Area Plan (APN: (416-231-018-000 )]

**The PELIOVA CAROLYN AND BRADFORD MATTHEW application (PLN230131) came on for public hearing before the County of Monterey Planning Commission on February 12, 2025, April 9, 2025, and August 13, 2025. Having considered all the written and documentary evidence, the administrative record, the staff report, oral testimony, and other evidence presented, the Planning Commission finds and decides as follows:**

#### **FINDINGS**

1. **FINDING:** **CONSISTENCY** – The Project, as conditioned, is consistent with the applicable plans and policies which designate this area as appropriate for development.  
**EVIDENCE:** a) During the course of review of this application, the project has been reviewed for consistency with the text, policies, and regulations in:
  - the 2010 Monterey County General Plan;
  - Toro Area Plan;
  - Monterey County Zoning Ordinance (Title 21);

No conflicts were found to exist. No communications were received during the course of review of the project indicating any inconsistencies with the text, policies, and regulations in these documents.

- b) Allowed Use. The property is located at 103A San Benancio, Salinas (Assessor's Parcel Number 416-231-018-000), Toro Area Plan. The parcel is zoned Low Density Residential with Building Site 6 and Design Control overlays or "LDR/B-6-D". LDR zoning allows for the establishment of the first single-family dwelling as a principally allowed use. The Design Control overlay requires the granting of a Design Approval for all structures. The proposed project involves the construction of a two-story 3,477 square foot single-family dwelling with an attached 606 square foot garage, an attached 369 square foot deck, 540 square feet of patios, and a 320 square foot driveway. The project also involves the removal of 10 protected Oak trees and development on slopes in excess of 25%, which are allowed uses subject to the granting of a Use Permit in each case. Therefore, the project is an allowed land use for this site.
- c) HCD-Planning staff conducted a site inspection on October 28th, 2024, to verify that the project on the subject parcel conforms to the plans listed above.
- d) Review of Development Standards. The project meets all required development standards for Low Density Residential zoning district and B overlay district are identified in Title 21 section 21.14.060 and 21.42.030. Pursuant to Title 21 section 21.14.060.C, development within this district shall meet the required setbacks unless combined with a "B" district. Pursuant to Title 21 section 21.42.030.F, the required setbacks in the B-6 zoning overlay are 30 feet (front), 10 percent (side), and 20 feet (rear). The proposed single-family dwelling will have setbacks of 55 feet (front), 158 feet (side), and over 200 feet (rear). The LDR zoning district allows a maximum height of 30 feet for main structures, and the proposed single-family dwelling will have a height of 27 feet. The LDR zoning district allows a maximum building site coverage of 25% on lots of 20,000 square feet or more. In this case, the subject property contains 286,843 square feet. The proposed project will have a building site coverage of 3,140 square feet or 1.09%. Therefore, the project meets all required development standards.
- e) Design and Visual Resources. Pursuant to Title 21 Chapter 21.44, the project parcels and surrounding area are designated as a Design Control Zoning District ("D" zoning overlay), which regulates the location, size, configuration, materials, and colors of structures and fences to assure the protection of the public viewshed and neighborhood character. Pursuant to the Toro Area Plan Policy T-3.1, within areas designated as visually sensitive, the County shall encourage architectural design that is consistent with the rural nature of the area. As shown on the Toro Scenic Highway Corridors and Visual Sensitivity Map (Figure 16), the subject property is identified as visually sensitive. Staking and flagging was installed, and staff conducted a site visit on October 28<sup>th</sup>, 2024, and confirmed that the subject property and staking and flagging were not visible from San Benancio Road or Highway 68 due to topography,

distance, and existing mature vegetation. The southern portion of the property is visible for limited instances along San Benancio Road, but this portion of the property is subject to the restrictions of a Scenic Easement. Along San Benancio Canyon Road (a private road), the proposed development will be sited substantially higher than the road due to the property's steep incline but will be partially screened by existing vegetation. The proposed single-family dwelling will have colors and materials consisting of a matte black metal roof and muted blue-gray wooden siding with white trim. The proposed single-family dwelling will be architecturally consistent with the rural and traditional architecture of the surrounding neighborhood and the proposed colors and materials are consistent with the surrounding neighborhood and are in-keeping with the recommendations of the LUAC. Therefore, the proposed project's colors will not detract from the immediately surrounding neighborhood character due to siting, architectural style, and vegetative screening. Condition No. 8 has been applied to require the installation of down-lit unobtrusive exterior lighting. Therefore, as proposed and conditioned, the project is not in conflict with the surrounding environment or with the surrounding residential neighborhood character and assures protection of the public viewshed and visual integrity.

- f) Tree Removal. The proposed project involves the removal of 10 protected Oak trees. However, as detailed in Finding No. 6 and supporting evidence, the proposed tree removal is the minimum required under the circumstances and the removal will not involve a risk of adverse environmental impacts. Therefore, the criteria necessary to grant a Use Permit have been met in this case.
- g) Development on Slopes. The proposed project involves consideration of a Use Permit to allow development on slopes in excess of 25%. As demonstrated in Finding No. 7 and supporting evidence, the proposed project complies with General Plan Policy OS-3.5, which prohibits development on slopes in excess of 25%, unless the Appropriate Authority finds that such development is unavoidable and/or better meets the resource protection goals and policies of the 2010 General Plan and Toro Area Plan.
- h) Cultural Resources. According to the Monterey County Geographic Informational System (GIS), the subject property has a high archaeological sensitivity. Based on auger testing results and information available in the record, there are no indicators of archaeological artifacts or historical significance on site. The potential for inadvertent impacts to cultural resources is limited and will be controlled by use of the County's standard condition (Condition No. 3), which requires the contractor to stop work if previously unidentified resources are discovered during construction.
- i) Lot Legality. The subject property is shown in its current configuration (6.2 acres) on a Parcel Map (Minor Subdivision File No. 77-58) as Parcel 3, recorded on August 4<sup>th</sup>, 1977 (Volume 11, Parcel Maps, Page 175). Therefore, the County recognizes the subject properties as legal lots of record.

- j) Land Use Advisory Committee. The project was referred to the Toro Land Use Advisory Committee (LUAC) for review, on October 28<sup>th</sup>, 2024. Based on the LUAC Procedure guidelines adopted by the Monterey County Board of Supervisors, this application did warrant referral to the LUAC because the project involves a Design Approval subject to review by the Planning Commission. The LUAC voted 4-0 to support the project as proposed, however, LUAC members brought up concerns relating to the proposed colors, tree removal, and development on slopes in excess of 25%.
- k) The application, project plans, and related support materials submitted by the project applicant to County of Monterey HCD-Planning for the proposed development found in Project File PLN230131.

2. **FINDING:** **SITE SUITABILITY** – The site is physically suitable for the proposed development and/or use.

- EVIDENCE:**
- a) The project has been reviewed for site suitability by the following departments and agencies: HCD- Planning, County of Monterey Regional Fire Protection District, HCD-Engineering Services, HCD-Environmental Services, and Environmental Health Bureau. County staff reviewed the application materials and plans to verify that the project on the subject site conforms to the applicable plans and regulations, and there has been no indication from these departments/agencies that the site is not suitable for the development. Conditions recommended have been incorporated.
  - b) Staff identified potential impacts to Geological Resources (soils and slopes), and Forest Resources. The following reports have been prepared:
    - “Geological Hazards Evaluation” (County of Monterey Library No. LIB240057), prepared by Craig S. Harwood, Ben Lomond, CA, December 13<sup>th</sup>, 2023
    - “Geotechnical Investigation” (County of Monterey Library No. LIB240054), prepared by Butano Geotechnical Engineering, INC., Freedom, CA, December 22<sup>nd</sup>, 2022
    - “Arborist Report” (County of Monterey Library No. LIB240056), prepared by Monterey Bay Treeworks, Carmel, CA, January 5<sup>th</sup>, 2024

The above-mentioned technical reports by outside consultants indicated that there are no physical or environmental constraints that would indicate that the site is not suitable for the use proposed. County staff has independently reviewed these reports and concurs with their conclusions.

- c) Staff conducted a site inspection on October 28<sup>th</sup>, 2024 to verify that the site is suitable for this use.
- d) The application, project plans, and related support materials submitted by the project applicant to the County of Monterey HCD - Planning for the proposed development found in Project File PLN230131.

3. **FINDING:** **HEALTH AND SAFETY** - The establishment, maintenance, or operation of the use or structure applied for, will not, under the

circumstances of the particular case, be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use; or be detrimental or injurious to property and improvements in the neighborhood; or to the general welfare of the County.

- EVIDENCE:**
- a) The project was reviewed by HCD- Planning, County of Monterey Regional Fire Protection District, HCD-Engineering Services, HCD-Environmental Services, and Environmental Health Bureau. The respective agencies have recommended conditions, where appropriate, to ensure that the project will not have an adverse effect on the health, safety, and welfare of persons either residing or working in the neighborhood.
  - b) All necessary public facilities will be provided to the proposed single-family dwelling. Potable water will be provided to the parcel by the California American Water Company (Cal Am), and the project proposes a new onsite wastewater treatment system (OWTS). The Environmental Health Bureau reviewed the conceptual OWTS and expressed no concerns.
  - c) The prepared Tree Assessment includes a property specific fuel management plan. This fuel management plan recommends compliance with California Public Resources Code section 4291 (Defensible Space), which establishes fuel reduction and vegetation management guidelines for areas within 100 feet from structures. Within 5 feet of the proposed structure (with an attached deck), an ember-resistant zone (no combustible materials) is recommended. Accordingly, trees within 5 feet of the residence and attached deck are proposed for removal and as conditioned, only non-combustible plant materials would be planted within this area. Within 5-30 feet of the proposed structure, multiple planting types would be supported, with an emphasis placed on utilizing fire-appropriate plant materials with adequate spacing and irrigation. Given the steepness of the property, grassland and Oak understory within 5-100 feet of the proposed structure would be mowed and lower branches (8-10 feet above the ground) would be pruned. Condition No. 12 requires that the recommendations of the arborist report and fuel management plan be incorporated into the final landscape plans. On-going compliance with this condition will ensure that the property owner is adequately maintaining defensible space, as required by California Public Resources Code section 4291. The Monterey County Regional Fire Protection District reviewed the proposed project and made no comments.
  - d) Staff conducted a site inspection on October 28<sup>th</sup>, 2024 to verify that the site is suitable for this use.
  - e) The application, project plans, and related support materials submitted by the project applicant to the County of Monterey HCD - Planning for the proposed development found in Project File PLN230131.

4. **FINDING:** **NO VIOLATIONS** - The subject property is in compliance with all rules and regulations pertaining to zoning uses, subdivision, and any

other applicable provisions of the County's zoning ordinance. No violations exist on the property.

- EVIDENCE:**
- a) Staff reviewed County of Monterey HCD - Planning and Building Services Department records and is not aware of any violations existing on subject property.
  - b) Staff conducted a site inspection on October 28<sup>th</sup>, 2024 and researched County records to assess if any violation exists on the subject property.
  - c) The application, plans and supporting materials submitted by the project applicant to County of Monterey HCD-Planning for the proposed development are found in Project File PLN230131.

5. **FINDING:** **CEQA (Exempt)** - The project is categorically exempt from environmental review and no unusual circumstances were identified to exist for the proposed project.

- EVIDENCE:**
- a) California Environmental Quality Act (CEQA) Guidelines Section 15303 categorically exempts the construction and location of limited numbers of new, small facilities or structures including one single-family residence in a residential zone.
  - b) The proposed project involves the construction of a 3,477 square foot single-family dwelling with an attached 606 square foot garage, an attached 369 square foot deck, and associated site improvements including a 320 square foot driveway. Therefore, the project is consistent with the categorical exemption requirements of CEQA Guidelines section 15303.
  - c) No adverse environmental effects were identified during staff review of the development application during a site visit on October 28<sup>th</sup>, 2024.
  - d) None of the exceptions under CEQA Guidelines Section 15300.2 apply to this project. There is no significant effect on the environment due to unusual circumstances. Project location is not within a sensitive environment. There is no cumulative impact without any prior successive projects of the same type in the same place, over time and no new land use is proposed. The site is not included on any list compiled pursuant to Section 65962.5 of the Government Code to be considered on a hazardous waste site. Removal of 10 protected trees will not result in an adverse environmental impact or significant long-term impacts (see Finding No. 6). The proposed project will also not be visible from any scenic vista or corridor (see Finding No. 1, Evidence "e"). No known historical resources are found in the geotechnical report which may cause a substantial adverse change in the significance of a historical resource.
  - e) The application, project plans, and related support materials submitted by the project applicant to County of Monterey HCD-Planning for the proposed development found in Project File PLN230131.

6. **FINDING:** **TREE REMOVAL** - The siting, location, size, and design has been established to minimize tree removal and has been limited to that required for the overall health and long-term maintenance of the property.

- EVIDENCE:**
- a) The project includes application for the removal of 10 protected Oak trees. In accordance with the applicable policies of the Toro Area Plan

and the Monterey County Zoning Ordinance (Title 21), a Use Permit is required and the criteria to grant said permit have been met.

- b) Pursuant to Title 21 section 21.64.260.D.3.a, a Use Permit is required for the removal of landmark Oaks, or more than three protected trees. Title 21 section 21.64.260.C.1 identifies Oak and Madrone trees over six inches in diameter as being protected within the Toro Area Plan. Additionally, Title 21 section 21.64.260.C.5 protects landmark Oak trees, which are twenty-four inches or more in diameter when measured two feet above the ground, or trees that are visually significant, historically significant, or exemplary of their species. As proposed, the project involves the removal of 10 Oak trees (two landmarks) that were assessed in the Arborist report (LIB240056) as being in fair to poor conditions with several showing present signs of decay, suppression, or structural failure.
- c) The proposed tree removal is the minimum required under the circumstances of this case. The subject property is highly constrained by slopes in excess of 25% and Coast live oaks, as well as a Scenic Easement which covers the majority of the southern portion of the property. These constraints restrict development to the northern portion of the property, which is where much of the existing tree canopy is located. As sited and designed, the proposed development occurs in the least forested location within the developable area and utilizes a two-story design to avoid having an expansive development footprint that would impact more protected trees. Five of the trees proposed for removal (identified in the Arborist report as tree numbers 70, 73, 74, 75, and 76) are directly within the proposed development footprint. Three trees proposed for removal (identified in the Arborist report as tree numbers 69, 79, and 80) will be impacted by construction of the proposed driveway and the associated cut and fill into the hillside resulting in damage to structural roots.
- d) Title 21 section 21.64.260.C.5 prohibits the removal of landmark Oaks, unless the required findings of section 21.64.260.D.5 can be made. Required findings include that the removal is the minimum necessary and removal will not involve an adverse environmental impact, or that the tree is diseased, injured, or in danger of falling on or too close to proposed or existing development. The two landmark Oaks proposed for removal (identified in the Arborist report as tree numbers 77 and 78) are within or immediately adjacent to the footprint of the proposed attached deck and are both identified in the Arborist report as being in poor conditions with present decay and structural defects. Tree 77 is within the footprint of the deck and will be removed as a result. Tree 78 is adjacent to the deck. The arborist proposes the removal of this tree as construction will likely worsen its structure defects and pose a threat to the residence. Therefore, with the removal of ten protected Oak trees, the proposed tree removal is limited to that which is necessary for the proposed development and to reduce potential hazards.
- e) Relocating the residence would require the removal of additional trees. As sited and designed, twelve other protected trees on the subject property will be retained, including several dual and multi-stem oak

trees. Title 21 section 21.64.260.C.4 requires replacement or relocation of each removed protected tree at a minimum of a one-to-one ratio. In this case, 10 trees are required to be replanted, and the applicant proposes to replant 11 trees (Condition No. 11).

- f) Measures for tree protection during construction have been incorporated as a condition of approval, and include tree protection zones, trunk protection, hand excavation and bridging roots.
- g) No significant long-term effects on the forest ecosystem are anticipated. The project as proposed will not significantly reduce the availability of wildlife habitat over the long term.
- h) Staff conducted a site inspection on October 28, 2024 to verify that the tree removal is the minimum necessary for the project and to identify any potential adverse environmental impacts related to the proposed tree removal.
- i) The application, plans and supporting materials submitted by the project applicant to County of Monterey HCD-Planning for the proposed development are found in Project File PLN230131.

7. **FINDING:** **SLOPES IN EXCESS OF 25 PERCENT** – There is no feasible alternative that would allow development to occur on slopes of less than 25 percent and the proposed development better achieves the goals, policies, and objectives of the Monterey County General Plan and Toro Area Plan and the Monterey County Zoning Ordinance (Title 21) than other development alternatives.

- EVIDENCE:**
- a) Pursuant to Title 21 section 21.64.230 and General Plan Policy OS-3.5, development on slopes exceeding 25 percent is allowed subject to the granting of a Use Permit if there are no feasible alternatives that would allow development to occur on slopes less than 25 percent and/or if the project better achieves the goals, policies, and objectives of the County of Monterey General Plan and applicable area plan. In this case, the proposed project involves development on slopes and the criteria to grant the Use Permit have been met.
  - b) The majority of subject property constraints slopes in excess of 25%, as shown on County GIS records and the attached slope map. There are limited areas within the subject property that do not contain slopes in excess of 25%. The majority of the areas not containing slopes in excess of 25% are located on the southern and ridgeline portions of the property. However, the southern half of the property is placed in a Scenic Easement that prohibits structural development. The only developable (non-easement) area of the property is directly adjacent to San Benancio Canyon Road. Within this area, there are limited portions that contain less steep slopes (approximately 2,000 square feet). Though the single-family dwelling is situated on these less steep areas, a majority of the proposed project still requires development on slopes due topography of the site. Given the steepness of the entire property, there is no alternative that would allow the proposed development to be sited on less steep slopes. Therefore, in this case, there is no feasible alternative that would allow development on slopes less than 25%.

- c) The original project scope had a site coverage of 4,186 square feet and site disturbance of 12,900 square feet. The proposed project scope represents an overall reduced design that has a site coverage of 3,140 square feet (25% reduction) and site disturbance of 11,900 square feet (8% reduction). The revised design's reduction in total ground disturbance also reduced the amount of development on slopes in excess of 25%. Of the total ground disturbance, 1,700 square feet would be on slopes less than 25%, and 10,200 square feet would be on slopes greater than 25%. The reducing in site disturbance is the result of reducing the size of the attached deck from 606 square feet to 369 square feet, the size of the main residence from 3,633 square feet to 3,477 square feet, and the size of the garage from 742 square feet to 606 square feet. Additionally, as recommended by the Planning Commission on February 12, 2025, the proposed design sites the garage to under the home rather than adjacent to it and removes an exterior staircase. These design choices reduce the required development on slopes to the minimum required to allow for construction of a reasonably sized single-family dwelling and driveway. The proposed reduction in hillside alteration and associated reduction of development on slopes in excess of 25% aligns with the purpose of General Plan Policy OS-5.5, which encourages hillsides and existing terrain in visually sensitive areas be preserved.
- d) General Plan Policy OS 1.3 prohibits ridgeline development that will create a substantially adverse visual impact when viewed from a common public viewing area. Consistent with this policy, the proposed location of the residence avoids ridgeline development by siting the structure on the lower elevations of the property, adjacent to San Benancio Canyon Road. Toro Area Plan Policy T-3.7 encourages the preservation of Oak trees. As described in Finding No. 6 and supporting evidence, the proposed project, as sited, minimizes tree removal. Although ten trees are proposed for removal, alternative development locations would increase the amount of development on slopes and the number of trees impacted by development. The property currently contains a dirt access road that is slopes in excess of 25%. This access road will not be used as the project proposes a new driveway configuration to better match the contours of the land and provide less steep access to the proposed residence, as required by fire standards. Thus, consistent with General Plan Policy O-5.5, although the entirety of the subject property's hillside is infeasible, the project's two-story design and driveway that better matches the contours of the land help to minimize significant cuts into the hillside that would be visible from common public viewing areas. Therefore, the project as sited and designed better achieves the goals, policies, and objectives of the County of Monterey General Plan and Toro Area Plan.
- e) In accordance with General Plan Policy OS-3.5(1)(d), as a standard condition of approval, a conservation and scenic easement shall be recorded over portions of the property with greater than 25% outside of the development footprint, ensuring the long-term protection of the resource (Condition No. 9).

- f) The application, project plans, and related support materials submitted by the project applicant to the County of Monterey HCD-Planning for the proposed development found in Project File PLN230131.

8. **FINDING:** **APPEALABILITY** - The decision on this project may be appealed to the Board of Supervisors.

**EVIDENCE:** a) Board of Supervisors. Section 21.80.040.D of the Monterey County Zoning Ordinance (Title 21) allows an appeal to be made to the Board of Supervisors by any public agency or person aggrieved by a decision of the Planning Commission.

### **DECISION**

GENERAL NOTES:

KEY NOTES

- THIS EROSION CONTROL PLAN, NOTES AND DETAILS ARE DEVELOPED TO REMAIN EFFECTIVE UNTIL COMPLETION OF ALL CONSTRUCTION WITHIN THE LIMIT SHOWN OR UNTIL PERMANENT GROUND COVER IS ESTABLISHED. ESC MEASURES SHALL BE ADDED OR ADJUSTED THROUGH CONSTRUCTION PHASES AS NECESSARY TO PREVENT SEDIMENT RUNOFF FROM THE SITE.
- ALL DETAILS SHOWN ON SHEET MAY NOT BE REQUIRED. REFER TO PLAN FOR MINIMUM REQUIREMENTS. REFER TO EROSION SEDIMENTATION CONTROL NOTE NO. 3 FOR ADDITIONAL REQUIREMENTS.
- ANY VEHICLE ENTRANCE/EXIT DESIGNATED ON THE EROSION CONTROL PLAN THAT IS NOT TO BE USED FOR THIS PURPOSE, SHALL BE BLOCKED TO TRAFFIC. INSTALL VEHICLE BARRIERS AT ALL DRIVEWAY APPROACHES NOT TO BE USED AS STABILIZED CONSTRUCTION ENTRANCE.
- THE FOLLOWING WERE REVIEWED AND DO NOT PERTAIN TO THIS PROJECT:
  - THERE ARE NO NATURAL RESOURCE SITES, DESIGNATED BUFFER OR OTHER PROTECTED AREAS.
  - THERE ARE NO BORROW SITES.
  - THERE ARE NO CONSERVATION ZONES.
- THE SOIL TYPE IS MEDIUM DENSE TO VERY DENSE SILTY SAND.
- EX. VEGETATION CONSISTS SPARSE WEEDS, NATIVE GRASSES, COAST LIVE OAK TREES, & MONTEREY PINE TREES.
- SITE IS NOT LOCATED WITHIN A FEMA FLOOD ZONE.

EROSION SEDIMENTATION CONTROL NOTES

- THE IMPLEMENTATION OF THESE ESC PLANS AND THE CONSTRUCTION, MAINTENANCE, REPLACEMENT, AND UPGRADING OF THESE ESC FACILITIES IS THE RESPONSIBILITY OF THE CONTRACTOR UNTIL ALL CONSTRUCTION IS COMPLETED AND APPROVED.
- THE ESC FACILITIES SHOWN ON THIS PLAN MUST BE CONSTRUCTED IN CONJUNCTION WITH ALL CLEARING AND GRADING ACTIVITIES, AND IN SUCH A MANNER AS TO ENSURE THAT SEDIMENT-LADEN WATER DOES NOT ENTER THE DRAINAGE SYSTEM OR VIOLATE APPLICABLE WATER STANDARDS.
- THE ESC FACILITIES SHOWN ON THIS PLAN ARE THE MINIMUM REQUIREMENTS FOR ANTICIPATED SITE CONDITIONS. DURING THE CONSTRUCTION PERIOD THESE ESC FACILITIES SHALL BE UPGRADED, AS NEEDED FOR UNEXPECTED STORM EVENTS AND TO ENSURE THAT SEDIMENT-LADEN WATER DOES NOT LEAVE THE SITE.
- THE ESC FACILITIES SHALL BE INSPECTED DAILY BY THE CONTRACTOR AND MAINTAINED, AS NECESSARY, TO ENSURE THEIR CONTINUED FUNCTIONING.
- AT NO TIME SHALL MORE THAN ONE FOOT OF SEDIMENT BE ALLOWED TO ACCUMULATE WITHIN A TRAPPED CATCH BASIN. ALL CATCH BASINS AND CONVEYANCE LINES SHALL BE CLEANED PRIOR TO PAVING. THE CLEANING OPERATION SHALL NOT FLUSH SEDIMENT-LADEN WATER INTO THE DOWN STREAM SYSTEM.
- ALL UTILITY CONNECTIONS MADE OUTSIDE OF THE PROPERTY LINES SHALL MEET ESC REQUIREMENTS. CONTRACTOR SHALL INSTALL SEDIMENT BARRIERS DOWN GRADE OF DISTURBED AREAS AND PROTECT DOWN STREAM STORM WATER INLETS.
- ALL SEDIMENT BARRIERS WILL REMAIN IN PLACE UNTIL DRAINAGE FACILITIES ARE CONSTRUCTED AND PERMANENT GROUND COVER HAS BEEN REESTABLISHED.

STORM DRAIN INLET PROTECTION

- STORM DRAIN INLETS WHICH ARE OPERATIONAL PRIOR TO PERMANENT STABILIZATION OF THE DISTURBED AREA SHALL BE PROTECTED TO PREVENT SEDIMENT FROM ENTERING THE STORM DRAIN SYSTEM.
- ALTERNATIVE INLET PROTECTION METHODS ARE ENCOURAGED. THIS ALLOWS THE OPPORTUNITY TO USE NEW AND INNOVATIVE EROSION PRODUCTS AND TECHNIQUES. TWO OF THE LATEST TECHNIQUES ARE THE USE OF A "FRAMED SEDIMENT SACK" PLACED INSIDE OF THE CATCH BASIN AND THE USE OF A "SEDIMENT DAM" PLACED INSIDE OF THE CURB INLET TO CATCH SEDIMENT AND RUNOFF LEAVING THE SITE. WHEN INSTALLED AND MAINTAINED CORRECTLY, THESE TECHNIQUES HAVE BEEN EFFECTIVE IN ACHIEVING THE DESIRED RESULTS.

STOCK PILES

- INSTALL BIO BERM OR SEDIMENT FENCING/BARRIERS AT TOE OF SLOPE.
- STOCK PILES ON SITE DURING COLD WET WEATHER SEASON (NOVEMBER 15 THROUGH APRIL 30) SHALL BE COVERED WITH POLYETHYLENE PLASTIC SHEETING 6 MIL MINIMUM THICKNESS.
- COVERING SHALL BE INSTALLED AND MAINTAINED TIGHTLY IN PLACE BY USING SANDBAGS ON ROPE WITH A MAXIMUM 10' GRID SPACING IN ALL DIRECTIONS. ALL SEAMS SHALL BE TAPED OR WEIGHTED DOWN FULL LENGTH AND THERE SHALL BE AT LEAST A 12" OVERLAP OF ALL SEAMS. FOR SEAMS PARALLEL TO THE SLOPE CONTOUR, THE UPHILL SHEET SHALL OVERLAP THE DOWNHILL SHEET. NO RUNOFF SHALL BE ALLOWED TO RUN UNDER THE PLASTIC COVERING.
- CONSTRUCTION MATERIALS CONTAINING TOXIC CONTAMINANTS SHALL NOT BE STORED WITHIN 25 FEET OF ANY STORM DRAIN INLET STRUCTURE OR DESIGNATED PROTECTED AREA.
- DEBRIS, WASTE AND GARBAGE PILES SHALL NOT BE PLACED WITHIN 25 FEET OF ANY STORM DRAIN INLET STRUCTURE OR DESIGNATED PROTECTED AREA.
- LOCATION OF CONSTRUCTION MATERIAL STORAGE AREAS AND DEBRIS, WASTE AND GARBAGE PILE AREAS SHALL BE PROVIDED BY THE CONTRACTOR TO JURISDICTION AT THE TIME OF THE INITIAL ESC CONTROL INSPECTION.

CONCRETE TRUCK WASH AREA

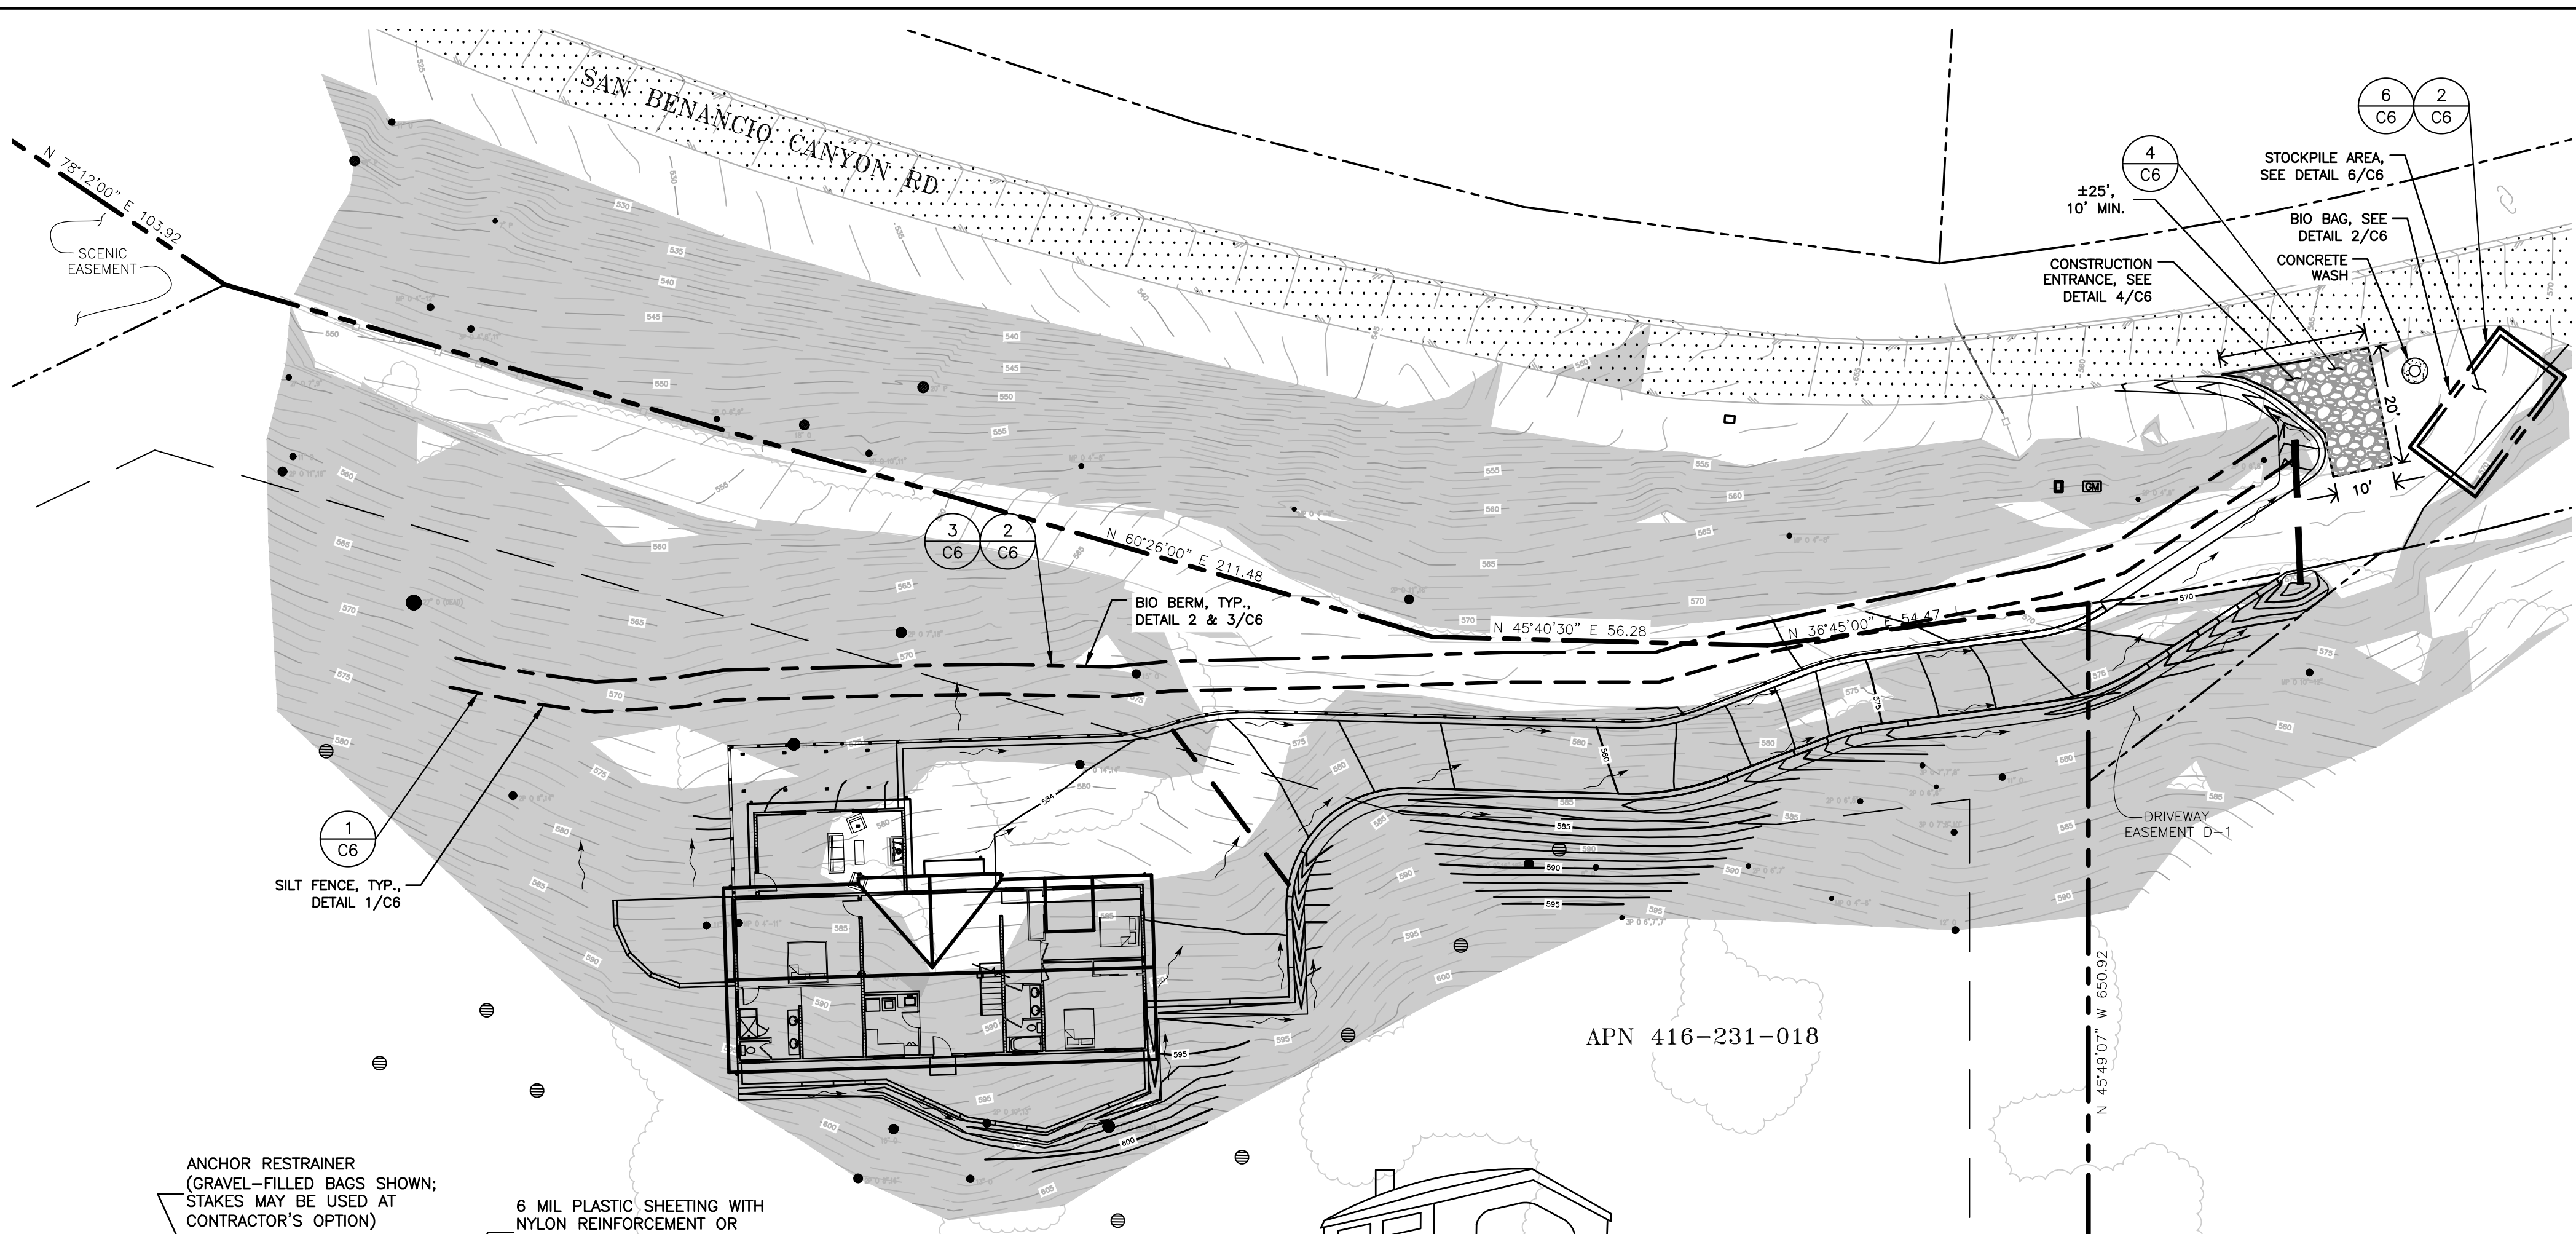

- PROVIDE CONCRETE TRUCK WASH AREA ADJACENT TO CONSTRUCTION ENTRANCES. COMPLY WITH PERMIT PERMIT OUTCOME REQUIREMENTS.
- CONCRETE WASH AREAS SHALL BE CONSTRUCTED OF ONE OF THE FOLLOWING:
  - STRAW BALE BARRIER WITH PLASTIC LINER.
  - STACKED SAND BAGS OR BIO-BAGS AS A BARRIER WITH PLASTIC LINER.
  - PORTABLE CONTAINMENT POND.
- LOCATION OF CONCRETE TRUCK WASH AREAS ARE SHOWN ON THIS SHEET.

STABILIZED CONSTRUCTION ENTRANCE

- ESTABLISHED CONSTRUCTION ENTRANCES SHALL BE INSTALLED AT THE BEGINNING OF CONSTRUCTION AND MAINTAINED FOR THE DURATION OF THE PROJECT IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT INTO PUBLIC RIGHT OF WAY.
- ADDITIONAL GRAVEL SHALL BE ADDED PERIODICALLY, IF NECESSARY, TO MAINTAIN PROPER FUNCTION OF THE PAD.
- IF THE GRAVEL PAD DOES NOT ADEQUATELY REMOVE DIRT AND MUD FROM VEHICLE WHEELS SUCH THAT MUD AND DIRT TRACKING IS EVIDENT OFF SITE, ADDITIONAL MEASURES MUST BE TAKEN. SUCH MEASURES MAY INCLUDE HOSEING OFF WHEELS BEFORE VEHICLES LEAVE THE SITE OR OTHER CONSTRUCTION TECHNIQUES/WORK OPERATION MODIFICATIONS. WHEEL WASHING SHOULD BE DONE ON THE GRAVEL PAD AND WASH WATER SHOULD DRAIN THROUGH A SILT-TRAPPING STRUCTURE PRIOR TO LEAVING THE CONSTRUCTION SITE.

SCHEDULE FOR CONSTRUCTION AND IMPLEMENTATION OF ESC CONTROLS

- SEDIMENT FENCE/BARRIER WILL BE PLACED PRIOR TO ANY SITE GRADING OR SURFACE DISTURBANCE.
- CONSTRUCT ANY REQUIRED GRAVEL CONSTRUCTION ENTRANCES, TRUCK WHEEL WASH, AND CONCRETE TRUCK WASH AREAS.
- ALL EROSION CONTROLS WILL BE COMPLETED IN ONE PHASE.
- CONSTRUCTION WILL BE COMPLETED IN ONE PHASE.
- EXPECTED TIME PERIOD OF LAND DISTURBING ACTIVITIES IS 6 MONTHS.
- FOR CONSTRUCTION BETWEEN NOVEMBER 15-APRIL 30 ADDITIONAL COLD WET WEATHER MEASURES ARE REQUIRED (ESTABLISHED GRASS, 2" MINIMUM STRAW MULCH COVER, OR 3" MINIMUM COMPOST/ORGANIC SOIL MULCH COVERTION OVER DISTURBED AREAS 2 PERCENT OR GREATER).
- SWEEP STREETS ADJACENT TO CONSTRUCTION ENTRANCES A MINIMUM OF ONCE PER WEEK.
- REESTABLISH GROUND COVER OR LANDSCAPE PRIOR TO REMOVING ESC MEASURES (POST-CONSTRUCTION).
- REMOVE ESC MEASURES.

NOTES:

- ALL STOCKPILES SHALL BE CONTAINED AND COVERED WHEN NOT ACTIVE, AND SECURED AT THE END OF EACH DAY.
- STOCKPILES SHALL BE SECURELY COVERED OVERNIGHT, AND PRIOR TO, DURING, AND AFTER RAIN EVENTS.
- NO MATERIAL SHALL LEAVE THE SITE OR MOVE INTO STREET.
- PLASTIC SHEETING HAS LIMITATIONS DUE TO SUNLIGHT BREAKDOWN, HARD TO MANAGE IN WINDY CONDITIONS, AND CAN INCREASE RUNOFF ISSUE FOR PERIMETER CONTROLS. INSPECT FREQUENTLY OR USE GEOSYNTHETIC FABRIC AS APPLICABLE.
- DO NOT LOCATE WITHIN 50 FEET OF A STORM DRAIN.

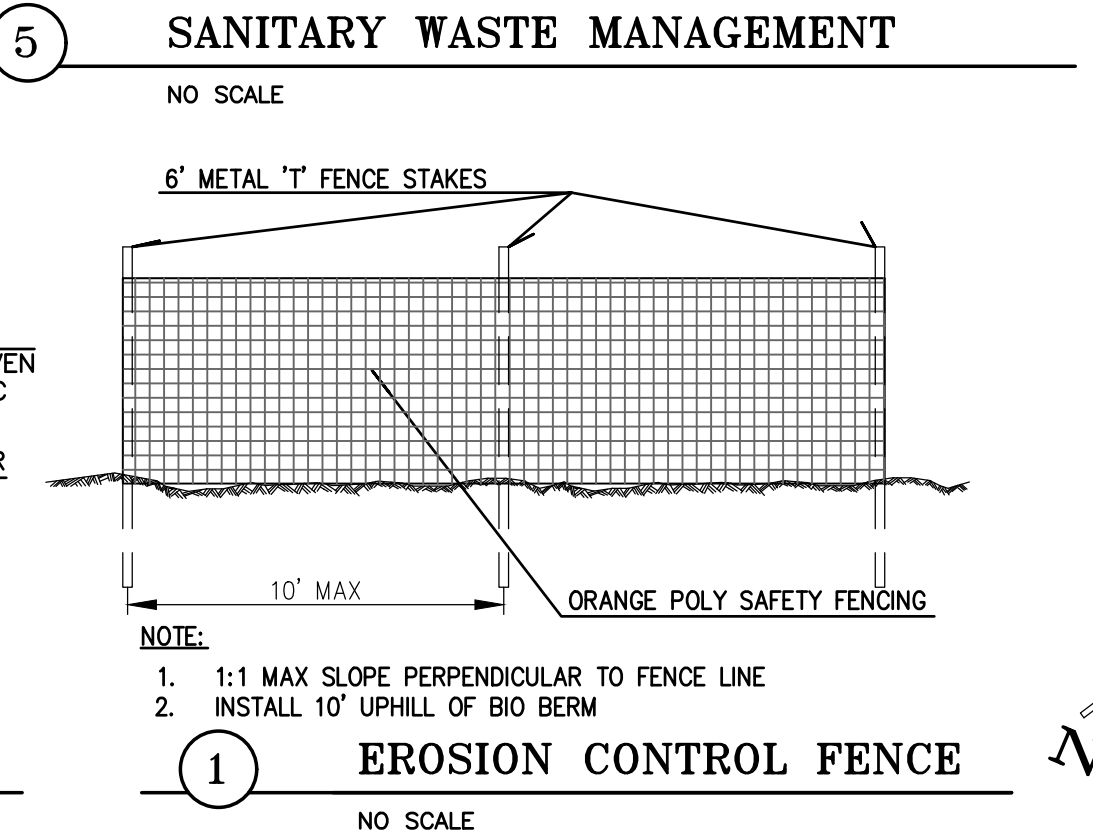

NOTES:

- FOR SLOPES 2-5% USE 24" - 36" WIDE BY 12" - 18" HIGH BERM
- FOR SLOPES GREATER THAN 5% USE 36" - 48" WIDE BY 18" - 24" HIGH BERM

STORAGE AND DISPOSAL PROCEDURES

- TEMPORARY SANITARY FACILITIES SHOULD BE LOCATED AWAY FROM DRAINAGE FACILITIES, WATERCOURSES, AND FROM TRAFFIC CIRCULATION. IF SITE CONDITIONS ALLOW, PLACE PORTABLE FACILITIES A MINIMUM OF 50 FEET FROM DRAINAGE CONVEYANCES AND TRAFFIC AREAS.
- WHEN SUBJECTED TO HIGH WINDS OR RISK OF HIGH WINDS, TEMPORARY SANITARY FACILITIES SHOULD BE SECURED TO PREVENT OVERTURNING.
- TEMPORARY SANITARY FACILITIES MUST BE EQUIPPED WITH SECONDARY CONTAINMENT TRAYS TO PREVENT DISCHARGE OF POLLUTANTS TO THE STORM WATER DRAINAGE SYSTEM OF THE RECEIVING WATER.
- ARRANGE FOR REGULAR WASTE COLLECTION, DO NOT ALLOW SANITARY FACILITY TO BECOME OVERFULL.

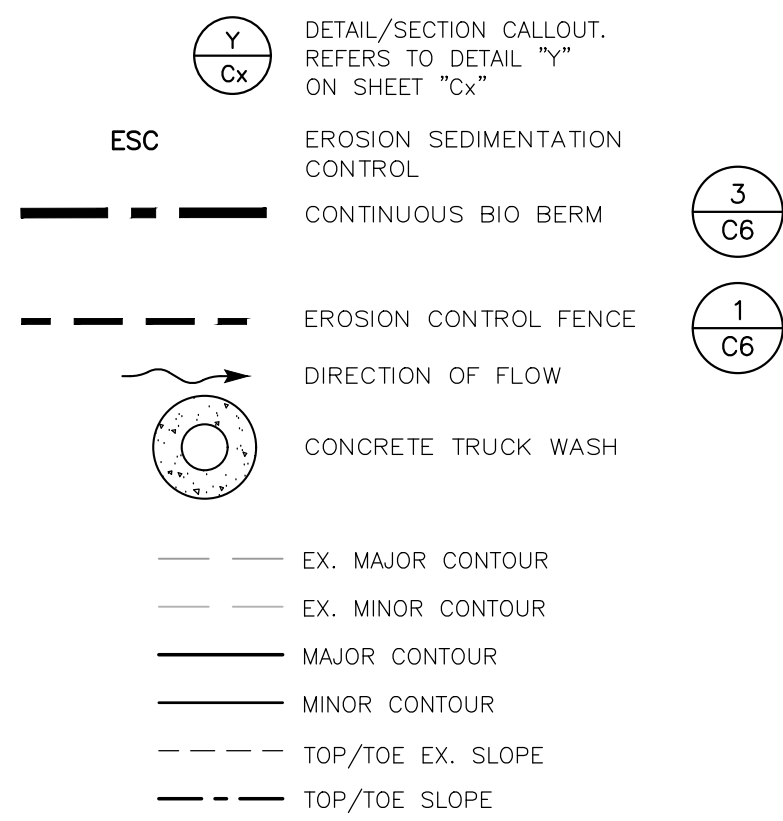

NOTE:

- 1:1 MAX SLOPE PERPENDICULAR TO FENCE LINE
- INSTALL 10' UPHILL OF BIO BERM

EROSION CONTROL NOTES:

- IN CASE OF EMERGENCY CALL DAN CURRIER AT (831) 676-6626
- A STANDBY CREW FOR EMERGENCY WORK SHALL BE AVAILABLE AT ALL TIMES. NECESSARY MATERIALS SHALL BE AVAILABLE ON SITE AND STOCKPILED AT APPROVED LOCATIONS TO FACILITATE RAPID CONSTRUCTION OF TEMPORARY DEVICES OR TO REPAIR DAMAGED EROSION CONTROL MEASURES
- AFTER A RAINSTORM, ALL SILT AND DEBRIS SHALL BE REMOVED FROM CHECK BERMS AND DE-SILTING FACILITIES. GRADED SLOPE PROTECTION MEASURES DAMAGED DURING THE RAINSTORM SHALL ALSO BE REPAIRED
- A SIX-FOOT HIGH PERIMETER FENCE OR 24-HOUR GUARD SHALL BE PLACED ON THE SITE WHENEVER THE DEPTH OF WATER IN A FACILITY EXCEEDS 18 INCHES
