OK; I have those both on my calendar. I will be sure to attend the LUAC meeting.

Regarding the address, it is, in fact, 90 Crest Road, but that address is relatively new. It was created a couple of years ago and then just reassigned to APN 241-231-010 following approval of our lot line adjustment. The easy way to find the site is to go up Crest Road (to the east) from Upper Walden Road (very steep hill). Where Crest makes a near-90-degree turn to the right (south), there is a dirt road that extends to the left (north). That dirt road is part of a 60-foot-wide "panhandle" that leads to the bulk of the parcel, which extends eastward nearly to the big green Cal-Am water storage tank and northward to the ravine. (One of the LUAC members, Dan Keig, is our neighbor to the east, and he recently sold the parcel immediately southeast of our parcel, so I would imagine that he knows where our lot is located.) I have attached a screen shot from the County GIS map, along with the assessor's parcel map.

I would caution folks ***not to try to drive on the dirt road***. The archaeologist who surveyed our property did so, got stuck in the mud, and was stranded for some time before our tree guy was able to extract him using his Bobcat tractor. (The tow truck that showed up could not get to him.) So if someone drives to the site, they should park along Crest Road and not attempt to drive on the property, especially at this time of year!

Thank you.
