; Signify North America; Signify Holding]**
 - aa. **[Pure Lighting Manufacturing Ltd.]**
 - bb. **[PureEdge Lighting]**
 - cc. **[RAB Lighting]**
 - dd. **[Selux Corporation]**
 - ee. **[Specialty Lighting Industries, Inc.]**
 - ff. **[Visa Lighting]**
 - gg. **[West Durable Lighting]**
 - hh. **[Zumtobel Lighting, Inc.; Zumtobel Group]**
 - ii. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Albeo; brand of GE Current, a Daintree company; American Industrial Partners**

- (AIP)]
 - b. [Alera Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - c. [Amerlux]
 - d. [Architectural Area Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - e. [Atlas Lighting Products]
 - f. [Columbia Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - g. [Cooper Lighting Solutions; Signify North America Corp.]
 - h. [Deco Lighting]
 - i. [Digital Lumens]
 - j. [E-conolight]
 - k. [Edison Price Lighting]
 - l. [Elite Lighting Corporation]
 - m. [Focal Point; Legrand North America, LLC]
 - n. [GE Current, a Daintree company; American Industrial Partners (AIP)]
 - o. [GE Lighting; a Savant Company]
 - p. [H.E. Williams]
 - q. [Howard Lighting Products]
 - r. [Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - s. [Kim Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - t. [Lighting Services, Inc.]
 - u. [Lightolier; brand of Signify North America Corp.]
 - v. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
 - w. [LMPG Inc.]
 - x. [Luraline Lighting]
 - y. [OSRAM SYLVANIA]
 - z. [Philips; Signify North America; Signify Holding]
 - aa. [Pure Lighting Manufacturing Ltd.]
 - bb. [PureEdge Lighting]
 - cc. [RAB Lighting]
 - dd. [Selux Corporation]
 - ee. [Specialty Lighting Industries, Inc.]
 - ff. [Visa Lighting]
 - gg. [West Durable Lighting]
 - hh. [Zumtobel Lighting, Inc.; Zumtobel Group]
 - ii. <Insert manufacturer's name>
3. Source Limitations: [Obtain products for this luminaire type from single manufacturer][Bin LEDs for this luminaire type within three-step MacAdam Ellipse to ensure consistent chromaticity for all luminaires of this type].
4. Listing Criteria:
- a. Incandescent Luminaires: UL CCN IEZR; including UL 1598.
 - b. LED Luminaires: UL CCN IFAM; including UL 1598.
 - c. Outdoor Canopy Luminaires: UL CCN IFAW; including UL 1598.
 - d. Marked in accordance with UL CCN HYXT, including UL 1598, for compatible power supply, installation location, and environmental conditions.
5. Luminaire Description: <Insert description of desired shape and dimensional limitations>.
6. Standard Features:
- a. Openings: Doors, frames, and access panels must operate smoothly, not leak light under operating conditions, and permit relamping without use of tools or parts falling from

- enclosure.
- b. Nominal Operating Voltage: [120 V(ac)][240 V(ac)][277 V(ac)][480 V(ac)][120/60 V(ac)][12 V(dc)][24 V(dc)].
 - c. Nominal Luminaire Operating Power Rating: [Less than 20 W][20 to 60 W][70 to 150 W][150 to 300 W][Greater than 300 W]<Insert basis-of-design product's rated wattage>.
 - d. CRI: [80+][90+].
 - e. Ballast or Driver Location: [Internal][Remote][Self-ballasted lamp].
 - f. Materials:
 - 1) Enclosure: [ASTM B209/B209M extruded-aluminum][ASTM A36/A36M carbon structural steel][ASTM A568/A568M sheet steel][ASTM A240/A240M manufacturer's standard stainless steel][ASTM A653/A653M galvanized-steel] housing and heat sink; free of sharp edges and burrs.
 - 2) Enclosure Ingress Protection Rating: [UL 50E Type 1 or IEC 60529 IP20][UL 50E Type 3R or IEC 60529 IP24][UL 50E Type 4X or IEC 60529 IP65][UL 50E Type 12 or IEC 60529 IP54].
 - 3) Lenses, Diffusers, and Globes:
 - a) [Fixed][Adjustable] lens.
 - b) [Spot][Medium][Wide] light distribution.
 - c) [Tempered Fresnel annealed crystal glass][Prismatic annealed crystal glass][Diffuse annealed crystal glass][Clear annealed crystal glass][Prismatic acrylic][Clear, heat- and UV-stabilized virgin acrylic plastic]<Insert material>.
 - d) Lens Thickness: Not less than **0.125 inch (3 mm)** unless otherwise indicated.
 - e) Distribution: [Type I][Type II][Type III][Type IV][Type V].
 - 4) Visible variations in metal finishes[**outside range of approved Samples**] are unacceptable in adjoining components.
 - g. Incandescent Luminaires (UL CCN IEZR):
 - 1) Lamp Base Size: [Candelabra (E12)][Intermediate (E17)][Medium (E26 or E27)][Mogul (E39)].
 - 2) Lamp Shape and Optics: [Arbitrary Spherical (A)][Bulged (B)][Bulged Reflector (BR)][Candelabra (C)][Candelabra Angular (CA)][Flambeau (F)][Globe (G)][Prismatic Aluminized Reflector (PAR)][Pear Shaped (PS)][Specialty (S)][Reflector (R)][Tube (T)].
 - h. LED Luminaires (UL CCN IFAM):
 - 1) Output Intensity: Not less than [250 lm][575 lm][750 lm][1000 lm][1500 lm][2000 lm][3000 lm][5000 lm][10 000 lm]<Insert lumens>.
 - 2) Efficacy: Not less than [75 lm/W][80 lm/W][85 lm/W]<Insert lm/W>.
 - 3) Rated Life: [35 000][50 000]<Insert number> hours to L70.
 - 4) CCT: [2000 K][2700-2200 K (flame)][Three-step selectable 2700-2500-2200 K][2700 K][3000 K][3500 K][4000 K][5000 K][6500 K][Five-step selectable 3000-6500 K][Three-step selectable 3000-4000-5000 K]<Insert kelvins>.
7. Sustainable Design Features:
- a. Mercury Content: For fluorescent, mercury vapor, metal halide, high-pressure-sodium, neon, and argon lamps, submit data indicating mercury content and lamp life.
 - b. Energy Efficiency of LED Luminaires: Luminaire is certified by ENERGY STAR[and

**Design Lights Consortium].**

- c. Backlight, Uplight, and Glare (BUG) Ratings: Exterior luminaire complies with IES LP-11-recommended BUG ratings at luminaire's intended location.
 - d. IDA/IES Five Principles Ready:
 - 1) Exterior luminaire is adjustable to illuminate only to extent necessary for its intended purpose.
 - 2) Exterior luminaire is aimable.
 - 3) Exterior luminaire is dimmable.
 - 4) Exterior luminaire is controllable to turn on only when needed.
 - 5) Exterior luminaire has warm color temperature.
 - e. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - f. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - g. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - h. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - i. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
8. Other Available Features Required by the Project:
- a. Mounting Hardware: **[Ceiling-mounted][Pendant-mounted][Wall-mounted][Building-mounted][Pole-mounted]<Insert desired mounting hardware>; with [integral mounting provisions][extruded-aluminum][stainless steel]<Insert material>[rectangular arm,][round arm,][11 inch (280 mm) in length][13 inch (330 mm) in length].**
 - b. Mounting Height: **<Insert height of luminaire from finished grade or floor>.**
 - c. Bollard:
 - 1) Shape: **[Round][Square][Hexagonal][Fluted]<Insert shape or feature>.**
 - 2) Height from Finished Grade: **[24 inch (610 mm)][30 inch (762 mm)][36 inch (900 mm)]<Insert value>.**
 - 3) Overall Height: **[30 inch (762 mm)][36 inch (900 mm)]<Insert value>.**
 - 4) Diameter: **[6 inch (150 mm)]<Insert value>.**
 - 5) Bollard Mounting: **[Three-point cast-aluminum base]<Insert mounting provisions>.**
 - d. Decorative Post Top: **[Arm mounted][Tenon mounted][Ring mounted].**
 - e. Roadway Pole: **[Arm mounted][Tenon mounted][Ring mounted].**
 - f. Finishes:
 - 1) Enclosure: **[Clear]<Insert color>[anodized][powder-coat][painted] finish.**
 - 2) Reflector: **[Aluminum]<Insert material finish>.**
 - 3) Reflecting surfaces must have minimum reflectance as follows, unless otherwise indicated:
 - a) White Surfaces: 85 percent.
 - b) Specular Surfaces: 83 percent.
 - c) Diffusing Specular Surfaces: 75 percent.

- g. Factory-Applied Finish for Aluminum Luminaires: Comply with NAAMM/NOMMA AMP 500 for recommendations for applying and designating finishes.
 - 1) Finish designations prefixed by AA comply with system established by Aluminum Association for designating aluminum finishes.
 - 2) Natural Satin Finish: Provide fine, directional, medium satin polish (AA-M32); buff complying with AA-M20 requirements; and seal aluminum surfaces with clear, hard-coat wax.
 - 3) Class I, Clear-Anodic Finish: AA-M32C22A41, complying with AAMA 611.
 - a) Mechanical Finish: Medium satin.
 - b) Chemical Finish: Etched, medium matte.
 - c) Anodic Coating: Architectural Class I, clear coating 0.018 mm or thicker.
 - 4) Class I, Color-Anodic Finish: AA-M32C22A42/A44, complying with AAMA 611.
 - a) Mechanical Finish: Medium satin.
 - b) Chemical Finish: Etched, medium matte.
 - c) Anodic Coating: Architectural Class I, integrally colored or electrolytically deposited color coating 0.018 mm or thicker).
 - 5) Color: **[Light bronze][Medium bronze][Dark bronze][Black]<Insert color>**.
- h. Factory-Applied Finish for Steel Luminaires: Comply with NAAMM/NOMMA AMP 500 for recommendations for applying and designating finishes.
 - 1) Surface Preparation: Clean surfaces to comply with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair paint bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, complying with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
 - 2) Exterior Surfaces: Manufacturer's standard finish consisting of one or more coats of primer and two finish coats of high-gloss, high-build polyurethane enamel.
 - 3) Color: **[As selected from manufacturer's standard catalog of colors][As selected by Architect from manufacturer's full range][Match color sample provided by Architect]**.
- i. Visible variations in metal finishes **[outside range of approved Samples]** are unacceptable in adjoining components.
- j. Dimmable from 100 percent to zero percent of maximum light output.
- k. EMI Filters: Factory installed to suppress conducted EMI in accordance with MIL-STD-461E. Fabricate luminaires with one filter on each ballast or driver requiring filter.
- l. Stainless steel latches.
- m. Integral pressure equalizer.
- n. Photoelectric Switch: Factory-mounted integral to luminaire; listed and labeled in accordance with UL CCN WJFX, including UL 773, or in accordance with UL CCN WJCT, including UL 773A.
 - 1) Contact Relays: Factory mounted, single throw, designed to fail in on position, and factory set to turn light unit on at **1.5 to 3 fc (15 to 30 lx)** and off at **4.5 to 10 fc (45 to 100 lx)** with 15 s minimum time delay. **[Relay must have directional lens in front of photocell to prevent artificial light sources from causing false turn-off.]**
 - a) Relay with locking-type receptacle must comply with NEMA C136.10.
 - b) Adjustable window slide for adjusting on-off set points.

**9. Installation Markings:**

- a. Relamping Labels: Include recommended lamp type, diameter, shape, size, wattage, and coating on factory-applied label that is visible when luminaire is open for relamping.
- b. All Luminaires (UL CCN HYXT):
 - 1) "DRY LOCATIONS ONLY."
 - 2) "SUITABLE FOR DAMP LOCATIONS."
 - 3) "SUITABLE FOR WET LOCATIONS."
 - 4) "SUITABLE FOR MOUNTING WITHIN 1.2 M (4 FT) OF THE GROUND" or "SUITABLE FOR FLOOR PROXIMITY INSTALLATION."
 - 5) "SUITABLE FOR GROUND-MOUNTED RECESSED."
 - 6) "LIMIT RANGE OF ADJUSTMENT TO <Insert instruction>."
 - 7) "COVERED CEILING MOUNT ONLY."
 - 8) "WALL MOUNT ONLY"
 - 9) "FOR CEILING MOUNTING ONLY."
 - 10) Marked with mounting orientation, such as "THIS END UP."
 - 11) "SUITABLE FOR AIR-HANDLING USE."
 - 12) "VENTILATING OR COOLING AIR ONLY."
 - 13) "ONLY FOR USE IN CEILING PLENUM OF NONCOMBUSTIBLE CONSTRUCTION OR WITH AIR-HANDLING PARTS THAT COVER VENT OPENINGS."
 - 14) "INSTALL ONLY IN ENVIRONMENTAL AIR-HANDLING SPACES WHERE A COMPLETE METAL ENCLOSED WIRING SYSTEM IS PROVIDED."
 - 15) "MIN [75□][90□][150□][200□][250□] SUPPLY CONDUCTORS."
 - 16) "NOT FOR USE IN DWELLING."
 - 17) "SUITABLE FOR USE AS RACEWAY."
 - 18) "60 Hz" or "AC ONLY."
 - 19) Marked to identify voltage supply or type of branch circuit or both.
- c. Incandescent Luminaires (UL CCN IEZR):
 - 1) "SUITABLE FOR OPERATION IN AMBIENTS NOT EXCEEDING <Insert ambient temperature>□."
 - 2) "PUSH CONDUCTORS INTO JUNCTION BOX."
 - 3) "SUITABLE FOR UNDER-CABINET MOUNT."
 - 4) "SUITABLE FOR CONTINUOUS ROW MOUNTING."
 - 5) "THIS LUMINAIRE MUST BE MOUNTED OR SUPPORTED INDEPENDENTLY OF AN OUTLET BOX."
- d. LED Luminaires (UL CCN IFAM):
 - 1) "SUITABLE FOR OPERATION IN AMBIENTS NOT EXCEEDING <Insert ambient temperature>□."
 - 2) "PUSH CONDUCTORS INTO JUNCTION BOX."
 - 3) "WALL MOUNT ONLY."
 - 4) "NONCOMBUSTIBLE SURFACE ONLY."
 - 5) "SUITABLE FOR UNDER-CABINET MOUNT."
 - 6) "SUITABLE FOR CONTINUOUS ROW MOUNTING."
 - 7) "THIS LUMINAIRE MUST BE MOUNTED OR SUPPORTED INDEPENDENTLY OF AN OUTLET BOX."
- e. Outdoor Canopy Luminaires (UL CCN IFAW):
 - 1) "CANOPY LUMINAIRE - NOT THERMALLY PROTECTED."
 - 2) "FOR COVERED CEILING MOUNT ONLY."

3) "OPEN CEILING MOUNT ONLY."

10. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:

- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational after seismic events**]."
- b. Component Importance Factor (Ip): **[1.0][1.5]**.
- c. Component Amplification Factor (ap): **[1.0][2.5]<Insert value>**.
- d. Component Response Modification Factor (Rp): **[1.5][2.5]<Insert value>**.
- e. Component Overstrength Factor (Qo): **[1.5][2.5]<Insert value>**.

B. Recessed Luminaire :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. **[Albeo; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
- b. **[Alera Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
- c. **[Amerlux]**
- d. **[Axis Lighting, Inc.]**
- e. **[Columbia Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
- f. **[Cooper Lighting Solutions; Signify North America Corp.]**
- g. **[Digital Lumens]**
- h. **[Edison Price Lighting]**
- i. **[Elite Lighting Corporation]**
- j. **[Focal Point; Legrand North America, LLC]**
- k. **[GE Current, a Daintree company; American Industrial Partners (AIP)]**
- l. **[GE Lighting; a Savant Company]**
- m. **[Lighting Services, Inc.]**
- n. **[Lightolier; brand of Signify North America Corp.]**
- o. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
- p. **[LMPG Inc.]**
- q. **[OSRAM SYLVANIA]**
- r. **[PureEdge Lighting]**
- s. **[RAB Lighting]**
- t. **[Selux Corporation]**
- u. **[Specialty Lighting Industries, Inc.]**
- v. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

- a. **[Albeo; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
- b. **[Alera Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
- c. **[Amerlux]**

- d. [Axis Lighting, Inc.]
 - e. [Columbia Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - f. [Cooper Lighting Solutions; Signify North America Corp.]
 - g. [Digital Lumens]
 - h. [Edison Price Lighting]
 - i. [Elite Lighting Corporation]
 - j. [Focal Point; Legrand North America, LLC]
 - k. [GE Current, a Daintree company; American Industrial Partners (AIP)]
 - l. [GE Lighting; a Savant Company]
 - m. [Lighting Services, Inc.]
 - n. [Lightolier; brand of Signify North America Corp.]
 - o. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
 - p. [LMPG Inc.]
 - q. [OSRAM SYLVANIA]
 - r. [PureEdge Lighting]
 - s. [RAB Lighting]
 - t. [Selux Corporation]
 - u. [Specialty Lighting Industries, Inc.]
 - v. <Insert manufacturer's name>
3. Source Limitations: [Obtain products for this luminaire type from single manufacturer][Bin LEDs for this luminaire type within three-step MacAdam Ellipse to ensure consistent chromaticity for all luminaires of this type].
4. Listing Criteria:
- a. Incandescent Luminaires: UL CCN IEZX; including UL 1598[.], and **"Chicago Electrical Code."**
 - b. LED Luminaires: UL CCN IFAO; including UL 1598[, and **"Chicago Electrical Code."**
 - c. Marked in accordance with UL CCN HYXT, including UL 1598, for compatible power supply, installation location, and environmental conditions.
5. Luminaire Description: <Insert description of desired shape and dimensional limitations>.
6. Standard Features:
- a. Ceiling Compatibility: NEMA LE 4.
 - b. Openings: Doors, frames, and access panels must operate smoothly, not leak light under operating conditions, and permit relamping without use of tools or parts falling from enclosure.
 - c. Nominal Operating Voltage: [120 V(ac)][240 V(ac)][277 V(ac)][12 V(dc)][24 V(dc)].
 - d. Nominal Luminaire Operating Power Rating: [Less than 20 W][20 to 60 W]<Insert basis-of-design product's rated wattage>.
 - e. CRI: [80+][90+].
 - f. Ballast or Driver Location: [Internal][Remote][Self-ballasted lamp].
 - g. Materials:
 - 1) Enclosure: [ASTM B209/B209M extruded-aluminum][ASTM A36/A36M carbon structural steel][ASTM A568/A568M sheet steel][ASTM A240/A240M manufacturer's standard stainless steel][ASTM A653/A653M galvanized-steel] housing and heat sink; free of sharp edges and burrs.
 - 2) Enclosure Ingress Protection Rating: [UL 50E Type 1 or IEC 60529 IP20][UL 50E Type 3R or IEC 60529 IP24][UL 50E Type 4X or IEC 60529 IP65][UL 50E Type 12 or IEC 60529 IP54].
 - 3) Lenses, Diffusers, and Globes:
 - a) [Fixed][Adjustable] lens.

- b) **[Spot][Medium][Wide]** light distribution.
 - c) **[Tempered Fresnel annealed crystal glass][Prismatic annealed crystal glass][Diffuse annealed crystal glass][Clear annealed crystal glass][Prismatic acrylic][Clear, heat- and UV-stabilized virgin acrylic plastic]<Insert material>**.
 - d) Lens Thickness: Not less than **0.125 inch (3 mm)** unless otherwise indicated.
- 4) Visible variations in metal finishes **[outside range of approved Samples]** are unacceptable in adjoining components.
- h. Incandescent Luminaires (UL CCN IEZX):
 - 1) Lamp Base Size: **[Candelabra (E12)][Intermediate (E17)][Medium (E26 or E27)][Mogul (E39)]**.
 - 2) Lamp Shape and Optics: **[Arbitrary Spherical (A)][Bulged (B)][Bulged Reflector (BR)][Candelabra (C)][Candelabra Angular (CA)][Flambeau (F)][Globe (G)][Prismatic Aluminized Reflector (PAR)][Pear Shaped (PS)][Specialty (S)][Reflector (R)][Tube (T)]**.
- i. LED Luminaires (UL CCN IFAO):
 - 1) Output Intensity: Not less than **[250 lm][575 lm][750 lm][1000 lm][1500 lm][2000 lm][3000 lm][5000 lm][10 000 lm]<Insert lumens>**.
 - 2) Efficacy: Not less than **[75 lm/W][80 lm/W][85 lm/W]<Insert lm/W>**.
 - 3) Rated Life: **[35 000][50 000]<Insert number>** hours to L70.
 - 4) CCT: **[2000 K][2700-2200 K (flame)][Three-step selectable 2700-2500-2200 K][2700 K][3000 K][3500 K][4000 K][5000 K][6500 K][Five-step selectable 3000-6500 K][Three-step selectable 3000-4000-5000 K]<Insert kelvins>**.
- 7. Sustainable Design Features:
 - a. Mercury Content: For fluorescent, mercury vapor, metal halide, high-pressure-sodium, neon, and argon lamps, submit data indicating mercury content and lamp life.
 - b. Energy Efficiency of LED Luminaires: Luminaire is certified by ENERGY STAR **[and Design Lights Consortium]**.
 - c. Backlight, Uplight, and Glare (BUG) Ratings: Exterior luminaire complies with IES LP-11-recommended BUG ratings at luminaire's intended location.
 - d. IDA/IES Five Principles Ready:
 - 1) Exterior luminaire is adjustable to illuminate only to extent necessary for its intended purpose.
 - 2) Exterior luminaire is aimable.
 - 3) Exterior luminaire is dimmable.
 - 4) Exterior luminaire is controllable to turn on only when needed.
 - 5) Exterior luminaire has warm color temperature.
 - e. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - f. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - g. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - h. Third-Party Certification: Third-party certification, in accordance with multiple attribute

standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

- i. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

8. Other Available Features Required by the Project:

- a. Mounting Hardware: **[Ceiling-mounted][Wall-mounted]<Insert desired mounting hardware>**; include universal mounting bracket and integral junction box with conduit fittings.
- b. Finishes:
 - 1) Enclosure: **[Clear]<Insert color>[anodized][powder-coat][painted]** finish.
 - 2) Reflector: **[Aluminum]<Insert material finish>**.
 - 3) Visible variations in metal finishes **[outside range of approved Samples]** are unacceptable in adjoining components.
- c. Dimmable from 100 percent to zero percent of maximum light output.
- d. EMI Filters: Factory installed to suppress conducted EMI in accordance with MIL-STD-461E. Fabricate luminaires with one filter on each ballast or driver requiring filter.
- e. Stainless steel latches.
- f. Integral pressure equalizer.

9. Installation Markings:

- a. Relamping Labels: Include recommended lamp type, diameter, shape, size, wattage, and coating on factory-applied label that is visible when luminaire is open for relamping.
- b. All Luminaires (UL CEN HYXT):
 - 1) "DRY LOCATIONS ONLY."
 - 2) "SUITABLE FOR DAMP LOCATIONS."
 - 3) "SUITABLE FOR WET LOCATIONS."
 - 4) "SUITABLE FOR MOUNTING WITHIN 1.2 M (4 FT) OF THE GROUND" or "SUITABLE FOR FLOOR PROXIMITY INSTALLATION."
 - 5) "SUITABLE FOR GROUND-MOUNTED RECESSED."
 - 6) "LIMIT RANGE OF ADJUSTMENT TO **<Insert instruction>**."
 - 7) "COVERED CEILING MOUNT ONLY."
 - 8) "WALL MOUNT ONLY"
 - 9) "FOR CEILING MOUNTING ONLY."
 - 10) Marked with mounting orientation, such as "THIS END UP."
 - 11) "SUITABLE FOR AIR-HANDLING USE."
 - 12) "VENTILATING OR COOLING AIR ONLY."
 - 13) "ONLY FOR USE IN CEILING PLENUM OF NONCOMBUSTIBLE CONSTRUCTION OR WITH AIR-HANDLING PARTS THAT COVER VENT OPENINGS."
 - 14) "INSTALL ONLY IN ENVIRONMENTAL AIR-HANDLING SPACES WHERE A COMPLETE METAL ENCLOSED WIRING SYSTEM IS PROVIDED."
 - 15) "MIN **[75□][90□][150□][200□][250□]** SUPPLY CONDUCTORS."
 - 16) "NOT FOR USE IN DWELLING."
 - 17) "SUITABLE FOR USE AS RACEWAY."
 - 18) "60 Hz" or "AC ONLY."
 - 19) Marked to identify voltage supply or type of branch circuit, or both.
- c. Incandescent Luminaires (UL CEN IEZX):
 - 1) "TYPE IC LUMINAIRE."

- 2) "TYPE NON-IC LUMINAIRE."
 - 3) "INHERENTLY PROTECTED LUMINAIRE."
 - 4) "INSTALL IN BUILDINGS OF FIRE-RESISTANT CONSTRUCTION."
 - 5) "INSTALL WITH MINIMUM SPACINGS BETWEEN A) CENTER-TO-CENTER OF ADJACENT LUMINAIRES: <Insert distance> INCHES; B) TOP OF LUMINAIRE AND AN OVERHEAD BUILDING MEMBER: <Insert distance> INCHES; AND C) LUMINAIRE CENTER-TO-SIDE OF BUILDING MEMBER: <Insert distance> INCHES."
 - 6) "FOR USE IN CONCRETE ONLY."
 - 7) "SUITABLE FOR USE IN POURED CONCRETE."
 - 8) "SUITABLE FOR SUSPENDED CEILING."
 - 9) "SUITABLE FOR GROUND-MOUNTED RECESSED."
 - 10) "BLINKING LIGHT OF THIS THERMALLY PROTECTED LUMINAIRE MAY INDICATE OVERHEATING."
 - 11) "MAXIMUM OF <Insert size> AWG BRANCH CIRCUIT CONDUCTOR SUITABLE FOR <Insert temperature>° PERMITTED IN BOX."
 - 12) "FOR USE IN ONE- AND TWO-FAMILY DWELLINGS ONLY."
 - 13) "FOR USE IN NON-FIRE-RATED INSTALLATIONS."
 - 14) Provide correlating markings identifying matching housing, trim, rough-in section, and finishing section.
 - 15) "Chicago Electrical Code" or "CCEA."
- d. LED Luminaires (UL CCN IFAO):
- 1) "TYPE IC LUMINAIRE."
 - 2) "TYPE NON-IC LUMINAIRE."
 - 3) "INHERENTLY PROTECTED LUMINAIRE."
 - 4) "INSTALL IN BUILDINGS OF FIRE-RESISTANT CONSTRUCTION."
 - 5) "INSTALL WITH MINIMUM SPACINGS BETWEEN A) CENTER-TO-CENTER OF ADJACENT LUMINAIRES: <Insert distance> INCHES; B) TOP OF LUMINAIRE AND AN OVERHEAD BUILDING MEMBER: <Insert distance> INCHES; AND C) LUMINAIRE CENTER-TO-SIDE OF BUILDING MEMBER: <Insert distance> INCHES."
 - 6) "FOR USE IN CONCRETE ONLY."
 - 7) "SUITABLE FOR USE IN POURED CONCRETE."
 - 8) "SUITABLE FOR SUSPENDED CEILING."
 - 9) "SUITABLE FOR GROUND-MOUNTED RECESSED ONLY."
 - 10) "SUITABLE FOR GROUND-MOUNTED RECESSED."
 - 11) "BLINKING LIGHT OF THIS THERMALLY PROTECTED LUMINAIRE MAY INDICATE OVERHEATING."
 - 12) "MAXIMUM OF <Insert size> AWG BRANCH CIRCUIT CONDUCTOR SUITABLE FOR <Insert temperature>° PERMITTED IN BOX."
 - 13) "ACCESS ABOVE CEILING REQUIRED."
 - 14) "ACCESS BEHIND WALL REQUIRED."
 - 15) "FOR USE IN ONE- AND TWO-FAMILY DWELLINGS ONLY."
 - 16) "FOR USE IN NON-FIRE-RATED INSTALLATIONS."
 - 17) Provide correlating markings identifying matching housing, trim, rough-in section, and finishing section.
 - 18) "Chicago Electrical Code" or "CCEA."
10. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational**

after seismic events]."

- b. Component Importance Factor (I_p): [1.0][1.5].
- c. Component Amplification Factor (a_p): [1.0][2.5]<Insert value>.
- d. Component Response Modification Factor (R_p): [1.5][2.5]<Insert value>.
- e. Component Overstrength Factor (Ω_o): [1.5][2.5]<Insert value>.

C. UL IFFR - Track-Lighting Systems :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Alera Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - b. [Architectural Area Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - c. [Axis Lighting, Inc.]
 - d. [Columbia Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - e. [Cooper Lighting Solutions; Signify North America Corp.]
 - f. [Dual-Lite; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - g. [Edison Price Lighting]
 - h. [Elite Lighting Corporation]
 - i. [GE Lighting; a Savant Company]
 - j. [Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - k. [Kim Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - l. [Lighting Services, Inc.]
 - m. [Lightolier; brand of Signify North America Corp.]
 - n. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
 - o. [Zumtobel Lighting, Inc.; Zumtobel Group]
 - p. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Alera Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - b. [Architectural Area Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - c. [Axis Lighting, Inc.]
 - d. [Columbia Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - e. [Cooper Lighting Solutions; Signify North America Corp.]
 - f. [Dual-Lite; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - g. [Edison Price Lighting]
 - h. [Elite Lighting Corporation]
 - i. [GE Lighting; a Savant Company]
 - j. [Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - k. [Kim Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
 - l. [Lighting Services, Inc.]

- m. [Lightolier; brand of Signify North America Corp.]
 - n. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
 - o. [Zumtobel Lighting, Inc.; Zumtobel Group]
 - p. <Insert manufacturer's name>
3. Source Limitations: [Obtain products for this luminaire type from single manufacturer][Bin LEDs for this luminaire type within three-step MacAdam Ellipse to ensure consistent chromaticity for all luminaires of this type].
4. Listing Criteria:
- a. Track Lighting: UL CCN IFFR; including UL 1574.
 - b. Marked in accordance with UL CCN HYXT, including UL 1598, for compatible power supply, installation location, and environmental conditions.
5. Product Description: <Insert description of desired shape and dimensional limitations>.
6. Standard Features:
- a. Openings: Doors, frames, and access panels must operate smoothly, not leak light under operating conditions, and permit relamping without use of tools or parts falling from enclosure.
 - b. Nominal Luminaire Operating Voltage: [120 V(ac)][240 V(ac)][277 V(ac)][12 V(dc)][24 V(dc)].
 - c. Nominal Luminaire Operating Power Rating: [Less than 20 W][20 to 60 W][70 to 150 W][150 to 300 W][Greater than 300 W]<Insert basis-of-design product's rated wattage>.
 - d. CRI: [80+][90+].
 - e. Ballast or Driver Location: [Internal][Remote][Self-ballasted lamp].
 - f. Materials:
 - 1) Enclosure: [ASTM B209/B209M extruded-aluminum][ASTM A36/A36M carbon structural steel][ASTM A568/A568M sheet steel][ASTM A240/A240M manufacturer's standard stainless steel][ASTM A653/A653M galvanized-steel] housing and heat sink; free of sharp edges and burrs.
 - 2) Enclosure Ingress Protection Rating: UL 50E Type 1 or IEC 60529 IP20.
 - 3) Lenses, Diffusers, and Globes:
 - a) [Fixed][Adjustable] lens.
 - b) [Spot][Medium][Wide] light distribution.
 - c) [Tempered Fresnel annealed crystal glass][Prismatic annealed crystal glass][Diffuse annealed crystal glass][Clear annealed crystal glass][Prismatic acrylic][Clear, heat- and UV-stabilized virgin acrylic plastic]<Insert material>.
 - d) Lens Thickness: Not less than 0.125 inch (3 mm) unless otherwise indicated.
 - 4) Visible variations in metal finishes[outside range of approved Samples] are unacceptable in adjoining components.
 - g. Incandescent Lamp Track-Lighting Luminaire:
 - 1) Lamp Base Size: [Candelabra (E12)][Intermediate (E17)][Medium (E26 or E27)].
 - 2) Lamp Shape and Optics: [Arbitrary Spherical (A)][Bulged (B)][Bulged Reflector (BR)][Candelabra (C)][Candelabra Angular (CA)][Flambeau (F)][Globe (G)][Prismatic Aluminized Reflector (PAR)][Pear Shaped (PS)][Specialty (S)][Reflector (R)][Tube (T)].

- h. LED Track-Lighting Luminaires:
- 1) Output Intensity: Not less than [250 lm][575 lm][750 lm][1000 lm][1500 lm][2000 lm][3000 lm][5000 lm][10 000 lm]<Insert lumens>.
 - 2) Efficacy: Not less than [75 lm/W][80 lm/W][85 lm/W]<Insert lm/W>.
 - 3) Rated Life: [35 000][50 000]<Insert number> hours to L70.
 - 4) CCT: [2000 K][2700-2200 K (flame)][Three-step selectable 2700-2500-2200 K][2700 K][3000 K][3500 K][4000 K][5000 K][6500 K][Five-step selectable 3000-6500 K][Three-step selectable 3000-4000-5000 K]<Insert kelvins>.
7. Sustainable Design Features:
- a. Mercury Content: For fluorescent, mercury vapor, metal halide, high-pressure-sodium, neon, and argon lamps, submit data indicating mercury content and lamp life.
 - b. Energy Efficiency of LED Luminaires: Luminaire is certified by ENERGY STAR[**and Design Lights Consortium**].
 - c. Corporate Sustainability Report: Provide [third-party-verified]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - d. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - e. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - f. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - g. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
8. Other Available Features Required by the Project:
- a. Mounting Hardware: [Ceiling-mounted][Pendant-mounted][Wall-mounted]<Insert **desired mounting hardware**>; with integral mounting provisions.
 - b. Mounting Height: <Insert height of luminaire from finished grade or floor>.
 - c. Finishes:
 - 1) Enclosure: [Clear]<Insert color>[anodized][powder-coat][painted] finish.
 - 2) Reflector: [Aluminum]<Insert material finish>.
 - 3) Visible variations in metal finishes[**outside range of approved Samples**] are unacceptable in adjoining components.
 - d. Dimmable from 100 percent to zero percent of maximum light output.
9. Installation Markings:
- a. Relamping Labels: Include recommended lamp type, diameter, shape, size, wattage, and coating on factory-applied label that is visible when luminaire is open for relamping.
 - b. All Luminaires (UL CCN HYXT):
 - 1) "DRY LOCATIONS ONLY."
 - 2) "SUITABLE FOR DAMP LOCATIONS."
 - 3) "LIMIT RANGE OF ADJUSTMENT TO <Insert instruction>."
 - 4) "MIN [75□][90□][150□][200□][250□] SUPPLY CONDUCTORS."
 - 5) "60 Hz" or "AC ONLY."
 - 6) Marked to identify voltage supply or type of branch circuit, or both.

- c. Track Systems (UL CCN IFFR):
 - 1) "FOR CLIP MOUNTING ONLY."
 - 2) "DO NOT PENDANT MOUNT THIS TRACK SUCH AS BY STEMS OR WIRES."
 - 3) "FOR USE IN <Insert ceiling grid manufacturer and product>."

10. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:

- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational after seismic events**]."
- b. Component Importance Factor (Ip): [1.0][1.5].
- c. Component Amplification Factor (ap): [1.0][2.5]<Insert value>.
- d. Component Response Modification Factor (Rp): [1.5][2.5]<Insert value>.
- e. Component Overstrength Factor (Ωo): [1.5][2.5]<Insert value>.

D. UL FTBR or FTBV - Emergency Lighting and Power Equipment :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Amerlux]
- b. [Cooper Lighting Solutions; Signify North America Corp.]
- c. [Dual-Lite; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
- d. [Evenlite, Inc.]
- e. [GE Current, a Daintree company; American Industrial Partners (AIP)]
- f. [Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- g. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
- h. [Philips; Signify North America; Signify Holding]
- i. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Amerlux]
- b. [Cooper Lighting Solutions; Signify North America Corp.]
- c. [Dual-Lite; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]
- d. [Evenlite, Inc.]
- e. [GE Current, a Daintree company; American Industrial Partners (AIP)]
- f. [Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- g. [Lithonia Lighting; Acuity Brands Lighting, Inc.]
- h. [Philips; Signify North America; Signify Holding]
- i. <Insert manufacturer's name>

3. Source Limitations: Obtain products from single manufacturer.

4. Listing Criteria:

- a. Emergency Lighting and Power: UL CCN FTBR or UL CCN FTBV; including UL 924, NFPA 101, and ICC IBC.

- b. Marked in accordance with UL CCN HYXT, including UL 1598, for compatible power supply, installation location, and environmental conditions.
- 5. Product Description: **<Insert description of desired shape and dimensional limitations>**.
- 6. Standard Features:
 - a. Charger: Fully automatic, solid-state, constant-current type with sealed power transfer relay.
 - b. Status and Test Indication: Visible and accessible without opening luminaire or entering ceiling space.
 - 1) Indicator Light: LED indicates normal power on. Normal glow indicates trickle charge; bright glow indicates charging at end of discharge cycle.
 - 2) Test Push-Button: Push-to-test button in unit housing simulates loss of normal power and demonstrates unit operability.
 - c. Nominal Operating Voltage: **[120 V(ac)][277 V(ac)][6 V(dc)][9.6 V(dc)][12 V(dc)][24 V(dc)]**.
 - d. Mounting: **[Ceiling][Wall]** with universal junction box adaptor.
 - e. Enclosure: UV stable thermoplastic housing rated for **[damp][wet]** locations.
 - f. Flame Rating: UL 94 **[5VA][5VB][V-0][V-1][V-2][HB]**.
 - g. Light Source: **[One][Two][halogen lamp(s)][krypton lamp(s)][LED head(s)]**.
- 7. Sustainable Design Features:
 - a. Mercury Content: For fluorescent, mercury vapor, metal halide, high-pressure-sodium, neon, and argon lamps, submit data indicating mercury content and lamp life.
 - b. Energy Efficiency of LED Luminaires: Luminaire is certified by ENERGY STAR[®] **and Design Lights Consortium**.
 - c. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - d. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - e. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - f. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - g. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
- 8. Other Available Features Required by the Project:
 - a. Mounting Height: **<Insert height of luminaire from finished floor>**.
 - b. Internal-Type Emergency Power Unit: Self-contained, modular, battery-inverter unit, factory mounted within luminaire body¹ **and compatible with ballast or driver**.
 - 1) Emergency Connection: Operate **[one]<Insert number>** lamp(s) continuously at an output of **[1100]<Insert value>** lumens each upon loss of normal power. Connect unswitched circuit to battery-inverter unit and switched circuit to luminaire ballast or driver.
 - 2) Operation: Relay automatically turns lamp on when power-supply circuit voltage drops to 80 percent of nominal voltage or below. Lamp automatically disconnects from battery when voltage approaches deep-discharge level. When normal voltage is restored, relay disconnects lamps from battery, and battery is automatically

- recharged and floated on charger.
 - 3) Nightlight Connection: Operate lamp continuously at **[40]<Insert number>** percent of rated light output.
 - 4) Test Push-Button and Indicator Light: Visible and accessible without opening luminaire or entering ceiling space.
 - a) Push-Button: Push-to-test type, in unit housing, simulates loss of normal power and demonstrates unit operability.
 - b) Indicator Light: LED indicates normal power on. Normal glow indicates trickle charge; bright glow indicates charging at end of discharge cycle.
 - 5) Battery Type: **[Ni-Cd][Li-ion]**.
 - 6) Charger: Fully automatic, solid-state, constant-current type with sealed power transfer relay.
 - 7) Remote Test: Switch in handheld remote device aimed in direction of tested unit initiates coded infrared signal. Signal reception by factory-installed infrared receiver in tested unit triggers simulation of loss of its normal power supply, providing visual confirmation of either proper or failed emergency response.
 - 8) Integral Self-Test: Factory-installed electronic device automatically initiates code-required test of unit emergency operation at required intervals. Test failure is annunciated by an integral audible alarm and a flashing red LED.
- c. External-Type Emergency Power Unit: Self-contained, modular, battery-inverter unit, suitable for powering one or more lamps, remote mounted from luminaire.
- 1) Emergency Connection: Operate **[one]<Insert number>[incandescent][LED]** lamp continuously. Connect unswitched circuit to battery-inverter unit and switched circuit to luminaire **[ballast or driver]**.
 - 2) Operation: Relay automatically turns lamp on when power-supply circuit voltage drops to 80 percent of nominal voltage or below. Lamp automatically disconnects from battery when voltage approaches deep-discharge level. When normal voltage is restored, relay disconnects lamps from battery, and battery is automatically recharged and floated on charger.
 - 3) Nightlight Connection: Operate lamp in a remote luminaire continuously.
 - 4) Battery Type: **[Ni-Cd][Li-ion]**.
 - 5) Charger: Fully automatic, solid-state, constant-current type.
 - 6) Housing: Type 1 enclosure listed for installation inside, on top of, or remote from luminaire. Remote assembly must be located no less than half of distance recommended by **[ballast or driver][emergency power unit]** manufacturer, whichever is less.
 - 7) Test Push-Button: Push-to-test type, in unit housing, simulates loss of normal power and demonstrates unit operability.
 - 8) LED Indicator Light: Indicates normal power on. Normal glow indicates trickle charge; bright glow indicates charging at end of discharge cycle.
 - 9) Remote Test: Switch in handheld remote device aimed in direction of tested unit initiates coded infrared signal. Signal reception by factory-installed infrared receiver in tested unit triggers simulation of loss of its normal power supply, providing visual confirmation of either proper or failed emergency response.
 - 10) Integral Self-Test: Factory-installed electronic device automatically initiates code-required test of unit emergency operation at required intervals. Test failure is annunciated by an integral audible alarm and a flashing red LED.
9. Installation Markings:
- a. Relamping Labels: Include recommended lamp type, diameter, shape, size, wattage, and

- coating on factory-applied label that is visible when luminaire is open for relamping.
 - b. All Luminaires (UL CCN HYXT):
 - 1) "SUITABLE FOR DAMP LOCATIONS."
 - 2) "SUITABLE FOR WET LOCATIONS."
 - 3) "SUITABLE FOR MOUNTING WITHIN 1.2 M (4 FT) OF THE GROUND" or "SUITABLE FOR FLOOR PROXIMITY INSTALLATION."
 - 4) Marked to identify voltage supply or type of branch circuit or both.
 - c. Emergency Lighting and Power Equipment (UL CCN FTBR):
 - 1) "SUITABLE FOR OPERATION IN AMBIENTS NOT EXCEEDING **<Insert ambient temperature>□.**"
 - 2) "HAS CLASS 2 OUTPUTS."
10. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational after seismic events**]."
 - b. Component Importance Factor (Ip): **[1.0][1.5]**.
 - c. Component Amplification Factor (ap): **[1.0][2.5]<Insert value>**.
 - d. Component Response Modification Factor (Rp): **[1.5][2.5]<Insert value>**.
 - e. Component Overstrength Factor (Ωo): **[1.5][2.5]<Insert value>**.

E. UL FWBO - Exit Fixture :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Amerlux]**
 - b. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - c. **[Evenlite, Inc.]**
 - d. **[Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[Philips; Signify North America; Signify Holding]**
 - g. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Amerlux]**
 - b. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - c. **[Evenlite, Inc.]**
 - d. **[Hubbell Lighting; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **[Philips; Signify North America; Signify Holding]**
 - g. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Listing Criteria:

- a. Exit Fixtures: UL CCN FWBO; including UL 924, NFPA 101[, **NFPA 5000**], and ICC IBC.
 - b. Marked in accordance with UL CCN HYXT, including UL 1598, for compatible power supply, installation location, and environmental conditions.
5. Product Description: **<Insert description of desired shape and dimensional limitations>**.
6. Standard Features:
 - a. Nominal Operating Voltage: [**120 V(ac)**][**277 V(ac)**][**6 V(dc)**][**9.6 V(dc)**][**12 V(dc)**][**24 V(dc)**].
 - b. Light Source: LED; 50,000 hours minimum rated life.
 - c. Legend Color: [**Red**][**Green**].
 - d. Internal emergency power unit.
 - e. Battery Type: [**Ni-Cd**][**Li-ion**].
 - f. Master/Remote Sign Configurations:
 - 1) Master Unit: Comply with requirements above for self-powered exit signs, and provide additional capacity in [**LED power supply**][**battery**] for power connection to remote unit.
 - 2) Remote Unit: Comply with requirements above for self-powered exit signs, except omit power supply, battery, and test features. Arrange to receive full power requirements from master unit. Connect for testing concurrently with master unit as a unified system.
7. Sustainable Design Features:
 - a. Mercury Content: For fluorescent, mercury vapor, metal halide, high-pressure-sodium, neon, and argon lamps, submit data indicating mercury content and lamp life.
 - b. Energy Efficiency of LED Luminaires: Luminaire is certified by ENERGY STAR[**and Design Lights Consortium**].
 - c. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - d. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - e. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - f. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - g. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
8. Other Available Features Required by the Project:
 - a. Mounting Height: **<Insert height of luminaire from finished floor>**.
9. Installation Markings:
 - a. All Luminaires (UL CCN HYXT):
 - 1) "SUITABLE FOR DAMP LOCATIONS."
 - 2) "SUITABLE FOR WET LOCATIONS."
 - 3) "SUITABLE FOR MOUNTING WITHIN 1.2 M (4 FT) OF THE GROUND" or "SUITABLE FOR FLOOR PROXIMITY INSTALLATION."
 - 4) Marked to identify voltage supply or type of branch circuit or both.

- b. Exit Fixtures (UL CCN FWBO):
 - 1) "SUITABLE FOR OPERATION IN AMBIENTS NOT EXCEEDING **<Insert ambient temperature>**□."
- 10. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
 - a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational after seismic events**]."
 - b. Component Importance Factor (Ip): **[1.0][1.5]**.
 - c. Component Amplification Factor (ap): **[1.0][2.5]<Insert value>**.
 - d. Component Response Modification Factor (Rp): **[1.5][2.5]<Insert value>**.
 - e. Component Overstrength Factor (Ωo): **[1.5][2.5]<Insert value>**.
- F. UL FWBX - Self-Luminous or Photoluminescent Exit Sign :
 - 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - b. **[Dual-Lite; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - c. **[Evenlite, Inc.]**
 - d. **[Isolite Corporation]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Cooper Lighting Solutions; Signify North America Corp.]**
 - b. **[Dual-Lite; brand of GE Current, a Daintree company; American Industrial Partners (AIP)]**
 - c. **[Evenlite, Inc.]**
 - d. **[Isolite Corporation]**
 - e. **[Lithonia Lighting; Acuity Brands Lighting, Inc.]**
 - f. **<Insert manufacturer's name>**
 - 3. Source Limitations: Obtain products from single manufacturer.
 - 4. Listing Criteria: UL CCN FWBX; including UL 924, NFPA 101[, **NFPA 5000**], and ICC IBC.
 - 5. Exit Sign Description: **<Insert description of desired shape and dimensional limitations>**.
 - 6. Standard Features:
 - a. Powered by tritium gas, with universal bracket for flush-ceiling, wall, or end mounting. Signs must be guaranteed by manufacturer to maintain minimum brightness requirements in UL 924 for **[10][15][20]** years.
 - b. Use strontium oxide aluminate compound to store ambient light and release stored energy when light is removed. Include universal bracket for flush-ceiling, wall, or end mounting.
 - 7. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
8. Installation Markings:
- a. All Luminaires (UL CCN HYXT):
 - 1) "SUITABLE FOR DAMP LOCATIONS."
 - 2) "SUITABLE FOR WET LOCATIONS."
 - 3) "SUITABLE FOR MOUNTING WITHIN 1.2 M (4 FT) OF THE GROUND" or "SUITABLE FOR FLOOR PROXIMITY INSTALLATION."
 - b. Self-Luminous and Photoluminescent Exit Signs (UL CCN FWBX):
 - 1) "SUITABLE FOR OPERATION IN AMBIENTS NOT EXCEEDING **<Insert ambient temperature>°.**"
 - 2) Mark with minimum illumination level of necessary lighting type to achieve required visibility.
9. Seismic and Wind Performance: Installed product must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
- a. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[**and unit must be fully operational after seismic events**]."
 - b. Component Importance Factor (Ip): **[1.0][1.5]**.
 - c. Component Amplification Factor (ap): **[1.0][2.5]<Insert value>**.
 - d. Component Response Modification Factor (Rp): **[1.5][2.5]<Insert value>**.
 - e. Component Overstrength Factor (Qo): **[1.5][2.5]<Insert value>**.

2.3 LUMINAIRE FITTINGS

A. Luminaire Support Accessories:

1. Standard Features:
 - a. Sized and rated for luminaire weight.
 - b. Capable of maintaining luminaire position after cleaning and relamping.
 - c. Capable of supporting luminaire without causing deflection of ceiling or wall.
 - d. Capable of supporting horizontal force equal to 100 percent of luminaire weight and vertical force equal to 400 percent of luminaire weight.
2. Sustainable Design Features:

- a. Corporate Sustainability Report: Provide **[third-party-verified]** corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
 - b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
 - c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
 - d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
 - e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.
3. Other Available Features Required by the Project:
- a. Hook Hangers: Integrated assembly matched to luminaire, supply voltage, and equipment with threaded attachment, cord, and locking-type plug.
 - b. Wires: ASTM A641/A641M, Class 3, soft temper, zinc-coated steel, **[12 gage (2.68 mm)]<Insert size>** wire supports **[adjustable to][10 ft (3 m)]<Insert value>** in length.
 - c. Aircraft Cables: **[5/32 inch (4 mm)]<Insert value>** diameter aircraft cable supports **[adjustable to][10 ft (3 m)]<Insert value>** in length.
 - d. Single-Stem Hangers: **1/2 inch (13 mm)** nominal diameter steel tubing with swivel ball fittings and ceiling canopy. Finish same as luminaire.
 - e. Rod Hangers: **3/16 inch (5 mm)** nominal diameter, cadmium-plated, threaded steel rod.

2.4 MAINTENANCE MATERIAL ITEMS

- A. Spare Parts: Furnish to Owner spare parts, for repairing lighting equipment, that are packaged with protective covering for storage on-site and identified with labels describing contents. **[Include the following:]**
1. Diffusers and Lenses: **[One for every 100]<Insert quantity>** of each type and rating installed. Furnish at least one of each type.
 2. Globes and Guards: **[One for every 20]<Insert quantity>** of each type and rating installed. Furnish at least one of each type.
- B. Extra Stock Material: Furnish to Owner extra materials[, **from same production run,**] that match products installed and that are packaged with protective covering for storage and identified with labels describing contents. **[Include the following:]**
1. Incandescent Lamps: **[10 for every 100]<Insert quantity>** of each type and rating installed. Furnish at least one of each type.
 2. Luminaire-Mounted Emergency Battery Packs: **[One for every 20][One for every 50]<Insert quantity>** of each type and rating installed. Furnish at least one of each type.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

- B. Examine roughing-in for luminaire to verify actual locations of luminaire and electrical connections before luminaire installation.
- C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

- A. Temporary Lighting: If approved by Architect, specified luminaires for the Project may be installed for temporary lighting. Install and energize minimum quantity of luminaires necessary to meet needs of construction activities. When construction is sufficiently complete, remove, disassemble, clean, and relamp luminaires used for temporary lighting before reinstalling for the Project's delivery.

3.3 SELECTION OF LUMINAIRES

- A. Finished Spaces:
 - 1. Location: **<Insert list of product types>**.
- B. Unfinished Spaces:
 - 1. Location: **<Insert list of product types>**.

3.4 INSTALLATION OF LIGHTING

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 3. Work in Confined Spaces: NFPA 350.
 - 4. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
 - 5. Installation of Indoor Lighting Systems: NECA NEIS 500.
 - 6. Installation of Exterior Lighting Systems: NECA NEIS 501.
 - 7. Installation of Industrial Lighting Systems: NECA NEIS 502.
 - 8. Installation of Luminaires, Lampholders, and Lamps: Article 410 of NFPA 70.
 - 9. Installation of Extra-Low-Voltage Lighting: Article 411 of NFPA 70.
 - 10. Installation of Lighting for Sensitive Electronic Equipment: Article 647 of NFPA 70.
 - 11. Installation of Emergency Lighting and Exit Signs: ICC IBC, NFPA 101, and Parts IV and V in Article 700 of NFPA 70.
 - 12. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
 - 1. Install luminaires level, plumb, and square with finished floor or grade unless otherwise indicated.
 - 2. Install luminaires at height and aiming angle as indicated on the Drawings.
 - 3. Coordinate layout and installation of luminaires with other construction.
 - 4. Adjust luminaires that require field adjustment or aiming. **[Include adjustment of photoelectric device to prevent false operation of relay by artificial light sources, favoring a north orientation.]**

5. Exterior Bollard Luminaires:
 - a. Align units for optimum directional alignment of light distribution.
 - b. Install on concrete base with top **[4 inch (100 mm)]<Insert dimension>** above finished grade or surface at luminaire location. Cast conduit into base, and shape base to match shape of bollard base. Finish by troweling and rubbing smooth. Concrete materials, installation, and finishing are specified in Section 033000 "Cast-in-Place Concrete."
6. Exterior In-Ground Luminaires:
 - a. Install on concrete base with top **[4 inch (100 mm)]<Insert dimension>** above finished grade or surface at luminaire location. Cast conduit into base, and finish by troweling and rubbing smooth. Concrete materials, installation, and finishing are specified in Section 033000 "Cast-in-Place Concrete."
7. Exterior Corrosion Prevention:
 - a. Do not use aluminum in contact with earth or concrete. When in direct contact with dissimilar metals, protect aluminum with insulating fittings or treatment.
 - b. When embedding steel conduits in concrete, wrap conduit with **10 mil (0.254 mm)** thick, pipe-wrapping plastic tape applied with a 50 percent overlap.
8. Flush-Mounted Luminaire Support:
 - a. Secured to outlet box.
 - b. Attached to ceiling structural members at four points equally spaced around circumference of luminaire.
 - c. Trim ring flush with finished surface.
9. Wall-Mounted Luminaire Support: **[Attached to structural members in walls][Attached to a minimum 1/8 inch (3 mm) backing plate attached to wall structural members][Attached using through bolts and backing plates on either side of wall]<Insert means of attachment>**.
 - a. Do not attach luminaires directly to gypsum board.
10. Suspended Luminaire Support:
 - a. Ceiling Mount:
 - 1) Hook hangers.
 - 2) **[Two]<Insert number>** wires.
 - 3) **[Two][Four]<Insert number>** aircraft cables.
 - b. Pendants and Rods: Where longer than **48 inch (1220 mm)**, brace to limit swinging.
 - c. Stem-Mounted, Single-Unit Luminaires: Suspend with twin-stem hangers. Support with approved outlet box and accessories that hold stem and provide damping of luminaire oscillations. Support outlet box vertically to building structure using approved devices.
 - d. Continuous Rows of Luminaires: Provide tubing or stem for wiring at one point and **[tubing or rod][wire support]** for suspension for each unit length of luminaire chassis, including one at each end.
 - e. Do not use ceiling grid as support for pendant luminaires. Connect support wires or rods to building structure.
11. Ceiling-Grid-Mounted Luminaire Support:

- a. Install ceiling support system rods or wires[, **independent of the ceiling suspension devices,**] for each luminaire. Locate not more than **6 inch (150 mm)** from luminaire corners.
 - b. Support Clips: Fasten to luminaires and to ceiling grid members at or near each luminaire corner with clips that are UL listed for application.
 - c. Luminaires of Sizes Smaller than Ceiling Grid: Install as indicated on reflected ceiling plans or center in acoustical panel, and support luminaires independently with no fewer than two **3/4 inch (20 mm)** metal channels spanning and secured to ceiling tees.
 - d. Seismic Restraint: Install at least one independent support rod or wire from structure to tab on luminaire. Wire or rod must have breaking strength for luminaire weight with safety factor of 3.0.
12. Remote Mounting of Ballasts or Drivers: Do not exceed distance between ballast or driver and luminaire recommended by ballast or driver manufacturer.
 13. Emergency Power Units: Secure with approved fasteners in four or more locations, spaced near corners of unit.
 14. Install wiring connections for luminaires.
 15. Identification: Provide labels for luminaires and associated electrical equipment.
 - a. Identify field-installed conductors, interconnecting wiring, and components.
 - b. Provide warning signs.
 - c. Label each enclosure with engraved metal or laminated-plastic nameplate.
 16. **<Insert more stringent installation requirements that supplement or supersede listed standards and manufacturers' published instructions>.**

D. Interfaces with Other Work:

1. Coordinate installation of new products for **<Insert system or product family/category>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>.**
2. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>.**
 - a. **<Insert requirements for transition between this Section and related Work>.**

- E. Systems Integration: Integrate lighting control devices and equipment with electrical power connections for operation of luminaires as specified.

3.5 FIELD QUALITY CONTROL OF LIGHTING

A. Adminstrant for Electrical Power Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Administrant for Field Tests and Inspections of Lighting Installations:

1. **[Owner][Tenant]** will engage qualified lighting testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified lighting testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Acceptance Testing Preparation:

1. **<Insert requirements>**.

D. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

E. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. Operational Test: After installing luminaires, switches, and accessories, and after electrical circuitry has been energized, test units to confirm proper operation.
3. Test for Emergency Lighting: Interrupt power supply to demonstrate proper operation. Verify transfer from normal power to battery power and retransfer to normal.
4. Verify operation of photoelectric controls.
5. Exterior Illumination Tests:
 - a. Measure light intensities at night. Use photometers with calibration referenced to NIST standards.

F. Nonconforming Work:

1. Luminaire will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

G. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

H. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project's site.

3.6 SYSTEM STARTUP

A. Perform startup service.

1. Complete installation and startup checks in accordance with manufacturer's published instructions.
2. Burn-in lamps that require specific aging period to operate properly, prior to occupancy by Owner.
3. Charge **[emergency power units][and][batteries]** minimum of one hour and depress switch to conduct short-duration test.
4. Charge **[emergency power units][and][batteries]** minimum of 24 hours and conduct one-hour

- discharge test.
- 5. **<Insert startup steps if any>.**

B. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.

- 1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at the Project's site.

3.7 ADJUSTING

A. Luminaire Aiming Adjustments: When requested within **[12]<Insert number>** months of date of Substantial Completion, provide on-site assistance in adjusting aiming direction of luminaires to suit occupied conditions. Make up to **[two]<Insert number>** visits to the Project's site during other-than-normal hours for this purpose. Some of the Work may be required during hours of darkness.

- 1. During adjustment visits, inspect all luminaires. Replace lamps or luminaires that are defective.
- 2. Parts and supplies must be manufacturer's authorized replacement parts and supplies.
- 3. Adjust aim of luminaires in presence of Architect.

3.8 CLOSEOUT ACTIVITIES

A. Training:

- 1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain luminaires**[and photoelectric controls]**.
- 2. **[Provide video recordings of training sessions to Owner.][Allow Owner to record training sessions.]**

3.9 PROTECTION

A. After installation, protect lighting equipment from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

END OF SECTION 26 50 00 00

Task	Specification	Specification Description
26 52 00 00	26 50 00 00	Lighting

SECTION 26 55 68 00 - ATHLETIC FIELD LIGHTING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Athletic field luminaires and lamps.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural load design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** for preinstallation conference procedures.
5. Section 055000 "Metal Fabrications" specifies pipe bollards installed by this Section.
6. Section 260519 "Low-Voltage Electrical Power Conductors and Cables" specifies cables installed by this Section.
7. Section 260533.13 "Conduits for Electrical Systems" specifies raceways installed by this Section.
8. Section 260533.16 "Boxes and Covers for Electrical Systems" specifies boxes and covers installed by this Section.
9. Section 260553 "Identification for Electrical Systems" specifies identification products installed by this Section.
10. **[Section 260923 "Lighting Control Devices"]****[Section 260943.16 "Addressable Luminaire Lighting Controls"]****[Section 260943.23 "Relay-Based Lighting Controls"]****[and]****[Section 265561 "Theatrical Lighting"]** specifies lighting control equipment and cabling connections to luminaires installed by this Section.
11. Section 262716 "Electrical Cabinets and Enclosures" specifies enclosures installed by this Section.
12. Section 264313 "Surge Protective Devices for Low-Voltage Electrical Power Circuits" specifies surge protective devices installed by this Section.
13. Section 260546 "Poles for Electrical Systems" specifies poles installed by this Section.

1.2 DEFINITIONS

- A. ACN: Architecture for Control Networks.
- B. CCT: Correlated color temperature; a measure of the chromaticity (yellowness or blueness) of a white light source, expressed as the absolute temperature in kelvins of a blackbody radiator having similar chromaticity.
- C. CRI: Color rendering index; a unitless estimation of how accurately a white light source displays the colors of reflected surfaces.
- D. CV: Coefficient of variation.

- E. DMX512: Digital multiplex with 512 pieces of information.
- F. LLF: Light-loss factor.
- G. RGBA: Red, green, blue, and amber.
- H. RGBW: Red, green, blue, and white.
- I. SPD: Surge protective device.
- J. UG: Uniformity gradient.
- K. UGR: Unified glare rating.

1.3 DELEGATED DESIGN SERVICES

- A. Delegated Design Professionals:
 - 1. Engage qualified lighting design professional to design athletic field lighting equipment.
 - 2. Engage qualified electrical professional engineer to design power distribution for athletic field lighting equipment.
 - 3. Engage qualified structural professional engineer to design poles, hangers, and supports for athletic field lighting equipment.

1.4 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>**.
- B. Preinstallation Coordination Meeting(s): For athletic field lighting. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location> before <Insert construction activity>**.
 - 1. Attendees: Installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**][, and **Owner's Commissioning Authority**] of scheduled meeting dates.

1.5 ACTION SUBMITTALS

- A. Product Data: For each type of product.
 - 1. Arrange in order of luminaire designation.
 - 2. Complete ordering information for luminaire, lamps, and accessories.
 - 3. Data on features, accessories, and finishes.
 - 4. Physical description and dimensions of luminaires.
 - 5. Ballast, including UL listing and recognition, ANSI certification, and Energy Independence and Security Act of 2007 compliance.
 - 6. Lamps, including life, output (lumens, CCT, and CRI), and energy-efficiency data.
 - 7. Photometric data and adjustment factors based on laboratory tests by, or under supervision of, qualified luminaire photometric testing laboratory, for each lighting luminaire type. Adjustment factors must be for lamps, ballasts, and accessories identical to those indicated for the luminaire as applied in this Project.
 - 8. Photoelectric relays.

9. Means of attaching luminaires to supports and indication that attachment is suitable for components involved.
10. Include sample warranty language.
11. Product Certificates:
 - a. For each type of bilevel and dimmer-controlled luminaire ballast, signed by product manufacturer.
 - b. For support structures, including brackets, arms, appurtenances, bases, anchorages, and foundations, signed by product manufacturer.

B. Shop Drawings: Prepare and submit the following:

1. Drawings, Diagrams, and Supporting Documents for Nonstandard or Custom Luminaire:
 - a. Include plans, elevations, sections, and mounting and attachment details.
 - b. Details of luminaire assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
 - c. Diagrams for power, signal, and control wiring.
 - d. **<Insert additional requirements for drawing content or format>.**

C. Delegated Design Submittals: Include analysis data signed by delegated design professional(s) responsible for their preparation.

1. Drawings and specifications for construction of lighting system.
2. Manufacturer's determination of LLF used in design calculations.
3. Lighting system design calculations for the following:
 - a. Target illuminance.
 - b. Point calculations of horizontal and vertical illuminance, CV, and UG at minimum grid size and area.
 - c. Point calculations of horizontal and vertical illuminance in indicated areas of concern for spill light.
 - d. Calculations of source intensity of luminaires observed at eye level from indicated properties near the playing fields.
4. Luminaire layout and aiming diagrams.
5. Electrical system design calculations for the following:
 - a. Short-circuit current calculations for rating of panelboards.
 - b. Total connected and estimated peak-demand electrical load, in kilowatts, of lighting system.
 - c. Capacity of **[feeder][service]** required to supply lighting system.
6. Electrical wiring diagrams, including required conductors, cables, and wiring methods.
7. Electrical riser diagrams.
8. Structural analysis data and calculations used for the following:
 - a. Pole selection.
 - b. Luminaire mounting arrangement.

D. Field quality-control reports.

1.6 INFORMATIONAL SUBMITTALS

- A. Manufacturers' published instructions.

B. Field Reports:

1. Manufacturer's field reports for field quality-control support.
2. Manufacturer's field reports for system startup support.

1.7 CLOSEOUT SUBMITTALS

- A. Warranty documentation.
- B. Maintenance service agreement.

1.8 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare parts.
- B. Consumable items.

1.9 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures; conduct tests of complex equipment; analyze test and equipment data; plan a job; and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.
- C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.
 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.
- D. Electrical Professional Engineer: Professional engineer possessing active qualifications specified in Section 014000 "Quality Requirements," with expertise in electrical engineering, including electrical power system modeling and analysis of electrical safety in accordance with NFPA 70E.
- E. Structural Professional Engineer: Professional engineer possessing active qualifications specified in Section 014000 "Quality Requirements," with expertise in structural engineering, including design of seismic-load and wind-load controls, utility poles, equipment hangers and supports, and concrete foundations.
- F. Lighting Design Professional: Design professional possessing active qualifications in accordance with Section 014000 "Quality Requirements" and the following:
 1. Expertise in lighting design.
 2. Lighting Certified (LC) Professional by the National Council on Qualifications for the Lighting Professions (NCQLP).

- G. Exterior Athletic Lighting Installers: Installer possessing active qualifications specified in Section 014000 "Quality Requirements," and able to present unexpired certified Installer credentials issued by exterior athletic lighting manufacturer prior to starting installation.
- H. Outdoor Pole Testing and Inspecting Agency: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with documented training and experience in accordance with ASTM C1093 for foundation testing and inspections.
- I. Lighting Testing and Inspecting Agency: Entity possessing active qualifications specified in Section 014000 "Quality Requirements" with documented training and experience with testing and inspecting lighting installations in accordance with applicable IES standards.

1.10 DELIVERY, STORAGE, AND HANDLING

- A. Protect finishes of exposed surfaces by applying a strippable, temporary protective covering before shipping.

1.11 WARRANTY FOR ATHLETIC FIELD LIGHTING

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed athletic field lighting and associated electrical equipment perform in accordance with specified requirements and agrees to repair or replace components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Extended-Warranty Period: **[Two][Three][Four][20]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.
 - 2. Alignment Extended-Warranty Period: **[Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for labor, materials, and equipment.
 - a. Accuracy of alignment of luminaires must remain within specified illuminance uniformity ratios.
 - b. Realign luminaires that become misaligned during the warranty period.
 - c. Replace alignment products that fail within the warranty period.
 - d. Verify successful realignment of luminaires by retesting as specified in "Field Quality Control of Athletic Field Lighting" Article.
- B. Special Manufacturer Extended Warranty: Manufacturer warrants that athletic field lighting and associated electrical equipment perform in accordance with specified requirements and agrees to provide repair or replacement of components or products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.
 - 1. Luminaire Extended-Warranty Period: **[Five]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for materials **[that failed because of transient voltage surges]** only free on board **[origin][destination]**, freight prepaid.
 - 2. Lamps and Fuses Extended-Warranty Period: **[Two]<Insert number>** years from date of Substantial Completion; **[full][prorated]** coverage for materials only, free on board **[origin][destination]**, freight prepaid.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Description: **<Insert brief description of desired athletic field lighting system>.**
- B. Performance Criteria:
 - 1. Regulatory Requirements:
 - a. Components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - b. **<Insert requirements>.**
 - 2. General Characteristics:
 - a. Facility Type: **[Professional][College][Semiprofessional][Sports club][Amateur league][High school][Training facility][Elementary school][Recreational or social facility].**
 - b. Glare Control: Design illumination for each playing area to minimize direct glare in adjacent and nearby areas.
 - 1) Design source intensity of luminaires that may be observed at an elevation of **60 inch (1524 mm)** above finished grade from nearby properties to be less than **[12 000 cd][20 000 cd][30 000 cd]<Insert candela>** when so observed.
 - 2) Design source intensity of luminaires that may be observed at an elevation of **60 inch (1524 mm)** above finished grade from designated "spill-light critical" areas to be less than **[12 000 cd][20 000 cd][30 000 cd]<Insert candela>** when so observed.
 - c. Egress Lighting: In case of power failure, provide not less than **[1.0 fc (10.8 lx)]<Indicate value>** average illumination, within 30 seconds, measured at grade in spectator and spectator egress areas.
 - 1) Duration of emergency illumination must be not less than **[15 min]<Insert time>.**
 - 2) Momentary Power Interruptions: Provide emergency illumination immediately following restoration of power to the lighting circuits. Emergency illumination must automatically extinguish after **[15 min]<Insert time>.**
 - d. Lighting Control: Manual, low voltage, or digital; providing the following functions, integrated into a single control station, with multiple subcontrol stations as indicated:
 - 1) Control Station: Key-operated master switch, manual push-button controls, and system status indicator lights. **[Test switch of egress lighting system.]**
 - 2) Light Levels: Two levels of control - **[100/50 percent]<Insert two percentages>** of minimum target illumination.
 - 3) **<Insert Project-specific control requirements>.**
 - e. Electric Power Distribution Requirements:
 - 1) Electric Power: **[208 V][240 V][480 V];** three phase.

- a) Include roughing-in of service indicated for nonsports improvements on the Project site.
 - b) Balance load between phases. Install wiring to balance three phases at each support structure.
 - c) Include required overcurrent protective devices and individual lighting control for each sports field or venue.
 - d) Include indicated feeder capacity and panelboard provisions for future lighted sports field construction.
- 2) Maximum Total Load: **<Insert number> A.**
 - 3) Maximum Total Voltage Drop from Source to Load: **[5 percent]<Insert percentage>**, including voltage drops in branch circuit, subfeeder, and feeder.
3. Illumination Criteria: Calculate by computer-analyzed point method complying with IES RP-6 to optimize selection, location, and aiming of luminaires.
 - a. Minimum average target illuminance level for each lighted area for each sports venue and for the indicated class of play in accordance with IES RP-6.
 - b. CV and maximum-to-minimum uniformity ratios for each lighted area equal to or less than those listed in IES RP-6 for the indicated class of play.
 - c. UG levels within each lighted area equal to or less than those listed in IES RP-6 for the indicated speed of sport.
 - d. Minimum Average Target Illumination: **<Insert fc or lx>**.
 - e. CV: **<Insert value>**.
 - f. Maximum-to-Minimum Uniformity Ratio: **<Insert value>**.
 - g. UG Level: **<Insert value>**.
 - h. Grid Pattern Dimensions: For playing areas of each sport and areas of concern for spill-light control, correlate and reference calculated parameters to the grid areas. Each grid point represents the center of the grid area defined by the length and width of the grid spacing.
 - i. Spill-Light Control: Minimize spill light for each playing area on adjacent and nearby areas.
 - 1) Prevent light trespass on properties near the Project as defined by **<Insert name(s) of authorities having jurisdiction>**.
 - 2) For areas indicated on the Drawings as "spill-light critical," limit the level of illuminance directed into the area from any luminaire or group of luminaires, and measured **36 inch (914 mm)** above grade to the following:
 - a) Maximum Horizontal Illuminance: **[0.25 fc (2.7 lx)][0.5 fc (5.4 lx)][0.75 fc (8.1 lx)]**.
 - b) Maximum Vertical Illuminance from the Direction of the Greatest Contribution of Light: **[1.0 fc (10.8 lx)][2.0 fc (21.5 lx)][3.0 fc (32.3 lx)]**.
 - 3) Calculate the horizontal and vertical illuminance due to spill light for points spaced **[20 ft (6 m)]<Insert dimension>** apart in areas indicated on the Drawings as "spill-light critical," to ensure that design complies with the above limits.
 - j. Determine LLF in accordance with IES RP-6 and manufacturer's test data.
 - 1) Use LLF at **[100 percent]<Insert percentage>** of rated lamp life. LLF must be applied to initial illumination to ensure that target illumination is achieved at 100 percent of lamp life and must include consideration of field factor.
 - 2) LLF must not be higher than 70 percent and may be lower when determined by manufacturer after application of the ballast output and optical system output, in accordance with IES RP-6.

- k. Luminaire-Mounting Height: Comply with IES RP-6[, **with consideration for requirements to minimize spill light and glare**].
- l. Luminaire Placement: Luminaire clusters must be outside the glare zones defined by IES RP-6.
- m. Baseball Fields:
 - 1) IES RP-6, Classes of Play: **[Class I][Class II][Class III][Class IV]**.
 - 2) Speed of Sport: **[Fast][Moderate][Slow]**.
 - 3) Grid Pattern Dimensions: **30 by 30 ft (9 by 9 m)**.
- n. Softball Fields:
 - 1) IES RP-6, Classes of Play: **[Class I][Class II][Class III][Class IV]**.
 - 2) Speed of Sport: **[Fast][Moderate][Slow]**.
 - 3) Grid Pattern Dimensions: **20 by 20 ft (6 by 6 m)**.
- o. Football Fields:
 - 1) IES RP-6, Classes of Play: **[Class I][Class II][Class III][Class IV]**.
 - 2) Speed of Sport: **[Fast][Moderate][Slow]**.
 - 3) Grid Pattern Dimensions: **30 by 30 ft (9 by 9 m)**.
- p. Soccer Fields:
 - 1) IES RP-6, Classes of Play: **[Class I][Class II][Class III][Class IV]**.
 - 2) Speed of Sport: **[Fast][Moderate][Slow]**.
 - 3) Grid Pattern Dimensions: **30 by 30 ft (9 by 9 m)**.
- q. Outdoor Tennis Courts:
 - 1) IES RP-6, Classes of Play: **[Class I][Class II][Class III][Class IV]**.
 - 2) Speed of Sport: **[Fast][Moderate][Slow]**.
 - 3) Grid Pattern Dimensions: **10 by 10 ft (3 by 3 m)**.
- r. Insert Sport:
 - 1) IES RP-6, Classes of Play: **[Class I][Class II][Class III][Class IV]**.
 - 2) Speed of Sport: **[Fast][Moderate][Slow]**.
 - 3) Grid Pattern Dimensions: **<Insert dimensions>**.
- 4. Life-Cycle Cost Criteria:
 - a. Estimated life-cycle cost of lighting system for period of **<Insert number>** years based on the parameters below:
 - 1) Energy Cost: **<Insert dollars>**.
 - 2) Lamp Replacement Cost: **<Insert dollars>**.
 - 3) General Maintenance Cost: **<Insert dollars>**.
 - b. **<Insert life-cycle cost criteria>**.

**2.2 ATHLETIC FIELD LUMINAIRES AND LAMPS****A. UL IFAM - LED Surface-Mounted Athletic Field Luminaire :**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[CHM Lighting]**
 - b. **[Ephesus Sports Lighting; a brand of Cooper Lighting Solutions; Signify N.V.]**
 - c. **[Musco Lighting]**
 - d. **[Sportsbeams]**
 - e. **[Sportsliter Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[CHM Lighting]**
 - b. **[Ephesus Sports Lighting; a brand of Cooper Lighting Solutions; Signify N.V.]**
 - c. **[Musco Lighting]**
 - d. **[Sportsbeams]**
 - e. **[Sportsliter Solutions; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria:
 - a. LED Surface-Mounted Luminaires: UL CCN IFAM; including UL 1598.
 - b. LED Drivers: UL CCN FKSZ or UL CCN FKSZ2; including UL 8750.
5. Standard Features:
 - a. Doors, Frames, and Other Internal Access: Smooth operating, free from light leakage under operating conditions, and arranged to permit servicing without using tools. Arrange doors, frames, lenses, diffusers, and other pieces to prevent their accidental falling during servicing and when secured in operating position. Doors must be removable for cleaning or replacing lens. Designed to disconnect driver when door opens.
 - b. Finishes:
 - 1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
 - 2) Appearance of Finished Work: Noticeable variations in same piece are unacceptable. Variations in finishes of adjoining components are acceptable if they are within the range of approved Samples and can be and are assembled or installed to minimize contrast.
 - c. Exposed Hardware: Corrosion-resistant metal latches, fasteners, and hinges.
 - d. Markings: "Suitable for Wet Locations."
 - e. Luminaire Mounting: Bracket mounted.
 - f. Driver Mounting: **[Remote; grouped in cabinets][Bracket mounted][Integral to luminaire; field changeable].**
 - g. Driver Performance:

- 1) Nominal Input Voltage: [120 V][208 V][240 V][277 V][480 V], 60 Hz.
 - 2) Nominal Input Power: [80 W][100 W][150 W][300 W][500 W][1000 W][1200 W][1500 W]<Insert wattage>.
 - 3) Power Factor: Not less than [0.90]<Insert power factor requirement> lagging.
 - 4) Total Harmonic Distortion: Not greater than [16 percent][20 percent]<Insert percentage>.
- h. Beam Spread Pattern: [NEMA Type 1 (very narrow)][NEMA Type 2 (narrow)][NEMA Type 3 (medium narrow)][NEMA Type 4 (medium)][NEMA Type 5 (medium wide)][NEMA Type 6 (wide)][NEMA Type 7 (very wide)][Narrow spot (2 deg H by 2 deg V)][Narrow flood (4 deg H by 4 deg V)][Horizontal flood (5 deg H by 3 deg V)][Vertical flood (3 deg H by 5 deg V)][Medium flood (5 deg H by 5 deg V)][Wide flood (6 deg H by 6 deg V)]<Insert _ deg H by _ deg V beam angles>.
- i. Light Color: [White only][Tunable RGBW][Tunable RGBA]<Insert color requirement>[designed for 4K/HDTV broadcasting].
- 1) White Correlated Color Temperature: [2700 to 3000 K][4000 K][5000 K][5700 to 6000 K][3000/4000/5000 K selectable]<Insert CCT kelvins>.
 - 2) White Color Rendering Index: [70+][80+][90+]<Insert CRI>.
- j. Energy Efficiency: [Premium][DLC listed][and][ENERGY STAR listed].
6. Other Available Features Required by the Project:
- a. Spill-Light Control Devices: Internal louvers and external baffles furnished by manufacturer and designed for secure attachment to specific luminaire.
 - b. Dimming: [0-10 V dimmable]<Insert dimming requirement>.
 - c. Dimming Range (Light Output): [0-100 percent][10-100 percent or better][20-100 percent or better]<Insert dimming range requirement>.
 - d. Dim to off.
 - e. Surge Protection: Provide integral Type 2 SPDs; nonmodular, with digital indicator lights[and one set of dry contacts].
- 1) Maximum SPD Discharge Current Rating: [10 kA][20 kA]<Insert kA> per phase.
- f. Unified Glare Rating: [Less than 22][Less than 19]<Insert UGR requirement>.
 - g. Field-changeable lenses.
 - h. Luminaire Lighting Control Interface: [TIA-485 jack for ESTA E1.11 DMX512 cable][Termination box for ESTA E1.11 DMX512 cable][8P8C jack for ESTA E1.31 ACN Ethernet cable][DALI driver][Wireless] Open Lighting Alliance compliant interface.
 - i. Pre-terminated wiring pigtail.
 - j. 12 V secondary output power for external sensors, controls, or accessories.

2.3 MAINTENANCE MATERIAL ITEMS

- A. Spare Parts: Furnish to Owner spare parts, for repairing sports lighting, that are packaged with protective covering for storage on-site and identified with labels describing contents.[Include the following:]
1. Glass, Acrylic, and Plastic Lenses, Covers, and Other Optical Parts: [One percent]<Insert percentage> of each type and rating installed. Furnish at least one of each type.
 2. Ballasts: [One percent]<Insert percentage> of each type and rating installed. Furnish at least one of each type.
 3. Fuses: [10 percent]<Insert percentage> of each type and rating installed. Furnish at least one of

each type.

- B. Consumable Items: Furnish to Owner extra consumable items for storage on-site, identified with labels describing contents. [**Include the following:**]
 - 1. Lamps: [**10 percent**]**<Insert percentage>** of each type and rating installed. Furnish at least one of each type.

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.
- B. Examine roughing-in for luminaire electrical and communications conduit to verify actual locations of connections before pole or luminaire installation.
- C. Examine foundations for suitable conditions where luminaires will be installed.
- D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF ATHLETIC FIELD LIGHTING

- A. Comply with manufacturer's published instructions.
- B. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:
 - 1. Electrical Construction: ICC IBC, ICC IFB, NFPA 1, NFPA 70, and NECA NEIS 1.
 - 2. Electrical Safety: NFPA 70E.
 - 3. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
 - 4. Life Safety and Means of Egress Work: NFPA 101.
 - 5. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
 - 6. Luminaires and Supports: Article 410 of NFPA 70.
 - 7. Consult Architect for resolution of conflicting requirements.
- C. Special Installation Techniques:
 - 1. Athletic Field Luminaires, Lamps, and Ballasts:
 - a. Install luminaires at height and aiming angle as indicated on Drawings.
 - b. Install controls and ballast housings in cabinets mounted on support structure at least **10 ft (3 m)** above finished grade.
 - 2. Structural Supports:
 - a. Provide [**steel**][**aluminum**][**concrete**] poles and other support structures, brackets, arms, appurtenances, bases, anchorages, and foundations for athletic field lighting.
 - b. Use web fabric slings (not chain or cable) to raise and set structural members. Protect equipment during installation to prevent corrosion.
 - c. Install poles and other structural units level, plumb, and square.

- d. Except for embedded structural members, grout void between pole base and foundation. Use nonshrinking or expanding concrete grout firmly packed in entire void space. Use a short piece of **1/2 inch (13 mm)** diameter pipe to make a drain hole through grout. Arrange to drain condensation from interior of pole. Nonshrink grout is specified in Section 055000 "Metal Fabrications."
 - e. Extend cast-in-place bolted base foundations **36 inch (914 mm)** above grade, minimum.
 - f. Install protective pipe bollards on **[two][three]<Insert number>** sides of each embedded pole installed in paved areas.
3. Surge Protection: Install Type 2 surge protective devices; nonmodular, with digital indicator lights[**and one set of dry contacts**].
- a. Peak Single-Impulse Surge Current Rating: **<Insert number>** kA per phase.
4. Wiring Methods:
- a. Install cables in raceways, except when cables are installed within boxes and poles. Conceal raceways and cables.
 - b. Feeders, Subfeeders, Branch Circuits, and Control Wiring: Underground nonmetallic raceway; 10 AWG minimum conductor size for power wiring.
 - c. Overhead-, pole-, or structure-supported wiring and transformers are[**not**] permitted.
 - d. Electrical Enclosures Exposed to Weather: UL 50E, Type 3R enclosure constructed from **[stainless steel][corrosion-resistant material]**, with hinged doors fitted with padlock hasps or lockable latches.
 - e. Install lighting control equipment and cabling connections to luminaires.
5. Identification: Provide labels for athletic field lighting and associated electrical equipment.
- a. Identify system components and terminals.
 - b. Identify field-installed conductors, interconnecting wiring, and components.
 - c. Provide warning signs.
 - d. Label each enclosure with engraved metal or laminated-plastic nameplate.
6. **<Insert more stringent installation requirements that supplement or supersede listed standards and manufacturers' published instructions>.**

D. Interfaces with Other Work:

- 1. Coordinate installation of new products for **<Insert system or product family/category>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>.**
- 2. Coordinate with Section 260573 "Power System Studies" for mitigating available fault current and arc-flash hazard in electrical equipment installed for athletic field lighting.
- 3. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>.**
 - a. **<Insert requirements for transition between this Section and related Work>.**

E. Systems Integration: Integrate athletic field lighting controls with facility lighting controls.

**3.3 FIELD QUALITY CONTROL OF ATHLETIC FIELD LIGHTING****A. Administrant for Electrical Power Tests and Inspections:**

1. **[Owner][Tenant]** will engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Administrant for Field Tests and Inspections of Lighting Installations:

1. **[Owner][Tenant]** will engage qualified lighting testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified lighting testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Acceptance Testing Preparation:

1. **<Insert requirements>**.

D. Field tests and inspections must be witnessed by [Architect][authorities having jurisdiction]<Insert names or titles of witnesses>.**E. Tests and Inspections:**

1. After installing sports lighting system and after electrical circuits have been energized, perform proof-of-performance field measurements and analysis for compliance with requirements.
2. Playing and Other Designated Areas: Make field measurements at intersections of grids, dimensioned and located as specified in "Performance Requirements" Article and as described below:
 - a. Baseball Fields: Measure at least **[25]<Insert number>** points of the infield and **[87]<Insert number>** points of the outfield. Extend the grid **15 ft (5 m)** outside the foul lines, extending to outfield boundary or fence.
 - b. Softball Fields: Measure at least **[16]<Insert number>** points of the infield and **[48]<Insert number>** points of the outfield. Extend the grid **15 ft (5 m)** outside the foul lines, extending to outfield boundary.
 - c. Football Fields: Lighted area is **[180 by 360 ft (55 by 110 m)]<Insert dimensions>**. Measure at least **[91]<Insert number>** points.
 - d. Soccer Fields: Lighted area is **[210 by 370 ft (64 by 113 m)]<Insert dimensions>**. Measure at least **[91]<Insert number>** points.
 - e. Outdoor Tennis Courts: Measure at least **[30]<Insert number>** points for a double court.
 - f. **<Insert sports venue>**: Measure at least **<Insert number>** points.
3. Make field measurements at established test points in areas of concern for spill light and glare.
4. Perform analysis to demonstrate correlation of field measurements with specified illumination quality and quantity values and corresponding computer-generated values that were submitted with engineered design documents. Submit a report of the analysis. For computer-generated

- values, use manufacturer's lamp lumens that are adjusted to lamp age at time of field testing.
5. Report results in writing.

F. Nonconforming Work:

1. Sports lighting will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.
3. Correction of Illumination Deficiencies for Playing Areas: Make corrections to illumination quality or quantity, measured in field quality-control tests, that varies from specified illumination criteria by plus or minus 10 percent.
 - a. Add or replace luminaires; change mounting height and aiming; or install louvers, shields, or baffles.
 - b. If luminaires are added or mounting height is changed, revise aiming and recalculate and modify or replace support structures if indicated.
 - c. Do not replace luminaires with units of higher or lower wattage without Architect's approval.
 - d. Retest as specified above after repairs, adjustments, or replacements are made.
 - e. Report results in writing.

G. Correction of Excessive Illumination in Spill-Light-Critical Areas: If measurements indicate that specified limits for spill light are exceeded, make corrections to illumination quantity, measured in field quality-control tests, that reduce levels to within specified maximum values.

1. Replace luminaires; change mounting heights and revise aiming; or install louvers, shields, or baffles.
2. Obtain Architect's approval to replace luminaires with units of higher or lower wattage.
3. If mounting height is changed, revise aiming and recalculate and modify or replace support structures if indicated.
4. Retest as specified above after repairs, adjustments, or replacements are made.

H. Assemble and submit test and inspection reports.

I. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at Project site.

3.4 SYSTEM STARTUP

A. Perform startup service.

1. Complete installation and startup checks in accordance with manufacturer's published instructions.
2. **<Insert startup steps if any>.**

B. Manufacturer Services: Engage factory-authorized service representative to **[support][supervise]** system startup.

1. Manufacturer's Field Reports for System Startup Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at Project site.

3.5 ADJUSTING

- A. Adjust luminaires and supports to maintain orientation and aiming as recommended by manufacturer.
- B. Luminaire Aiming Adjustments: When requested within [12]<Insert number> months of date of Substantial Completion, provide on-site assistance in adjusting aiming direction of luminaires to suit occupied conditions. Make up to [two]<Insert number> visits to the Project site during other-than-normal hours for this purpose. Some of the Work may be required during hours of darkness.
 - 1. During adjustment visits, inspect all luminaires. Replace lamps or luminaires that are defective.
 - 2. Parts and supplies must be manufacturer's authorized replacement parts and supplies.
 - 3. Adjust aim of luminaires in presence of Architect.

3.6 CLOSEOUT ACTIVITIES

- A. Training:
 - 1. **[With assistance from factory-authorized service representatives, train][Train]** Owner's maintenance personnel on the following topics:
 - a. How to adjust, operate, and maintain luminaires[**and lighting controls**].

3.7 PROTECTION

- A. After installation, protect athletic field lighting and associated electrical equipment from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

3.8 MAINTENANCE

- A. Maintenance Service Agreement: Beginning at Substantial Completion, verify that maintenance service agreement includes [three][six][nine][12] months' full maintenance by **[skilled employees of athletic field lighting Installer][manufacturer's authorized service representative]**. Include **[semiannual][annual]** preventive maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper athletic field lighting operation. Verify that parts and supplies are manufacturer's authorized replacement parts and supplies.

SECTION 27 11 00 00 - COMMUNICATIONS EQUIPMENT ROOM FITTINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Communications-circuit accessories.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. **[Section 013100 "Project Management and Coordination"]<Insert Section number and title>** for preinstallation conference procedures.
5. Section 061000 "Rough Carpentry" furnishes equipment backing panels installed by this Section.
6. Section 260526 "Grounding and Bonding for Electrical Systems" specifies the following installed by this Section:
 - a. Grounding and bonding conductors.
 - b. Grounding and bonding clamps.
 - c. Grounding and bonding bushings.
 - d. Grounding and bonding hubs.
 - e. Grounding and bonding connectors.
 - f. Intersystem bonding bridge grounding connector.
 - g. Grounding and bonding busbars.
 - h. Signal reference grids.
7. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases for communications equipment installed by this Section.
8. Section 260533.16 "Boxes and Covers for Electrical Systems" furnishes the following installed by this Section:
 - a. Metallic outlet boxes, device boxes, rings, and covers.
 - b. Junction boxes and pull boxes.
 - c. Cover plates for device boxes.
9. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration isolation and seismic-control devices referenced by this Section.
10. Section 260553 "Identification for Electrical Systems" specifies labels and warning signs for communications pathways installed by this Section.
11. Section 262716 "Electrical Cabinets and Enclosures" specifies the following installed by this Section:
 - a. Cabinets and cutout boxes.
 - b. Termination boxes.
 - c. Miscellaneous enclosures.

- d. Rack or frame systems.
 - e. Enclosure-mounted relocatable power taps.
12. Section 262719 "Multi-Outlet Assemblies" specifies the following installed by this Section:
- a. Wall-mounted, surface metal raceway multi-outlet assemblies.
 - b. Indoor service poles.
13. Section 262726.33 "General-Grade Duplex Straight-Blade Receptacles" specifies duplex receptacles installed by this Section.
14. Section 262726.39 "Locking Receptacles" specifies locking receptacles installed by this Section.
15. Section 262726.51 "Connectors, Cords, and Plugs" specifies pendant flexible cords and connectors installed by this Section.
16. Section 270528 "Pathways for Communications Systems" specifies cable pathways serving communications equipment room fittings installed under this Section.

1.2 DEFINITIONS

A. Abbreviations for Communications Spaces:

- 1. EF: Entrance facility; generally serves campus or building. EF may include an ER.
- 2. ER: Equipment room; generally serves campus or building.
- 3. TE: Telecommunications enclosure; generally serves a single tenant or floor.
- 4. TR: Telecommunications room; generally serves a single tenant or floor.

B. Abbreviations for Communications Facilities:

- 1. HC: Horizontal cross-connect; also called "floor distributor" (FD).
- 2. IC: Intermediate cross-connect; also called "building distributor" (BD).
- 3. MC: Main cross-connect; also called "campus distributor" (CD).

C. Abbreviations for Grounding and Bonding:

- 1. BBC: Backbone bonding conductor, for connecting multiple TBBs serving the same floor.
- 2. PBB: Primary bonding busbar; located in main distribution frame room, ideally near electrical service entrance.
- 3. RBB: Rack bonding busbar; located in equipment cabinets and racks.
- 4. SBB: Secondary bonding busbar; located in intermediate distribution frame rooms.
- 5. TBB: Telecommunications bonding backbone, for connecting SBBs to PBB.
- 6. TBC: Telecommunications bonding conductor, for connecting PBB to intersystem bonding termination device or busbar at electrical service entrance.
- 7. TEBC: Telecommunications equipment bonding conductor, for connecting RBBs to SBBs or PBB.
- 8. UBC: Unit bonding conductor, for connecting individual communications equipment to RBBs or SBBs.

1.3 PREINSTALLATION MEETINGS

- A. Preinstallation Conference: Conduct conference at **[Project site]<Insert location>**.
- B. Preinstallation Coordination Meeting(s): For communications equipment room planning. Conduct meeting(s) **[as videoconference][or][at Project site]<Insert location>** before **<Insert construction activity>**.

1. Attendees: Representative of Owner's information and communications technology staff[**that will be installing electronic equipment**][**and cables**], installers, fabricators, representatives of manufacturers, and administrators for field tests and inspections. Notify Architect[, **Construction Manager**][, **and Owner's Commissioning Authority**] of scheduled meeting dates.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing laboratory, certifying that model number corresponding to specified product complies with specified listing criteria.

B. Shop Drawings: Prepare and submit the following:

1. Communications Equipment Room Drawings, Diagrams, and Supporting Documents:

- a. Include plans, elevations, sections, details, and attachments to other work.
- b. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
- c. Equipment Racks and Cabinets: Indicate workspace requirements and access for cable connections.
- d. Switchboards, Panelboards, and Safety Switches: Indicate workspace requirements and access for cable connections.
- e. Grounding and Bonding: Indicate location of busbars and their mounting details showing standoff insulators and wall mounting brackets.
- f. Cable Trays, Large Raceways, Ducts, and Piping: Indicate elevation and route of vertical and horizontal cable trays, raceways or ducts larger than **2 inch (50 mm)** wide, and fire-suppression piping located inside communications equipment room.
- g. Luminaires: Indicate elevation, orientation, and size of luminaires inside the communications equipment room for coordination with cable trays, equipment racks, cabinets, and other equipment.
- h. Access Panels: Indicate locations, dimensions, and clearances required to open access panels in ducts, walls, or ceilings inside communications equipment room.
- i. Controls: Indicate locations of sensors, switches, and push-buttons for HVAC, fire suppression, fire alarm, and standby power.
- j. Adjust configurations and locations of distribution frames, cross-connects, and patch panels in equipment rooms to accommodate and optimize configurations and space requirements of communications equipment.
- k. Adjust configurations and locations of equipment with distribution frames, cross-connects, and patch panels of cabling systems of other communications, electronic safety and security, and related systems that share space in equipment room.
- l. Coordinate location of power raceways and receptacles with locations of communications equipment requiring electrical power to operate.

1.5 INFORMATIONAL SUBMITTALS

A. Manufacturers' published instructions.

1.6 QUALIFICATIONS

- A. Electrical Power Testing (EPT) Technician I: Possessing active NICET EPT Level I certification. Able to work safely around electrical power equipment and cabling under supervision.

- B. Electrical Power Testing (EPT) Technician II: Possessing active NICET EPT Level II certification. Able to isolate and ground electrical power equipment, to connect test equipment, and to conduct and document standard tests of basic equipment.
- C. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.
- D. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.
- E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.
 - 1. On-site electrical testing supervisors must possess active NICET EPT Technician [III][IV] certification.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- B. Seismic and Wind Performance: Installed assembly must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:
 - 1. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events[, and unit must be fully operational after seismic events].
 - 2. Component Importance Factor (Ip): [1.0][1.5].
 - 3. Component Amplification Factor (ap): [1.0][2.5]<Insert value>.
 - 4. Component Response Modification Factor (Rp): [1.5][2.0][2.5][6.0]<Insert value>.
 - 5. Component Overstrength Factor (Ωo): [1.5][2.5]<Insert value>.

2.2 COMMUNICATIONS-CIRCUIT ACCESSORIES

- A. Description: This category covers devices intended for connecting communications circuits in accordance with Article 800 of NFPA 70.
- B. UL DUXR - 66-Style or 110-Style Cross-Connect Frame :
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Belden Canada ULC]
 - b. [CommScope, Inc]
 - c. [Optical Cable Corporation (OCC)]
 - d. [Ortronics, Inc.]
 - e. [Panduit Corp]
 - f. [Siemon Co. (The)]
 - g. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Canada ULC]
 - b. [CommScope, Inc]
 - c. [Optical Cable Corporation (OCC)]
 - d. [Ortronics, Inc.]
 - e. [Panduit Corp]
 - f. [Siemon Co. (The)]
 - g. <Insert manufacturer's name>
 3. Source Limitations: Obtain products from single manufacturer.
 4. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
 - a. For Communications Circuits: UL CCN DUXR; including UL 1863 and UL 467.
 - b. For Audio/Video, Data, and Signaling Circuits: UL CCN DUXR; including UL 1977 and UL 467.
 5. Standard Features: This product type includes the frame only. Block inserts and related termination equipment are specified in communications cabling Sections.
- C. UL DUXR - Patch Panel :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [CommScope, Inc]
 - b. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Legrand AV Inc.; Legrand North America, LLC]
 - d. [Leviton Manufacturing Co., Inc.]
 - e. [Ortronics, Inc.]
 - f. [Panduit Corp]
 - g. [Pass & Seymour; Legrand North America, LLC]
 - h. [Siemon Co. (The)]
 - i. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [CommScope, Inc]

- b. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Legrand AV Inc.; Legrand North America, LLC]
 - d. [Leviton Manufacturing Co., Inc.]
 - e. [Ortronics, Inc.]
 - f. [Panduit Corp]
 - g. [Pass & Seymour; Legrand North America, LLC]
 - h. [Siemon Co. (The)]
 - i. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by [UL Solutions][or][FM Approvals][, CSA Group (with "US" marking)][, Intertek ETL][, TÜV Rheinland][, or other qualified electrical testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:
- a. For Communications Circuits: UL CCN DUXR; including UL 1863 and UL 467.
 - b. For Audio/Video, Data, and Signaling Circuits: UL CCN DUXR; including UL 1977 and UL 467.
5. Standard Features:
- a. Mounting: [Equipment rack][Wall].
 - b. Style: [Modular][Prepopulated 110 punch down].
 - c. EMI Compatibility: [Shielded][Unshielded].
 - d. Configuration: [Standard][High density]; [flat][angled].
 - e. Include provisions for labeling ports.
 - f. Distribution Port Quantity: [12][24][48][72][144]<Insert quantity>.
 - g. Cable Type: [Cat. 5e][Cat. 6][Cat. 6a][Optical fiber]<Insert cable type>.

PART 3 - EXECUTION

3.1 PREPARATION

- A. Contact telecommunications service provider and arrange for installation of demarcation point, protected entrance terminals, and a housing when so directed by service provider.

3.2 SELECTION OF GROUNDING AND BONDING PRODUCTS FOR COMMUNICATIONS

- A. Grounding and Bonding Conductors:

- 1. Communications Busbar Connections:
 - a. TBC: Not smaller than [1/0 AWG][3/0 AWG]<Insert wire size> and no smaller than largest TBB.
 - b. TBB: Not smaller than 2 kcmil per linear ft of conductor length, but not larger than 750 kcmil, unless otherwise indicated on Drawings.
 - c. BBC: Not smaller than largest TBB to which it is connected unless otherwise indicated on Drawings.
 - d. TEBC: Not smaller than [2 AWG]<Insert wire size> unless otherwise indicated on Drawings. Provide bolted connectors.
 - e. UBC: Not smaller than [6 AWG]<Insert wire size> unless otherwise indicated on

- Drawings. Provide bolted connectors.
- f. Bonding Conductors to Structural Steel: Not smaller than **[6 AWG]<Insert wire size>** unless otherwise indicated on Drawings. Provide bolted clamp connectors.
2. Cable Tray Connections:
- a. Cable Tray Equipment Grounding Conductor: **[8 AWG][6 AWG][4 AWG]**.
- b. Cable Tray Bonding Jumper: If not supplied by cable manufacturer, provide bonding jumper not smaller than **[10 AWG][6 AWG]** and not longer than **12 inch (300 mm)**. If jumper is wire, it must be terminated with lug having **[one hole and standard barrel for one crimp][two holes and long barrel for two crimps]**. If jumper is flexible braid, it must be terminated with **[one- or two-hole ferrule][one-hole ferrule]**. Attach with bonding screw or connector provided by cable tray manufacturer.
3. Underground Connections: Not smaller than **[2 AWG]<Insert wire size>**. Provide welded connectors, except bolted connectors may be used in handholes or manholes and as otherwise indicated on Drawings.
- B. Grounding and Bonding Busbars:
1. PBB:
- a. Dimensions: **[1/4 inch thick by 4 inch high (6.3 mm thick by 100 mm high)]<Insert dimensions>**.
- b. Stand-Off Distance: **[2 inch (50 mm)][4 inch (100 mm)]<Insert dimension>**.
2. SBB:
- a. Dimensions: **[1/4 inch thick by 4 inch high (6.3 mm thick by 100 mm high)]<Insert dimensions>**.
- b. Stand-Off Distance: **[2 inch (50 mm)][4 inch (100 mm)]<Insert dimension>**.
- C. Access Floor Signal Reference Grid:
1. Provide low-impedance path between telecommunications cabinets, equipment racks, and reference grid, by installing **[6 AWG]<Insert wire size>** bonding conductors in a grid pattern under the floor.
- a. Install grid bonding conductors on **4 ft (1200 mm)** centers, so as to permit bonding of one structural pedestal for each access floor tile. Connect grid conductors together where they cross each other.
- b. Bond SBBs in room to two or more bonding conductors of reference grid with TEBCs.
- c. Bond equipment to nearest SBB and to reference grid with TEBCs.
- d. Bond conduits and piping entering equipment room with TEBCs to nearest SBB and to grid conductor nearest entry into room.
- D. Signal Reference Grid Wire Mesh:
1. Provide low-impedance path between telecommunications cabinets, equipment racks, and reference grid, by installing wire mesh **[in concrete floor slab][above ceiling]** with the following features:
- a. Wire mesh, 10 AWG solid copper, **2 inch (50 mm)** spacing.
- b. Wire mesh, 10 AWG solid copper, **3 inch (75 mm)** spacing.
- c. Wire mesh, 10 AWG solid copper, **4 inch (100 mm)** spacing.
- d. Wire mesh, 10 AWG solid copper, **6 inch (150 mm)** spacing.

- e. Wire mesh, 10 AWG solid copper, **12 inch (300 mm)** spacing.
- f. Wire mesh, 8 AWG solid copper, **4 inch (100 mm)** spacing.
- g. Wire mesh, 8 AWG solid copper, **6 inch (150 mm)** spacing.
- h. Wire mesh, 8 AWG solid copper, **8 inch (200 mm)** spacing.
- i. Wire mesh, 8 AWG solid copper, **12 inch (300 mm)** spacing.
- j. Wire mesh, 6 AWG solid copper, **4 inch (100 mm)** spacing.
- k. Wire mesh, 6 AWG solid copper, **6 inch (150 mm)** spacing.
- l. Wire mesh, 6 AWG solid copper, **8 inch (200 mm)** spacing.
- m. Wire mesh, 6 AWG solid copper, **12 inch (300 mm)** spacing.
- n. Wire mesh, 6 AWG solid copper, **24 inch (610 mm)** spacing.
- o. Wire mesh, 4 AWG solid copper, **4 inch (100 mm)** spacing.
- p. Wire mesh, 4 AWG solid copper, **6 inch (150 mm)** spacing.
- q. Wire mesh, 4 AWG solid copper, **12 inch (300 mm)** spacing.
- r. Wire mesh, 2 AWG solid copper, **4 inch (100 mm)** spacing.
- s. Wire mesh, 2 AWG solid copper, **6 inch (150 mm)** spacing.
- t. Wire mesh, 2 AWG solid copper, **12 inch (300 mm)** spacing.
- u. Wire mesh, 2 AWG solid copper, **24 inch (610 mm)** spacing.

E. Signal Reference Grid Tape Mesh:

- 1. Provide low-impedance path between telecommunications cabinets, equipment racks, and reference grid, by installing tape mesh under floor finish with the following features:
 - a. Wire mesh, **2 inch (50 mm)** by **16 mil (0.4 mm)** solid copper, **12 inch (300 mm)** spacing.
 - b. Wire mesh, **2 inch (50 mm)** by **16 mil (0.4 mm)** solid copper, **24 inch (610 mm)** spacing.

3.3 SELECTION OF COLORS AND IDENTIFICATION MARKINGS

- A. Comply with 29 CFR 1910.144 for color identification of hazards, and the following:
 - 1. Fire-protection[**and fire-alarm**] equipment[, **including raceways**,] must be finished, painted, or suitably marked safety red.
 - 2. Ceiling-mounted hangers, supports, cable trays, and raceways must be finished, painted, or suitably marked safety yellow where less than [7.7 ft (2.3 m)]<Insert height> above finished floor.
- B. Pipe and Conduit Labeling: Comply with ASME A13.1[**and IEEE C2**].
- C. Color Coding Scheme for Communications Cable and Terminations: Comply with BICSI N1 and TIA-598.
- D. Accessible Fittings for Raceways: Identify cover of junction and pull box of the following systems with wiring system legend and system voltage. System legends must be as follows:
 - 1. "COMMUNICATIONS."
 - 2. "FIRE ALARM."
 - 3. "SECURITY."
 - 4. <Insert name>.
- E. Identify conductors, cables, and terminals in enclosures and at junctions, terminals, pull points, and locations of high visibility. Identify by system and circuit designation.
- F. Locations of Underground Lines: Underground-line warning tape for communication, control wiring, and optical-fiber cable.

- G. Communications Vaults, Manholes, Handholes, and Pull and Junction Boxes: For conductors in vaults, pull and junction boxes, manholes, and handholes, use **[vinyl wraparound labels][self-adhesive wraparound labels][snap-around labels][snap-around color-coding bands][self-adhesive vinyl tape]** to identify phase.
1. Locate identification at changes in direction, at penetrations of walls and floors, at **50 ft (15 m)** maximum intervals in straight runs, and at **25 ft (7.6 m)** maximum intervals in congested areas.
- H. Control-Circuit Conductor Identification: For conductors and cables in pull and junction boxes, manholes, and handholes, use **[write-on tags][self-adhesive labels]** with conductor or cable designation, origin, and destination.
- I. Control-Circuit Conductor Termination Identification: For identification at terminations, provide **[heat-shrink preprinted tubes][self-adhesive labels]** with conductor designation.
- J. Conductors to Be Extended in Future: Attach **[write-on tags][marker tape]** to conductors[**and list source**].
- K. Auxiliary Electrical Systems Conductor Identification: **[Marker tape][Self-adhesive vinyl tape]** that is uniform and consistent with system used by manufacturer for factory-installed connections.
- L. Equipment and Cabling Identification for Administrative Records and Labeling: Comply with TIA-606 requirements for **[Class 1][Class 2][Class 3][Class 4]** network administration.
- M. Equipment Identification Labels:
1. Black letters on white field.
 2. Indoor Equipment: **[Self-adhesive label][Baked-enamel signs][Metal-backed butyrate signs][Laminated acrylic or melamine plastic sign]**.
 3. Outdoor Equipment: **[Laminated acrylic or melamine sign][Stenciled legend 4 inch (100 mm) high]**.
 4. Equipment to Be Labeled:
 - a. Racks, Frames, and Enclosures: Identify front and rear of each enclosure with self-adhesive labels[**containing equipment designation**].
 - b. Patch Panels: **[Label individual rows in each rack, starting at top and working down, with self-adhesive labels.][Label individual rows and outlets, starting at to left and working down, with self-adhesive labels.]**
 - c. Communications cabinets.
 - d. Access doors and panels for concealed communications items.
 - e. Emergency system boxes and enclosures.
 - f. Contactors.
 - g. Remote-controlled switches, dimmer modules, and control devices.
 - h. Monitoring and control equipment.
 - i. Fire-alarm equipment.
 - j. Security equipment.
 - k. Life-safety communications equipment.
 - l. **<Insert equipment>**.
- N. Backbone Cables: Label each cable with a **[vinyl-wraparound label][snap-around label][self-adhesive wraparound label]** indicating the location of the far or other end of the backbone cable. Patch panel or punch down block where cable is terminated should be labeled identically.
- O. Horizontal Cables: Label each cable with a **[vinyl-wraparound label][snap-around label][self-adhesive wraparound label]**.

P. Cover Plates: Label individual cover plates with self-adhesive labels. Place label at top of cover plate. Identify cover plate in accordance with TIA-606.

Q. Cable Ties: General purpose, for attaching tags, except as listed below:

1. Outdoors: UV-stabilized nylon.
2. In Spaces Handling Environmental Air: Plenum rated.

3.4 SELECTION OF SIGNS AND HAZARD MARKINGS

A. Comply with 29 CFR 1910.145 for danger, caution, warning, and safety instruction signs.

B. Signs, labels, and tags required for personnel safety must comply with the following standards:

1. Safety Colors: NEMA Z535.1.
2. Facility Safety Signs: NEMA Z535.2.
3. Safety Symbols: NEMA Z535.3.
4. Product Safety Signs and Labels: NEMA Z535.4.
5. Safety Tags and Barricade Tapes for Temporary Hazards: NEMA Z535.5.

C. Electrical Hazard Warnings:

1. Multiple Power Sources Warning Legend: "DANGER - ELECTRICAL SHOCK HAZARD - EQUIPMENT/RACK HAS MULTIPLE POWER SOURCES."
2. <Insert names and wording of warning signs or labels>.

D. Operating Instruction Signs: **[Self-adhesive labels][Baked-enamel warning signs][Metal-backed, butyrate warning signs][Laminated acrylic or melamine plastic signs]**.

E. Emergency Operating Instruction Signs: **[Self-adhesive labels][Baked-enamel warning signs][Metal-backed, butyrate warning signs][Laminated acrylic or melamine plastic signs]** with white legend on red background with minimum **3/8 inch (10 mm)** high letters for emergency instructions at equipment used for **<Insert emergency operations>**.

F. Label TBC, TBBs, and BBCs at attachment points with legend: "WARNING! COMMUNICATIONS BONDING CONDUCTOR. DO NOT REMOVE OR DISCONNECT!"

3.5 INSTALLATION OF FITTINGS FOR ENTRANCE FACILITY

A. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:

1. Designated Critical Operations Areas: Comply with Article 708 of NFPA 70.
2. Communications Systems: Comply with Ch. 8 of NFPA 70 and with BICSI N1.
3. Grounding and Bonding: Comply with Article 250 of NFPA 70 and with BICSI N3.
4. Consult Architect for resolution of conflicting requirements.

B. Provide the following specified products in entrance facility room or space as indicated on Drawings:

1. Equipment backing panel .
 - a. Install from **6 inch (150 mm)** to **8 ft, 6 inch (2588 mm)** above finished floor. If plywood is

fire treated, ensure that fire-treatment stamp is visible after installation.

2. PBB .
3. NEMA 5-20R [**isolated ground**,][**extra-heavy-duty**,]<Insert description> duplex straight-blade receptacle, outlet box, and cover plate .
4. [**NEMA L5-20R**][**NEMA L6-20R**][**NEMA L14-20R**][, **isolated ground**,]<Insert description> locking receptacle, outlet box, and cover plate .
5. [**NEMA L5-20R**][**NEMA L6-20R**][**NEMA L14-20R**][, **isolated ground**,]<Insert description> pendant, extra-hard-usage, jacketed, flexible cord and connector .
6. Surface-mounted multi-outlet assembly .
7. Indoor service pole .
8. [**19 inch open**][**19 inch enclosed**][**23 inch open**][**23 inch enclosed**] equipment rack with RBB and enclosure-mounted relocatable power tap .
9. 66-style or 110-style cross-connect frame .
10. Patch panel .

3.6 INSTALLATION OF FITTINGS FOR EQUIPMENT ROOM

- A. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:
 1. Designated Critical Operations Areas: Comply with Article 708 of NFPA 70.
 2. Communications Systems: Comply with Ch. 8 of NFPA 70 and with BICSI N1.
 3. Grounding and Bonding: Comply with Article 250 of NFPA 70 and with BICSI N3.
 4. Consult Architect for resolution of conflicting requirements.
- B. Provide the following specified products in entrance facility room or space as indicated on Drawings:
 1. Equipment backing panel .
 - a. Install from **6 inch (150 mm)** to **8 ft, 6 inch (2588 mm)** above finished floor. If plywood is fire treated, ensure that fire-treatment stamp is visible after installation.
 2. PBB .
 3. NEMA 5-20R [**isolated ground**,][**extra-heavy-duty**,]<Insert description> duplex straight-blade receptacle, outlet box, and cover plate .
 4. [**NEMA L5-20R**][**NEMA L6-20R**][**NEMA L14-20R**][, **isolated ground**,]<Insert description> locking receptacle, outlet box, and cover plate .
 5. [**NEMA L5-20R**][**NEMA L6-20R**][**NEMA L14-20R**][, **isolated ground**,]<Insert description> pendant, extra-hard-usage, jacketed, flexible cord and connector .
 6. Surface-mounted multi-outlet assembly .
 7. Indoor service pole .
 8. [**19 inch open**][**19 inch enclosed**][**23 inch open**][**23 inch enclosed**] equipment rack with RBB and enclosure-mounted relocatable power tap .
 9. 110-style cross-connect frame .
 10. Patch panel .

3.7 INSTALLATION OF FITTINGS FOR TELECOMMUNICATIONS ROOMS

- A. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:
 1. Designated Critical Operations Areas: Comply with Article 708 of NFPA 70.
 2. Communications Systems: Comply with Ch. 8 of NFPA 70 and with BICSI N1.

3. Grounding and Bonding: Comply with Article 250 of NFPA 70 and with BICSI N3.
4. Consult Architect for resolution of conflicting requirements.

B. Provide the following specified products in intermediate distribution frame room or space as indicated on Drawings:

1. Equipment backing panel .
 - a. Install from **6 inch (150 mm)** to **8 ft, 6 inch (2588 mm)** above finished floor. If plywood is fire treated, ensure that fire-treatment stamp is visible after installation.
2. SBB .
3. NEMA 5-20R [**isolated ground,**][**extra-heavy-duty,**]**<Insert description>** duplex straight-blade receptacle, outlet box, and cover plate .
4. [**NEMA L5-20R**][**NEMA L6-20R**][**NEMA L14-20R**][**, isolated ground,**]**<Insert description>** locking receptacle, outlet box, and cover plate .
5. [**NEMA L5-20R**][**NEMA L6-20R**][**NEMA L14-20R**][**, isolated ground,**]**<Insert description>** pendant, extra-hard-usage, jacketed, flexible cord and connector .
6. Surface-mounted multi-outlet assembly .
7. Indoor service pole .
8. [**19 inch open**][**19 inch enclosed**][**23 inch open**][**23 inch enclosed**] equipment rack with RBB and enclosure-mounted relocatable power tap .
9. 110-style cross-connect frame .
10. Patch panel .

3.8 INSTALLATION OF BONDING FOR COMMUNICATIONS

A. Grounding of Communications: Bond PBB and SBBs to grounding electrode conductors at electrical power service entrance, and at electrical power derived systems serving communications equipment, using intersystem bonding termination device.

1. Structural Steel: Where structural steel of steel frame building is readily accessible within room or space, bond each SBB and PBB to vertical steel of building frame.

B. Comply with manufacturer's published instructions.

C. Reference Standards:

1. Bonding of Communications: Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with BICSI N3.
2. Consult Architect for resolution of conflicting requirements.

D. Special Techniques:

1. Bonding of Busbars:
 - a. Indicate locations of grounding busbars on Drawings. Install busbars horizontally, on insulated spacers **12 inch (300 mm)** above finished floor unless otherwise indicated.
 - b. Where busbars are indicated on both sides of doorways, route bonding conductor up to top of door frame, across top of doorway, and down; connect to continuation of horizontal busbar.
2. Bonding Conductors:

- a. Stacking of conductors under a single bolt is not permitted when connecting to busbars.
 - b. Assemble wire connector to conductor, complying with manufacturer's published instructions and as follows:
 - 1) Use crimping tool and die specific to connector.
 - 2) Pretwist conductor.
 - 3) Apply antioxidant compound to bolted and compression connections.
 - c. Install in straightest and shortest route between origination and termination point, and no longer than required. Bend radius must not be smaller than 10 times diameter of conductor. No single bend may exceed 90 degrees.
 - d. Install without splices.
 - e. Support conductors at not more than **36 inch (900 mm)** intervals.
 - f. Outside telecommunications rooms, install conductors in metric designator 21 (trade size 3/4) PVC-80 conduit until conduit enters telecommunications room. Install bonding conductors in EMT-A or EMT-SS when routed through plenum. Do not install bonding conductors in EMT-S unless otherwise indicated on Drawings.
 - 1) If bonding conductor must be installed in EMT-S or other ferrous metallic raceway, bond conductor to raceway using grounding bushing and bond both ends of raceway to SBB.
3. Provide TBC and terminate ends to PBB and intersystem bonding **[termination device][busbar]** at electrical service entrance in accordance with Section 250.94, "Bonding for Communication Systems," of NFPA 70.
 4. Busbar Interconnections: Bond SBBs to PBB with TBBs. If more than one TBB is installed, bond TBBs together with BBCs where required by TIA-607.
 5. Communications Enclosures: Bond metallic enclosures of telecommunications equipment with UBCs to nearest SBB or PBB.
 6. Equipment Racks: Bond metallic components of enclosures to RBB using UBCs. Provide **[top-mounted][vertically mounted]** RBB if not provided by enclosure or rack manufacturer. Bond RBB to SBB with TEBC. Power connection must comply with NFPA 70; equipment grounding conductor in power cord of cord- and plug-connected equipment must be considered supplemental to bonding requirements in this Section.
 7. Shielded Cable: Bond shield of shielded cable to SBB in communications rooms and spaces. Comply with TIA-568.1 and TIA-568.2 when grounding shielded balanced twisted-pair cables.
 8. Primary Protector: Bond to PBB with insulated bonding conductor.
 9. Electrical Power Panelboards: Where electrical panelboards for communications equipment are located in same room or space, bond each ground bar of panelboard to SBB.
 10. Cable Trays: Provide continuous electrical path by installing bonding clips and jumpers. Bond each end to nearest SBB.
 11. Ladder Racks: Provide continuous electrical path by installing bonding clips and jumpers. Bond each end to nearest SBB.
 12. Access Floors: Bond metal parts of access floors to SBB.
 13. **<Insert connections for other equipment>**.

3.9 FIELD QUALITY CONTROL FOR BONDING OF COMMUNICATIONS

A. Administrant for Grounding and Bonding Tests and Inspections:

1. **[Owner][Tenant]** will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections

- on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Acceptance Testing Preparation:

1. **<Insert requirements>**.

C. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.

D. Tests and Inspections:

1. Inspect physical and mechanical condition. Verify tightness of accessible, bolted, electrical connections with calibrated torque wrench in accordance with manufacturer's published instructions.
2. Test bonding connections of system using AC earth ground-resistance tester, taking two-point bonding measurements in each telecommunications equipment room containing PBB or SBB, using process recommended by BICSI N1. Conduct tests with facility in operation.
 - a. Measure resistance between PBB and electrical service intersystem termination point. Maximum acceptable value is 100 mΩ.
 - 1) If measured resistance from electrical service equipment to ground exceeds **[5 Ω]<Insert resistance>**, notify Architect and include recommendations to reduce resistance to ground.
 - b. Measure resistance between SBBs and PBB. Maximum acceptable value is 100 mΩ.
3. Test for ground loop currents using digital clamp-on ammeter, with full scale not more than 10 A, displaying current in increments of 0.01 A at accuracy of plus or minus 2.0 percent.
 - a. With grounding infrastructure completed and communications system electronics operating, measure current in bonding conductors connected to PBB[**and to SBBs**]. Maximum acceptable AC current level is 1 A.

E. Nonconforming Work:

1. Communications bonding will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Collect, assemble, and submit test and inspection reports.

3.10 PROTECTION

- A. After installation, protect communications equipment room fittings from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

END OF SECTION 27 11 00 00

27 - Communications

Task	Specification	Specification Description
27 11 16 00	27 11 00 00	Communications Equipment Room Fittings
27 11 19 00	27 11 00 00	Communications Equipment Room Fittings
27 11 19 00	27 13 23 00	Communications Optical Fiber Backbone Cabling
27 11 23 00	27 11 00 00	Communications Equipment Room Fittings

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 27 13 13 00 - COMMUNICATIONS COPPER BACKBONE CABLING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Backbone communications cables.
2. Communications-, audio/video-, data-, and other signaling-circuit accessories.

B. Products Furnished, but Not Installed, under This Section:

1. **<Insert products furnished, but not installed>.**

C. Products Installed, but Not Furnished, under This Section:

1. See Section 270553 "Identification for Communications Systems" for communications equipment labels.
2. See Section 271513 "Communications Copper Horizontal Cabling" for Type CM, CMG, and CMX cabling.

D. Related Requirements:

1. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
2. Section 270010 "Supplemental Requirements for Communications" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.

1.2 UNIT PRICES

- A. See Section 012200 "Unit Prices" for description of unit prices affecting items specified in this Section.**

1.3 ALTERNATES

- A. See Section 012300 "Alternates" for description of alternates affecting items specified in this Section.**

1.4 DEFINITIONS

A. Cable Types:

1. FTP: Foil shielded twisted pair.
2. F/FTP: Bundle of FTP cables with overall foil shield.
3. F/UTP: Bundle of UTP cables with overall foil shield.
4. S/FTP: Bundle of FTP cables with overall braided shield.
5. S/UTP: Bundle of UTP cables with overall braided shield.
6. UTP: Unshielded twisted pair.

- B. Cross-Connect: A facility enabling the termination of cable elements and their interconnection or cross-connection.
- C. EMI: Electromagnetic interference.
- D. IDC: Insulation displacement connector.

1.5 SEQUENCING

- A. Wet-work in spaces must be completely dry, and HVAC system must be operating and maintaining ambient temperature and humidity conditions within manufacturer's recommended limits, before delivering and installing cables and connecting materials.

1.6 ACTION SUBMITTALS

- A. Product Data:
 - 1. Backbone communications cable.
 - 2. Communications-, audio/video-, data-, and other signaling-circuit accessories.
- B. Shop Drawings:
 - 1. Cable labeling schedules.
 - 2. Cabling administration diagrams.
 - 3. Wiring diagrams.
 - 4. Cross-connect and patch panel details.
 - 5. Twisted-pair cable testing plan.
- C. Field quality-control reports.
- D. Sustainable design submittals.
 - 1. Backbone communications cable.

1.7 INFORMATIONAL SUBMITTALS

- A. Manufacturers' Published Instructions:
 - 1. Backbone communications cable.
 - 2. Communications-, audio/video-, data-, and other signaling-circuit accessories.
- B. Field Reports:
 - 1. Factory Test Reports:
 - a. Backbone communications cable.

1.8 CLOSEOUT SUBMITTALS

- A. Warranty documentation.

1.9 MAINTENANCE MATERIAL SUBMITTALS

- A. Spare Parts: For communications-, audio/video-, data-, and other signaling-circuit accessories.
- B. Special Tools: For communications-, audio/video-, data-, and other signaling-circuit accessories.

1.10 DELIVERY, STORAGE, AND HANDLING

- A. Test cables upon receipt at Project site.
 - 1. Test each pair of twisted-pair cable for open and short circuits.

1.11 WARRANTY FOR COMMUNICATIONS COPPER BACKBONE CABLE ASSEMBLIES

- A. Special Installer Extended Warranty: Installer warrants that fabricated and installed communications copper backbone cable assemblies perform in accordance with specified requirements and agrees to repair or replace cable assemblies that fail to perform as specified within extended-warranty period.
 - 1. Extended-Warranty Period: **[Two][Three][Four]<Insert number>** years from date of Substantial Completion; full coverage for labor, materials, and equipment.

PART 2 - PRODUCTS

2.1 BACKBONE COMMUNICATIONS CABLES

- A. Description: This category covers multiple conductor jacketed communications cable for telephone and other communications circuits for use in risers and plenums as described in Article 800 of NFPA 70.
- B. Performance Criteria:
 - 1. Regulatory Requirements:
 - a. Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - 2. Listing Criteria:
 - a. Certified Cable: UL CCN DUZX; including UL 444.
 - b. Verified Cable: UL CCN DVBI; including TIA-568.2.
 - c. Type CMP: NFPA 262.
 - d. Type CMR: UL 1666.
 - e. Limited Smoke: Marked "-LS" in accordance with UL 1685.
 - f. Halogen-Free: Marked "-HF" in accordance with UL Subject 2885.
 - g. Low Smoke and Halogen-Free: Marked "-LSHF" in accordance with IEC 61034-2.
 - h. Cable Heating Test: Marked "-LP" with current rating and temperature rating.
- C. Source Quality Control:
 - 1. Product Data: Prepare and submit catalog cuts, brochures, and performance data illustrating size, physical appearance, and other characteristics of product.

2. Sustainable Design Submittals: Prepare and submit documentation for the following:
 - a. Product Data: For each conductor and cable indicating lead content of less than 300 parts per million.
 - b. Environmental Product Declaration: For each product.
 - c. Health Product Declaration: For each product.
 - d. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
 - e. Third-Party Certifications: For each product.
 - f. Third-Party Certified Life Cycle Assessment: For each product.
3. Manufacturer's Published Instructions: Prepare and submit installation, testing, and operating instructions for product.
4. Factory Tests:
 - a. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
 - b. Testing Administrator: **[Owner will engage][Engage]** qualified electrical testing agency to evaluate cable reels.
 - c. Factory Tests and Inspections: Test and inspect cable on reels, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with TIA-568.2 before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.
 - d. Nonconforming Work:
 - 1) Cable reels that do not pass tests and inspections will be considered defective.
 - e. Factory Test Reports: Prepare and submit factory test and inspection reports.

D. UL DUZX and DVBI - Type CMP, Category 3 Communications Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[CommScope, Inc]**
 - b. **[Hitachi Cable America Inc.]**
 - c. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Mohawk; a division of Belden Networking, Inc.]**
 - e. **[Molex Premise Networks]**
 - f. **[Panduit Corp]**
 - g. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - h. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - i. **[West Penn Wire; brand of Belden, Inc.]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[CommScope, Inc]**
 - b. **[Hitachi Cable America Inc.]**
 - c. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell**

- d. [Mohawk; a division of Belden Networking, Inc.]
- e. [Molex Premise Networks]
- f. [Panduit Corp]
- g. [Prysmian Cables and Systems; Prysmian Group North America]
- h. [Superior Essex Inc.; subsidiary of LS Corp.]
- i. [West Penn Wire; brand of Belden, Inc.]
- j. <Insert manufacturer's name>
3. Product Marking: Type CMP; Category 3.
4. Options:
- a. Quantity of Pairs: [25][50][100]<Insert number>.
- b. Shielding/Screening: [UTP][FTP][F/UTP][F/FTP].
- c. Jacket:
[White][Gray][Blue][Yellow][Orange][Pink][Green][Red][Black][Brown][Beige][Mauve]<Insert color> thermoplastic.
- E. UL DUZX and DVBI - Type CMP, Category 5e Communications Cable :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [CommScope, Inc]
- b. [Hitachi Cable America Inc.]
- c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- d. [Mohawk; a division of Belden Networking, Inc.]
- e. [Molex Premise Networks]
- f. [Panduit Corp]
- g. [Prysmian Cables and Systems; Prysmian Group North America]
- h. [Superior Essex Inc.; subsidiary of LS Corp.]
- i. [West Penn Wire; brand of Belden, Inc.]
- j. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [CommScope, Inc]
- b. [Hitachi Cable America Inc.]
- c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- d. [Mohawk; a division of Belden Networking, Inc.]
- e. [Molex Premise Networks]
- f. [Panduit Corp]
- g. [Prysmian Cables and Systems; Prysmian Group North America]
- h. [Superior Essex Inc.; subsidiary of LS Corp.]
- i. [West Penn Wire; brand of Belden, Inc.]
- j. <Insert manufacturer's name>
- F. UL DUZX and DVBI - Type CMP, Category 6 Communications Cable :
1. Manufacturers: Subject to compliance with requirements, [provide products by the

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [CommScope, Inc]
- b. [Hitachi Cable America Inc.]
- c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- d. [Mohawk; a division of Belden Networking, Inc.]
- e. [Molex Premise Networks]
- f. [Panduit Corp]
- g. [Prysmian Cables and Systems; Prysmian Group North America]
- h. [Superior Essex Inc.; subsidiary of LS Corp.]
- i. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [CommScope, Inc]
- b. [Hitachi Cable America Inc.]
- c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- d. [Mohawk; a division of Belden Networking, Inc.]
- e. [Molex Premise Networks]
- f. [Panduit Corp]
- g. [Prysmian Cables and Systems; Prysmian Group North America]
- h. [Superior Essex Inc.; subsidiary of LS Corp.]
- i. <Insert manufacturer's name>

3. Product Marking: Type CMP; Category 6.

4. Options:

- a. Quantity of Pairs: [24][Four]<Insert number>.
- b. Shielding/Screening: [UTP][FTP][F/UTP][F/FTP].
- c. Jacket: [White][Gray][Blue][Yellow]<Insert color> thermoplastic.

G. UL DUZX and DVBI - Type CMP, Category 6A Communications Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [CommScope, Inc]
- b. [Hitachi Cable America Inc.]
- c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- d. [Molex Premise Networks]
- e. [Panduit Corp]
- f. [Prysmian Cables and Systems; Prysmian Group North America]
- g. [Superior Essex Inc.; subsidiary of LS Corp.]
- h. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [CommScope, Inc]
 - b. [Hitachi Cable America Inc.]
 - c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Molex Premise Networks]
 - e. [Panduit Corp]
 - f. [Prysmian Cables and Systems; Prysmian Group North America]
 - g. [Superior Essex Inc.; subsidiary of LS Corp.]
 - h. <Insert manufacturer's name>
3. Product Marking: Type CMP; Category 6A.
 4. Options:
 - a. Quantity of Pairs: [Four]<Insert number>.
 - b. Shielding/Screening: [UTP][FTP][F/UTP][F/FTP].
 - c. Jacket: [White][Gray][Blue][Yellow]<Insert color> thermoplastic.

H. UL DUZX and DVBI - Type CMR, Category 3 Communications Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - e. [Leviton Manufacturing Co., Inc.]
 - f. [Mohawk; a division of Belden Networking, Inc.]
 - g. [Molex Premise Networks]
 - h. [Panduit Corp]
 - i. [Prysmian Cables and Systems; Prysmian Group North America]
 - j. [Superior Essex Inc.; subsidiary of LS Corp.]
 - k. [West Penn Wire; brand of Belden, Inc.]
 - l. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert **manufacturer's name; product name or designation**> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - e. [Leviton Manufacturing Co., Inc.]
 - f. [Mohawk; a division of Belden Networking, Inc.]
 - g. [Molex Premise Networks]
 - h. [Panduit Corp]
 - i. [Prysmian Cables and Systems; Prysmian Group North America]
 - j. [Superior Essex Inc.; subsidiary of LS Corp.]

- k. **[West Penn Wire; brand of Belden, Inc.]**
- l. **<Insert manufacturer's name>**
- 3. Product Marking: Type CMR; Category 3.
- 4. Options:
 - a. Quantity of Pairs: **[25][50][100]<Insert number>**.
 - b. Shielding/Screening: **[UTP][FTP][F/UTP][F/FTP]**.
 - c. Jacket: **[White][Gray][Blue][Yellow][Orange][Pink][Green][Red][Black][Brown][Beige][Mauve]<Insert color>** thermoplastic.

I. UL DUZX and DVBI - Type CMR, Category 5e Communications Cable :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Hitachi Cable America Inc.]**
 - d. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **[Mohawk; a division of Belden Networking, Inc.]**
 - g. **[Molex Premise Networks]**
 - h. **[Panduit Corp]**
 - i. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - j. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - k. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Hitachi Cable America Inc.]**
 - d. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **[Mohawk; a division of Belden Networking, Inc.]**
 - g. **[Molex Premise Networks]**
 - h. **[Panduit Corp]**
 - i. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - j. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - k. **<Insert manufacturer's name>**
- 3. Product Marking: Type CMR; Category 5e.
- 4. Options:
 - a. Quantity of Pairs: **[25][50]<Insert number>**.
 - b. Shielding/Screening: **[UTP][FTP][F/UTP][F/FTP]**.
 - c. Jacket: **[White][Gray]<Insert color>** thermoplastic.

J. UL DUZX and DVBI - Type CMR, Category 6 Communications Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**

 - j. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - k. **[TE Connectivity Ltd.]**
 - l. **<Insert manufacturer's name>**
3. Product Marking: Type CMR; Category 6.
4. Options:
 - a. Quantity of Pairs: **[24][Four]<Insert number>**.
 - b. Shielding/Screening: **[UTP][FTP][F/UTP][F/FTP]**.
 - c. Jacket: **[White][Gray][Blue][Yellow]<Insert color>** thermoplastic.

K. UL DUZX and DVBI - Type CMR, Category 6A Communications Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Hitachi Cable America Inc.]**

- d. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - e. [Molex Premise Networks]
 - f. [Panduit Corp]
 - g. [Prysmian Cables and Systems; Prysmian Group North America]
 - h. [Superior Essex Inc.; subsidiary of LS Corp.]
 - i. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - e. [Molex Premise Networks]
 - f. [Panduit Corp]
 - g. [Prysmian Cables and Systems; Prysmian Group North America]
 - h. [Superior Essex Inc.; subsidiary of LS Corp.]
 - i. <Insert manufacturer's name>
 3. Product Marking: Type CMR; Category 6A.
 4. Options:
 - a. Quantity of Pairs: [Four]<Insert number>.
 - b. Shielding/Screening: [UTP][FTP][F/UTP][F/FTP].
 - c. Jacket: [White][Gray][Blue][Yellow]<Insert color> thermoplastic.
- L. UL DUZX and DVBI - Type CMR, Category 8 Communications Cable :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [CommScope, Inc]
 - b. [Superior Essex Inc.; subsidiary of LS Corp.]
 - c. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [CommScope, Inc]
 - b. [Superior Essex Inc.; subsidiary of LS Corp.]
 - c. <Insert manufacturer's name>
 3. Product Marking: Type CMR; Category 8.
 4. Options:
 - a. Quantity of Pairs: [Four]<Insert number>.
 - b. Shielding/Screening: [F/FTP][S/FTP].
 - c. Jacket: [White][Gray][Blue][Yellow]<Insert color> thermoplastic.

**M. UL DUZX and DVBI - Type CMR-LS, Category 3 Communications Cable :**

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - c. **<Insert manufacturer's name>**
3. Product Marking: Type CMR-LS; Category 3.
4. Options:
 - a. Quantity of Pairs: **[25][50][100]<Insert number>**.
 - b. Shielding/Screening: **[UTP][FTP][F/UTP][F/FTP]**.
 - c. Jacket:
[White][Gray][Blue][Yellow][Orange][Pink][Green][Red][Black][Brown][Beige][Mauve]<Insert color> thermoplastic.

N. UL DUZX and DVBI - Type CMR-LS, Category 5e Communications Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - c. **<Insert manufacturer's name>**
3. Product Marking: Type CMR-LS; Category 5e.
4. Options:
 - a. Quantity of Pairs: **[25][50]<Insert number>**.
 - b. Shielding/Screening: **[UTP][FTP][F/UTP][F/FTP]**.

c. Jacket: **[White][Gray]<Insert color>** thermoplastic.

O. UL DUZX and DVBI - Type CMR-LS, Category 6 Communications Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - c. **<Insert manufacturer's name>**
3. Product Marking: Type CMR-LS; Category 6.
4. Options:
 - a. Quantity of Pairs: **[24][Four]<Insert number>**.
 - b. Shielding/Screening: **[UTP][FTP][F/UTP][F/FTP]**.
 - c. Jacket: **[White][Gray][Blue][Yellow]<Insert color>** thermoplastic.

P. UL DUZX and DVBI - Type CMR-LSHF, Category 3 Communications Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - b. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - c. **<Insert manufacturer's name>**
3. Product Marking: Type CMR-LSHF; Category 3.
4. Options:
 - a. Quantity of Pairs: **[25][50][100]<Insert number>**.

- b. Shielding/Screening: [UTP][FTP][F/UTP][F/FTP].
- c. Jacket: [White][Gray][Blue][Yellow][Orange][Pink][Green][Red][Black][Brown][Beige][Mauve]<Insert color> thermoplastic.

Q. UL DUZX and DVBI - Type CMR-LSHF, Category 5e Communications Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [CommScope, Inc]
 - b. [Hitachi Cable America Inc.]
 - c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Superior Essex Inc.; subsidiary of LS Corp.]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [CommScope, Inc]
 - b. [Hitachi Cable America Inc.]
 - c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Superior Essex Inc.; subsidiary of LS Corp.]
 - e. <Insert manufacturer's name>
3. Product Marking: Type CMR-LSHF; Category 5e.
4. Options:
 - a. Quantity of Pairs: [25][50]<Insert number>.
 - b. Shielding/Screening: [UTP][FTP][F/UTP][F/FTP].
 - c. Jacket: [White][Gray]<Insert color> thermoplastic.

R. UL DUZX and DVBI - Type CMR-LSHF, Category 6 Communications Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [CommScope, Inc]
 - b. [Hitachi Cable America Inc.]
 - c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Superior Essex Inc.; subsidiary of LS Corp.]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [CommScope, Inc]

- b. [Hitachi Cable America Inc.]
 - c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Superior Essex Inc.; subsidiary of LS Corp.]
 - e. <Insert manufacturer's name>
- 3. Product Marking: Type CMR-LSHF; Category 6.
 - 4. Options:
 - a. Quantity of Pairs: [24][Four]<Insert number>.
 - b. Shielding/Screening: [UTP][FTP][F/UTP][F/FTP].
 - c. Jacket: [White][Gray][Blue][Yellow]<Insert color> thermoplastic.

2.2 COMMUNICATIONS-, AUDIO/VIDEO-, DATA-, AND OTHER SIGNALING-CIRCUIT ACCESSORIES

- A. Description: This category covers devices intended for use in residential or commercial communications-station applications for connections to communications circuit as defined in Article 800 of NFPA 70.
- B. Performance Criteria:
 - 1. Regulatory Requirements:
 - a. Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - b. <Insert requirements>.
 - 2. Listing Criteria:
 - a. Communications-Circuit Accessories: UL CCN DUXR; including UL 1863.
 - b. Audio/Video-, Data-, and Other Signaling-Circuit Accessories: UL CCN DUXR; including UL 1977.
 - c. For Use in Air-Handling Spaces: UL 2043.
- C. Source Quality Control:
 - 1. Product Data: Prepare and submit catalog cuts, brochures, and performance data illustrating size, physical appearance, and other characteristics of product.
 - 2. Manufacturer's Published Instructions: Prepare and submit installation, testing, and operating instructions for product.
- D. UL DUXR - Connecting Block :
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [CommScope, Inc]
 - b. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - c. [Leviton Manufacturing Co., Inc.]
 - d. [Panduit Corp]

- e. **[Siemon Co. (The)]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[CommScope, Inc]**
 - b. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **[Panduit Corp]**
 - e. **[Siemon Co. (The)]**
 - f. **<Insert manufacturer's name>**
3. Options:
- a. Configuration: **[110-style IDC for Category 5e][110-style IDC for Category 6][66-style IDC for Category 5e]**.
 - b. Quantity of Terminations: Number of cables terminated on block, plus **[25]<Insert number>** percent spare, integral with connector bodies, including plugs and jacks where indicated.
- E. UL DUXR - Cross-Connect :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Panduit Corp]**
 - d. **[Siemon Co. (The)]**
 - e. **[TE Connectivity Ltd.]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Panduit Corp]**
 - d. **[Siemon Co. (The)]**
 - e. **[TE Connectivity Ltd.]**
 - f. **<Insert manufacturer's name>**
3. Options:
- a. Number of Terminals per Field: **[One]<Insert number>** for each conductor in assigned cables.
 - b. Performance Rating: **[Category 5e][Category 6][Category 6A][Category 8]**.
- F. UL DUXR - Patch Panel :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Panduit Corp]**
 - f. **[Siemon Co. (The)]**
 - g. **[TE Connectivity Ltd.]**
 - h. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **[Panduit Corp]**
 - f. **[Siemon Co. (The)]**
 - g. **[TE Connectivity Ltd.]**
 - h. **<Insert manufacturer's name>**

3. General Characteristics:
 - a. Universal T568A and T568B wiring labels.
 - b. Labeling areas adjacent to conductors.
 - c. Replaceable connectors.
 - d. 24 or 48 ports.
 - e. Construction: 16-gauge steel and mountable on **19 inch (483 mm)** equipment racks.

4. Options:
 - a. Number of Jacks per Field: One for each four-pair **[twisted-pair cable indicated][conductor group of indicated cables, plus spares and blank positions adequate to suit specified expansion criteria]**.
 - b. Performance Rating: **[Category 5e][Category 6][Category 6A][Category 8]**.

G. UL DUXR - 8P8C Plugs and Plug Assemblies :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**

- d. [Leviton Manufacturing Co., Inc.]
 - e. [Molex Premise Networks]
 - f. [Panduit Corp]
 - g. [Siemon Co. (The)]
 - h. [TE Connectivity Ltd.]
 - i. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Leviton Manufacturing Co., Inc.]
 - e. [Molex Premise Networks]
 - f. [Panduit Corp]
 - g. [Siemon Co. (The)]
 - h. [TE Connectivity Ltd.]
 - i. <Insert manufacturer's name>
 3. General Characteristics:
 - a. Male; 8P8C; color-coded modular telecommunications connector designed for termination of a single, four-pair, 100 Ω UTP or FTP cable.
 - b. Marked to indicate transmission performance.
 4. Options:
 - a. Performance Rating: [Category 5e][Category 6][Category 6A][Category 8].
- H. UL DUXR - 8P8C Jacks and Jack Assemblies :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 - d. [Leviton Manufacturing Co., Inc.]
 - e. [Molex Premise Networks]
 - f. [Panduit Corp]
 - g. [Siemon Co. (The)]
 - h. [TE Connectivity Ltd.]
 - i. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]

- c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- d. [Leviton Manufacturing Co., Inc.]
- e. [Molex Premise Networks]
- f. [Panduit Corp]
- g. [Siemon Co. (The)]
- h. [TE Connectivity Ltd.]
- i. <Insert manufacturer's name>

3. General Characteristics:

- a. Female; 8P8C; color-coded modular telecommunications connector designed for termination of a single, four-pair, 100 Ω UTP or FTP cable.
- b. Designed to snap into patch panel or cover plate.
- c. Marked to indicate transmission performance.

4. Options:

- a. Performance Rating: [Category 5e][Category 6][Category 6A][Category 8].

I. UL DUXR - Patch Cords :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Belden Inc.]
- b. [CommScope, Inc]
- c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- d. [Leviton Manufacturing Co., Inc.]
- e. [Molex Premise Networks]
- f. [Panduit Corp]
- g. [Siemon Co. (The)]
- h. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Belden Inc.]
- b. [CommScope, Inc]
- c. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
- d. [Leviton Manufacturing Co., Inc.]
- e. [Molex Premise Networks]
- f. [Panduit Corp]
- g. [Siemon Co. (The)]
- h. <Insert manufacturer's name>

3. General Characteristics:

- a. Factory-made, four-pair cables; terminated with an 8P8C plug at each end.
- b. Bend-relief-compliant boots and color-coded icons to ensure Category 6 performance.

- c. Latch guards to protect against snagging.
 - d. Color-coded boots for circuit identification.
- 4. Options:
 - a. Length: **[3 ft (0.9 m)][4 ft (1.2 m)]<Insert length>**.
 - b. Performance Rating: **[Category 5e][Category 6][Category 6A][Category 8]**.
- J. Accessories:
 - 1. Spare Parts: Furnish to Owner spare parts, for repairing cable assemblies and accessories, that are packaged with protective covering for storage on-site and identified with labels describing contents. **[Include the following:]**
 - a. Connecting Blocks: **[One]<Insert number>** of each type.
 - b. Patch Panels: **[One]<Insert number>** of each type.
 - c. Plugs: **[Ten]<Insert number>** of each type.
 - d. Jacks: **[Ten]<Insert number>** of each type.
 - 2. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to cable assemblies and accessories, that are packaged with protective covering for storage on-site and identified with labels describing contents. **[Include the following:]**
 - a. **<Insert name of special tool>**.

PART 3 - EXECUTION

3.1 PREPARATION

- A. Shop Drawings: Prepare and submit the following:
 - 1. Cable Labeling Schedules: Submit electronic files **[using software and format requested by Owner]**.
 - 2. Cabling Administration Diagrams: Submit diagrams and supporting electronic files **[using software and format requested by Owner]**.
 - a. Coordinate layout and installation of telecommunications pathways and cabling with Owner's telecommunications and LAN equipment and service suppliers.
 - 3. Wiring Diagrams:
 - a. Telecommunications rooms plans and elevations.
 - b. Telecommunications pathways.
 - c. Telecommunications system access points.
 - d. Telecommunications grounding system.
 - e. Cross-connects.
 - f. Patch panels.
 - g. Patch cords.
 - 4. Cross-Connect and Patch Panel Details: Include mounting assemblies, elevations, and physical relationship between installed components.
 - 5. Twisted-Pair Cable Testing Plan: Include list of cables to be tested, identification of tests to be

performed, pass/fail criteria, and copy of testing procedures (may be separate volume). Indicate Installer's required tests for warranty compliance.

3.2 SELECTION OF COMMUNICATIONS COPPER BACKBONE CABLING

A. Air-Handling Spaces:

1. Type CMP[**in listed plenum communications raceway**][**in listed cable routing assembly**].
2. Type CMR or Type CMP[, **Type CM, Type CMG, or Type CMX**] in metallic conduit installed in accordance with Rule 300.22 of NFPA 70.

B. Vertical Chases:

1. Type CMR.
2. Type CMP or Type CMR[**in listed plenum or riser communications raceway**][**in metallic conduit installed in accordance with Rule 300.22 of NFPA 70**].

3.3 INSTALLATION OF COMMUNICATIONS COPPER BACKBONE CABLING

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation:

1. Communications Cable Assemblies: Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with BICSI N1.
2. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Cabling system consists of backbone cables, intermediate and main cross-connects, mechanical terminations, and patch cords or jumpers used for backbone-to-backbone cross-connection.
 - a. Provide interconnections between communications equipment rooms, main terminal space, and entrance facilities in the telecommunications cabling system structure.
 - b. Backbone cabling cross-connects may be located in communications equipment rooms or at entrance facilities. Bridged taps and splitters may not be used as part of backbone cabling.
2. Drawings indicate general arrangement of pathways and fittings.
3. Wiring Methods:
 - a. Raceway and Tray: Install cables in raceways and cable trays, except within consoles, cabinets, desks, and counters[**and except in accessible ceiling spaces, attics, and gypsum board partitions where unenclosed wiring method may be used**]. Conceal raceway and cables, except in unfinished spaces.
 - 1) Install plenum cable in environmental air spaces, including plenum ceilings.
 - 2) Comply with requirements for raceways and boxes specified in Section 270528 "Pathways for Communications Systems."
 - b. Open-Cable: Route conductors and cables in accessible ceilings, walls, and floors where possible.

- c. Within Enclosures: Bundle, lace, and train cables within enclosures. Connect to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools. Install cables parallel with or at right angles to sides and back of enclosure.
4. General Requirements for Cabling:
- a. Install 110-style IDC termination hardware unless otherwise indicated.
 - b. Do not untwist twisted-pair cables more than **1/2 inch (12 mm)** from the point of termination to maintain cable geometry.
 - c. Terminate all conductors; no cable may contain unterminated elements. Make terminations only at indicated outlets, terminals, cross-connects, and patch panels.
 - d. Cables may not be spliced. Secure and support cables at intervals not exceeding **30 inch (760 mm)** and not more than **6 inch (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
 - e. Install lacing bars to restrain cables, prevent straining connections, and prevent bending cables to smaller radii than minimums recommended by manufacturer.
 - f. Bundle, lace, and train conductors to terminal points without exceeding manufacturer's limitations on bending radii. Use lacing bars and distribution spools.
 - g. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation, and replace it with new cable.
 - h. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps may not be used for heating.
 - i. In the communications equipment room, install **10 ft (3 m)** long service loop on each end of cable.
 - j. Pulling Cable: Monitor cable pull tensions.
5. Open-Cable Installation:
- a. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
 - b. Suspend twisted-pair cabling, not in a wireway or pathway, a minimum of **8 inch (200 mm)** above ceilings by cable supports not more than **[5 ft (1.5 m)]<Insert dimension>** apart.
 - c. Cable may not be run through structural members or in contact with pipes, ducts, or other potentially damaging items.
6. Installation of Cable Routed Exposed under Raised Floors:
- a. Install plenum-rated cable only.
 - b. Install cabling after the flooring system has been installed in raised floor areas.
 - c. Coil cable **[6 ft (1.8 m)]<Insert dimension>** long not less than **[12 inch (300 mm)]<Insert dimension>** in diameter below each feed point.
7. Group connecting hardware for cables into separate logical fields.
8. Separation from EMI Sources:
- a. Comply with BICSI N1 for separating unshielded copper communication cable from potential EMI sources, including electrical power lines and equipment.
 - b. Separate open communications cables or cables in nonmetallic raceways from unshielded power conductors and electrical equipment as follows:
 - 1) Power Rating Less Than 2 kVA: Minimum **5 inch (127 mm)**.
 - 2) Power Rating between 2 and 5 kVA: Minimum **12 inch (300 mm)**.
 - 3) Power Rating More Than 5 kVA: Minimum **24 inch (600 mm)**.

- c. Separate communications cables in grounded metallic raceways from unshielded power lines or electrical equipment as follows:
 - 1) Power Rating Less Than 2 kVA: Minimum **2-1/2 inch (64 mm)**.
 - 2) Power Rating between 2 and 5 kVA: Minimum **6 inch (150 mm)**.
 - 3) Power Rating More Than 5 kVA: Minimum **12 inch (300 mm)**.
 - d. Separate communications cables in grounded metallic raceways from power lines and electrical equipment located in grounded metallic conduits or enclosures as follows:
 - 1) Power Rating Less Than 2 kVA: No minimum distance.
 - 2) Power Rating between 2 and 5 kVA: Minimum **3 inch (76 mm)**.
 - 3) Power Rating More Than 5 kVA: Minimum **6 inch (150 mm)**.
 - e. Separate communications cables from electrical motors and transformers rated 5 kVA or 5 HP and larger minimum **48 inch (1200 mm)**.
 - f. Separate communications cables from fluorescent luminaires minimum **5 inch (127 mm)**.
9. Identify system components, wiring, and cabling in accordance with TIA-606.
 - a. Color-code cross-connect fields and apply colors to voice and data service backboards, connections, covers, and labels.
 - b. Paint and label colors for equipment identification must comply with TIA-606 for **[Class 2][Class 3][Class 4]** level of administration[, **including optional identification requirements of this standard**].
10. Cable and Wire Identification:
 - a. Label each cable within **4 inch (100 mm)** of each termination and tap, where it is accessible in cabinet or junction or outlet box, and elsewhere as indicated.
 - b. Each wire connected to building-mounted devices is not required to be numbered at device if wire color is consistent with associated wire connected and numbered within panel or cabinet.
 - c. Exposed Cables and Cables in Cable Trays and Wire Troughs: Label each cable at intervals not exceeding **15 ft (4.5 m)**.
 - d. Label each terminal strip, and screw terminal in each cabinet, rack, or panel.
 - 1) Individually number wiring conductors connected to terminal strips, and identify each cable or wiring group, extended from panel or cabinet to building-mounted device, with name and number of particular device.
 - 2) Label each unit and field within distribution racks and frames.
 - e. Identification within Connector Fields in Equipment Rooms and Wiring Closets: Label each connector and each discrete unit of cable-terminating and -connecting hardware. Where similar jacks and plugs are used for both voice and data communication cabling, use different color for jacks and plugs of each service.
11. Cable Schedule: Install in prominent location in each equipment room and wiring closet. List incoming and outgoing cables and their designations, origins, and destinations. Protect with rigid frame and clear plastic cover. Furnish electronic copy of final comprehensive schedules for Project.
12. Cabling Administration Drawings: Show building floor plans with cabling administration-point labeling. Identify labeling convention and show labels for telecommunications closets, **[backbone pathways and cables,][entrance pathways and cables,]** terminal hardware and positions, horizontal cables, work areas and workstation terminal positions, grounding buses and pathways,

- and equipment grounding conductors.
13. **<Insert more stringent installation requirements that supplement or supersede listed standards and manufacturers' published instructions>.**

D. Interfaces with Other Work:

1. Entrance Facilities: Coordinate backbone cabling with Section 271100 "Communications Equipment Room Fittings" for cabinets, racks, and protectors and demarcation point provided by communications service provider.
2. Coordinate with Section 078413 "Penetration Firestopping" for sealing fire-rated penetrations.
3. Coordinate with Section 260533.16 "Boxes and Covers for Electrical Systems" for installation of outlet boxes and cover plates.
4. Coordinate with Section 270526 "Grounding and Bonding for Communications Systems" for grounding communications cabling and connectors.
5. Coordinate with Section 270528 "Pathways for Communications Systems" for installation of provisions for routing and terminating cable assemblies.
6. Coordinate with Section 270529 "Hangers and Supports for Communications Systems" for installation of cable supports.
7. Coordinate with Section 270536 "Cable Trays for Communications Systems" for installation of cable trays.
8. Coordinate installation of new products for **<Insert system or product family/category>** with existing conditions.
 - a. **<Insert requirements for transition between new and existing>.**
9. Coordinate with **<Insert Section number and title>** for **<Insert description of interfacing related Work>.**
 - a. **<Insert requirements for transition between this Section and related Work>.**

3.4 FIELD QUALITY CONTROL OF COMMUNICATIONS COPPER BACKBONE CABLING

A. Acceptance Testing Preparation:

1. **<Insert requirements>.**

B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>.**

C. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. Visually inspect jacket materials for certification markings. Inspect cabling terminations in communications equipment rooms for compliance with color-coding for pin assignments, and inspect cabling connections for compliance with TIA-568.1.
3. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
4. Test cabling for DC loop resistance, shorts, opens, intermittent faults, and polarity between conductors. Test operation of shorting bars in connection blocks. Test cables after termination but not cross-connection.
 - a. Test instruments must meet or exceed applicable requirements in TIA-568.2. Perform tests with a tester that complies with performance requirements in "Test Instruments (Normative)" Annex, complying with measurement accuracy specified in "Measurement Accuracy (Informative)" Annex. Use only test cords and adapters that are qualified by test

equipment manufacturer for channel or link test configuration.

D. Nonconforming Work:

1. Cable assemblies will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective cable assemblies and retest.

E. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

3.5 PROTECTION

- A. After installation, protect cable assemblies and accessories from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

END OF SECTION 27 13 13 00

27 - Communications

Task	Specification	Specification Description
27 13 13 13	26 05 13 00	Medium-Voltage Cables
27 13 13 13	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
27 13 13 13	27 13 13 00	Communications Copper Backbone Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 27 13 23 00 - COMMUNICATIONS OPTICAL FIBER BACKBONE CABLING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Type OFNR optical fiber cable.
2. Type OFCR optical fiber cable.
3. Type OFNP optical fiber cable.
4. Type OFCP optical fiber cable.
5. Types OFN and OFNG optical fiber cable.
6. Types OFC and OFCG optical fiber cable.
7. Optical fiber cable hardware.

1.2 DEFINITIONS

- A. Conductive Cable: Cable containing non-current-carrying electrically-conductive members such as metallic strength members and metallic vapor barriers.
- B. Cross-Connect: A facility enabling termination of cable elements and their interconnection or cross-connection.
- C. Type OFCP: Conductive cable for use in plenums, ducts, and other spaces used for environmental air.
- D. Type OFCR: Conductive cable for use as riser in vertical shafts or from floor to floor.
- E. Type OFNP: Nonconductive cable for use in plenums, ducts, and other spaces used for environmental air.
- F. Type OFNR: Nonconductive cable for use as riser in vertical shafts or from floor to floor.
- G. Types OFC and OFCG: Conductive cable for general purpose use.
- H. Types OFN and OFNG: Nonconductive cable for general purpose use.

1.3 COORDINATION

- A. Coordinate layout and installation of telecommunications pathways and cabling with Owner's telecommunications and LAN equipment and service suppliers.

1.4 ACTION SUBMITTALS

A. Product Data:

1. Type OFNR optical fiber cable.
2. Type OFCR optical fiber cable.
3. Type OFNP optical fiber cable.

4. Type OFCP optical fiber cable.
5. Types OFN and OFNG optical fiber cable.
6. Types OFC and OFCG optical fiber cable.
7. Optical fiber cable hardware.

B. Shop Drawings:

1. System Labeling Schedules:

- a. Electronic copy of labeling schedules, in software and format selected by Owner.
- b. Electronic copy of labeling schedules that are part of cabling and asset identification system of software.

2. Cabling administration drawings and printouts.

3. Wiring diagrams showing typical schematic arrangement, including the following:

- a. Telecommunications rooms plans and elevations.
- b. Telecommunications pathways.
- c. Telecommunications system access points.
- d. Telecommunications grounding system.
- e. Cross-connects.
- f. Patch panels.
- g. Patch cords.

4. Cross-Connect and Patch-Panel Drawings: Detail mounting assemblies and show elevations and physical relationship between installed components.

C. Certificates: For each type of product.

D. Field Quality-Control Reports: Optical fiber cable testing plan.

E. Sustainable Design Submittals:

1. Product Data: For each conductor and cable indicating lead content.
2. Environmental Product Declaration: For each product.
3. Health Product Declaration: For each product.
4. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
5. Environmental Product Declaration: For each product.
6. Environmental Product Declaration: For each product.
7. Environmental Product Declaration: For each product.
8. Third-Party Certifications: For each product.
9. Third-Party Certified Life Cycle Assessment: For each product.

1.5 INFORMATIONAL SUBMITTALS

A. Source quality-control reports.

1.6 CLOSEOUT SUBMITTALS

A. Maintenance Contracts:

1. Software service agreement.

- B. Maintenance Data: For optical fiber cable, splices, and connectors.

1.7 MAINTENANCE MATERIAL SUBMITTALS

- A. Extra Stock Material: Furnish to Owner extra materials[, **from same production run,**] that match products installed and that are packaged with protective covering for storage and identified with labels describing contents. [**Include the following:**]
 - 1. Patch-Panel Units: [**One**]<Insert number> of each type.
 - 2. Plugs: [**10**]<Insert number> of each type.
 - 3. Jacks: [**10**]<Insert number> of each type.

1.8 DELIVERY, STORAGE, AND HANDLING

- A. Environmental Limitations: Do not deliver or install cables and connecting materials until wet-work in spaces is complete and dry, and temporary HVAC system is operating and maintaining ambient temperature and humidity conditions at occupancy levels during remainder of construction period.
- B. Test cables upon receipt at Project site.
 - 1. Test optical fiber cable to determine continuity of strand end to end. Use [**optical fiber flashlight**][or][**optical loss test set**]<Insert test instrument>.
 - 2. Test optical fiber cable while on reels. Use optical time domain reflectometer to verify cable length and locate cable defects, splices, and connector, including loss value of each. Retain test data and include record in maintenance data.

PART 2 - PRODUCTS

2.1 TYPE OFNR OPTICAL FIBER CABLE

- A. Type OFNR Optical Fiber Cable: This category covers jacketed optical fiber cable for use as risers in vertical runs in shaft or between floors within buildings in accordance with Article 770 of NFPA 70 containing no electrically conductive materials.
- B. Performance Criteria:
 - 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - 2. Listing Criteria: UL CCN QAYK; including UL 1651.
 - 3. General Characteristics:
 - a. Performance: TIA-568.3.
 - b. Inside Plant Mechanical Properties: ICEA S-83-596.
 - c. Inside-Outside Plant Mechanical Properties: ICEA S-104-696.
 - d. Jacket:
 - 1) Cable cordage jacket, fiber, unit, and group color in accordance with TIA-598.
 - 2) Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed **40 inch (1 m)**.

C. Type OFNR, Designation OM1, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Berk-Tek, a Leviton Company]**
 - c. **[CommScope, Inc]**
 - d. **[Corning Optical Communications; Corning Incorporated]**
 - e. **[General Cable; Prysmian Group North America]**
 - f. **[Hitachi Cable America Inc.]**
 - g. **[Mohawk; a division of Belden Networking, Inc.]**
 - h. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - i. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - j. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Berk-Tek, a Leviton Company]**
 - c. **[CommScope, Inc]**
 - d. **[Corning Optical Communications; Corning Incorporated]**
 - e. **[General Cable; Prysmian Group North America]**
 - f. **[Hitachi Cable America Inc.]**
 - g. **[Mohawk; a division of Belden Networking, Inc.]**
 - h. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - i. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - j. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492AAAA; 62.5 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 200 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration: **[4][6][8][12][24][48]<Insert number>-fiber**, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: **[3.50 dB/km]<Insert dB/km>** at 850 nm wavelength; **[1.5 dB/km]<Insert dB/km>** at 1300 nm wavelength.
 - c. Jacket Color: **[Orange]<Insert color>**.

D. Type OFNR, Designation OM2, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[AMP NETCONNECT; a TE Connectivity Ltd. company]**

- b. [Belden Inc.]
 - c. [Berk-Tek, a Leviton Company]
 - d. [CommScope, Inc]
 - e. [Corning Optical Communications; Corning Incorporated]
 - f. [General Cable; Prysmian Group North America]
 - g. [Hitachi Cable America Inc.]
 - h. [Superior Essex Inc.; subsidiary of LS Corp.]
 - i. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [Berk-Tek, a Leviton Company]
 - d. [CommScope, Inc]
 - e. [Corning Optical Communications; Corning Incorporated]
 - f. [General Cable; Prysmian Group North America]
 - g. [Hitachi Cable America Inc.]
 - h. [Superior Essex Inc.; subsidiary of LS Corp.]
 - i. <Insert manufacturer's name>
 3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492AAAB; 50 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 5. Options:
 - a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
 - c. Jacket Color: [Orange]<Insert color>.
- E. Type OFNR, Designation OM3, Multimode Optical Fiber Cable :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [CommScope, Inc]
 - d. [Corning Optical Communications; Corning Incorporated]
 - e. [Hitachi Cable America Inc.]
 - f. [TE Connectivity Ltd.]
 - g. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [CommScope, Inc]
 - d. [Corning Optical Communications; Corning Incorporated]
 - e. [Hitachi Cable America Inc.]
 - f. [TE Connectivity Ltd.]
 - g. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492AAAC; 850 nm laser-optimized, 50 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 1500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - c. Minimum Effective Modal Bandwidth-Length Product: 2000 MHz-km at 850 nm wavelength.
 5. Options:
 - a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
 - c. Jacket Color: [Aqua]<Insert color>.

F. Type OFNR, Designation OM4, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Corning Optical Communications; Corning Incorporated]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. [TE Connectivity Ltd.]
 - h. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Corning Optical Communications; Corning Incorporated]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. [TE Connectivity Ltd.]
 - h. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.

4. Additional Characteristics:

- a. Construction: TIA-492AAAD; 850 nm laser-optimized, 50 μm core diameter, 125 μm cladding diameter.
- b. Minimum Overfilled Modal Bandwidth-Length Product: 3500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
- c. Minimum Effective Modal Bandwidth-Length Product: 4700 MHz-km at 850 nm wavelength.

5. Options:

- a. Configuration: **[4][6][8][12][24][48]<Insert number>**-fiber, tight buffer, optical fiber cable.
- b. Maximum Attenuation: **[3.50 dB/km]<Insert dB/km>** at 850 nm wavelength; **[1.5 dB/km]<Insert dB/km>** at 1300 nm wavelength.
- c. Jacket Color: **[Aqua]<Insert color>**.

G. Type OFNR, Designation OS1, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Corning Optical Communications; Corning Incorporated]**
 - b. **[General Cable; Prysmian Group North America]**
 - c. **[Mohawk; a division of Belden Networking, Inc.]**
 - d. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - e. **[TE Connectivity Ltd.]**
 - f. **<Insert manufacturer's name>**
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Corning Optical Communications; Corning Incorporated]**
 - b. **[General Cable; Prysmian Group North America]**
 - c. **[Mohawk; a division of Belden Networking, Inc.]**
 - d. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - e. **[TE Connectivity Ltd.]**
 - f. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 μm core diameter, 125 μm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
- 5. Options:
 - a. Configuration:
 - 1) **[6][8][12]**-fiber, single loose tube, optical fiber cable.
 - 2) **[24][36][48][72][96][144]**-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: **[0.5 dB/km]<Insert dB/km>** at 1310 nm wavelength; **[0.5**

dB/km<Insert dB/km> at 1550 nm wavelength.

c. Jacket Color: **[Yellow]**<Insert color>.

H. Type OFNR, Designation OS2, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[3M]**
 - b. **[Belden Inc.]**
 - c. **[Berk-Tek, a Leviton Company]**
 - d. **[CommScope, Inc]**
 - e. **[Hitachi Cable America Inc.]**
 - f. **[Mohawk; a division of Belden Networking, Inc.]**
 - g. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[3M]**
 - b. **[Belden Inc.]**
 - c. **[Berk-Tek, a Leviton Company]**
 - d. **[CommScope, Inc]**
 - e. **[Hitachi Cable America Inc.]**
 - f. **[Mohawk; a division of Belden Networking, Inc.]**
 - g. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - h. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 µm core diameter, 125 µm cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:
 - 1) **[6][8][12]**-fiber, single loose tube, optical fiber cable.
 - 2) **[24][36][48][72][96][144]**-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: **[0.5 dB/km]**<Insert dB/km> at 1310 nm wavelength; **[0.5 dB/km]**<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: **[Yellow]**<Insert color>.

I. Type OFNR, Designation OS1, Inside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [CommScope, Inc]
 - b. [Corning Optical Communications; Corning Incorporated]
 - c. [General Cable; Prysmian Group North America]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [CommScope, Inc]
 - b. [Corning Optical Communications; Corning Incorporated]
 - c. [General Cable; Prysmian Group North America]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
- a. Construction: TIA-492CAAA; 9 μm core diameter, 125 μm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
- a. Configuration: [6][8][12][24][36][48][72][96][144] fibers, tight buffered, optical fiber cable.
 - b. Maximum Attenuation: [1.0 dB/km]<Insert dB/km> at 1310 nm wavelength; [1.0 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
- J. Type OFNR, Designation OS2, Inside Plant, Single-Mode Optical Fiber Cable :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [CommScope, Inc]
 - d. [General Cable; Prysmian Group North America]
 - e. [Hitachi Cable America Inc.]
 - f. [Mohawk; a division of Belden Networking, Inc.]
 - g. [Superior Essex Inc.; subsidiary of LS Corp.]
 - h. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [CommScope, Inc]
 - d. [General Cable; Prysmian Group North America]
 - e. [Hitachi Cable America Inc.]
 - f. [Mohawk; a division of Belden Networking, Inc.]
 - g. [Superior Essex Inc.; subsidiary of LS Corp.]
 - h. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 µm core diameter, 125 µm cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 5. Options:
 - a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.

2.2 TYPE OFCR OPTICAL FIBER CABLE

- A. Type OFCR Optical Fiber Cable: This category covers jacketed optical fiber cable for use as risers in vertical runs in shaft or between floors within buildings in accordance with Article 770 of NFPA 70 containing noncurrent-carrying electrically conductive materials.
- B. Performance Criteria:
 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 2. Listing Criteria: UL CCN QAYK; including UL 1651.
 3. General Characteristics:
 - a. Performance: TIA-568.3.
 - b. Inside Plant Mechanical Properties: ICEA S-83-596.
 - c. Inside-Outside Plant Mechanical Properties: ICEA S-104-696.
 - d. Jacket:
 - 1) Cable cordage jacket, fiber, unit, and group color in accordance with TIA-598.
 - 2) Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed 40 inch (1 m).
- C. Type OFCR, Designation OM1, Multimode Optical Fiber Cable :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Belden Inc.]
- b. [Berk-Tek, a Leviton Company]
- c. [CommScope, Inc]
- d. [Corning Optical Communications; Corning Incorporated]
- e. [General Cable; Prysmian Group North America]
- f. [Hitachi Cable America Inc.]
- g. [Mohawk; a division of Belden Networking, Inc.]
- h. [Prysmian Cables and Systems; Prysmian Group North America]
- i. [Superior Essex Inc.; subsidiary of LS Corp.]
- j. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [Belden Inc.]
- b. [Berk-Tek, a Leviton Company]
- c. [CommScope, Inc]
- d. [Corning Optical Communications; Corning Incorporated]
- e. [General Cable; Prysmian Group North America]
- f. [Hitachi Cable America Inc.]
- g. [Mohawk; a division of Belden Networking, Inc.]
- h. [Prysmian Cables and Systems; Prysmian Group North America]
- i. [Superior Essex Inc.; subsidiary of LS Corp.]
- j. <Insert manufacturer's name>

3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:

- a. Construction: TIA-492AAAA; 62.5 μm core diameter, 125 μm cladding diameter.
- b. Minimum Overfilled Modal Bandwidth-Length Product: 200 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.

5. Options:

- a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
- b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
- c. Jacket Color: [Orange]<Insert color>.
- d. Armor: [Steel][Aluminum].

- D. Type OFCR, Designation OM2, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Belden Inc.]
- b. [Berk-Tek, a Leviton Company]
- c. [CommScope, Inc]
- d. [Corning Optical Communications; Corning Incorporated]

- e. **[General Cable; Prysmian Group North America]**
 - f. **[Hitachi Cable America Inc.]**
 - g. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Berk-Tek, a Leviton Company]**
 - c. **[CommScope, Inc]**
 - d. **[Corning Optical Communications; Corning Incorporated]**
 - e. **[General Cable; Prysmian Group North America]**
 - f. **[Hitachi Cable America Inc.]**
 - g. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - h. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492AAAB; 50 μm core diameter, 125 μm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 5. Options:
 - a. Configuration: **[4][6][8][12][24][48]<Insert number>**-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: **[3.50 dB/km]<Insert dB/km>** at 850 nm wavelength; **[1.5 dB/km]<Insert dB/km>** at 1300 nm wavelength.
 - c. Jacket Color: **[Orange]<Insert color>**.
 - d. Armor: **[Steel][Aluminum]**.
- E. Type OFCR, Designation OM3, Multimode Optical Fiber Cable :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Corning Optical Communications; Corning Incorporated]**
 - d. **[Hitachi Cable America Inc.]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[CommScope, Inc]**
 - c. **[Corning Optical Communications; Corning Incorporated]**
 - d. **[Hitachi Cable America Inc.]**
 - e. **<Insert manufacturer's name>**

3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492AAAC; 850 nm laser-optimized, 50 μ m core diameter, 125 μ m cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 1500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - c. Minimum Effective Modal Bandwidth-Length Product: 2000 MHz-km at 850 nm wavelength.
5. Options:
 - a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
 - c. Jacket Color: [Aqua]<Insert color>.
 - d. Armor: [Steel][Aluminum].

F. Type OFCR, Designation OM4, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Corning Optical Communications; Corning Incorporated]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert **manufacturer's name; product name or designation**> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Corning Optical Communications; Corning Incorporated]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492AAAD; 850 nm laser-optimized, 50 μ m core diameter, 125 μ m cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 3500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - c. Minimum Effective Modal Bandwidth-Length Product: 4700 MHz-km at 850 nm wavelength.
5. Options:

- a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
- b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
- c. Jacket Color: [Aqua]<Insert color>.
- d. Armor: [Steel][Aluminum].

G. Type OFCR, Designation OS1, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Corning Optical Communications; Corning Incorporated]
 - b. [General Cable; Prysmian Group North America]
 - c. [Mohawk; a division of Belden Networking, Inc.]
 - d. [Superior Essex Inc.; subsidiary of LS Corp.]
 - e. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Corning Optical Communications; Corning Incorporated]
 - b. [General Cable; Prysmian Group North America]
 - c. [Mohawk; a division of Belden Networking, Inc.]
 - d. [Superior Essex Inc.; subsidiary of LS Corp.]
 - e. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].

H. Type OFCR, Designation OS2, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Belden Inc.]
 - b. [Berk-Tek, a Leviton Company]
 - c. [CommScope, Inc]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [Berk-Tek, a Leviton Company]
 - c. [CommScope, Inc]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 µm core diameter, 125 µm cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].
- I. Type OFCR, Designation OS1, Inside Plant, Single-Mode Optical Fiber Cable :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [CommScope, Inc]
 - b. [Corning Optical Communications; Corning Incorporated]
 - c. [General Cable; Prysmian Group North America]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert

manufacturer's name; product name or designation> or comparable product by one of the following:

- a. **[CommScope, Inc]**
 - b. **[Corning Optical Communications; Corning Incorporated]**
 - c. **[General Cable; Prysmian Group North America]**
 - d. **[Hitachi Cable America Inc.]**
 - e. **[Mohawk; a division of Belden Networking, Inc.]**
 - f. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - g. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 5. Options:
 - a. Configuration: **[6][8][12][24][36][48][72][96][144]** fibers, tight buffered, optical fiber cable.
 - b. Maximum Attenuation: **[1.0 dB/km]<Insert dB/km>** at 1310 nm wavelength; **[1.0 dB/km]<Insert dB/km>** at 1550 nm wavelength.
 - c. Jacket Color: **[Yellow]<Insert color>**.
 - d. Armor: **[Steel][Aluminum]**.

J. Type OFCR, Designation OS2, Inside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[CommScope, Inc]**
 - b. **[General Cable; Prysmian Group North America]**
 - c. **[Hitachi Cable America Inc.]**
 - d. **[Mohawk; a division of Belden Networking, Inc.]**
 - e. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[CommScope, Inc]**
 - b. **[General Cable; Prysmian Group North America]**
 - c. **[Hitachi Cable America Inc.]**
 - d. **[Mohawk; a division of Belden Networking, Inc.]**
 - e. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 µm core diameter, 125 µm cladding diameter, with low

- water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
- a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].

2.3 TYPE OFNP OPTICAL FIBER CABLE

- A. Type OFNP Optical Fiber Cable: This category covers jacketed optical fiber cable for use in vertical runs in plenums, ducts, or other spaces used for environmental air within buildings in accordance with Article 770 of NFPA 70 containing no electrically conductive materials.
- B. Performance Criteria:
- 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - 2. Listing Criteria: UL CCN QAYK; including UL 1651.
 - 3. General Characteristics:
 - a. Performance: TIA-568.3.
 - b. Inside Plant Mechanical Properties: ICEA S-83-596.
 - c. Inside-Outside Plant Mechanical Properties: ICEA S-104-696.
 - d. Jacket:
 - 1) Cable cordage jacket, fiber, unit, and group color in accordance with TIA-598.
 - 2) Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed **40 inch (1 m)**.
- C. Type OFNP, Designation OM1, Multimode Optical Fiber Cable :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [Belden Inc.]
 - b. [Berk-Tek, a Leviton Company]
 - c. [CommScope, Inc]
 - d. [Corning Optical Communications; Corning Incorporated]
 - e. [General Cable; Prysmian Group North America]
 - f. [Hitachi Cable America Inc.]
 - g. [Mohawk; a division of Belden Networking, Inc.]
 - h. [Prysmian Cables and Systems; Prysmian Group North America]
 - i. [Superior Essex Inc.; subsidiary of LS Corp.]

- j. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [Berk-Tek, a Leviton Company]
 - c. [CommScope, Inc]
 - d. [Corning Optical Communications; Corning Incorporated]
 - e. [General Cable; Prysmian Group North America]
 - f. [Hitachi Cable America Inc.]
 - g. [Mohawk; a division of Belden Networking, Inc.]
 - h. [Prysmian Cables and Systems; Prysmian Group North America]
 - i. [Superior Essex Inc.; subsidiary of LS Corp.]
 - j. <Insert manufacturer's name>
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Additional Characteristics:
 - a. Construction: TIA-492AAAA; 62.5 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 200 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
- 5. Options:
 - a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
 - c. Jacket Color: [Orange]<Insert color>.

D. Type OFNP, Designation OM2, Multimode Optical Fiber Cable :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [Berk-Tek, a Leviton Company]
 - d. [CommScope, Inc]
 - e. [Corning Optical Communications; Corning Incorporated]
 - f. [General Cable; Prysmian Group North America]
 - g. [Hitachi Cable America Inc.]
 - h. [Superior Essex Inc.; subsidiary of LS Corp.]
 - i. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [Berk-Tek, a Leviton Company]

- d. [CommScope, Inc]
 - e. [Corning Optical Communications; Corning Incorporated]
 - f. [General Cable; Prysmian Group North America]
 - g. [Hitachi Cable America Inc.]
 - h. [Superior Essex Inc.; subsidiary of LS Corp.]
 - i. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492AAAB; 50 μ m core diameter, 125 μ m cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 5. Options:
 - a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
 - c. Jacket Color: [Orange]<Insert color>.
- E. Type OFNP, Designation OM3, Multimode Optical Fiber Cable :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [CommScope, Inc]
 - d. [Corning Optical Communications; Corning Incorporated]
 - e. [Hitachi Cable America Inc.]
 - f. [TE Connectivity Ltd.]
 - g. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [CommScope, Inc]
 - d. [Corning Optical Communications; Corning Incorporated]
 - e. [Hitachi Cable America Inc.]
 - f. [TE Connectivity Ltd.]
 - g. <Insert manufacturer's name>
 3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492AAAC; 850 nm laser-optimized, 50 μ m core diameter, 125 μ m cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 1500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - c. Minimum Effective Modal Bandwidth-Length Product: 2000 MHz-km at 850 nm

wavelength.

5. Options:

- a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
- b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
- c. Jacket Color: [Aqua]<Insert color>.

F. Type OFNP, Designation OM4, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Corning Optical Communications; Corning Incorporated]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. [TE Connectivity Ltd.]
 - h. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Corning Optical Communications; Corning Incorporated]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. [TE Connectivity Ltd.]
 - h. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492AAAD; 850 nm laser-optimized, 50 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 3500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - c. Minimum Effective Modal Bandwidth-Length Product: 4700 MHz-km at 850 nm wavelength.
5. Options:
 - a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
 - c. Jacket Color: [Aqua]<Insert color>.

G. Type OFNP, Designation OS1, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Corning Optical Communications; Corning Incorporated]**
 - b. **[General Cable; Prysmian Group North America]**
 - c. **[Mohawk; a division of Belden Networking, Inc.]**
 - d. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - e. **[TE Connectivity Ltd.]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Corning Optical Communications; Corning Incorporated]**
 - b. **[General Cable; Prysmian Group North America]**
 - c. **[Mohawk; a division of Belden Networking, Inc.]**
 - d. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - e. **[TE Connectivity Ltd.]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 μ m core diameter, 125 μ m cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:
 - 1) **[6][8][12]-fiber, single loose tube, optical fiber cable.**
 - 2) **[24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.**
 - b. Maximum Attenuation: **[0.5 dB/km]<Insert dB/km>** at 1310 nm wavelength; **[0.5 dB/km]<Insert dB/km>** at 1550 nm wavelength.
 - c. Jacket Color: **[Yellow]<Insert color>**.

H. Type OFNP, Designation OS2, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Berk-Tek, a Leviton Company]**
 - b. **[CommScope, Inc]**
 - c. **[Hitachi Cable America Inc.]**
 - d. **[Mohawk; a division of Belden Networking, Inc.]**
 - e. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - f. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Berk-Tek, a Leviton Company]**
 - b. **[CommScope, Inc]**
 - c. **[Hitachi Cable America Inc.]**
 - d. **[Mohawk; a division of Belden Networking, Inc.]**
 - e. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - f. **<Insert manufacturer's name>**
 3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 μm core diameter, 125 μm cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 5. Options:
 - a. Configuration:
 - 1) **[6][8][12]**-fiber, single loose tube, optical fiber cable.
 - 2) **[24][36][48][72][96][144]**-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: **[0.5 dB/km]<Insert dB/km>** at 1310 nm wavelength; **[0.5 dB/km]<Insert dB/km>** at 1550 nm wavelength.
 - c. Jacket Color: **[Yellow]<Insert color>**.
- I. Type OFNP, Designation OS1, Inside Plant, Single-Mode Optical Fiber Cable :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[CommScope, Inc]**
 - b. **[Corning Optical Communications; Corning Incorporated]**
 - c. **[General Cable; Prysmian Group North America]**
 - d. **[Hitachi Cable America Inc.]**
 - e. **[Mohawk; a division of Belden Networking, Inc.]**
 - f. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - g. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[CommScope, Inc]**
 - b. **[Corning Optical Communications; Corning Incorporated]**
 - c. **[General Cable; Prysmian Group North America]**
 - d. **[Hitachi Cable America Inc.]**
 - e. **[Mohawk; a division of Belden Networking, Inc.]**
 - f. **[Superior Essex Inc.; subsidiary of LS Corp.]**

- g. <Insert manufacturer's name>
- 3. Source Limitations: Obtain products from single manufacturer.
- 4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 μ m core diameter, 125 μ m cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
- 5. Options:
 - a. Configuration: [6][8][12][24][36][48][72][96][144] fibers, tight buffered, optical fiber cable.
 - b. Maximum Attenuation: [1.0 dB/km]<Insert dB/km> at 1310 nm wavelength; [1.0 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
- J. Type OFNP, Designation OS2, Inside Plant, Single-Mode Optical Fiber Cable :
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [CommScope, Inc]
 - d. [General Cable; Prysmian Group North America]
 - e. [Hitachi Cable America Inc.]
 - f. [Mohawk; a division of Belden Networking, Inc.]
 - g. [Superior Essex Inc.; subsidiary of LS Corp.]
 - h. <Insert manufacturer's name>
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - b. [Belden Inc.]
 - c. [CommScope, Inc]
 - d. [General Cable; Prysmian Group North America]
 - e. [Hitachi Cable America Inc.]
 - f. [Mohawk; a division of Belden Networking, Inc.]
 - g. [Superior Essex Inc.; subsidiary of LS Corp.]
 - h. <Insert manufacturer's name>
 - 3. Source Limitations: Obtain products from single manufacturer.
 - 4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 μ m core diameter, 125 μ m cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - 5. Options:
 - a. Configuration:

- 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
- 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
- b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
- c. Jacket Color: [Yellow]<Insert color>.

2.4 TYPE OFCP OPTICAL FIBER CABLE

A. Type OFCP Optical Fiber Cable: This category covers jacketed optical fiber cable for use in vertical runs in plenums, ducts, or other spaces used for environmental air within buildings in accordance with Article 770 of NFPA 70 containing noncurrent-carrying electrically conductive materials.

B. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
2. Listing Criteria: UL CCN QAYK; including UL 1651.
3. General Characteristics:
 - a. Performance: TIA-568.3.
 - b. Inside Plant Mechanical Properties: ICEA S-83-596.
 - c. Inside-Outside Plant Mechanical Properties: ICEA S-104-696.
 - d. Jacket:
 - 1) Cable cordage jacket, fiber, unit, and group color in accordance with TIA-598.
 - 2) Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed 40 inch (1 m).

C. Type OFCP, Designation OM1, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]
 - b. [Berk-Tek, a Leviton Company]
 - c. [CommScope, Inc]
 - d. [General Cable; Prysmian Group North America]
 - e. [Hitachi Cable America Inc.]
 - f. [Mohawk; a division of Belden Networking, Inc.]
 - g. [Prysmian Cables and Systems; Prysmian Group North America]
 - h. [Superior Essex Inc.; subsidiary of LS Corp.]
 - i. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [Berk-Tek, a Leviton Company]
 - c. [CommScope, Inc]

- d. **[General Cable; Prysmian Group North America]**
 - e. **[Hitachi Cable America Inc.]**
 - f. **[Mohawk; a division of Belden Networking, Inc.]**
 - g. **[Prysmian Cables and Systems; Prysmian Group North America]**
 - h. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - i. **<Insert manufacturer's name>**
- 3. Source Limitations: Obtain products from single manufacturer.
 - 4. Additional Characteristics:
 - a. Construction: TIA-492AAAA; 62.5 μ m core diameter, 125 μ m cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 200 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - 5. Options:
 - a. Configuration: **[4][6][8][12][24][48]<Insert number>-fiber**, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: **[3.50 dB/km]<Insert dB/km>** at 850 nm wavelength; **[1.5 dB/km]<Insert dB/km>** at 1300 nm wavelength.
 - c. Jacket Color: **[Orange]<Insert color>**.
 - d. Armor: **[Steel][Aluminum]**.
- D. Type OFCP, Designation OM2, Multimode Optical Fiber Cable :
- 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Belden Inc.]**
 - b. **[Berk-Tek, a Leviton Company]**
 - c. **[CommScope, Inc]**
 - d. **[General Cable; Prysmian Group North America]**
 - e. **[Hitachi Cable America Inc.]**
 - f. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - g. **<Insert manufacturer's name>**
 - 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Belden Inc.]**
 - b. **[Berk-Tek, a Leviton Company]**
 - c. **[CommScope, Inc]**
 - d. **[General Cable; Prysmian Group North America]**
 - e. **[Hitachi Cable America Inc.]**
 - f. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - g. **<Insert manufacturer's name>**
 - 3. Source Limitations: Obtain products from single manufacturer.
 - 4. Additional Characteristics:
 - a. Construction: TIA-492AAAB; 50 μ m core diameter, 125 μ m cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.

5. Options:

- a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
- b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
- c. Jacket Color: [Orange]<Insert color>.
- d. Armor: [Steel][Aluminum].

E. Type OFCP, Designation OM3, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492AAAC; 850 nm laser-optimized, 50 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 1500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - c. Minimum Effective Modal Bandwidth-Length Product: 2000 MHz-km at 850 nm wavelength.

5. Options:

- a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
- b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
- c. Jacket Color: [Aqua]<Insert color>.
- d. Armor: [Steel][Aluminum].

F. Type OFCP, Designation OM4, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Belden Inc.]

- b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Belden Inc.]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
 3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492AAAD; 850 nm laser-optimized, 50 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 3500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 - c. Minimum Effective Modal Bandwidth-Length Product: 4700 MHz-km at 850 nm wavelength.
 5. Options:
 - a. Configuration: [4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: [3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.
 - c. Jacket Color: [Aqua]<Insert color>.
 - d. Armor: [Steel][Aluminum].
- G. Type OFCP, Designation OS1, Inside-Outside Plant, Single-Mode Optical Fiber Cable :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [General Cable; Prysmian Group North America]
 - b. [Mohawk; a division of Belden Networking, Inc.]
 - c. [Superior Essex Inc.; subsidiary of LS Corp.]
 - d. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [General Cable; Prysmian Group North America]
 - b. [Mohawk; a division of Belden Networking, Inc.]
 - c. [Superior Essex Inc.; subsidiary of LS Corp.]
 - d. <Insert manufacturer's name>

3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].

H. Type OFCP, Designation OS2, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Berk-Tek, a Leviton Company]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Berk-Tek, a Leviton Company]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 µm core diameter, 125 µm cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:

- 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].
- I. Type OFCP, Designation OS1, Inside Plant, Single-Mode Optical Fiber Cable :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [CommScope, Inc]
 - b. [General Cable; Prysmian Group North America]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [CommScope, Inc]
 - b. [General Cable; Prysmian Group North America]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
 3. Source Limitations: Obtain products from single manufacturer.
 4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
 5. Options:
 - a. Configuration: [6][8][12][24][36][48][72][96][144] fibers, tight buffered, optical fiber cable.
 - b. Maximum Attenuation: [1.0 dB/km]<Insert dB/km> at 1310 nm wavelength; [1.0 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].
- J. Type OFCP, Designation OS2, Inside Plant, Single-Mode Optical Fiber Cable :
 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [CommScope, Inc]

- b. [General Cable; Prysmian Group North America]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [CommScope, Inc]
 - b. [General Cable; Prysmian Group North America]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 µm core diameter, 125 µm cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].

2.5 TYPES OFN AND OFNG OPTICAL FIBER CABLE

- A. Types OFN and OFNG Optical Fiber Cable: This category covers jacketed optical fiber cable for general use within buildings in accordance with Article 770 of NFPA 70 containing no electrically conductive materials.
- B. Performance Criteria:
 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 2. Listing Criteria: UL CCN QAYK; including UL 1651.
 3. General Characteristics:
 - a. Performance: TIA-568.3.
 - b. Inside Plant Mechanical Properties: ICEA S-83-596.
 - c. Inside-Outside Plant Mechanical Properties: ICEA S-104-696.

d. Jacket:

- 1) Cable cordage jacket, fiber, unit, and group color in accordance with TIA-598.
- 2) Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed **40 inch (1 m)**.

C. Types OFN and OFNG, Designation OM2, Multimode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[AMP NETCONNECT; a TE Connectivity Ltd. company]**
 - b. **[Berk-Tek, a Leviton Company]**
 - c. **[CommScope, Inc]**
 - d. **[Corning Optical Communications; Corning Incorporated]**
 - e. **[General Cable; Prysmian Group North America]**
 - f. **[Hitachi Cable America Inc.]**
 - g. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - h. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[AMP NETCONNECT; a TE Connectivity Ltd. company]**
 - b. **[Berk-Tek, a Leviton Company]**
 - c. **[CommScope, Inc]**
 - d. **[Corning Optical Communications; Corning Incorporated]**
 - e. **[General Cable; Prysmian Group North America]**
 - f. **[Hitachi Cable America Inc.]**
 - g. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - h. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492AAAB; 50 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration: **[4][6][8][12][24][48]<Insert number>-fiber, tight buffer, optical fiber cable.**
 - b. Maximum Attenuation: **[3.50 dB/km]<Insert dB/km> at 850 nm wavelength; [1.5 dB/km]<Insert dB/km> at 1300 nm wavelength.**
 - c. Jacket Color: **[Orange]<Insert color>.**

D. Types OFN and OFNG, Designation OS1, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

- a. [Corning Optical Communications; Corning Incorporated]
 - b. [General Cable; Prysmian Group North America]
 - c. [Mohawk; a division of Belden Networking, Inc.]
 - d. [Superior Essex Inc.; subsidiary of LS Corp.]
 - e. [TE Connectivity Ltd.]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Corning Optical Communications; Corning Incorporated]
 - b. [General Cable; Prysmian Group North America]
 - c. [Mohawk; a division of Belden Networking, Inc.]
 - d. [Superior Essex Inc.; subsidiary of LS Corp.]
 - e. [TE Connectivity Ltd.]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.

E. Types OFN and OFNG, Designation OS2, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Berk-Tek, a Leviton Company]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Berk-Tek, a Leviton Company]

- b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
- a. Construction: TIA-492CAAB; 9 μm core diameter, 125 μm cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
- a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
- F. Types OFN and OFNG, Designation OS1, Inside Plant, Single-Mode Optical Fiber Cable :
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- a. [CommScope, Inc]
 - b. [Corning Optical Communications; Corning Incorporated]
 - c. [General Cable; Prysmian Group North America]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- a. [CommScope, Inc]
 - b. [Corning Optical Communications; Corning Incorporated]
 - c. [General Cable; Prysmian Group North America]
 - d. [Hitachi Cable America Inc.]
 - e. [Mohawk; a division of Belden Networking, Inc.]
 - f. [Superior Essex Inc.; subsidiary of LS Corp.]
 - g. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
- a. Construction: TIA-492CAAA; 9 μm core diameter, 125 μm cladding diameter.

- b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.

5. Options:

- a. Configuration: [6][8][12][24][36][48][72][96][144] fibers, tight buffered, optical fiber cable.
- b. Maximum Attenuation: [1.0 dB/km]<Insert dB/km> at 1310 nm wavelength; [1.0 dB/km]<Insert dB/km> at 1550 nm wavelength.
- c. Jacket Color: [Yellow]<Insert color>.

2.6 TYPES OFC AND OFCG OPTICAL FIBER CABLE

- A. Types OFC and OFCG Optical Fiber Cable: This category covers jacketed optical fiber cable for general use within buildings in accordance with Article 770 of NFPA 70 containing noncurrent-carrying electrically conductive materials.

B. Performance Criteria:

- 1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- 2. Listing Criteria: UL CCN QAYK; including UL 1651.
- 3. General Characteristics:
 - a. Performance: TIA-568.3.
 - b. Inside Plant Mechanical Properties: ICEA S-83-596.
 - c. Inside-Outside Plant Mechanical Properties: ICEA S-104-696.
 - d. Jacket:
 - 1) Cable cordage jacket, fiber, unit, and group color in accordance with TIA-598.
 - 2) Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed 40 inch (1 m).

C. Types OFC and OFCG, Designation OM2, Multimode Optical Fiber Cable :

- 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Berk-Tek, a Leviton Company]
 - b. [CommScope, Inc]
 - c. [General Cable; Prysmian Group North America]
 - d. [Hitachi Cable America Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
- 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Berk-Tek, a Leviton Company]
 - b. [CommScope, Inc]
 - c. [General Cable; Prysmian Group North America]

- d. **[Hitachi Cable America Inc.]**
 - e. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - f. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
- a. Construction: TIA-492AAAB; 50 μm core diameter, 125 μm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
- a. Configuration: **[4][6][8][12][24][48]<Insert number>**-fiber, tight buffer, optical fiber cable.
 - b. Maximum Attenuation: **[3.50 dB/km]<Insert dB/km>** at 850 nm wavelength; **[1.5 dB/km]<Insert dB/km>** at 1300 nm wavelength.
 - c. Jacket Color: **[Orange]<Insert color>**.
 - d. Armor: **[Steel][Aluminum]**.
- D. Types OFC and OFCG, Designation OS1, Inside-Outside Plant, Single-Mode Optical Fiber Cable :
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
- a. **[General Cable; Prysmian Group North America]**
 - b. **[Mohawk; a division of Belden Networking, Inc.]**
 - c. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
- a. **[General Cable; Prysmian Group North America]**
 - b. **[Mohawk; a division of Belden Networking, Inc.]**
 - c. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 - d. **<Insert manufacturer's name>**
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
- a. Construction: TIA-492CAAA; 9 μm core diameter, 125 μm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
- a. Configuration:
 - 1) **[6][8][12]**-fiber, single loose tube, optical fiber cable.
 - 2) **[24][36][48][72][96][144]**-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: **[0.5 dB/km]<Insert dB/km>** at 1310 nm wavelength; **[0.5 dB/km]<Insert dB/km>** at 1550 nm wavelength.

- c. Jacket Color: [Yellow]<Insert color>.
- d. Armor: [Steel][Aluminum].

E. Types OFC and OFCG, Designation OS2, Inside-Outside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Berk-Tek, a Leviton Company]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Berk-Tek, a Leviton Company]
 - b. [CommScope, Inc]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAB; 9 µm core diameter, 125 µm cladding diameter, with low water peak.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration:
 - 1) [6][8][12]-fiber, single loose tube, optical fiber cable.
 - 2) [24][36][48][72][96][144]-fiber, stranded loose tube, optical fiber cable.
 - b. Maximum Attenuation: [0.5 dB/km]<Insert dB/km> at 1310 nm wavelength; [0.5 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].

F. Types OFC and OFCG, Designation OS1, Inside Plant, Single-Mode Optical Fiber Cable :

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [CommScope, Inc]
 - b. [General Cable; Prysmian Group North America]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [CommScope, Inc]
 - b. [General Cable; Prysmian Group North America]
 - c. [Hitachi Cable America Inc.]
 - d. [Mohawk; a division of Belden Networking, Inc.]
 - e. [Superior Essex Inc.; subsidiary of LS Corp.]
 - f. <Insert manufacturer's name>
3. Source Limitations: Obtain products from single manufacturer.
4. Additional Characteristics:
 - a. Construction: TIA-492CAAA; 9 µm core diameter, 125 µm cladding diameter.
 - b. Minimum Overfilled Modal Bandwidth-Length Product: 500 MHz-km at 850 nm wavelength; 500 MHz-km at 1300 nm wavelength.
5. Options:
 - a. Configuration: [6][8][12][24][36][48][72][96][144] fibers, tight buffered, optical fiber cable.
 - b. Maximum Attenuation: [1.0 dB/km]<Insert dB/km> at 1310 nm wavelength; [1.0 dB/km]<Insert dB/km> at 1550 nm wavelength.
 - c. Jacket Color: [Yellow]<Insert color>.
 - d. Armor: [Steel][Aluminum].

2.7 OPTICAL FIBER CABLE HARDWARE

- A. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 1. [American Technology Systems Industries, Inc]
 2. [Belden Inc.]
 3. [Berk-Tek, a Leviton Company]
 4. [CommScope, Inc]
 5. [Corning Optical Communications; Corning Incorporated]
 6. [Dynamac Corporation]
 7. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
 8. [Molex Premise Networks]
 9. [Optical Cable Corporation (OCC)]
 10. [Siemon Co. (The)]
 11. [Stewart Connector, a Bel group company; Bel Fuse Inc.]
 12. <Insert manufacturer's name>
- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [American Technology Systems Industries, Inc]
2. [Belden Inc.]
3. [Berk-Tek, a Leviton Company]
4. [CommScope, Inc]
5. [Corning Optical Communications; Corning Incorporated]
6. [Dynacom Corporation]
7. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
8. [Molex Premise Networks]
9. [Optical Cable Corporation (OCC)]
10. [Siemon Co. (The)]
11. [Stewart Connector, a Bel group company; Bel Fuse Inc.]
12. <Insert manufacturer's name>

C. Performance Criteria:

1. Fiber Optic Connector Intermateability Standard (FOCIS) specifications of TIA-604 series.
2. TIA-568.3.

D. Cross-Connects and Patch Panels: Modular panels housing multiple-numbered, duplex cable connectors.

1. Number of Connectors per Field: **[One]**<Insert number> for each fiber of cable or cables assigned to field, plus spares and blank positions adequate to suit specified expansion criteria.

E. Patch Cords: Factory-made, dual-fiber cables in **36 inch (900 mm)** lengths.

F. Connector Type: **[Type SC complying with TIA-604-3,][Type ST complying with TIA-604-2,][Type LC complying with TIA-604-10,][Type MT-RJ complying with TIA-604-12,][Type MPO complying with TIA-604-5,]<Insert type>** connectors.

G. Plugs and Plug Assemblies:

1. Male; color-coded modular telecommunications connector designed for termination of single optical fiber cable.
2. Insertion loss not more than **[0.25][0.75]<Insert number>** dB.
3. Marked to indicate transmission performance.

H. Jacks and Jack Assemblies:

1. Female; quick-connect, simplex and duplex; fixed telecommunications connector designed for termination of single optical fiber cable.
2. Insertion loss not more than **[0.25][0.75]<Insert number>** dB.
3. Marked to indicate transmission performance.
4. Designed to snap-in to patch panel or faceplate.

2.8 SOURCE QUALITY CONTROL

- A. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.
- B. Testing Adminstrant: **[Owner will engage][Engage]** qualified testing agency to evaluate cables.
- C. Factory Tests and Inspections:

1. Test and inspect multimode optical fiber cables, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with TIA-526-14 and TIA-568.3 before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.
 2. Test and inspect pre-terminated optical fiber cable assemblies, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with TIA-526-14 and TIA-568.3 before delivering to site. Affix label with name and date of **[manufacturer's][qualified electrical testing laboratory's]** certification of system compliance.
- D. Nonconforming Work:
1. Cables that do not pass tests and inspections will be considered defective.
- E. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 PREPARATION

- A. Coordinate backbone cabling with protectors and demarcation point provided by communications service provider.

3.2 SELECTION OF OPTICAL FIBER TYPE

- A. Installed in Vertical Shaft or Floor-to-Floor Riser:
1. Nonconductive:
 - a. **[Type OFNR][or][Type OFNP][in listed plenum communications raceway].**
 - b. **[Type OFN][Type OFNG][Type OFNR][or][Type OFNP]** in metallic conduit.
 2. Conductive:
 - a. **[Type OFCR][or][Type OFCP][in listed plenum communications raceway].**
 - b. **[Type OFC][Type OFCG][Type OFCR][or][Type OFCP]** in metallic conduit.
- B. Installed in Plenum, Duct, or Other Space Handling Environmental Air:
1. Nonconductive:
 - a. **Type OFNP[in listed plenum communications raceway].**
 - b. **[Type OFN][Type OFNG][Type OFNR][or][Type OFNP]** in metallic conduit.
 2. Conductive:
 - a. **Type OFCP[in listed plenum communications raceway].**
 - b. **[Type OFC][Type OFCG][Type OFCR][or][Type OFCP]** in metallic conduit.
- C. Installed in Location Other Than Riser or Plenum:
1. Nonconductive: **[Type OFN][Type OFNG][Type OFNR][or][Type OFNP]** in metallic conduit.
 2. Conductive: **[Type OFC][Type OFCG][Type OFCR][or][Type OFCP]** in metallic conduit.

3.3 INSTALLATION OF OPTICAL FIBER BACKBONE CABLES

- A. Optical fiber backbone cabling system must provide interconnections between communications equipment rooms, main terminal space, and entrance facilities in telecommunications cabling system structure. Cabling system consists of backbone cables, intermediate and main cross-connects, mechanical terminations, and patch cords or jumpers used for backbone-to-backbone cross-connection.
- B. Backbone cabling cross-connects may be located in communications equipment rooms or at entrance facilities. Bridged taps and splitters may not be used as part of backbone cabling.
- C. Comply with BICSI N1, NECA NEIS 1, and NECA NEIS 301.
- D. Backbone cabling system must comply with transmission standards in TIA-568.1.
- E. Telecommunications Pathways and Spaces: Comply with TIA-569.
- F. Wiring Methods:
 - 1. Not in Raceway: Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
 - 2. In Raceway: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters[**and except in accessible ceiling spaces, in attics, and in gypsum board partitions where unenclosed wiring method may be used**]. Conceal raceway and cables except in unfinished spaces.
 - a. Install plenum cable in environmental airspaces, including plenum ceilings.
 - b. Comply with requirements for pathways specified in Section 270528 "Pathways for Communications Systems."
 - 3. In Enclosures: Bundle, lace, and train cables within enclosures. Connect to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.
- G. Optical Fiber Cabling Installation:
 - 1. Comply with TIA-568.1 and TIA-568.3.
 - 2. Comply with BICSI ITSIMM, Ch. 6, "Cable Termination Practices."
 - 3. Terminate all cables; no cable may contain unterminated elements. Make terminations only at indicated outlets, terminals, cross-connects, and patch panels.
 - 4. Cables may not be spliced. Secure and support cables at intervals not exceeding **30 inch (760 mm)** and not more than **6 inch (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
 - 5. Install lacing bars to restrain cables, to prevent straining connections, and to prevent bending cables to smaller radii than minimums recommended by manufacturer.
 - 6. Bundle, lace, and train cable to terminal points without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI ITSIMM, "Cabling Termination Practices" Chapter. Use lacing bars and distribution spools.
 - 7. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation and replace it with new cable.
 - 8. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps may not be used for heating.
 - 9. In communications equipment room, provide **10 ft (3 m)** long service loop on each end of cable.
 - 10. Pulling Cable: Comply with BICSI ITSIMM, Ch. 4, "Pulling Cable." Monitor cable pull tensions.
 - 11. Cable may be terminated on connecting hardware that is rack or cabinet mounted.

H. Open-Cable Installation:

1. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
2. Cable may not be run through structural members or in contact with pipes, ducts, or other potentially damaging items.

I. Installation of Cable Exposed under Raised Floors:

1. Install plenum-rated cable only.
2. Install cabling after flooring system has been installed in raised floor areas.
3. Coil cable [6 ft (1.8 m)]<Insert size> long not less than [12 inch (300 mm)]<Insert size> in diameter below each feed point.

J. Group connecting hardware for cables into separate logical fields.

3.4 FIRESTOPPING

- A. Comply with requirements in Section 078413 "Penetration Firestopping."
- B. Comply with TIA-569, Annex A, "Firestopping."
- C. Comply with BICSI ITSIMM, "Firestopping" Chapter.

3.5 GROUNDING

- A. Install grounding in accordance with BICSI ITSIMM, "Grounding (Earthing), Bonding, and Electrical Protection" Chapter.
- B. Comply with TIA-607 and NECA/BICSI-607.
- C. Locate grounding bus bar to minimize length of bonding conductors. Fasten to wall allowing at least **2 inch (50 mm)** clearance behind grounding bus bar. Connect grounding bus bar with minimum 4 AWG grounding electrode conductor from grounding bus bar to suitable electrical building ground.
- D. Bond metallic equipment to grounding bus bar, using not smaller than 6 AWG equipment grounding conductor.

3.6 IDENTIFICATION

- A. Identify system components, wiring, and cabling complying with TIA-606. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
 1. Administration Class: **[Class 1][Class 2][Class 3][Class 4]**.
 2. Color-code cross-connect fields and apply colors to voice and data service backboards, connections, covers, and labels.
- B. Paint and label colors for equipment identification must comply with TIA-606 for **[Class 2][Class 3][Class 4]** level of administration **[including optional identification requirements of this standard]**.
- C. Comply with requirements in Section 271523 "Communications Optical Fiber Horizontal Cabling" for cable and asset management software.

- D. Cable Schedule: Install in prominent location in each equipment room and wiring closet. List incoming and outgoing cables and their designations, origins, and destinations. Protect with rigid frame and clear plastic cover. Furnish electronic copy of final comprehensive schedules for Project.
- E. Cabling Administration Drawings: Show building floor plans with cabling administration-point labeling. Identify labeling convention and show labels for telecommunications closets, **[backbone pathways and cables],[entrance pathways and cables,]** terminal hardware and positions, horizontal cables, work areas and workstation terminal positions, grounding buses and pathways, and equipment grounding conductors.
- F. Cable and Wire Identification:
 - 1. Label each cable within **4 inch (100 mm)** of each termination and tap, where it is accessible in cabinet or junction or outlet box, and elsewhere as indicated.
 - 2. Each wire connected to building-mounted devices is not required to be numbered at device if color of wire is consistent with associated wire connected and numbered within panel or cabinet.
 - 3. Exposed Cables and Cables in Cable Trays and Wire Troughs: Label each cable at intervals not exceeding **15 ft (4.5 m)**.
 - 4. Label each unit and field within distribution racks and frames.
 - 5. Identification within Connector Fields in Equipment Rooms and Wiring Closets: Label each connector and each discrete unit of cable-terminating and connecting hardware. Where similar jacks and plugs are used for both voice and data communication cabling, use different color for jacks and plugs of each service.
- G. Labels must be preprinted or computer-printed type with printing area and font color that contrasts with cable jacket color but still complies with requirements in TIA 606, for the following:
 - 1. Flexible vinyl or polyester that flexes as cables are bent.

3.7 FIELD QUALITY CONTROL

- A. Acceptance Testing Preparation:
 - 1. **<Insert requirements>**.
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>**.
- C. Tests and Inspections:
 - 1. Visually inspect optical fiber jacket materials for qualified electrical testing laboratory certification markings. Inspect cabling terminations in communications equipment rooms for compliance with color-coding for pin assignments, and inspect cabling connections for compliance with TIA-568.1.
 - 2. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
 - 3. Optical Fiber Cable Tests:
 - a. Test instruments must meet or exceed applicable requirements in TIA-568.1. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.
 - b. Link End-to-End Attenuation Tests:
 - 1) Horizontal and multimode backbone link measurements: Test at 850 or 1300 nm in one direction in accordance with TIA-526-14, Method B, One Reference Jumper.

- 2) Attenuation test results for backbone links must be less than 2.0 dB. Attenuation test results must be less than those calculated in accordance with equation in TIA-568.1.

D. Nonconforming Work:

1. Cables will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective cables and retest.

E. Collect, assemble, and submit test and inspection reports.

1. Data for each measurement must be documented.
2. Data for field quality-control report submittals must be printed in summary report that is formatted similar to Table 10.1 in BICSI TDMM, or transferred from instrument to computer, saved as text files, and printed and submitted.

F. Manufacturer Services:

1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

3.8 MAINTENANCE

A. Software Service Agreement:

1. Technical Support: Beginning at Substantial Completion, verify that software service agreement includes software support for **[two]<Insert number>** years.
2. Upgrade Service: At Substantial Completion, update software to latest version. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. **[Verify that upgrading software includes operating system and new or revised licenses for using software.]**
 - a. Upgrade Notice: No fewer than **[30]<Insert number>** days to allow Owner to schedule and access the system **[and to upgrade computer equipment if necessary.]**
3. Upgrade Reports: Prepare report after each update, documenting upgrades installed.

END OF SECTION 27 13 23 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 27 15 13 00 - COMMUNICATIONS COPPER HORIZONTAL CABLING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Category 3 twisted pair cable.
2. Category 5e twisted pair cable.
3. Category 6 twisted pair cable.
4. Category 6a twisted pair cable.
5. Category 7 twisted pair cable.
6. Twisted pair cable hardware.
7. Multiuser telecommunications outlet assembly (MUTOA).
8. Cable management system.
9. Identification products.

B. Related Requirements:

1. Section 270513 "Conductors and Cables for Communications Systems" for data cabling associated with system panels and devices.

1.2 DEFINITIONS

- A. Cross-Connect:** A facility enabling the termination of cable elements and their interconnection or cross-connection.
- B. EMI:** Electromagnetic interference.
- C. FTP:** Shielded twisted pair.
- D. F/FTP:** Overall foil screened cable with foil screened twisted pair.
- E. F/UTP:** Overall foil screened cable with unscreened twisted pair.
- F. IDC:** Insulation displacement connector.
- G. Jack:** Also commonly called an "outlet," it is the fixed, female connector.
- H. LAN:** Local area network.
- I. Plug:** Also commonly called a "connector," it is the removable, male telecommunications connector.
- J. RCDD:** Registered Communications Distribution Designer.
- K. Screen:** A metallic layer, either a foil or braid, placed around a pair or group of conductors.
- L. Shield:** A metallic layer, either a foil or braid, placed around a pair or group of conductors.
- M. S/FTP:** Overall braid screened cable with foil screened twisted pair.

- N. S/UTP: Overall braid screened cable with unscreened twisted pairs.
- O. UTP: Unscreened (unshielded) twisted pair.

1.3 COPPER HORIZONTAL CABLING DESCRIPTION

- A. Horizontal cable cabling system shall provide interconnections between Distributor A, Distributor B, or Distributor C, and the equipment outlet, otherwise known as "Cabling Subsystem 1," in the telecommunications cabling system structure. Cabling system consists of horizontal cables, intermediate and main cross-connects, mechanical terminations, and patch cords or jumpers used for horizontal-to-horizontal cross-connection.
 - 1. TIA-568-C.1 requires that a minimum of two equipment outlets be installed for each work area.
 - 2. Horizontal cabling shall contain no more than one transition point or consolidation point between the horizontal cross-connect and the telecommunications equipment outlet.
 - 3. Bridged taps and splices shall not be installed in the horizontal cabling.
- B. A work area is approximately **100 sq. ft. (9.3 sq. m)**, and includes the components that extend from the equipment outlets to the station equipment.
- C. The maximum allowable horizontal cable length is **295 feet (90 m)**. This maximum allowable length does not include an allowance for the length of **16 feet (4.9 m)** to the workstation equipment or in the horizontal cross-connect.

1.4 ACTION SUBMITTALS

- A. Product Data:
 - 1. Category 3 twisted pair cable.
 - 2. Category 5e twisted pair cable.
 - 3. Category 6 twisted pair cable.
 - 4. Category 6a twisted pair cable.
 - 5. Category 7 twisted pair cable.
 - 6. Twisted pair cable hardware.
 - 7. Multiuser telecommunications outlet assembly (MUTOA).
 - 8. Cable management system.
 - 9. Identification products.
- B. Shop Drawings: Reviewed and stamped by RCDD.
 - 1. System Labeling Schedules:
 - a. Electronic copy of labeling schedules, in software and format selected by Owner.
 - b. Electronic copy of labeling schedules that are part of cabling and asset identification system of software.
 - 2. Cabling administration Drawings and printouts.
 - 3. Wiring diagrams and installation details of telecommunications equipment, to show location and layout of telecommunications equipment, including the following:
 - a. Telecommunications rooms plans and elevations.
 - b. Telecommunications pathways.

- c. Telecommunications system access points.
 - d. Telecommunications grounding system.
 - e. Telecommunications conductor drop locations.
 - f. Typical telecommunications details.
 - g. Mechanical, electrical, and plumbing systems.
- C. Twisted pair cable testing plan.
- D. Sustainable Design Submittals:
 - 1. Product Data: For each conductor and cable indicating lead content.
 - 2. Environmental Product Declaration: For each product.
 - 3. Health Product Declaration: For each product.
 - 4. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
 - 5. Environmental Product Declaration: For each product.
 - 6. Environmental Product Declaration: For each product.
 - 7. Environmental Product Declaration: For each product.
 - 8. Third-Party Certifications: For each product.
 - 9. Third-Party Certified Life Cycle Assessment: For each product.
- E. Samples: For telecommunications jacks and plugs, **[in specified finish, one for each type and configuration][and cover plates for color selection and evaluation of technical features]**.
- F. Field quality-control reports.

1.5 INFORMATIONAL SUBMITTALS

- A. Qualification Data: For **[RCDD,][Installer]**, installation supervisor, and field inspector.
- B. Product Certificates: For each type of product.
- C. Source quality-control reports.

1.6 CLOSEOUT SUBMITTALS

- A. Maintenance Data: For splices and connectors to include in maintenance manuals.
- B. Software and Firmware Operational Documentation:
 - 1. Software operating and upgrade manuals.
 - 2. Program Software Backup: On USB media or compact disk, complete with data files.
 - 3. Device address list.
 - 4. Printout of software application and graphic screens.

1.7 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Connecting Blocks: **[One]<Insert number>** of each type.
 - 2. Cover Plates: **[One]<Insert number>** of each type.
 - 3. Jacks: **[Ten]<Insert number>** of each type.

4. Multiuser Telecommunications Outlet Assemblies: [One]<Insert number> of each type.
5. Patch-Panel Units: [One]<Insert number> of each type.
6. Plugs: [Ten]<Insert number> of each type.

1.8 QUALITY ASSURANCE

- A. Installer Qualifications: Cabling Installer must have personnel certified by BICSI on staff.
 1. Layout Responsibility: Preparation of Shop Drawings[**and cabling administration Drawings**][, **cabling administration Drawings, and field testing program development**] by an RCDD.
 2. Installation Supervision: Installation shall be under the direct supervision of [Technician][**Level 2 Installer**], who shall be present at all times when Work of this Section is performed at Project site.
 3. Testing Supervisor: Currently certified by BICSI as an RCDD to supervise on-site testing.
- B. Testing Agency Qualifications: Testing agency must have personnel certified by BICSI on staff.
 1. Testing Agency's Field Supervisor: Currently certified by BICSI as an RCDD.

1.9 DELIVERY, STORAGE, AND HANDLING

- A. Test cables upon receipt at Project site.
 1. Test each pair of twisted pair cable for open and short circuits.

1.10 PROJECT CONDITIONS

- A. Environmental Limitations: Do not deliver or install cables and connecting materials until wet work in spaces is complete and dry, and temporary HVAC system is operating and maintaining ambient temperature and humidity conditions at occupancy levels during the remainder of the construction period.

1.11 COORDINATION

- A. Coordinate layout and installation of telecommunications pathways and cabling with Owner's telecommunications and LAN equipment and service suppliers.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. General Performance: Horizontal cabling system shall comply with transmission standards in TIA-568-C.1, when tested according to test procedures of this standard.
- B. Telecommunications Pathways and Spaces: Comply with TIA-569-D.
- C. Grounding: Comply with TIA-607-B.

2.2 GENERAL CABLE CHARACTERISTICS

- A. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with the applicable standard and NFPA 70 for the following types:
 - 1. Communications, Plenum Rated:
 - a. Type CMP complying with UL 1685[**or Type CMP in listed plenum communications raceway**][**or Type CMP in listed cable routing assembly**].
 - b. Type CM, Type CMG, Type CMP, Type CMR, or Type CMX in metallic conduit installed according to NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."
 - 2. Communications, Non-Plenum Rated:
 - a. Type CMR complying with UL 1666[**and ICEA S-103-701**].
 - b. Type CMP or Type CMR in listed plenum or riser communications raceway.
 - c. Type CMP or Type CMR in metallic conduit installed according to NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."
- B. Surface-Burning Characteristics: Comply with ASTM E84; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.
 - 1. Flame-Spread Index: **[25]<Insert value>** or less.
 - 2. Smoke-Developed Index: **[50][450]<Insert value>** or less.
- C. RoHS compliant.

2.3 CATEGORY 3 TWISTED PAIR CABLE

- A. Category 3 Twisted Pair Cable: Four-pair, balanced twisted pair cable, certified to meet transmission characteristics of Category 3 cable at frequencies up to 16 MHz.
- B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:
 - 1. **[Hitachi Cable America Inc.]**
 - 2. **[Mohawk; a division of Belden Networking, Inc.]**
 - 3. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[Hitachi Cable America Inc.]**
 - 2. **[Mohawk; a division of Belden Networking, Inc.]**
 - 3. **<Insert manufacturer's name>**
- D. Standard: Comply with ICEA S-90-661, NEMA WC 63.1, and TIA-568-C.2 for Category 3 cables.
- E. Conductors: 100-ohm, 24 AWG solid copper.
 - 1. Lead Content: Less than 300 parts per million.

- F. Shielding/Screening: **[Unshielded twisted pairs (UTP)][Shielded twisted pairs (FTP)][Screened twisted pairs (F/UTP)][Screened and shielded twisted pairs (F/FTP)]**.
- G. Cable Rating: **[Riser][Plenum]**.
- H. Jacket: **[White][Gray][Blue][Yellow][Orange][Pink][Green][Red][Black][Brown][Beige][Mauve]<Insert color>** thermoplastic.

2.4 CATEGORY 5e TWISTED PAIR CABLE

- A. Category 5e Twisted Pair Cable: Four-pair, balanced twisted pair cable, certified to meet transmission characteristics of Category 5e cable at frequencies up to 100 MHz.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[AMP NETCONNECT; a TE Connectivity Ltd. company]**
 - 2. **[Belden Inc.]**
 - 3. **[Berk-Tek, a Leviton Company]**
 - 4. **[CommScope, Inc]**
 - 5. **[General Cable; Prysmian Group North America]**
 - 6. **[Hitachi Cable America Inc.]**
 - 7. **[Mohawk; a division of Belden Networking, Inc.]**
 - 8. **[West Penn Wire; brand of Belden, Inc.]**
 - 9. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[AMP NETCONNECT; a TE Connectivity Ltd. company]**
 - 2. **[Belden Inc.]**
 - 3. **[Berk-Tek, a Leviton Company]**
 - 4. **[CommScope, Inc]**
 - 5. **[General Cable; Prysmian Group North America]**
 - 6. **[Hitachi Cable America Inc.]**
 - 7. **[Mohawk; a division of Belden Networking, Inc.]**
 - 8. **[West Penn Wire; brand of Belden, Inc.]**
 - 9. **<Insert manufacturer's name>**
- D. Standard: Comply with ICEA S-90-661, NEMA WC 63.1, and TIA-568-C.2 for Category 5e cables.
- E. Conductors: 100-ohm, 24 AWG solid copper.
 - 1. Lead Content: Less than 300 parts per million.
- F. Shielding/Screening: **[Unshielded twisted pairs (UTP)][Shielded twisted pairs (FTP)][Screened twisted pairs (F/UTP)][Screened and shielded twisted pairs (F/FTP)]**.
- G. Cable Rating: **[Riser][Plenum]**.
- H. Jacket: **[White][Gray]<Insert color>** thermoplastic.

**2.5 CATEGORY 6 TWISTED PAIR CABLE**

- A. Category 6 Twisted Pair Cable: Four-pair, balanced -twisted pair cable,[**with internal spline,**] certified to meet transmission characteristics of Category 6 cable at frequencies up to 250 MHz.
- B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:
 - 1. [3M]
 - 2. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - 3. [Belden Inc.]
 - 4. [Berk-Tek, a Leviton Company]
 - 5. [CommScope, Inc]
 - 6. [General Cable; Prysmian Group North America]
 - 7. [Genesis; Resideo Technologies, Inc.]
 - 8. [Hitachi Cable America Inc.]
 - 9. [Mohawk; a division of Belden Networking, Inc.]
 - 10. [Prysmian Cables and Systems; Prysmian Group North America]
 - 11. [Superior Essex Inc.; subsidiary of LS Corp.]
 - 12. <Insert manufacturer's name>
- C. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:
 - 1. [3M]
 - 2. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 - 3. [Belden Inc.]
 - 4. [Berk-Tek, a Leviton Company]
 - 5. [CommScope, Inc]
 - 6. [General Cable; Prysmian Group North America]
 - 7. [Genesis; Resideo Technologies, Inc.]
 - 8. [Hitachi Cable America Inc.]
 - 9. [Mohawk; a division of Belden Networking, Inc.]
 - 10. [Prysmian Cables and Systems; Prysmian Group North America]
 - 11. [Superior Essex Inc.; subsidiary of LS Corp.]
 - 12. <Insert manufacturer's name>
- D. Standard: Comply with NEMA WC 66/ICEA S-116-732 and TIA-568-C.2 for Category 6 cables.
- E. Conductors: 100-ohm, 23 AWG solid copper.
 - 1. Lead Content: Less than 300 parts per million.
- F. Shielding/Screening: [**Unshielded twisted pairs (UTP)**][**Shielded twisted pairs (FTP)**][**Screened twisted pairs (F/UTP)**][**Screened and shielded twisted pairs (F/FTP)**].
- G. Cable Rating: [**Riser**][**Plenum**].
- H. Jacket: [**White**][**Gray**][**Blue**][**Yellow**]<**Insert color**> thermoplastic.

2.6 CATEGORY 6a TWISTED PAIR CABLE

- A. Category 6a Twisted Pair Cable: Four-pair, balanced twisted pair cable,[**with internal spline,**] certified to meet transmission characteristics of Category 6a cable at frequencies up to 500 MHz.

- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. **[3M]**
2. **[AMP NETCONNECT; a TE Connectivity Ltd. company]**
3. **[Belden Inc.]**
4. **[Berk-Tek, a Leviton Company]**
5. **[CommScope, Inc]**
6. **[General Cable; Prysmian Group North America]**
7. **[Genesis; Resideo Technologies, Inc.]**
8. **[Hitachi Cable America Inc.]**
9. **[Mohawk; a division of Belden Networking, Inc.]**
10. **[Prysmian Cables and Systems; Prysmian Group North America]**
11. **[Superior Essex Inc.; subsidiary of LS Corp.]**
12. **<Insert manufacturer's name>**

- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[3M]**
2. **[AMP NETCONNECT; a TE Connectivity Ltd. company]**
3. **[Belden Inc.]**
4. **[Berk-Tek, a Leviton Company]**
5. **[CommScope, Inc]**
6. **[General Cable; Prysmian Group North America]**
7. **[Genesis; Resideo Technologies, Inc.]**
8. **[Hitachi Cable America Inc.]**
9. **[Mohawk; a division of Belden Networking, Inc.]**
10. **[Prysmian Cables and Systems; Prysmian Group North America]**
11. **[Superior Essex Inc.; subsidiary of LS Corp.]**
12. **<Insert manufacturer's name>**

- D. Standard: Comply with TIA-568-C.2 for Category 6a cables.

- E. Conductors: 100-ohm, 23 AWG solid copper.

1. Lead Content: Less than 300 parts per million.

- F. Shielding/Screening: **[Unshielded twisted pairs (UTP)][Shielded twisted pairs (FTP)][Screened twisted pairs (F/UTP)][Screened and shielded twisted pairs (F/FTP)]**.

- G. Cable Rating: **[Riser][Plenum]**.

- H. Jacket: **[White][Gray][Blue][Yellow]<Insert color>** thermoplastic.

2.7 CATEGORY 7 TWISTED PAIR CABLE

- A. Category 7 Twisted Pair Cable: Four-pair, balanced twisted pair cable, **[with internal spline,]** certified to meet transmission characteristics of Category 7 cable at frequencies up to 600 MHz.

- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. [Hitachi Cable America Inc.]
2. [Siemon Co. (The)]
3. <Insert manufacturer's name>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [Hitachi Cable America Inc.]
2. [Siemon Co. (The)]
3. <Insert manufacturer's name>

D. Standard: Comply with ISO 11801, Category F.

E. Conductors: 100-ohm, 22 AWG solid copper.

1. Lead Content: Less than 300 parts per million.

F. Shielding/Screening: Overall [foil shield with foil shielded twisted pairs (F/FTP)][braided shield with foil shielded twisted pairs (S/FTP)].

G. Cable Rating: [Riser][Plenum].

H. Jacket: [White][Gray][Blue][Yellow]<Insert color> thermoplastic.

2.8 TWISTED PAIR CABLE HARDWARE

A. Twisted Pair Cable Hardware: Hardware designed to connect, splice, and terminate twisted pair copper communications cable.

B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [3M]
2. [American Technology Systems Industries, Inc]
3. [AMP NETCONNECT; a TE Connectivity Ltd. company]
4. [Belden Inc.]
5. [Berk-Tek, a Leviton Company]
6. [CommScope, Inc]
7. [Dynacom Corporation]
8. [General Cable; Prysmian Group North America]
9. [Genesis; Resideo Technologies, Inc.]
10. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
11. [Leviton Manufacturing Co., Inc.]
12. [Mohawk; a division of Belden Networking, Inc.]
13. [Molex Premise Networks]
14. [Panduit Corp]
15. [Prysmian Cables and Systems; Prysmian Group North America]
16. [Siemon Co. (The)]
17. [Superior Essex Inc.; subsidiary of LS Corp.]
18. <Insert manufacturer's name>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [3M]
2. [American Technology Systems Industries, Inc]
3. [AMP NETCONNECT; a TE Connectivity Ltd. company]
4. [Belden Inc.]
5. [Berk-Tek, a Leviton Company]
6. [CommScope, Inc]
7. [Dynacom Corporation]
8. [General Cable; Prysmian Group North America]
9. [Genesis; Resideo Technologies, Inc.]
10. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
11. [Leviton Manufacturing Co., Inc.]
12. [Mohawk; a division of Belden Networking, Inc.]
13. [Molex Premise Networks]
14. [Panduit Corp]
15. [Prysmian Cables and Systems; Prysmian Group North America]
16. [Siemon Co. (The)]
17. [Superior Essex Inc.; subsidiary of LS Corp.]
18. <Insert manufacturer's name>

D. General Requirements for Twisted Pair Cable Hardware:

1. Comply with the performance requirements of [Category 5e][Category 6][Category 6a][Category 7].
2. Comply with TIA-568-C.2, IDC type, with modules designed for punch-down caps or tools.
3. Cables shall be terminated with connecting hardware of same category or higher.

E. Source Limitations: [Obtain twisted pair cable hardware from single source from single manufacturer.][Obtain twisted pair cable hardware from same manufacturer as twisted pair cable, from single source.]

F. Connecting Blocks:

1. 110-style IDC for Category 5e.
2. 66-style IDC for Category 5e.
3. 110-style IDC for Category 6.
4. 110-style IDC for Category 6a.
5. Provide blocks for the number of cables terminated on the block, plus [25]<Insert number> percent spare, integral with connector bodies, including plugs and jacks where indicated.

G. Cross-Connect: Modular array of connecting blocks arranged to terminate building cables and permit interconnection between cables.

1. Number of Terminals per Field: [One]<Insert number> for each conductor in assigned cables.

H. Patch Panel: Modular panels housing numbered jack units with IDC-type connectors at each jack location for permanent termination of pair groups of installed cables.

1. Features:

- a. Universal T568A and T568B wiring labels.
- b. Labeling areas adjacent to conductors.
- c. Replaceable connectors.
- d. 24 or 48 ports.

2. Construction: 16-gauge steel and mountable on 19-inch (483 mm) equipment racks.

3. Number of Jacks per Field: One for each four-pair **[cable indicated][conductor group of indicated cables, plus spares and blank positions adequate to suit specified expansion criteria]**.
 - I. Patch Cords: Factory-made, four-pair cables in **[36-inch (900-mm)][48-inch (1200-mm)]<Insert length>** lengths; terminated with an eight-position modular plug at each end.
 1. Patch cords shall have bend-relief-compliant boots and color-coded icons to ensure performance. Patch cords shall have latch guards to protect against snagging.
 2. Patch cords shall have color-coded boots for circuit identification.
 - J. Plugs and Plug Assemblies:
 1. Male; eight position; color-coded modular telecommunications connector designed for termination of a single four-pair, 100-ohm, unshielded or shielded twisted pair cable.
 2. Standard: Comply with TIA-568-C.2.
 3. Marked to indicate transmission performance.
 - K. Jacks and Jack Assemblies:
 1. Female; eight position; modular; fixed telecommunications connector designed for termination of a single four-pair, 100-ohm, unshielded or shielded twisted pair cable.
 2. Designed to snap-in to a patch panel or cover plate.
 3. Standard: Comply with TIA-568-C.2.
 4. Marked to indicate transmission performance.
 - L. Cover Plate:
 1. **[Two][Four][Six]** port, vertical single gang cover plates designed to mount to single gang wall boxes.
 2. **[Eight][Ten][Twelve]** port, vertical double gang cover plates designed to mount to double gang wall boxes.
 3. Plastic Cover Plate: High-impact plastic. Coordinate color with Section 260533.16 "Boxes and Covers for Electrical Systems."
 4. Metal Cover Plate: **[Stainless steel][Brass]<Insert description>**, complying with requirements in Section 260533.16 "Boxes and Covers for Electrical Systems."
 5. For use with snap-in jacks accommodating any combination of twisted pair, optical fiber, and coaxial work area cords.
 - a. Flush mounting jacks, positioning the cord at a 45-degree angle.
 - M. Legend:
 1. Machine printed, in the field, using adhesive-tape label.
 2. Snap-in, clear-label covers and machine-printed paper inserts.
- 2.9 MULTIUSER TELECOMMUNICATIONS OUTLET ASSEMBLY (MUTOA)
- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
1. **[Belden Inc.]**
 2. **[Chatsworth Products, Inc.]**
 3. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**

4. [Molex Premise Networks]
5. [Ortronics, Inc.]
6. [Panduit Corp]
7. [Siemon Co. (The)]
8. <Insert manufacturer's name>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [Belden Inc.]
2. [Chatsworth Products, Inc.]
3. [Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]
4. [Molex Premise Networks]
5. [Ortronics, Inc.]
6. [Panduit Corp]
7. [Siemon Co. (The)]
8. <Insert manufacturer's name>

C. Description: MUTOAs shall meet the requirements of "Twisted Pair Cable Hardware" Article.

1. Number of Terminals per Field: [One]<Insert number> for each conductor in assigned cables.
2. Number of Connectors per Field:
 - a. [One]<Insert number> for each four-pair unshielded or shielded twisted pair cable indicated.
 - b. [One]<Insert number> for each four-pair unshielded or shielded twisted pair group of indicated cables, plus [25]<Insert number> percent spare positions.
3. Mounting: [Recessed in ceiling][Wall][Desk][Furniture].
4. NRTL listed as complying with UL 50 and UL 1863.
5. Label shall include maximum length of work area cords, based on TIA-568-C.1.
6. When installed in plenums used for environmental air, NRTL listed as complying with UL 2043.

2.10 CABLE MANAGEMENT SYSTEM

A. Cable Management System: Computer-based cable management system, with integrated database[and graphic] capabilities.

B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1. [iTRACS Corporation]
2. [Telsoft Solutions]
3. <Insert manufacturer's name>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [iTRACS Corporation]
2. [Telsoft Solutions]
3. <Insert manufacturer's name>

D. Document physical characteristics by recording the network, TIA details, and connections between

equipment and cable.

- E. Information shall be presented in database view[, **schematic plans, or technical drawings**].

1. **[Microsoft Visio Professional][or][AutoCAD]** drawing software shall be used as drawing and schematic plans software.

- F. System shall interface with the following testing and recording devices:

1. Direct upload tests from circuit testing instrument into the personal computer.
2. Direct download circuit labeling into labeling printer.

2.11 IDENTIFICATION PRODUCTS

- A. Comply with TIA-606-B and UL 969 for a system of labeling materials, including label stocks, laminating adhesives, and inks used by label printers.

2.12 SOURCE QUALITY CONTROL

- A. Testing Agency: Engage a qualified testing agency to evaluate cables.
- B. Factory test cables on reels according to TIA-568-C.1.
- C. Factory test twisted pair cables according to TIA-568-C.2.
- D. Cable will be considered defective if it does not pass tests and inspections.
- E. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 WIRING METHODS

- A. Routing:
1. Install cables in raceways and cable trays, except within consoles, cabinets, desks, and counters[**and except in accessible ceiling spaces, attics, and gypsum board partitions where unenclosed wiring method may be used**]. Conceal raceway and cables, except in unfinished spaces.
 - a. Install plenum cable in environmental air spaces, including plenum ceilings.
 - b. Comply with requirements for raceways and boxes specified in Section 270528 "Pathways for Communications Systems."
 2. Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
- B. Wiring within Enclosures: Bundle, lace, and train cables within enclosures. Connect to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools. Install conductors parallel with or at right angles to sides and back of enclosure.

3.2 INSTALLATION OF PATHWAYS

- A. Comply with requirements for demarcation point, cabinets, and racks specified in Section 271100 "Communications Equipment Room Fittings."
- B. Comply with Section 270528 "Pathways for Communications Systems."
- C. Comply with Section 260529 "Hangers and Supports for Electrical Systems."
- D. Comply with Section 260536 "Cable Trays for Electrical Systems."
- E. Drawings indicate general arrangement of pathways and fittings.

3.3 INSTALLATION OF TWISTED PAIR HORIZONTAL CABLES

- A. Comply with NECA 1 and NECA/BICSI 568.
- B. General Requirements for Cabling:
 - 1. Comply with TIA-568-C.0, TIA-568-C.1, and TIA-568-C.2.
 - 2. Comply with BICSI's "Information Transport Systems Installation Methods Manual (ITSIMM), Ch. 5, "Copper Structured Cabling Systems," "Cable Termination Practices" Section.
 - 3. Install 110-style IDC termination hardware unless otherwise indicated.
 - 4. Do not untwist twisted pair cables more than **1/2 inch (12 mm)** from the point of termination to maintain cable geometry.
 - 5. Terminate all conductors; no cable shall contain unterminated elements. Make terminations only at indicated outlets, terminals, cross-connects, and patch panels.
 - 6. MUTOA shall not be used as a cross-connect point.
 - 7. Consolidation points may be used only for making a direct connection to equipment outlets:
 - a. Do not use consolidation point as a cross-connect point, as a patch connection, or for direct connection to workstation equipment.
 - b. Locate consolidation points for twisted pair cables at least **49 feet (15 m)** from communications equipment room.
 - 8. Cables may not be spliced. Secure and support cables at intervals not exceeding **30 inches (760 mm)** and not more than **6 inches (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
 - 9. Install lacing bars to restrain cables, prevent straining connections, and prevent bending cables to smaller radii than minimums recommended by manufacturer.
 - 10. Bundle, lace, and train conductors to terminal points without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI Information Transport Systems Installation Methods Manual, Ch. 5, "Copper Structured Cabling Systems," "Cable Termination Practices" Section. Use lacing bars and distribution spools.
 - 11. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation, and replace it with new cable.
 - 12. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps shall not be used for heating.
 - 13. In the communications equipment room, install a **10-foot- (3-m-)** long service loop on each end of cable.
 - 14. Pulling Cable: Comply with BICSI Information Transport Systems Installation Methods Manual, Ch. 5, "Copper Structured Cabling Systems," "Pulling and Installing Cable" Section. Monitor cable pull tensions.

**C. Open-Cable Installation:**

1. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
2. Suspend twisted pair cabling, not in a wireway or pathway, a minimum of **8 inches (200 mm)** above ceilings by cable supports not more than **[60 inches (1524 mm)]<Insert dimension>** apart.
3. Cable shall not be run through structural members or in contact with pipes, ducts, or other potentially damaging items.

D. Installation of Cable Routed Exposed under Raised Floors:

1. Install plenum-rated cable only.
2. Install cabling after the flooring system has been installed in raised floor areas.
3. Coil cable **[6 feet (1800 mm)]<Insert size>** long not less than **[12 inches (300 mm)]<Insert size>** in diameter below each feed point.

E. Group connecting hardware for cables into separate logical fields.**F. Separation from EMI Sources:**

1. Comply with recommendations from BICSI's "Telecommunications Distribution Methods Manual" and TIA-569-D for separating unshielded copper communication cable from potential EMI sources, including electrical power lines and equipment.
2. Separation between open communications cables or cables in nonmetallic raceways and unshielded power conductors and electrical equipment shall be as follows:
 - a. Electrical Equipment Rating Less Than 2 kVA: A minimum of **5 inches (127 mm)**.
 - b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of **12 inches (300 mm)**.
 - c. Electrical Equipment Rating More Than 5 kVA: A minimum of **24 inches (600 mm)**.
3. Separation between communications cables in grounded metallic raceways and unshielded power lines or electrical equipment shall be as follows:
 - a. Electrical Equipment Rating Less Than 2 kVA: A minimum of **2-1/2 inches (64 mm)**.
 - b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of **6 inches (150 mm)**.
 - c. Electrical Equipment Rating More Than 5 kVA: A minimum of **12 inches (300 mm)**.
4. Separation between communications cables in grounded metallic raceways, power lines, and electrical equipment located in grounded metallic conduits or enclosures shall be as follows:
 - a. Electrical Equipment Rating Less Than 2 kVA: No requirement.
 - b. Electrical Equipment Rating between 2 and 5 kVA: A minimum of **3 inches (76 mm)**.
 - c. Electrical Equipment Rating More Than 5 kVA: A minimum of **6 inches (150 mm)**.
5. Separation between Communications Cables and Electrical Motors and Transformers, 5 kVA or HP and Larger: A minimum of **48 inches (1200 mm)**.
6. Separation between Communications Cables and Fluorescent Fixtures: A minimum of **5 inches (127 mm)**.

3.4 FIRESTOPPING**A. Comply with requirements in Section 078413 "Penetration Firestopping."****B. Comply with TIA-569-D, Annex A, "Firestopping."**

- C. Comply with "Firestopping Systems" Article in BICSI's "Telecommunications Distribution Methods Manual."

3.5 GROUNDING

- A. Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems" for grounding conductors and connectors.
- B. Install grounding according to the "Grounding, Bonding, and Electrical Protection" chapter in BICSI's "Telecommunications Distribution Methods Manual."
- C. Comply with TIA-607-B and NECA/BICSI-607.
- D. Locate grounding bus bar to minimize the length of bonding conductors. Fasten to wall, allowing at least a **2-inch (50-mm)** clearance behind the grounding bus bar. Connect grounding bus bar to suitable electrical building ground, using a minimum No. 4 AWG grounding electrode conductor.
- E. Bond metallic equipment to the grounding bus bar, using not smaller than a No. 6 AWG equipment grounding conductor.

3.6 IDENTIFICATION

- A. Identify system components, wiring, and cabling complying with TIA-606-B. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
 - 1. Administration Class: **[Class 1][Class 2][Class 3][Class 4]**.
 - 2. Color-code cross-connect fields and apply colors to voice and data service backboards, connections, covers, and labels.
- B. Paint and label colors for equipment identification shall comply with TIA-606-B for **[Class 2][Class 3][Class 4]** level of administration[, **including optional identification requirements of this standard**].
- C. Cable Schedule: Install in a prominent location in each equipment room and wiring closet. List incoming and outgoing cables and their designations, origins, and destinations. Protect with rigid frame and clear plastic cover. Furnish an electronic copy of final comprehensive schedules for Project.
- D. Cabling Administration Drawings: Show building floor plans with cabling administration-point labeling. Identify labeling convention and show labels for telecommunications closets, terminal hardware and positions, horizontal cables, work areas and workstation terminal positions, grounding buses and pathways, and equipment grounding conductors.
- E. Cable and Wire Identification:
 - 1. Label each cable within **4 inches (100 mm)** of each termination and tap, where it is accessible in a cabinet or junction or outlet box, and elsewhere as indicated.
 - 2. Each wire connected to building-mounted devices is not required to be numbered at the device if wire color is consistent with associated wire connected and numbered within panel or cabinet.
 - 3. Exposed Cables and Cables in Cable Trays and Wire Troughs: Label each cable at intervals not exceeding **15 feet (4.5 m)**.
 - 4. Label each terminal strip, and screw terminal in each cabinet, rack, or panel.
 - a. Individually number wiring conductors connected to terminal strips, and identify each cable

or wiring group, extended from a panel or cabinet to a building-mounted device, with the name and number of a particular device.

- b. Label each unit and field within distribution racks and frames.
- 5. Identification within Connector Fields in Equipment Rooms and Wiring Closets: Label each connector and each discrete unit of cable-terminating and -connecting hardware. Where similar jacks and plugs are used for both voice and data communication cabling, use a different color for jacks and plugs of each service.
- F. Labels shall be preprinted or computer-printed type, with a printing area and font color that contrast with cable jacket color but still comply with TIA-606-B requirements for the following:
 - 1. Cables use flexible vinyl or polyester that flexes as cables are bent.

3.7 FIELD QUALITY CONTROL

- A. Acceptance Testing Preparation:
 - 1. **<Insert requirements>.**
- B. Field tests and inspections must be witnessed by **[Architect][Tenant][authorities having jurisdiction]<Insert names or titles of witnesses>.**
- C. Tests and Inspections:
 - 1. Visually inspect jacket materials for NRTL certification markings. Inspect cabling terminations in communications equipment rooms for compliance with color-coding for pin assignments, and inspect cabling connections for compliance with TIA-568-C.1.
 - 2. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
 - 3. Test twisted pair cabling for DC loop resistance, shorts, opens, intermittent faults, and polarity between conductors. Test operation of shorting bars in connection blocks. Test cables after termination but not cross-connection.
 - a. Test instruments shall meet or exceed applicable requirements in TIA-568-C.2. Perform tests with a tester that complies with performance requirements in "Test Instruments (Normative)" Annex, complying with measurement accuracy specified in "Measurement Accuracy (Informative)" Annex. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.
- D. Data for each measurement shall be documented. Data for submittals shall be printed in a summary report that is formatted similarly to Table 10.1 in BICSI's "Telecommunications Distribution Methods Manual," or shall be transferred from the instrument to the computer, saved as text files, printed, and submitted.
- E. Nonconforming Work:
 - 1. End-to-end cabling will be considered defective if it does not pass tests and inspections.
 - 2. Remove and replace cabling where test results indicate that they do not comply with specified requirements.
- F. Collect, assemble, and submit test and inspection reports.
- G. Manufacturer Services:

1. Engage factory-authorized service representative to **[support][supervise]** field tests and inspections.

3.8 MAINTENANCE

A. Software Service Agreement:

1. Technical Support: Beginning at Substantial Completion, verify that software service agreement includes software support for **[two]<Insert number>** years.
2. Upgrade Service: At Substantial Completion, update software to latest version. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. **[Verify that upgrading software includes operating system and new or revised licenses for using software.]**
 - a. Upgrade Notice: No fewer than **[30]<Insert number>** days to allow Owner to schedule and access the system **[and to upgrade computer equipment if necessary]**.
3. Upgrade Reports: Prepare report after each update, documenting upgrades installed.

SECTION 27 15 23 00 - COMMUNICATIONS OPTICAL FIBER HORIZONTAL CABLING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. 62.5/125-micrometer, multimode, optical fiber cable (OM1).
2. 50/125 micrometer, multimode, optical fiber cable (OM2).
3. 850 nanometer laser-optimized 50/125 micrometer multimode optical fiber cable (OM3).
4. 850 nanometer laser-optimized 50/125 micrometer multimode optical fiber cable (OM4).
5. 9/125 micrometer, single-mode, indoor-outdoor optical fiber cable (OS1).
6. 9/125 micrometer, single-mode, indoor-outdoor optical fiber cable (OS2).
7. Optical fiber cable hardware.
8. Cross-connects and patch panels.
9. Grounding.
10. Identification products.

1.2 DEFINITIONS

- A. BICSI: Building Industry Consulting Service International.
- B. Cross-Connect: A facility enabling the termination of cable elements and their interconnection or cross-connection.
- C. RCDD: Registered Communications Distribution Designer.

1.3 OPTICAL FIBER HORIZONTAL CABLING DESCRIPTION

- A. Optical fiber horizontal cabling system is to provide interconnections between Distributor A, Distributor B, or Distributor C and the equipment outlet, otherwise known as "Cabling Subsystem 1" in the telecommunications cabling system structure. Cabling system consists of horizontal cables, intermediate and main cross-connects, mechanical terminations, and patch cords or jumpers used for horizontal-to-horizontal cross-connection.
 1. TIA-568-C.1 requires that a minimum of two equipment outlets be installed for each work area.
 2. Horizontal cabling is to contain no more than one transition point or consolidation point between the horizontal cross-connect and the equipment outlet.
 3. Bridged taps and splices are not to be installed in the horizontal cabling.
- B. A work area is approximately **100 sq. ft. (9.3 sq. m)**, and includes the components that extend from the equipment outlets to the equipment.
- C. The maximum allowable horizontal cable length is **295 feet (90 m)**. This maximum allowable length does not include an allowance for the length of **16 feet (4.9 m)** to the workstation equipment or in the horizontal cross-connect.

1.4 ACTION SUBMITTALS

A. Product Data:

1. 62.5/125-micrometer, multimode, optical fiber cable (OM1).
2. 50/125 micrometer, multimode, optical fiber cable (OM2).
3. 850 nanometer laser-optimized 50/125 micrometer multimode optical fiber cable (OM3).
4. 850 nanometer laser-optimized 50/125 micrometer multimode optical fiber cable (OM4).
5. 9/125 micrometer, single-mode, indoor-outdoor optical fiber cable (OS1).
6. 9/125 micrometer, single-mode, indoor-outdoor optical fiber cable (OS2).
7. Optical fiber cable hardware.
8. Cross-connects and patch panels.
9. Grounding.
10. Identification products.

B. Shop Drawings: Reviewed and stamped by RCDD.

1. System Labeling Schedules:

- a. Electronic copy of labeling schedules, in software and format selected by Owner.
- b. Electronic copy of labeling schedules that are part of the cabling and asset identification system of the software.

2. Cabling administration Drawings and printouts.

3. Wiring diagrams and installation details of telecommunications equipment, to show location and layout of telecommunications equipment, including the following:

- a. Telecommunications rooms plans and elevations.
- b. Telecommunications pathways.
- c. Telecommunications system access points.
- d. Telecommunications grounding system.
- e. Telecommunications conductor drop locations.
- f. Typical telecommunications details.
- g. Mechanical, electrical, and plumbing systems.

C. Fiber optic cable testing plan.

D. Sustainable Design Submittals:

1. Environmental Product Declaration: For each product.
2. Health Product Declaration: For each product.
3. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
4. Environmental Product Declaration: For each product.
5. Environmental Product Declaration: For each product.
6. Environmental Product Declaration: For each product.
7. Third-Party Certifications: For each product.
8. Third-Party Certified Life Cycle Assessment: For each product.

E. Samples: For telecommunications jacks and plugs, **[in specified finish, one for each type and configuration][and faceplates for color selection and evaluation of technical features]**.

1.5 INFORMATIONAL SUBMITTALS

A. Qualification Data: For **[RCDD,][Installer,]**installation supervisor, and field inspector.

- B. Product Certificates: For each type of product.
- C. Source quality-control reports.
- D. Field quality-control reports.

1.6 CLOSEOUT SUBMITTALS

- A. Software and Firmware Operational Documentation:
 - 1. Software operating and upgrade manuals.
 - 2. Program Software Backup: On USB media or compact disk, complete with data files.
 - 3. Device address list.
 - 4. Printout of software application and graphic screens.
- B. Maintenance Data: For optical fiber cable, splices, and connectors to include in maintenance manuals.

1.7 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 - 1. Connecting Blocks: **[One]<Insert number>** of each type.
 - 2. Jacks: **[Ten]<Insert number>** of each type.
 - 3. Patch-Panel Units: **[One]<Insert number>** of each type.
 - 4. Plugs: **[Ten]<Insert number>** of each type.

1.8 QUALITY ASSURANCE

- A. Installer Qualifications: Cabling Installer must have personnel certified by BICSI on staff.
 - 1. Layout Responsibility: Preparation of Shop Drawings[**and Cabling Administration Drawings**][, **Cabling Administration Drawings, and field testing program development**] by an **[RCDD][Technician]**.
 - 2. Installation Supervision: Installation is to be under the direct supervision of **[Technician][Level 2 Installer]**, who is to be present at all times when Work of this Section is performed at Project site.
 - 3. Testing Supervisor: Currently certified by BICSI as an **[RCDD][Technician]**.
- B. Testing Agency Qualifications: Testing agency must have personnel certified by BICSI on staff.
 - 1. Testing Agency's Field Supervisor: Currently certified by BICSI as an RCDD to supervise on-site testing.

1.9 DELIVERY, STORAGE, AND HANDLING

- A. Test cables upon receipt at Project site.
 - 1. Test optical fiber cable to determine the continuity of the strand end to end. Use **[optical fiber flashlight][or][optical loss test set]<Insert test instrument>**.
 - 2. Test optical fiber cable while on reels. Use an optical time domain reflectometer to verify the cable length and locate cable defects, splices, and connector, including the loss value of each.

Retain test data and include the record in maintenance data.

1.10 PROJECT CONDITIONS

- A. Environmental Limitations: Do not deliver or install cables and connecting materials until wet work in spaces is complete and dry, and temporary HVAC system is operating and maintaining ambient temperature and humidity conditions at occupancy levels during the remainder of the construction period.

1.11 COORDINATION

- A. Coordinate layout and installation of telecommunications pathways and cabling with Owner's telecommunications equipment and service suppliers.

1.12 SOFTWARE SERVICE AGREEMENT

- A. Technical Support: Beginning with Substantial Completion, provide software support for **[two]<Insert number>** years.
- B. Upgrade Service: Update software to latest version at Project completion. Install and program software upgrades that become available within **[two]<Insert number>** years from date of Substantial Completion. Upgrading software is to include operating system. Upgrade is to include new or revised licenses for use of software.
 - 1. Provide **[30]<Insert number>** days' notice to Owner to allow scheduling and access to system and to allow Owner to upgrade computer equipment if necessary.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. General Performance: Horizontal cabling system is to comply with transmission standards in TIA-568-C.1, when tested according to test procedures of this standard.
- B. Telecommunications Pathways and Spaces: Comply with TIA-569-D.
- C. Grounding: Comply with TIA-607-B.

2.2 62.5/125-MICROMETER, MULTIMODE, OPTICAL FIBER CABLE (OM1)

- A. Description: Multimode, 62.5/125-micrometer, **[1][2][4]<Insert number>-fiber, [nonconductive][conductive]**, tight buffer, optical fiber cable.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[Belden Inc.]**

2. [Berk-Tek, a Leviton Company]
 3. [CommScope, Inc]
 4. [Corning Optical Communications; Corning Incorporated]
 5. [General Cable; Prysmian Group North America]
 6. [Hitachi Cable America Inc.]
 7. [Mohawk; a division of Belden Networking, Inc.]
 8. [Prysmian Cables and Systems; Prysmian Group North America]
 9. [Superior Essex Inc.; subsidiary of LS Corp.]
 10. <Insert manufacturer's name>
- C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
1. [Belden Inc.]
 2. [Berk-Tek, a Leviton Company]
 3. [CommScope, Inc]
 4. [Corning Optical Communications; Corning Incorporated]
 5. [General Cable; Prysmian Group North America]
 6. [Hitachi Cable America Inc.]
 7. [Mohawk; a division of Belden Networking, Inc.]
 8. [Prysmian Cables and Systems; Prysmian Group North America]
 9. [Superior Essex Inc.; subsidiary of LS Corp.]
 10. <Insert manufacturer's name>
- D. Standards:
1. Comply with ICEA S-83-596 for mechanical properties.
 2. Comply with TIA-568-C.3 for performance specifications.
 3. Comply with TIA-492AAAA for detailed specifications.
- E. Conductive cable is to be [steel][aluminum] armored type.
- F. Maximum Attenuation: [3.50]<Insert number> dB/km at 850 nm; [1.5]<Insert number> dB/km at 1300 nm.
- G. Minimum Overfilled Modal Bandwidth-length Product: 200 MHz-km at 850 nm; 500 MHz-km at 1300 nm.
- H. Jacket:
1. Jacket Color: [Orange]<Insert color>.
 2. Cable cordage jacket, fiber, unit, and group color is to be according to TIA-598-D.
 3. Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed **40 inches (1000 mm)**.
- I. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444, UL 1651, and NFPA 70 for the following types:
1. Plenum Rated, Nonconductive:
 - a. Type OFNP, complying with NFPA 262.
 - b. Type OFNP in listed plenum communications raceway.
 - c. Type OFNP or Type OFNR in metallic conduit.
 - d. Type OFNP, complying with NFPA 262; Type OFNP in listed plenum communications raceway; or Type OFNP or Type OFNR in metallic conduit.
 2. Plenum Rated, Conductive:

- a. Type OFCP complying with NFPA 262.
- b. Type OFCP or Type OFNP in listed plenum communications raceway.
- c. Type OFCP, Type OFNP, Type OFCR, or Type OFNR in metallic conduit installed per NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."

2.3 50/125 MICROMETER, MULTIMODE, OPTICAL FIBER CABLE (OM2)

- A. Description: Multimode, 50/125-micrometer, [1][2][4]<Insert number>-fiber, [nonconductive][conductive], tight buffer, optical fiber cable.
- B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 1. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 2. [Belden Inc.]
 3. [Berk-Tek, a Leviton Company]
 4. [CommScope, Inc]
 5. [Corning Optical Communications; Corning Incorporated]
 6. [General Cable; Prysmian Group North America]
 7. [Hitachi Cable America Inc.]
 8. [Superior Essex Inc.; subsidiary of LS Corp.]
 9. <Insert manufacturer's name>
- C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 1. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 2. [Belden Inc.]
 3. [Berk-Tek, a Leviton Company]
 4. [CommScope, Inc]
 5. [Corning Optical Communications; Corning Incorporated]
 6. [General Cable; Prysmian Group North America]
 7. [Hitachi Cable America Inc.]
 8. [Superior Essex Inc.; subsidiary of LS Corp.]
 9. <Insert manufacturer's name>
- D. Standards:
 1. Comply with ICEA S-83-596 for mechanical properties.
 2. Comply with TIA-568-C.3 for performance specifications.
 3. Comply with TIA-492AAAB for detailed specifications.
- E. Conductive cable is to be [steel][aluminum] armored type.
- F. Maximum Attenuation: [3.50]<Insert number> dB/km at 850 nm; [1.5]<Insert number> dB/km at 1300 nm.
- G. Minimum Overfilled Modal Bandwidth-length Product: 500 MHz-km at 850 nm; 500 MHz-km at 1300 nm.
- H. Jacket:
 1. Jacket Color: [Orange]<Insert color>.
 2. Cable cordage jacket, fiber, unit, and group color are to be according to TIA-598-D.

3. Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed **40 inches (1000 mm)**.
- I. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444, UL 1651, and NFPA 70 for the following types:
 1. Plenum Rated, Nonconductive:
 - a. Type OFNP, complying with NFPA 262.
 - b. Type OFNP in listed plenum communications raceway.
 - c. Type OFNP or Type OFNR in metallic conduit.
 - d. Type OFNP, complying with NFPA 262; Type OFNP in listed plenum communications raceway; or Type OFNP or Type OFNR in metallic conduit.
 2. Plenum Rated, Conductive:
 - a. Type OFCP[**or Type OFNP**], complying with NFPA 262.
 - b. Type OFCP or Type OFNP in listed plenum communications raceway.
 - c. Type OFC, Type OFN, Type OFCG, Type OFNG, Type OFCP, Type OFNP, Type OFCR, or Type OFNR in metallic conduit installed per NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."
- 2.4 850 NANOMETER LASER-OPTIMIZED, 50/125 MICROMETER, MULTIMODE OPTICAL FIBER CABLE (OM3)
 - A. Description: Multimode, 50/125-micrometer, [1][2][4]<Insert number>-fiber, [nonconductive][conductive], tight buffer, optical fiber cable.
 - B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 1. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 2. [Belden Inc.]
 3. [CommScope, Inc]
 4. [Corning Optical Communications; Corning Incorporated]
 5. [Hitachi Cable America Inc.]
 6. [TE Connectivity Ltd.]
 7. <Insert manufacturer's name>
 - C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 1. [AMP NETCONNECT; a TE Connectivity Ltd. company]
 2. [Belden Inc.]
 3. [CommScope, Inc]
 4. [Corning Optical Communications; Corning Incorporated]
 5. [Hitachi Cable America Inc.]
 6. [TE Connectivity Ltd.]
 7. <Insert manufacturer's name>
 - D. Standards:
 1. Comply with ICEA S-83-596 for mechanical properties.
 2. Comply with TIA-568-C.3 for performance specifications.

3. Comply with TIA-492AAAC for detailed specifications.
 - E. Conductive cable is to be **[steel][aluminum]** armored type.
 - F. Maximum Attenuation: **[3.50]<Insert number>** dB/km at 850 nm; **[1.5]<Insert number>** dB/km at 1300 nm.
 - G. Minimum Overfilled Modal Bandwidth-length Product: 1500 MHz-km at 850 nm; 500 MHz-km at 1300 nm.
 - H. Minimum Effective Modal Bandwidth-length Product: 2000 MHz-km at 850 nm.
 - I. Jacket:
 1. Jacket Color: **[Aqua]<Insert color>**.
 2. Cable cordage jacket, fiber, unit, and group color are to be according to TIA-598-D.
 3. Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed **40 inches (1000 mm)**.
 - J. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444, UL 1651, and NFPA 70 for the following types:
 1. Plenum Rated, Nonconductive:
 - a. Type OFNP, complying with NFPA 262.
 - b. Type OFNP in listed plenum communications raceway.
 - c. Type OFNP or Type OFNR in metallic conduit.
 - d. Type OFNP, complying with NFPA 262; Type OFNP in listed plenum communications raceway; or Type OFNP or Type OFNR in metallic conduit.
 2. Plenum Rated, Conductive:
 - a. Type OFCP **[or Type OFNP]**, complying with NFPA 262.
 - b. Type OFCP or Type OFNP in listed plenum communications raceway.
 - c. Type OFNG, Type OFCP, Type OFNP, Type OFCR, or Type OFNR in metallic conduit installed per NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."
- 2.5 850 NANOMETER LASER-OPTIMIZED, 50/125 MICROMETER, MULTIMODE OPTICAL FIBER CABLE (OM4)
- A. Description: Multimode, 50/125-micrometer, **[1][2][4]<Insert number>**-fiber, **[nonconductive][conductive]**,tight buffer, optical fiber cable.
 - B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 1. **[Belden Inc.]**
 2. **[CommScope, Inc]**
 3. **[Corning Optical Communications; Corning Incorporated]**
 4. **[Hitachi Cable America Inc.]**
 5. **[Mohawk; a division of Belden Networking, Inc.]**

6. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 7. **[TE Connectivity Ltd.]**
 8. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
1. **[Belden Inc.]**
 2. **[CommScope, Inc]**
 3. **[Corning Optical Communications; Corning Incorporated]**
 4. **[Hitachi Cable America Inc.]**
 5. **[Mohawk; a division of Belden Networking, Inc.]**
 6. **[Superior Essex Inc.; subsidiary of LS Corp.]**
 7. **[TE Connectivity Ltd.]**
 8. **<Insert manufacturer's name>**
- D. Standards:
1. Comply with ICEA S-83-596 for mechanical properties.
 2. Comply with TIA-568-C.3 for performance specifications.
 3. Comply with TIA-492AAAD for detailed specifications.
- E. Conductive cable is to be **[steel][aluminum]** armored type.
- F. Maximum Attenuation: **[3.50]<Insert number>** dB/km at 850 nm; **[1.5]<Insert number>** dB/km at 1300 nm.
- G. Minimum Overfilled Modal Bandwidth-length Product: 3500 MHz-km at 850 nm; 500 MHz-km at 1300 nm.
- H. Minimum Effective Modal Bandwidth-length Product: 4700 MHz-km at 850 nm.
- I. Jacket:
1. Jacket Color: **[Aqua]<Insert color>**.
 2. Cable cordage jacket, fiber, unit, and group color are to be according to TIA-598-D.
 3. Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed **40 inches (1000 mm)**.
- J. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444, UL 1651, and NFPA 70 for the following types:
1. Plenum Rated, Nonconductive:
 - a. Type OFNP, complying with NFPA 262.
 - b. Type OFNP in listed plenum communications raceway.
 - c. Type OFNP or Type OFNR in metallic conduit.
 - d. Type OFNP, complying with NFPA 262; Type OFNP in listed plenum communications raceway; or Type OFN, Type OFNG, Type OFNP, or Type OFNR in metallic conduit.
 2. Plenum Rated, Conductive:
 - a. Type OFCP, complying with NFPA 262.
 - b. Type OFCP or Type OFNP in listed plenum communications raceway.
 - c. Type OFCP, Type OFNP, Type OFCR, or Type OFNR in metallic conduit installed per NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."

- 2.6 9/125 MICROMETER SINGLE-MODE, INDOOR-OUTDOOR OPTICAL FIBER CABLE (OS1)
- A. Description: Single mode, 9/125-micrometer, [1][2]<Insert number> fibers, tight buffered, [nonconductive][conductive] optical fiber cable.
 - B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - 1. [3M]
 - 2. [Belden Inc.]
 - 3. [Corning Optical Communications; Corning Incorporated]
 - 4. [General Cable; Prysmian Group North America]
 - 5. [Mohawk; a division of Belden Networking, Inc.]
 - 6. [Superior Essex Inc.; subsidiary of LS Corp.]
 - 7. [TE Connectivity Ltd.]
 - 8. <Insert manufacturer's name>
 - C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - 1. [3M]
 - 2. [Belden Inc.]
 - 3. [Corning Optical Communications; Corning Incorporated]
 - 4. [General Cable; Prysmian Group North America]
 - 5. [Mohawk; a division of Belden Networking, Inc.]
 - 6. [Superior Essex Inc.; subsidiary of LS Corp.]
 - 7. [TE Connectivity Ltd.]
 - 8. <Insert manufacturer's name>
 - D. Conductive cable is to be [steel][aluminum] armored type.
 - E. Maximum Attenuation: [0.5]<Insert number> dB/km at 1310 nm; [0.5]<Insert number> dB/km at 1550 nm.
 - F. Jacket:
 - 1. Jacket Color: [Yellow]<Insert color>.
 - 2. Cable cordage jacket, fiber, unit, and group color are to be according to TIA-598-D.
 - 3. Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed **40 inches (1000 mm)**.
 - G. Standards:
 - 1. Comply with TIA-492CAAA for detailed specifications.
 - 2. Comply with TIA-568-C.3 for performance specifications.
 - 3. Comply with ICEA S-104-696 for mechanical properties.
 - H. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444, UL 1651, and NFPA 70 for the following types:
 - 1. Plenum Rated, Nonconductive:
 - a. Type OFNP, complying with NFPA 262.
 - b. Type OFNP in listed plenum communications raceway.

- c. Type OFNP or Type OFNR in metallic conduit.
 - d. Type OFNP, complying with NFPA 262; Type OFNP in listed plenum communications raceway; or Type OFN, Type OFNG, Type OFNP, or Type OFNR in metallic conduit.
 - 2. Plenum Rated, Conductive:
 - a. Type OFCP, complying with NFPA 262.
 - b. Type OFCP or Type OFNP in listed plenum communications raceway.
 - c. Type OFCP, Type OFNP, Type OFCR, or Type OFNR in metallic conduit installed per NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."
- 2.7 9/125 MICROMETER, SINGLE-MODE, INDOOR-OUTDOOR OPTICAL FIBER CABLE (OS2)
- A. Description: Single mode, 9/125-micrometer, [1][2]<Insert number> fibers, tight buffered, [nonconductive][conductive] optical fiber cable.
 - B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - 1. [3M]
 - 2. [Belden Inc.]
 - 3. [Berk-Tek, a Leviton Company]
 - 4. [CommScope, Inc]
 - 5. [Hitachi Cable America Inc.]
 - 6. [Mohawk; a division of Belden Networking, Inc.]
 - 7. [Superior Essex Inc.; subsidiary of LS Corp.]
 - 8. <Insert manufacturer's name>
 - C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - 1. [3M]
 - 2. [Belden Inc.]
 - 3. [Berk-Tek, a Leviton Company]
 - 4. [CommScope, Inc]
 - 5. [Hitachi Cable America Inc.]
 - 6. [Mohawk; a division of Belden Networking, Inc.]
 - 7. [Superior Essex Inc.; subsidiary of LS Corp.]
 - 8. <Insert manufacturer's name>
 - D. Conductive cable is to be [steel][aluminum] armored type.
 - E. Maximum Attenuation: [0.5]<Insert number> dB/km at 1310 nm; [0.5]<Insert number> dB/km at 1550 nm.
 - F. Jacket:
 - 1. Jacket Color: [Yellow]<Insert color>.
 - 2. Cable cordage jacket, fiber, unit, and group color are to be according to TIA-598-D.
 - 3. Imprinted with fiber count, fiber type, and aggregate length at regular intervals not to exceed 40 inches (1000 mm).
 - G. Standards:

1. Comply with TIA-492CAAB for detailed specifications.
2. Comply with TIA-568-C.3 for performance specifications.
3. Comply with ICEA S-104-696 for mechanical properties.

H. Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444, UL 1651, and NFPA 70 for the following types:

1. Plenum Rated, Nonconductive:
 - a. Type OFNP, complying with NFPA 262.
 - b. Type OFNP in listed plenum communications raceway.
 - c. Type OFNP or Type OFNR in metallic conduit.
 - d. Type OFNP, complying with NFPA 262; Type OFNP in listed plenum communications raceway; or Type OFN, Type OFNG, Type OFNP, or Type OFNR in metallic conduit.
2. Plenum Rated, Conductive:
 - a. Type OFCP, complying with NFPA 262.
 - b. Type OFCP or Type OFNP in listed plenum communications raceway.
 - c. Type OFCP, Type OFNP, Type OFCR, or Type OFNR in metallic conduit installed per NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."

2.8 OPTICAL FIBER CABLE HARDWARE

A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

1. **[American Technology Systems Industries, Inc]**
2. **[Belden Inc.]**
3. **[Berk-Tek, a Leviton Company]**
4. **[CommScope, Inc]**
5. **[Corning Optical Communications; Corning Incorporated]**
6. **[Dynacom Corporation]**
7. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
8. **[Molex Premise Networks]**
9. **[Optical Cable Corporation (OCC)]**
10. **[Siemon Co. (The)]**
11. **[Stewart Connector, a Bel group company; Bel Fuse Inc.]**
12. **<Insert manufacturer's name>**

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. **[American Technology Systems Industries, Inc]**
2. **[Belden Inc.]**
3. **[Berk-Tek, a Leviton Company]**
4. **[CommScope, Inc]**
5. **[Corning Optical Communications; Corning Incorporated]**
6. **[Dynacom Corporation]**
7. **[Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated]**
8. **[Molex Premise Networks]**
9. **[Optical Cable Corporation (OCC)]**
10. **[Siemon Co. (The)]**

11. **[Stewart Connector, a Bel group company; Bel Fuse Inc.]**
12. **<Insert manufacturer's name>**

C. Standards:

1. Comply with Fiber Optic Connector Intermateability Standard (FOCIS) specifications of the TIA-604 series.
2. Comply with TIA-568-C.3.

D. Cross-Connects and Patch Panels: Modular panels housing multiple-numbered, duplex cable connectors.

1. Number of Connectors per Field: **[One]<Insert number>** for each fiber of cable or cables assigned to field, plus spares and blank positions adequate to suit specified expansion criteria.

E. Patch Cords: Factory-made, single-fiber cables in **36-inch (900-mm)** lengths.

F. Connector Type: **[Type SC complying with TIA-604-3-B],[Type ST complying with TIA-604-2-B],[Type LC complying with TIA-604-10-B],[Type MT-RJ complying with TIA-604-12],[Type MPO complying with TIA-604-5-D],<Insert type>** connectors.

G. Plugs and Plug Assemblies:

1. Male; color-coded modular telecommunications connector designed for termination of a single optical fiber cable.
2. Insertion loss not more than **[0.25][0.75]<Insert number>** dB.
3. Marked to indicate transmission performance.

H. Jacks and Jack Assemblies:

1. Female; quick-connect, simplex and duplex; fixed telecommunications connector designed for termination of a single optical fiber cable.
2. Insertion loss not more than **[0.25][0.75]<Insert number>** dB.
3. Marked to indicate transmission performance.
4. Designed to snap-in to a patch panel or faceplate.

I. Faceplate:

1. **[Two][Four][Six]** -port, vertical single-gang faceplates designed to mount to single-gang wall boxes.
2. **[Eight][Ten][Twelve]** -port, vertical double-gang faceplates designed to mount to double-gang wall boxes.
3. Plastic Faceplate: High-impact plastic. Coordinate color with Section 262726 "Wiring Devices."
4. Metal Faceplate: **[Stainless steel][Brass]<Insert description>**, complying with requirements in Section 262726 "Wiring Devices."
5. For use with snap-in jacks accommodating any combination of twisted pair, optical fiber, and coaxial work area cords.
 - a. Flush mounting jacks, positioning the cord at a 45-degree angle.

2.9 GROUNDING

- A. Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems" for grounding conductors and connectors.

- B. Comply with TIA-607-B.

2.10 IDENTIFICATION PRODUCTS

- A. Comply with TIA-606-B and UL 969 for a system of labeling materials, including label stocks, laminating adhesives, and inks used by label printers.

2.11 SOURCE QUALITY CONTROL

- A. Testing Agency: Engage a qualified testing agency to evaluate cables.
- B. Factory test multimode optical fiber cables according to TIA-526-14-B and TIA-568-C.3.
- C. Factory test preterminated optical fiber cable assemblies according to TIA-526-14-B and TIA-568-C.3.
- D. Cable will be considered defective if it does not pass tests and inspections.
- E. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 WIRING METHODS

- A. Wiring Method, Raceways: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters[**and except in accessible ceiling spaces, in attics, and in gypsum board partitions where unenclosed wiring method may be used**]. Conceal raceway and cables except in unfinished spaces.
 - 1. Install plenum cable in environmental air spaces, including plenum ceilings.
 - 2. Comply with requirements for pathways specified in Section 270528 "Pathways for Communications Systems."
- B. Wiring Method, Concealed: Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
- C. Wiring within Enclosures: Bundle, lace, and train cables within enclosures. Connect to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.

3.2 INSTALLATION OF OPTICAL FIBER BACKBONE CABLES

- A. Comply with NECA 1, NECA 301 and NECA/BICSI 568.
- B. General Requirements for Optical Fiber Cabling Installation:
 - 1. Comply with TIA-568-C.1 and TIA-568-C.3.
 - 2. Comply with BICSI ITSIMM, Ch. 6, "Cable Termination Practices."
 - 3. Terminate all cables; no cable is to contain unterminated elements. Make terminations only at indicated outlets, terminals, cross-connects, and patch panels.

4. Cables may not be spliced. Secure and support cables at intervals not exceeding **30 inches (760 mm)** and not more than **6 inches (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
5. Install lacing bars to restrain cables, to prevent straining connections, and to prevent bending cables to smaller radii than minimums recommended by manufacturer.
6. Bundle, lace, and train cable to terminal points without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI ITSIMM, "Cabling Termination Practices" Chapter. Use lacing bars and distribution spools.
7. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation and replace it with new cable.
8. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps are not to be used for heating.
9. In the communications equipment room, provide a **10-foot- (3-m-)** long service loop on each end of cable.
10. Pulling Cable: Comply with BICSI ITSIMM, Ch. 4, "Pulling Cable." Monitor cable pull tensions.
11. Cable may be terminated on connecting hardware that is rack or cabinet mounted.

C. Open-Cable Installation:

1. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
2. Cable is not to be run through structural members or in contact with pipes, ducts, or other potentially damaging items.

D. Installation of Cable Routed Exposed under Raised Floors:

1. Install plenum-rated cable only.
2. Install cabling after the flooring system has been installed in raised floor areas.
3. Coil cable [**6 feet (1800 mm)**]**<Insert size>** long not less than [**12 inches (300 mm)**]**<Insert size>** in diameter below each feed point.

E. Group connecting hardware for cables into separate logical fields.

3.3 FIRESTOPPING

- A. Comply with requirements in Section 078413 "Penetration Firestopping."
- B. Comply with TIA-569-D, Annex A, "Firestopping."
- C. Comply with BICSI ITSIMM, "Firestopping" Chapter.

3.4 INSTALLATION OF GROUNDING

- A. Install grounding according to BICSI ITSIMM, "Grounding (Earthing), Bonding, and Electrical Protection" Chapter.
- B. Comply with TIA-607-B and NECA/BICSI-607.
- C. Locate grounding bus bar to minimize the length of bonding conductors. Fasten to wall allowing at least **2-inch (50-mm)** clearance behind the grounding bus bar. Connect grounding bus bar with a minimum No. 4 AWG grounding electrode conductor from grounding bus bar to suitable electrical building ground.
- D. Bond metallic equipment to the grounding bus bar, using not smaller than No. 6 AWG equipment

grounding conductor.

3.5 IDENTIFICATION

- A. Identify system components, wiring, and cabling complying with TIA-606-B. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."
 - 1. Administration Class: **[Class 1][Class 2][Class 3][Class 4]**.
 - 2. Color-code cross-connect fields and apply colors to voice and data service backboards, connections, covers, and labels.
- B. Paint and label colors for equipment identification are to comply with TIA-606-B for **[Class 2][Class 3][Class 4]** level of administration **[including optional identification requirements of this standard]**.
- C. Cable Schedule: Install in a prominent location in each equipment room and wiring closet. List incoming and outgoing cables and their designations, origins, and destinations. Protect with rigid frame and clear plastic cover. Furnish an electronic copy of final comprehensive schedules for Project.
- D. Cabling Administration Drawings: Show building floor plans with cabling administration-point labeling. Identify labeling convention and show labels for telecommunications closets, **[horizontal pathways and cables],[entrance pathways and cables,]** terminal hardware and positions, horizontal cables, work areas and workstation terminal positions, grounding buses and pathways, and equipment grounding conductors.
- E. Cable and Wire Identification:
 - 1. Label each cable within **4 inches (100 mm)** of each termination and tap, where it is accessible in a cabinet or junction or outlet box, and elsewhere as indicated.
 - 2. Each wire connected to building-mounted devices is not required to be numbered at device if color of wire is consistent with associated wire connected and numbered within panel or cabinet.
 - 3. Exposed Cables and Cables in Cable Trays and Wire Troughs: Label each cable at intervals not exceeding **15 feet (4.5 m)**.
 - 4. Label each unit and field within distribution racks and frames.
 - 5. Identification within Connector Fields in Equipment Rooms and Wiring Closets: Label each connector and each discrete unit of cable-terminating and connecting hardware. Where similar jacks and plugs are used for both voice and data communication cabling, use a different color for jacks and plugs of each service.
- F. Labels are to be preprinted or computer-printed type with printing area and font color that contrasts with cable jacket color but still complies with requirements in TIA 606-B, for the following:
 - 1. Flexible vinyl or polyester that flexes as cables are bent.

3.6 FIELD QUALITY CONTROL

- A. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to perform tests and inspections.
- B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
- C. Perform tests and inspections **[with the assistance of a factory-authorized service representative]**.

D. Tests and Inspections:

1. Visually inspect optical fiber jacket materials for NRTL certification markings. Inspect cabling terminations in communications equipment rooms for compliance with color-coding for pin assignments, and inspect cabling connections for compliance with TIA-568-C.1.
2. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
3. Optical Fiber Cable Tests:
 - a. Test instruments are to meet or exceed applicable requirements in TIA-568-C.1. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.
 - b. Link End-to-End Attenuation Tests:
 - 1) Horizontal and Multimode Horizontal Link Measurements: Test at 850 or 1300 nm in one direction according to TIA-526-14-B, Method B, One Reference Jumper.
 - 2) Attenuation test results for horizontal links are to be less than 2.0 dB. Attenuation test results are to be less than those calculated according to equation in TIA-568-C.1.

- E. Data for each measurement are to be documented. Data for submittals are to be printed in a summary report that is formatted similar to Table 10.1 in BICSI TDM, or transferred from the instrument to the computer, saved as text files, and printed and submitted.
- F. Remove and replace cabling where test results indicate that it does not comply with specified requirements.
- G. End-to-end cabling will be considered defective if it does not pass tests and inspections.
- H. Prepare test and inspection reports.

END OF SECTION 27 15 23 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 27 15 33 00 - COMMUNICATIONS COAXIAL HORIZONTAL CABLING

PART 1 - GENERAL

1.1 SUMMARY

- A. Section Includes:
1. Communications coaxial cable.
 2. CATV coaxial cable.
 3. Coaxial cable hardware.
 4. Grounding.
 5. Identification products.

1.2 DEFINITIONS

- A. BICSI: Building Industry Consulting Service International.
- B. EMI: Electromagnetic interference.
- C. IDC: Insulation displacement connector.
- D. LAN: Local area network.
- E. RCDD: Registered Communications Distribution Designer.

1.3 COAXIAL HORIZONTAL CABLING DESCRIPTION

- A. Coaxial horizontal cabling system is to provide interconnections between Distributor A, Distributor B, or Distributor C and the equipment outlet, otherwise known as "Cabling Subsystem 1" in the telecommunications cabling system structure. Cabling system consists of horizontal cables, mechanical terminations, and patch cords or jumpers used for horizontal-to-horizontal cross-connection.

1.4 ACTION SUBMITTALS

- A. Product Data:
1. Communications coaxial cable.
 2. CATV coaxial cable.
 3. Coaxial cable hardware.
 4. Grounding.
 5. Identification products.
- B. Product Data Submittals: For each product.
1. Nominal OD.
 2. Minimum bending radius.
 3. Maximum pulling tension.

C. Shop Drawings:

1. System Labeling Schedule:
 - a. Electronic copy of labeling schedules, in software and format selected by Owner.
 - b. Electronic copy of labeling schedules that are part of the cabling and asset identification system of the software.
2. Cabling administration drawings and printouts.

D. Sustainable Design Submittals:

1. Environmental Product Declaration: For each product.
2. Health Product Declaration: For each product.
3. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
4. Environmental Product Declaration: For each product.
5. Environmental Product Declaration: For each product.
6. Environmental Product Declaration: For each product.
7. Third-Party Certifications: For each product.
8. Third-Party Certified Life Cycle Assessment: For each product.
9. Samples: For telecommunications jacks and plugs, **[in specified finish, one for each type and configuration][and faceplates for color selection and evaluation of technical features]**.

1.5 INFORMATIONAL SUBMITTALS

- A. Qualification Data: For **[RCDD,][Installer,]** installation supervisor, and field inspector.
- B. Source quality-control reports.
- C. Field quality-control reports.
- D. Maintenance Data: For splices and connectors to include in maintenance manuals.

1.6 CLOSEOUT SUBMITTALS

- A. Maintenance Data: For coaxial cable, splices, and connectors to include in maintenance manuals.

1.7 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.
 1. Connecting Blocks: **[One]<Insert number>** of each type.
 2. Jacks: **[Ten]<Insert number>** of each type.
 3. Patch-Panel Units: **[One]<Insert number>** of each type.
 4. Plugs: **[Ten]<Insert number>** of each type.

1.8 QUALITY ASSURANCE

- A. Installer Qualifications: Cabling Installer must have personnel certified by BICSI on staff.

1. Layout Responsibility: Preparation of Shop Drawings[**and Cabling Administration Drawings**][, **Cabling Administration Drawings, and field testing program development**] by an **[RCDD][Technician]**.
 2. Installation Supervision: Installation is to be under the direct supervision of **[Technician][Level 2 Installer]**, who is to be present at all times when Work of this Section is performed at Project site.
- B. Testing Agency Qualifications: Testing agency must have personnel certified by BICSI on staff.
1. Testing Agency's Field Supervisor: Currently certified by BICSI as an RCDD.

1.9 DELIVERY, STORAGE, AND HANDLING

- A. Test cables upon receipt at Project site.
1. Test each coaxial cable **[on the reel]** for continuity.

1.10 PROJECT CONDITIONS

- A. Environmental Limitations: Do not deliver or install cables and connecting materials until wet work in spaces is complete and dry, and temporary HVAC system is operating and maintaining ambient temperature and humidity conditions at occupancy levels during the remainder of the construction period.

1.11 COORDINATION

- A. Coordinate layout and installation of telecommunications pathways and cabling with Owner's telecommunications and LAN equipment and service suppliers.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. General Performance: Horizontal cabling system is to comply with transmission standards in TIA-568-C.1, when tested according to test procedures of this standard, and the requirements of TIA-568-C.4.
- B. Telecommunications Pathways and Spaces: Comply with TIA-569-D.
- C. Grounding: Comply with TIA-607-B.

2.2 GENERAL CABLE CHARACTERISTICS

- A. Communications Cable: Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with the applicable standard and NFPA 70 for the following types:
1. Communications, Plenum Rated, Type CMP: Complying with UL 1685[**or Type CMP in listed plenum communications raceway**][**or Type CMP in listed cable routing assembly**].
 2. Communications, Plenum Rated: Type CM, Type CMG, Type CMP, Type CMR, or Type CMX in metallic conduit installed in accordance with NFPA 70, Article 300.22, "Wiring in Ducts, Plenums, and Other Air-Handling Spaces."

- B. CATV Cable: Listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with the applicable standard and NFPA 70 for the following types:
 - 1. CATV Plenum Rated: Type CATVP [installed in riser raceways or cable routing assemblies], complying with NFPA 262.
 - 2. CATV Cable: Type CATV[, or CATVP or CATVR][installed in general purpose, riser, or plenum communications raceways or cable routing assemblies] in fireproof riser shafts with firestops at each penetration.

2.3 COMMUNICATIONS COAXIAL CABLE

- A. Description: Coaxial cable with a 75-ohm characteristic impedance designed for broadband data transmission.
- B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - 1. [Alpha Wire; brand of Belden, Inc.]
 - 2. [Belden Inc.]
 - 3. [CommScope, Inc]
 - 4. [Prysmian Cables and Systems; Prysmian Group North America]
 - 5. [Southwire Company, LLC]
 - 6. <Insert manufacturer's name>
- C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - 1. [Alpha Wire; brand of Belden, Inc.]
 - 2. [Belden Inc.]
 - 3. [CommScope, Inc]
 - 4. [Prysmian Cables and Systems; Prysmian Group North America]
 - 5. [Southwire Company, LLC]
 - 6. <Insert manufacturer's name>
- D. NFPA and UL compliance, listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 444, UL 13, and with NFPA 70, "Class 1, Class 2, and Class 3 Remote-Control, Signaling, and Power-Limited Circuits" and "Communications Circuits" articles. Types are as follows:
 - 1. RG-6/U: UL Type [CMP][and][CL2P].
 - a. No. [16][18]<Insert size> AWG, solid, copper-covered steel conductor.
 - b. Plenum rated.
 - c. Gas-injected, foam-PE insulation.
 - d. Shielded with 100 percent aluminum tape and [40][60] percent aluminum braid.
 - e. Double shielded with 100 percent aluminum foil shield, 60 percent aluminum braided inner shield, and 40 percent aluminum braided outer shield.
 - f. Jacketed with [black][white] PVC or PE.
 - g. Suitable for indoor installations.
 - 2. RG-11/U: UL Type [CMP][and][CL2P].
 - a. No. [14]<Insert size> AWG, solid, copper-covered steel conductor.
 - b. Plenum rated. Suitable for outdoor installations in ambient temperatures ranging from

minus 40 to plus 85 deg F (minus 40 to plus 30 deg C).

- c. Gas-injected, foam-PE insulation.
 - d. Shielded with 100 percent aluminum tape and [40][60] percent aluminum braid.
 - e. Double shielded with 100 percent aluminum foil shield, 60 percent aluminum braided inner shield, and 40 percent aluminum braided outer shield.
 - f. Jacketed with sunlight-resistant, [black][white] PVC or PE.
3. RG-59/U: UL Type [CMP][and][CL2P].
- a. No. [20]<Insert size> AWG, solid copper conductor.
 - b. Plenum rated.
 - c. Gas-injected, foam-PE insulation.
 - d. Single shielded with 100 percent aluminum shield and 40 percent aluminum braid.
 - e. PVC jacket.

2.4 CATV COAXIAL CABLE

- A. Description: Coaxial cable with a 75-ohm characteristic impedance designed for CATV transmission.
- B. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
- 1. [Alpha Wire; brand of Belden, Inc.]
 - 2. [Belden Inc.]
 - 3. [CommScope, Inc]
 - 4. [Prysmian Cables and Systems; Prysmian Group North America]
 - 5. [Southwire Company, LLC]
 - 6. <Insert manufacturer's name>
- C. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
- 1. [Alpha Wire; brand of Belden, Inc.]
 - 2. [Belden Inc.]
 - 3. [CommScope, Inc]
 - 4. [Prysmian Cables and Systems; Prysmian Group North America]
 - 5. [Southwire Company, LLC]
 - 6. <Insert manufacturer's name>
- D. NFPA and UL compliance, listed and labeled by an NRTL acceptable to authorities having jurisdiction as complying with UL 1655 and with NFPA 70, "Community Antenna Television and Radio Distribution Systems" Article. Types are as follows:
- 1. RG-6/U: UL Type CATVP.
 - a. No. 18 AWG, solid, copper-covered steel conductor.
 - b. Plenum rated.
 - c. Gas-injected, foam-PE insulation.
 - d. Shielded with 100 percent aluminum tape and [40][60] percent aluminum braid.
 - e. Double shielded with 100 percent aluminum foil shield, 60 percent aluminum braided inner shield, and 40 percent aluminum braided outer shield.
 - f. Jacketed with [black][white] PVC or PE.
 - g. Suitable for indoor installations.

2.5 COAXIAL CABLE HARDWARE

- A. Description: Hardware designed to connect, splice, and terminate coaxial cable with a 75-ohm characteristic impedance.
- B. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[Leviton Manufacturing Co., Inc.]**
 - 2. **[Liebert; Vertiv Holdings Co.]**
 - 3. **[Siemon Co. (The)]**
 - 4. **<Insert manufacturer's name>**
- C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[Leviton Manufacturing Co., Inc.]**
 - 2. **[Liebert; Vertiv Holdings Co.]**
 - 3. **[Siemon Co. (The)]**
 - 4. **<Insert manufacturer's name>**
- D. Coaxial-Cable Connectors: Type BNC, 75 ohms.
- E. Jacks and Jack Assemblies: Modular, color-coded, with female Type BNC connectors.
- F. Patch Cords: Factory-made cables in **[36-inch (900-mm)][48-inch (1200-mm)]<Insert length>**lengths; terminated with a male Type BNC connector at each end.
- G. Faceplates:
 - 1. Plastic Faceplate: High-impact plastic. Coordinate color with Section 262726 "Wiring Devices."
 - 2. Metal Faceplate: **[Stainless steel][Brass]<Insert description>**, complying with requirements in Section 262726 "Wiring Devices."
 - 3. For use with snap-in jacks accommodating any combination of twisted pair, optical-fiber, and coaxial work area cords.
 - a. Flush-mounted jacks, positioning the cord at a 90-degree angle from faceplate surface.
 - 4. Legend:
 - a. Factory labeled by silk-screening or engraving **[for][stainless steel][brass]<Insert description>[faceplates]**.
 - b. Machine printed, in the field, using adhesive-tape label.
 - c. Snap-in, clear-label covers and machine-printed paper inserts.

2.6 GROUNDING

- A. Comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems" for grounding conductors and connectors.
- B. Comply with TIA-607-B.

2.7 IDENTIFICATION PRODUCTS

- A. Comply with TIA-606-B and UL 969 for a system of labeling materials, including label stocks, laminating adhesives, and inks used by label printers.

2.8 SOURCE QUALITY CONTROL

- A. Testing Agency: Engage a qualified testing agency to evaluate cables.
- B. Cable will be considered defective if it does not pass tests and inspections.
- C. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 ENTRANCE FACILITIES

- A. Coordinate horizontal cabling with the protectors and demarcation point provided by communications service provider.

3.2 WIRING METHODS

- A. Wiring Method, Raceways: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters[**and except in accessible ceiling spaces, in attics, and in gypsum board partitions where unenclosed wiring method may be used**]. Conceal raceway and cables except in unfinished spaces.
 - 1. Install plenum cable in environmental air spaces, including plenum ceilings.
 - 2. Comply with requirements for raceways and boxes specified in Section 270528 "Pathways for Communications Systems."
- B. Wiring Method, Concealed: Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
- C. Wiring within Enclosures: Bundle, lace, and train cables within enclosures. Connect to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.

3.3 INSTALLATION OF PATHWAYS

- A. Comply with Section 271100 "Communications Equipment Room Fittings." Comply with requirements in Section 270528 "Pathways for Communications Systems" for installation of conduits and wireways.
- B. Comply with Section 270528.29 "Hangers and Supports for Communications Systems."
- C. Drawings indicate general arrangement of pathways and fittings.
- D. Comply with NFPA 70 for pull-box sizing and length of conduit and number of bends between pull points.

- E. Install manufactured conduit sweeps and long-radius elbows whenever possible.
- F. Pathway Installation in Communications Equipment Rooms:
 - 1. Position conduit ends adjacent to a corner on backboard where a single piece of plywood is installed, or in the corner of room where multiple sheets of plywood are installed around perimeter walls of room.
 - 2. Install cable trays to route cables if conduits cannot be located in these positions.
 - 3. Secure conduits to backboard when entering room from overhead.
 - 4. Extend conduits [**3 inches (76 mm)**]**<Insert dimension>** above finished floor.
 - 5. Install metal conduits with grounding bushings and connect with grounding conductor to grounding system.
- G. Backboards: Install backboards with **96-inch (2440-mm)** dimension vertical. Butt adjacent sheets tightly, and form smooth gap-free corners and joints.

3.4 INSTALLATION OF COAXIAL HORIZONTAL CABLES

- A. Comply with NECA 1 and NECA/BICSI 568.
- B. General Requirements for Cabling:
 - 1. Comply with BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems," "Cable Termination Practices" Section.
 - 2. Terminate all conductors; no cable is to contain unterminated elements. Make terminations only at indicated outlets, terminals, and patch panels.
 - 3. Cables may not be spliced. Secure and support cables at intervals not exceeding **30 inches (760 mm)** and not more than **6 inches (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
 - 4. Install lacing bars to restrain cables, to prevent straining connections, and to prevent bending cables to smaller radii than minimums recommended by manufacturer.
 - 5. Bundle, lace, and train conductors to terminal points without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems," "Cable Termination Practices" Section. Use lacing bars and distribution spools.
 - 6. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation and replace it with new cable.
 - 7. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps are not to be used for heating.
 - 8. In the communications equipment room, install a **10-foot- (3-m-)** long service loop on each end of cable.
 - 9. Pulling Cable: Comply with BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems," "Pulling Cable" Section. Monitor cable pull tensions.
- C. Open-Cable Installation:
 - 1. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
 - 2. Suspend coaxial cable not in a wireway or pathway a minimum of **8 inches (200 mm)** above ceilings by cable supports not more than [**60 inches (1524 mm)**]**<Insert dimension>** apart.
 - 3. Cable is not to be run through structural members or in contact with pipes, ducts, or other potentially damaging items.

- D. Installation of Cable Routed Exposed under Raised Floors:
1. Install plenum-rated cable only.
 2. Install cabling after the flooring system has been installed in raised floor areas.
 3. Coil cable **[6 feet (1800 mm)]<Insert size>** long not less than **[12 inches (300 mm)]<Insert size>** in diameter below each feed point.
- E. Outdoor Coaxial Cable Installation:
1. Install outdoor connections in enclosures complying with NEMA 250, Type 4X. Install corrosion-resistant connectors with properly designed O-rings to keep out moisture.
 2. Attach antenna lead-in cable to support structure at intervals not exceeding **36 inches (915 mm)**.
- F. Group connecting hardware for cables into separate logical fields.
- G. Separation from EMI Sources:
1. Separation between open communications cables or cables in nonmetallic raceways and unshielded power conductors and electrical equipment is to be as follows:
 - a. Electrical Equipment Rating Less Than 2 kVA: A minimum of **5 inches (127 mm)**.
 - b. Electrical Equipment Rating Between 2 and 5 kVA: A minimum of **12 inches (300 mm)**.
 - c. Electrical Equipment Rating More Than 5 kVA: A minimum of **24 inches (610 mm)**.
 2. Separation between communications cables in grounded metallic raceways and unshielded power lines or electrical equipment is to be as follows:
 - a. Electrical Equipment Rating Less Than 2 kVA: A minimum of **2-1/2 inches (64 mm)**.
 - b. Electrical Equipment Rating Between 2 and 5 kVA: A minimum of **6 inches (150 mm)**.
 - c. Electrical Equipment Rating More Than 5 kVA: A minimum of **12 inches (300 mm)**.
 3. Separation between communications cables in grounded metallic raceways and power lines and electrical equipment located in grounded metallic conduits or enclosures is to be as follows:
 - a. Electrical Equipment Rating Less Than 2 kVA: No requirement.
 - b. Electrical Equipment Rating Between 2 and 5 kVA: A minimum of **3 inches (76 mm)**.
 - c. Electrical Equipment Rating More Than 5 kVA: A minimum of **6 inches (150 mm)**.
 4. Separation between Communications Cables and Electrical Motors and Transformers, 5 kVA or HP and Larger: A minimum of **48 inches (1200 mm)**.
 5. Separation between Communications Cables and Fluorescent Fixtures: A minimum of **5 inches (127 mm)**.

3.5 FIRESTOPPING

- A. Comply with requirements in Section 078413 "Penetration Firestopping."
- B. Comply with TIA-569-D, Annex A, "Firestopping."
- C. Comply with BICSI TDMM, "Firestopping Systems" Article.

3.6 INSTALLATION OF GROUNDING

- A. Install grounding according to BICSI TDMM, "Grounding, Bonding, and Electrical Protection" Chapter.
- B. Comply with TIA-607-B and NECA/BICSI-607.
- C. Locate grounding bus bar to minimize the length of bonding conductors. Fasten to wall allowing at least **2-inch (50-mm)** clearance behind the grounding bus bar. Connect grounding bus bar with a minimum No. 4 AWG grounding electrode conductor from grounding bus bar to suitable electrical building ground.
- D. Bond metallic equipment to the grounding bus bar, using not smaller than No. 6 AWG equipment grounding conductor.

3.7 IDENTIFICATION

- A. Identify system components, wiring, and cabling complying with TIA-606-B. Comply with requirements for identification specified in Section 260529 "Hangers and Supports for Electrical Systems."
 - 1. Administration Class: **[Class 1][Class 2][Class 3][Class 4]**.
 - 2. Color-code fields and apply colors to voice and data service backboards, connections, covers, and labels.
- B. Cable Schedule: Install in a prominent location in each equipment room and wiring closet. List incoming and outgoing cables and their designations, origins, and destinations. Protect with rigid frame and clear plastic cover. Furnish an electronic copy of final comprehensive schedules for Project.
- C. Cabling Administration Drawings: Show building floor plans with cabling administration-point labeling. Identify labeling convention and show labels for telecommunications closets, **[horizontal pathways and cables],[entrance pathways and cables,]** terminal hardware and positions, horizontal cables, work areas and workstation terminal positions, grounding buses and pathways, and equipment grounding conductors.
- D. Cable and Wire Identification:
 - 1. Label each cable within **4 inches (100 mm)** of each termination and tap, where it is accessible in a cabinet or junction or outlet box, and elsewhere as indicated.
 - 2. Each wire connected to building-mounted devices is not required to be numbered at device if color of wire is consistent with associated wire connected and numbered within panel or cabinet.
 - 3. Exposed Cables and Cables in Cable Trays and Wire Troughs: Label each cable at intervals not exceeding **15 feet (4.5 m)**.
 - 4. Label each terminal strip and screw terminal in each cabinet, rack, or panel.
 - a. Individually number wiring conductors connected to terminal strips and identify each cable or wiring group being extended from a panel or cabinet to a building-mounted device with name and number of particular device as shown.
 - b. Label each unit and field within distribution racks and frames.
 - 5. Identification within Connector Fields in Equipment Rooms and Wiring Closets: Label each connector and each discrete unit of cable-terminating and connecting hardware. Where similar jacks and plugs are used for both voice and data communications cabling, use a different color for jacks and plugs of each service.
- E. Labels are to be preprinted or computer-printed type with printing area and font color that contrasts with cable jacket color but still complies with requirements in TIA 606-B, for the following:

1. Cables use flexible vinyl or polyester that flexes as cables are bent.

3.8 FIELD QUALITY CONTROL

- A. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to perform tests and inspections.
- B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
- C. Perform the following tests and inspections[**with the assistance of a factory-authorized service representative**].
- D. Tests and Inspections:
 1. Visually inspect coaxial jacket materials for NRTL certification markings.
 2. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
 3. Test coaxial horizontal copper cabling for DC loop resistance, shorts, opens, intermittent faults, and polarity between conductors. Test operation of shorting bars in connection blocks. Test cables after termination.
- E. Data for each measurement are to be documented. Data for submittals are to be printed in a summary report that is formatted similar to Table 10.1 in BICSI TDMM, or transferred from the instrument to the computer, saved as text files, and printed and submitted.
- F. Remove and replace cabling where test results indicate that they do not comply with specified requirements.
- G. End-to-end cabling will be considered defective if it does not pass tests and inspections.
- H. Prepare test and inspection reports.

SECTION 27 41 33 00 - MASTER ANTENNA TELEVISION SYSTEM

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. MATV equipment.
2. Off-air antennas.
3. MATV headend components.
4. Distribution components.

B. Related Sections:

1. Section 271313 "Communications Copper Backbone Cabling" for copper data cabling associated with system panels and devices.
2. Section 271323 "Communications Optical Fiber Backbone Cabling" for optical-fiber data cabling associated with system panels and devices.
3. Section 271333 "Communications Coaxial Backbone Cabling" for riser-rated coaxial data cabling associated with system panels and devices.
4. Section 271513 "Communications Copper Horizontal Cabling" for balanced twisted-pair optical-fiber cables and connectors.
5. Section 271523 "Communications Optical Fiber Horizontal Cabling" for optical-fiber cables and connectors.
6. Section 271533 "Communications Coaxial Horizontal Cabling" for coaxial cables and connectors.
7. Section 282000 "Video Surveillance" for cameras, monitors, computers, and cabling for video surveillance systems.

1.2 DEFINITIONS

- A. Agile Receiver:** A broadband receiver that can be tuned to any desired channel.
- B. A/V:** Audio/visual.
- C. Broadband:** For the purposes of this Section, wide bandwidth equipment or systems that can carry signals occupying in the frequency range of 54 to 1002 MHz. A broadband communication system can simultaneously accommodate television, voice, data, and many other services.
- D. Carrier:** A pure-frequency signal that is modulated to carry information. In the process of modulation, the signal is spread out over a wider band. The carrier frequency is the center frequency on any television channel.
- E. CATV:** Community antenna television. A communication system that simultaneously distributes several different channels of broadcast programs and other information to customers via a coaxial cable.
- F. CCTV:** Closed-circuit television.
- G. CEA:** Consumer Electronics Association.
- H. db mV:** Decibels relative to 1 mV across 75 ohms. $\text{db mV} = 20 \log_{10} (V(1)/V(2))$, where V(1) is the

measurement of voltage at a point having identical impedance to V(2) (0.001 V across 75 ohms).

- I. Headend: The control center of the MATV system, where incoming signals are amplified, converted, processed, and combined into a common cable along with any locally originated television signals, for transmission to user-interface points. It is also called the "central retransmission facility."
- J. I/O: Input/output.
- K. MATV: Master antenna television. A small television antenna distribution system usually restricted to one or two buildings.
- L. RF: Radio frequency.
- M. User Interface: End point of Contractor's responsibility for Work of this Section. User interfaces are the **[terminal blocks to which the end user may connect coaxial cabling][75-ohm terminals on device plates]<Define user-interface points>**.

1.3 ACTION SUBMITTALS

- A. Product Data:
 - 1. MATV equipment.
 - 2. Off-air antennas.
 - 3. MATV headend components.
 - 4. Distribution components.
- B. Shop Drawings: For headend and distribution system. Include plans, elevations, sections, details, and attachments to other work.
 - 1. Detail fabrication and installation details for television equipment.
 - 2. Functional Block Diagram: Show single-line interconnections between components for headend and distribution system to user-interface points. Show cable types and sizes.
 - 3. Dimensioned Plan and Elevations of Headend Equipment: Show access and workspace requirements.
 - 4. Wiring Diagrams: For power, signal, and control wiring. Balanced twisted-pair or optical-fiber cable include cross connects, patch panels, and patch cords.
- C. Samples: Full size for each outlet device plate in required colors and textures.
- D. Design Calculations: Calculate signal attenuation budget and show calculated line and equipment losses for the system based on the functional block diagram, to show that proposed system layout can be expected to perform up to specification. Calculate signal strength from sources to headend input points for each antenna, satellite dish, and CATV grouping. Allowable losses between components and user interface shall be used to determine size and type of coaxial cable.

1.4 INFORMATIONAL SUBMITTALS

- A. Coordination Drawings: Include dimensioned plan and elevation views of components and enclosures. Show access and workspace requirements.
- B. Equipment List: Include each piece of equipment and include model number, manufacturer, serial number, location, and date of original installation. Insert testing record of each piece of adjustable

equipment, listing name of person testing, date of test, and description of as-left set points.

- C. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For headend and distribution system to include in emergency, operation, and maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

- A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents. Provide no fewer than one of each item listed below. Deliver extra materials to Owner.
 - 1. Fuses: One for every [10]<Insert number> of each type and rating.
 - 2. Splitters: One for every [10]<Insert number> installed.
 - 3. MATV Distribution Power Amplifiers: One for every [10]<Insert number> of each type installed.
 - 4. MATV Signal Traps: [One]<Insert number> for every [10]<Insert number> of each type used.
 - 5. MATV Attenuators: [One]<Insert number> for every [10]<Insert number> of each type used.
 - 6. Cable: **100 feet (30 m)** of each type used.

1.7 PROJECT CONDITIONS

- A. Environmental Limitations: System components shall be equipped and rated for the environments in which they are installed.
- B. Environmental Conditions: Capable of withstanding the following environmental conditions without mechanical or electrical damage or degradation of operating capability:
 - 1. Interior, Controlled Environment: System components, except central-station control unit, installed in [air-conditioned][temperature-controlled] interior environments shall be rated for continuous operation in ambient conditions of [36 to 122 deg F (2 to 50 deg C)]<Insert temperature range> dry bulb and 20 to 90 percent relative humidity, noncondensing.
 - 2. Interior, Uncontrolled Environment: System components installed in non-[air-conditioned][temperature-controlled] interior environments shall be rated for continuous operation in ambient conditions of [0 to 122 deg F (minus 18 to plus 50 deg C)]<Insert temperature range> dry bulb and 20 to 90 percent relative humidity, noncondensing.
 - 3. Exterior Environment: System components installed in locations exposed to weather shall be rated for continuous operation in ambient conditions of [minus 30 to plus 122 deg F (minus 34 to plus 50 deg C)]<Insert temperature range> dry bulb and 20 to 90 percent relative humidity, condensing. Rate for continuous operation when exposed to rain as specified in NEMA 250, winds up to [85 mph (137 km/h)]<Insert wind speed>[and snow cover up to 24 inches (610 mm) thick].

1.8 COORDINATION

- A. Coordinate size and location of raceway system and provisions for electrical power to equipment specified in this Section.
- B. Coordinate Work of this Section with requirements of [cable television service][direct broadcast

satellite service][an off-air antenna system][CCTV cameras and video recorders] service provider.

- C. Coordinate sizes and locations of concrete bases with actual equipment provided.
- D. Coordinate installation of roof curbs, equipment supports, and roof penetrations with actual equipment provided.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

- A. System shall consist of **[cable television service][direct broadcast satellite service][an off-air antenna system][CCTV cameras and video recorders]** and a coaxial cable distribution system.
 - 1. Headend equipment shall consist of receiving antennas, satellites, and associated signal distribution amplification and equalization.
 - 2. Distribution of direct broadcast satellite-service signals, which includes coordinating with Owner's selected service provider for installation of its dish-type antennas and processing the signals as needed to provide specified services combined into a single-feed point ready for connection into the distribution system. Obtain signal levels and noise and distortion characteristics from service provider as the point of departure for system layout and final equipment selection.
 - 3. Distribution of cable television service signals, which includes coordinating with Owner's selected service provider for installation of cable to the service point ready for connection into the distribution system. Obtain signal levels and noise and distortion characteristics from service provider as the point of departure for system layout and final equipment selection.
 - 4. Cable distribution system consisting of coaxial cables, user interfaces, signal taps and splitters, RF amplifiers, signal equalizers, power supplies, and required hardware, complying with EIA/ECA 310-E and CTA-2032-B and resulting in performance parameters specified in this Section. System shall be capable of distributing television channels according to CTA-542-D.
- B. Hardware Requirements: Use plug-in, modular, solid-state electronic components. Mount amplifiers and other powered equipment in standard **19-inch (483-mm)** cabinet complying with EIA/ECA 310-E.
- C. Off-Air Stations: Install antennas for the reception and distribution of selected stations.

2.2 PERFORMANCE REQUIREMENTS

- A. Minimum acceptable performance of distribution system at all user-interface points shall be as follows:
 - 1. RF Video-Carrier Level: Between 3 and 12 db mV.
 - 2. Relative Video-Carrier Level: Within 3 db to adjacent channel.
 - 3. Carrier Level Stability, Short Term: Level shall not change more than 0.5 db during a 60-minute period.
 - 4. Carrier Level Stability, Long Term: Level shall not change more than 2 db during a 24-hour period.
 - 5. Channel Frequency Response: Across any 6-MHz channel in the 54- to 220-MHz frequency range, referenced to video; signal amplitude shall be plus or minus 1 db, maximum.
 - 6. Carrier-to-Noise Ratio: 45 db or more.
 - 7. RF Visual Signal-to-Noise Ratio: 43 db or more.
 - 8. Antenna Combiner Insertion Loss: 40 db maximum.
 - 9. Signal Power Splitter and Isolation Tap Return Loss: 17 db maximum.
 - 10. Cable Connectors Attenuation: Less than 0.1 db.

11. Cross Modulation: Less than minus 50 db.
12. Carrier-to-Echo Ratio: More than 40 db.
13. Composite Triple Beat: Less than minus 53 db.
14. Second Order Beat: Less than minus 60 db.
15. Terminal Isolation from Television to Television: 25 db, minimum.
16. Terminal Isolation between Television and FM: 35 db, minimum.
17. Hum Modulation: 2 percent, maximum.
18. RF FM Carrier Level: 13 to 17 db below video-carrier level.
19. FM Frequency Response: More than in the 88- to 108-MHz frequency range; signal amplitude is plus or minus 0.75 db, maximum.
20. FM Carrier-to-Noise Ratio: More than 24 db.

2.3 SYSTEM REQUIREMENTS

- A. Components: Plug-in, modular, heavy-duty, industrial- or commercial-grade units.
- B. Equipment: Silicon-based, solid-state, integrated circuit devices.
- C. Power Supply Characteristics: Devices shall be within specified parameters for ac supply voltages within the range of 105 to 130 V.
- D. Protect signal cables and connected components against transient-voltage surges by suppressors and absorbers designed specifically for that purpose. Comply with requirements in Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."
- E. Provide ac-powered equipment with integral surge protection devices complying with UL 1449.
- F. RF and Video Impedance Matching: Signal-handling components, including connecting cable, shall have end-to-end impedance-matched signal paths. Match and balance devices used at connections where it is impossible to avoid impedance mismatch or mismatch of balanced circuits to unbalanced circuits.
- G. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

2.4 MATV EQUIPMENT

- A. Description: Signal-source components, signal-processing and amplifying equipment, distribution components, and interconnecting wiring. System shall receive, amplify, process, and distribute signals to outlets for receiving sets. Equipment shall translate UHF channels to VHF channels before distribution to outlets.
- B. Identification of Signal Sources Distributed:
 1. **<Insert signal sources and basic service selection>.**
- C. MATV System Qualitative and Quantitative Performance Requirements: Reception quality of color-television program transmissions at each system outlet from each service and source shall be equal to or superior than that obtained with performance checks specified in "Field Quality Control" Article, using standard, commercial, cable-ready, multiple A/V input color-television receivers.

2.5 OFF-AIR ANTENNAS

- A. Antennas shall be tested, marked, and packaged, according to CTA-774-A, CEA-2028-B, and CEA-2032-B. Antennas shall be labeled according to CEA antenna mapping program.
- B. Off-Air, Mast-Mounted Antennas: Weatherproof single-channel or broadband type, constructed of high-strength anodized aluminum and rated to survive in a **[100-mph (160-km/h)]<Insert speed>** wind, minimum.
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Channel Master]**
 - b. **[Winegard Company]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Channel Master]**
 - b. **[Winegard Company]**
 - c. **<Insert manufacturer's name>**
 3. Elements: Internally dampened against mechanical vibration that may occur in service.
 4. Ends of Crossarms and Elements: Sealed.
 5. Mounting and Connecting Hardware: Corrosion proof.
 6. Frequency Range: Matched to source frequencies.
 7. CEA Reception Patterns: **<Insert reception pattern and number of antennas>**.
 8. FM Antenna: Separate from the broadband antenna and the **[omnidirectional][directional]** antenna, with 2-db minimum gain.
- C. Antenna-Supporting Structures: Prefabricated, hot-dip galvanized-steel units.
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[Channel Master]**
 - b. **[Winegard Company]**
 - c. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Channel Master]**
 - b. **[Winegard Company]**
 - c. **<Insert manufacturer's name>**
 3. Strength of Structure and Attachments: Adequate to withstand **[100-mph (160-km/h)]<Insert speed>** winds while supporting installed antennas.

4. Comply with 47 CFR 17 and TIA 222-G.
5. Comply with FAA AC 70/7460-1L.

2.6 MATV HEADEND COMPONENTS

A. Headend Equipment:

1. Components:
 - a. Channel mixers.
 - b. Processors.
 - c. Broadband amplifier.
 - d. Single-channel amplifiers.
 - e. FM module.
 - f. Combining networks.
2. Description: For receiving off-air television and FM signals and outputting the signals to cable distribution system. Equip coaxial down-leads of the off-air antennas with preamplifiers to send signals at strength required by headend. Headend component performance specified in this article is minimum acceptable; better performance may be required to comply with minimum acceptable system performance standard in "Performance Requirements" Article.
3. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Blonder Tongue Laboratories, Inc]**
 - d. **[Cisco Systems, Inc.]**
 - e. **<Insert manufacturer's name>**
4. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Blonder Tongue Laboratories, Inc]**
 - d. **[Cisco Systems, Inc.]**
 - e. **<Insert manufacturer's name>**
5. House units in standard **19-inch (483-mm)** electronic equipment cabinet complying with EIA/ECA 310-E.

B. Antenna Combiner: Directional coupler design network, combining up to eight antenna signals into a single output. Frequency response of the device shall be 5 to 400 MHz, and the insertion loss between input ports shall be not less than 40 db.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ATX Networks Inc.]**

- b. **[Blonder Tongue Laboratories, Inc]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ATX Networks Inc.]**
 - b. **[Blonder Tongue Laboratories, Inc]**
 - c. **<Insert manufacturer's name>**
- C. Down-Lead Preamplifiers: Antenna mast-mounted preamplifier, designed to boost antenna signal and contained in weatherproof housing; single-channel or broadband type. Install power supplies indoors at headend equipment, connected through power inserters to provide power to preamplifiers through the coaxial down-lead cable.
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Blonder Tongue Laboratories, Inc]**
 - d. **[Channel Master]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Blonder Tongue Laboratories, Inc]**
 - d. **[Channel Master]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **<Insert manufacturer's name>**
 3. Frequency Response: Plus or minus 0.75 db.
 4. Minimum Input: Minus 20 db mV.
 5. Return Loss: 14 db.
 6. I/O Impedance: 75 ohms.
- D. Channel Mixers: Use for nonadjacent channels only.
 1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ATX Networks Inc.]**
 - b. **[Blonder Tongue Laboratories, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ATX Networks Inc.]**
 - b. **[Blonder Tongue Laboratories, Inc]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **<Insert manufacturer's name>**
 3. Insertion Loss (Maximum 54 to 216 MHz): 2.5 db.
 4. Return Loss: 14 db.
 5. Out-of-Band Rejection: 12 db.
 6. I/O Impedance: 75 ohms.
- E. Processors: One for each channel to be translated.
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Blonder Tongue Laboratories, Inc]**
 - d. **[Cisco Systems, Inc.]**
 - e. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Blonder Tongue Laboratories, Inc]**
 - d. **[Cisco Systems, Inc.]**
 - e. **<Insert manufacturer's name>**
 3. Bandwidth: 6 MHz.
 4. Return Loss: 16 db, within the 6-MHz bandwidth.
 5. Noise: Not more than 10 db at maximum gain.
 6. Input Level Range, VHF: Minus 20 to plus 30 db mV.
 7. Input Level Range, UHF: Minus 20 to plus 25 db mV.
 8. Output Level Range: 50 to 60 db mV.
 9. Carrier-to-Noise Ratio: Minus 57 db at plus 10-db mV input.
 10. Automatic Gain Control: Plus or minus 1-db output variation for rated input level range variation.
 11. Frequency Stability: Plus or minus 10 kHz over the operational temperature range.
 12. Spurious Output: 60 db below the video carrier with video-carrier output level at plus 60 db mV and audio-carrier level at plus 45 db mV.
 13. Adjacent Channel Rejection: Not less than 60 db.
 14. I/O Impedance: 75 ohms.
- F. Broadband Amplifier:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

- a. [ATX Networks Inc.]
- b. [Blonder Tongue Laboratories, Inc]
- c. [Leviton Manufacturing Co., Inc.]
- d. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [ATX Networks Inc.]
- b. [Blonder Tongue Laboratories, Inc]
- c. [Leviton Manufacturing Co., Inc.]
- d. <Insert manufacturer's name>

3. Frequency Range: [54 to 108, 174 to 220][54 to 220] MHz.
4. Frequency Response: Plus or minus 1.0 db across passband.
5. Maximum Noise: 10 db.
6. Minimum Return Loss: 16 db.
7. I/O Impedance: 75 ohms.

G. Single-Channel Amplifiers:

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [ATX Networks Inc.]
- b. [Blonder Tongue Laboratories, Inc]
- c. [Cisco Systems, Inc.]
- d. [Leviton Manufacturing Co., Inc.]
- e. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

- a. [ATX Networks Inc.]
- b. [Blonder Tongue Laboratories, Inc]
- c. [Cisco Systems, Inc.]
- d. [Leviton Manufacturing Co., Inc.]
- e. <Insert manufacturer's name>

3. Frequency: 6 MHz for specified channel.
4. Frequency Response: Plus or minus 0.5 db.
5. Maximum Noise: 10 db.
6. Minimum Return Loss: 14 db.
7. Automatic Gain Control: Plus or minus 1-db output variation for rated input level range variation.
8. Skirt Rejection: Minus 26 db at plus or minus 5 MHz from channel center.
9. Sound Trap: Adjustable to 10 Vdb of attenuation of the sound carrier.
10. I/O Impedance: 75 ohms.

H. FM Module: One RF processor module for each station listed.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ATX Networks Inc.]**
 - b. **[Blonder Tongue Laboratories, Inc]**
 - c. **[Cisco Systems, Inc.]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ATX Networks Inc.]**
 - b. **[Blonder Tongue Laboratories, Inc]**
 - c. **[Cisco Systems, Inc.]**
 - d. **[Leviton Manufacturing Co., Inc.]**
 - e. **<Insert manufacturer's name>**
3. Frequency Range: Between 88 and 108 MHz.
4. Output Level: 52 db mV.
5. Output Level Control: Plus or minus 10 db.
6. Stability: 0.005 percent, crystal controlled.
7. Sensitivity: 3 mV for 30-db quieting.
8. Input Level: 60 mV, stereo.
9. Image Rejection: 901 db.
10. Passband: 200 kHz.
11. Selectivity: Plus or minus 150 kHz or less, at 30 db down. Plus or minus 250 kHz or less, at 50 db down.
- I. Combining Network (Mixer): Combines the off-air television **[FM][CCTV][and][CATV]** signals into a single-broadband output. An output test point, a 75-ohm television jack, a mixer output step attenuator dual-pilot insertion network, and a removable mixer-to-trunk jumper are included.
 1. Passband: As required by system performance.
 2. Distortion:
 - a. Not more than plus or minus 0.1 db over any 6-MHz segment.
 - b. Not more than plus or minus 0.5 db over the 54- to 216-MHz frequency range.
 3. Nominal Insertion Loss:
 - a. 15 db maximum, channel input to single-system output.
 - b. 13 db maximum, channel input to mixer output.
 - c. 20 db maximum at test point (e.g., loss from trunk output).
 4. Isolation between Any Two Inputs: 30 db.
 5. I/O Impedance: 70 ohms.

2.7 DISTRIBUTION COMPONENTS

- A. Signal Power Splitters and Isolation Taps: Metal-enclosed directional couplers with brass connector parts. Where installed in signal circuits used to supply cable-powered amplifiers, power throughput

capacity shall exceed load by at least 25 percent.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ATX Networks Inc.]**
 - b. **[Leviton Manufacturing Co., Inc.]**
 - c. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ATX Networks Inc.]**
 - b. **[Leviton Manufacturing Co., Inc.]**
 - c. **<Insert manufacturer's name>**
3. Return Loss: 17 db.
4. RFI Shielding: 100 db.
5. Isolation: 25 db.
6. I/O Impedance: 75 ohms.

B. Distribution System Amplifiers: Powered by coaxial cable system and equipped with surge protection device and external test points to allow convenient signal monitoring.

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Leviton Manufacturing Co., Inc.]**
 - d. **<Insert manufacturer's name>**

C. Cable System Power Supplies: Plug-in, modular construction, with surge, short-circuit, and overload protection.

D. Signal Traps: Packaged filters tuned to interference frequencies encountered in Project.

E. Attenuators: Passive, of fixed value, and used to balance signal levels.

F. Terminating Resistors: Enclosed units rated 0.5 W and matched for coaxial impedance.

- G. Jack: Flush, female-type outlets, designed to mimic power duplex outlet; for mounting in standard outlet box; with metallic parts of anodized brass, beryllium copper, or phosphor bronze. Cable connector mounting shall be semirecessed, so its protrusion is flush with the plane of device plate. **[Feed-through-type cable connection shall not be used][, except in area housing a single tenant][, except within a single-dwelling unit].**
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:**
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Canare Corporation of America]**
 - d. **[Cisco Systems, Inc.]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[ARRIS]**
 - b. **[ATX Networks Inc.]**
 - c. **[Canare Corporation of America]**
 - d. **[Cisco Systems, Inc.]**
 - e. **[Leviton Manufacturing Co., Inc.]**
 - f. **<Insert manufacturer's name>**
 3. Cable Connector: Female, Type F.
 4. Wall Plates: Match materials and finish of power outlets in same space.
 5. Attenuation: Less than 0.1 db.
 6. Voltage Standing-Wave Ratio: Less than 1.15 to 1.

2.8 ENCLOSURES

- A. Enclosures for Interior, Controlled Environments: NEMA 250, Type 1.
- B. Enclosures for Interior, Uncontrolled Environments: NEMA 250, **[Type 3R][Type 4][Type 12][Type 12K].**
- C. Enclosures for Exterior Environments: NEMA 250, **[Type 3][Type 3R][Type 3S][Type 4][Type 4X].**

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine roughing-in for antenna to verify actual locations of cable connections before antenna installation.
- B. Examine walls, floors, roofs, equipment bases, and roof supports for suitable conditions where television equipment is to be installed.

- C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

- A. Install signal line surge suppressors on coaxial cables entering headend equipment space and at antenna-mounted amplifiers. Comply with requirements in Section 264313 "Surge Protection for Low-Voltage Electrical Power Circuits."
- B. Install antenna towers, masts, and mountings on concrete bases. Comply with requirements for concrete bases specified in Section 033000 "Cast-in-Place Concrete."
 - 1. Place and secure anchorage devices. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
 - 2. Install anchor bolts to elevations required for proper attachment to supported equipment.

3.3 INSTALLATION OF ANTENNA AND HEADEND COMPONENTS

- A. Mount headend equipment in electronic equipment cabinets recommended by manufacturer. Group related items in methodical sequence.
- B. Arrange equipment to facilitate access for maintenance and to preserve headroom and passage space. Parts that require periodic service or maintenance shall be readily accessible. Headend components that require tuning adjustments shall be accessible from the front of equipment cabinets.
- C. Align antenna elements to achieve maximum signal level and quality.
- D. Antenna-Supporting Structure: Increase antenna height as required to obtain signal strength needed for specified system performance.
 - 1. Attachment to Building:
 - a. Use **0.375-inch- (10-mm-)** minimum expansion anchors for masonry, and place anchors clear of grout or mortar joints.
 - b. Use **0.375-inch- (10-mm-)** minimum lag bolts for attachment to wood.
 - 2. Lightning Protection: Comply with requirements in Section 264113 "Lightning Protection for Structures."
- E. Antenna Cable Entrance: Use weatherproof entrance fittings, and seal at penetrations of the building envelope.

3.4 IDENTIFICATION

- A. Identify system components, wiring, cabling, and terminals. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."

3.5 FIELD QUALITY CONTROL

- A. Manufacturer's Field Service: Engage a factory-authorized service representative to inspect, test, and adjust components, assemblies, and equipment installations, including connections.

B. Perform the following tests and inspections:

1. Align and adjust system and pretest components, wiring, and functions to verify that they comply with specified requirements.
2. Replace malfunctioning or damaged items.
3. Retest until satisfactory performance and conditions are achieved.
4. Prepare television equipment for acceptance and operational testing.
5. Use an agile receiver and signal strength meter or spectrum analyzer for testing.
6. Off-Air, Mast-Mounted Antenna Sources: Connect receiver to the down-lead of a 10-element, single-channel antenna, tuned and oriented to optimize reception for the channel and placed at system antenna's location. Alternatively, connect receiver to a single-channel video amplifier connected to the down-lead of the above single-channel antenna.
7. CATV Sources: Connect receiver to an agile demodulator or CATV set-top converter at CATV service entrance to the facility.
8. Satellite Earth-Station System Sources: Adapt receiver to the output of satellite-television receiver.
9. CCTV Sources: Connect receiver to the output of each CCTV signal source or the distribution amplifier associated with it.
10. Test Schedule: Schedule tests after pretesting has successfully been completed and system has been in normal functional operation for at least 14 days. Provide a minimum of 10 days' notice of test schedule.
11. Operational Tests: Perform tests of operational system to verify that system complies with Specifications. Include all modes of system operation. Test equipment for proper operation in all functional modes.
12. Distribution System Acceptance Tests:
 - a. Field-Strength Instrument: Rated for minus 40-db mV measuring sensitivity and a frequency range of 54 to 812 MHz, minimum. Provide documentation of recent calibration against recognized standards.
 - b. Signal Level and Picture Quality: Use a field-strength meter or spectrum analyzer, and a standard television receiver to measure signal levels and check picture quality at **[all][25 percent of]<Insert number or percentage>** user-interface outlets.
 - 1) Test the signal strength in db mV at 55[, **151, 547,**] and 750 MHz.
 - 2) Minimum acceptable signal level is 0 db mV (1000 mV).
 - 3) Maximum acceptable signal level over the entire bandwidth is 15 db mV.
 - 4) Television receiver shall show no evidence of cross-channel intermodulation, ghost images, or beat interference.
13. Signal-to-Noise-Ratio Test: Use a field-strength meter to make a sequence of measurements at the output of the last distribution amplifier or of another agreed-on location in system. With system operating at normal levels, tune meter to the picture carrier frequency of each of the designated channels in turn, and record the level. With signal removed and input to corresponding headend amplifier terminated at 75 ohms, measure the level of noise at same tuning settings. With meter correction factor added to last readings, differences from first set must not be less than 45 db.
14. Qualitative and Quantitative Performance Tests: Demonstrate reception quality of color-television program transmissions at each user interface from each designated channel and source. Quality shall be equal to or superior than that obtained with performance checks specified below, using a standard, commercial, cable-ready, color-television receiver. Level and quality of signal at each outlet and from each service and source shall comply with the following Specifications when tested according to 47 CFR 76:
 - a. RF video-carrier level.
 - b. Relative video-carrier level.
 - c. Carrier level stability, during 60-minute and 24-hour periods.

- d. Broadband frequency response.
- e. Channel frequency response.
- f. Carrier-to-noise ratio.
- g. RF visual signal-to-noise ratio.
- h. Antenna combiner insertion loss.
- i. Signal power splitter loss.
- j. Cable connector attenuation.
- k. Cross modulation.
- l. Carrier-to-echo ratio.
- m. Composite triple beat.
- n. Second order beat.
- o. Terminal isolation.
- p. Terminal isolation between television and FM.
- q. Hum modulation.
- r. RF FM carrier level.
- s. FM frequency response.
- t. FM carrier-to-noise ratio.

- C. Headend and distribution system will be considered defective if they do not pass tests and inspections.
- D. Prepare test and inspection reports.
- E. Cap all unused connectors and seal weathertight.

3.6 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain MATV equipment.
 - 1. Train Owner's maintenance personnel on procedures and schedules for troubleshooting, servicing, and maintaining equipment.
 - 2. Demonstrate methods of determining optimum alignment and adjustment of components and settings for system controls.
 - 3. Demonstrate programming and tuning of satellite receivers.

END OF SECTION 27 41 33 00

SECTION 27 51 23 20 - COMMERCIAL INTERCOMMUNICATIONS AND PROGRAM SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

- A. The Work of this Section includes intercommunications and program systems with the following components:
 - 1. Master station for manually switched systems.
 - 2. Master station for microprocessor-switched systems.
 - 3. Speaker-microphone stations.
 - 4. Video-speaker-microphone stations.
 - 5. Call-switch unit.
 - 6. All-call amplifier.
 - 7. Intercommunication amplifier.
 - 8. Cone-type loudspeakers.
 - 9. Horn-type loudspeakers.
 - 10. Horn-type explosion-proof loudspeakers.

1.2 ACTION SUBMITTALS

- A. Product Data:
 - 1. Master station for manually switched systems.
 - 2. Master station for microprocessor-switched systems.
 - 3. Speaker-microphone stations.
 - 4. Video-speaker-microphone stations.
 - 5. Call-switch unit.
 - 6. All-call amplifier.
 - 7. Intercommunication amplifier.
 - 8. Cone-type loudspeakers.
 - 9. Horn-type loudspeakers.
 - 10. Horn-type explosion-proof loudspeakers.
- B. Shop Drawings: For intercommunications and program systems.
 - 1. Include plans, elevations, sections, and **[mounting][attachment]** details.
 - 2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
 - 3. Include scaled drawings for master station **[and speaker-microphone station]** that detail built-in equipment.
 - 4. Include diagrams for power, signal, and control wiring.
 - a. Identify terminals to facilitate installation, operation, and maintenance.
 - b. Single-line diagram showing interconnection of components.
 - c. Cabling diagram showing cable routing.

1.3 INFORMATIONAL SUBMITTALS

- A. Coordination Drawings:
 - 1. Reflected ceiling plans, drawn to scale, on which ceiling-mounted items including luminaires, diffusers, grilles, speakers, sprinklers, access panels, and special moldings are shown and coordinated with each other, using input from installers of the items involved.
 - 2. Elevation drawings, drawn to scale, on which wall-mounted items including luminaires, intercommunications components, windows, doors, access panels, wall finishes, trims, piping, and conduit are shown and coordinated with each other, using input from installers of the items involved.
- B. Qualification Data: For **[Installer][and][testing agency]**.
- C. Field quality-control reports.

1.4 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For intercommunications and program systems to include in operation and maintenance manuals.
 - 1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:
 - a. A record of Owner's equipment-programming option decisions.
 - b. Plans, drawn to scale, indicating location, designation, and connection of intercommunications system components.
- B. Software and Firmware Operational Documentation:
 - 1. Software operating and upgrade manuals.
 - 2. Program Software Backup: On USB media or compact disk, complete with data files.
 - 3. Device address list.
 - 4. Printout of software application and graphic screens.

1.5 COORDINATION

- A. Coordinate layout and installation of ceiling-mounted speaker microphones with other construction that penetrates ceilings or is supported by them, including light fixtures, HVAC equipment, fire-suppression system, and partition assemblies.

PART 2 - PRODUCTS

2.1 COMMERCIAL INTERCOMMUNICATIONS AND PROGRAM SYSTEMS

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[ABB, Process Automation Business]**

2. [Aiphone Corporation]
3. [Alpha Communications]
4. [CAME Americas Automation LLC]
5. [Comelit USA]
6. [Federal Signal Corporation]
7. [Jeron Electronic Systems, Inc]
8. [Stentofon; a brand of Zenitel USA]
9. [TOA Electronics, Inc]
10. <Insert manufacturer's name>

- B. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

1. [ABB, Process Automation Business]
2. [Aiphone Corporation]
3. [Alpha Communications]
4. [CAME Americas Automation LLC]
5. [Comelit USA]
6. [Federal Signal Corporation]
7. [Jeron Electronic Systems, Inc]
8. [Stentofon; a brand of Zenitel USA]
9. [TOA Electronics, Inc]
10. <Insert manufacturer's name>

2.2 SYSTEM DESCRIPTION

- A. Equipment: Modular, using solid-state components, fully rated for continuous duty unless otherwise indicated. Select equipment for normal operation on input power supplied at 110 to 130 V, 60 Hz without requirement of any external power conditioning equipment.
- B. Expansion Capability: Increase number of stations in the future by [25]<Insert number> percent above those indicated without adding any internal or external components or main backbone cable conductors.
- C. Integration: Coordinate features and select components to form an integrated system. Match components and interconnections for optimum performance of specified functions.
- D. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by an NRTL, and marked for intended location and application.

2.3 FUNCTIONAL DESCRIPTION OF MANUALLY SWITCHED SYSTEMS

- A. Master Station:
1. Communicating selectively with other master and speaker-microphone stations by actuation of selector switches.
 2. Communicating with all other stations by actuation of a single all-call switch.
 3. Communicating with individual stations in privacy.
 4. Include other master-station connections in a multiple-station conference call.
 5. Access separate paging speakers or groups of paging speakers by actuation of selector switches.
 6. Conversation override by a designated master station.
 7. Visual monitoring of CCTV camera viewing area of video-speaker-microphone stations.
 8. Remote door lock [and access control]function.
- B. Speaker-Microphone Station:

1. Remote Monitoring: Initiated without a warning tone signal at monitored station. Designated speaker-microphone stations shall have a privacy switch to prevent another station from listening and to permit incoming calls.
2. Hands-free communication.
3. Calling master station by actuation of call switch.
4. Returns a busy signal to indicate that master station is already in use.
5. Free of noise and distortion during operation and when in standby mode.
6. Embedded **[HID][Weigand]**-formatted, proximity-type, access control card reader.
7. Remote door lock **[and access control]**function, controlled by master station.

C. Video-Speaker-Microphone Station:

1. Remote Monitoring: Initiated without a warning tone signal at monitored station. Designated speaker-microphone stations shall have a privacy switch to prevent another station from listening and to permit incoming calls. Illuminated signal to indicate video monitoring.
2. Color CCD video camera and illumination LED for low-light conditions.
3. Embedded **[HID][Weigand]**-formatted, proximity-type, access control card reader.
4. Remote door lock **[and access control]**function, controlled by master station.
5. Hands-free communication.
6. Calling master station by actuation of call switch.
7. Returns a busy signal to indicate that station is already in use.
8. Free of noise and distortion during operation and when in standby mode.

2.4 FUNCTIONAL DESCRIPTION OF MICROPROCESSOR-SWITCHED SYSTEMS

A. Master Station:

1. Communicating selectively with other master and speaker-microphone stations by dialing station's number on a 12-digit keypad.
2. Communicating simultaneously with all other stations by dialing a designated number on a 12-digit keypad.
3. Communicating with individual stations in privacy.
4. Include other master-station connections in a multiple-station conference call.
5. Access separate paging speakers or groups of paging speakers by dialing designated numbers on a 12-digit keypad.
6. Override any conversation by a designated master station.
7. Display selected station.
8. Video monitoring of all call stations on actuation of call switch.
9. Remote door lock **[and access control]**function.

B. Speaker-Microphone Station:

1. Remote Monitoring: Initiated without a warning tone signal at monitored station. Designated speaker-microphone stations have a privacy switch to prevent another station from listening and to permit incoming calls.
2. Hands-free communication.
3. Calling master station by actuation of call switch.
4. Return a busy signal to indicate that station is already in use.
5. Free of noise and distortion during operation and when in standby mode.
6. Embedded **[HID][Weigand]**-formatted, proximity-type, access control card reader.

C. Video-Speaker-Microphone Station:

1. Remote Monitoring: Initiated without a warning tone signal at monitored station. Designated

- speaker-microphone stations have a privacy switch to prevent another station from listening and to permit incoming calls. Illuminated signal to indicate video monitoring.
- 2. Color CCD video camera and illumination LED for low-light conditions.
- 3. Embedded **[HID][Weigand]**-formatted, proximity-type, access control card reader.
- 4. Remote door lock **[and access control]**function, controlled by master station.
- 5. Hands-free communication.
- 6. Calling master station by actuation of call switch.
- 7. Returns a busy signal to indicate that station is already in use.
- 8. Free of noise and distortion during operation and when in standby mode.

2.5 MASTER STATION FOR MANUALLY SWITCHED SYSTEMS

- A. Station-Selector and Talk-Listen Switches: Heavy-duty type with gold-plated contacts rated for five million operations.
- B. Volume Control: Regulates incoming-call volume.
- C. LED Annunciation: Identifies calling stations and stations in use. LED remains on until call is answered.
- D. Tone Annunciation: Momentary audible tone signal announces incoming calls.
- E. Speaker Microphone: Transmits and receives calls.
- F. Handset with Hook Switch: Telephone type with **18-inch- (450-mm-)** long, permanently coiled cord. Arrange to disconnect speaker when handset is lifted.
- G. Color LCD video screen for monitoring of CCD cameras integral to call stations.
- H. Equipment Cabinet: Comply with ECA/EIA-310-E. Lockable, ventilated metal cabinet houses terminal strips, power supplies, amplifiers, system volume control, and auxiliary equipment.

2.6 MASTER STATION FOR MICROPROCESSOR-SWITCHED SYSTEMS

- A. 12-Digit Keypad Selector: Transmits calls to other stations and initiates commands for programming and operation.
- B. Volume Control: Regulates incoming-call volume.
- C. LED Annunciation: Identifies calling stations and stations in use. LED remains on until call is answered.
- D. Tone Annunciation: Momentary audible tone signal announces incoming calls.
- E. Color LCD video screen for monitoring of CCD cameras integral to call stations.
- F. Handset with Hook Switch: Telephone type with **18-inch- (450-mm-)** long, permanently coiled cord. Arrange to disconnect speaker when handset is lifted.
- G. Reset Control: Cancels call and resets system for next call.
- H. Equipment Cabinet: Comply with ECA/EIA-310-E. Lockable, ventilated metal cabinet houses terminal strips, power supplies, amplifiers, system volume control, and other switching and control devices required for conversation channels and control functions.

2.7 SPEAKER-MICROPHONE STATIONS

- A. Mounting: Flush unless otherwise indicated, and suitable for mounting conditions indicated.
- B. Faceplate: Stainless steel or anodized aluminum with tamperproof mounting screws.
- C. Back Box: Two-gang galvanized steel with **2-1/2-inch (64-mm)** minimum depth.
- D. Speaker: **3 inches (76 mm)**, **2.3 oz. (65 g)** minimum; permanent magnet.
- E. Tone Annunciation: Recurring momentary tone indicates incoming calls.
- F. Call Switch: Mount on faceplate. Permits calls to master station.
- G. Privacy Switch: Mount on faceplate. When in on position, switch prevents transmission of sound from remote station to system; when in off position, without further switch manipulation, response can be made to incoming calls.
- H. Handset with Hook Switch: Telephone type with **18-inch- (450-mm-)** long, permanently coiled cord. Arrange to disconnect speaker when handset is lifted.

2.8 VIDEO-SPEAKER-MICROPHONE STATIONS

- A. Mounting: Flush unless otherwise indicated, and suitable for mounting conditions indicated.
- B. Faceplate: Stainless steel or anodized aluminum with tamperproof mounting screws.
- C. Back Box: Custom size provided by manufacturer for flush mounting of station device.
- D. Wide-angle camera with digital pan-tilt-zoom functions and automatic light adjustment to compensate for varying ambient light levels. Camera lens shall provide a minimum viewing angle of 170 degrees horizontal and 100 degrees vertical.
- E. LED Lamp: Indicates video activation and provides illumination during low-light conditions.
- F. Speaker: **3 inches (76 mm)**, **2.3 oz. (65 g)** minimum; permanent magnet.
- G. Tone Annunciation: Recurring momentary tone indicates incoming calls.
- H. Call Switch: Mount on faceplate. Permits calls to master station.

2.9 CALL-SWITCH UNIT

- A. Enclosure: Single-gang box with stainless-steel faceplate.
- B. Call Switch: Momentary contact signals system that a call has been placed.
- C. Privacy Switch: Prevents transmission of sound signals from station to system.
- D. Volume Control: Operated by screwdriver blade through a hole in faceplate to adjust output level of associated speaker.

- E. Handset with Hook Switch: Telephone type with **18-inch- (450-mm-)** long, permanently coiled cord. Arrange to disconnect speaker when handset is lifted.

2.10 ALL-CALL AMPLIFIER

- A. Output Power: 70-V balanced line. **[80 percent of the sum of wattage settings of connected]<Insert wattage>** for each station and speaker connected in all-call mode of operation, plus an allowance for future stations.
- B. Total Harmonic Distortion: Less than 5 percent at rated output power with load equivalent to quantity of stations connected in all-call mode of operation.
- C. Minimum Signal-to-Noise Ratio: 45 dB, at rated output.
- D. Frequency Response: Within plus or minus 3 dB from 70 to 12,000 Hz.
- E. Output Regulation: Maintains output level within 2 dB from full to no load.
- F. Input Sensitivity: Compatible with master stations and central equipment so amplifier delivers full-rated output with sound-pressure level of less than 10 dynes/sq. cm impinging on master stations, speaker microphones, or handset transmitters.
- G. Amplifier Protection: Prevents damage from shorted or open output.

2.11 INTERCOMMUNICATION AMPLIFIER

- A. Minimum Output Power: **[2]<Insert number> W**; adequate for all functions.
- B. Total Harmonic Distortion: Less than 5 percent at rated output power with load equivalent to one station connected to output terminals.
- C. Minimum Signal-to-Noise Ratio: 45 dB, at rated output.
- D. Frequency Response: Within plus or minus 3 dB from 70 to 10,000 Hz.
- E. Output Regulation: Maintains output level within 2 dB from full to no load.
- F. Input Sensitivity: Matched to input circuit and to provide full-rated output with sound-pressure level of less than 10 dynes/sq. cm impinging on master stations, speaker microphones, or handset transmitters.
- G. Amplifier Protection: Prevents damage from shorted or open output.

2.12 CONE-TYPE LOUDSPEAKERS

- A. Minimum Axial Sensitivity: 91 dB at **3 feet (1 m)**, with 1-W input.
- B. Frequency Response: Within plus or minus 3 dB from 70 to 15,000 Hz.
- C. Minimum Dispersion Angle: 100 degrees.
- D. Line Transformer: Maximum insertion loss of 0.5 dB, power rating equal to speaker's, and at least four level taps.

- E. Enclosures: Steel housings or back boxes, acoustically dampened, with front face of at least **0.0478-inch (1.2-mm)** steel and whole assembly rust proofed and factory primed; complete with mounting assembly and suitable for surface ceiling, flush ceiling, pendant, or wall mounting; with relief of back pressure.
- F. Baffle: For flush speakers, minimum thickness of **0.032-inch (0.8-mm)** aluminum **[brushed to a satin sheen and lacquered][with textured white finish]<Insert finish>**.
- G. Vandal-Proof, High-Strength Baffle: For **[flush][surface]**-mounted speakers, self-aging cast aluminum with tensile strength of **44,000 psi (303 MN/sq. m)**, **0.025-inch (0.65-mm)** minimum thickness; countersunk heat-treated alloy mounting screws; and textured white epoxy finish.
- H. Size: **8 inches (200 mm)** with **1-inch (25-mm)** voice coil and minimum **5-oz. (140-g)** ceramic magnet.

2.13 HORN-TYPE LOUDSPEAKERS

- A. Speakers shall be all-metal, weatherproof construction; complete with universal mounting brackets.
- B. Frequency Response: Within plus or minus 3 dB from 275 to 14,000 Hz.
- C. Minimum Power Rating of Driver: 15 W, continuous.
- D. Minimum Dispersion Angle: 110 degrees.
- E. Line Transformer: Maximum insertion loss of 0.5 dB, power rating equal to speaker's, and at least four level taps.

2.14 HORN-TYPE EXPLOSION-PROOF LOUDSPEAKERS

- A. Speakers shall be all-metal construction; complete with universal mounting brackets.
- B. Units in Hazardous (Classified) Locations: Listed and labeled for environment in which they are located.
- C. Frequency Response: Within plus or minus 3 dB from 300 to 12,000 Hz.
- D. Minimum Power Rating of Driver: **[30][60]** W, continuous.
- E. Minimum Dispersion Angle: **[95][60 by 120]** degrees.
- F. Line Transformer: Internally mounted and factory installed, power rating equal to speaker's, and at least four level taps.

PART 3 - EXECUTION

3.1 WIRING METHODS

- A. Wiring Method, Raceways: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters **[and except in accessible ceiling spaces and in gypsum board partitions where unenclosed wiring method may be used]**. Conceal raceway and cables except in unfinished spaces.

1. Install plenum cable in environmental air spaces, including plenum ceilings.
 2. Comply with requirements for raceways and boxes specified in Section 270528 "Pathways for Communications Systems."
- B. Wiring Method, Concealed: Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
- C. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Install lacing bars and distribution spools.

3.2 INSTALLATION OF CABLES

- A. Comply with NECA 1.
- B. General Requirements:
1. Terminate conductors; no cable shall contain unterminated elements. Make terminations only at outlets and terminals.
 2. Splices, Taps, and Terminations: Arrange on numbered terminal strips in junction, pull, and outlet boxes; terminal cabinets; and equipment enclosures. Cables may not be spliced.
 3. Secure and support cables at intervals not exceeding **30 inches (760 mm)** and not more than **6 inches (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
 4. Do not install bruised, kinked, scored, deformed, or abraded cable. Do not splice cable between termination, tap, or junction points. Remove and discard cable if damaged during installation and replace it with new cable.
 5. Cold-Weather Installation: Bring cable to room temperature before dereeling. Heat lamps shall not be used.
- C. Open-Cable Installation:
1. Install cabling with horizontal and vertical cable guides in telecommunication spaces with terminating hardware and interconnection equipment.
 2. Suspend cable not in a wireway or pathway a minimum of **8 inches (200 mm)** above ceiling by cable supports not more than **[60 inches (1524 mm)]<Insert dimension>** apart.
 3. Cable shall not be run through structural members or be in contact with pipes, ducts, or other potentially damaging items.
- D. Separation of Wires: Separate speaker-microphone, line-level, speaker-level, video, and power wiring runs. Install in separate raceways or, where exposed or in same enclosure, separate conductors at least **12 inches (300 mm)** apart for speaker microphones and adjacent parallel power and telephone wiring. Separate other intercommunication equipment conductors as recommended by equipment manufacturer.

3.3 INSTALLATION

- A. Match input and output impedances and signal levels at signal interfaces. Provide matching networks where required.
- B. Identification of Conductors and Cables: Color-code conductors and apply wire and cable marking tape to designate wires and cables so they identify media in coordination with system wiring diagrams.
- C. Weatherproof Equipment: For units that are mounted outdoors, in damp locations, or where exposed to weather, install consistent with requirements of weatherproof rating.

- D. Speaker-Line Matching Transformer Connections: Make initial connections using tap settings indicated on Drawings.
- E. Connect wiring according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- F. Mounting of Stations: Surface mount at **54 inches (137.2 cm)** above finished floor to center of station unless otherwise indicated.

3.4 INSTALLATION OF GROUNDING

- A. Ground cable shields and equipment to eliminate shock hazard and to minimize ground loops, common-mode returns, noise pickup, cross talk, and other impairments.
- B. Signal Ground Terminal: Locate at main equipment cabinet. Isolate from power system and equipment grounding.
- C. Install grounding electrodes as specified in Section 260526 "Grounding and Bonding for Electrical Systems."

3.5 SYSTEM PROGRAMMING

- A. Programming: Fully brief Owner on available programming options. Record Owner's decisions and set up initial system program. Prepare a written record of decisions, implementation methodology, and final results.

3.6 FIELD QUALITY CONTROL

- A. Testing Agency: **[Owner will engage][Engage]** a qualified testing agency to perform tests and inspections.
- B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.
- C. Perform tests and inspections[**with the assistance of a factory-authorized service representative**].
- D. Tests and Inspections:
 - 1. Schedule tests with at least seven days' advance notice.
 - 2. After installing intercommunications and program systems and after electrical circuitry has been energized, test for compliance with requirements.
 - 3. Operational Test: Test originating station-to-station[, **all-call, video display, and page**] messages at each intercommunication station. Verify proper routing and volume levels and that system is free of noise and distortion. Test each available message path from each station on system.
 - 4. Frequency Response Test: Determine frequency response of two transmission paths[, **including all-call and paging,**] by transmitting and recording audio tones. Minimum acceptable performance is within 3 dB from 150 to 2500 Hz.
 - 5. Signal-to-Noise Ratio Test: Measure signal-to-noise ratio of complete system at normal gain settings as follows:
 - a. Disconnect speaker microphone and replace it in the circuit with a signal generator using a

- 1000-Hz signal. Measure signal-to-noise ratio at[**paging**] speakers.
 - b. Repeat test for four speaker microphones[**and for each separately controlled zone of paging loudspeakers**].
 - c. Minimum acceptable ratio is 35 dB.
 - 6. Distortion Test: Measure distortion at normal gain settings and rated power. Feed signals at frequencies of 150, 200, 400, 1000, and 2500 Hz into[**each paging and all-call amplifier, and**] a minimum of two selected intercommunication amplifiers. For each frequency, measure distortion in the paging and all-call amplifier outputs. Maximum acceptable distortion at any frequency is 5 percent total harmonics.
 - 7. **[Acoustic Coverage Test: Feed pink noise into system using octaves centered at 500 and 4000 Hz. Use sound-level meter with octave-band filters to measure level at three locations in each paging zone. Maximum permissible variation in level is plus or minus 3 dB; in levels between adjacent zones, plus or minus 5 dB.]**
 - 8. Signal Ground Test: Measure and report ground resistance at system signal ground. Comply with testing requirements in Section 260526 "Grounding and Bonding for Electrical Systems."
 - E. Inspection: Verify that units and controls are properly labeled and interconnecting wires and terminals are identified. Prepare a list of final tap settings of paging speaker-line matching transformers.
 - F. Intercommunications and program systems will be considered defective if they do not pass tests and inspections.
 - G. Prepare test and inspection reports.
- 3.7 STARTUP SERVICE
- A. **[Engage a factory-authorized service representative to perform][Perform]** startup service[**and initial system programming**].
 - 1. Verify that electrical wiring installation complies with manufacturer's submittal and installation requirements.
 - 2. Complete installation and startup checks according to manufacturer's written instructions.
 - 3. **<Insert startup steps if any>**.
- 3.8 ADJUSTING
- A. On-Site Assistance: Engage a factory-authorized service representative to provide on-site assistance in adjusting sound levels, resetting transformer taps, and adjusting controls to meet occupancy conditions.
 - B. Occupancy Adjustments: When requested within **[12]<Insert number>** months of date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions. Provide up to **[two]<Insert number>** visits to Project during other-than-normal occupancy hours for this purpose.
- 3.9 DEMONSTRATION
- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain the intercommunications and program systems.
 - 1. Train Owner's maintenance personnel on programming equipment for starting up and shutting down, troubleshooting, servicing, and maintaining the system and equipment.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 27 53 13 00 - CLOCK SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Master and secondary clock system.
2. Master clock.
3. Secondary indicating clocks.
4. Program signal devices.
5. Clock circuit power booster.
6. Back boxes for secondary indicating clocks and program devices.
7. Guards.
8. Rack-mounting provision for master clock.
9. Conductors and cables.
10. Pathways.

1.2 DEFINITIONS

- A.** NIST: The National Institute of Science and Technology.
- B.** PC: Personal computer.
- C.** UTC: Universal time coordinated. The precisely measured time at zero degrees longitude; a worldwide standard for time synchronization.

1.3 ACTION SUBMITTALS

A. Product Data:

1. Master and secondary clock system.
2. Master clock.
3. Secondary indicating clocks.
4. Program signal devices.
5. Clock circuit power booster.
6. Back boxes for secondary indicating clocks and program devices.
7. Guards.
8. Rack-mounting provision for master clock.
9. Conductors and cables.
10. Pathways.

- B.** Product Data Submittals: For each product indicated. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes (including available colors) for each product indicated and describe features and operating sequences, both automatic and manual, for the following:

1. Master unit.
2. Indicating clocks.

3. Signal equipment.
4. Equipment enclosures and back boxes.
5. Accessory components.

C. Shop Drawings: For clock systems. Include plans, elevations, sections, details, and attachments to other work.

1. Wiring Diagrams: For power, signal, and control wiring and correction circuits.
 - a. Identify terminals and wiring color codes to facilitate installation, operation, and maintenance.
 - b. Indicate recommended wire types and sizes, and circuiting arrangements for field-installed system wiring. Show protection from overcurrent, static discharge, and voltage surge.
2. Details of seismic restraints including mounting, anchoring, and fastening devices for the following system components:
 - a. Surface-mounted and semirecessed secondary indicating clocks.
 - b. Master clock **[enclosures][mounting racks]**.
 - c. Clock circuit power boosters.
3. Details of seismic strengthening of master clock **[enclosures][mounting racks]**.
4. Dimensioned Outline Drawings of the Mounting Rack for the Master Clock: Show internal seismic bracing, and locate center of gravity of fully equipped and assembled unit. Locate and describe mounting and anchorage provisions.

D. Samples for Initial Selection:

1. Manufacturer's color photographs or color chips showing the full range of colors available for clocks, signal equipment, and control panels.
2. Representative operating models of clock type **<Insert designations of clocks for which Samples are required>**.

E. Delegated Design Submittals: For the master clock and housing indicated to comply with performance requirements and design criteria, including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

1. Detail fabrication and assembly of the master clock and housing.
2. Design Calculations: Calculate requirements for selecting seismic restraints.

1.4 INFORMATIONAL SUBMITTALS

A. Seismic Qualification Data: Certificates, for the master clock, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

B. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

- A. Operation and Maintenance Data: For clock and program control to include in emergency, operation, and maintenance manuals.

1.6 QUALITY ASSURANCE

- A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
- B. Comply with NFPA 70.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

- A. Seismic Performance: Master clock and housing shall withstand the effects of earthquake motions determined according to **[ASCE/SEI 7]<Insert requirement>**.
 - 1. The term "withstand" means "the unit will remain in place without separation of any parts from the device when subjected to the seismic forces specified[**and the unit will be fully operational after the seismic event**]."

2.2 MASTER AND SECONDARY CLOCK SYSTEM

- A. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - 1. **[American Time & Signal Co]**
 - 2. **[Dukane Communication Systems]**
 - 3. **[Faraday]**
 - 4. **[Lathem Time]**
 - 5. **[Midwest Time Control, Inc.]**
 - 6. **[National Time & Signal Corporation]**
 - 7. **[Primex, Inc.]**
 - 8. **[Rauland-Borg Corporation]**
 - 9. **[Sapling, Inc.]**
 - 10. **[Simplex; brand of Johnson Controls International plc, Building Solutions North America]**
 - 11. **[Telecor Inc]**
 - 12. **<Insert manufacturer's name>**
- B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - 1. **[American Time & Signal Co]**
 - 2. **[Dukane Communication Systems]**
 - 3. **[Faraday]**
 - 4. **[Lathem Time]**
 - 5. **[Midwest Time Control, Inc.]**
 - 6. **[National Time & Signal Corporation]**

7. [Primex, Inc.]
8. [Rauland-Borg Corporation]
9. [Sapling, Inc.]
10. [Simplex; brand of Johnson Controls International plc, Building Solutions North America]
11. [Telecor Inc]
12. <Insert manufacturer's name>

C. System Functions and Features:

1. Supply power to remote indicating clocks[**except those indicated to have correction signals applied through a data circuit**].
2. Maintain correct synchronized time and transmit time-correction signals over dedicated system wiring from a master clock to any [one][two]<Insert number> type(s) of secondary indicating clocks, including the following:
 - a. Analog Synchronous Clocks: Correct for minute- and second-hand synchronization at least once each hour and for hour-hand synchronization at least once each day.
 - b. Digital Clocks: Test clocks automatically for synchronization with master time control at least once every hour and automatically correct those not synchronized with the time reference unit.[**Automatically correct clocks immediately when power is restored after an outage of power to the master clock.**]
3. Initiate and execute programs for scheduled automatic operation of remote devices. Include **[audible signal devices][and][visual signal devices][and on and off switching of equipment and circuits]**.
4. Provide for manual control of programmed signal and equipment-switching circuits.
5. Communicate with remote PC **[for access to UTC time base][and][to permit programming from remote location]**.
6. Maintain system access security with a minimum of [one level][two levels][three levels] of user-access control to restrict use of system controls to authorized personnel.[**Levels of access apply to both local access and access from a remote computer.**] Access to user programming and control functions is accomplished by entering a minimum three-digit code. Access levels include the following:
 - a. Access to review existing programs only.
 - b. Access to normal system operating controls.
 - c. Access to all user-programming and control functions.
7. Regulate system timing functions using power-line frequency, backed up for power outages by an internal battery-powered, crystal-controlled oscillator.
8. Regulate system timing functions using power-line frequency, backed up for power outages by an internal battery-powered, crystal-controlled oscillator, and automated periodic reference to NIST or UTC time signals via **[internal telephone modem and automatic dialup connection][internal modem and network or microcomputer Internet access][dedicated internal radio receiver tuned to NIST time signal broadcasts]**. Reference time signals shall be automatically accessed at programmable intervals.
9. Provide for programming multiple independent event schedules into memory and running them simultaneously for different output circuits.
 - a. Quantity of Programmable Schedules: **[Three][Four][Eight][18][250]**, minimum.
 - b. Number of Weekly Events That Can Be Programmed for Each Schedule: **[64][128][300][600][2500]**, minimum.
 - c. Simultaneous operation of independent schedules shall be limited only by the number of signal-device and equipment-switching output circuits.
 - d. Advance Programming for Automatic Holiday Schedule Changes: Number of schedule

changes that can be programmed to suit holidays and vacations shall be [10][16][50][100], and each change may be programmed up to a year in advance to occur on any day of the calendar year.

10. Automatically check functioning of LEDs, switches, input keys, central processor, read-only memory, random access memory, and output circuits. A display on the control panel[**or a remote computer with the proper access code**] shall indicate failure by identifying faulty component or circuit and shall recommend corrective action.
11. Provide [manually initiated][programming for automatic] daylight savings time correction.
12. Provide for adjustments to master clock output signals. Duration of momentary signal shall be individually programmable for each signal and equipment-control output circuit from 1 to 99 seconds. Signals shall be programmable for either on or off switching to suit equipment-operation scheduling.

2.3 MASTER CLOCK

- A. Description: Microprocessor-based, software-controlled unit complying with Class A device requirements in 47 CFR 15.
 1. Programming and control switches.
 2. Informational Display: LED or backlit LCD type.
 - a. Normally shows current time[, **date, and day of week**] display.
 - b. Provides programming cues when system is being programmed.
 3. Output Circuits for Power and Correction of Secondary Indicating Clocks:
 - a. Wired Synchronous Clock Power-and-Correction Circuits: For [analog][and][digital] clocks; a minimum of [one][two]<Insert number> required. Relay controlled.
 - b. Wired Synchronous Digital Clock Power-and-Correction Circuits: [One]<Insert number> required.
 - c. Existing Clock Power-and-Correction Circuit: An output circuit suitable for <Insert **description of type of existing power-and-correction circuit and number of clocks to be connected**>.
 4. Data Output Port for Secondary Clock Correction Circuit: [Digital,]RS485 or similar circuit for scheduled periodic correction signals.
 5. Modem and PC interface software suitable for [remote programming][and][automatic NIST or UTC synchronization].
 6. Circuits for Audible Signal Devices: Relay controlled, manually switchable, using controls on the master clock. Rated 120-V ac, [five][10] A minimum. A minimum of [two][four][six][eight]<Insert number> circuits.
 7. Circuits for Visual Signal Devices: Relay controlled, manually switchable, using controls on the master clock. Rated 120-V ac, [five][10] A minimum. A minimum of [two][four][six][eight]<Insert number> circuits.
 8. Circuits for Programmable Switching of Remote Equipment and Circuits: Relay controlled, manually switchable, using controls on the master clock. Rated 120-V ac, [5][10] A minimum. A minimum of [two][four][six][eight]<Insert number> circuits.
 9. Power Supplies: Capacity for internal loads and power-and correction circuits of connected clocks.
 10. Enclosure: Metal cabinet with locking front panel. When cabinet is locked, display indication shall be visible on or through front panel face. Arrange cabinet for surface, semirecessed, or flush mounting as indicated.
 11. Housing: Rack-mounting metal enclosure with display indication visible on front panel face.

- a. Reinforce mounting and attachment capable of resisting seismic forces described in Section 260548.16 "Seismic Controls for Electrical Systems."

12. Battery Backup for Time Base: Lithium battery to maintain the timekeeping function and retain the programs in memory during outage of normal ac power supply for up to 10 years.
13. Electrostatic Discharge Resistance: Master clock[**and secondary indicating clocks**] shall be tested and certified according to IEC 61000-4-2 in both human-discharge and direct-injection modes.

2.4 SECONDARY INDICATING CLOCKS

- A. Analog Clock: Equipped with a sweep second hand. Movement shall be driven by self-starting, permanently lubricated, sealed synchronous motor equipped with a correcting solenoid actuator, or be a microprocessor-based, second impulse unit, compatible with the master clock.
- B. Digital Clock: Microprocessor-controlled unit complying with Class A device requirements in 47 CFR 15, with red LED digital time display of hours [**and minutes**][, **minutes, and seconds**].
 1. Display Height, 2-1/2-Inch (64-mm) Clock: Hour and minute numerals readable at **50 feet (15 m)**.
 2. Display Height, 4-Inch (102-mm) Clock: Hour and minute numerals readable at **100 feet (30 m)**.
 3. Display Format: Selectable between 12-hour with "PM" LED display and 24-hour formats.
 4. Connections for Power and Correction:
 - a. Wired synchronous connection to the master clock for both operating power and correction.
 - 1) Time-Base Backup, Internal Alkaline Battery: Backs up internal time base to maintain timekeeping during power outages of up to six days' duration.
 - 2) Time-Base Backup, Internal Capacitor: Back up internal time base to maintain timekeeping during power outages of up to 12 hours' duration.
 - b. Correction by RS485, Ethernet, or similar data line with operating power supplied over a separate connection.
 - c. Power Connection for Secondary Indicating Clocks: [**Plug connector**][**Wire pigtail or compression splice**].
- C. Interval-Timer Clock: Digital microprocessor-controlled, **4-inch (102-mm)** unit with **2-1/2-inch (64-mm)**, red LED digital display for hours and minutes and **1-5/16-inch (33-mm)** display for seconds; a separately mounted, mode-control switch; and the following features:
 1. Display Visibility: Hour and minute numerals readable at [**30 feet (10 m)**]**<Insert dimension>** in normal ambient light.
 2. Operating Modes:
 - a. Normal: Clock operates as a regular secondary system clock, displaying corrected time in normal display configuration, selectable between 12- and 24-hour formats, with "PM" digital display for 12-hour format.
 - b. Count-Down or Count-Up Timer: Selected by mode-control switch count-up and count-down positions, and capable of being preset at the mode-control station.
 - c. Code Blue: Automatically selected by a signal through a wiring connection from [**the code-blue system**]**<Insert source for the initiating signal>**. This signal captures control of the clock regardless of current mode or correction status and instantly initiates count-up operation, starting at time 00:00:00. While in this mode, other clock functions, including correction, shall run in the background. Clock shall revert to normal operating mode when

the initiating-signal system is reset.

3. Mode-Selector Switch: Push-button or rotary, multiposition type, flush mounted; with start, stop, and reset capability in both count-up and count-down modes.
 4. Audible tone signal: Housed in clock or mode-selector-switch box. Sounds at end of preset up or down count.
- D. Provision for Modular Panel Installation: Equip designated clock for panel mounting. Mount flush or semirecessed with arrangement and trim as indicated. Coordinate wiring with other modular panel components, including **[room lighting switches][intercom devices][convenience outlets][data outlets][speaker]** and other similar devices.
- E. Provision for Time-Tone-Unit Installation: Equip indicated clocks for housing or mounting in an acoustically treated and baffled speaker compartment specified in Section 275116 "Public Address and Mass Notification Systems."
- F. Secondary Indicating Clock Characteristics:
1. Clock Type: **[Analog][Digital]**.
 2. Face Configuration: **[Single][Double]**.
 3. Mounting: **[Recessed][Semirecessed][Pendant][Surface][Suspended][Within time-tone unit][Within modular panel]**<Insert mounting height of pendant, wall, and suspended clocks>.
 4. Nominal Dimensions: <Insert depth and nominal diameter or height and width in inches (mm)>.
 5. Casing Finish: <Insert description, including types and colors>.
 6. Special Environmental Conditions: <Describe conditions such as corrosive, damp, or wet locations>.
 7. Dial Face Color: <Insert color>.
 8. Analog Clock Crystal: Clear **[glass][acrylic][polycarbonate]**.
 9. Face Color: <Insert color>.
 10. Display Height: <Insert inches (mm)>.
 11. Seconds Display: **[Yes][No]**.
 12. Digital Clock Lens: Antiglare acrylic material.
 13. Battery Backup: **[Yes][No]**.
 14. Interval-Timer Display: **[Yes][No]**.

2.5 PROGRAM SIGNAL DEVICES

- A. Bells: Heavy-duty, modular, vibrating type with the following sound-output ratings measured at **10 feet (3 m)**:
1. 4-Inch (100-mm) Bell: 90 dB.
 2. 6-Inch (150-mm) Bell: 95 dB.
 3. 10-Inch (250-mm) Bell: 104 dB.
- B. Chimes: Heavy-duty, modular, vibrating chimes with polished-chrome tone bar and enamel-finished housing. Minimum sound-output rating measured at **10 feet (3 m)** shall be 75 dB.
- C. Clock Buzzers: Adjustable output signal device designed for mounting within clock housing or outlet box.
1. Sound-Output Rating Measured at 3 Feet (1 m): 75 dB.
 2. Audible Tone Frequency: Manufacturer's standard between 120 Hz and 2 kHz.

- D. Horns: Modular, adjustable-output, vibrating type with minimum full-intensity-rated sound output of 103 dB measured at **10 feet (3 m)**.
- E. Projector Horns: Adjustable-output, vibrating type with **[single][double]** projector arranged to channel sound in the direction of the projector axis, and with minimum full-intensity-rated sound output of 104 dB measured at **10 feet (3 m)**.
- F. Loudspeakers for Audible Tones: See Section 275116 "Public Address and Mass Notification Systems."
- G. Visible Signal Devices: Strobe lights with **[blue][yellow]** polycarbonate lens and xenon flash tube, with lens mounted on an aluminum faceplate and the word "Program" engraved in letters at least **1 inch (25 mm)** high on lens. Lamp unit shall have a minimum rated light output of 75 candela.
- H. Combination Audible and Visible Signal Devices: Factory-integrated horn and strobe light in a single mounting assembly.
- I. Outdoor Signal Equipment: Weatherproof models listed for outdoor use.
- J. Mounting Arrangement for Signal Devices: Designed for attachment with screws on the mounting plate of a flush-mounted back box unless otherwise indicated.
- K. Enclosures for Flush-Mounting Bells and Horns: Enclosure, mounting plate, and grille assembly shall be furnished by device manufacturer to match features of the device to be mounted. Enclosure shall be recessed in wall, completely enclosing the device, with grille mounting over the open side of the enclosure and flush with the wall.
- L. Connection Provision for Signal-Indicating Devices: **[Plug connector][Wire pigtail or compression splice]**.

2.6 CLOCK CIRCUIT POWER BOOSTER

- A. Description: Transformer power supply, mounted in steel cabinet with hinged door, and having fuse-protected input and output circuits.

2.7 BACK BOXES FOR SECONDARY INDICATING CLOCKS AND PROGRAM DEVICES

- A. Description: Box and cover-plate assembly shall be furnished by device manufacturer and be suitable for device to be mounted. Back boxes shall be equipped with knockouts and hanger straps or mounting adapters arranged for flush mounting the device unless otherwise indicated.

2.8 GUARDS

- A. Description: Formed-steel wire, shaped to fit around guarded device, with **1-inch (25-mm)** maximum clearance.
 - 1. Mounting Provisions: Fixed tabs, welded to guard and arranged for screw attachment to mounting surface.
 - 2. Finish for Indoor Devices: **[Clear]<Insert finish color>** epoxy lacquer over zinc plating.
 - 3. Finish for Outdoor Devices: **[Black]<Insert finish color>** powder coat over zinc plating and primer.

**2.9 RACK-MOUNTING PROVISION FOR MASTER CLOCK**

- A. Equipment Cabinet: **[Floor][Wall]**-mounted, rack type. Comply with EIA-310-D and the following:
1. Cabinet Housing: Constructed of steel, with front **[and rear]** doors; with manufacturer's standard tumbler locks, keyed alike.
 - a. Front door shall have a clear panel in front of the master clock display.
 - b. Housing shall enclose master clock and auxiliary clock system components, plus a minimum of **[20]<Insert number>** percent spare capacity for future equipment.
 2. Forced Ventilation: Internal low-noise fan with a filtered intake vent, connected to operate from 105- to 130-V ac, 60 Hz; separately fused and switchable and arranged to be powered when main cabinet power switch is on.
 3. Natural Ventilation: Ventilated rear and sides with louvers and solid top.
 4. Arrange inputs, outputs, interconnections, and test points so they are accessible at rear of rack for maintenance and testing, with each item removable from rack without disturbing other items or connections.
 5. Blank Panels: Cover empty space in equipment racks so entire front of rack is occupied by equipment or panels.
 6. Finish: Uniform, baked-enamel, **[manufacturer's standard color]<Insert color>** finish over rust-inhibiting primer.
 7. Power-Control Panel: On front of equipment housing; with master power on-off switch and pilot light, and socket for a 5-A, indicating, cartridge fuse for rack equipment power.
 8. Vertical Plug Strip: Grounded receptacles, **12 inches (300 mm)** o.c. the full height of rack, to supply rack-mounting equipment.
 9. Maintenance Receptacles: Duplex convenience outlet with supply terminals separate from equipment plug strip and located in front of rack.

2.10 CONDUCTORS AND CABLES

- A. Conductors: Jacketed, twisted pair and twisted multipair, untinned solid copper. Sizes as recommended by system manufacturer, but not smaller than No. 22 AWG. Voltage drop for signal, control, and clock correction circuits shall not exceed 10 percent under peak load conditions.
- B. 120-V AC and Class 1 Signal and Control Circuits: Stranded, single conductors of size and type recommended by system manufacturer. Materials and installation requirements are specified in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."
- C. Class 2 and Class 3 Signal and Control Circuits: Single conductor or twisted-pair cable, unshielded, unless manufacturer recommends shielded cable. Materials and installation requirements are specified in Section 260523 "Control-Voltage Electrical Power Conductors and Cables."
- D. Data Circuits: Category 6 minimum, unshielded, twisted-pair cable, unless manufacturer recommends shielded cable.
- E. Insulation: Thermoplastic, not less than **1/32 inch (0.8 mm)** thick.
- F. Plenum Cable: Listed and labeled for plenum installation.
- G. Conductor Color-Coding: Uniformly identified and coordinated with wiring diagrams.
- H. Shielding: For speaker-microphone leads and at other locations recommended by manufacturer; No. 34 AWG tinned, soft-copper strands formed into a braid or equivalent foil.

1. Minimum Shielding Coverage on Conductors: 60 percent.

2.11 PATHWAYS

- A. Intercommunication and Program System Raceways and Boxes: Comply with requirements in Section 270528 "Pathways for Communications Systems."
 1. Raceway Type: **[Optical fiber/communications raceway and fittings][Metal wireways][Nonmetal wireways][Surface metal raceways][Surface nonmetal raceways]**.
- B. Outlet boxes shall be no smaller than **2 inches (50 mm)** wide, **3 inches (75 mm)** high, and **2-1/2 inches (64 mm)** deep.
- C. Flexible metal conduit is prohibited.

PART 3 - EXECUTION

3.1 INSTALLATION

- A. Mount system components with fastening methods and devices designed to resist the seismic forces indicated in Section 260548.16 "Seismic Controls for Electrical Systems."

3.2 WIRING METHODS

- A. Wiring in Raceways and Trays: Install cables in raceways and cable trays except within consoles, cabinets, desks, and counters[**and except in accessible ceiling spaces and in gypsum board partitions where unenclosed wiring method may be used**]. Conceal raceway and cables except in unfinished spaces.
 1. Install plenum cable in environmental air spaces, including plenum ceilings.
 2. Comply with requirements for raceways and boxes specified in Section 270528 "Pathways for Communications Systems."
- B. Wiring in Ceilings, Walls, and Floors: Conceal conductors and cables in accessible ceilings, walls, and floors where possible.
- C. Wiring within Enclosures: Bundle, lace, and train cables to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.
- D. Support cables not enclosed in raceways on J-Hooks. Install, size, and space J-Hooks to comply with TIA-568-C.

3.3 ELECTRICAL CONNECTIONS

- A. Make splices, taps, and terminations on numbered terminal strips in junction, pull, and outlet boxes; terminal cabinets; and equipment enclosures.
- B. Use **[plug connectors][splices]** for connections to clocks and signal devices.

- C. Ground clocks, programming equipment, and conductor and cable shields to eliminate shock hazard and to minimize ground loops, common-mode returns, noise pickup, cross talk, and other impairments.

3.4 IDENTIFICATION

- A. Comply with Section 260553 "Identification for Electrical Systems."
- B. Color-code wires, and apply wire and cable marking tape to designate wires and cables so they are uniformly identified and coordinated with wiring diagrams throughout the system.

3.5 FIELD QUALITY CONTROL

- A. Manufacturer's Field Service: Engage a factory-authorized service representative to inspect, test, and adjust components, assemblies, and equipment installation, including connections.
- B. Perform tests and inspections.
 - 1. Manufacturer's Field Service Assistance: Engage a factory-authorized service representative to inspect components, assemblies, and equipment installations, including connections, and to assist in testing.
- C. Tests and Inspections:
 - 1. Perform operational-system tests to verify compliance with the Specifications and make adjustments to bring system into compliance. Include operation of all modes of clock correction and all programming and manually programmed signal and relay operating functions.
 - 2. Verify that units and controls are properly labeled and interconnecting wires and terminals are identified.
- D. Clock system will be considered defective if it does not pass tests and inspections.
- E. Prepare test and inspection reports.

3.6 ADJUSTING

- A. Program system according to Owner's requirements. Set system so signal devices operate on Owner-required schedules and are activated for durations selected by Owner. Program equipment-control output circuits to suit Owner's operating schedule for equipment controlled.
- B. Adjust sound-output level of adjustable signal devices to suit Owner's requirements.
- C. Occupancy Adjustments: When requested within [12]<Insert number> months of date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions. Provide up to [two]<Insert number> visits to Project during other-than-normal occupancy hours for this purpose.

3.7 DEMONSTRATION

- A. **[Engage a factory-authorized service representative to train][Train]** Owner's maintenance personnel to adjust, operate, and maintain clock-and-program-control system components.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 28 00 00 00 - ACCESS CONTROL SOFTWARE AND DATABASE MANAGEMENT

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Software for access control system units.
2. Software for access control system supplementary computer equipment.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 281400 "Access Control System Hardware" for hardware required to run software specified in this Section.
5. Section 281500 "Integrated Access Control Hardware Devices" for access control field devices controlled by software specified in this Section.

1.2 DEFINITIONS

- A. RAM: Random-access memory.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.

B. Certificates:

1. **<Insert certificate requirement>.**

C. Field Quality-Control Submittals:

1. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

- A. Manufacturers' Published Instructions: Record copy of official installation[
and][**testing**][**and**][**troubleshooting**] instructions issued to Installer by manufacturer for the following:

1. Installation and programming instructions for operating system software, including all applicable

- software add-ons.
- 2. Manufacturer's recommended setup and testing procedure for operating system software and applicable software add-ons.
- 3. Troubleshooting instructions for operating system software and applicable software add-ons.
- 4. Installation and programming instructions for antivirus and security protection software.
- 5. Manufacturer's recommended setup and testing procedure for antivirus and security protection software.
- 6. Troubleshooting instructions for antivirus and security protection software.

1.5 CLOSEOUT SUBMITTALS

A. Maintenance Contracts:

- 1. Software and firmware service agreement.

1.6 QUALIFICATIONS

A. Security Design Professional: Design professional with active Physical Security Professional (PSP) certification issued by American Society for Industrial Security (ASIS) and with documented experience managing installation of security systems in similar size and complexity.

B. Security Testing and Inspecting Agency: Entity possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.

- 1. On-site security testing supervisor must have **[ASIS][PSP]<Insert organization>** certification and documented training and experience with testing security equipment in accordance with **[ASIS]<Insert organization>** testing standards.

PART 2 - PRODUCTS

2.1 SOFTWARE FOR ACCESS CONTROL SYSTEM UNITS

A. Description: This category covers software products intended for installation on access control system units.

B. Performance Criteria:

1. Regulatory Requirements:

- a. Listed and labeled in accordance with NFPA 70 and NFPA 72, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
- b. Comply with NFPA 1, NFPA 730, NFPA 731, and ICC IBC.
- c. **<Insert requirements>**.

2. Listing Criteria:

- a. Cybersecurity: UL CCN CYBR; including UL 2900-1 and UL 2900-2-3.
- b. Access Control System Functionality: UL CCN ALVY; including UL 294.
- c. Hardware that Interfaces with Fire Alarm or Mass Notification: UL CCN UOJK; including UL

864.

C. Access Control System Unit Operating System Software:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Cansec Systems Ltd.]**
 - b. **[HID Global; ASSA ABLOY]**
 - c. **[Honeywell Commercial Security; Honeywell International, Inc.]**
 - d. **[LenelS2; Carrier Global Corporation]**
 - e. **[Tyco Software House; Tyco International, Ltd.]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Cansec Systems Ltd.]**
 - b. **[HID Global; ASSA ABLOY]**
 - c. **[Honeywell Commercial Security; Honeywell International, Inc.]**
 - d. **[LenelS2; Carrier Global Corporation]**
 - e. **[Tyco Software House; Tyco International, Ltd.]**
 - f. **<Insert manufacturer's name>**
3. Additional Characteristics:
 - a. Provides event logging, notification, and escalation.
 - b. Provides threat-level management and response actions.
 - c. Provides dashboard view of system health and status.
 - d. Maintains credential-driven user records and access history.
 - e. Supports network-connected credential readers and controlled doors.
 - f. Supports add-on software.
 - g. Supports video-surveillance system integration.
 - h. Provides email **[and text message]** alerts.
 - i. **<Insert characteristics>**.
4. Options:
 - a. Operating System: **[Windows 7][Windows 10]<Insert operating system>**.
 - b. User Interface: **[Web browser][and][mobile app]**.
 - c. Web Browser: **[Microsoft Edge (Chromium)][or][Google Chrome]<Insert web browser>**.
 - d. Drive Space: **[32 GB][100 GB][500 GB]<Insert size>**.
 - e. Memory: **[1 GB][4 GB][8 GB]<Insert size>** RAM.
 - f. Screen Resolution: **[1280×720][1920×1080]<Insert resolution>**.
 - g. Number of Cardholders: Up to **[1000][10,000][50,000][150,000]<Insert number>**.
 - h. Number of Supported Readers: Up to **[100][500][1000]<Insert number>**.
 - i. Number of Inputs: **[128][256][1024]<Insert number>**.
 - j. Number of Outputs: **[128][256][1024]<Insert number>**.
 - k. Simultaneous Users: **[Five][25][35]<Insert number>**.

D. Access Control System Unit Antivirus and Security Protection Software:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[Avast Software s.r.o.]**
 - b. **[McAfee, LLC]**
 - c. **[Microsoft Corporation]**
 - d. **[S.C. Bitdefender S.R.L.]**
 - e. **[Sophos Ltd.; Sophos Group plc]**
 - f. **<Insert manufacturer's name>**
2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[Avast Software s.r.o.]**
 - b. **[McAfee, LLC]**
 - c. **[Microsoft Corporation]**
 - d. **[S.C. Bitdefender S.R.L.]**
 - e. **[Sophos Ltd.; Sophos Group plc]**
 - f. **<Insert manufacturer's name>**
3. Additional Characteristics:
 - a. Endpoint detection and response.
 - b. Anti-ransomware.
 - c. Managed threat response.
 - d. Exploit prevention.
 - e. Active adversary mitigations.
 - f. Email alerts.
 - g. **<Insert characteristics>**.
4. Options:
 - a. Operating System: **[Windows 7][Windows 10]<Insert operating system>**.
 - b. User Interface: **[Web browser][and][mobile app]**.
 - c. Web Browser: **[Microsoft Edge (Chromium)][or][Google Chrome]<Insert web browser>**.
 - d. Drive Space: **[1 GB][4 GB][8 GB]<Insert size>**.
 - e. Memory: **[1 MB][100 MB][1 GB]<Insert size>** RAM.

E. Visitor Management Database Software:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[BluBØX Security, Inc.]**
 - b. **[HID Global; ASSA ABLOY]**
 - c. **[Splan Inc.]**
 - d. **[Traction Guest]**
 - e. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[BluBØX Security, Inc.]**
 - b. **[HID Global; ASSA ABLOY]**
 - c. **[Splan Inc.]**
 - d. **[Traction Guest]**
 - e. **<Insert manufacturer's name>**
 3. Additional Characteristics:
 - a. Visitor registration.
 - b. Visitor audit trails and reporting.
 - c. Badge printing.
 - d. Unassisted visitor registration and badging.
 - e. Preconfigured security levels of users.
 - f. Filters out unsolicited visitors.
 - g. Supports integrated credential readers.
 - h. **<Insert characteristics>**.
 4. Options:
 - a. Operating System: **[Windows 7][Windows 10]<Insert operating system>**.
 - b. User Interface: **[Web browser][and][mobile app]**.
 - c. Web Browser: **[Microsoft Edge (Chromium)][or][Google Chrome]<Insert web browser>**.
 - d. Drive Space: **[100 MB][500 MB][1 GB]<Insert size>**.
 - e. Memory: **[500 MB][1 GB][4 GB]<Insert size>** RAM.
 - f. Automated Alerts:
 - 1) Visitor check-in.
 - 2) Package check-in.
 - 3) Watch list alert.
 - 4) Expired badges.
 - 5) Panic message.
 - 6) Current visitor.
 - 7) Maximum visitor.
 - 8) Frequent visitor.
 - 9) Time based.
- F. Mobile Credential Validation Database Software:
1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:
 - a. **[HID Global; ASSA ABLOY]**
 - b. **<Insert manufacturer's name>**
 2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:
 - a. **[HID Global; ASSA ABLOY]**

- b. <Insert manufacturer's name>
- 3. Additional Characteristics:
 - a. Mobile Validator and Mobile Registration engines.
 - b. Network-based functionality and database synchronization.
 - c. Credential audit trail exporting.
 - d. Contact or contactless verification.
 - e. Integrated card reader.
 - f. Biometric finger scanner.
 - g. <Insert characteristics>.
- 4. Options:
 - a. Operating System: [Windows CE 5.0][Windows Mobile 6]<Insert operating system>.
 - b. Multi-Factor Authentication: [One][Two][Three] factor authentication.
 - c. Drive Space: [100 MB][500 MB][1 GB]<Insert size>.
 - d. Memory: [32 MB][100 MB][1 GB]<Insert size> RAM.
 - e. Credentials:
 - 1) PIV.
 - 2) PIV-1.
 - 3) TWIC.
 - 4) FRAC.
 - 5) CAC.
 - 6) CIV.
 - 7) Prox.
 - 8) DESFire.

2.2 SOFTWARE FOR ACCESS CONTROL SYSTEM SUPPLEMENTARY COMPUTER EQUIPMENT

- A. Description: This category covers software products for installation on access control system supplementary computer equipment that do not inhibit safety or intended operation of access control system hardware devices when they are shut off, lose power, or otherwise fail.
- B. Performance Criteria:
 - 1. Regulatory Requirements:
 - a. Listed and labeled in accordance with NFPA 70 and NFPA 72, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.
 - b. <Insert requirements>.
 - 2. Listing Criteria:
 - a. Cybersecurity: UL CCN CYBR; including UL 2900-1 and UL 2900-2-3.
- C. Access Control System Supplementary Computer Equipment Operating System Software:
 - 1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

- a. [Cansec Systems Ltd.]
 - b. [HID Global; ASSA ABLOY]
 - c. [Honeywell Commercial Security; Honeywell International, Inc.]
 - d. [LenelS2; Carrier Global Corporation]
 - e. [Tyco Software House; Tyco International, Ltd.]
 - f. <Insert manufacturer's name>
 2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:
 - a. [Cansec Systems Ltd.]
 - b. [HID Global; ASSA ABLOY]
 - c. [Honeywell Commercial Security; Honeywell International, Inc.]
 - d. [LenelS2; Carrier Global Corporation]
 - e. [Tyco Software House; Tyco International, Ltd.]
 - f. <Insert manufacturer's name>
 3. Additional Characteristics:
 - a. Provides event logging, notification, and escalation.
 - b. Provides threat-level management and response actions.
 - c. Provides dashboard view of system health and status.
 - d. Maintains credential-driven user records and access history.
 - e. Supports network-connected credential readers and controlled doors.
 - f. Supports add-on software.
 - g. Supports video-surveillance system integration.
 - h. <Insert characteristics>.
 4. Options:
 - a. Operating System: [Windows 7][Windows 10]<Insert operating system>.
 - b. User Interface: [Web browser][and][mobile app].
 - c. Web Browser: [Microsoft Edge (Chromium)][or][Google Chrome]<Insert web browser>.
 - d. Drive Space: [32 GB][100 GB][500 GB]<Insert size>.
 - e. Memory: [1 GB][4 GB][8 GB]<Insert size> RAM.
 - f. Screen Resolution: [1280×720][1920×1080]<Insert resolution>.
 - g. Number of Cardholders: Up to [1000][10,000][50,000][150,000]<Insert number>.
 - h. Number of Supported Readers: Up to [100][500][1000]<Insert number>.
 - i. Number of Inputs: [128][256][1024]<Insert number>.
 - j. Number of Outputs: [128][256][1024]<Insert number>.
 - k. Simultaneous Users: [Five][25][35]<Insert number>.
- D. Access Control System Supplementary Computer Equipment Antivirus and Security Protection Software:
1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:
 - a. [Avast Software s.r.o.]
 - b. [McAfee, LLC]
 - c. [Microsoft Corporation]
 - d. [S.C. Bitdefender S.R.L.]

- e. [Sophos Ltd.; Sophos Group plc]
- f. <Insert manufacturer's name>
