

1. San Lucas Clean Drinking Water Project - \$TBD

This project would secure funding for a long-term project that provides a reliable source of safe, clean drinking water to the small, disadvantaged community of San Lucas.

- The project is located in Congressional District 18

2. Nacimiento and San Antonio Dams and Reservoirs Safety Projects - \$TBD

This project would provide flood management, water supply, groundwater recharge, fish habitat, recreation, and other benefits relating to the Nacimiento and San Antonio Dams and Reservoirs, in compliance with federal and state "Safety of Dams" mandates. The exact scope of the discrete project is still being determined by the Monterey County Water Resources Agency as well as the related federal funding request amount.

- The projects are located in Congressional District 18

3. Salinas Skate Park and BMX Pump Track - \$500,000

The project would construct a new 22,250 square foot regional Bike and Skate Park serving Monterey, San Benito and Santa Cruz Counties. Located in densely populated East Salinas, the site will be linked by several multi-use trails connecting the project to some of the most under-served neighborhoods and schools. The construction of the track will benefit the surrounding recreational features at the campus (Veterans Memorial Park, Carr Lake, Natividad Creek Park, and the Twin Creeks Golf Course/ First Tee, and the Salinas Soccer Complex).

- The project is located in Congressional District 18.

4. Salinas Regional Soccer Complex - \$TBD

This multi-phased project would continue the significant expansion of the Salinas Regional Soccer Complex, which is committed to fostering positive youth development and promoting health and wellness, and will provide equitable access to safe, family-friendly outdoor facilities and programming. The specific elements of this project for which federal funding would be requested is currently being finalized but may include stadium seating for 2,500; bathroom facilities; scoreboard; and, the remaining required underground infrastructure, including all utilities.

- The project is located in Congressional District 18.

5. County Parks Outdoor Education and Environmental Stewardship Project - \$200,000

This project would provide a location and facility for schools, special programs and homeschool groups to engage with nature and provide a connection to our natural environments. This project would include a rehabilitation component of the Toro Regional Park Environmental Center which has been closed for over a decade, but which once provided environmental, cultural and nature-oriented education opportunities for our community.

- The project is located in Congressional District 19.

6. County Parks Outdoor Accessible and Inclusive Fitness Project - \$200,000

This project would aid the public in accessing outdoor fitness opportunities but also provide facilities for our underserved populations. This project would seek to provide outdoor fitness opportunities at Toro and San Lorenzo Parks and would include an accessible trail loop coupled with outdoor gym equipment and interpretive signage detailing healthy life topics such as diet, fitness, and mental health.

- The project is located in Congressional Districts 18 and 19.

7. Nacimiento Lake Drive Repaving Project - \$2.1 million

This project proposes to repave approximately 2 miles of Nacimiento Lake Drive. Nacimiento Lake Drive is the only land access route to Nacimiento Lake Resort for emergency responders and recreational users and serves as the primary route to and from Paso Robles for local residents.

- The project is located in Congressional District 19 and regularly serves constituents from Congressional Districts 18 and 24.

8. Homeless Encampment Resolution – Reclamation Ditch Restoration \$500,000

This project would fund restoration efforts of the “Reclamation Ditch,” which is a series of channels and water management infrastructure. The primary objective of the Reclamation Ditch is to protect life and property and to reduce the suffering that could be caused by storm events. In addition, it receives irrigation return water from adjacent farmlands and provides drainage service to an area of approximately 168 square miles.

- The Reclamation Ditch is located in Congressional Districts 18 and 19.
